"A pair of elegant stairs, with the sides covered and carpeted, were erected to land the General safe on the dock. Immediately upon his landing, thirteen guns were fired from the dock, and the whole city rung with repeated busses... The procession immediately formed and proceeded from the Coffee House... The General walked... at the right of Governor Clinton. The General was dressed in blue, with buff-colored underclothes. The procession moved very slow and with great solemnity. The windows, stoops, and streets were crowded... Notwithstanding all the exertion of the guard to keep the crowd off, they were so wedged in by Embree's corner [Pearl St.] that they could not move for some time. The General was obliged to wipe his eyes several times before he got into Queen Street... "It is now half after nine o'clock... I walked up Queen [Pearl] and Wall Streets and round by the new buildings back through Hanover Square. Every house is illuminiated except those of the Quakers. The appearance is brilliant beyond description. Sir John's house [Sir John Temple's, 188 Queen St.] makes a grand appearance.

"... The new buildings of McComb & Edgar [on Broadway] exceed any. Notwithstanding the rain, the streets were filled with men, women, and children. A great variety of taste has been dis-
1789
Apr. 23

played in the arrangement of candles; some are in the form of a pyramid—some in one shape, and some in another. A great number of figures and curious motes are to be seen. Among the rest, one at Mr. Scriba's large brick house, at the corner of the Fly Market [1789], took my attention; in one window there was a building, supported by two filigree columns, with the names of the respective States upon them, supporting it; on a window in the right was written in an oval, neatly decorated, "Vivant our illustrious President George Washington;" . . . —Hist. Mag. (1860), 1st.

His Excellency Don Diego de Gardoqui, the diplomatic representative from Spain, who witnessed the event of the day, went to the Spanish minister of state, Count Florida Blanca, on April 24, a descriptive letter, saying in part:

"When his Excellency found himself at a proper distance from his Catholic Majesty's man-of-war, the Galveston, commanded by the Lieutenant of the Navy Don Adrian Tromoso, who had taken his station at the confluence of the North and East Rivers, where he [Washington] had passed, the above-mentioned officer saluted him with fifteen cannon-shots, five vives for the king, and other honors—the first shot being so powerful in its detonation that it surprised the immense pageant by land and sea, meriting not only the general applause and hand-clapping of all, but also five more cheers instead of the customary three cheers.

The present foot to the mansion designed for his residence, . . . through the drawn-up lines of State troops, who presented arms and lowered the standards as he passed them.

"After reaching the house a levée was held. When this terminated, the Governor ordered a company of infantry with its officers to guard the house; the moment General Washington noticed them, he begged them to retire, being in need of no other guard than his own fellow-citizens.

"On that night the citizens had proposed to illuminate their houses with fire-works, but the heavy rain which began toward evening and lasted all night disappointed their intentions, as also the magnificent illuminations projected by the ministers of Spain and France."—Translation from the original in the Spanish Archives, pub. in The Hist. of the Centennial Celebration of the Inauguration of Geo. Washington.

Comte de Mustier wrote, on June 5, to the minister of foreign affairs at Paris, a brief dispatch, stating in part:

"I proceeded in a coach toward the place where the President had landed, . . . I arrived near to General Washington, whom I recognized only by his gestures of satisfaction at seeing me; and, what was undoubtedly a greater compliment, I was summoned at that moment to the presence. I was conducted from the coach to the humble house which had been provided as his residence. There he received homage from those who had escorted him, and from a great number of other people who came to the house . . . Each shook his hand, according to the general habit, which begins to die out among the people of higher rank, and from which the President mostly excuses himself, so that now he only shakes hands with those who offer theirs, instead of advancing as he has always done before. There was also a great provision of wine and punch, which the President himself offered to me; but I reminded him how I had objected, in Mount Vernon, to that usage."

—Ibid., 34, as translated from the French archives.

Miss Eliza Morton (afterwards Mrs. Josiah Quincy) saw Washington's arrival by looking from a shop window on the wharf where he was received. She stated in her recollections, written in 1821: "Carpets were spread to the carriage prepared for him; but he preferred walking through the crowded streets, and was attended by Governor Clinton and many other officers and gentlemen. He frequently bowed to the multitude, and took off his hat to the ladies at the windows, who waved their handkerchiefs, and threw flowers before him, and shed tears of joy and congratulation. The whole city was one scene of triumphant rejoicing. His name, in every form of decoration, appeared on the fronts of the houses; and the streets which he passed through to the Governor's mansion were ornamented with flags, silk banners of various colors, wreaths of flowers, and branches of evergreen. Never did anyone enjoy such triumph as Washington, who indeed "read his history in a nation's eye.""—Memor of the Life of Eliza S. Morton (1864).

Gen. Samuel B. Webb wrote: " . . . in all my life, I never saw such unfrequented joy in every countenance."—Correspondence and Journals (Ford, ed.), III: 128.

"Many persons who were in the crowd, on Thursday [Apr 23], were heard to say, that they should now die contented—nothing wanting to complete their happiness, previous to this auspicious period, but the sight of the Saviour of their Country."

"Some persons, advanced in years, who hardly expected to see the illustrious President of the United States, at the head of a great army of Heaven, were in the concourse on Thursday, and could hardly restrain their impatience, at being in a measure deprived of the high gratification, by the eagerness of the multitudes of children and young people, who probably might long enjoy the blessing."—Gaz. of the U. S., Ap 25, 1789.

"By a curious coincidence, the 23rd of April 1789—the day upon which Washington made this triumphal entry into New York City—was observed in Great Britain as a day of thanksgiving for the recovery of his mind by George III, whose obstinate folly had resulted in the independence of the nation over which Washington was to preside."—Smith's N. Y. City in 1789, 224.

"From this date until April 27, the senate and house of representatives arranged the plans for the inauguration of Washington.—Annals of Cong., Vol. I; Mag. of Am. Hist. (1888), XXI: 450-51.

The senate and house of representatives wait on President Washington "to congratulate him on his safe arrival at the seat of government."—Penn. Packet, My 5, 1789.

A Chamber of Commerce meets at the "Coffee-House," at about half past eleven o'clock, and proceeds "to the house of His Excellency the President of the United States, headed by John Broome, Theophylact Beach, and John Murray, Esquires." They "were conducted into the audience room, and upon his Excellency's entering, Mr. Broome, the President of the Chamber, addressed him to the following effect:—That he had the honor in the name of that Corporation, to congratulate His Excellency upon his safe arrival in this city, under the dignified Character of President of the United States, and also to inform him that the members of the chamber felt a singular pleasure in having a gentleman of his distinguished talents appointed to preside over the Union; and farther assured him that it would be their uniform endeavour by every constitutional exertion in their power, to render his Excellency an administration prosperous and happy."

"To which his Excellency replied to the following effect. That he was greatly obliged to the gentlemen of the chamber for the mark of their politeness and respect, and that he should be happy at all times, as far as lay with him, to promote the interest of commerce.

"After his Excellency's reply he was introduced by the Pres- ident of the Chamber to every member present."—N. Y. Daily Gaz., Ap 27, 1789; Penn. Packet, Ap 30, 1789.

Congress decides that the oath shall be administered to Wash- ington "in the outer gallery adjoining the Senate Chamber," instead of in "the Representatives' Chamber," which had been agreed upon on April 25—Annals of Cong., I: 207.

Mayor Duane, at the request of the common council, having prepared an address to be delivered by the corporation to Pres. Washington, it is submitted by him to the board, and approved. The following is the text in full:

"To the President of the United States
Sir,

The Mayor Aldermen & Commonalty of the City of New York beg leave to offer on our part a respectful and affectionate Congratulation on your safe arrival in this Metropolis; and at the same time to express the general Joy of our fellow Citizens of every Order on this auspicious Event.

"In thus presenting ourselves before you we experience all the Emotions which naturally arise, from a high veneration for your Character, an exalted Sense of your Services, and a perfect convic- tion that a Trust the most momentous which could be conferred by a free People has been committed to a Citizen who has given un- equivocal Proofs of his possessing all the good and great Qualities requisite to it's successful Discharge.

"With peculiar Pleasure Sir, we recall to mind that illustrious display of Wisdom Virtue and Valor which distinguished your military Command: With equal Pleasure we recollect the exemplary Abstention which marked your behavior from the time of the Victo- rious Army to the Shade of private Life. Permit us to add that we contemplate with pious gratitude that unparalleled coincidence of cir- cumstances, which has constrained you, by Motives that Patriotism
could not resist, to reengage in the arduous Duties of a public Apr.

27 Sta

"Long in the habit of revering you as the Father of our Country, we rejoice at the happiness of being once more placed under your Protection; we consider the Unanimity, which prevailed in your Appointment, as a presage that our national Government will be firmly established in the Hearts of all the People and receive their united and zealous support, and we are fully persuaded that, under the Divine Favour, it's operation will be productive of the most extensive Benefits and Blessings, and render the Union as respectable in Peace, as under your Auspices, it was triumphant in War.

"To our most fervent Wishes for your personal Happiness and for the Success of your Administration we should not do Justice, to the Sentiments of our fellow Citizens, if we did not add the strongest Assurances of their inviolable Attachment to you and of their earnest Disposition to render you all the Support which can flow from the most cordial Respect, Gratitude and Confidence.

"Signed in behalf of the Corporation

Jas. Duane Mayor.

The common council appoints a committee to "wait on the President to know when and where he will be pleased to receive the said Address."—M. C. C. (1784-1811), I: 447-48. For its presentation, and Washington's reply, see May 9.

"The common council resolved not to use the city's credit further for the expenses of altering the city hall (see Dec. 3, 1788; Jan. 7, 1789); and the commissioners for superintending these improvements are requested "to govern themselves accordingly."—M. C. C. (1784-

1811), I: 448.

Trinity corporation petitions the common council for a grant of what is called "from High to low Water mark & thence two feet into the River, opposite to their Land between Chambers Street & the next adjacent Street to the Northward" (Rede St.). The petition was granted on May 15, at a quit-rent of one shilling per foot front, to commence at the expiration of 21 years.—M. C. C. (1784-1811), I: 448, 451. This, however, was reconsidered, and on May 25 it was ordered that the quit-rents commence at the expiration of 43 years.—Ibid., I: 454.

William Maclay records in his journal: "This day I ought to note with some extraordinary mark. I had dressed and was about to set out, when General Washington, the greatest man in the world, paid me a visit. I met him at the foot of the stairs: Mr. [Henry] Wynkoop just came in. We asked him to take a seat. He [Washington] excused himself on account of the number of his visits. We accompanied him to the door. He made us complainant bows—one before he mounted and the other as he went away on horseback."—Maclay's Jour. (1890).

"The Committees of both Houses of Congress, appointed to take order for conducting the ceremonial of the formal reception, &c. of the President of the United States, on Thursday next [April 30], are pleased to the following order hereon, viz.

"That a chair be placed in the Senate-Chamber for the President of the United States. That a chair be placed in the Senate-Chamber for the Vice-President, to the right of the President's chair; and that the Senators take their seats on that side of the chamber on which the Vice-President's chair shall be placed. That a chair be placed in the Senate-Chamber for the Speaker of the House of Representatives, to the left of the President's chair—and that the Representatives take their seats on that side of the chamber on which the Speaker's chair shall be placed.

"That seats be provided in the Senate-Chamber sufficient to accommodate the late President of Congress, the Governor of the Western territory, the five persons being the heads of the three great departments, the Minister Plenipotentiary of France, the Encargado de negocios de Spain, the Chaplains of Congress, the persons in the suite of the President; and also to accommodate the following Public Officers of the State, viz. The Governor, the Lieutenant-Governor, the Chancellor, the Chief Justice and other Judges of the Supreme Court, and the Mayors of the City. That one of the Assistants wait on these gentlemen, and inform them that seats are provided for their accommodation, and also to signify to them that no precedence of seats is intended, and that no salutation is expected from them on their entrance into, or their departure from the Senate-Chamber.

"That the members of both Houses assemble in their respective Chambers precisely at twelve o'clock and that the Representatives proceed by the Speaker, and attended by their Clerk and other Officers, proceed to the Senate-Chamber, there to be received by the Vice-President and Senators rising.

"That the Committees attend the President from his residence to the Senate-Chamber, and that he be there received by the Vice-President, the Senators and Representatives rising, and be by the Vice-President conducted to his chair.

"That after the President, shall be seated in his Chair, and the Vice-President, Senators and Representatives shall be again seated, the Vice-President shall announce to the President, that the members of both Houses will attend him to present at his taking the Oath of Office required by the Constitution. To the end that the Oath of Office may be administered to the President in the most public manner, and that the greatest number of the people of the United States, and without distinction, may be witnesses to the solemnity, that therefore the Oath be administered in the outer Gallery adjoining to the State-Chamber.

"That when the President shall proceed to the gallery to take the Oath, he be attended by the Vice-President, and he followed by the Chancellor of the State, and pass through the middle door, that the Senators pass through the door on the right, and the Clerk and other Assistants, preceded by the Speaker, pass through the door on the left, and such of the persons who shall have been admitted into the Senate-Chamber and may be desirous to go into the gallery, are then also to pass through the door on the right. That when the President shall have taken the Oath, and returned into the Senate-Chamber, attended by the Vice-President, and shall be seated in his Chair, the Senators and the Representatives also return into the Senate-Chamber, and that the Vice-President and they resume their respective seats.

"Both Houses having resolved to accompany the President after he shall have taken the Oath, to St. Paul's Chapel, to hear divine service, to be performed by the Chaplain of Congress, that the following order of procession be observed, viz. The door-keeper and Messenger of the House, the Speaker, the Senators and the Representatives also return into the Senate-Chamber, and that the Vice-President and they resume their respective seats.

"That after divine service shall be performed, the President be received at the door of the Church, by the Committees, and by them attended in carriages to his residence.

"That it be intrusted to the Assistants to take proper precautions for keeping the avenues to the Hall open, and that for that purpose they wait on General Washington, and in the name of the Committees request his aid, by an order of recommendation to the Civil Officers, or militia of the city, to attend and serve on the occasion, as he shall judge most proper."—From broadside, dated April 29, in Emmet Coll. (No. 9596), in N. Y. P. L.; see also descrip. of Frontispiece I, III: 538; and N. T. Daily Gaz., Ap 30, 1789. See Pl. 53-a, Vol. V.

Major L'Enfant declines the appointment as one of the assistants.—N. T. Daily Gaz., My 11, 1789.

Washington is inaugurated president.—Winson, VII: 267, 326. In anticipation of the event, spectators came from far and near, and the city was crowded.

"We shall remain here, even if we have to sleep in tents, as so many will have to do," wrote Miss Bertha Ingersoll to Miss [Sally] McKean; "Mr. Williamson had promised to engage us rooms at Francis', but that was jammed long ago, as was every other decent public house; and now while we are waiting at Mrs. Vandervoort's, in Maiden Lane, till after dinner, two of our beaux are running about town, determined to obtain the best places for us to stay at which can be opened for love, money, or the most persuasive speeches." Another young woman, after recounting the vice-President's Ben Franklin and various difficulties in finding agreeable accommodations in the metropolis, adds in a postscript, "I have seen him! and though I had been entirely ignorant that he was arrived in the city, I should have known at a glance that it was General Washington: I never saw a human being that looked so great and noble as he does. I could fall down
1879
Apr. 30

The first newspaper report of the event referred to it as "the ceremony of the introduction of his Excellency George Washington, to the Presidency of the United States." It stated, in part:

"The scene was extremely solemn and impressive.

"At nine o'clock A.M. the clergy of different denominations assembled their congregations in their respective places of worship, and offered up prayers for the safety of the President.

"About twelve o'clock the procession moved from the house of the President in Cherry Street, through Dock street, and Broad street, to Federal Hall [at Wall and Nassau Sts.], in the following order:

Col. [Morgan] Lewis supported by two officers
Capt. Stakes with troop of Horse
Artillery
Major Van Hornes, Grenadiers, under Capt. Harrison

"Then followed the multitude of citizens.

"When they came within a short distance of the Hall, the troop formed in line on both sides of the way, and its excellency passing through the ranks, was conducted into the building, and in the Senate chamber introduced to both houses of Congress—immediately afterwards, accompanied by the two houses, he went into the gallery fronting Broad street, where, in the presence of an immense concourse of citizens, he took the oath prescribed by the constitution, which was administered to him by the Hon. R. R. Livingston, Esq. Chancellor of the state of New-York.

"Immediately after he had taken the oath, the Chancellor proclaimed him President of the United States.—Was answered by the discharge of 13 guns, and by loud repeated shouts; on this the President bowed to the people, and stood for some time, to appear once again with their acclamations. His Excellency with the two Houses, then retired to the Senate Chamber, where he made the following speech. [The inaugural address is printed in full.]

"His Excellency, accompanied by the Vice President, the Speaker of the House of Representatives, and both Houses of Congress, then passed to [St.] Paul's parish church, where divine service was performed by the Right Revd. Dr. Provost, Bishop of the Episcopal Church in this State, and Chaplain to Congress [the Senate].

"The religious solemnity being ended, the President was escorted to his house, and the citizens retired to their homes. . . ."

—Daily Adv., My 1, 1789. Most of the other newspapers of the country, during the next few days, published practically the same report.—See N. Y. Daily Gaz., My 1; Gaz. of the U.S., My 2; N. Y. Weekly Museum, My 2; Independent Gazetteer, My 4; Penn. Packet, My 4; Mass. Spy, My 6; N. T. Jour., My 7; Maryland Jour., My 8; Boston Gaz., My 11. See also Hist. of Congress, by John Ag [1843], 29.

"The account in the N. T. Packet, May 1, mentioned the following additional features: In the first procession, from "the Federal State-House" to "the President's house," and back to the State-House, there were "Gentlemen in coaches" preceding the "Citizens on foot." The sheriff was on horseback. The president "joined the procession in his carriage and four." The balcony or outer gallery is front of the State-House was "decorated with a canopy and curtains of red intermixed with white." See also the French minister's account in The Hist. of the Centennial Celebration of the Inaug. of Geo. Washington, 48.

"The principal companies were Captain Stakes's troop of horse, equipped in the style of Lee's famous partisan legion; Captain Scriba's German Grenadiers, with blue coats, yellow waistcoats and breeches, black gaiters, and towering cone-shaped caps, faced with bear-skin; Captain Harrison's New York Grenadiers, composed, in imitation of the guard of the great Frederick, of only the tallest and finest-looking young men of the city, dressed in blue coats with red facings and gold lace borders, cocked hats with white feathers, and white waistcoats and breeches, and black spatterdashes, buttoned close to the shoe to the knee; and the Scotch Infantry, in full highland costume, with bagpipes."—Griswold, The Republican Court, 139.

"When Washington went to St. Paul's Chapel for the religious service, from federal hall, the flag (center of the flags) carried in the procession was provided by, and is still in the possession of, the Marine Society of N. Y.—See letter of Bishop Manning in N. Y. Times, Ag 4, 1824.

"The accounts written by spectators were most graphic. Gen. Wm. Maclay, of Pennsylvania, who kept a private journal of his activities and interests while in New York, from 1789 to 1791, recorded very intimate observations and impressions of the ceremonies connected with the inauguration. The crowd was already great when he entered the city hall at about ten o'clock. The senate met, and the vice-president (John Adams) "rose in the most solemn manner." (Maclay states that Adams was often "at loss for expressions," because, as he supposed, he was "wrapped up in the contemplation of his own importance,"—at which times he "suffers from unmeaning kind of vacant look to escape observation.") Adams said: "Gentlemen, I wish for the direction of the Senate. The President will, I suppose, address the Congress. How shall I behave? How shall we receive it? Shall it be standing or sitting?"

"The ways of the English parliament on such occasions were discussed quite thoroughly. While this was in progress, "Repeated accounts came [that] the Speaker and Representatives were at the door. Confusion ensued; the members left their seats. . . ."

Then, "The Speaker was introduced, followed by the Representatives. Here we sat an hour and ten minutes before the President arrived—this delay was owing to Lee, Izard, and Dalton, who had stayed with us while the Speaker came in, instead of going to attend the President. The President advanced between the Senate and Representatives, bowing to each. He was placed in the chair by the Vice-President; the Senate with their president on the right, the Speaker and the Representatives on his left. The Vice-President rose and addressed a short sentence to him. The import of it was that he should now take the office of President. He seemed to have forgot half what he was to say, for he made a dead pause, then he fumbled, and in a moment the applause was by the conspirator. He finished with a formal bow, and the President was conducted out of the middle window into the gallery, and the oath was administered by the Chancellor. Notice that the business [was] done was communicated to the crowd by proclamation, etc., who gave three cheers, and repeated it on the President's bowing to them.

"When the company returned into the Senate chamber, the President took the chair and the Senators and Representatives took their seats. He rose, and all rose also, and addressed them. [For address, see The Daily Adv., May 1, and other newspapers above cited.] This great man was agitated and embarrassed more than ever he was by the leveled canon or pointed musket. He trembled, and several times could scarce make out to read, though it must be supposed he had often read it before. He put part of the fingers of his left hand into the side of what I think the tailor called the fall of the breeches, changing the paper into his left hand. After some time he then did do the same with some of the fingers of his right hand. When he came to the words all the world, he made a flourish with his right hand, which left rather an ungainly impression. I sincerely, for my part, wished all set ceremony in the hands of the dancing-masters, and that this first of men had read off his address in the plainest manner, without ever taking his eyes from the paper, for I felt hurt that he was not first in everything. He was dressed in deep brown, with metal buttons, with an eagle on them, white stockings, a bag, and sword. . . ."—Maclay's Jour., 7-9.

Rudolph Van Dorsten, who represented The Netherlands at New York, stated among other things in his report on May 4th to the Recorder of the States-General that "His Excellency was dressed in plain brown clothes which had been presented to him by the mill at Hartford, Connecticut." One of the newspapers of the time stated that "The President on the day of his inauguration
Miss Eliza Morton, then fifteen years of age, who in 1793 mar-
ried Josiah Quincy, afterward president of Harvard University.

In his <em>History of Am. Hist.,</em> Mr. 1889, wrote, in 1821, her recollections of the
inauguration thus:

"... I was on the roof of the first house in Broad Street,
which belong to Captain Prince, the father of one of my school
companions; and so near to Washington that I could almost hear
him speak. The windows and roofs of the houses were crowded;
and in the streets the throng was so dense that it seemed as if
I might literally walk on the heads of the people. The balcony of
the Hall was in full view of this assembled multitude. In the centre
of it was placed a table, with a rich covering of red velvet;
and upon this was a crimson velvet cushion, on which lay a large and
elegant Bible. This was all the paraphernalia for this August scene.
All eyes were fixed upon the balcony where, at the appointed hour,
Washington entered, accompanied by the Chancellor. ... To
the great body of the people he had probably never been seen
except as a military hero. The first in war was now to be the first
in peace. His entrance on the balcony was announced by universal
shouts of joy and welcome. He was dressed in a suit of black velvet,
and his appearance was most dignified and solemn. Advancing to
the front of the balcony, he laid his hand on his heart and bowed
several times, and then retreated to an arm-chair near the table.
The populace appeared to understand that the scene had over-
come him, and were at once hushed into profound silence. After a
few moments the General arose and came forward. Chancellor
Livingston read the form of oath prescribed by the Constitution;
Washington repeated it, resting his hand upon the table. The
Chancellor raised it to the President, who stooped and kissed the
book. At this moment a signal was given, raising a flag upon the steeple of the Hall for a general discharge of
the artillery of the Battery. All the bells in the city rang out a peal
of joy, and the multitude before us sent forth such a shout as
seemed to reach the skies. The President bowed again to the
people, and then retired from a scene such as the most brilliant
monarch could never have enjoyed—the delight not only of his own nation
and people, but of all mankind."—<em>Memoir of Eliza S. M. Quincy</em>,
51.

Walter W. Buchanan, a godson of Washington, saw the inaugu-
ration from the steeple of the police-station or watch-house at the
south-east corner of Wall and Broad Sts., and referred to it briefly
in his recollections of the period.—<em>See</em> My 1, 1789.

Another eye-witness wrote: "Upon the subject of this great and
good man, I may perhaps be an enthusiast, but I confess I was
under an awful and religious persuasion that the Gracious Ruler of
the universe was looking down at that moment with peculiar com-
placency on an act which to a part of his creatures was very
important. Under this impression, when the Chancellor pronounced,
in a very feeble manner, 'Long live George W., Lord and
Master,' which was wound up to such a pitch that I could do no more
than waive my hat with the rest, without the power of joining in
the repeated acclamations which rent the air."—<em>Am. Museum</em> (1789),
V: 505.

Washington "took the oath of office, administered by the Chac-
cellor,—the Hon. Sam. A. Otis, secretary of the senate, holding a
large handsome Bible on a red velvet cushion before him."—<em>Jour.
and Letters of Col. John May</em>, pub. by the Hist. and Phil. Soc. of
Ohio, N. S., I: 121.

Bowen states that: "Just before the oath was to be adminis-
tered, it was discovered that no Bible was in Federal Hall. Happily,
Livingston, Grand Master of the Grand Lodge of Free and Accepted
Masons of the State of New York, knew that a Bible was at St.
John's Lodge No. 2, in the City Assembly Rooms near by, and a
messenger was dispatched to borrow the Bible, which is to-day
the property of St. John's Lodge No. 1, one of the oldest Masonic
lodges in the United States."—<em>Hist. of the Centennial Celebration
of the Inaug. of Geo. Washington, 1789</em>, 45, 51-53, and directories there
inscribed. Cited. Footnotes explain that this lodge was situated on the east side of Wall St., near the old No. 2, or William St. An original of the Grand
Lodge, in the Coffee Rooms, June 3, 1789, it was noted that St.
John's Lodge No. 2 be considered "as the oldest lodge in the city,
and take rank as the first." The lodge has since been known as
St. John's Lodge No. 1. Another footnote describes the Bible,
with illustrations.—<em>Ibid.</em> See also <em>The Century Mag.,</em> Ap, 1889.
For the first building built by the Masons in New York, see My
22, 1790.
The transparent paintings exhibited in various parts of the city, on Thursday evening, were equal at least, to anything of the kind ever before seen in America.

"That displayed before the Fort at the bottom of Broad-way, did great honor to its inventors and executors, for the ingenuity of the objects is attended with the most beautiful and advantageous situation: The virtues, Fortitude (The President), Justice (The Senate), and Wisdom (The Representatives of the United States) were judiciously applied; of the first, all America has had the fullest evidence; and with respect to the two others, who does not entertain the most pleasing anticipations.

"His Excellency Don Gardouci's residence next caught the eye—and fixed it in pleasing contemplation: The Tout-ensemble, formed a most brilliant front; the figures well fancied, The Graces, suggested the best ideas; and the pleasing variety of emblems, flowers, shrubbery, arches, &c. and above all the MOVING PICTURES [sic], that figured in the windows, or as it were in the back ground, created by fixing the transparencies between the windows, afforded a new—an animated, and enchanting spectacle.

"The residence of his Excellency, Count Moustier, was illuminated in a style of novel elegance; the splendid bordering of lamps round the windows, doors, &c. with the fancy pieces in each window; and above all the large designs in front, the allusions, of which we cannot at present particularly describe, did great honor to the taste and sentiment of the inventor. [The "inventor" was probably Betterton.] His Excellency's sister, always industrious with her pencil when not occupied with more immediate duties to society."—Griswold, Republican Court, 145.

"The above two instances of attention to honor this great and important occasion, so highly interesting to our 'dear country,' evince the friendship, the delicacy and politeness of our illustrious ally.

"The portrait of 'THE FATHER OF HIS COUNTRY' exhibited in Broad-Street, was extremely well executed, and had a fine effect.

"There was an excellent Transparency, also shown at the Theatre, and at the corner, near the Fly-Market: In short, emulation and ingenuity were alive; but perhaps were in no instance exhibited to greater advantage than in the display of the Fire-Works, which, from one novelty to another, continued for two hours, to surprise, by variety, taste, and brilliancy.

"The illumination of the Federal State House, was among the most agreeable of the exhibitions of the evening; and the ship Carolina formed a beautiful pyramid of Stars:—The evening was fine—the company innumerable—every one appeared to enjoy the scene, as if it were the smallest cloud upon the retrospect."—Gaz. of the U. S., May 2, 1789.

The extensive programme of fireworks, exhibited at the Fort, under the direction of Colonel Bauman, in honour of the day, was published in The Boston Gaz., May 11, 1789. Tobias Lear, the president's secretary, recorded in his diary, under date of April 30: "We received Colonel Humphreys, and myself went in the beginning of the evening in the carriages to Chancellors Livingston's and General Knox's, where we had a full view of the fire-works. We returned home at ten on foot, the throng of people being so great as not to permit a carriage to pass through it."—The Writings of Geo. Washington (Ford ed.), XII: 335.

"For an excellent summary of the events connected with Washington's inauguration, see Mrs. Lamb's article on this subject in the Mag. of Am. Hist. (1858), XX: 433-60; "New York the Federal Capital," by Mooncure D. Conway, in The Mem. Hist. of the City of N. T., III: 45-86; and Hist. Mag., 1st ser., III: 184-85. See also Frontispiece, vol. III, which reproduces the only contemporary picture of the inauguration.

"The regimental flag of the 3d Regiment, 1st Brigade, N. Y. State Artillery, which was displayed at ceremonies incident to the inauguration, was presented to the city on June 11, 1824, and formally accepted and paraded by the city on June 25, 1821.—Com. Adv., Je 26, 1821. The centennial of this presentation was celebrated on May 26, 1921, when the purpose was announced of preserving the fragment of the flag which remains by mounting it between, and goodness of the workmanship; it was placed in the armor-room of the Metropolitan Museum of Art.

"Yesterday morning [May 1] the President received the compliments of His Excellency the Vice President, His Excellency the Governor of this State; the principal Officers of the different Departments; the foreign Ministers; and a great number of other persons of distinction.

"We are informed, that the President has assigned every Tuesday and Friday, between the hours of two and three, for receiving visits; and that visits of compliment on other days, and particularly on Sundays, will not be accepted.

"It seems to be the prevailing opinion, that so much of the President's time will be engaged by the various and important business, imposed upon him by the Constitution, that he will find himself constrained to omit returning visits, or accepting invitations to Entertainments."—Gaz. of the U. S., My 2, 1789.

The annual commencement of Columbia College, held in St. Paul's Church, is attended by Pres. Washington; Vice-President the Gov. Clinton, the "principal officers of the Republic," and several members of both the senate and the house.—N. Y. Jour., My 7, 1789; Gaz. of the U. S., My 9, 1789.

In the evening, the subscribers of the "Dancing Assembly" gave "an elegant Ball and Entertainment to his Excellency the President of the United States." Washington "was pleased to have the company with him present." Also, "his Excellency the Vice-President, most of the members of both Houses of Congress, the Governor of New York, the Chancellor, and Chief Justice of the State [Richard Morris], the Hon. John Jay, and the Hon. Geo. W. Buchanan, M.D., writing in 1860 regarding this period, said: . . . the late Dr. Hugh McLean, George Bond, John Hunter, George Cummings, Elias Deshrouse, Washington Irving, and myself, formed, I think, the first Literary Society in the city of New York. . . . We used to meet every Saturday afternoon in Mrs. McLean's garret back-room, over the kitchen, in Broad-street. In those days the corner house of Wall and Broad streets was entered from Broad-street, and was a police-office and watch-house. From its stoop I witnessed the oath of office administered by Chancellor Livingston to George Washington. The next house was occupied by a rush-bottom chairmaker. A door or two below that, left-hand side, was the Nestor of our profession, the venerable Dr. Anthon, and a door or two lower still, was Mrs. McLean. We always had a few spectators to our literary symposium by a common rug-ladder. Each member of the company alternately read a tale or story of his own composition, and the youngest of the squad, Washington Irving, beat us all . . ."—Hist. Mag. (1860), IV: 138.

Ebenzer Hazard writes from New York to the Rev. Jeremy Bingham, in Boston, and refers to the inauguration of President Washington "on Thursday last." He says: "At 9 o'clock of that day, most of the religious societies of this city met in their respective churches and spent about an hour in prayer with particular reference to the new government. I have been told that the clergy had previously consulted together upon the subject; and that when the bishop of the church, formerly called the Church of England, was applied to for his concurrence, he replied that their church had always been used to look to government upon such occasions, and he thought it prudent not to do anything till they knew what government would direct. If the good bishop never prays without an order from government it is not probable that the Kingdom of Heaven will suffer much from his violence."—Belknap Papers in Mass. Hist. Soc. Collections, 4th ser., III: 120.

Colonel Franques, the steward of the president's household, publishes a notice to the effect that, as the servants are furnished with money to procure provisions for the house, "no accounts, for the payment of which the Public might be considered responsible are to be opened with any of them."—N. Y. Packet, My 7; Daily Adv., My 7; Gaz. of the U. S., Je 3, 1789; De Voe, Market Book, 304. Up to this time, Franques was proprietor of a tavern at the corner of Nassau and John Sts. (My 8, 1788). His wife at once took up the tavern business and carried it on for him at 49 Cortlandt St. (see My 9).

"This being a day for receiving company of ceremony, we had a numerous and splendid circle between the hours of two and three in the afternoon. A committee of the House of Representatives waited on the President with a copy of the address of their House, and a request to know when it would be agreeable to him to receive it. Diary of Tobias Lear.

THE ICONOGRAPHY OF MANHATTAN ISLAND

1789

Knox, the Commissioners of the Treasury [Samuel Osgood, Walter May Livingston, and Arthur Lee], His Worship the Mayor of the city, the late President of Congress [Cyrus Griffin], the governors of the Western Territory [Arthur St. Clair, the Baron Steuben, the Count de Moustier, Ambassador of his Most Christian Majesty, and many other foreigners of distinction were present. A numerous and brilliant collection of ladies graced the room with their appearance. The whole number of persons was about three hundred. The Company retired about two o'clock, after having spent a most agreeable evening. Joy, satisfaction and vivacity were expressive in every countenance—and every pleasure seemed to be heightened by the presence of a Washington."—N. T. Packet, My 9, 1789.

"Mrs. Washington had not yet reached the city, but Mrs. Jay and Mrs. Hamilton were among those present. . . Washington . . . danced in two cotillions. His partners were Mrs. Peter Van Brugh Livingston and Mrs. Hamilton. He also danced a minuet with Mrs. Maxwell."—Lamb, Hist. of the City of N. Y., II: 342. See also the very interesting account of the ball, by Constance Cary Harrison, in The Century Mag., XXXVII (N. S. XV): 852; "Society in the Early Days of the Republic," by James Grant Wilson, in The Mem. Hist., III: 87-112; The City of N. Y. in 1789 (Smith), 237-38; and Baker, Washington after the Rev., 154.

"Mr. Smith, of South Carolina, informed the House that the President was ready to receive their address [in answer to his speech to both houses on Ap 30, 8.1.]. The House immediately rose, and following the Speaker, attended The President in the room adjoining, where [at 12 o'clock] the Address was presented by the Speaker, in the name of the House."—Gaz. of the U. S., My 8, 1789.

The Sons of St. Tammany [see Mr 9] intend celebrating their Anniversary Festival, on Tuesday, the 1st of May, Old Stile, (corresponding with the 12th inst. [p.1]) at the place appointed. Those Brethren who are not supplied with Tickets, are requested to call on the Stewards for them immediately, or at Aarons Tavern, on This Evening, the 8th inst., where they will attend. Those strangers who have not a member in this city, and who are Members of this Society in any other state, are invited to join on Mr occasion."—Daily Adv., My 8, 1789.

The "Mayor and Members of the Corporation of this city, attended by the proper officers," wait on President Washington, and present to him the address adopted on April 27 (q.v.).—Daily Adv., My 11, 1789. For Washington's answer, see My 13.

Samuel Franques informs the public in an advertisement "that the business will be carried on by Mrs. Frances as usual, at No. 49, Cortlandt-street; where the General Stage Office is kept." He adds, "Oysters and Lobsters, Beef Alamode, &c are put up in the most approved manner for exportation . . . "—N. T. Packet, My 9, 1789; Smith, N. T. in 1789, 101-2. Sam. Franques himself, having become steward of the president's household (see My 19), and given up his tavern in 1788, to his wife, according to the above notice, carries on his tavern business at the new address, thus identified as the place where the stage-office is kept (regarding which, see N 13, 1787).

"The President, and Vice-President of the United States, the governor of this state, many members of Congress, and a number of other persons of the first character in the United States, honored the [John Street] Theatre with their presence. The house was uncommonly crowded and brilliant; and that excellent Comedy, the School for Scandal, and the favorite Comic Opera, the Poor Soldier, were acted with great applause. The box for the President, was elegantly fitted up and distinguished by the arms of the United States. The Vice President's box was also handsomely decorated; and the box for our Governor ornamented with the arms of the state."—Daily Adv., My 13, 1789.

Wm. Maclay's record of the event differs in some important particulars: "I received a ticket from The President of the United States to use this box this evening at the theatre, being the first of his appearance at the playhouse since his entering on his office. Went. The President, and governor of the State, foreign Ministers, Senators from New Hampshire, Connecticut, Pennsylvania, M. [Maryland or Massachusetts], and South Carolina; and some ladies in the same box. . . . The play was 'The School for Scandal.' I never liked it; indeed, I think it an indecent representation before ladies of character and virtue. Farce, the 'Old Soldier.' The house greatly crowded, and I thought the players acted well; but I wish we had seen the 'Conscious Lovers,' or some one that inoculated more prudent materials."—Journ. of Washington, 600-50, 50-51. See also "When Washington Was Playgoer," by James C. Young, in N. T. Times Book Rev. and Mag., Ap 17, 1921, and Paul LeCester Ford's Washington and the Theatre.

"There was but one theatre in New York in 1789, (in John Street,) and so small were its dimensions that the whole fabric might easily be placed on the stage of one of our modern theatres. . . ."—Cust. Recollections of Washington, 600.

Amateur plays were given in the president's own house while he was in New York. Wm. Duer says: "I was not only frequently admitted to the presence of this most august of men, in proper person, but once had the honor of appearing before him as one of the dramatis personae in the tragedy of Julius Caesar, enacted by a young 'American Company' in the garret of the President's mansion, where before the magnates of the land and the district of the city, I performed the part of Brutus to the Cassius of my old school-fellow, Washington Custis."—Ford, Washington and the Theatre, 44.

In accordance with its notice of May 8 (q.v.), the Tammany Society celebrates its anniversary. "On this occasion marquee, etc., were erected, upon the banks of the Hudson about a mile from the city, for the reception of the Brethren of that Society, and an elegant entertainment provided. After dinner Patriotic Toasts were drank, under 13 discharges, to each toast, from a Maroon Battery."—N. T. Daily Gaz., My 14, 1789: Daily Adv., My 14, 1789. See also Man. Com. Coun. (1865), 857. See Ag 10.

"Mr. Mayor & the Members of the Corporation with their proper Officers having waited on the President of the United States & presented the Address of this Corporation [see My 9], He was pleased to make the following Answer thereto. . . . The answer is given in full.—M. C. C. (1784-1831), I: 450-51.

Several butchers having petitioned the common council on April 15 to be exempted from the operation of the slaughter-house laws, by their permission to slaughter in the city, the Board of Aldermen, having received the petition of the Butchers, resolved that a committee be appointed to look into the case. The committee reported, that the slaughter-house, for the slaughter of swine, should be kept in the city, near the market.—Ibid., I: 451-52. On June 5, an account of the unimportant attitude of Mr. Blanchard, the lessee of the slaughter-house, the board decided to wait until the following February before preparing an ordinance to this effect, for at that time his lease would expire.—Ibid., II: 455. See, further, Ja 29, 1790.

City ordinances are passed for the regulation and paving of Queen St. between the Fly Market and Rutgers St. Battery St. and the Front Sts. (and Old Slip); and Old Slip, from the Slip to Old Slip & M. C. C. (1784-1831), I: 453. Regarding Battery St., see S 18, 1761, and Ji 25, 1786.

In a petition to the common council, bearing this date, Scott L. Clark, a shopkeeper, states that Great George Street "has not yet been regulated;" he is "at a loss how high he shall raise the foundation of his building," which he proposes to erect on two lots which he has recently purchased on the west side of the street. He asks that the board will "direct a survey of the said street and determine the regulation thereof."—From the original petition in metal file No. 7, city clerk's record-room.

The common council orders payment for erecting an Engine House near the City Hall.—M. C. C. (1784-1831), I: 453-53. See Feb. 15.

The minister of France, Count de Moustier, gives a ball to the president of the United States. "As a compliment to our alliance with France, there were two sets of cotillion dancers in complete uniforms; one set in that of France, and the other in blue and buff: the ladies were dressed in white, with ribbons, bouquets and garlands of flowers, answering to the uniforms of the gentlemen. The Vice-President, many Members of the Senate, and house of representatives of the United States, the governor of this state, the Governor of the Western Territory, and other characters of distinction were present."—N. T. Jour., My 21, 1789.

F. P. van Berckel delivers to President Washington his credentials as "President from Their High Mightinesses The State

The vice-president, heads of departments, foreign ministers, judges of the supreme court of N. Y. State, and "a numerous circle of citizens and foreigners," visit the president at his house.—Penn. Packet, May 20, 1789.

17 1789 May

The presents on May 17, requesting his views on the following points: 1. Should the president adopt a line of conduct, "equally distant from a conciliating with all kinds of company on the one hand, and from a total seclusion from society on the other?"

2. What will be the least exceptionable method of bringing any system, which may be adopted on this subject, before the public and into use?

3. Whether . . . one day in every week will not be sufficient for receiving visits of compliment? 4. Would it involve "disagreeable consequences, to have it known that the President will, every morning at eight o'clock, be at leisure to give audience to persons who may have business with him?"

5. Will it be practicable "to draw such a line of discrimination, in regard to persons, as that six, eight, or ten official characters, including the members of the Cabinet, may be invited, personally or otherwise, to dine with him on the days fixed for receiving company, without exciting clamors in the rest of the community?"

6. Whether it would be satisfactory to the public for the President to make about four great entertainments in a year, on such great occasions as the anniversary of the Declaration of Independence, the alliance with France, the peace with Great Britain, the organization of the general government; and whether arrangements of these two last kinds could be in danger of diverting too much of the President's time from business, or to producing the evils which it was intended to avoid by his living more recluse than the presidents of congress have hitherto lived?

7. Whether there would be any impropriety in the President's making informal visits; that is to say, in calling upon his acquaintances or public characters, for the purpose of sociability or civility? And what, as to the form of doing it, might evince these visits to have been made in his private character, so as that they may not be construed into visits from the President of the United States? And in what light would his visits rarely at tea-parties be considered a matter of propriety?

8. Whether, during the recess of congress, it would not be advantageous to the interests of the union for the President to make the tour of the United States, in order to become better acquainted with their principal characters and internal circumstances, as well as to be more accessible to numbers of well-informed persons, who might give him useful information and advice on political subjects?

9. If there is a probability that either of the arrangements may take place, which will eventually cause additional expenses, whether it would not be proper that these ideas should come into contemplation at the time when congress shall make a permanent provision for the support of the executive?"

The president appends some "Remarks" to the effect that "Many things which appear of little importance in themselves and are to pass away, may have great and durable consequences from their having been established at the commencement of a new general government." Further, that the president, "in all matters of business and etiquette," can have no object but "to demean himself in his public character in such a manner as to maintain the dignity of his office, without subjecting himself to the imputation of superciliousness or unnecessary reserve. . . ."

Adams, in an answer to the same day: "1. That an association with all kinds of company, and a total exclusion from society, are extremes, which . . . may be properly avoided.

2. The system of the President will gradually develop itself in practice, without any formal communication to the legislature, or publications from the press. Paragraphs in the public prints may, however, appear, from time to time, without any formal authority, that may lead and reconcile the public mind.

3. Considering the number of strangers from many countries, and of citizens from various States, who will resort to the seat of government, it is doubted whether two days in a week will not be indispensable for visits of compliment. A little experience, however, will elucidate this point."

4. It is submitted to consideration, whether all personal applications ought not to be made, in the first instance, to a minister of state. . . . However, "access to the supreme magistrate ought not to be rigorously denied in any case that is worthy of his consideration," but "in every case, the name, quality, and . . . business, ought to be communicated to a chamberlain, or gentleman in waiting, who should judge whom to admit and whom to exclude. Some limitation of time may be necessary, too, as, for example, from eight to nine or ten; and if it, the whole forenoon, or the whole day, may be taken up.

5. There is no doubt that the president may invite what official characters, members of congress, strangers, or citizens of distinction he pleases, in small parties, without exciting clamors; but this should always be done without formality.

The entertainments mentioned in this article would much more properly be made by a minister of state for foreign or domestic affairs, or some other minister of state, or the Vice-President, whom, upon such occasions, the President, in his private character, might honor with his presence. But in no case whatever can I conceive it proper for the President to make any formal public entertainment.

7. There can be no impropriety in the President's making or receiving informal visits of his friends or acquaintances, at his pleasure. Underess, and few attendants, will sufficiently show that such visits are made as a man, a citizen, a friend, or acquaintance. But in no case whatever should a visit be made or returned in form by the President; at least, unless an emperor of Germany, or some other sovereign, should travel to this country. The President's pleasure should absolutely decide concerning his attendance at social parties in a private character; and no gentleman or lady ought ever to complain, if he never, or rarely attends. The President's private life should be at his own discretion, and the world should respectfully acquiesce. As President, he should have no intercourse with society, but upon public business, or at his levées. This distinction, it is, with submission, apprehended, ought to govern the whole conduct.

8. A tour might, no doubt, be made, with great advantage to the public, if the time can be spared. . . ."

Mr. Adams suggests an answer to the final query in the following "Observations:"

"The civil list ought to provide for the President's household. What number of chamberlains, aides-de-camp, secretaries, masters of ceremonies, &c. will be necessary? It is not necessary to state. But should not all such establishments be distinct from the allowance to the President for his services, which is mentioned in the constitution? In all events, the provision for the President and his household ought to be large and ample. The office, by its legal authority, defined in the constitution, has no equal in the world, excepting those only which are held by crowned heads; nor is the royal authority in all cases to be compared to it. . . . The sending and receiving ambassadors, is one of the most splendid and important prerogatives of sovereigns, absolute or limited; and this, in our constitution, is wholly in the President. If the state and pomp essential to this great department are not, in a good degree, preserved, it will be in vain for America to hope for consideration with foreign powers.

"These observations are submitted, after all, with diffidence, conscious that my long residence abroad may have impressed me with views of things incompatible with the present temper and feelings of my fellow-citizens; and with a perfect disposition to acquiesce in whatever may be the result of the superior wisdom of the President."—Life and Works of John Adams (ed. by his grandson, Cha. F. Adams), VIII. 453-93.
May 1790. - anecdotes. William Injured." 454. On July 9, they agreed upon filling up the ballast in the ship, as well as building Bulkhead. City ordinances are passed for regulating and paving William Street from Fair to Beekman St; for paving King George Street; and Water Street from Peck's Slip to St. James Slip; and for regulating Chatham Street from St. James to Division St.—M. C. C. (1784-1811), I: 454. There was much activity in regulating and paving streets for several years during this period.—Ibid., p. 469.

The joint committee appointed by the senate and assembly, in pursuance of "An act for regulating elections," meets to canvass and estimate the votes taken at the last election for governor, lieutenant-governor, and senators of N. Y. State. Their session lasted seven days. On June 4, they announced that George Clinton had been elected governor, and Pierre Van Cortlandt, lieutenant-governor.—Daily Ady., Je 5, 1790.

"Mrs. Washington (generally referred to as "Lady Washington") 27 arrives from New York from Mount Vernon. From Philadelphia, she was accompanied by "the Lady of Mr. Robert Morris." At Elizabeth-town Point, she was met by the President, Mr. Morris, and "several other gentlemen of distinction who had gone there for that purpose." She was "conducted over the bay in the Federal Barque, rowed by a crew of commoners, to an elegant house." On passing the Battery, a salute was fired; and on landing (at Peck's Slip), she was welcomed by crowds of citizens "who had assembled to testify their joy."—Daily Gaz., My 28, 1789. She had been expected to arrive at Peck's Slip at four o'clock.—Daily Ady., My 27. "The City troop of light horse, and Col. Bauman's artillery, attended on this occasion."—Ibid., My 28, 1789.

A newspaper stated: "The principal ladies of the city have taken with the earliest attention and spect, repaid their devotions to the amiable consort of our beloved President, viz. The Lady of His Excellency the Governor—Lady Sterling—Lady Mary Watts—Lady Kitty Duer—La Marchioness de Brehem—the Ladies of the Most Hon. Mr. Langdon, and the Most Hon. Mr. Dalton—the Mayors—Mrs. Livingston, of Clermont—Mrs. Chancellor Livingston—the Miss Livingstons—Lady Temple—Madam de la Forest—Mrs. Montgomery—Mrs. Knox—Mrs. Thompson—Mrs. Gerry—Mrs. Edgar—Mrs. M'Comb—Mrs. Lynch—Mrs. Houston—Mrs. Griffin—Mrs. Provost—the Miss Bayards, and a great number of other respectable characters."—Gaz. of the U. S., My 30, 1789. The use of these titles was severely criticised.—See Je 9. "John Francis [was] informs the public that he has removed from No. 3 [see Ag 25, 1785] to No. 49 Great Dock street, the corner house formerly kept by Samuel Francies, where gentlemen may be accommodated with genteel boarding and lodging . . ."—Daily Ady., My 27, 1789.

Bayles supposes that John Francis was a son of Samuel Francies (or Francis). He opened the True American at No. 3 Great Dock (now Pearl) St in August, 1785 (49. Ag 25).—Daily Ady., My 27, 1789. "The corner house," was the well-known Francies Tavern.

"Although the president makes no formal invitations, yet the day after the arrival of Mrs. Washington the following distinguished personages dined at his house en famille—Their Excellencies the Vice-President—the Governor of this State—the Ministers of France and Spain—and the Governor of the Western Territory—the Hon. Secretary of the United States for Foreign Affairs—the Most Hon. Mr. Langdon, Mr. Wingate, Mr. Izard, Mr. Few, and Mr. Muhlenburg, Speaker of the Hon. House of Representatives of the United States."—Gaz. of the U. S., My 30, 1789.

Paine Wingate, senator from New Hampshire, one of the guests, has left the following description of this dinner: "It was the least showy dinner that I ever saw at the President's. As there was no clergyman present, Washington himself said grace on taking his seat. He dined on a boiled leg of mutton, as it was his custom to eat of only one dish. After the dessert a single glass of wine was offered to each of the guests, when the President rose, the guests following his example, and repaired to the drawing-room, each departing at his option, without ceremony."—Baker, Washington after the Reu., 41.

For anecdotes concerning Washington's dinner-giving, his habit of punctuality, etc., see Maclay's Jour. De Yoce's Market Book, 304-5, citing Lincoln's Lives of the Presidents, 66; Watson's Annals, 1551; and Valentine's Manual (1854), 531. See also Ag 27, 1789; Mr 4, My 7, 1790.

The Society Library published a notice that the library would
open on this day "at the Library Room in the city hall." The librarian is to attend every Monday, Wednesday and Friday, from 10 to 12 o'clock.—Daily Adv., Je 1, 1789.

29 The President's levee is attended "by a very numerous and most respectable company." It was not generally known that he was to enter the drawing-room at three o'clock, and this "occasioned the people to wait the time to attendance."—Cal. of the U. S., My 30, 1789.

June

A detailed description of the "Federal Edifice" is published, with an engraved view of the building. The text reads: "The citizens of New York, desirous of testifying their attachment to the new national government, and of making their city the place of the permanent residence of the Federal Legislature, have enlarged and repaired their city Hall, and made it a convenient and elegant structure, worthy of the respectable body for whose use it is designed.

"This building is situated at the end of Broad Street, where its front appears to great advantage. The basement story is Tuscan, and is pierced with seven openings; four massive pillars in the center support four Doric columns and a pediment. The frieze is ingeniously divided to admit thirteen stars in the metopes; these, with the American Eagle and other insignia in the pediment, and the tables over the windows, filled with the 13 arrows and the olive branch united, mark it as a building set apart for national purposes.

"After entering from Broad Street, we find a plainly finished square room, flagged with stone, to which the citizens have free access; from this we enter the vestibule in the center of the pile, which leads in front to the floor of the Representatives' room, or real Federal Hall, and through two arches on each side, by a public stair-case on the left, and by a private one on the right, to the Senate chamber and lobbies. This vestibule is paved with marble; is very lofty and well finished; the lower part is of a light rustic, which supports an handsome iron gallery; the upper hall is in a lighter stile, and is finished with a sky light of about twelve by eighteen feet, which is decorated with a profusion of ornament in the richest taste. Passing into the Representatives' room, we find a spacious and elegant apartment, sixty one feet deep, fifty eight wide, and thirty six high, without including a coved ceiling of about ten feet high. This room is of an octagonal form; four of its sides are rounded in the manner of niches, and give a graceful variety to the whole. The windows are large and placed sixteen feet from the floor; all below them is finished with plain wainscot, interrupted only by four chimneys; but above these a number of Ionic columns and pilasters, with their proper entablature, are very judiciously disposed, and give great elegance. In the pannels between the windows are five doors; the central one should be the President's; the two others the Houses of Congress. A marble, surrounded with laurel. The speaker's chair is opposite the great door and raised by several steps; the chairs for the members are ranged semicircularly in two rows in front of the speaker. Each member has his separate chair and desk. There are two galleries which front the speaker; that below projects fifteen feet, [and is supported from the help of supporters] the upper one is not so large, and is intended to be at the disposal of the members for the accommodation of their friends: Besides these galleries, there is a space on the floor, confined by a bar, where the public are [also] admitted. There are three small doors for common use, besides the great one in the front. The curtains and chairs in this room are of light blue damask. It is intended to place a statue of Liberty over the entrance, and another in the hall, and a statue of Freedom in the gallery."

"After ascending the stairs on the left of the vestibule, we reach a lobby of nineteen by forty eight feet, finished with Tuscan pilasters; this communicates with the iron gallery before mentioned, and leads at one end to the galleries of the Representatives' room, and at the other to the Senate chamber. This room is forty feet long, thirty wide, and twenty high, with an arched ceiling; it has three windows in front, and three back, to correspond to them, those in front open into a gallery twelve feet deep, guarded by an elegant iron railing. In this gallery our illustrious President, attended by the Senate and House of Representatives, took his oath of office, in the face of Heaven, and in presence of a large concourse of people assembled in front of the building.

The Senate chamber is decorated with pilasters, &c. which are not of any regular order; the proportions are light and graceful; the capitals are of a fanciful kind, the invention of Major L'Enfant, the architect; he has appropriated them to this building, for amidst their foliage appears a star and rays, and a piece of drapery below suspends a small medallion with U.S. in a cypher. The idea is new and the effect pleasing; and although they cannot be said to be of any ancient order, we must allow that they have an appearance of magnificence. The ceiling is plain, with only a sun and thirteen stars in the center. The marble which is used in the chimneys is Ammonitico, and for beauty of shades and polish is equal to any thing of the kind in Europe. The President's chair is at one end of the room, elevated about three feet from the floor, under a rich canopy of crimson damask. The arms of the United States are to be placed over it. The chairs of the members are ranged semicircularly, as those in the Representatives' room. The floor is covered with a handsome carpet, and the windows are furnished with curtains of crimson damask. Besides these rooms, there are several others, for use and convenience; a library, lobbies and committee rooms above, and guard rooms below. On one side (which we could not shew on the plate) is a platform, level with the floor of the Senate chamber, which affords a convenient walk for the members, of more than two hundred feet long, and is guarded by an iron railing.

"We cannot close our description without observing, that great praise is due to Major L'Enfant, the architect, who has surmounted many difficulties, and has so accommodated the additions to the old parts, and so judiciously altered what he saw wrong, that he has produced a building uniform and consistent throughout, and has added to great elegance every convenience that could be desired.

"The exertions of the workmen (the principals of which were Mr. J. Robinson, carpenter, and Messrs. Moore and Smith, masons) ought not to be passed unnoticed, who effected so great a work, in an unfavorable season, in the course of a few months.

["It must be remarked, that the capulo here represented, is the remainder of the old building, and is not entirely consistent with the new; it is, however, intended to be rebuilt, and considerable alterations remain to be made to the roof; but when these will be accomplished is not in our power to determine."—The Massachusetts Mag., Je 1, 1789. The same account was published in the Columbian Mag., Ag, 1789; also in the N. Y. Mag. or Literary Repository, Mr, 1790 (where the portions here introduced in brackets were added). See also description of Grim's view of the old city hall (Pl. 32-33), i. 275.

An open letter, written by "A Paviour" and addressed to the mayor, is published, describing the need of paving and grading the streets. Descriptive specifications are given for such improvements in Broadway, Maiden Lane, Queen St., "Comfort Hill," Ferry St., Smith St., Broad St., Princess St., and Wall St. It begins thus: "Broad-Way and the Range of the Docks are the highest, and the lowest is the frontage; the corner should have its own rise; the ranges are elevated, a survey, never after to be altered; for the intermediate streets most depend on these two limits to regulate them in their levels, and to prevent repeated and expensive alterations. We have seen frequent alterations in the new pavings of last year; local alterations in paving must ever produce confusion in the plan of city, whereby they are not conformable to a general survey. Wall-street is still too feet too high, opposite the stables; an arched wood-vault, belonging to one of the houses, is the reason this must not be touched; it was an object of too much moment; it would have cost the owner five pounds to lower it. The streets that run parallel to the rivers should be, as nearly as possible, level. Two inches fall, to every ten feet, was the plan of the old pavement, and might have been kept. On the present plan, four inches to every 100 feet is sufficient; witness, Water-street, from Mr. Wad-lington's corner to the Fly-Market: yet such is the force of former habits, that the very man that paved this last year (in some degree against his inclination) is this moment raising a hill in the same street, from the Old to County's slip."—N. Y. Daily Gaz., Je 3, 1789.

A letter, dated New York, June 6, 1789, and printed later in a London newspaper, reported that, on June 4, Washington gave "a very sumptuous entertainment" on account of "the recovery of his Majesty the King of Great Britain," at which were present "the Envoys of England, France, Holland, and Portugal, and persons of the first distinction."—Smith, N. Y. City in 1789, 241. The New York newspapers of the time, now available in New York, make mention of the event.

The comedy "The Clandestine Marriage," and a farce, "The Citizen," are performed at the John Street Theatre. "The President

The common council appoints a committee to report to the board of "the Materials & Articles remains" to the City Hall & that they cause to be collected & deposited in some sale Place. — M. C. C. (1784-1831), I: 465. This probably refers to the building materials used in the alterations, which, however, are not yet completed. — See ibid, I: 465.

The common council appoints a committee to report to the board of the "Lot of Ground whereon the Oswego Market is erected" (see L. M. K., III: 959), and suit has been brought against them. They petition the common council for aid in discharging the debt, and the subject is referred to a committee. — M. C. C. (1784-1831), I: 465-64.

The northward regulation of Greenwich St. is indicated by a city ordinance of this date to pave it from Barclay to Murray St. — M. C. C. (1784-1831), I: 464. Cf. O 30.

The common council grants to Trinity Corporation the triangular piece of ground at the junction of the Post and Bloomingdale Roads (see Ag 30, 1788), and the clerk of the board is directed to ascertain if the church will accept these terms, and if so to prepare the lease. — M. C. C. (1784-1831), I: 464-65. See, further, JI 27.

The committee appointed to superintend the sale of the Common Lands (see Ap 1) reports by schedules the lots sold at auction and private sale, showing lot numbers, acreage, buyers, price, etc. The common council orders that the seal of the corporation be affixed to the articles of agreement. — M. C. C. (1784-1831), I: 466-67, 467. For the application of these terms in the case of a sale or release to Trinity corporation, see F 6, 1790.

A warrant is issued to pay Peter Etting £1166.6. Part of this sum (£1 3) was for "Carriage & Liqueur for Committee on Common Lands," and the rest (£11 6) was for "Building Stairs & Cleaning Murray St. for Reception of the President." — From original audited list, in metal file No. 8, city clerk's record-room; M. C. C. (1784-1831), I: 467.

The common council orders that the "federal Ship" ("Hamilton"), which was used in the procession on the adoption of the new constitution by the state of New York (see Je 23, 1788), be removed from the Bowling Green; also that the fence be repaired, and the street which surrounds the city of New York be paved. — M. C. C. (1784-1831), I: 468.

The common council appoints a committee to "direct the removal of the Butchers &c out of the Exchange & to regulate the standings in the new Market [see Je 18] lately erected there." — M. C. C. (1784-1831), I: 468. See D 4.

Washington writes to J. McHenry: I have now the pleasure to inform you, that my health is restored, but a feebility still remains, caused by the smallpox, which was made in a very large and painful tumor on the protrusion of my thigh. This prevents me from walking or sitting. I am able to take exercise in my coach, by having it so contrived as to extend myself the full length of it. — "Writings of Washington" (Ford ed.), XI: 401; Barker, Washington after the Rev., 140.

A list is prepared of "Proprietors Names of Chatham Street July 3, 1799," from Magazine and Queen Sts. to Beekman St. It gives their names, sizes of lots, etc. The lots include that of the "Brick Meeting," and the spaces "from Gold pale fence to George Street" and "from Tryon Row to New Ggence of pales." The width of George St. is 25 ft.; of Frankfort St., 32 ft. 6 in.; of Thomas St., 44 ft. on one side of Chatham St. and 45 ft. 6 in. on the other side — From MS in package marked "N. Y. City, 1789-1800, Miscellaneous," in collection of the N. Y. H. S.

The presence of Washington in New York makes the celebration of Independence Day especially noteworthy. The legion of Gen. McLean's brigade, composed of the grenadiers, infantry, troop of horses, and brigade company of artillery, under the command of Col. Higgens, were reviewed "in the field." On their return from the parade, "they passed the house of the President of the United States, who appeared at his door in a suit of regiments, and was saluted by the troops as they passed. His late indisposition deprived the troops of the honor and satisfaction of being reviewed by him in the field." At noon a salute was fired from the fort by Col. Bauman, and at four o'clock the officers "sat down to an entertainment provided for them at Mr. Samuel Francoues's in Cortlandt-street, when toasts, suited to the occasion, were drunk." — N. T. Jour., II 9, 1796.

Members of "Society of the Cincinnati of the State of New York" and other state societies at present in the city met together at the City Tavern. A committee was appointed to wait on the president "with the congratulations of the day," and from thence to proceed to the vice-president, and the speaker of the house of representatives. An address was made to the president, to which he replied. The Society of the Cincinnati then "proceeded in procession, attended by Col. Bauman's regiment of artillery and band of music (whose appearance was truly martial) to St. Paul's church, where in the presence of a most respectable and brilliant audience, an elegant eulogium on Major General Nathaniel Greene was delivered by Col. Alexander Hamilton. The society on this occasion were honored by the presence of the Lady and Family of the President, his indisposition (the inconvenience of which thanks be to Heaven, are nearly surmounted) prevented his personal attendance—the Vice-President and ladies of his family, the senator, the speaker and the house of representatives. . . ." — Daily Adv., II 6; Gaz. of the U. S., II 10, 1795. The Cincinnati "wore their eagles at their button-holes, and were preceded by a flag." — July 4, Hist. Mag., 1 ser., IV: 138-39.

Price—3s. 6d. with the Plan of the City. New-York, printed For Hodge, Allen, and Campbell, and sold at their respective Stores. M. DCCCLXXIX.

"In folding," Plan of the City of New York," drawn by "1 [J] M'Comb, Junr," and engraved by C. Tiebout, measures 14½ in. wide and 8½ in. high, and contains a list of "References" to numbered landmarks in the city, as far north as the house of "Mr. Linsenbardt" on the road to Greenwich, at the North River (see L. M. R. K.,
and they complain that these coppers are "now lying on their hands and must of Course be a very great loss in their present depreciation." They ask the common council "to receive them on the 1st day of May last, or to have had it in the meantime, and they explain further that the public "seldom presents any other Money to pay their passage." Since then the board recommended that these coins be valued "at Forty Eight to a Shilling" (vide supra), and that inconvenience and loss will continue "unless Red for Rent" by the common council.

Later, copper coins ceased to circulate, and a plan was adopted for the city to issue bills of one penny, two pence, and three pence, to the total value of £1,000.—See F. 26, 1790.

The common council passes ordinances for paving Hanover Sq. and Vesey and Chatham Sts.—M. C. G. (1784-1813), II: 472.

"All persons having accounts for goods furnished, or repairs done to the house of the President of the United States, previous to the 1st day of May last, are hereby desired to leave the same with Andrew G. Fraunces, No. 69. Crown-street, near the Bathing House, North River, on or before the first day of August next."—N. T. Packet, Je 25, 1789.

Trinity Corporation sells 16 lots at Vauxhall to Abraham Wilson and gives him a perpetual lease of the lots between Vauxhall and the Hudson River.—Trin. Min. (M.S.). This Vauxhall property occupied the west side of Trin. College and will be described as a part of Greenwich, Chambers, and Warren Sts., and West Broadway. For outline of its previous history, see L. M. R. K., III: 981.

Trinity vestry agrees to "take a Lease for the Triangular piece of Ground near the Road from this City to Boston from the Corporation of the City at the Rent of Seventeen pounds per Annum."—Trin. Min. (M.S.). This lease is required for the common council on June 24 (p. 5.) at 2$8. See further, F. 26, 1790.

Washington is now well enough "to receive visits of compliment from many official characters and citizens." Until "his strength shall be more fully restored," he proposes to receive only on Tuesdays. Mrs. Washington "will be at home every Friday, at 8 o'clock P. M. to see company."—Daily Advertiser, Je 29, 1789.

Mr. Secretary Adams makes a survey of "the Rose Hill" of John Watts on 24th St. near Second Ave.—L. M. R. K., III: 951.

Mayor Duane informs the common council that Gov. Clinton intends, on July 30 (p. 5.), "to view the Fort and Battery to see what may be necessary" to be done towards opening & continuing the Broad Way through the same" (see Je 10), and that he wishes the corporation to accompany him.—M. C. G. (1784-1813), I: 473.

The "want of a Regulation taking place in Mulberry Street and that part of Catharine Street between Mulberry and Bayard Streets" induces the residents in that vicinity to petition the common council for relief from the flooding of their lands when it rains. These streets make the land "so loose, it象s as to Carry the Water through Cross Street into the Fresh Water pond." At the same time, the inhabitants of Roosevelt St. petition the common council against leading the water from Mulberry Street through Cross Street to Roosevelt Streets.—From the original petitions (in metal box No. 8, city clerk's record-room), endorsed "read July 20th 1789 & referred to committee."

The proprietors of lots in Chambers St., in a petition to the common council, "to direct the said Street to be regulated conformable to your general plan," say that this street "still continues in its natural irregular state," and that they are "desirous of improving their respective Lots," and are "at a loss how to sink Cellars and raise buildings thereon."—See the original petition in the record-room, city clerk's office. It is endorsed: "read July 20th 1789 & referred to the Alds & Assist. of the West Ward."

The survey of this street was approved on Aug. 19 (p. 5.).

The governor, attended by the common council, having 30 viewed the ground at the Fort and Battery ("which by concurrent Resolution of the Senate and Assembly are reserved for public use and for continuing the Broad Way through to the River"), the mayor informs the board that the governor has proposed to "remove so much of the Fort" as obstructs "the Line of the Broad Way to the River," at the expense of the state; and the mayor indicates that it would be proper for the city "to run a Wharf or Bulkhead in the River, along the Battery from Ellis Corner to the Flat Rock, to receive the earth to be removed from the Fort & to enlarge..."

Elias Burger, Jr., enters into an agreement with the city to build a wharf or bulkhead "from the Corner of Kennedy's Wharf into the northwest Bastion of the Battery" (see Ag 12). It is to be 12 feet wide at the bottom and 6 feet 6 inches at the top; the front "battering" and the rear perpendicular; the surface of the wharf to be "two feet above the level of the lower Corner of Kennedy's Wharf and filled in with stone to the top;" with "four Oak standards of four by six Inches thick let in flush with the front into every length of Logs of thirty feet and fastened with a twelve Inch ragged Iron spike into each Log;" also "one Brace of Ten Inches diameter dovetailed in the front and Rear Logs in every course at the distance of nine feet," and "after the third course there shall be anchor pieces of Ten Inches diameter and thirty feet long dovetailed and bolted into the front and Rear pieces of the wharf at every Eighteen feet distance," etc. The whole wharf is to "be built of pitch pine under water and of other pine wood above water;" and "paid for by the City."—M. G. C. (1784-1831), I: 478.

The common council passes an ordinance "to regulate the ringing or tolling of the Bells of the Several Churches in this City for Funerals."—M. G. C. (1784-1831), I: 478.

The public and private constitutions of the "Tannany Society or Columbian Order" are agreed upon. A photostat of this original constitution, made from the document in Tannany Hall and bearing the signatures of members from this date to April 3, 1916, is in the MSS. Div., N. Y. P. L. The first name which appears is that of William Mooney, Grand Sachem. The public constitution is written by Theophilus Decker.—Thomas Alston.

The N. Y. Directory for 1798 contains the following notice of the society: "This being a national society consists of Americans born, who fill all offices and adopted Americans, who are eligible to the honorary posts of warrior and hunter. It is founded on the true principles of patriotism, and has for its motives charity and brotherly love. Its officers consist of one grand sachem, twelve sachems, one treasurer, one secretary, one door-keeper—this is divided into thirteen tribes, which severally represent a state; each tribe is governed by a sachem, the honorary posts in which are one warrior and one hunter." New constitutions were adopted in 1813 (q.v., Ag 9).

The Proponent of the Speaking Figure, informs the public, who were disappointment in seeing the ascent of the small balloon; which was the result of cleverness from place of ascent. He has constructed another of 50 feet in circumference, for the benefit of the large balloon; it will ascend on the 15th inst. from a lot near the Race-ground, belonging to Mr. Seaman, bounded by Eagle, Suffolk and Cellar streets near Alderman Ivers's—Joseph Decker.—N. Y. Packet, Ag 11; N. Y. Jour., Ag 13, 1789.

The large balloon was later scheduled to ascend on Sept. 24, but, as the newspaper report states, it went up "in frunto."—Ibid., S 24, 1789.

The committee appointed to consider "erecting a Wharf or Bulkhead at the Battery to receive the Earth to be taken from the Fort" reports to the common council several plans with estimates of expense. The board decides that "a Wharf or Bulkhead be erected on a Line from the Corner of Kennedy's Wharf to the North W^S Bastion of the Battery," and that the committee "take Order for the immediate erection of the said Wharf in the most economical & best manner," reporting from time to time to the board.—M. G. C. (1784-1831), I: 476-77. See, further, Ag 19.

A yacht race takes place "without the Hook." The pilot-boat "York," commanded by M. Daniels, "fairly beat the Virginia-built schooner Union, Capt. S. Merry, belonging to Curacao. The breaker was liberty on the North W^S Bank of the Battery;" and that the committee "take Order for the immediate erection of the said Wharf in the most economical & best manner," reporting from time to time to the board.—M. G. C. (1784-1831), I: 476-77. See, further, Ag 19.

The common council passes an ordinance "to regulate the ringing or tolling of the Bells of the Several Churches in this City for Funerals."—M. G. C. (1784-1831), I: 478.

The public and private constitutions of the "Tannany Society or Columbian Order" are agreed upon. A photostat of this original constitution, made from the document in Tannany Hall and bearing the signatures of members from this date to April 3, 1916, is in the MSS. Div., N. Y. P. L. The first name which appears is that of William Mooney, Grand Sachem. The public constitution is written by Theophilus Decker.—Thomas Alston.

The N. Y. Directory for 1798 contains the following notice of the society: "This being a national society consists of Americans born, who fill all offices and adopted Americans, who are eligible to the honorary posts of warrior and hunter. It is founded on the true principles of patriotism, and has for its motives charity and brotherly love. Its officers consist of one grand sachem, twelve sachems, one treasurer, one secretary, one door-keeper—this is divided into thirteen tribes, which severally represent a state; each tribe is governed by a sachem, the honorary posts in which are one warrior and one hunter." New constitutions were adopted in 1813 (q.v., Ag 9).

The Proponent of the Speaking Figure, informs the public, who were disappointment in seeing the ascent of the small balloon; which was the result of cleverness from place of ascent. He has constructed another of 50 feet in circumference, for the benefit of the large balloon; it will ascend on the 15th inst. from a lot near the Race-ground, belonging to Mr. Seaman, bounded by Eagle, Suffolk and Cellar streets near Alderman Ivers's—Joseph Decker.—N. Y. Packet, Ag 11; N. Y. Jour., Ag 13, 1789.

The large balloon was later scheduled to ascend on Sept. 24, but, as the newspaper report states, it went up "in frunto."—Ibid., S 24, 1789.

The committee appointed to consider "erecting a Wharf or Bulkhead at the Battery to receive the Earth to be taken from the Fort" reports to the common council several plans with estimates of expense. The board decides that "a Wharf or Bulkhead be erected on a Line from the Corner of Kennedy's Wharf to the North W^S Bastion of the Battery," and that the committee "take Order for the immediate erection of the said Wharf in the most economical & best manner," reporting from time to time to the board.—M. G. C. (1784-1831), I: 476-77. See, further, Ag 19.

A yacht race takes place "without the Hook." The pilot-boat "York," commanded by M. Daniels, "fairly beat the Virginia-built schooner Union, Capt. S. Merry, belonging to Curacao. The breaker was liberty on the North W^S Bank of the Battery;" and that the committee "take Order for the immediate erection of the said Wharf in the most economical & best manner," reporting from time to time to the board.—M. G. C. (1784-1831), I: 476-77. See, further, Ag 19.

The "old Dr. Bard" describes features of New York which make it "one of the healthiest cities of the continent." This statement is confirmed by "the complexion, health and vigor of its inhabitants."—Daily Advertiser, S 1, 1799.

The president has appointed Andrew Ellicott to perform certain duties in the office of "Geographer to the United States," formerly exercised by the late Mr. Hatcher.—N. Y. Jour., S 3, 1799.

The first public levee held by the president since the death of his mother (see Ag 25) occurs. Several who attend wear "American mourning."—Generals of the U. S., S 12, 1799.

The court of general sessions having adjudged that the house
Mrs. John Adams, writing from “Richmond Hill (N. Y.)” to her sister Elizabeth, the wife of Rev. John Shaw of Massachusetts, says: “The house in which we reside is on a hill, the avenue to which is interspersed with forest trees, under which a shrubbery rather too luxuriant and wild has taken shelter, owing to its having been deprived by death, some years since, of its original proprietor [Abraham Mortier], who kept it in perfect order. In front of the house, the noble Hudson rolls his majestic waves, bearing upon his bosom innumerable small vessels, which are constantly forwarding the rich products of the neighbouring soil to the busy hand of a more extensive commerce. Beyond the Hudson rises to view the fertile country of the Jerseys, covered with a golden harvest, and pouring forth plenty like the cornucopia of Ceres. On the right hand, an extensive plain presents us with a view of fields covered with verdure, and pastures full of cattle. On the left, the city opens upon us, intercepted only by clumps of trees, and some rising ground, which serves to heighten the beauty of the scene, by appearing to conceal a part. In the back ground, is a large flower-garden, enclosed with a hedge and some very handsome trees. On one side of it, a grove of pines and oaks fit for contemplation.”—Letters of Mrs. Adams (ed. by C. F. Adams, 1848), 343-44. See also S 6, 1790.

The “Air Balloon,” announced on Sept. 12, was on exhibition on this day, does not ascend. It collects “two thirds of the city.” The wind and “the great pressure of spectators” prevent Mr. Deck-er’s giving “that satisfaction which he wished.” He is blamed by some, “as if he designed it as a bubble,” but of this the newspaper account clears him.—N. T. Packet, S 24, 1790.

Congress passed an act to establish the Judicial Courts of the United States. It provides for a supreme court, which shall consist of a chief-justice and five associate justices, who shall hold two sessions annually at the seat of government, one commencing the first Monday of February, and the other the first Monday of August. It divides the United States into 13 districts, by states, part of Massachusetts being joined to the Maine District, and part of Virginia to the Kentucky District; and a district court is provided for each of these districts, consisting of one judge who shall hold four sessions annually, at the times prescribed in the act, and shall have power to hold special courts at his discretion. The place where each district court is to be held is prescribed, that of the district of New York being in New York City. This was opened Feb. 2, 1790 (q. v.). The act further provides for a division of these districts (except those of Maine and Kentucky) into three circuits, the eastern circuit comprising the districts of New Hampshire, Massachusetts, Connecticut, and New York. The times when the first session of the circuit court in the several districts shall commence are prescribed, that in New York being on April 4, 1790. The sessions of the circuit court in the district of New York shall be held alternately in New York City and Albany. The several other provisions of the act relate to various powers, the jurisdiction and operation allowed to these courts.—Acts of Cong. (1789), chap. 20 (first session of the first congress).

Elias Burger is paid £15 for a bulbhead across Murray Slip, and David Demarest £15 for filling in this slip.—M. C. (1784-1811), I: 487.

Payment is made John McComb for surveying streets.—M. C. (1784-1811), I: 487.

Before the adjournment of the first congress on Sept. 29, the last day of the first session, the two houses appointed a joint committee to wait on the president and “request that he would recommend to the people of the United States a day of public thanksgiving and prayer to be observed by acknowledging, with grateful hearts, the many and signal favors of Almighty God, especially by affording them an opportunity permanently to establish a constitution of government for their safety and happiness.”—Senate Jour. (1789), 154. The proclamation, recommending Thanksgiving Day, Nov. 26, for a national thanksgiving, was issued on Oct. 3 (q. v.).
1789

May 27

clined to partake of the luxuries of the table so that the other guests were much perplexed. Then the narrator of the story relates that "at length his own body cook, in a clean white linen cap, a clean white tabler before him, a brilliantly white damask serviette flung over his arm, and a warm pie of trifles and game in his hand, came up to him in a friendly manner, and placed it before the Count, who, receiving a moderate share to himself, distributed the rest among his neighbors."—The Talisman for 1830 (ed. by G. C. Verplanck, W. C. Bryant, and R. C. Sands, 1829), 33-41.

A description written in 1790 to accompany a view of Richmond Hill (see Pl. 55a, Vol. I) stated that the place was "the property of Mrs. Jephson," and that it was "formerly the head-quarters of the President, when Commander in Chief of the American army, at the commencement of the late war" (see J. 20 and S. 14, 1776).—N. T. Mag. (1790), 217. See also Vol. I, p. 416; Man. Com. Coun. (1806), 475, under "Zant Berg;" L. M. R. K., III: 951, and 967 under "The Sand Hills.

In the morning, "the Light Horse, and the other Independent Companies in this city" paraded in Broadway, under command of Col. Bauman; they proceeded to "the Race Ground," where they performed manœuvres, and a sham fight "that afforded the highest entertainment to the President, his Excellency the Governor, and a large concourse of respectable characters."—Penn. Packet, O 2, 1789.

Congress establishes a regular army.—Senate Jour., 1st sess., 161.

The common council passes an ordinance for paving Church St. from Barclay St. to the north side of the college gate.—M. C. C. (1784-1811), I: 488.

The announcement is published that the president has appointed John Jay chief-justice, with the consent of the senate; also five associate justices, and the district judges of the thirteen states. Thomas Jefferson has been appointed secretary of state; Edmund Randolph attorney-general; and Samuel Osgood postmaster-general.—Gaz. of the U. S., S 30, 1789; Balcar, Washington after the Rev., 137.

Washington issues a proclamation for a day of thanksgiving on Nov. 26th.—Gaz. of the U. S., O 7, 1789. "This action was criticised as infringing upon the prerogatives of the Governors of the States, but the discussion of the subject in the newspapers did not appear to meet with popular approval."—Smith, N. T. City in 1789.

Washington issues a proclamation for a day of thanksgiving on Nov. 26th.—Gaz. of the U. S., S 30, 1789. "This action was criticised as infringing upon the prerogatives of the Governors of the States, but the discussion of the subject in the newspapers did not appear to meet with popular approval."—Smith, N. T. City in 1789.

Washington records in his diary: "Sat for Mr. Ramage near two hours to-day, who was drawing a miniature Picture of me for Mrs. Washington."—Diary of George Washington from 1789 to 1791 (ed. by Lossing), 11. See also Dunlap, Hist. of Arts & Design (Goodspeed ed.), I: 267-68, and footnote; Baker, Washington after the Rev., 147.

"Walked in the afternoon, and sat about two o'clock for Madame de Brehan, to complete a miniature profile of me, which she had begun from memory, and which she had made exceedingly like the original."—Diary, op. cit.; Baker, op. cit. See O 12.

Passengers for the Boston and Albany stages are asked to enter their names at the "Stage-house," which has been "removed from Mr. Fraunces' to Mr. Isaac Norton's, N. 162, Queen-street, opposite Mr. Walton's."—N. Y. Packet, O 7, 1789.

Pres. Washington writes to John Jay: "It is with singular pleasure that I address you as Chief Justice of the Supreme Court of the United States, for which office your commission is enclosed. . . . ."—Corresp. and Prr. Papers of John Jay, III: 378.

On Oct. 5, 6, and 7, Washington conferred with Hamilton, Knox, Adams, and Jay, respectively, regarding a proposed trip through the eastern States during the recess of Congress. The proposal received their approval.—Washington's Diary (Lossing ed.), 11-14.

At the sessions of the courts of oyer and terminer, and of general jail delivery, which were held in New York and ended Oct. 3, sentences were given eagerly through the crowd of waiters, and placed it before the Count, who, receiving a moderate share to himself, distributed the rest among his neighbors."—The Talisman for 1830 (ed. by G. C. Verplanck, W. C. Bryant, and R. C. Sands, 1829), 33-41.

A description written in 1790 to accompany a view of Richmond Hill (see Pl. 55a, Vol. I) stated that the place was "the property of Mrs. Jephson," and that it was "formerly the head-quarters of the President, when Commander in Chief of the American army, at the commencement of the late war" (see J. 20 and S. 14, 1776).—N. THE ICONOGRAPHY OF MANHATTAN ISLAND.

1789 in accomplishing the said Design, notwithstanding the unfavorable Oct. Season in which it was undertaken. And the said Hall from his Talents and Exertions hath become a signal Ornament of this City and a Monument of the Munificence of the Citizens.

"Resolved therefore that the Thanks of this Board be presented to the said Major L'Enfant for his eminent Services in forming and executing the said Plan and that the Freedom of this City be presented to him under the common Seal of the Corporation as a Proof of their Esteem.

"Resolved also that this Corporation, as a further proof of their Sense of the Services of the said Major L'Enfant in the premises will convey to him in fee a Lot of their common Land containing the quantity of Ten Acres in such place as shall be agreed upon by a Committee of this Board." Such committee is appointed.—M. C. C. (1784-85), I: 409. See further, D 30.

A resolution from the Society of Friends presents an address to Pres. Washington, to which he replies—Gez. of the U. S., O 17, 1789. In his diary he refers to this as an address from "the People called Quakers."—Washington's Diary (Lossing ed.). For the text, see Penn. Mag., XIII: 245. These were Philadelphia Quakers.

"The vice-president leaves New York "on a visit to his seat at Braintree, Massachusetts."—N. T. Jour., O 15, 1789.

The first act of Congress providing payments for invalid pensioners of the United States, which was approved Sept. 29, is published as a broadside; a copy is in the N. Y. P. L.

Richard Varick is installed as mayor.—M. C. C. (1784-85), I: 409.

Washington starts, "in his chariot and four," on his tour of the Eastern States.—Gez. of the U. S., O 17, 1789. His own record states: "Commenced my Journey about 9 o'clock for Boston. The Chief Justice, Mr. Jay—and the Secretaries of the Treasury and War Departments [Hamilton and Knox] accompanied me some distance out of the city. About 10 o'clock it began to Rain, and continued to do so till 11, when we arrived at the house of one Hoyt, who keeps a Tavern at Kings-hill, where we, that is, Major Jackson, Mr. Lear and myself with six servant, which compos'd my Retinue, dined. After dinner, through frequent light showers we proceeded to the Tavern of a Mrs. Haviland at Rye. The distance of this day's travel was 31 miles, in which we passed through (after leaving the Bridge) East Chester, New Rochelle, and Mamaroneck."—Washington's Diary (ed. by Lossing, 1890), 19, N. T. Jour., O 22, 1789.

"According to one who witnessed his reception in one of the towns upon his route, Washington travelled in a post chaise drawn by four bay horses driven by postillions dressed in blanket-coats, liveries, jockey caps, buckskins, and boots. Col. Lear rode on one side of the chaise and Major Jackson on the other, while following it was a light baggage-wagon driven by a man in a round corduroy jacket and buckskin boots. In the road we overtook a horseback Washington's colored attendant, Billy, leading his white charger."—Smith, N. T. City in 1789, 243. See also Winors VII: 128.

Mrs. Washington, in the absence of Gen. Washington on his Eastern tour, writes in a letter: "I lead a very dull life here and know nothing that passes in the town. I never go to any public place,—indeed I think I am more like a state prisoner than anything else, there is certain hounds set for me which I must not depart from—and as I cannot do as I like I am obstinate and stay at home a great deal."—Smith, N. T. City in 1789, citing "Curiosities of American History.

The proprietors of "Houses and Lots of Ground fronting Mulberry and Cross Streets in the Outward" petition the common council against the regulation of Mulberry St. which was approved on Sept. 9 (s. t.). They state that "Mott Street which is parallel to Mulberry Street and at the distance of less than two Hundred feet therefrom is at present Twenty five feet and upwards perpendicularly higher than Mulberry Street, where it is intersected by Cross Street, And as by the regulation refer'd to, Cross Street is to remain as it is, it will thereby considerably be rendered for ever impassible by foot Passengers." They further state that "the Fresh Water Pond and the Wells supplied by it are the only resources that this City has for Water, that every regulation therefore that tends to lessen the Depth of Water in that Pond or to contaminate it by an Accumulation of filth, must be repugnant to the Intest and dangerous to the Health of the Citizens, that these consequences must result from rendering it the drain from all the Streets in its neighbourhood is too obvious Oct. 23 to mention."

They object to the intended regulation also because "it appears to them very improper that the Water should be brought from Chatham Street (which is not to exceed the distance of a quarter of a Mile from the East River) to the Fresh Water Pond, and from thence to the North River which is more than twice the distance, in the way it must of necessity pass, if at all, Via Out by Mt. Lebanon and which will be altogether impracticable when those Lands are Improved."

They state further that "a great proportion of the Land about Fresh Water is high and that it will be attended with a great deal of Expense to have it dug down to accommodate it to the small proportion that lies low, and must also be followed with an irreparable loss and Damage to a number of Estates in that Quarter."

They say that "the regulation of Mulberry Street, as reported on the Ninth day of Septem' last may be reconsidered and that the regulation of the said Street, as agreed to by your Board on the First day of August 1786 may still be adhered to."

Among the signers of this petition are Robert R. Livingston, John R. Livingston, James Beekman, Leonard Lippard, Hugh Gaine, and others.—From original petition (in metal file No. 8, city clerk's record-room), endorsed "read Oct 23d 1789 & The whole Board to go & view the Ground to morrow." (A similar petition, with other signers, dated Sept. 12, was submitted to the board, and was reported unfavourably by the committee to whom it was referred.)

The record in the minutes is that the common council resolves to meet next day at the Flows and Harrow Tavern in the Out Ward (see L. M. R. K., III: 980), to view the streets in that neighbour- hood, where Mulberry and St. James Sts. are situated.—M. C. C. (1784-81), I: 497. On Oct. 30, the board ordered that "any further operation upon the Ordinance for filling in & levelling Mulberry Street be suspended until April next."

In the mean time, a comprehensive survey was ordered, covering all that part of the city.—Ibid., I: 501. Such survey was made, and ordered filed on April 6, 1790.—Ibid., I: 537. For an outline history of Mulberry St., see L. M. R. K., III: 1006.

The "Roof at backs of some of the Chinnies of the City Hall" leaks; the "Corner or audience Room" there remains unfinished; and "for want of a proper Ash House" the building might be en- dangered by fire. The common council appoints a committee to "get the said Chinnies leaded, the said Corner Room finished & an Ash House built in the most safe & convenient Place."—M. C. C. (1784-81), I: 498.

The common council orders "that Chains be fixed across Front Street to prevent the Interruption by the passing of Carriages during Market Hours," so that "the Country People resorting to the New Market, should be accommodated as much as possible."—M. C. C. (1784-81), I: 498.

The common council also conceives it necessary "that Chains be provided to fix across the Street at the Exchange to prevent the Courts of Justice & the Legislature when they meet from Interruption by the Noise of Carta."—Ibid., I: 498. On Nov. 29, payment of $41,114 was made for "Chains fixed across the Street at the Exchange."—Ibid., I: 506. See further, D 11.

Isaac Roosevelt and others petition the common council that "a Bullhead may be laid across S' James Slip & that the same be filled up a certain distance from Cherry Street." Referred to a committee.—M. C. C. (1784-81), I: 498. The committee reported estimates on Nov. 29, and was directed to close a contract. At the same time, the proprietors and occupiers of lots at the lower end of St. James St. were ordered to "fill up the said Street, from where the Pavement ends, so as to make it more convenient & passable."—Ibid., I: 504. On Dec. 4, $30 was paid to the committee on account, for the work of erecting the bullhead.—Ibid., I: 508. On Dec. 30, balance in full, $50.—Ibid., I: 513.

The common council orders "that the Ald'm & Ass't of the Dodge Ward direct such necessary Buildings to be erected at the Corner House [watchhouse] opposite to the City Hall [see S 16] as to render it comfortable for the Watchmen & safe for the confinement of Persons who may be apprehended by the Watchmen in the night time."—M. C. C. (1784-81), I: 499. See further, D 4.

The common council resolves "that in future this Board will not grant any Money towards a Pump without a brass Chamber &
unles the well as to its mace & size be approved of by the Aldm

The common council appoints a committee to make necessary repairs to "the Bridges of the Corporation Wharfe at the North River," M. C. G. (1784-1831), I: 500. Cf. A Payment of £413.14
was made for this on Nov. 20—ibid., I: 506.

27 At the corner of Nassau and Ann Sts., stands Pearce's tavern.—
N. Y. Packet, O 27, 1789.

The common council passes an ordinance "for the paving of
Greenwich Street from Barclay to Warren Street & for completing
that part of Greenwich Street which lies opposite to Barclay Street."—
M. C. G. (1784-1831), I: 501. On Nov. 20, payment of £293
was made for these repairs (ibid., I: 506), and on Jan. 15,
1790, £1771.16 (ibid., I: 517).

28 Considerable progress has been made in this season in the works
at the battery, one half of which are already completed and formed into
excellent wharves: the other half must lie over until next
spring, but when finished will connect the whole into a most
beautiful circuitous street around three-fourths of New York, from
Greenwich street along the North River until it comes to White
Hall, and from thence by the East River along Albany Pier, . . .

The spirit of the City, it is said, is "in favor of good conductors,
will be a great preservative against lighting, to all the
houses situate within the distance of several hundred paces, and
particularly so to the Federal Hall, where Congress meets."—
N. Y. Daily Gaz., N 12, 1789. See the Colden-Johnson correspon-

Washington, returning to New York from his New England
tour, breakfasts at Hoyn's tavern, this side King's bridge. Arriving
at his house between 2 and 3 o'clock, he finds "Mrs. Washington
and the rest of the family all well—and it being Mrs.
Washington's night to receive visitors, a pretty large company of
ladies and gentlemen were present."—Washington's Diary (Loss-
ing ed., 1860), 52. His arrival is announced by a federal salute from
the Battery.—N. Y. Jour., N 19, 1789. See also observations of
"politics" in the Daily Adv., cited in Smith's N. Y. City in 1789,
241.

The common council orders "that from this time to the 20th
of March next the Watchmen parade at the Watch House [see O 23]
and commence their Duty at seven O'Clock."—M. C. G. (1784-
1831), I: 505. For other early watch-houses, see L. M. R. K.,
III: 977. This "parade" was probably the march in column to
the several posts, before the duties of the night commenced.

The pumps or "engines" used by the firemen of this period are
shown on an engraved certificate of a fireman's appointment.—See
reproduction in Man. Com. Coun. (1834), opp. p. 155. See also
engraved frontispiece of The Deed of Settlement of the Mutual
Assurance Co. (N. Y., 1787).

Washington, on the 20th, "made a walk round the Battery,"
and later receives and answers an address from the president (John
Wheelock) and corporation of Dartmouth College,—Washington's
Diary (Lossing ed.), 53. This walk, which he mentions also on
Dec. 7 and 9, and on other days, was his favourite exercise, although
he also frequently refers in his diary to riding.

At the City Tavern (the present 115 Broadway) is given a
performance of "Fashionable Raffillery" by Mrs. Gardner of the
Theatre Royal, Covent Garden, who has been playing with great
success in Jamaica and Charleston. To this are added songs and a
"whimsical Mock Heroic after-piece," entitled, "The Mad Poetess." At
this time the performance began at seven o'clock.—Daily Adv.,
N 11, 1789.

The improvements which have been made in every quarter of
this City since last winter, seem almost incredible. . . . The
flagging of our streets add much to the convenience of the inhab-
itants, and the levelling of the Battery, so as to make a clear road
from Broadway around the south end of the city, will be extremely
conducive to health and exercise; add to this the beauty of the
prospect, now ornamented by the spire of Trinity Church, which
will have a fine effect to vessels coming from sea."—N. Y. Daily
Gaz., N 20, 1789.

The commissioners of the almshouse and bridewell propose to the
common council the establishing of a workhouse in the bridewell
for idle and intemperate vagrants, who are now crowding the
almshouse, imposing on the public, and incomming those who
are real objects of charity. The board approves, and orders that
the commissioners carry the plan into execution.—M. C. G. (1784-
1831), I: 505. On the same day, the constables and marshals are
paid £32.10.12 for apprehending & conveying Vagrants to Bridewell.

—ibid., I: 506.

The common council orders "that the public Hooks & Ladders
be removed from the Gang Way of Mr George Codwise to the Mar-
ket House at Peeks Slip."—M. C. G. (1784-1831), I: 506.

John McComb is paid £31.8:8 for "rebuiding the fire Engine
House in Verey Street."—M. C. G. (1784-1831), I: 506.

The city pays Jonathan Wrench £30, for "Disallowing criminal
prisoners in Goal" from Oct. 11, 1788, to April 30, 1789; and
Jameson Cox £884.12 for "the like" from Aug. 1 to Oct. 3, 1789.
—M. C. G. (1784-1831), I: 507. At its next meeting, Dec. 4, the
common council ordered that "in future no criminal Prisoner con-
fined in Goal be subsisted at the public expense without a special
Order for the purpose from the Magistrate committing the
prisoner."—ibid., I: 507. On Feb. 12, 1790, this was repealed, and
a resolution passed "that in future no prisoner in Goal be subsisted
at the public expense if the Magistrate shall signify in the Mitimus
that such prisoner is not to be subsisted at the public expense."

—ibid., I: 522.

There is "the fullest house of the Theatre ever known, owing
to the President and Lady being there, and its being more known."—Corresp. and Jour. of S. B. Webb, III: 145; N. Y. Jour.,
N 26, 1789; Mag. of Am. Hist., XIX: 108. Washington's own
record of the event is: "... Went to the play in the evening—
sent tickets to the following ladies and gentlemen and invited them
to seats in my box viz:—Mr Adams (lady of the Vice-President),
Genl [Philip] Schuyler and lady, Mr [Kilos] King and lady, Maj.
Butler and lady, Colo Hamilton and lady, Mr Green—all of whom
accepted and came, except Mr Butler, who was indisposed."—

The occasion was a benefit for Mr. Wignell, given by the Old
American Company. A comedy never before acted in America,
called "The Toy; or, A Trip to Hampton Court," was presented,
followed by "a Comic Sketch, interspersed with Music, called,
Dandy's Return, with an account of the Countries which he has
travelled through, particularly America."—Daily Adv., N 24, 28,
1789. Dunlap describes the expression on the face of Washington
during what seemed to be personal allusions to himself in the
progress of the play. He smiled at lines alluding to the govern-
ment, and when relieved of any further personalities "he indulged
in that which was with him extremely rare, a hearty laugh."—
Hist. of the Am. Theatre (1837), 162-61. See also Ford, Washington
and the Theatre.

Lossing (vide supra), in a footnote, says that a German named
Feyles was the leader of the orchestra at the John St. theatre. "He
composed the President's March for this occasion, and that
tune was played at the moment when Washington and his friends
deced the theatre. It was afterwards slightly altered, and has
since been known as Hail Columbia ever since." Cf. Hone's Diary, II: 125.

The "Dancing Assembly" meets this evening (Daily Adv.,
N 24), instead of the following day which will be Thanksgiving
Day. "The President & Lady and of course all the great folks of
the City attend."—Corresp. and Jour. of S. B. Webb, III: 145.
Washington records that he "stayed until 10 o'clock."—Wash-
ington's Diary (Lossing ed.), 58.

Washington records: "Being the day appointed for a Thanks-
giving [see S 26], I went to St. Paul's Church, though it was most
indelent and stormy—but few people at Church."—Washington's
Diary (Lossing ed.), 58.

Trumbull, the painter, arrives from Paris by way of London.
He proceeded to paint as many heads of the signers of the Declara-
tion of Independence as were present in congress, at the second
session which commenced on Jan. 4, 1790.—Note by Lossing, The
Diary of Washington (1860), 90: Autobiography, Reminiscences and
Letters of John Trumbull, I: 161; Dunlap, Hist. of Arts of Design,
II: 38-39.

"The prisoners confined for debt in the city of New York must
respectfully beg leave to return their grateful thanks to the Presi-
dent of the United States, for his very acceptable donation on
Thursday last [Thanksgiving Day]."—N. Y. Jour., D 3, 1789.

The "President and his Lady, the Governor and his lady, the
Chief Justice of the United States and his Lady," and other "dis-

1789

Nov.

The distinguished characters," go to the theatre to see "Cymon and Sylvia," a "dramatic romance."—N. T. Jour., D 3, 1789; Mag. of Hist. XIX: 109, citing Washington's "Journal." The others to whom Washington presented tickets were: "Debt Johnson and lady, Mr Dalton and lady, the . . . Secretary of War and lady, Baron de Steuben, and Mrs Green."—Washington's Diary (Lossing ed.), §8. "This performance was not merely the last night of the season, but was also the last play seen by Washington in New York; before the theatre was reopened, the seat of government had been removed to Philadelphia."—Ford, Washington and the Theatre (Dunlap Soc. Publs., 1899), 43.

On or about this date, Vice-Pres. Adams returned "from his late visit to his seat in Braintree, Massachusetts."—Gen. of the U. S., D 9, 1789.

Dec.

Adam Gerard Mappa arrives in New York, bringing with him the equipment of the famous Vauxen's type foundry at Amsterdam, Holland. Early the following year he began operating the first commercial type foundry in the United States. According to the autobiography of Francis Adrian van der Kemp, Thomas Jefferson, then United States ambassador in France, suggested to Mappa that he take to America his complete "Letter Foundry," not alone for "the Western, but the Oriental languages at the value of at least 30,000 Dutch guilders,"—Francis Adrian van der Kemp: An Autobiography, 140 et seq.

Notice is published that "persons who have demands against the United States, for articles supplied, or services performed in finishing or repairing the house of the Hon. Mr. Osgood, for the reception of the President of the United States, agreeably to an act of Congress, of the 15th April last, are hereby requested to call at the 81, King Street, for the settlement of their accounts."—Daily Adv., D 3, 1789.

The mayor delivers to the common council the title-deeds and release, from Catharine Provoost to the city corporation, "for House & Lot at the Corner of Broad-Street & Wall Street" (see § 16). This was the watch-house. The board orders that the mayor issue his warrant on the treasurer to pay her agent £225 (half the price), and that a bond from the city to her be issued for the balance at 5 percent.—M. C. C. (1784-1831), I: 507. This bond was delivered to her agent (Wm. Leary;—see § 16) on Dec. 17.—Ibid.

The city pays £25 "towards completing the Market House at the Exchange" (see Je 18).—M. C. C. (1784-1831), I: 508. See also O 23. On Dec. 18, the reporter recorded that Bardin was willing to appropriate his rooms for this purpose, "on the public's providing the necessary fire Wood & Candies."—Ibid., I: 511.

"Being suggested by some of the Members that it would be more proper, persistent, that this Board be advised of a reason- able compensation to the Mayor of this City for his trouble in the execution of that Office instead of the uncertain Fees or allowance usually made to him out of the Monies arising from the public Markets & the Tavern Licenses &c;" now therefore, the board appoints a committee to treat with the mayor on the subject and report.—M. C. C. (1784-1831), I: 509. See also, further, D 30.

Washington records in his journal: "Exercised in the coach with Mrs. Washington and the two children (Master and Miss Custis) between breakfast and dinner—went the fourteen miles round." This was over the old Bloomfield road on the west side of Manhattan Island, leaving what is now Riverside Park, near the bluff where General Grant's tomb now stands, by a cross-road, to the Kingsbridge, and returning by the old Boston Road.—Mag. of Am. Hist. (1888), XIX: 110. Cf. Ja 6, 1790.

The plan of another tontine is published. The treasurers are Mestra. Lockharts, bankers in Pall Mall. The trustees of a guarantee-fee fund of $800,000 are Francis Baring, Edmund Boehm, and Thomas Henchman, of London.—N. T. Packet, D 12, 1789. Cf. S 10, 1789.

The Secretary of the Treasury—the Comptroller—the Register—and the Auditor, have removed their offices from Broadway, to the corner of Dock and Broad streets, near the exchange.—N. T. Jour., D 17, 1789.

Washington records in his journal: "Read over and digested my thoughts upon the subject of a National Militia, from the plans of the militia of Europe, those of the Secretary of War, and the

Baron de Steuben." On Dec. 19: "Committed the above thoughts to writing in order to send them to the Secretary of the Department of War, to be worked into the form of a bill, with which to furnish, the Committee of Congress which had been appointed to draught one" (see D 21)—Mag. of Am. Hist. (1888), XIX: 112. The report of the sec. of war, dated Jan. 18, 1790, presenting "A Plan for the General Arrangement of the Militia of the United States," was published in Daily Adv., Ja 23—Feb. 1, inclusive. The joint commit- tee of congress sent the adopted bill to Washington for his appro- val and signature, on April 29, 1790. It was entitled "An Act for Regulating the Military Establishment of the United States."—Diary of Washington, ed. by Lossing (1860), 150. When Washington returned the bill with his signature, on the fol- lowing day, he noted the fact in his diary, and added: "though I did not conceive that the Military establishment of the one was ade- quate to the expences of the Government, & the protection it was intended to afford."—Ibid., 131.

A cook and a coachman are advertised for "for the Family of the President of the United States."—N. T. Packet, D 19, 1789.

Regarding the management of Washington's household under Samuel Fraunces, his steward, and the difficulty of procuring satis- factory servants, see Smith's The City of N. Y. in 1789, 236-37; Dec. 19, Market Bag, 394.

Washington records in his diary: "Sat from ten to one o'clock for a Mr Savage, to draw my Portrait for the University of Cam- bridge, in the State of Massachusetts, at the request of the Pres- ident and Governors of the said University."—Washington's Diary (Lossing ed.), 65. "The bust portrait painted by Edward Savage from me, and the subsequent sitting recorded in the Diary is still owned by Harvard College. It represents Washington in uniform, with the order of the Cincinnati on the left breast, . . . Mr. Savage afterward (1792) engraved this portrait in the stipple manner. . . ."—Baker, Washington after the Rev. (1898), 164.

The Legislature of the state, which is to convene in this city on Monday the 11th of January next, will be accommodated with rooms in the building over the Exchange Bridge. And that, during the sitting of the legislature, the courts will be held in some rooms fitted up for the purpose, in that spacious building which has been intended for an hospital."—Daily Advt., D 25, 1789.

Mrs. Washington, in a letter to Mrs. Warren, wife of Gen. Warren, makes the following observations: "... Though the General's feelings and my own were perfectly in unison with respect to our predestination for private life, yet I cannot blame him for having acted according to his ideas of duty in obeying the voice of his country. The consciousness of having attempted to do all the good in his power, and the pleasure of finding his fellow-citizens so well satisfied with the disinterestedness of his conduct, will doubtless be some compensation for the great sacrifice which I know he has made." "With respect to myself, I sometimes think the arrangement is not quite as it ought to have been; that I, who had much rather be at home, should occupy a place with which a great many younger and gayer women would be prodigiously pleased. . . . I know too much of the vanity of human affairs to expect felicity from the splendid scenes of public life. I am still determined to be cheerful and to be happy, in whatever situation I may be; for I have also learned from experience that the greater part of our happiness or misery depends upon our dispositions, and not upon our circumstances. . . . "I have two of my grandchildren with me, who enjoy advantages in point of education. . . . My other two grandchildren are with their mother in Virginia. . . . The President's health is quite re-established by his little journey. . . ."—Am. Hist. and Literary Curiosities (1860), 20-21.

The president's domestic family consisted of Mrs. Washington, the two adopted children (Eleanor Parke and Geo. Washington Parke Custis, the latter eight years of age); Mr. Tobias Lear, the principal secretary; Col. David Humphreys, Messrs. Lewis and Nelson, secretaries (the former a nephew of Washington, and the latter a son of Gov. Nelson of Virginia), and Maj. William Jackson, aide-de-camp.—Custis, Recollections of Washington (with notes by Lossing, 1860), 394.

The committee appointed on Oct 12 (p. v.) to report "the proper part of the Common Lands to be
The committee appointed on Dec. 11 (q.v.) to treat with the mayor "on the subject of giving him a Compensation for his trouble in executing the Office . . . instead of the Fees usually allowed him," makes the following report: They estimate that Mayor Duane, during his mayoralty, received in fees and perquisites about £4,500, or an average of about £900 a year. During the first two years of his mayoralty, "he Appropriated to his own use the whole produce[?] of the Fees arising from the Markets and Eighteen shillings for each Tavern Licence." Therefore, his fees and perquisites for the latter period have averaged only about £600 a year. The fees of the markets for the last three years have averaged about £350 a year; and the fees and perquisites during the same period about £210 a year. No certain estimate can be formed "of the Yearly amount of the Fees received by the Mayor of this City, on making Freemens, or Licences to Cartermen, Cutlers, and others, and on appointing Marshalls and other Officers in the City." The committee give their opinion, therefore, "that it would be proper, and have proved to the benefit of the Mayor to pay him at the rate of Six hundred Pounds a Year, to commence the first day of January next, in Quarterly payments."* Mayor Varick concurs in the report.

—M. C. C. (1784-1831), I: 511-14. 31

The New-York Manufacturing Co. is established in Vesey St. There are 14 weavers and more than 130 spinners. The object of the manufacturing society is to give employment to the industrious poor. John Sturges, secretary, and Alexander Robertson an active member. The linens, etc., manufactured here were sold at the factory.

The Free African School had its beginning about the end of this year. —The N. Y. Mag. and Lit. Repository (1792), 258.

1790

— New York City in 1790 was the largest city in the United States, with a population of 33,111; Philadelphia was second, with 26,512; and Boston third, with 18,120—Federal Census.

— Early in this year, Duncan Phyfe, a Scotchman by birth and 22 years of age, came to New York from Albany, where he already had gone into business for himself as a cabinet-maker. His first shop was in Broad St.; he finally settled, in 1794, in Partition (Fulton) St. where John Durand and Charles B. Hubbard resided. He worked during the rest of his life.—Cornelius, Furniture Masterpieces of Duncan Phyfe (1827), 35, 39. In a letter to the author, Mr. Cornelius gives his authorities for the foregoing statements. They are the notes of one Mr. Hagen, father of Ernest Hagen, cabinet-maker, published by Walter Dyer in Early American Craftsmen; the City Directories; and Goodrich's Picture of N.Y. (1828). When Partition and Fair Streets were rechristened Fulton Street, on Sept. 9, 1816 (q.v.), and the houses were renumbered, Phyfe's business addresses were Nos. 168 and 170, and his residence was opposite at No. 169. A contemporary water-colour view of his warehouse, salesroom, and workshop, as seen from his home, is reproduced as a frontispiece to Mr. Cornelius's book. It is owned by the Metropolitan Museum of Art.

— In this year, the Quakers purchased a site which, on modern maps, was on Liberty St., 60 ft. west of Liberty Pl.—See Liber Deeds, XLVI: 290 (New York). Here their third meeting-house was erected in 1802—a brick building, measuring 40 by 60 ft. In 1826, the building was sold to Grant Thoburn, who occupied it as a seed store for nearly ten years; and it was then demolished and large brick stores were erected in its place.—Greenleaf, Hist. of the Churches, 116-175. Cf. Liber Deeds, CCXXX: 399 (New York). Shown on Pls. 34, 40, 41, and 42, Vol. I. See also L. M. R. K., III: 528; Pl. 174, Vol. III. Onderdonk says that, in 1794, a building was put up on the land bought for that purpose, which was used as a school and as a place of worship until 1802, when a new meeting-house was erected.—Annals of Hempstead, 102.

— Sometime between this year and June, 1793, the first flagstaff erected on the Battery was built, the site being, in the modern Battery Park, a few feet south-east of Greenwich St.—L. M. R. K., III: 962. No record of the erection of this flagstaff has been found. It first appears on the Drayton View (see Se. 10-20, 1793, and Pl. 59, Vol. I), and the earliest known mention of it is in Drayton's letters of Je. 15-25, 1793 (q.v.). As the old fort was ordered demolished on March 16, 1790 (q.v.), it is reasonable to assume that the flagstaff, which stood on the south-west bastion (see Pl. 46-A, Vol. I), was taken down at this time, and the new one, known as the "churn," erected on the Battery soon after. The first reference to the flagstaff in the minutes is under date of July 22, 1793 (q.v.). This first flagstaff was taken down in 1809 (q.v., O 21 and D 26), and a new one built.

— In this year, the Kennedy house, No. 1 Broadway, was occupied by a boarding school.—See descrip. of Pl. 98, III: 590.

— The assessors' and collectors' books this year show the following value of estates in the city of New York:

Total: £2,338,000 | £16,517

The average rate of taxation at this period was thirteenth shillings and sixpence on £100.—Man. Com. Coun. (1859), 512.

— About this time, improvements on the east side of Broadway below Wall St. commenced, by the erection of first-class residences. Among the names of the earliest occupants of the new buildings, see Man. Com. Coun. (1856), 253.

— About this time, a lined oil factory, worked with wind sails, stood on a high wooded hill, about a quarter of a mile north-east of the Koleh. On the sloping hill back of the present city hall, toward the Koleh, there was a "beautiful meadow."—Watson's Annals of N. Y., 171.

— An elevation and two plans of "Government House," were drawn at about this time by John McComb, Jr. They are reproduced in Vol. III, A, Pls. 10-13, b, and e. See also descrip. of Pl. 46 A-b, I: 357.

— About this time, a plan was prepared showing the level of Queen St. from Maiden Lane and the Fly Market to Ferry St. and Peck Slip.—See the original MS. (from Holden sale) in N. Y. H. S. From an undated petition of (about this time) to the common council, John Foxcroft states that, "before the late War, and at the time of the Invasion of New York by his Britannic Majesty's forces," he was "Agent to the British packets resorting to America," and "was necessarily stationed in this City to execute such Agency." He claims that, in 1784, he was "improperly taxed" under an act of the legislature for raising £100,000. He paid part of the tax with protest, and seeks reimbursement.—From the original MS. in metal file No. 7, city clerk's record-room. Foxcroft was also postmaster-general.—See Arg. 1776. Other original petitions of a similar character are in the same file in the record-room.

— In this month, T. and J. Swords began to publish The New York Magazine, or Literary Repository. The publication continued through 1792.—Ford, Check-list of Am. Mag. printed in the 18th Cent., 9. See also Sahin, item No. 54799.

— Although the new (second) Trinity Church is not completed, a view of it, probably from the architect's drawing, is published and described in the first number of this magazine. This view is here reproduced as Pl. 54-a, Vol. I, and partly described on pp. 414-15. Vol. I. It is 104 ft. long and 72 ft. wide, and the steeple is 200 ft. high. The former edifices, burned in Sept., 1796 (q.v.), was larger—146 ft. long, including tower and chancel, and 72 ft. wide; but the steeple was only 180 ft. high. For more particular description, see JI 14, 1827.

— Washington records: "The Vice-President, the Governor, the
THE ICONOGRAPHY OF MANHATTAN ISLAND

1790. Senators, Members of the House of Representatives in Town, Jan. foreign public characters, and all the respectable citizens, came the 1st to the hours of 12 and 3 o'clock, to pay the compliments of the season to me—and in the afternoon a great number of gentlemen and ladies visited Mr. Washington on the same occasion.”—Washington's Diary (Lossing ed.), 65.

5 Mrs. Byrne announces her removal to that "large, elegant and convenient dwelling house and garden, lately occupied by Col. Butler, who lived directly opposite to her late dwelling, corner of Nassau and Little Queen Streets...”—Daily Adv., Ja 5, 1790.

6 The senate meets at the federal hall for the beginning of the 1st session of the first congress, a quorum being present.”—Jour. of Wm. Maclay, 1793.

Washington records: "Sat from half after 8 o'clock till 10 for the portrait painter, Mr. Savage, to finish the picture of me which he had begun [see D 21, 1789]...”—Washington's Diary (ed. by Lossing, 1860), 66.

8 Washington describes in his diary the circumstantial details of his going to the city hall and reading, in the senate chamber, the "oral communication" which, as he recorded on Jan. 4, he desired to deliver to congress.—Diary of Washington (ed. by Lossing, 1860), 67-68. The method of reading messages to congress, by the president, was discontinued after Pres. John Adams's time, and not revived until 1913, by President Wilson.—N. Y. Times, Ap 7, 1913.

9 Washington records that on this day he "Exercised with Mr. Washington and the children in the coach the 14 miles round.”—Washington's Diary (Lossing ed.), 68. The route was by the old Kings-Bridge road, which passed over Murray Hill, and which afterwards was used in going to and from the legislature, and thence to 1799—commencing January the first to go twice a week till the first of May, and three times a week from first May to first November, and to employ a person to go thro' with the mail to take Care of it. He engages that this conductor shall transact all private business committed to him with fidelity at a reasonable Commission—he will make his first charge for opening the mail on Saturday, Tuesday, Wednesday, and Saturday Evening in New York, at Fraunces Tavern, in Boston at the subscribers House, in Hartford at Frederick Bull's Coffee House.

11 "Four active men are now engaged as Conductors, who have given bonds for the faithful discharge of their trust.”

The advertisement adds that "The Boston, Albany and Philadelphia Stages now run up at Fraunces Tavern, Cortlandt-Streets, where passengers will please to apply.—Cat. of the U. S., Ja 20, 1790. This system of expressage or parcel-post between New York and Boston antedated by many years the so-called first express line which was established by Wm. F. Harnden in 1839.—See 1858-1859: Lossig, Hist. of N. Y. City, I: 786-80.

Washington records: "Exercised on horseback in the forenoon. Called in my ride on the Baron de Polnitz, to see the operation of his (Winlaw's) threshing machine.” He describes it—Washington's Diary (Lossing ed.), 72.

15 An advertisement is published asking for sealed proposals, prior to Jan. 31, for "building a brick house, forty feet long, by twenty-five feet wide, for the use of the Free Scholars of the First Presbyterian Church in this city.” Ebenezer Hazard, on Broadway, has the contract for the building—"The Legislature... had determined to carry out the plans for the new building...”—Diary of Washington (ed. by Lossing, 1860), 73.

The religious society called Quakers having presented to the assembly an address "relative to permitting vessels to fit out in the port of New-York for the coast of Africa, for slaves,” a committee of the assembly, while agreeing "in sentiment with the petitioners respecting the slave trade,” deem it improper for the legislature to interfere, in as much as "the right of regulation is vested exclusively in the Congress of the United States.”—Assem. Jour., 13th sess., 21.

17 The common council orders that fire buckets be made of sufficient size to hold 23 gallons of water.—M. C. C. (1784-1781), I: 517.

21 The city pays £23 for making copies of its marshals' staves, and £413.10s. for painting them.—M. C. C. (1784-1781), I: 517.

The committee appointed on Jan. 13 (M. C. C., 1784-1831, I: 517; see also May 13, 1785) to report on the future disposition of the slaughter-house, and the best manner of disposing of the stalls and repairing & improving the City Hall.” This is agreed to.—Ibid. Jan. 15.
The standing in the markets, reports as follows: It is the opinion of the committee that "the Butchers will be greatly accommodated, by being permitted to slaughter at their own Houses, subject to such Regulations as the Corporation may establish; whereby the Expense of keeping a public Slaughter House will be materially reduced, and not to be the present Slaughter House should be let out for the space of one Year after the expiration of the present Lease, free of any charge of Repair to the Corporation, for the purpose of accommodating such Butchers as may not be immediately provided with private Slaughter Houses & allowing them time to erect the same;" that one single rate of fees for each market be established—40s. per month for the Flats, 30s. in the Ovens Market and 15s. in the Exchange, Peck's Slip, and new markets,—with assessors appointed by the butchers themselves; the clerk of the markets to collect these assessments on the last Saturday in each month, and pay the amounts collected into the hands of the city chamberlain. By this method, an annual income of £1,555 would be raised, "attended with little trouble & Expense in the collection & less liable to the inconveniences & impositions to which the present Mode is exposed." It is ordered that the clerk prepare an ordinance to carry the report into effect.—M. C. G. (1784-1831), I: 517-19. Such ordinance was adopted on Feb. 19—ibid., I: 525. This was repealed on March 26, and a more effective ordinance passed.—ibid., I: 534.

The "suing the Lamp Oil in Cape" being "subject to great waste from leakage," the common council appoints a committee to report "a proper place for the erection of a Cistern."—M. C. G. (1784-1831), I: 519. On Feb. 26, the committee reported their opinion that "a House of 36 feet by 24 built of Brick & covered with Pantile with a Cellar at the one end & a Cistern or Cisterns at the other to contain fifty barrels That the Floor over the Cistern be made light & descending from all sides towards the center over the Cisterns to receive the leakage of what may be stored in Cape, be erected in the yard behind the Bridewell." They estimated the expense of erecting such house at not more than £150. The report was agreed to by the board.—ibid., I: 526. On March 19, the board ordered the committee "who reported on the Oil Store" be directed to cause it to be erected immediately.—ibid., I: 532. On March 26, Geo. was advanced £30 to procure a room for the Cistern.—ibid., I: 535. Final payment of £88:19:5 was made on Sept. 17 (q.v.).

The common council orders a payment of a bill for £41 "for Repairs to the Court Room in the Exchange."—M. C. G. (1784-1831), I: 520. This was doublet in preparation for its occupation by the superior court.—See F 1.

The first session of the supreme court of the United States is convened. A report of the event, published next day, stated: "The Supreme Court Of the United States, convened yesterday [Feb. 1] in this city; but a sufficient number of the Judges not being present to form a quorum, the same was adjourned till this day [Feb. 2] one o'clock. The Hon. John Jay, Chief Justice of the United States, The Hon. William Cushing, and The Hon. James Wilson, Assistant Justices, appeared on the bench. John M'Kesson Esq. appointed to keep the Common Records of the Court Room was present. An upper room was commonly crowded.—The Chief Justice and other Judges of the Supreme Court of this state; the Federal Judge for the District of New-York; the Mayor and Recorder of New-York; the Marshal of the district of New-York; the Sheriff, and many other officers, and a great number of the gentlemen of the bar attended on the occasion.—Daily Adv., F 2, 1790, Gaz. of the U. S., F 3, 6, and 10, 1790. For the act establishing the federal courts, see S 24, 1789.

Washington writes: "Agreed on Saturday last to take Mr. McComb's [Macomb's] house, lately occupied by the Minister of France, for one year from and after the first day of May next.—Diary of Washington (ed. by Loring), 85; and see 87. For an account of the Macomb property, see descrip. of Pt. 56, I: 422; and "Bunker's Mansion House" in L. M. R. K., III: 977.

The announcement is published that Mr. Trumbull, who has lately returned from Europe, "proposes to describe, in a series of Paintings, the most remarkable Events of the late American Revolution. He has in contemplation the following subjects, viz. 1. The Death of Warren at the Battle of Bunker's Hill. 2. The Death of Montgomery at the Attack of Quebec. 3. The Congress of 1776, in the Declaration of Independence. 4. The Battle of Trenton. 5. The Death of General Hessian at Trenton. 6. The Surrender of Burgoyne at Saratoga. 7. The Treaty with France. 8. The Surrender of Lord Cornwallis at York-Town. 9. The Signing the Treaty of Peace. 10. The Evacuation of New-York by the British in 1783. 11. The Resignation of General Washington. 12. The President received by the Ladies of Trenton at the Triumphal Arch. 13. The Inauguration of the President."

"The Portraits of the principal Actors in these great scenes will be preserved, and Prints will be published of the whole. The two first of these Subjects are finished, and the Paintings in the hands of eminent Engravers in Europe. Four others are commenced, some of which are half completed. These, with the remainder within twenty years of application . . . We understand that the Engravings are to be published in numbers, containing two each. The price will be three guineas for every print."—N. Y. Mag., Ja, 1790, pp. 63-64.

The expenses of the almshouse for the last quarter amount to £1,799:17:2^, and those of the bridewell to £236:4:1. The estimated amounts needed for the next quarter are £1,400 for the almshouse and £100 for the bridewell.—M. C. G. (1784-1831), I: 521.

"The Federal Court for the district of New-York will be opened this day in the Consistory room opposite the Dutch Church in Garden-street."—Daily Adv., F 2, 1790. This was the first session of this court, which was one of those established under the act of 24, 1789 (4. C.).

"From the "United States District Court," for the district of New York, it is opened by James Duane, the judge of the court. The first grand jury, having been summoned, is present, and Judge Duane addresses them at length, beginning: "Gentlemen of the Grand Jury, In a charge to the first Grand Inquest convened for this District, I heed an unadorned path. We are now become emphatically a nation. A new Constitution pervades the United States, . . ." Daily Adv., F 3, 1790. On Feb. 4, when the district court met again, the grand jury presented an address to Judge Duane expressing thanks for the judge's charge, "in which the nature of our duty, and the judicial system of the United States are described in the clearest manner, and recommended by the most cogent reasons. . . ."—ibid., F 5, 1790.

"The committee," a farm of 90 acres on the East River, "three miles from this city," is advertised for sale. There is "an elegant dwelling house, of 50 by 37 feet, a commodious farm-house of 50 by 20 feet, an excellent barn with carriage houses and stables, 80 by 40^ feet. . . ."—Daily Adv., F 2, 1790. Rose Hill was the country seat of John Watts prior to the Revolution. It covered 15 blocks of what became afterwards the Eighteenth Ward of the city.—Man. Com. Coun. (1856), 485. See also L. M. R. K., III: 951. See further, S 1790, 481.

Washington records: "Visited the apartments in the house of Mr. McComb's [Macomb's] made a disposition of the rooms—fixed on some furniture of the Minister's (which was to be sold, and was well adapted to particular public rooms)—and directed additional stables to be built.—Washington's Diary (Loring ed.), 87. After the removal of the federal government to Philadelphia, Washington wrote to his secretary, Tobias Lear, on Nov. 14: "... When all is done that can be done, the residence [selected for him in that city] will not be so commodious as the house I left in New York, for there (and the want of it will be found a real inconvenience at Mr. Morris's), my office was in a front room below, where persons on business were at once admitted; whereas now they will have to ascend two or three stairs of public rooms to go to it. Notwithstanding which, I am willing to allow as much as was paid to Mr. Macomb, and shall say nothing if more is demanded, unless there is apparent extortion, or the policy of delay is to see to what height rents will rise before mine is fixed. . . ."—Man. Com. Coun. (1856), 583.

In response to the assembly's action of Jan. 15 (q. v.), a bill is introduced entitled "An act for securing and improving certain lands in the city of New-York, for public uses."—Assem. Jour. (1790), 37. After much discussion and amendment in both the assembly and the senate, the bill became a law on March 16 (q. v.). For its history during its passage through the two houses, see Assem. Jour. (1790), 49, 50, 67-64, 74, 75-76; Senate Jour. (1790), 29, 30, 31, 33, 35, 38; Rutherfurd, Family Rec. & Events, 144; Daily Adv., F 4, 1790. N. Y. Daily Gen., Mr 4, 1790; N. Y. Jour., Mr 11, 1790. See also F 19.

An advertisement offers for sale "That corner house which
makes the corner of Wall and Water Street, with the adjoining tenement, in Water Street commonly called the old Coffee House, [5 see Je 19, 1728] occupied at present by Mr. Cusick the Hatter; the situation business needs no discretion, as it is well known to be one of the most capital stands in the City. . . .—Daily Adv. F 5, 1790. The houses were sold on Ja 31, 1792, to the Tontine Association.

6 This being the "anniversary of the Alliance between France and the United States," the day is celebrated "by the Chargé des [sic] Affairs of his Most Christian Majesty, who gives an [em]ertainment" to his Excellency the Vice-President, the Honorable the Senate, the Speaker of the House of Representatives, the Chief Justice, and the Heads of the great Departments of the United States—his Excellency the Governor, and the Honorable the Chancellor of the State of New-York, and to the Diplomatic Body, and Foreigners of distinction. . . .—Daily Adv. F 8, 1790.

Washington writes: "Walked to my newly engaged lodgings to fix on a spot for a new stable which I was about to build. Agreed with——to erect one 100 feet square, 16 feet pitch, to contain 12 stalls; a hay loft, racks, mangers, &c.; planked floor, and underpinned with stone, with windows between each stall, for £25."—Diary of Washington (ed. by Lossing), 88.

8 On Monday [Feb. 8] the Grand Jury for the United States of this district, in a very elegant entertainment to the Chief, Associate, and District Judges, The Attorney General and the officers of the Supreme and District Courts, at Fraunce's Tavern in Courtlandt-Street." After dinner "toasts were drank," the subjects of which were printed in the news report.—G. of U. S, F 10, 1790.

10 Washington writes: "Sat.——for Mr. Trumbull to draw my picture in his historical pieces."—Diary of Washington (ed. by Lossing) 90 and 190. Lossing adds in a foot-note that these "historical pieces" were the battles of Trenton and Princeton. He again sat to Trumbull on F 12, 15, 18, 20, 275 Mr 4, 223; Jl 8, 12, 20, etc.—Mag. of Am. Hist. (1888), XIX: 113; Baker, Washington after the Rev., 171 et seq.

13 Washington records: "Walked in the forenoon to the house to which I am about to remove. Gave directions for the arrangement of the furniture, &c. and had some of it put up."—Washington's Diary (Lossing ed.), 90. See also his entry of Feb. 16.

15 Several Oneida Indian chiefs, who came to New York to visit Washington, Clinton, and "the Great Council Fire of the United States," are entertained by the Tammany Soc. in their wigwam on Broadway, at the Tammany Hotel, 115 Broadway). After speeches and toasts, the Oneidas performed a dance which was loudly applauded.——N. Y. Jour. of Pat. Reg., F 18, 1790. The society entertained the Creeks later in the year (see Ji 21 and Ag 2).

16 Trinity vestry passes a resolution "That a Pew be appropriated for the Use of the President of the United States & properly ornamented, and that another Pew, opposite to the President's be set apart for the Governor of the State and Members of Congress." It is also resolved "that the Bishop wait upon the President & acquaint him that the Corporation have agreed to offer him a Pew in Trinity Church."—Trin. Min. (M.S.). For view of the president's pew in St. Paul's Chapel, see Mag. of Am. Hist. (1888), XIX: 107-113.

The vestry also resolves "that the Pews in Trinity Church be sold on the first Day of March next precisely at the Hour of eleven in the Morning, & that the Church be opened or consecrated on the 24th of the same Month."—Trin. Min. (M.S.). Also, that "Streets upon the Church Lands to the Northward of Reade Street, at right Angles with Hudson's River [are to be] successively named as follows—via—Duane Street—Jay Street—Hudson Street—Provoost Street—Moree Street—Beach Street—Hubert Street."—Ibid.

18 Washington receives papers from the secretary of war relative to "a correspondence to be opened between Col. Hawkins, of the Senate, and Mr. McGeIlvray, of the Creek Nation, for the purpose of getting the latter, with some other chiefs of that nation to this place, as an expedient to avert a war with them."—Washington's Diary (Lossing ed.), 94. See, further, Mr. 10.

19 A bill is pending in the assembly to apply to public use the fort, certain adjoining lands, and the Battery (see F 4). Although the city claims "Title as well to certain part of said Lands as to the Soil from high to low Water Mark in the River in front of the said Fort and Battery and the Lands adjoining the same;" yet the common council conceives that "the applying of the whole of the said Premises to public Uses will be beneficial to the Community." It is resolved that the board "signify their Consent that the said Lands and premises above mentioned should be vested in the Mayor Aldermen and Commissioners of the City of New York in Trust to remain for such public Uses as the Legislature of this State shall from time to time declare &c for no other Use." The resolution is referred to the recorder to present it, if necessary, to the legislature.—M. C. C. (1784-1811), I: 525. The bill was passed on March 16 (q.v.). The common council orders that the lamp committee "take on hand with respect to the removal of the Lamps to the House, in the Broad Way, taken for the Residence of the President of the United States."—M. C. C. (1784-1811), I: 525

The mayor lays before the common council a copy of the state law passed on Feb. 18 (q.v.), as petitioned for on Jan. 15 (q.v.), "authorizing this Corporation to raise £13,500 by Lottery to discharge the Debt incurred by this Board in repairing & improving the City House." It is referred to the Finance Committee to report a Scheme & the most proper Method of conducting the Business of the said Lottery. —M. C. C. (1784-1811), I: 525. The committee reported its scheme on March 4 (q.v.). A committee of the common council suggests that a cistern to contain the public lamp oil be erected "in the Yard behind the Bridewell." The expense, "with what labor & materials may be saved by the Alms House," will not exceed £50.—M. C. C. (1784-1811), I: 525. See O 22.

Washington records: "Sat from 9 until 11, for Mr. Trumbull. Walked afterwards to my new house—then rode a few miles with Mrs. Washington and the children before dinner; after which I again visited my new house in my coach (because it rained)."—Washington's Diary (Lossing ed.), 95.

Washington's record of this day reads: "Few or no visitors at the levee to-day, from the idea of my being on the move. After dinner, Mrs. Washington, myself, and children removed, and lodged at our new habitat."—Washington's Diary (Lossing ed.), 96.

On the next two days, he was occupied "arranging matters about the house."—Ibid.

In a detailed description of Washington's personal appearance and manner of address, written by a man whose father met Gen. and Mrs. Washington in their house in New York in 1790, there is the following account of the new residence: "The home of Washington was in the Broadway, and the street front was handsome. The drawing-room in which I sat was lofty and spacious; but the furniture was not beyond that found in dwellings of opulent Americans in general, and might be called plain for its situation. The upper end of the room had glass doors, which opened upon a balcony commanding an extensive view of the Hudson River, interspersed with islands, and the Jersey shore on the opposite side. A grandson and daughter resided constantly in the house with the General, and a nephew of the General's, married to a niece of Mrs Washington—
States. It was a dinner of dignity. All the Senators were present and the Vice-President. I looked around the company to find the happiest faces. Wisdom, forgive me if I wrong thee, but I think the smile fell happily most nearly allied. The President seemed to bear in his countenance a settled aspect of melancholy. No cheering ray of convivial sunshine broke through the cloudy gloom of settled seriousness. At every interval of eating or drinking he played on the table with a fork or knife, like a drumstick." — *Jour. of Wm. Madaley*, 96.

The common council adopts the scheme of the lottery to raise money to discharge the debt incurred by the city for the alterations in the city hall.— *M. G. C. (1784-1811), I: 528-30*. See Je 10 and 18, 1789; *Ja 15*, F 19, 1790. It was published in the *Daily Adv.*, Mr 15 et seq., and in other papers. For the next lottery, see *F 25*, 1791.

Gerard Baecker is mentioned in a record of this date as state treasurer. He is requested to deliver to the committee which was appointed "to direct the printing of the Notes to be circulated for small Change" (see *F 26*) the paper granted by the legislature for that purpose.— *M. G. C. (1784-1811), I: 570.*

At this period, Washington recorded in his diary nearly every day his exercising on horseback, weather permitting, or in his coach or post-chaise with Mrs. Washington and the children, or his wife round the Battersea Park, *Washington after the Rev.*, 1745, and authorities there cited.

"Resolved that the Committee of Leases view the Ground above Mr. Lipenard’s adjoining to Spring Street & consider the Propriety of extending the said Street thro’ the Land of this Corporation to Hudson’s River." — *Trin. Min. (MS).*

An advertisement of this date shows that there was a theatre at No. 14 W. William St.— *Daily Adv.*, Mr 17, 1790.

Washington engages Col. Marisus Willett to go "as a private agent, but for public purposes, to Mr. McGillivray, principal chief of the Creek Nation" (see *F 16*). — *Washington’s Diary (Lossing ed.),* 90. On March 12, he signed his passport.— *Ibid.,* 104. Willett succeeded in inducing McGillivray to come to New York with the other chiefs of their nation (see *Je 21*), and a treaty was negotiated.

The Custom House is located at No. 6, Mill Street [present].— *S. William St. opp. Mill Lanel, adjoining No. 15 Duke Street.— Daily Adv.*, Mr 16, 1790. See also L. M. R. K., III: 974. It remained here until Sept. 1, 1798 (q.v.).

Marinus Willett writes from New York to De Witt Clinton: — *Since my arrival here I have paid a visit to the prison—The wretchedness there is past my power to attempt a description—If distress ever claimed Legislative assistance, the melancholy situation of the Confined debtors in this place demand attention. My former opportunities enabled me to know their case to be always uncomfortable more so than the religion of Christians or sentiments of humanity justly—but the former circumstances have no proportion to the present deplorable state of those unhappy people I do not trust nothing I can say will be requisite to induce you and the other Gentlemen with you to act for the city and the country in this case to make an effort in favour of relief for those unfortunate members of our community?"— *Letters to De Witt Clinton (MS.),* I: 15, in Columbia Univ. Library.

An advertisement announces the intended sale at public auction, on May 3, of "A Farm At the 1 mile stone on New York Island late the property of Col. Roger Morris—the mansion house in point of spaciousness is equal to any in this state, and from its elevated position not only enjoys the most snug and air, but affords a prospect extensively diversified and beautiful. The farm contains about 140 acres, the greatest part of which is meowing ground, and extends across the Island from the East to the North river. On the premises are a large coach house and barn, with a garden containing a variety of the best fruits."— *Daily Adv.*, Mr 12, 1790. Washington dined at the Morris house on July 10 (q.v.).

Washington receives an address from the Roman Catholics of the United States. — *Washington’s Diary (Lossing ed.),* 105.

The demolition of Fort George and the erection of a government house (see *Je 15, 1789*) are authorised by the legislature when it passes, on this day, "An Act for securing and improving certain Lands on the Hudson, for Public Uppers, and for other purposes therein mentioned." The fort and the "battery adjacent thereto" are declared to be at present "useless for the purpose of defence." The law provides that part of Fort George and certain adjoining lands, described by specific boundaries, shall be "for..."
1790 ever reserved for the purpose of erecting public buildings, and such works of defence as the Legislature shall from time to time direct," and that certain other lands near by shall be "vested in the mayor, aldermen and commonalty of the city of New York, to remain for the purpose of erecting public buildings, and works of defence thereon; but without any power to dispose thereof, for any use or purpose whatever, and without any power of selling any part thereof." The principal landmarks mentioned in the description of the lands are the "dwelling-house of Captain Archibald Kenny," the "old secretary's office on Whittlestreet," the ground of Captain Thomas Randall, and the "lots which front on Pearl Street." The law also authorizes the city corporation "to cause the said Fort George to be demolished, and the ground wherein the said Fort stands to be levelled, and also to cause a bulk head to be erected [see Mr. 146,] from the end of the bulk head lately erected by them, continuing the same to the south-west bastion of the Battery aforesaid; and to sell and dispose of the buildings and materials of the said Fort, and to apply the moneys arising therefrom, towards the erecting the bulk head aforesaid." Gerard Bancker, Richard Varick, and John Watts are appointed commissioners "to cause a proper house and other necessary buildings, to be erected on some part of the lands, in the first enacting clause in this act mentioned, for the use of the government of this State; and to be applied to the temporary use and accommodation of the President of the United States of America, during such time as the Congress of the United States shall hold their sessions in the city of New-York," and the state treasurer is empowered to pay them $1,000 "for the purposes aforesaid."—Laws of N. T., 1790, chap. 26. See also Laws of N. Y., Vol. I. p. 89. On March 12, 1790, the commissioners advertised for plans for the government house.

The New York Manufacturing Society is incorporated. Its object is "furnishing employment to the honest industrious poor." The company's stock is limited to $50,000.—Laws of N. Y. (1790). chap. 26 (Greenleaf, II: 309). It opened a workshop, in which were a carding-machine and two spinning jennies, and employed altogether about 150 persons and 14 weavers. The "jennies continued to be spun with wool and to spin flax for sailcloth, but in the more rapidly organized and centralized cotton manufacture they were displaced almost immediately by Arkwright machinery" (see 1799).—Clark, Hist. of Manufactures in the U. S. 1607-1860, 191.

Washington is visited by "a Mr. Warner Millin, one of the People called Quakers; active in pursuit of the Measures laid before Congress for emancipating the Slaves."—Washington's Diary (Longing ed.), 105. These measures produced much agitation in congress and throughout the country.—See the Gaz. of the U. S., passim.

The common council appoints a committee "to view the Land at the Fort & Battery & report the necessary Measures to be taken by this Board with respect to the levelling of the same."—M. C. C. (1784-1811), I: 531. See, further, M. C. C. (1784-1811), I: 547.

The common council orders that Mr. Sands "deposit the Key of the Exchange Room in a proper House in the Vicinity so that access may be had to the Bell and the Cap of the Watchman be directed to dispatch one of his Men to ring it immediately on the discovery of Fire."—M. C. C. (1784-1811), I: 531. On May 14, payment of £210 was made "for hanging the bell in the Exchange."—Ibid., I: 547.

The common council orders that the alderman and assistant of the West Ward "direct a Bulkhead to be erected to prevent the running out of the Earth in the upper part of Greenwich Street."—M. C. C. (1784-1811), I: 531-32.

Resolved That the Committee of Leases be empowered to make, or confirm an Exchange with the Lutheran Congregation for Part of their Ground near Rector's Street."—Trin. Min. (M. S.) See II 12.

Richard Varick, John Watts, and Gerard Bancker, "commissioners appointed by a law of this State [see Mr 16] to build a Government House on the ground where Fort George now stands," advertise that "they are desirous of receiving plans for a house to contain, a room for the reception of the Legislature on public business, and drawing and dining room for special occasions; a drawing room for private use, a room for a library, together with other requisite apartments and accommodations. It is at present proposed to front the house towards the Boulevard, and that the extent in front shall be about eighty feet, and the depth as shall be found necessary."

"The sooner the plans shall be delivered is the more acceptable.

"Any person or persons willing to contract for the delivery of timber, scantling, shingles, bricks or other materials will be pleased to deliver their proposals in writing at the office of the state treasurer No. 8 Great Dock-street."—Daily Adv., Mr 14, 1790. See Mr 26.

Prof. John C. Van Dyke says: "at twenty-seven John McComb designed the façade of Government House in New York."—Rutgers College Cups. No. 14, entitled Queen of Building, Rutgers College, 1800, p. 14. However, the plan and elevation made by McComb were evidently rejected, as they do not correspond with those of the Government House as executed. They are reproduced as A. Pls. 10a and 10b, Vol. III. The architect of the building has not been positively identified but was probably James Robinson.—See descrips. of Pl. 75, I: 460-61, and A. Pl. 10a, III: 629.

The new Trinity Church is opened and consecrated, the service being attended by Pres. Washington, the bishops and clergy of all denominations, several members of congress, and other public officers, "together with an immense concourse of citizens." The sermon is preached by the Rev. Mr. Bech.—Daily Adv., Mr 26, 1790; descrips. of Pl. 105, III: 607, and Pl. 112, III: 619. Washington records his occupying his pew for the first time on this occasion, stating that it "was constructed, and set apart for the President of the United Sts."—Diary of Washington (1860), III. A letter from Albany contains the following: "I am happy to observe that the Legislature has granted eight thousand pounds for building a Government House [see Mr 16]. I fear the sum will be insufficient to do justice to the situation on which it is to be placed, which, for my own part, I conceive to be equal to any in America.

"I trust the Architect, who planned the Federal Building [L'Enfant], will have an opportunity of displaying his genius on the present occasion; and, from the taste he has displayed in the alterations and additions to the City Hall, I have no doubt that he will erect an edifice which will do honour to the city of New York."—A. Pl. Daily Adv., Apr. 1, 1790.

The common council, "conceiving it their Duty to use every Means in their Power to effect the complete removal of the Earth & Stone & levelling the Ground at the Fort & Battery so as to accommodate the Building to be erected there for the use of the Government[1] [see Mr 24] and also to continue the Wharf or Bulkhead, in the River, to the Corner of the Battery at Whitehall Slip [see Mr 16]; And this Board being at present destitute of the necessary Parliamentary Means for the purposes aforesaid," it is "resolved that an Application be made to the Legislature for raising the Sum of £5000 for the purposes aforesaid in addition to the Sum directed by Law for defraying the contingent Expenditures of this City this Year."

A petition to the legislature is drafted and agreed to for presentation.—M. C. C. (1794-1811), I: 533. The legislature's permission was received on April 6, 1796.

The board appoints Tobias Van Zandt and George Janeway commissioners "to superintend the taking down the Stone & removing the Earth of the Fort.—That they set apart & reserve such & so much of the Stone as may be necessary for the erection of the Govt House and that the residue of the Stone be sold under their immediate Inspection for the best price that may be had and that they render an acct thereof to this Board."

"They are allowed. 105. for each day either of them attends to this business, "to be divided between them."—Ibid., I: 534. See, further, Ap 6.

Acting favourably on a petition of the firemen, the common council agrees to allow a "complement" of ten men for each engine; because, in the case of the smallest engines, which are used to approach nearest to a fire," and are therefore best adapted for the Leaders [hose] to convey Water through Windows and narrow passages, "only the firemen "are willing to support them, as it is attended by a general wetting by the Water which gushes out of the Seams."—M. C. C. (1784-1811), I: 533.

The legislature passes "An Act for building a Bridge across the Haerlem River." Lewis Morris, his heirs and assigns, are authorized, "at his and their own expenses, to build a bridge from Haerlem across the R. Haerlem tidal river and put the same in the act are: Not less than 30 feet in width, and between the centre arches thereof, shall be an opening not less than twenty five feet, over which shall be a draw not less than twelve feet, for the free passage of vessels with fixed standing masts." The toll-rates are also prescribed.—Laws of N. Y. (1790), chap. 37. Morris did not build, but sought financial aid in 1792 by proposing a plan of
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1790 a treatise for the purpose.—See O 12, 1792; Mr 8, 1793; Mr 24, 1795.

By an "Act for the further Encouragement of Literature," the legislature authorizes the regents to lease certain state lands (including Governor's Island) for the benefit of Columbia College and the academies in the state, and also grants them $1,000 "for the encouragement and promotion of science in the said college and the academies already incorporated." Governor's Island is to be so granted "that no more than two dwelling houses shall be erected on the said island."—Laws of N. Y., 1st sess., chap. 38. See Apr. 13.

With Maclay writing in his journal nothing of interest occurred, save a violent attack on Hamilton by Judge [Edmund] Burke of South Carolina, which the men of the blade say must produce a duel." Four days later, April 4, he wrote: "The town is much agitated about a duel between Burke and Hamilton. So many people concerned in the business may really make the fools fight."—Journ. of William Maclay (N. Y., 1800), 227, 230. None of the biographers of Hamilton makes mention of such a duel, which it would seem, did not culminate.

In response to the common council's petition of March 26 (q.v.), the state legislature grants permission for the raising of a sum not exceeding $5,000 by a tax on the real and personal estates of the inhabitants of New York City.—Laws of N. Y., 2d sess., chap. 50. See Apr. 6.

An act is passed by the legislature making it lawful for the treasurer "to cause the lot of land in the south ward of the city of New York formerly called the wegh-house lot to be sold at public vendue."—Laws of N. Y. (Swaine, 1790), chap. 54.

Washington records: "Sat for Mr. Savage, at the request of the Vice President, to have my Portrait drawn for him."—Washington's Papers (1791), 112.

The clerk of the common council presents to the board "a Map or Survey of the 10 Acres of Common Lands to be granted to Major L'Enfant agreeable to the Resolutions of this Board" (see O 12 and D 30, 1789). The board approves. The land is thus described: "Beginning at the North Corner of the Lane of two Roads Wide leading from the Post Road to the farm of David proportionode, thence N 40° 30' East seven Chains and sixty one Links, thence S 40° 40' 30' East seven Chains & eighty three Links thence S 35° 40' 30' West eleven Chains and seventy two Links & thence North 40° & 30' West, along the said Lane, nine Chains & thirty six Links to the place of beginning, containing Ten Acres of Land." The board orders that the clerk prepare a draft of the grant accordingly.—M. C. C. (1784-1811), 1: 726. A map was presented by the clerk to the board, who thereupon ordered that it be engrossed.—Ibid., 1: 539.

The position of this plot on the modern map would have been approximately between 66th and 70th Sts., east of Third Ave. See, further, Apr. 30.

The committee appointed (see Mr. 19) "to consider of the Repairs & Improvements necessary to be made to the Battery and the Mode of carrying them into effect" reports:

"That they have ordered the Survey accompanying this Report to be made of the Battery from the Wharf erected by the Corporation last year to White Hall Slip."

"That in the Opinion of the Committee the said Wharf should be continued extending in a right Line to the Point A in the Survey being the outermost part of the Bastion on the Flat Rock and from thence in a straight line to the Point B, being the Southern west point of the Battery, agreeable to the exterior Line A: B in the Survey.

"That the said Wharf so to be erected should in the Opinion of your Committee be constructed after a similar manner with the aforesaid part erected last Year and that Commissioners should be appointed to carry the same into immediate effect, authorized to make Contracts for the purpose in behalf of the Corporation upon the most economical Principles and that a Warrant be granted them upon the City Treasurer for said Pur-

positions for a sum not exceeding five hundred Pounds and that they be accountable to this Board for the expenditure thereof.

That the Commissioners so appointed should be instructed to lend every Assistance to the Commissioners for building the Government House, by level ground, digging the foundation for the Buildings about to be erected and preserving whatever Stone may be requisite for said Buildings & by lending every facility & Aid in their power to the said Commissioners.

The board appoints Ald. Isaac Stoughton, Asst. Ald. Peter T. Curtenius, and John Pintard as such commissioners, and advances $500 to them.—M. G. C. (1784-1811), I: 336-37.

The common council requires the committee to "cause a Survey to be made of the Broad Way from the South side of the burten lutheran Church [s. w. cor. Broadway and Rector St.] northwards" for the purpose of new paving Broadway.—M. C. C. (1784-1811), I: 353. See, further, My 14.

The commissioners for building the government house advertise that they will continue to receive plans (see Mr. 24) for the said house until April 12 at twelve o'clock, on which day, they mean to determine on the plan to be carried into execution. Masons and bricklayers, desirous to contract for the stone and brick work by the perch or rod are desired to send in their proposals without delay, to the state treasurer's office, No. 8 Great Dock.—Daily Adv., Apr. 7, 1790. The plan for the government house was adopted April 26 (q.v.). The architect has not been positively identified, but was probably James Robinson. See descrip. of Pl. 54-b, Vol. I.

Senator Maclay writes: "I went this afternoon to hear a negro preach. I can only say it would be a favor to religion in general if preachers manifested the same fervor and sincerity that were apparent in his manner. He declared himself unfurled, but he seemed to have the Bible by heart."—Maclay's Jour., 212.

The first act relating to the issuing of patents is passed and approved by Washington. It is entitled "An Act to promote the Progress of useful Arts."—Acts passed at the second session of the Congress of the U. S. (N. Y., 1790), chap. 7, p. 16. This was repealed by a new act of the same title, Feb. 21, 1793.—Ibid. (Richmond, 1791), chap. 55, p. 31.

The first patent was granted, on July 31, 1790, to Samuel Hopkins for "a new method of making pot and pearl ashes," the second, on Aug. 6, 1790, to Joseph Stacey Simpson for "Manufacturing candles;" and the third, on Dec. 18, 1790, to Oliver Evans for "Manufacturing Flour and meal."—List of Patents granted by U. S. (1790-1826), 4: Weber, The Patent Officer His Duties, Transactions, and Organization, 26. The third patent, signed by Washington, is still preserved in the patent office.

"A Foreigner" writes to McLean, the publisher: "I have remarked that New-York has the advantage of most of the other cities on this continent, in the accommodation it affords of hackney and jocketaches; but I cannot help observing the great impropriety which appears to me at Funerals, of the same carriages being used to convey the bodies of deceased children! Would it not be both decent and respectful to make use of a mourning coach upon these occasions? One Mourning Coach, I believe, would be sufficient for this city...."—N. Y. Daily Gaz., Apr. 10, 1790.

* * * * * a party of gentlemen went out with March's hounds, and put off a Fox near the five mile stone. They had a delightful afternoon at Kings-Bridge, and0 decided the best place to see the near the house of widow Days, where they were obliged to take off the dogs. Another Fox was put off, who afforded a fine chase round Fort Washington." There is to be another hunt on Long Island on April 13.—N. Y. Daily Gaz., Apr. 12, 1790.

Trinity vestry passes a resolution "that a Clock & Bell be procured for S't Paul's Chapel, and a Ring of Bells for Trinity Church," and that a committee is appointed for this purpose.—Trin. Min. (M.S.). See F 8, 1796.

Trinity vestry resolves "that in future no black Persons be permitted to be buried in Trinity Church Yard, nor any except Communicants in the Cemetery at S't Paul's."—Trin. Min. (M.S.).

A committee appointed by the Regents of the University advertises an auction, to take place on the first Tuesday in May at the Coffee House, for the lease of "Governor's or Nutter's Island" to the person who shall bid the highest annual rent for the term of twenty-one years.—N. Y. Packet, Apr. 13, 1790. See Mr. 31.
The commissioners appointed by the common council to con-duct the repairs of the Battery (see Ap 6) advertise for propos-als for delivering large spars and deck logs in this city in all the month of May.—*Daily Advertiser*, Ap 20, 1790.

15 Gerard Banker, state treasurer, issues a notice that all persons having demands against the forfeited estates of about 200 persons mentioned in the notice, and who are releivable by the act of May 12, 1784, shall exhibit their accounts to him within four months, that he may discharge them as the law directs; otherwise they will be barred from relief. *N. Y. Jour.*, Apr 22, 1790.

16 The common council orders "that Permission be given for the erection of the necessary Conveniences for the safe keeping of the Barge of the President of the United States, in Thames Slip."—*M. C. C. (1784-1813)*, I: 539. See, further, O 5.

17 The common council orders that the commissioners of the almshouse appropriate the "Ground adjoining the Gallows" as "a Reach Yard for the Alms House."—*M. C. C. (1784-1813)*, I: 539.

18 The common council resolves "that the Corporation of the Episcopal Church [Trinity] be informed that on their making Compensation to Hannah Baker to the amount of seventy pounds for the Improvements on the Triangular piece of Ground at the junction of the Post & Bloomingdale Roads," the board will grant this to Trinity on the same terms as agreed to by the board on June 24, 1789 (q.v.). It is ordered that the clerk communicate this resolution to the vestry, and request answer by April 30.—*M. C. C. (1784-1813)*, I: 528, 536, 540. On Aug. 27, the board ordered that the clerk "apply to the Corporation of the Episcopal Church for a positive Answer" with respect to this land, and report it at the next meeting.—*Ibid.*, I: 585. The subject of a grant of this ground to Trinity had been under consideration since 1771 (q.v., JL 22), but was never made, owing to lack of agreement on terms. See, finally, S 10, D 11 and 24.

19 The common council, in taking for a city street that part of the ground of Dr. Thos. Jones (see S 9, 1789) that falls within Binley St., considers such action as proper under the provisions of the act already passed to lend or sell college lands, and that the proceeding can be taken at the city's expense. It therefore orders that commissioners report what compensation should be made to him.—*M. C. C. (1784-1813)*, I: 540. Such report was recorded on July 9.—*Ibid.*, I: 566-62. Settlement was made on May 20, 1791 (q.v.).

22 A request is presented to Trinity vestry in behalf of Abraham Wilson, "praying that the Board do relinquish their incumbence on the property, and freely sold to him on the northwestern side of Greenwich Street in order that he may obtain a Sum of Money lately granted by the Legislature for the encouragement of the Earthen Ware Manufactury." Granted, with qualification.—*Trin. Min. (M.S.).* There was a pottery run by Abraham Wilson on the block bounded by Greenwich, Chambers, and Warren Sts. and West Broadway.—See the case of Bogardus v. Trinity Church, *a Sandford's Chancery Reports*. This was the earlier "Bowling Green" and "Vauxhall" site.—See L. M. R. K., III: 981. *Gaz. of Aug 8, 1787.*

24 A lottery scheme is advertised to raise £5,500 (agreeable to the act of Feb. 18, 1790), this sum being "part of the sum advanced by the Corporation for repairing and enlarging the City Hall, for the accommodation of Congress, which does so much honor to the Architect, as well as credit to the City."—*N. Y. Packet*, Ap 24, 1790.

25 The Tammany Society unanimously resolves "that, as a mark of respect due to the memory of Dr. Benjamin Franklin, in commemoration of his republican virtues, and as an incentive to imitate the same, That this Society wear the usual badge of mourning for the space of one month."—*N. Y. Jour.*, Ap 29 (misdated 26), 1790.

An advertisement reads: "The Commissioners [for building the government house] having agreed on a plan for the said house [see Ap 9], and directed the cellar to be dug, continue to receive proposals for laying the foundation and erecting the said edifice, by the perch or rod. It is expected that the same will be done in a good workman-like manner, and a due attention paid to saving the materials, which are to be furnished by the Commissioners. Also, proposals from stone-cutters, for the water-tile, aster [ashlar], and other work in that line.

Also, proposals for supplying timber and scavenging of all sorts for the use of the said building. Also and also proposals from blacksmiths for the iron work, coarse and fine. It is requested that the above proposals will be made in writing, and delivered into the office of the state treasurer, No. 8, Great Dock-street, on or before Saturday next."—*Daily Advertiser*, Ap 26, 1790. The cornerstone of the government house was laid on May 21 (q.v.). See also descript. of Pl. 55-B, I: 418.

It being intimated to the common council that Maj. L'Enfant 30 declined to accept the grant of ten acres of the Common Lands, which the board intended to convey to him (see Ap 6), it is ordered that the clerk question him on the subject and report his answer, and that, if he should in the mean time be absent, he be suspended.—*M. C. C. (1784-1813)*, I: 542. See, further, My 17.

An account of Columbia College, written to accompany an engraving of the building (see Pl 53-A, Vol. I), states: "The building (which is only one third of the intended structure) consists of an elegant stone edifice, three complete stories high, with four stair cases, twelve apartments in each, a chapel, hall, library, museum, anatomical room, and a school of elementary philosophy. . . . before the revolution. . . . the edifice was surrounded by a high fence, which also encloses a large court and garden; . . . "The college is situated on a dry gravelly soil, about 150 yards from the bank of Hudson's river, which it overlooks; commanding a most extensive and beautiful prospect. . . . It is not exposed to the least danger from inundations since the peace. The funds produce, annually, about £1000. The library and museum were destroyed during the war. The philosophical apparatus cost about 300 guineas. Until the revolution the college did not flourish. . . . It has between thirty and forty students, in four classes. The number for several years has been increasing. The officers of instruction and immediate government are, a president, professor of languages, professor of mathematics, professor of logic and rhetoric, professor of natural philosophy, professor of geography, and a professor of moral philosophy. There are many other professors belonging to the university, but their professorships are merely honorary."—*N. T. Mag.*, My 1790.

"This is a day of general moving in New York, being [then as now] the day on which their leases chiefly expire."—*Journal of Henry C. B.C.,* Ap 26, 1790.

The common council orders "that the Gentlemen of the Law Society have permission to use the Court Room in the Exchange."—*M. C. C. (1784-1813)*, I: 543.

Thomas Greenleaf changes his paper to a semi-weekly, and alters the name to the *New-York Journal, & Patriotic Register*. The last issue with this title was that of Dec. 26, 1793.—*Early Newspapers*, II: 444; *Brigham, A. S. Proc.* (1917), 449.

Maclay records that he went again to dine with the president. "He seemed in more good humor than I ever saw him, though he was as usual to be heard the little of the conversation."—*Journal of Wm. Maclay*, 257.

Washington wrote: "A severe illness with which I was seized the 10th of this month and which left me in a convalescent state for several weeks after the violence of it had passed; & little inclination to do more than what duty to the public required at my hands occasioned the suspension of this Diary." Lossing adds that this "reduced him [Washington] to the verge of dissolution." He was confined to his chamber for several weeks. His chief difficulty was inflammation of the lungs, and he suffered from general debility until the close of the session of Congress in August.—*Washington's Diary* (and footnote by Lossing), 136. See My 15.
The celebration of the Tammany Society’s anniversary this year was the beginning of pretentious annual pages by the society and the introduction of “Long Talks.” The festival on this occasion began at Bardin’s Tavern and continued all day with meetings at the Brick Church, “Brodway & Battery,” and finally at Bardin’s again, where the society had its “wigwam.”—N. Y. Jour., My 14, 1790; Kilroe’s treatise on Saint Tammany, 178; N. Y. Mag., My, 1790. Senator Maclay records:

“This day exhibited a grotesque scene in the streets of New York. Being the old 1st of May, the Sons of St. Tammany had a grand parade through the town to the Brick Church, where they delivered their addresses. Delivered at one of their meeting-houses, and went away to dinner. There seems to be some kind of scheme laid of erecting some kind of order or society under this denomination, but it does not seem very well digested as yet. The expense of the dresses must have been considerable, and the money laid out on clothing might have dressed a number of their ragged beggars.”—Jour. of Wm. Maclay, 266.

Maj. L’Enfant’s answer, dated May 11, to the communication of Robert Benson, clerk of the common council (see Ap, 30), is placed on record: It reads: “Sir. In answer to your Request of Yesterday I will acknowledge herein, that the Idea suggested of a disinclination in me to accept of a Grant of the ten Acres of Common Land, your Letter alludes to, is perfectly agreeable with my Sentiments; and I therefore do not think it would be improper to refuse the Grant.”—M. C. C. (1784–1811), I: 545. See, further, Ja 19, 1801.

The common council adopts the plan of the committee (see Ap 6) for new paving Broadway. This states that “the regulation ought to take place from the Corner of the Bridewell Fence, and that the Crown of the Street be continued in a right line from that place until it joins the new Pavement at the Lutheran Church, the Places where the Difficulty of leading off[] the Water occurs, are, the head of Fair [Fulton] Street, Little Queen [Cedar] Street and Trinity Church opposite Wall Street. [Fair Street is nearly a dead level to William Street which being already paved a material Injury would arise to dig it down so as to lead the Water Eastward from Broadway.” The construction of sewers to drain water from the streets in this part of town is also involved in the plan, as detailed in the report. A survey accompanies it.—M. C. C. (1784–1811), I: 545-46.

The common council passes an ordinance “to prevent Swine from running at large in the City of New York.”—M. C. C. (1784–1811), I: 547. It provides that if they are found after the first day of June next, they shall “be forfeited to and become the property of any person who shall seize and take such swine.”—N. Y. Daily Gaz., My 29, 1790.

Maclay records: “Called to see the President. Every eye full of tears. His life dispersed of. Dr. Mac Knight told me he would stride neither with his own character nor the public expectation; his danger was imminent, and every reason to expect that the event of his disorder would be unfortunate.”—Maclay’s Jour., 266. See, My 24.

The common council approves the articles of agreement prepared to be signed by Elias Burger, Jr., “agreeable to a bargain made with him [see Ag 19, 1789] by the Committee for erecting a Wharf or Bullock at the Battery.”—M. C. C. (1784–1831), I: 548.

A committee appointed to report on a regulation of Greenwich Street,—“from Cortland Street to the north side of the Street at Kennedys Coach House,” makes its report and this is recorded in full. The report provides: “that Crown[,] Little Queen, Thames, and Provost Streets, Beaver Lane, and the Street between the Fort and Kennedys House, should all be regulated in such manner as to be on a strict regular descent from the Broadway, agreeable to the present survey thereof to the intersection of Greenwich Street when paved agreeable to this regulation, and that Oyster Pastry Street and Lombard [Lumber] Street be so regulated as to be upon an equal regular descent to discharge the water into the several streets aforesaid at their several interse[ctions].” See also Jl 16.

The committee further reports “that a Bullockhead must necessarily be built across the Slip at the lower end of Thames Street.”—M. C. C. (1784–1831), I: 548-49.

The Greenwich St. survey was made by “Goericke & McComb.”—Jour. of Wm. Maclay, 1790.

The common council orders that “the Committee for superintending the Works at the Fort & Battery confer with Col[.] Bauman as to the removal of the Ordnance Stores from the Store House to one of the Barrack Rooms.”—M. C. C. (1784–1831), I: 549.

The corner-stone of the government house (see Ap 26), “which is by a law of this state ordered to be erected on the lands at the Fort and Battery,” is laid by Philadelphia’s mayor, chancellor, chamberlain, chief justice, mayor, commissioners, master mariner, carpenter, and a “great concourse of respectable citizens.”—N. Y. Daily Gaz., My 22, 1790; Daily Adv., My 22, 1790.

This building was planned as a residence for Pres. Washington during congress’s sessions in New York City, but it was never used for that purpose because, before its completion, the scat of government was moved to Philadelphia (see Jl 1). It was occupied by Gov. Clinton and Jay from 1791 to 1797. For a description of the building, see 1791. See also descripts. of Pl. 55-b, I: 418; Pl. 63, I: 441-42; and Pl. 66, I: 443-45.

A building is nearly completed on Crown St. for the Masons, and will be consecrated on June 24. It will be used by two chapters or lodges: one, “the chapter of Royal Arch Masons lately erected in this city,” which, on May 18 last, adopted the name of “The Washington Chapter of Royal Arch Masons,” and the other, the Holland Lodge.—Daily Adv., My 22, 1790. This appears to have been the first building erected by or for the Masons in New York City. The corner-stone of the second was laid in Frankfort St. on Oc. 13, 1802 (q.v.), and the building there was consecrated on June 9, 1803 (q.v.). This was a perfect a misleading statement regarding the “Masonic Temple (First Site),” in the 1869 Hopkins Ref. Key, III: 954. Masonic temples were also erected in the Bowery and in Broadway before that on 213 St. was built. For the beginnings of the Masonic Order in New York, see N 28, 1793.

Richard Henry Lee writes from New York to Charles Lee: 23 

“The India Ships begin to arrive—one is already here & three more expected at this port within the Month . . .”—Letters of Richard Henry Lee, III: 519.

“The President of the United States is so far recovered that he rode out in his carriage on Monday last” (May 24).—Penn. Packet, My 29, 1790. On June 1, he was well enough to receive company at his house.—Ibid., Je 7, 1790. See, further, Je 3.

A petition of the Inhabitants at the Fly Market praying the Aid of this Board in the erection of an Arched Walk across the Kennel at the end of the Market in Queen Street also that the Stall of Henry Astor Butter be removed to the lower Market was read & granted.”—M. C. C. (1784–1831), I: 550.

The common council orders that lots be wharfed out between Catharine’s and Rutgers Slips, so as to complete the continuation of Cherry St. to Rutgers Slip, at the foot of Rutgers St.—M. C. C. (1784–1831), I: 551. See 1793, 1797, 1799. L. M. R. K., III: 996; Pl. 174, 175, Vol. III.

A “Federal salute” is fired from the Battery on the arrival of news by sloop from Newport that Rhode Island ratified the Constitution on the 29th. —Gaz. of the U. S., Je 2, 1790.

The house of representatives resolves that the next meeting of congress be held in Philadelphia.—Annals of Cong., II: 1678 et seq. See, Je 3.

The Tammany (or American) Museum is established “for the purpose of collecting and preserving everything relating to the history of America; likewise, every American production of nature or art.”—N. T. Directory (1794), 271; Am. Minerva, Ja 29, 1796; descript. of Pl. 95-b, III: 584. See 2, 1790, and My 21, 1791.

The Lombardy poplar “has lately been introduced into America,” by Monsieur Saulnier, superintendent of the French King’s botanical garden in Bergen county, New-Jersey, about four miles from Hoebuck ferry.—The N. T. Mag., (June, 1790), 341-43. As explained by Dr. John W. Francis, “The elder Michaux, under the direction of Louis XVI, had been sent to America, from the Garden of Plants de Paris he brought out with him the gardener, Paul Saunier, who possessed, shortly after, horticultural grounds of some extent in New Jersey. The Lombardy tree promised everything good, and Paul spread it. It was pronounced an exotic of priceless value; but like many things of an exotic nature, it polluted the soil, vitiated our own more stately and valuable indigenous products: and at length we find [1857] that American sagacity has proscribed its growth, and is daily eradicating it as uncouth and detrimental to the native riches of American husbandry,”—Old New York (1866), 21-24. For reference to its failure as a shade-tree, see Ap 18, 1795; and regarding its profusion in New York, see D 31, 1799.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1790
June 9

A New Yorker writes to one of the papers: "The determination of the House of Representatives [see My 31] to adjourn to Philadelphia, has occasioned much surprise. The necessity of a central situation is assigned as the cause of this vote; but Philadelphia is surely not the most central situation—.

"Public bodies are not influenced by the feelings which affect individuals; else how shall we account for the ingratitude which is displayed by the vote?—A few years ago, Congress was surrounded by enraged assassins—the lives of the members were threatened—the representatives of the States—the sovereignty of the Union, were insulted—the best men in America were at the mercy of ruffians . . . but the citizens of Philadelphia might by a slender effort have crushed this ignominious attack, and restored the energy of the laws. Congress implored protection—it was ignored. Philadelphia was threatened to become a city where lives were in danger—they were insultingly sneered at and told that the citizens of Philadelphia did not fear their departure, because they could not exist out of that city . . . Finding their persons in danger, they were compelled to depart—they were in fact disgracefully expelled, and after wandering from place to place, and suffering every kind of inconvenience, the citizens of New-York handsomely invited them to their city—made them a tender of their public buildings, and have continued for the space of five years to testify their esteem and respect for Congress as a body, and for its members individually by every mark of attention.

"When it was resolved that the new congress should assemble at New York, the Corporation, by considerable exertions, and at a great expense, erected and completed a magnificent building for their accommodation, and have furnished it in the most elegant and commodious manner: in short there is nothing equal to it in any part of the world; and while the citizens are paying taxes to defray this enormous expense, Congress propose to leave them without assigning any cause of displeasure. Still further to evince their disposition to accomodate the government of the union, the city is now erecting a noble mansion for the President of the United States—The corner stone was scarcely laid [see My 21], when this fresh proof of their respect for the government was repaid with a motion of adjournment to Philadelphia."

Washington writes to Lafayette, I have a few days since had a severe attack of the pernicious kind; am now recovered, except in point of strength. My physicians advise me more exercise and less application to business."—Writings of Geo. Washington (Ford ed.), 431.

Fitch's steamboat makes a trip from Philadelphia to Trenton and back, "the whole distance by water being about 80 miles."—N. Y. Jour., Je 15, 1790; Columbia Cent., Je 16, 1790. See also Philadelphia Evening Post, August 16, 1790, 395. J. E. 14.

Robert Richard Randall buys for $5,000 the country estate of Frederick Charles Hans Bruno Poeznitz, which, as "Minto," had formerly belonged to Lient. Gov. Andrew Elliott (see 1766). Mr. Randall resided on the property until his death. By his will, made in 1801, he established, principally on the basis of this estate, one of the most munificent charities in the country, for the support of aged and infirm seamen, directing that a suitable edifice he erected and denominated "The Sailors' Snug Harbor."—Man. Com. Coun. (1865), 640. Randall's purchase of June 5, 1790, was of six parcels of land, containing in all 21 acres, and was recorded in Liber Deeds, XLVI: 212-16 (New York). The property lay, generally speaking, between the present Fourth and Fifth Aves., Waverly Pl., and 9th St.; on its eastern boundary it ran, a short distance above 10th St.—See L. R. R. K., III: 973; Pl. 175, Vol. III. See, further, Je 1, 1801.

Jefferson writes to WM. Short: "To-morrow I go on a sailing party of three or four days with the President . . . The President is perfectly reconstituted, and looks better than before his illness."—Baker, Washington after the Rev., 183.

The "Philadelphia Patriots" in New York report that it has been reported from Congress to remove President Washington to Philadelphia "for the benefit of dry air," as the air of New York is "too saline for his constitution." In proof of the assertion, the fact is cited (evidently in sarcasm) that a Philadelphia physician, who has been called to advise him, recommends that the President go on "a fishing party" to Sandy Hook, "in order to avoid salt air."—N. Y. Daily Gen., Je 9, 1790. See, however, Je 9.

Col. Thomas Redney (member of the continental congress, and first judge of the Mississippi Territory) writes in his diary, during a journey from Dover to New York: "I intended to have stayed at ferry & went into N. Y. today, but finding Expenses very high every day & that the President and all the State officers were gone out of town & frolicking, I thought it best to return home-ward . . . A little after passing the ferry met Mrs. Washington & another lady in a coach, they were preceded by a Servant about 4 miles a head, a few years ago, Congress was surrounded by enraged assassins—the lives of the members were threatened—the representatives of the States—the sovereignty of the Union, were insulted—the best men in America were at the mercy of ruffians . . . but the citizens of Philadelphia might by a slender effort have crushed this ignominious attack, and restored the energy of the laws. Congress implored protection—it was ignored. Philadelphia was threatened to become a city where lives were in danger—they were insultingly sneered at and told that the citizens of Philadelphia did not fear their departure, because they could not exist out of that city . . . Finding their persons in danger, they were compelled to depart—they were in fact disgracefully expelled, and after wandering from place to place, and suffering every kind of inconvenience, the citizens of New-York handsomely invited them to their city—made them a tender of their public buildings, and have continued for the space of five years to testify their esteem and respect for Congress as a body, and for its members individually by every mark of attention.

"When it was resolved that the new congress should assemble at New York, the Corporation, by considerable exertions, and at a great expense, erected and completed a magnificent building for their accommodation, and have furnished it in the most elegant and commodious manner: in short there is nothing equal to it in any part of the world; and while the citizens are paying taxes to defray this enormous expense, Congress propose to leave them without assigning any cause of displeasure. Still further to evince their disposition to accomodate the government of the union, the city is now erecting a noble mansion for the President of the United States—The corner stone was scarcely laid [see My 21], when this fresh proof of their respect for the government was repaid with a motion of adjournment to Philadelphia."

Washington writes to Lafayette, I have a few days since had a severe attack of the pernicious kind; am now recovered, except in point of strength. My physicians advise me more exercise and less application to business."—Writings of Geo. Washington (Ford ed.), 431.

Fitch's steamboat makes a trip from Philadelphia to Trenton and back, "the whole distance by water being about 80 miles."—N. Y. Jour., Je 15, 1790; Columbia Cent., Je 16, 1790. See also Philadelphia Evening Post, August 16, 1790, 395. J. E. 14.

Robert Richard Randall buys for $5,000 the country estate of Frederick Charles Hans Bruno Poeznitz, which, as "Minto," had formerly belonged to Lient. Gov. Andrew Elliott (see 1766). Mr. Randall resided on the property until his death. By his will, made in 1801, he established, principally on the basis of this estate, one of the most munificent charities in the country, for the support of aged and infirm seamen, directing that a suitable edifice he erected and denominated "The Sailors' Snug Harbor."—Man. Com. Coun. (1865), 640. Randall's purchase of June 5, 1790, was of six parcels of land, containing in all 21 acres, and was recorded in Liber Deeds, XLVI: 212-16 (New York). The property lay, generally speaking, between the present Fourth and Fifth Aves., Waverly Pl., and 9th St.; on its eastern boundary it ran, a short distance above 10th St.—See L. R. R. K., III: 973; Pl. 175, Vol. III. See, further, Je 1, 1801.

Jefferson writes to WM. Short: "To-morrow I go on a sailing party of three or four days with the President . . . The President is perfectly reconstituted, and looks better than before his illness."—Baker, Washington after the Rev., 183.

The "Philadelphia Patriots" in New York report that it has been reported from Congress to remove President Washington to Philadelphia "for the benefit of dry air," as the air of New York is "too saline for his constitution." In proof of the assertion, the fact is cited (evidently in sarcasm) that a Philadelphia physician, who has been called to advise him, recommends that the President go on "a fishing party" to Sandy Hook, "in order to avoid salt air."—N. Y. Daily Gen., Je 9, 1790. See, however, Je 9.
of which are still very stout. The second leaden coffin supposed to contain the body of Lady Bellamont, probably belongs to someone else. For in the Gentlemen’s Magazine for December 1737, we are informed of the marriage of the Countess Dowager of Bellamont to William Bridgen, Esq., merchant of Mincing-lane, at Morton Court, near Ledbury. The marriage is entered in and the March Magazine of 1738, her death is announced on the 15th of that month in the 90th year of her age, four months after her aforesaid marriage. —Her title and age appear to correspond with the circumstances of Lord Bellamont’s life. These particulars, however, can better be ascer-
tained by the connections that family in Ireland. —Daily Advertiser, June 19, 1790. —Lady Bellamont removed in New York for several years after her husband’s death; but finally went to live in England, where she married a gentleman named Samuel Pyatts. She survived the Earl some thirty-six years.” —De Peyster, Life and Administration of Richard, Earl of Bellamont, (1879), 58.

“The plate of arms was by some one employed in prostrating the fort converted into teapoyard. Sic transit gloria Mundi!” —J. W. Moulton’s MSS, "Notes & Memoranda No 1", in N. Y. H. S.

Titles of nobility are abolished in France. —Anderson, Constitutions & Other Select Docs, etc. (1789-1907), 33-34.

The following plea for local historical research is published: “...the levelling the works of Fort George has awakened a public sense of the matter; transactions, which if improperly im-
proved may rescue many circumstances from total oblivion. The history of our state and city is very defective, especially in material to ourselves. It is to be hoped therefore such as possess a turn that way, will direct their views to recover what still remains.” —Daily Advertiser, Jan 19, 1790.

There is taken up from beneath the ruins of the chapel which formerly stood in Fort George a flat stone, on which is discovered the following inscription in Dutch:

Ao Do. MDCCLXII. W. KEITH, DR. GR. KEHEET DE GEMEENTEN DESEE

TEMPEL DOEN BOUWEN

In the year 1667, William Keith, Director-General, caused the con-
gregation to build this temple. —N. Y. Journal, Jan 25, 1790. Slight variations in the transcription of the original text occur in the Daily Advertiser, Jan 23; N. Y. Daily Gaz, Jan 23, 1790; N. Y. Mag., Jan 1790; and N. Y. Packet, Jan 24, 1790. The stone was removed to the belfry of the Garden Street Church, and was destroyed in the fire of 1857.—N. Y. H. S. Collections, 22 ser. (1849), II: 328-29.

For account of William Maclay thus describe the events of the day: “All the town was in arms; grenadiers, light infantry, and artillery passed the Hall, and the firing of cannon and small-arms, with beating of drums, kept all in uproar. The motion [for the senate to adjourn] was carried, and now all of us repaired to the President’s. We got some wine, punch, and cakes. From hence we went to St. Paul’s, and held the anniversary of the Independence. Mr. B. Livingston. The church was crowded ... I was in the pew next to General Washington. Part of his family and Senators filled the seats with us.” —Maclay’s Journal, 315-16.

On Aug. 20, $100 was paid on the contract. —Ibid., I: 579.

Washington sit again for Trumbull, who is drawing a portrait “at full length,” which the artist intends “to present to Mrs. Washington.” —Diary of Washington (1860), 145-46. In the cata-
logue of a loan exhibition of Washington portraits in 1889, Chas. Henry Hart said that this drawing was the “original of the life-size portrait in the City Hall, New York.” —Bowen, Hist. of the Centen-
nial Celebration of the Inaug. of Geo. Wash., 145. It is reproduced in ibid., opp. p. 21; the city hall portrait (see ibid 19) is reproduced and described in the present work, Pl. 51, I: 394.

The common council agrees to a committee report on a pro-
posed regulation and paving of Wall St. from Broadway to Broad-

Washington writes in his diary: “Having formed a Party, consisting of the Vice President, his lady, Son & Miss Smith; the Secretaries of State, Treasury, & War, and the ladies of the two latter; with all the Gentlemen of my family, Mrs. Lear & the two Children we visited the old position of Fort Washington
The common council agrees upon a regulation and survey of King (Blue), Little Queen (Cedar), Crown (Liberty) and Nassau Sts. The surveys of these streets are approved and filed; and it is ordered that an ordinance for paving them be prepared.—M. C. G. (1784–1831), I: 563–64, 565.

Inhabitants of the West Ward, in a petition to the common council, state that "the Pump standing in the Middle of the Broadway nearly opposite to the old Lutheran Church" is an obstruction, and ask that it be removed.—From original petition, in metal file No. 14, city clerk's record-room. It is endorsed "Petition for filling up the Well opposite the Burnt Lutheran Church—read and Granted. July 16 1790."

The regiment of militia of this city, under command of Col. James Aher, musters "on the regimental parade." From here they march to the race-ground, where, after being reviewed, they "were dismissed with all manoeuvres."—N. Y. J. June 1790.

The common council resolves "that The President of the United States be requested to permit Mr. Trumbull to take his portrait, to be placed in the City Hall as a Monument of the Respect which the Inhabitants of this City bear towards him."

It is ordered that Mayor Varick "be requested to wait on the President and communicate the foregoing Resolution."—M. C. G. (1784–1831), I: 565. See Jl 20.

The mayor presents to Washington the request of the corporation "that he would honor them with permitting Mr. Trumull to take his portrait to be placed in the City Hall . . . ." The President grants the request. "The Picture will be placed, in that Part of the Representatives Chamber, behind the Speaker's seat; and will be so introduced as not to be out of danger from being handled and sufficiently conspicuous from every part of the Room."—Daily Adv., Jl 21. It was finished on Sept. 2 (p. v.). This painting is reproduced and described as Pl. 51, Vol. I. It is a full-length portrait, and at the time the painter published his Autobiography (1841)—p. 164—"it was hanging in the common council room of the city hall. It is now in the governors' room there." See Jl 11.

Col. Alex. McGillivray, chief of the Creek Indians, and 21 warriors (kings, chiefs, and head men) of the Creek and Seminole nations, escorted by Col. Marinus Willett (see Mr 10), came to New York. They embarked at Elizabethtown Point at about 10 o'clock in the morning, in a packet-boat especially fitted to receive them, under the direction of Maj. Stagg, and arrived at Murray's Wharf at about 2 p.m. Here Gen. M'cLean, some troops, and the Tammany Society in full Indian costume received them. "The society was drawn up in two files, with the grand sashm at the head, who welcomed Colonel McGILLIVRAY ashore. He, with the warriors, marched in the centre of the society, which proceeded through Wall-street. When they came opposite the Federal Hall, Col. McGillivray, and the warriors saluted the Congress, who assembled for the moment of the day, and returned the compliment—The procession moved on to the Secretary at War's (Gen. Knox's, in the lower part of Broadway, where the several warriors smoked the calumet of peace, and next proceeded to the President's [escorted by Gen. Knox], where they were particularly introduced—after which they waited on Governor Clinton, still accompanied by the society, who afterwards attended them to the city tavern, where they took up their lodgings during their residence in this city." Here they dined in company with Gen. Knox, the senators and representatives from Georgia, Gen. M'Colm, the militia officers, and the officers of the Tammany Society.

"The Creeks seemed highly pleased with the polite and friendly reception they met with—and the pleasure was considerably heightened by the conviviality and good humour which prevailed at the festive board. . . ."

"The number of citizens that assembled on the landing of Col. McGILLIVRAY has not been equalled since the first arrival in this city of the President—so anxious were all ranks of seeing the strangers, and at the same time to testify their joy at the prospect which is now held up to us of establishing a perpetual peace and friendship."

The board also approves the report of a committee appointed "to ascertain a Line for straightening the East side of White Hall
Street from the South West Corner of Beaver Street to the north-west Corner of Great Dock Street."—Ibid., I, 568. A deviation from this plan was adopted on Sept. 17.—Ibid., I, 595.

27. The common council appoints a committee to "procure Survey, for the Streets [St.] from the Brickwell northwards & of the Streets in the vicinity leading to the River."—M. C. C. (1784-1811), I, 568.

27. The legion of General Malcolm's Brigade and Col. Bauman's Regiment of Artillery, the whole commanded by Col. Rutgers, are "reviewed by the President of the United States, and Governor Clinton accompanied by the Kings, Headman, and Warriors of the Creek Nation [see note] late arrived. The troops appear to be complete in uniform and arms, and performed a variety of sallies and manoeuvres with great precision."—Penn. Packet, Ag 4, 1790.

The review was held "on Col. Rutger's ground."—Gaz. of the U. S., JI 28, 1790.

29. An entertainment on board the ship "America" (Capt. Sarley), lately from Canton, is "honored by the company of the President of the United States, the Secretary of War, several other heads of departments, the Governor of this state—Col. M'Gillivray, with the Kings, Headman, and Warriors of the Creeks, and a very respectable company of officers and soldiers."—N. T. Jour., JI 30; Penn. Packet, Ag 5, 1790.

30. City ordinances are passed "for the new paving of Nassau Street between the Land of John Frankfort Street—Paint Street from the Broad Way to Gold Street—& Beekman Street from Gold Street to Nassau Street."—M. C. C. (1784-1811), I, 569.

The common council orders that "two of the City Surveyors Survey & lay out the Street leading from the East River between the Land late of James Delancey & the Heirs of Hendrick Rutgers deceased according to certain Articles of Agreement indented & made on the 21st day of Oct 1767 between the said James Delancy & the said Hendrick Rutgers. . . .—M. C. C. (1784-1811), I, 569. This was Division St.—L. M. R. K., III, 998.

A view of the light-house at Sandy Hook, drawn by Anderson and engraved by Tiebout, was published and described in the N. T. Mag. for this complimentary month.

2. A "Complimentary contribution" is held at the "great Wigwam" between the Company Society and the Creek Indians who are visiting the city (see Jl 21). "This conference was honored by the presence of the Secretary of State, the Secretary of War, the Chief Justice, of the United States, the Governor of this State, and the Mayor of the Corporation. A number of toasts were drank, a dance was performed by the Creeks about nine, several songs were sung by the members of the society, and about ten the society adjourned. An apparent satisfaction sat upon the brows of all present."—N. T. Jour., Ag 3 and 19; Daily Adv., Ag 4, 1790.

Kilroe says: "The friendly spirit with which the Creeks were imbued, in the course of their cordial entertainment by the Society, undoubtedly mollified their opposition to the whites and despite their distrust, influenced them to make the treaty of peace and friendship which was concluded between the United States and the Creek Nation by Gen. Knox, on Ag 19, 1790, for the amount of $1,721. The treaty was approved by Pres. Washington, and ratified by the senate on Ag 13 (q.e.)—N. T. Jour., Ag 17, 1790. See also the portrait sketches of the Creek chiefs, etc., drawn by John Trumbull, and reproduced in his Autobiography (1841), 146-9.

3. "Last week [probable on Aug. 3] the key of the Bastille, accompanied with a fine drawing of that famous building, was presented to the President of the United States, by John Rutledge, jun. Esq. to whose care they were committed by the illustrious patriot the Marquis de Lafayette, for that purpose. Mr. Rutledge arrived in the Chesterfield Packet."—Gaz. of the U. S., Ag 11, 1790. The "Chesterfield" arrived on Ag 2.—Ibid., Aug. 3, 1790.

Louis Otto, charged d' affaires, wrote on Ag 4 to his government in Paris: "In attending yesterday [Aug. 3] the public audience of the President, I was surprised by a question from the Chief Magistrate, 'whether I would like to see the Key of the Bastille?' One of his secretaries showed me at the same moment a large key, which had been sent to the President by desire of the Marquis de Lafayette. I assembled my surprise in observing to the President that 'he had not seen in America to do iron-work equal to that before him.' The Americans present looked at the Key with indifference, as if wondering why it had been sent. But the serene face of the President showed that he regarded it as a homage from the French nation."—Américana (magazine), July, 1911.

Lafayette's letter, presenting the key to Washington, is dated at Paris March 17, and reads as follows: "Give me leave, my dear General, to present you with a picture of the Bastile, just as it looked a few days after I had ordered its demolition [in July, 1789], with the main key of the fortress of despotism. It is a tribute, which I owe as a son to my adopted father, as an aid-de-camp to my general, as a missionary of liberty to its patriarch.

"Writings of Geo. Washington (Ford ed.), 494, footnote. He intrusted the key and drawing to Thomas Paine for transmission to President.

Paine writing from London on May 1 to Washington remarked: ... I feel myself happy in being the person thro' whom the Marquis has conveyed this early trophy of the Spoils of despotism, and the first ripe fruits of American principles transplanted into Europe, to his great master and patron . . . That the principles of America opened the Bastille is not to be doubted, and therefore the Key comes to the right place . . . I have permitted no drawing to be taken here, though it has been often requested, as I think there is a propriety that it should first be presented. But Mr. West wishes Mr. Trumbull to make a painting of the presentation of the Key to you."—From Moncure D. Conway's Life of Thomas Paine (1892), I, 273. A copy of this letter, framed, hangs on a wall at Mount Vernon. Mr. Paine, in a note accompanying the key, Paine transmitted the present by J. Rutledge, Jr., who set out from London on May 31, on which day Paine wrote again to Washington so informing him.—Ibid., I, 274.

Washington wrote to Lafayette on Aug. 11 to acknowledge receipt of the key, which he refers to as "the token of victory."—Writings of Geo. Washington (Ford ed.), 495; see also p. 494.

On Dec. 13, Otto, the French chargé, wrote to his home government: "The Key of the Bastille, regularly shown at the President's audiences, is now also on exhibition in Mrs. Washington's salo[n], where it satisfies the curiosity of the Philadelphians. I am persuaded, Monsigneur, that it is only their vanity that finds pleasure in the exhibition of this trophy, but Frenchmen here are not less the piqued, and many will not enter the President's house on this account."—Américana, July, 1911. See also Loting's Mount Vernon and Its Associations (1859), 217; Wilkuch, Mount Vernon (1916).

Evidence that ice houses existed at this time is found in the following item: "After we got through Hell Gate we drank a bowl of Punch made with Ice which Mr. Yates a passenger had took on board at N. York. This was very curious to see Ice at this season of the year—which is kept [as Mr. Yates informs us] through the summer in houses built on purpose."—MS. Jour. of Ephraim Hoyt cited in Chron. of Am., IX: 971 (footnote).

The Dutch Church applies to the common council for a grant, in fee simple, at a cost of $1,000, of a piece of land in Montegomery Ward "heretofore granted to the said Church on an annual Rent reserved of £70 per annum."—M. C. C. (1784-1831), I, 572. On Aug. 10, the board consented.—Ibid., I, 579. On Aug. 27, after grant and release, sealed and signed by the mayor, were "to be delivered to the Parties on the Treasurers notifying the Clerk that the consideration Money and Rent due is paid."—Ibid., I, 579. This grant to the Dutch Church conveyed the block bounded by King George (William) St., Queen (Pearl) St., Thomas (Duanne) St., and Rose St.—now traversed by New Chambers St. It was made on the express condition that the land was to be used only for a church and cemetery.—Liber City Grants, D: 636. The city, however, released the church from the conditions.—Liber Deeds, CCCLIX: 372. See also Liber City Grants, C: 545.

Ald. McCormick, of the committee appointed to superintend and direct the printing of "a further Emission of Notes for small Change" (see summary under F 26), reports that they "procur'd the printing of & had delivered to the Treasurer three thousand nine hundred & fifty Sheets containing 47,400 Notes—of 1d each . . . . £197/io—47,400 1d —of 2d . . . . 395—47,400 2d —of 3d . . . . 592/io—£185 7s. 3d.

"deduct for imperfect Sheet . . . . 11 8s. 11d.

Total 11831 11d."
THE ICONOGRAPHY OF MANHATTAN ISLAND

1790

"Which said Notes were adopted by the Board & ordered to be issued.

10

"A Receipt of the Treasurer for the said Notes was read & ordered to be filed." The mayor issues a warrant on the treasurer to pay Ald. McCormick £103:36 for the paper procured by him to print the notes on.—M. C. C. (1784-1811), I: 572-73. See further, Mr 11, 1791.

12

"The common council resolves "that His Excellency the Governor of this State [George Clinton] be requested to permit Mr. Trumbull to take his Portrait to be placed in the City Hall as a Testimony of the Respect which this Corporation bears towards him." It is ordered that Mayor Varick "be requested to wait on his Excellency and communicate to him the following Resolution."—M. C. C. (1784-1811), I: 577. See further, S 24, 1791.

13

"The common council appoints a committee "to take the Charge & Care of the City Hall on the adjournment of Congress from this City."—M. C. C. (1784-1811), I: 578.

The common council refuses a petition of Wm. P. Smith and others "to open the Doors of the City Hall to the Revd Mr John Murray Minister of the Gospel in the Universal Church from Boston."—M. C. C. (1784-1811), I: 579.

15

"Yesterday [Ag 13] the treaty of peace and friendship between the United States and the Creek nation [concluded on Ag 7] was solemnly ratified by the contracting parties, in Federal Hall, in presence of a large assembly of citizens.—The Vice President of the United States—the great officers of State—his Excellency the Governor—and of several members of both Houses of Congress.

16

"At 12 o'clock the President of the United States, and his suite—General Knox, the commissioner; the clerks of the department of the Secretary at war; Col. M'Gillivray, and the Kings, Chiefs, and warriors of the Creek nation being assembled, the treaty was read by the Secretary of the President of the United States.

17

"The President then signed the treaty—after which he presented a string of beads as a token of perpetual peace; and a paper of tobacco to smoke in remembrance of it; Mr. M'Gillivray rose, made a short reply to the President, and received the tokens.

18

"This was succeeded by the shake of peace, every one of the Creeks passing this friendly salute with the President; a song of peace performed by the Creeks concluded this highly interesting, solemn and dignified transaction."—Gaz. of the U. S., Ag 14, 1790 (with the text of the treaty).

There are placed on record the following letters received by the common council from the president of the senate, and the speaker of the house of representatives, of the United States. The first reads:

"New York 12th August 1790.

"Sir,

"It is with great pleasure that, in obedience to an Order of the Senate of the United States, I have the honor to enclose their Resolution of this date, which was unanimously agreed to; and in behalf of the Senate, I request that you will be pleased to communicate the same to the Corporation of this City, and at the same time signify to them, that it is the wish of the Senate, that the Corporation will permit such Articles of furniture &c. now in the City Hall, as have been provided by Congress, to remain for the use of that Building.

"I am, Sir,

"Your Most Obedient 

"Humble Servant.

"John Adams

"Vice President of the United States and

"President of the Senate"

The enclosed resolution is as follows:

"United States of America

"In Senate August 15th 1790

"Resolved unanimously, that the thanks of the Senate be given to the Corporation of the City of New York, for the elegant and convenient accommodations provided for Congress.

"A. Atten.

"Sam. A. Otis Secy"

The other letter, dated Aug. 11, makes the same statements on behalf of the house of representatives, and is signed by their speaker, "Fred. A. Muhlenberg." Their resolution of thanks, which they enclosed, was expressed in the same words as those of the Senate, and was attested by "John Beckley Clerk."—M. C. C. (1784-1811), I: 575-76.

"On Sunday morning, the 15th inst, the President of the United States embarked for Newport, on a visit to the state of Rhode Island, accompanied by Governor Clinton, Mr. Jefferson, Secretary of State; the Hon. Judge Blair, Mr. Smitu of S. Carolina, and three gentlemen of his family."—Penn. Pachts, Ag 28, 1790.

19

"The three last named were Col. Humphreys, Major Jackson, and Mr. Nelson. The journey was made on the packet "Hancock" (Capt. Brown).—Gaz. of the U. S., Ag 18, 1790.

Washington did not include Rhode Island in his New England tour in Oct. and Nov., 1789. Rhode Island having ratified the Constitution on May 29, 1790, he determined to make a special tour to that state, which was the last to come into the Federal Union. For incidents on this trip, see Baker, Washington after the Rev. 191 et seq.

The common council orders "that the Street Committee direct Surveys for the Regulation of Mill Street & Great Dock Street from Coenetics Slip to White Hall Street."—M. C. C. (1784-1811), I: 577.

"Estimates & assessments for the paving of Wall Street from the Broad Way to Broad Street—Kings Street from the Broad Way to Queen Street—and Smith Street from Duke Street to Great Dock Street" are ratified by the board.—Ibid., I: 581.

20

A public whizzer is still employed as a city functionary. The common council agrees that Joseph Shovey receive £18 for his former Services," and that £33 per annum he allowed him "for his Services as well without as within the Bridewell in future."

A warrant for the first amount issued immediately.—M. C. C. (1784-1811), I: 578, 579, 605, 633. See, further, O 14, 1808.

Washington returns to New York from his trip to Rhode Island, 21

"after a fine passage of 24 hours only." The return trip, like the outgoing one (see Ag 15), was made on a Sunday.—Gaz. of the U. S., Ag 25, 1790.

The common council orders that the whole exterior of the 22

city hall be painted, and necessary repairs made "for the preservation of the Buildings."—M. C. C. (1784-1811), I: 583. On Sept. 17, £100 was advanced "on Acc't towards Repairs to the City Hall."—Ibid., I: 594. On Oct. 29, £100 more.—Ibid., I: 608. On Nov. 12, £100.—Ibid., I: 611. On Dec. 24, £200.—Ibid., I: 618.

The common council adopts specifications for the grading and paving of Duke, Princess, Garden, Chestnut, and Cherry Sts.—M. C. C. (1784-1811), I: 583-84.

The common council approves of a scheme for a second lottery under the same regulations as the last (see Mr 4), the drawings to commence the first Monday in Jan., 1791.—M. C. C. (1784-1811), I: 585. A marginal note says this is "to reimburse expenses for repairing the City Hall."

The common council orders that the mayor issue his warrant to pay Ald. Stoutenburgh, one of the commissioners (see Ap 6), £1,500 "towards the Wharf at the Battery."—M. C. C. (1784-1811), I: 586. On Oct. 22, Stoutenburgh received £1,000 for the same purpose.—Ibid., I: 607.

The governor of the state and the mayor and aldermen of the city of New York dine with Washington, who informs them "of
his intention to visit Mount Vernon—and that he should leave the city on the Monday following" (Ag 30). He expressed "the deep sense he had of the respectable attention which the corporation in particular, and the city citizens in general had shown him personally, and as a first magistrate of the United States—and added that it was with the utmost regret that he should quit a residence which had been rendered so agreeable to him." The published report of the announcement states that "Mrs. Washington appeared greatly affected on the occasion."—Gaz. of the U. S., S 1, 1790. Washington expressed a wish that his departure might not "be noticed." The corporation of the city, however, met in the evening and agreed "to pay their respects to this illustrious personage on his departure."—N. T. Jour, Ag 31; Columbian Centinel (Boston), S 4; Penn. Packet (Phila.), S 2, 1790.

At about nine o'clock, the "Corporation" of the city attended "at the presidency in Broad-way," to pay their respects to Washington. The governor, the "executive officers of the government, several other officers, gentlemen of the clergy, and others, had already assembled to take their leave." At about ten o'clock, "the procession moved for the President's barge, which was laying at M'Comb's wharf, on the North-river, in the following order: Sheriff, with his insignia of office. Marshals and Constables, with insignias. Gov. Clinton—President—Chief Justice Jay. The executive officers of Government.

Corporation of New-York.

Several Officers.

Clergy. Citizens.

"At the wharf, the escort opened to the right and left, when the President, his Lady, &c. accompanied, marched forward and entered on board the barge, under the discharge of a salute of thirteen guns from the Water-Fort." As it was not generally known that we were that day to bid a final adieu, little or no preparations could be made, and as but few citizens knew of the circumstance, the concourse of people was not so great as otherwise it would have been. The barge was manned with thirteen men, in a uniform of white jackets, and black caps; the weather was serene and beautiful, and a few minutes landed them at Powles-Hook ferry, where the carriages of the President and Suite, were waiting.

"The Custom House barge was manned on this solemn occasion; on board of which the officers of the customs accompanied the President's barge, and brought back the gentlemen from Powles-Hook, of whom the President and Lady, with an apparent sensibility, took an affectionate leave."—N. T. Jour, Ag 31, 1790.

On arriving at Powles-Hook, Washington returned "the elegant barge" to the citizens who had presented it, with the following letter to Capt. Thomas Randall, which expressed his farewell and good wishes to the City of New York:

"New York, August 30th, 1790.

Sir,

"On the 2d of May, 1790, I wrote you, requesting that my acknowledgments might be offered to the gentlemen who had presented an elegant barge to me, on my arrival in this city. As I am, at this moment, about commencing my journey to Virginia, and consequently shall have no further occasion for the use of the barge, I must now desire that you will return it, in my name, and with my best thanks, to the original proprietors at the same time I shall be much obliged if you will have the goodness to add, on my part, that in accepting their beautiful present, I considered it a pledge of that real urbanity which, I am happy in declaring, I have experienced on every occasion during my residence among them; that I ardently wish every species of prosperity may be the constant portion of the respectable citizens of New-York; and that I shall always retain a grateful remembrance of the polite attention of the citizens in general, and of those in particular to whom the contents of this note are addressed.

"I am, with sentiments of regard and esteem, Sir, your most obedient and very humble servant.

"George Washington"

"Thomas Randall Esq."

—Ibid., S 3, 1790, citing the N. Y. Mag.

Besides the president and Mrs. Washington, the travelling party comprised Eleanor Parke and George Washington Parke Custis, the two grand-children of Mrs. Washington, Maj. William Jackson, Thomas Nelson, two maids, four white and four black servants, and sixteen horses.—Baker, Washington after the Rev., 194-95, footnote.

In this month, General Gates and Mrs. Gates came north from Virginia, "to take possession of their new and elegant seat on the banks of the East River, in the vicinity of the City of New York."—Daily Ado, O 4, 1790. This place was "Rose Hill." See F. 2. Henry Wansey, on May 23, 1794, refers to it as "a very pleasant country situation, about three miles from New York, on the borders of the Sound; from which you have a good view of Long Island, and of the shipping ..."—Jour. of an Excursion to the U. S., 79. See, further, J 31, 1794.

"The public were some time since informed in the Massachusetts Centinel, that a Bust of the President of the United States had been executed by M. Gullager [sic] of Boston, in Plaster of Paris; this statue, the first of the kind ever produced in the United States, is now in this city; several gentlemen of late have seen it, and it is pronounced a fine likeness ... We are informed that the statue is open for inspection at Mrs. Loring's No. 4, Broad-Way, near the Bowling Green."—Gaz. of the U. S., 1790. It should be noted that Jean Antoine Houdon modeled a bust of Washington from life in 1785.—Hist. of the Centennial of Washing- ton's Inauguration, ed. by Bowen, 542-43, citing Charles Henry Hart. Gullager painted a portrait of Washington in 1789.—Ibid. The following notice is published: "All persons having demands against the Household of the President of the United States, are requested to exhibit them for settlement at his late Dwelling House in Broadway, before the 15th of September."—Daily Ado, S 1, 1790.

Estimates and Assessments for the paving of Maiden Lane and Nassau Street from the City Hall to Maiden Lane" are ratified.—M. C. C. (1784-85), 1: 588. See S 19; O 11. In 1793, the museum was moved to the exchange (see O 15 and N 1, 1793).

A petition from Benj. S. Judah to the common council for a Grant of the Soil under the Water in front of his Land at Haerlem is referred to a committee.—M. C. C. (1784-85), 1: 588. On Oct. 22, the committee reported that "the said Premisses consist of a Piece of Sedge or Thatch at Haerlem lying between high & low Water mark in Haerlem River in front of the upland there belonging to the Petitioner That the whole of the said River to low Water Mark on the Westchester side thereof is included in the City of New York as appears by the express Words of the Charter and all the Land between high & low Water mark on the Haerlem side of the said River being granted by the Charter to this Corporation and expressly excepted and reserved to them in their Settlement of the Line with the People of Haerlem, the Committee are of Opinion that the Land prayed for by the Petitioner belongs to this Corpora tion ..." The board agrees with the committee that an accurate survey be prepared before making the grant.—Ibid., 1: 606.

In explaining, in a report, why a petition for a grant of a water lot on the west-side of Beekman Slip cannot be granted, the committee adds the following general observation:

"The Committee wish to impress this Board with the importance of preserving every Slip as wide and Capacious as possible. The increase of the City is naturally followed by a proportional increase of the Coasting trade, The harbours for which are at present scarcely sufficient for their accommodation and in a few years they will be under the necessity of laying off in the Stream, or submitting to pay a heavy Wharfage to the proprietors of private Wharfs which must operate as a direct Tax upon the necessities of Life.

"The Committee are therefore of opinion that it will be well in this Board, to countenance such measures which a Neighbour hood may adopt to extinguish the claim of preemption of individuals..."
The common council approves a plan for regulating Chatham St., from Tryon Row to Frankfort St.—M. C. C. (1784-1831), I: 590.

The common council orders that the mayor issue his warrant on the treasurer to pay John Trumbull $161.74 for his portrait of Washington (see JI 19 and 20)—M. C. C. (1784-1831), I: 591.

A news item describes the portrait as "...a fine thing it is; designed & executed in his superior style of excellence..."

The whole piece is designed to convey to posterity an idea of The Man, at the most interesting period, when he finished his career of military glory—the evacuation of New York. It is therefore a warm, & highly ornamental business in every respect."—Colburn's City Cen., 3: 111. Gez. of the U. S., S 18, 1790. See Pl. 51, Vol. I.

In his Autobiography (1841), 164, Trumbull describes the astonishment of the Creek Indians on seeing the painting, on Washington's invitation, while in the room stood Washington himself in the uniform shown in the painting.

In a letter to Thos. Brand-Hollis, Mrs. John Adams again describes Richmond Hill (cf. S 27, 1790): "I have a situation here, which, for natural beauty, may vie with the most delicious spot I ever saw. It is a mile and a half distant from the city of New York. The home is situated upon an eminence; at an agreeable distance flows the noble Hudson, bearing upon its bosom the fruitful productions of the adjacent country. On my right hand, are fields beautifully variegated with grass and grain, to space, and, like the valley of Honiton in Devonshire. Upon my left the city opens to view, intercepted, here and there, by a rising ground, and an ancient oak. In front, beyond the Hudson, the Jersey shores present the exuberance of a rich, well-cultivated soil. The venerable oaks and broken ground, covered with wild shrubs, which surround me, give a natural beauty to the spot, which is truly enchanting. A lovely variety of birds serenade me morning and evening, rejoicing in their liberty and security; for I have, as much as possible, prohibited the guns from invasion."—Letters of Mrs. Adams (ed. by C. F. Adams, 1849), 145-46. See Ja 16, 1794.

A committee of St. Tammany's Society, in a petition to the common council, states "That the said Society, instituted on a patriotic basis, hath so greatly increased in the number of its members, as to render any private accommodations for its meetings altogether insufficient." They also state that "they have opened a subscription to enable them to erect a building equal to several uses, and from their great success have reason to anticipate a speedy completion of their intentions." They ask "permission to use the exchange-room weekly, as a temporary accommodation."

From the original petition, endorsed "granted," in metal Ric. N. Y. city clerk's record-room—M. C. C. (1784-1831), M: 595.

On receiving information "that the Corporation of the Episcopal Church declined accepting a Grant of a Triangular Piece of Ground at the junction of the Post and Bloomingeale Roads on the Terms determined on by this Board on the 16th of April last" (q.v.), the common council orders "that the Treasurer demand and receive all the Rent due & which shall become due and also all Monies which shall have been received by any Persons for Rent due on the said Piece of Ground."—M. C. C. (1784-1831), I: 592, 610. See, further, D 11 and 24.

The common council adopts a plan for the regulation of Church St.—M. C. C. (1784-1831), I: 593.

Trinity vestry orders "that the Committee of Repairs, take such measures respecting the Flagging before St. Paul's & Trinity Church as they may think prudent."—Trin. Min. (M.S.).

On the same day, "A letter from Mr. Lot Merkle dated the 13th of September 1796, written by order of the Corporation of the United German Lutheran Churches was read, thereupon resolved, that after the Lots on the South side of Rector Street are surveyed, the Line between this Corporation and the Lutheran Congregations, run along the Eastern side of the most Easterly of those Lots, & that Dreds be executed accordingly."—Ibid.

The common council adopts plans of the street committee for regulating the pavement in Broadway at Vesey St.; also for regulating Murray and Robinson Sts.—M. C. C. (1784-1831), I: 595-96.

The common council pays the balance of $188.95 due "for erecting the Oil Store" (see Ja 29)—M. C. C. (1784-1831), I: 596.

The great and rapid improvements which have been effected in this city within a few years, observes a correspondent, have greatly added to its beauty, and attracted the attention and applause of strangers of every class—but as these improvements are confined chiefly to the court end, those families which reside in the retired streets find great cause of complaint." He makes particular reference to the streets "which lead from between the Friends meeting and the head of Queen-street, into the swamp, on both sides, particularly Rutgers' street," which he says are very dangerous on account of the water lying in the street.—N. Y. Jour., S 21, 1790.

"Governor Clinton's picture [see Ag 10] is in hand, painted [by Trumbull] at the expense of the corporation; ... The price for each [this and Washington] is an hundred guineas."—N. Y. Jour., S 21, 1790. The exact sum paid for this portrait, on July 1, 1791 (q.v.), was the same as for Washington's (see S 2)—$1861.14.

A long poem entitled "Picture of New-York—August 1790," alludes to various features of New York life. Reference is made to senators who...
mission of Vermont into the federal union."—N. Y. Mag. (O, 1790), 611.

5 The "annual review and inspection of the Light Horse, Artillery and Infantry of the city and county of New York" takes place. About 2,000 appear, under arms, under command of General Malcolm.—Gaz. of the U. S., O, 6, 1790.

Mayor Varick informs the common council "that the Gentlemen who had provided the Barge for the use of the President of the United States during his Residence in this City" have proposed "to present the said Barge to this Corporation." The board requests the mayor "to thank the Gentlemen for their Intention and to inform them that as this Board can have no use for the said Barge they decline an acceptance of her."—M. C. G. (1784-85), I: 602.

The committee appointed on Sept. to report a recommendation "That a foot Walk of sixteen feet broad be paved with Brick or flat Stone along Chatham Row to the Northwest corner of the Presbyterian Church Yard . . ."

That a foot Walk of sixteen feet broad be paved with Brick or flat Stone along the westerly side of Great George Street [Broadway] beginning at the Corner of Vesey Street at the intersection of the Kennel," and extending (the grade being specified) to the intersection of Barclay, Robinson, and Murray Sts., respectively.

That a foot Walk of sixteen feet broad be paved with Brick or flat Stone ascending from the Corner of the Bridewell Fence to as great a Distance as the situation of the Ground and the convenience of the public Buildings will admit in order that a descent for as much of the Water from the Ground in front thereof as possible may be obtained . . ." The board orders that ordinances be prepared for such paving.—M. C. G. (1784-85), I: 602-3. Ordinances were adopted on Oct. 11.—Ibid., I: 603, 607.

These walks have been erroneously mentioned as the first sidewalks laid in New York (Stone, Hist. of N. Y. City, 135-36; Costello, Our Firemen, 51)— Cf. Je 11, 1792. For payments for the present work, see JI 21, 1791. See further, My 13, 1791.

"The White House, at the corner of Whitehall and Pearl streets," is advertised for rent, Cary Ludlow, No. 184 Water St., offering terms.—Daily Ady., O 5, 1790.

A lottery scheme is advertised, for the purpose of raising the residue of the sum granted by an act of the legislature on Feb. 18, 1790, to defray the expenses incurred by the corporation for repairing and enlarging the city hall.—N. Y. Packet, O 7, 1790.

6 The trustees of the first Presbyterian Church in this city having finished a convenient building for a charity School at a considerable expense, propose to open the School in the course of next week.—Daily Ady., O 8, 1790. See also Miller, Memoir of Rev. John Rodgers (1815), 264-65.

John Pintard writes to Dr. Jeremy Belknap of Boston: "I am exceedingly indebted to you for your present of the Indian Bible, which came safe to hand. I shall deposit it with your permission and in your name in the American Museum [see Je], lately instituted by the St. Tammany's Society in this city for the express purpose of collecting and preserving everything relating to the natural or political history of America. A small fund is appropriated to that purpose, and should the Society exist, this branch of it may arrive to something useful."

11 I have not time to explain the principles of this Society, of which I am a member, further than that it is a political institution founded on a strong republican basis, whose democratic principles will serve in some measure to correct the aristocracy of our city."—Kline, St. Tammany, 135-36, citing Belknap Papers, III: 490. See Ap 6, 1791.

The New York issue of the Gazette of the United States (see Ap 15, 1789) appears on this day. It was removed to Philadelphia, where publication was continued with the issue of Nov. 5.—Brigham, A. A. S. Proc. (1917), 431; Early Newspapers, II: 410.

The minutes of the Medical Society of the State of New York contain a plan for a dispensary "for the medical relief of the sick poor of the City." After the minutes, this query appears: " Might not the New York Hospital, now empty and useless, be advantageously converted into an Alms House, with cells for lunatics, the present Alms House into a Dispensary, the garden into a Bo-
“Medals of the President of the United States, from one to two dollars, may be had at the Printing Office, Franklin’s Head, Hanover Square.”—N. Y. Daily Gaz. N 12, 1790.

4 Two large balloons are “let off” from the “heights of the Broadway.” They cross the North River, and disappear in the direction of Philadelphia.—N. Y. Jour., N 15, 1790. It was later reported that upwards of £700 was taken and lost at play, on the night of the grand gala last week at Balloon-House in the Broadway.”—Ibid., N 22, 1790.

23 Attention is again called to the improvements being made in the city, which is “every day growing into symmetry, elegance and beauty.” Her ancient limits are now extended a considerable distance into the Hudson, and “a mound, strongly compacted and solid as the earth itself, is nearly carried round the southwest point of the island.” When finished, it will effectually prevent encroachments of the water. The government house, “which is now nearly roofed, is a grand and noble structure, pleasing to the eye, and does no less honour to the taste of the architect than to that honourable body, whose public spirit furnished the means of thus elegantly accommodating the first magistrate of this opulent state.” The city hall is “the finest building in the United States.”—Daily Adr., N 23, 1790. See also L. M. R. K., III: 968. For a contemporary description of the government house, see 1791. See also Pls. 55-b and 66, Vol. I. and A. Pls. 10-a, b, and c, Vol. III.

The common council appoints a committee to “apply to the Governor of the Hospital for the use of the poor, that building as an Alms House.”—M. C. (1784-1815), I: 614. The governors of the hospital met at the Coffee-House on Dec. 13 and considered the question adversely, such use of the building being “foreign to the object of their Charter.” This was reported to the common council on Dec. 24.—Ibid., I: 617.

Dec.

The charity school, whose house, in the rear of Trinity Church, was burned in September, 1796, was at this period kept in John St. The school-house belonging to the Dutch congregation was opposite “the Old Dutch Church.” The school-house of the Presbyterians was a brick building, erected during the summer of 1790, in Nassau St., opposite “the New Dutch Church.”—N. Y. Mag. (Dec., 1790), 727-28.

4 The Board [Trinity vestry] agreed to the sale of two lots of ground near the Air Furnace fronting to Greenwich Street, the one at fifty Pounds, and the other being a Corner lot at seventy Pounds.”—Trin. Min. (MS.). The air furnace stood on four lots, occupying a square 100 x 100 on the south-west corner of Park Place and Broadway, now covered by the Woolworth Building. It is shown on a survey (in Bancker Coll., N. Y. P. L.) made by Bancker for Abijah Hammond, April 2, 1795, of land on the north-west corner of Church St. and Broadway (also covered now by the Woolworth Building), where Hammond built the fine residence which he sold in 1799 to John C. Vandenhove.

Resolved that a suitable Bell be provided for Trinity Church, and that the Committee of Repairs procure the same at the most reasonable Rate.”—Ibid.

Ordered that the School Committee ascertain the Expenditure of building a suitable House for the Charity School.” At the next meeting consideration was “deferred.”—Ibid.

6 The third session of the first congress begins at Philadelphia.—Jour. of House of Rep. (1790-91), 5. This was the first session to be held in the city.

Isaac Varian having petitioned to be allowed “to hire the triangular Piece of Ground at the junction of the Post and Bloomingdale Roads” (see S 10), the common council orders that the city treasurer “let out the said Piece of Ground from Year to Year for the best Rent he can obtain for the same.”—M. C. (1784-1815), I: 615. For earlier references to this ground, see J 22 and D 12, 1771; J 31 and J 26, 1772; N 1, 1786; Mr 12 and Ag 20, 1788; Je 24 and Jl 27, 1789; F 26, Ap 16, and S 10, 1790. See, further, D 11 of Ag 1, 1791, when it became a potters’ field.

The common council, having taken into consideration the accounts of the assessors “for their Services in executing the Law for taking a Census of the Electors and Inhabitants in this State,” decides that the assessors of the Harlem Division of the Out Ward be allowed 145 for every 100 inhabitants, those of the Bowery Division 125, and those of each of the other six wards 105. Warrants are then issued, on the basis of the number of inhabitants, as follows:

<table>
<thead>
<tr>
<th>Division</th>
<th>No. of inhabitants</th>

—M. C. (1784-1815), I: 615-16.

Charity sermons are to be preached in the old and new Dutch churches, when collections will be taken for the benefit of the charity school. “The ruin of the public buildings and the great injuries sustained in the late war, have prevented the Dutch Church from reviving this school until this last year.”—Daily Adr., D 10, 1790.

Alexander Hamilton makes a report to the house of representatives upon the nature, importance, and advantages of national banks, and submits a plan for one.—Hamilton’s Works (N. Y., 1810), I: 59-110.

The streets of New York have recently "undergone a thorough and very necessary repair." Complaint is made that "the parts of the streets, which are particularly appropriated for the convenience of foot passengers," are "incumbered "with snow, haw, hedges, and even carts, and many other articles which are daily thrown on them by the occupants of houses and stables."—N. Y. Jour., D 20, 1790.

The city treasurer reports that the amount of rent received "for the Triangular Piece of Ground near the three Mile Stone" (see S 10) is £543:8:6. It is ordered that the mayor issue his warrant to pay this amount to Hannah Baker (see Ap 16), and that she be "paid from her debt of £10 due the city for rent of a lot in Golden St; this to be "full compensation for the Improvements made on the same Piece of Ground by her late Husband."—M. C. (1784-1815), I: 618. For the appropriation of this ground as a potters’ field, see Ag 4, 1794.

There were two companies of city watchmen at this time, under Alex. Lamb and Jos. Culbertson respectively, as captains. Each company received £47:19 for seven nights service.—M. C. (1784-1815), I: 619, 623, 624, 625, 628, 631. In Jan., 1791, Capt. Culbertson "and the eight other Watchmen his Assistants" were complimented by the foreman of the grand jury for putting to flight an armed mob, four times their number, and arresting six of them.—Ibid., I: 625-26. Capt. Culbertson received injuries in the riot.—Ibid., I: 695.

The sale of "assessors' print" and Bleeker’s auction on Friday, were very dull."—N. Y. Jour., D 27, 1790. Stock quotations were published at this time. On Dec. 23, the "Prices of American Stocks, last Evening" were given as: 6 per cent. stock, 88 per cent. 7 per cent. do. 45 do. Deferred 6 per cent. 41/4 do.

—Ibid., D 22, 1790.

A city ordinance is passed for the removal of snow from 31 streets.—M. C. (1784-1815), I: 619. This appears to be the first city ordinance for this purpose.

1791

In this year, Great Britain sent George Hammond as its first minister to the United States.—Winso, VII: 462.

In this year, Thomas Paine published in Baltimore the first part of Rights of Man: Being an Answer to Mr. Burke’s Attack on the French Revolution. It was printed in New York in 1792, in which year the second part was published.—See Evans, 23595, 24650, 24651.

In this year, the Provident Society of the City of New York was instituted for the benefit of sick or superannuated members, and the widows and orphans of deceased members. From Jan., 1804, to Jan., 1805, $564 was disbursed in benefits, exclusive of the expenses of operating the association.—Daily Adr., F 7, 1805.

It was incorporated Feb. 16, 1805.—The Picture of N. Y. or The Traveler's Guide (1807), 104.

In this year, Garrett Abell wrote a description of "The Government House," from which the following extract is taken: "The
door leads you into a large, elegant hall, the whole height of the building, and is — feet by — feet —. It is on a level with the second story; there is a gallery around it by which a communication is made with all the upper rooms, which are large and convenient. A large stairs leads also to them at the side of the hall; the building having three sides of an eight square (an octagon) in the rear, gives room to enlarge, and to lighten two large rooms, one on each floor. Those, and indeed, all the rooms in the house, command a most extensive and delightful prospect some into the East River, some quite to the Nor'west others up the North River. — "Garrett Abell's Records," in Four Books of the Holland Soc. of N. Y. (1916), 65-64. See also Pls. 55-b and 66, Vol. I, and A. Pls. 10-a, b, and c, Vol. III. For the commissioners' report on the Government House, see Mr. 1.

From this time forward, building operations in New York were very active. The large number of public buildings and churches erected between 1791 and 1807 is shown in the Man. Com. Cons. (1853), 574-75.

A very rare view of Wall Street, Trinity Church, and the City Hall, drawn and engraved by Cornelius Tiebout, as it appeared at this time (1791-95), is reproduced and described in Vol. I, Pl. 57.

The dispensary (see O 14, 1790) is organized by a meeting of subscribers at the city hall, who elect 12 managers for the ensuing year.—Daily Ady., Ja 5, 1791. For its location, see 7.

The members of the German Society of the State of New York celebrate their anniversary festival. They meet "at their Hall, in King-George-street," then proceed to the Lutheran Church, where an oration is delivered by William Wilmerding in German and one by Jacob Morton in English.—N. Y. Mag. (1791), 58.

Sapp Squared — The property is 42 acres, lies "six miles from the city, three miles from Harlem, about 300 yards from the post road to Albany and Boston, and is bounded in front by the East River." This was the section of the city afterwards called Yorkville. The house and grounds described in the advertisement are the typical "country seat" of the period. "The Dwelling-House is situated nearly in the center of the lot, on an eminence about 200 feet above the water. In full view, Long-Island, Blackwell's-Island, Barren-Island, the Ferry to Long Island and Hell-Gate, with the two small Islands near it. There is seldom an hour in the twenty-four that from ten to thirty vessels do not pass to, and from New York, which with Morrisania, Randal's-Island, the North-River, and the Jersey shore, can also be seen from the top of the house. The Dwelling-House is two stories high, 53 feet front, and 40 feet deep; it contains eight rooms, four on each floor, with a spacious entry both below and above, a neat mahogany stair-case, and a very good dry cellar under the whole, ...; in the front of the house is a handsome piazza, and in the rear a parlor; the house has two wings to it. The one on the right contains a good kitchen, greenhouse and dairy, and above, four rooms and a grand stair case, made in such a manner as to give the birds the heat of the green room in winter. The wing on the left, contains a large room intended for a library, and two convenient small rooms below, the upper part is unfinished, but can at a small expense be made into a billiard room or rooms for servants; near the wing on the right, is a compost and well finished dairy, large enough to hold the milk of 20 cows, and made so as to be sufficiently warm in winter, and cool in summer, and to receive through it, during the warm season, (from a pump) extraordinary fine water, springing from a rock; [other buildings and features are described.] A number of great and conspicuous advantages attend this elegant seat, fish and lobsters may be caught within a few rods of the house, which with oysters and other shell fish, may be preserved near the wharf, for months, without spoiling; and here the sportsman may also enjoy his gun and his dog, as quails, cocks, English snipe and rabbits, are always to be found when in season. The produce of the place can be taken to market by water, and mannure from the city brought back, and a speaking trumpet, with ready money, always will procure firewood, at a much less price than it can be bought for at New-York. — By Mr. and Mrs. Andrew L. Bleeker, No. 208, Water-street."—Daily Ady., Ja 8, 1791.

The owner's name does not appear in the advertisement, but the description applies perfectly to the farm owned by the two brothers Abraham and William Beckman, whose house stood in the block between 63d and 64th Sts., Ave. A and First Ave, 100 feet west of Ave. A.—See Tuttle, Abstracts of Titles, 1: 226.

Thus, the deeds to the Beckman property show that it contained 43 acres, more or less, of which 30 were east of the Eastern Post Road, and 15 to the west. Randel's Map of the Farms (P. 86, Vol. II) shows the house without wings; but three, however, appear on Map No. 205 T, in N. Y. register's office.

After Abraham Beckman's death, in Oct. 1795, the family wanted to sell the property, hence the advertisement of 1791. But they did not so do, in spite of all its advantages. They still owned it jointly in 1809.—Liber Deeds, LXXX:III: 189 (New York).

Nowhere else can we see a place that fits the description in the advertisement. The Gracie house is much too far from the road, much too near the river, and too far from town. The Flower Hospital now covers the site,—which must be distinguished from that of the Jas. Beckman place, which stood at the n. w. cor. of First Ave. and 51st St.—L. M. R. K., III: 948.

Trinity vestry orders "that the Committee of Pews for St. Paul's Church, provide a proper Pew for the Students of Columbia College." It is also ordered "that all further Measures respecting the Bell to be procured for Trinity Church be suspended until Mr. Laight can obtain Information from England upon the Subject of a Ring of Bells."—Trin. Min. (M.S.). Regarding the bells, see Mr. 14, Je 13, 1791, and F 8, 1796.

An advertisement is printed in New York, by Childs and Swaine, state printers, which is the first published census of the state of New York. It is attested this day by Lewis A. Scott, secretary of state, as "truly made from the Returns delivered into this Office in pursuance of an Act, entitled, 'An Act for taking a Census of the Electors and Inhabitants in this State.' Passed the 18th February, 1790." It shows the city and county of New York to have 15,330 males, 14,449 females, and 2,263 slaves,—a total of 30,022 inhabitants. Of these it lists the number of "Freeholders of 100," "Freeholders of 200," and "Tenants of 400." The same sort of tabulation is presented for other counties, except Clinton, and Ontario. The total population of the state is 319,627.—From original broadside, in N. Y. P. L. The city, in 1786, contained 23,614 souls; there had been, therefore, an increase of 6,488 in five years.—Columbia Countys (1791), Ja 12, 1791. (Other census figures presented in this newspaper, being in error, are partially revised in its issue of Ja 13.)

A citizen, in a letter to the press, calls attention to the need of equalizing the wards of the city, which have retained their size and form since the passage of the Montgomerie charter, in 1730.—N. Y. Daily Gm., Ja 11, 1791. See Ja 21.

The common council approves the treasurer's "Estimate of Monies necessary for defraying the public Expendes of this City and County the present Year amounting to $168,312," and adopts a petition to the legislature for permission to raise $15,000 "for the ordinary contents Expenses," and an additional $4,000 "for completing the Wharf and other Improvements at the Battery and about the Gg's House."—M. C. C. (1784-1811), I: 610. Cf. D. 1788; Ja 15, 1790. See McClellan.

On Febr. 16, the assembly having authorised the city to raise $5,000 by taxation for this purpose (Assemb. Journ., 1791, 14th sess., p. 65), this sum was voted by the common council on July 1. —M. C. C. (1784-1811), I: 653. See also descrip. of Pl. 56, I: 419.

The common council orders "that the Freedom of this City be presented to the hon. Horatio Gates Esq. Major General in the Army of the United States of America."—M. C. C. (1784-1811), I: 621. On Feb. 25, the board approved the draft of this, and ordered that it be engrossed, signed, sealed, and presented.—Ibid., I: 628. The original certificate of his "freedom" is preserved in the Emmet Coll., N. Y. P. L. See, further, My 2.

The common council resolves to apply to the legislature for "Power to regulate the Hackney Coaches and to lay a Tax on Wheel Carriages & Horses within this City and that the Monies arising thence be appropriated towards the Repairing of the Roads & Streets in this City."—M. C. C. (1784-1811), I: 621.

See Fe 5.

Payment of $25 is made by the common council "towards the 21 Walks in front of the Alma Hs Goal & Bridewell."—M. C. C. (1784-1811), I: 621. See O 5, 1790.

The mayor lays before the common council a copy of a petition made by some of the inhabitants of the city to the legislature, "praying that the Wards in this City might be equalized." The
THE ICONOGRAPHY OF MANHATTAN ISLAND

1791

board resolves that such equalization is necessary and proper, and
Jan.

appoints a committee to confer with the assembly committee "on
the Mode of equalizing the same."—M. C. C. (1784-1813), I: 263-241; see also Vol. I, p. 359. An act for this purpose was passed on Feb. 28 (q.v.).

28

Announcement is made that the Society of the Cincinnati will meet at Corse’s Hotel (69 Broadway)—Daily Advr, Ja 28, 1791.

Feb.

By order of the governors of the New York Hospital, public notice is given “That they have made preparations for the reception and entertainment of patients,” and that on this day “the physicians and surgeons will attend for the admission of sick.”—N. Y. Daily Advr, Ja 25, 1791: Account N. Y. Hosp't, 45; description of Pl. 88, III: 571.

With this issue The New-York Packet is changed from a tri-weekly (see My 5, 1789) to a weekly.—Brigham, A. S. Proc. (1917), 474; Early Newspapers, II: 427. The paper was discontinued on Ja 26, 1792 (q.v.).

The assembly passes “An Act to invest the Mayor, Alderman, and Commonalty of the City of New-York with power to license and regulate the fees of hackney coaches, and to lay a tax on all wheel carriages and horses within the City and County of New-York.”—Assemb. Jour. (Childs & Swaine ed.), 47. This bill was reconsidered and negatived by the assembly on Feb. 25—Ibid, 81. That such a law was needed appears clear from the common council’s appeal of Jan. 17 (q.v.), and from an advertisement of Mr 18, 1794 (q.v.). See also My 23, 1788.

A notice for a meeting of the managers of the newly established dispensary (see Ja 4) shows that the “Dispensary Room” was situated “at the corner of Nassau and Beekman streets.”—Daily Advr, F 7, 1791. See also F 24, and Jl 1.

The Society of the Cincinnati meets at Corse’s Hotel to commemorate Washington’s birthday. The Society of St. Tammany sent a message of congratulation to the Cincinnati “by the father of the council of Sachems, and brothers Melancton Smith, and John Pintard.” An “elegant transparent portrait of the President General” had been erected in front of the building by Col. Bauman. The Tammany Society assembled “in their wigwam, at the Exchange.”—N. Y. Mag. (1791), 118.

Alexander Robertson, Esq; merchant in this city, has made a donation of Scotch Presbyterian church of New-York (under the charge of the Rev. Dr. John Mason) of two lots of ground in King street, . . . on which to be erected a free school for the poor children of that congregation; all at his own private expence, estimated in the whole to be in value 2000. . . . Mr. George Lindsey, stone-cutter, has also given a sufficiency of hewn stone to decorate the building, estimated worth 100$.—N. Y. Mag. (1791), 119.

The newly established dispensary for the poor is set in motion. The following notice is published: “The Subscribers being appointed a committee by the managers of the Dispensary, to make the necessary arrangements for setting the institution in motion, give notice that a suitable house for the Dispensary is provided at the northern corner of Beekman and N. Audley streets (see F 7) where the Physicians and Surgeons will attend Mondays, Wednesdays and Fridays from one to two.”—N. Y. Packet, F 24, 1791. See, further, Jl 1.

The common council orders that the city treasurer let out Bedlow’s Island on the best terms he can get, reserving the privilege to use it as “a Pest Island.”—M. C. C. (1784-1813), I: 627. On March 11, a board appointed a committee to inspect into the condition of the buildings there, and report the terms at which the island should be let.—Ibid, I: 629, 643, 644. See also My 30.

The legislature passes an act to change the boundaries of the seven wards of the city, making them equal in size (see Ja 11 and 21), and giving them numerical names, First, Second, etc. One of the landmarks mentioned in describing the boundaries of the Sixth Ward is the “Stone Arch built along the street running out of the Fresh Water Pond.”—Laws of N. Y. (1791), chap. 18 (Greenleaf, II: 149); Daily Advr, Ap 2, 1791; Man Com. Coun. Feb. (1822), 179. There is an undated survey of the seven wards, on which the “Arch-bridge” appears by name, in the Banker Coll., N. Y. P. L. (Misc. 102). See also descrip. of Pl. 53-a, III: 557. The new ward divisions are shown by dotted lines on the Taylor-Redick Plan of 1793, Pl. 64, Vol. I.

The commissioners for building the government house report Mar. 3, to the assembly that $5,750.86 of the appropriation has been spent on the work, and that a balance of $4,90115 remains. They also report that an additional $2,300 will be needed “to complete the government house, together with a coach-house, stables, pumps, wells, and necessary offices, and for the purpose of erecting stone walls to support the ground and a handsome fence to enclose the same, . . . in proper style.” The building “will be finished May next, so that in the autumn it will be sufficiently dry and fit to be occupied.”—Daily Advr, Mr 3, 1791. On March 22 (q.v.), the commissioners were granted the money they asked for.

Congress resolves that a mint be established.—Senate Jour. (1790-91), 164, 174. See Ap 2, 1792.

A society for the promotion of agriculture, manufactures, and arts has recently been instituted, and the following officers elected: Robert R. Livingston, president; John Sloan Hobart, vice-president; John McKesson and Samuel L. Mitchell, secretaries; and Alexander Macomb, treasurer.—Gan. of the U. S., Mr 9, 1791.

The common council directs the commissioners to be prepared "to permit the Cartmen to use Ironshod Wheels." These had been forbidden in 1784 (q.v., Je 2).—M. C. C. (1784-1811), I: 629.

The streets running from Broadway to Greenwich St., not already regulated, have been surveyed, and the common council now adopts plans and specifications for regulating Rector, Thames, Little Queen, "Lombard" (Laumber), Temple, Crown, Warren, Chambers, Barclay, and Gold Sts.—M. C. C. (1784-1811), I: 629-31.

$Lombard$ was part of the present Church St.—L. M. R. K., III: 1005. Regarding Crown St., see Je 13, 1771; Ap 21, 1794.

Chambers St. was one of the streets ceded to the city by Trinity Corporation on Sept. 18, 1761 (q.v.).—M. C. C. VII: 263. It was first shown, laid out and named, between Broadway and Greenwich St., on the Ratzer Map of 1763, Pl. 41, Vol. I. On June 27, 1796 (q.v.), plans were adopted for extending the street east as far as George St. On June 10, 1811, the common council ordered that it be opened only to Chatham St.—M. C. C. (1784-1811), VI: 635. On July 1, 1800, it was opened from Chatham St. to James Slip.—Proc. App’d by Mayor, XXVIII: 1794, 198. This last extension was known for many years as New Chambers St.

The quantity of bills issued by order of the common council (see Ag 10, 1790), and put into circulation as a substitute for small Change, being "unequal to the purpose intended," the board resolves "that a further Sum to the amount of $1000—In Notes of like denomination with the former be printed," and that the same committee that directed the printing of the former execute the present order.—M. C. C. (1784-1811), I: 611. On July 15, Gaine was paid $50 for printing this issue.—Ibid, I: 628. On Oct. 4, another issue, to the amount of $1000, was ordered, and a new committee appointed to supervise it.—Ibid, I: 674. On Feb. 6, 1794, the committee was enlarged (Ibid, I: 697), and at the same time Gaine was paid $7511 for printing this latter issue (Ibid, I: 698). See F 7 for the report, see F 17, 1792.

Trinity vestry directs its committee of leases "to examine and report what Part of the Land belonging to this Corporation ought to be reserved for a Church, Parsonage, School-House, Burial Ground and other public Purposes."—Trin. Min. (M.S.). The need was supplied, evidently, through Mr. Stuyvesant’s offer, on Ap. 9, 1792 (q.v.), of his land on which the church was to sit.

The subject of building a charity School was before the vestry on March 11, 1793 (q.v.).

The vestry also orders on this day that the committee of leases "report a Plan for widening the Streets laid out in the Church Farm to the Northward of Warren Street and making such other Improvements in that Part of the Church Estate as may conduce to the Interest of Corporation and the Ornament of the City."—Ibid, I: 698.

"The Lutheran Congregation of this City having offered the
THE FIRST FEDERAL THANKSGIVING PROCLAMATION; SIGNED BY WASHINGTON IN NEW YORK, OCT. 3, 1789. SEE P. 1255.
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

Use of a Bell for Trinity Church," it is accepted with thanks, and is to be returned "whenever demanded."—Trin. Min. (MS.).

The legislature passes an act empowering the corporation of New York City to raise $5,000 for the support of the poor and to defray other contingent expenses; also $500 for the "improve- ments at the battery, and in front of the government house," and £4,000 for paying watchmen, maintaining lamps, etc.—Laws of N. Y., 14th sess., chap. 34.

The Bank of New York is incorporated.—Laws of N. Y., 1791, chap. 17 (Greenleaf, II: 366). It had been organized in 1784.

The legislature appropriates $2,500 for the use of the commis- sioners for building the government house (see Mr 1), and also authorizes the payment to them of £300, "to be laid out in furni- ture, to belong to and be used in the said government house."—Laws of N. Y., 14th sess., chap. 45. For a list of the furniture bought for this building, see 1792.

The legislature passes "An Act to enable the Regents of the University to establish a College of Physicians and Surgeons within this State."—Laws of N. Y. (1791), chap. 45 (Greenleaf, II: 371). The college was chartered in 1807 (p.v.).

The legislature passes "An Act for the more effectual Preven- tion of Fires, and to regulate certain Buildings in the City of New York. All houses of three or more storeys to be built of brick or stone, and if brick, the buildings shall be provided with slate or tile, except the flat roof. Any building already erected may be new roofed with boards or shingles, and wooden buildings may be erected on new-made ground. Churches, as well as other public buildings, may be covered with boards or shingles.—Laws of N. Y. (1791), chap. 46 (Greenleaf, II: 372). See also Costello, Our Firemen (1887), 52. For examples of the latter, see Mr 7, 1792.

The legislature passes "An Act for erecting a Building for the Preservation of the Records and Public Papers of this State." In "their present place of keeping," these records and papers are "in great danger of being destroyed by fire." The act provides "That Alexander Macomb, John Pintard and Lewis Allaire Scott be authorized" to "erect, on the lot where the secretary of the state once resided, a building of such capacity as to be proof against fire," both for preserving such records, etc., and for an office for the Secretary of state. The expense shall not exceed £375.—Laws of N. Y. (1791), chap. 48 (Greenleaf, II: 373). The place where the records had been kept was undoubtedly the "old secretary's office on Whitehall Street," referred to in the law of March 16, 1799, for improving the Battery.—Laws of N. Y. (1790), chap. 25.

John Pintard, merchant; Joseph Mallenbrey, surgeon, and William Collet, coachmaker, are admitted and sworn as freemen of New York.—M. C. (1784-1831), I: 632.

The common council grants a petition of Peter Goeldt "for leave to erect a Stairs at the end of his Wharf at the Exchange Slip for the accommodation of Market Boats."—M. C. (1784-1831), I: 633.

The common council ordains "That the public Lamps in this City (see D 1, 1788) be placed in the Walks along the Edge of the Kennels in all the Streets where the Walks are in the Judgment of the Street Committee of sufficient Breadth and in those Streets where the Walks are not of sufficient Breadth that the Lamps be fixed to the Houses to extend as far over the Walks as possible. And that the Lamps be placed at the Distance of 114 feet apart measuring from the one Lamp across the Street to the other."—M. C. (1784-1831), I: 633.

The common council orders "that the Inhabitants of Dey Street be permitted to make the Walks in that Street of the Breadth of nine feet."—M. C. (1784-1831), I: 634.

Subscribers to "the Tontine" meet at the Coffee House. John Bromne, William Mallenbrey, John colleague, William Lisle, and John Watts, is appointed "to carry into effect the plan for building a coffee-house on Tontine." The committee is instructed to immediately proceed to the purchase of a proper lot or lots of ground

whereon to build the said coffee-house, and to erect the same in the most expeditious and economical manner, at the same time having in view convenience and elegance." It is to consult counsel "on the best mode of vesting the property in trustees, and of conveying the same to the subscribers, so as to answer the intent of the subscri- ption;" and it is given power "to receive subscriptions for so many more shares as may be necessary to complete the building." Subscribers not completing their subscriptions within two months after being requested to do so "shall forfeit what shall have been paid, to the use of the subscribers."—N. Y. Daily Gaz., Apr. 1, 1791.

With the De Peyster papers at the N. Y. Hist. Soc., are various papers relating to the Tontine Coffee House. Those before 1800 are as follows:

An account of the New York Tontine, communicated to Samuel L. Mitchell Esq' MD, Professor of Natural History &c. (Tells of its foundation in 1794, etc.)

Another list of subscribers, 1795-1815.

A printed copy of "The Constitution," etc. (N. Y., 1796).—See Je 4, 1794.

The common council orders "that the lower Room in the 50th East Angle of the City Hall be assigned for the use of the Magis- trate."—M. C. (1784-1831), I: 635.

John Pintard writes to the president of the Mass. Hist. Soc.: "I wish to hear whether your Antiquarian Society is commencing, or its prospects. An account will be given in some future magazine of our Tammany Society. We have lately uncanonized him. This being a strong national society, I engrained an antiquarian scheme of a museum upon it. It makes a small progress, with a small fund, and may possibly succeed. We have got a tolerable collection of Pamphlets, mostly modern, with some History . . . if your society succeeds we will open a regular correspondence and interchange communications, duplicates, etc. . . ."

"Our society proposes celebrating the completion of the third century of the discovery of America, on the 12th of October, 1792 [p.v.], with some peculiar mark of respect to the memory of Columbus and his patron." We think besides a procession and oration, perhaps—for we have annual orations—of erecting a column to his memory. I wish to know, if possible, the dimensions and cast of your monument on Beacon Hill, to guide our calculations."—Killoe, St. Tammany, 136-37.

The common council orders "that the Committee on the Im- provements at the Battery proceed to direct the clearing away the Ground & Rubbish about the Government House."—M. C. (1784-1831), I: 637. See Mr 30.

John Horne opens a theater at his hotel at 60 Broadway.—N. Y. Daily Gaz., Apr 26, 1791. See also Wilson, Mem. Hist. City of N. Y., IV: 469.

In a poem entitled "The Morning Walker," reference is made to "Dr Laneys deserted mansion," where the rambler

"A moment halts to view the ruin'd dome Whereous doors are left without a lock, or key, While saucy winds, and dashing rains intrude Where once Dalinda at her toilet sat: Deserted rooms! that now can scarcely lodge Secure from storms, the beggar and her brat."—Daily Adv., Apr 27, 1791. This was James de Lancy's residence, in the block bounded now by The Bowery, De Lancy, Rivington, and Chrystie Sts.—L. M. R. K., III: 949; also F 3, 1796. By April 7, 1795 (p.v.), the house had been removed.

The mayor reports to the common council that he has presented to Maj.-Gen. Gates the certificate of the freedom of the city (see Ja 17).—M. C. (1784-1831), I: 639.

A committee appointed by the trustees of Columbia College to prepare a plan for teaching medicine in the college reports that it will be "proper at present to have Lectures in Chemistry, Anatomy and the Practice of Physic read in Columbia College," and recom- mends that "Dr. Romayne (who already has a very considerable number of pupils under his tuition and has been in the habit of teaching) be nominated Lecturer in those Branches." Romayne
was appointed on May 5—Hist. of Columbia Univ., 1754-1904

My 3

(prepared by a committee of the university), 74. See F, 1792.

Samuel Bauman informs the public that "The Post-Office is removed from Broadway [see O 5, 1780] to No 51 Wall-street, the corner of Smith-street. As the Post-Office is now removed to a more central part of the city, and situated in a more convenient and considerate business: It is therefore most earnestly requested, that masters of vessels will lodge such letters as they may have in charge at the Post-Office, on their arrival in this port..."—Daily Ady, My 28, 1791. On May 30, the common council acted on the petition by suspending the operation of the law, "as far as it respects Trees which do not obstruct any of the foot Walks," until Dec. 1.—M. C. C. (1784-1811), I: 648. For an example of special permit to plant trees in Broadway, see Ap 22, 1793.

The common council settles the claim of Dr. Thomas Jones for compensation for loss in his lots on the north side of Barclay St. due to the widening of the street. The board agrees to pay the trustees of the college $15,112, and Dr. Jones $31,124, on their releasing to the city "such part of the said Lots as hath been thrown into the Street to widen the same for the public use as a Street."—M. C. C. (1784-1831), I: 644. See S 9, 1789; Ap 16, 1790. The college release was presented to the common council on Aug. 12.—Ibid., I: 684.

The following announcement regarding the Tammany "American Museum" appears: "The Tammany Society has established a Museum for the purpose of collecting and preserving every thing relating to the history of America [see Je 1799]; likewise, every American production of nature or art, for which purpose, part of the funds of the Society are appropriated. The success of this institution, however, must, in a great measure, depend on the voluntary contributions of the Patriotic Society for the present collection, has chiefly arisen from this source. Although in its infancy, the Museum already contains many articles in the historical and natural lines, highly deserving the notice of the curious. As almost every individual possesses some article, which in itself is of little value, but in a collective view, becomes of real importance. The patrons of this institution, solicit the attention of their fellow-citizens to the Museum, and request their aid in forming a collection, which promises fair to become an object of public utility. The articles and names of the generous donors are carefully registered in a book kept for the purpose, the contents of which will be published at some future season. Everything, and from whatever clime, will be acceptable; for although the funds of the Society are confined to American productions, the doors of the Museum are, nevertheless, open to voluntary contributions, from every quarter. The corporation of this city ever disposed to encourage patriotic undertakings, and favorably impress'd with the importance of the present, has generously granted a room in the City-Hall [see S 2, 1790], on a range with the Library, for the use of the Museum, which is at present opened gratis, every Tuesday and Friday afternoon, for the gratification of the public curiosity, especially on the last two days, or Mr. John Pintard, No. 57 King-street, will be thankfully accepted, and due care taken of them." A list of the "Laws and Regulations of the American Museum" follows. Gardiner Baker is the keeper.—Daily Ady, My 21, 1791. For an account of Baker, see Duer, Reminiscences of an Old New Yorker (1867), 8, See F 1.

The city advertises for proposals for raising the iron work of the Bowling Green, and the first course of stone work, in the building is bedded, two feet above the present level."—Daily Ady, My 26, 1791.

The common council approves a report of the street committee which expresses the opinion "that great benefit would result to their fellow Citizens by laying open a new Road on New York Island, from Bloomingdale to Fort Washington," that it "is very easy to extend the present Road terminating at the residence of Nicholas De Peyster, thro' the Lands of said De Peyster & others and falling in with the present Road to Kings Bridge somewhere about the Lands of Doctor Bradhurst & the Widow Watkins." The board orders that a survey of the intended road be made. Cf. F 17, and O 22, 1793. See, further, JI 23, 1795.

This committee also reports Machinist's regulation of the southern part of Broadway in and around "Kennedy's Lane" (Marketfield St.), the Battery, the street in front of the government house (Marketfield St.), and Whitehall St.

The same committee recommends a plan for cleaning the public slips, that it "may be effectually done and at a more reasonable rate than in any other manner by means of a Machine called a Drudge," and the distribution of the citizens which the Legislature has submitted to your disposition shall afford them cool and shaded walks and they have fondly hoped that under your direction, the great avenues to the battery to wit: Broadway, Wall, Broad and Beaver streets, would have been so planted that they might have reached that agreeable retreat without being exposed to all the inconveniences of summer sun..."—Daily Ady, My 28, 1791.

On May 28, the first part of this brought a published protest in the form of a petition to the corporation. This stated that the "principal inducement" to remove the trees is "the complaints of some who seek for beauty in naked walls and an extensive view along the front of houses;" but the petitioners "look forward with immeasurable delight" to the day when the liberal contributions of the citizens which the Legislature has submitted to your disposition shall afford them cool and shaded walks and they have fondly hoped
City, is now in this City for sale and may be purchased at a reasonable rate." The board appoints a committee to examine "the Vessel or Dock Drudge," and buy it if in good condition.—M. C. C. (1784-1831), I: 645-47. On June 10, the committee reported that it had examined the "Dock Drudge" for £90, and directed its removal to "M' Hare's Ship yard" for repairs.—Ibid., I: 648.

The city treasurer having let "Bedlow's Island" (see F 2) to James Sullivan for a term of four years, the common council approves a draft of articles of agreement, and orders that they be executed.—M. C. C. (1784-1831), I: 647.

"It is reported in the church council that (the refitted) "Trinity Church [Lutheran]" brings in an income of £80 per annum and a "lot adjoining leased to Mr. Corre £25."—Lutheran Min. (MS.). See S 6, 1792.

The announcement regarding the "American Museum" printed in the newspapers of May 21 (q.v.) is now issued as a broadside.—Emmet Coll., No. 11290. See also Man. Com. Coun. (1864), 602.

It is ordered by Trinity vestry "that a white Marble Slab, with such Inscription as the Clergy of this Congregation shall direct be procured, and fixed to the Front Door of Trinity Church."—Trin. Min. (MS.). When the third Trinity Church (the present one) was being constructed in 1841, a commemorative box was deposited in the northern front buttress of the tower, on which was engraved the principal dates, etc., in the church's history, including the inscription copied from this old marble tablet. For the full text of this inscription, see S 16, 1841.

"The President of the Board [Trinity vestry] has a Plan for a Ring of Bells for Trinity Church."—Trin. Min. (MS.).

Trinity vestry orders "that the Committee of Repairs take Order for completing the Pavement about Trinity Church."—Ibid.

"Also that the said Committee examine whether the Gallery in Trinity Church is sufficient to receive the Organ expected from Great Britain."—Ibid.

The peace and tranquility of Kip's Bay are described in a poem or paraphrase entitled "Summer Excursion to Kip's Bay."—N. Y. Jour., Je 12, 1791.

The common council orders "that the Street Committee be permitted to take the Iron which formerly enclosed Pitts Statue and apply the same to the Railing at the front of the Arch in Broad Street."—M. C. C. (1784-1831), I: 651.

A number of contributors to the "New York Public Dispensary" meet and elect seven governors for the ensuing year.—Daily Adv., Jl 2, 1791. With this, the establishment is fully organized.—See O 14, 1790; F 24, 1791.

The common council appoints a committee "to take order for obtaining proper Frames for the Portraits in the City Hall of the President of the United States and the Governor of this State."—M. C. C. (1784-1831), I: 652-53.

It is ordered that the mayor issue his warrant on the treasurer to pay John Trumbull £186:3:34 "for taking the Portrait of his Excellency the Governor."—Ibid., I: 653. See Jl 19 and 20, Ag 19, S 2 and 21, 1790.

The common council issues a mid-year order for raising money by taxation "within this City & County this present Year," to be paid to the city treasurer on or before Sept. 28. The sums to be raised are allotted as follows: £8,000 for the support of the poor, the bridewell, and the criminals in prison, for repairing and maintaining the public roads, and for cleaning and improving the streets; £1,000 "for the Improvement at the Battery & in front of the Government House:" and £6,000 for the watch and lamp departments. The proposed taxation is appropriated to the several wards.—M. C. C. (1784-1831), I: 651. For subsequent annual taxation, or budget, see N 12, 1792, and later dates there cited.

The "Tammany Society or Columbian Order" announces the following arrangements for the celebration of July 4 (q.v.).

1st The American colours to be displayed at the Great Wigwam—M. C. C. (1784-1831), at sunrise.

2nd The Society to assemble at the Great Wigwam, punctually at 7 o'clock, on Monday morning [Jl 4], to dispatch ordinary business.

3d The Society, attended by Military of the city, invited on the occasion, will form the line of procession in front of the executive, and proceed to the [New Dutch] church, through Great Dock street, White-Hall street, Broad way, and Little Queen street—precisely at quarter of an hour before nine o'clock.

5th The church galleries to be erected for the use of the Military, and Society—The right side gallery for the Military and the left side gallery for the Society—the front gallery is appropriated for those who wish to assist the music of the day—the rest of the church is for the accommodation of the public.

10th On entering the church the music will perform until the audience is seated, after which the Declaration of Independence will be read by the Grand Sachem, at the conclusion of which Divine Service will be performed by the Rev. Dr. Lynn.—A collection will then be made for the benefit of the Charity School of the church.

6th After the dismission from the church, the Society will attend the Military to the parade, where a salute will be fired.

7th The Society will re-assemble, in the evening, at the usual hour, at the Great Wigwam, which will be illuminated on the occasion—when they will regularly be dismissed.

"By order of the Grand Sachem","John Swartwout, Sec.

"N. B. It is expected, the members of the Society will appear with a buck's tail in their hats, by way of distinction."—N. Y. Jour., Jl 2, 1791.

Independence Day is celebrated. The Tammany Society (see Jl 2), with military escort, parades "from their Wigwam in Broad street, to the New Dutch Church . . . From the church the procession moved to the battery, where the artillery fired a federal salute, and the infantry a feu-de-joie." The Society of the Cincinnati, after their annual meeting, dined at four o'clock at Corre's, where they spent the evening in social and agreeable merriment peculiar to old soldiers." The revenue cutter was decorated and fired a salute.—N. Y. Mag. (1791). See also the sermon entitled The Blessings of America, preached in the Middle Dutch Church, at the request of the Tammany Society, by Rev. William Lion, and published by Greenleaf in 1791.—Catalogue, J. Carter Brown Library, item No. 3464. A citizen wrote to one of the newspapers that he never "beheld an anniversary or festival conducted with more rationality. The troops appearing exceeded well—the Tammany Society wore buck tails only by way of distinction—the Cincinnati were undisturbed—republican economy was observed on all hands—no disturbance interrupted the joy of the day—and in the evening, all retired, and satisfaction sat on every brow."—N. Y. Jour., Jl 6, 1791.

The "New Line Dispatch" advertises to run a stage during the summer between New York and Philadelphia in one day. The boat that conveys the passengers for the stage will leave the ferry stairs, opposite Pawles Hook, every afternoon (except Saturday) at 4:30 o'clock. Seats may be engaged of Jacob H. Butman at the Boston, Albany, and Philadelphia stage-office, No. 40 Cortlandt St., or of Benjamin Powell at the "Pawles Hook" ferry-house.—N. Y. Jour., Jl 3, 1791.

The common council refers to the street committee "A Second Petition from the Inhabitants of Great George Street [Broadway] between the Bridewell & Hospital for side Walks."—M. C. C. (1784-1831), I: 654.

The committee on Battery improvements reports that the plan proposed by Col. Bauman, "to carry out a Bastion at the point of the Battery & to finish the Wharf running into the East River corresponding with said Design," will cost at least three times as much as the plan proposed by the committee, which is "to make a Return at right Angles at the Point of the Battery & continue the line of the Wharf to the Whitehall Slip—the Quantity of Earth required for the former Plan being so much greater than for the latter."—M. C. C. (1784-1831), I: 654-55.

On July 15, Thomas Randall and others petitioned that Col. Bauman's plan be followed. They set forth the great advantage which would result "from the completing of the Improvements at the Battery towards Whitehall Slip by extending the Line into the River so as to include the remains of the old half Moon Battery." This petition was rejected.—N. Y. Jour., Jl 16.

"Governor's Island is being improved for a place of resort for the spring, summer, and autumn seasons. It is thus described:

"The soil, naturally good, and consisting of about 75 acres, when improved into walks, groves and gardens, cannot otherwise than present a delightful scene of recreation to the man of taste,
1791

July 11

As improvements, in this view, are now begun on Governor's island, a house and summer houses erected, and several thousands of trees planted out, we may expect soon to see it metamorphosed from a neglected spot, into a seat of taste and rural elegance. The island abounds with excellent fresh water: and a clean gravelly shore, washed by waves that are poured in upon us, twice every 24 hours, directly from the bosom of the Atlantic, attended by a fresh sea breeze, offers every inducement to gratification, to those who are fond of bathing and swimming. The prospect from the plains and rising grounds is delightful; on one side a spacious and beautiful bay, covered with vessels of every description, from all parts of the continent, and every quarter of the globe: That part of the sound called the East River, and the majestic Hudson, who invites the eye to follow his waves a considerable distance, as they roll towards the mountains of the north, form a grand and picturesque scene on two other sides. The city of New York (the Naples of America) exhibits from this place, an elegant appearance, which will daily become more so, as the improvements are completed in the neighbourhood of the old battery, and new buildings erected in the room of stable, barracks, and other petty edifices, which ought always to be in the back ground or less noticed parts of a large city.—Daily Adv., JI 11, 1791.

The common council issues orders for the payment of $6,000 toward the improvements at the Battery & abt the Gov't House last Year, and for those now prosecuting.—M. C. C. (1784-1811), I: 668.

An auction was advertised on June 29 to be held on this day at the Merchants Coffee-House for the sale of the Two Brothers Islands, "about three miles to the eastward of Hell-Gate in the sound, and near the mouth of Flushing Bay, in the county of Queens." The advantages of the location are described. They are owned by Eleanor Brasher.—Daily Adv., JI 6, 1791.

The Chamber of Commerce gives "a superb entertainment" at the City Tavern to Alexander Hamilton, secretary of the treasury.—N. Y. Mag. (1791), 424: Gen. of U. S., JI 23 and 27, 1791.

Pres. Washington signs an act creating the first Bank of the United States, in Philadelphia.—Hardenbrook, Financial New York (1897), 127; Winsor, VII: 268. The New York branch was opened in N. Y. City on April 2, 1791 (q.v.). The bank was liquidated March 4, 1811, its charter having expired by limitation. —Hardenbrook, 134.

The common council agrees to the petition of Robt. Boyd, that a space 28 ft. broad "be reserved in the rear of and extending in length parallel to the [Hudson] Market, from the Partition to Vassal Street" and the land on the street side of this strip be leased to the proprietor of the adjoining lots.—M. C. C. (1784-1811), I: 661. On April 30, 1791, the city treasurer reported on his "sale" of vacant lots here, and the board ordered that "leasing" (for 21 yrs.) be prepared accordingly.—Ibid., II: 728.

Win. Cunningham, the British provost-marshal at the time of the occupation of New York by Braddock in September 1776 (q.v.), is executed for forgery at Newgate Prison, London. For his dying confession, which gives a sketch of his life, see Genius of Liberty (Morristown, N. J.), Ja 15, 1801, in N. Y. P. L. See also Ag 4, 1774.

The city treasurer receives from the managers of the city lottery £1,304:41:5, the balance due after payment of the bond of the Bank of New York. He is directed toward the repair of the city hall, from the original account and balance-sheet in metal File No. 13, city clerk's record-room.

The city spends £1,000 for "Oak fire Wood to be laid up in the Bridewell Yard & to be disposed of next Winter" as the common council shall direct.—M. C. C. (1784-1811), I: 663.

The common council agrees to specifications and a map or survey for the elevation of the Bowery Lane. It begins at the head of Catherine St., extends to its intersection with St. Nicholas, past Pell St., Bayard St., Bull's Head Tavern, Grand St., Hester St., and so on to the two-mile stone.—M. C. C. (1784-1811), I: 664-66.

The common council pays Thos. Lafoy £3317:71 as the city's share of the expense "of new paving the Streets about the Govt House" (Aug. 4, 1784-1811), I: 665. See also descrip. of Pl. 43, I: 441. See S 5.

15 A contagious fever appeared in the city at about this time, being first discovered near Peck's Slip. It spread throughout the city till the middle of October, when it greatly abated, as the weather became cooler, and soon disappeared.—N. T. Exc. Post, Ag 24, 1803, citing a pamphlet by Jonas Smith Adams, pub'd in 1792, entitled Inaugural Discourse of the Surgeon General for New-York during the months of August, September and October, in the year 1791. See also Medical Repository (1798), II: 115-25.

The executors of the will of John Berian (see JI 9, 1794) sell his interest in the Roger Morris property to Anthony L. Bleeker for £1,000. The deed was recorded on Aug. 13, 1792.—Liber Deeds, XXVII: 455. Bleeker increased his holdings on Feb. 1, 1792 (q.v.).

No. 39, 218. The palace of the Great Mogul was described as an "enlargement of the citadel of St. Petersburg, and from it the malignant fever is imported, and not of local origin. The writer relates an account of the arrival of a vessel from the West Indies, on which the body of a seaman, who died at the Narrows. The vessel was brought to the dock in the rear of Gen. Malcolm's house; Malcolm lifted the parapin to look at the dead man, and soon sickened and died. The disorder "proceeded from Malcolm's house in Water Street, to the Coffee-house, and was very fatal." The only attempt to prove that it was of local origin, due to the accumulated filth at Peck's Slip, was made by Valentine Seaman, in a pamphlet pub'd by him in 1792, entitled An Inquiry into the cause of the prevalence of the yellow fever in New York. But that Peck's Slip was not the place of its origin is averred by this newspaper writer, who contends that it was rather Malcolm's wharf, an addition of a mile to the south of it.—N. Y. Exc. Post, Ag 24, 1803, citing the Am. Citizen, Ag 15, 1791.

A "Celebrated Company of French Rope Dancers," lately arrived in the country, begin a series of exhibitions at the City Tavern,—the performance beginning, as usual, at 6:30 in the evening.—Daily Adv., Ag 18, 1791.

A manuscript volume of the Minutes of the Commissioners of the Alms House and Bridewell, New York City, 1791-1797, begins (pages 1-5 are missing, the opening page being numbered 6) with a meeting of the said commissioners on this date. The volume is preserved in the N. Y. Pub. Library, and is valuable in its revelation of the activities of those commissioners (for the first appointment of such commissioners, see My 14, 1784) in the general relief of the poor; the care of infants, schooling and binding out of children to traders; distributions of food and fire wood to the poor of the city; contracts for meat, wood, etc.; and the appointment of physician, midwife, apothecary, and almshouse keeper. Quarterly financial reports appear, as also estimates of expenditures for ensuing quarters.

Knowledge gleaned from this volume supplements advantages of information obtainable from the Minutes of the Common Council of the same years. See Ag 29.

The trustees of the New York Society Library issue this notice: The Library now consists of upwards of 3000 volumes, containing the works of many eminent writers, ancient & modern. Considerable additions of the best publications are constantly making to the library, and the members of the Society have lately very much increased in number.

"The trustees are anxious to make a collection of all pamphlets and other publications, that in any manner relate to the history or politics of this country, before or since the revolution. Several donations of this kind already have been made to the library, and it is hoped that gentlemen who are possessed of such papers will deposit them there, and make them, through that medium more extensively used..."—Preble, Chron. Hist. of the Origin and Development of Steam Navigation, 33.

This record appears in the Minutes of the almshouse commissioners (see Ag 22): "Whereas on the 20th of June last, Catharine the Wife of one Benj Weeks of this City Bricklayer, being disorder'd in her mind, is enter'd on our bookes, as an Object of the care of the Commissioners, and it being Suggested to the board that she, in her own right, is possess of property in this City sufficient for her support, was it properly taken care of, therefore Resolved, that Willet Seaman and William De Peyters, be a Commissioners who are desired to consult with the Mayor of the City, on the propriety of taking the necessary steps for securing such a portion of the said property, (if so much may be found) as may
indemnify the public respecting her maintenance."—Minutes of the Commissioners of the Assizes House and Bridewell, 1791-1797, (MS.), 6. The constituent assembly of France enacts a constitution, and the king accepts it—Anderson, op. cit, Guizot, Hist. of France.

The mayor lays before the common council "a plan of a Fence to complete the Improvements in front of the Govt House." The committee on the improvements at the Battery and government houses for the erection of the said Fence according—M. C. C. (1784-1817), I: 665. See also descrip. of Pl. 55-b, I: 417. See O 25.

The common council pays £5:10 "for removing the Fence at the New Dutch Church."—M. C. C. (1784-1817), I: 671.

The worst fire that has occurred in New York since those of 1776 and 1798 raged from one to seven o'clock in the morning on the 1st of August, and "ill furnished a hall that is the only place the students have for the delivery of their Orations. The grammar scholars in the city are perhaps better provided for in this respect. May we not hope that the board of College will, and the worthy Trustees will shew a little public spirit, and endeavour to get a hall erected, spacious and elegant? This would add splendor to the Collegiate performances, and answer many other valuable purposes."—Daily Advertiser, O 6, 1791.

Archibald Robertson, Limner, From the Royal Academy, London, who has been under the particular tuition of Mr. West and Sir Joshua Reynolds for several years, informs the ladies and gentlemen of New York, that he paints Portraits, Miniatures, &c.

He proposes to open an Academy to teach drawing of Heads, Figures, Landscapes, Flowers, Patterns for sewing, Architecture, Perspective, &c. on Thursday 13th October, at No. 89, William street.

"The Class for Ladies will begin at ten o'clock forenoon, and for Gentlemen at twelve.

"Ladies and Gentlemen, who choose to be attended at their own houses, will be waited on at such hours as do not interfere with his classes.

"As his terms will be very reasonable, he hopes by his attention to merit the patronage of a generous public.

"For further particulars enquire at his Lodgings at Mrs. Moon's, corner of Nassau street and Maiden lane, or at the Academy."—N. T. Daily Gazette, O 11; and Daily Advertiser, O 11, 1791.

The advertisement ran in these papers through the issues of Nov. 18. It should be noted that while this academy is referred to by writers on art in New York as the first in the city, an earlier school of art and architecture was established by Lacour in 1785 (q.v., D 6).

In December, Robertson went to Philadelphia, met Washington, and executed the commission to paint his portrait.—Dunlap, Hist. of the Arts of Design, II: 82-83. Besides the miniature, Robertson exhibited, he painted a large oil painting of the general, and a smaller one of him in water colours on marble. For reproduction of the latter, with much information regarding Robertson's life and work, see the article by Edith Robertson Cleveland, in The Century Mag., (My, 1890), 8. This portrait has been deposited, and is on exhibition, at the N. Y. Hist. Soc. See, further, O 8, 1792.

The Washington issued a list of the "Terms and conditions . . . for regulating the materials and manner of the buildings and improvements on the Lots in the City of Washington."—N. T. Jour., N 2, 1791. See O 13, 1792.

Thos. Jefferson, the federal secretary of state, certifies that the original census returns of the United States have been deposited in his office, having been procured in accordance with "An Act providing for the Enumeration of the Inhabitants of the United States," passed March first, 1790. They show that New York City and County contained at this time 33,113 inhabitants, including 23,560 slaves.—Return of the Whole Number of Persons, &c., printed by order of the house of representatives by Joseph Gales, Phila. (no date), in the author's collection. This was the first United States census, under this constitution. Twelve censuses were taken, prior to 1790, the first being in 1767.—A Centennial of Population, 11, 13, 294f; and 13th Census Bulletin (1910). See also Assemb. Jour. (Childs & Swaine), 13, Cf. Ja. 11.

The common council orders "that the 26 stuffed Chairs remaining in the City Hall and which were formerly used by the Senate of the United States be removed to the Govt House for the
THE ICONOGRAPHY OF MANHATTAN ISLAND

use of that House."—M. C. G. (1784-1831), I: 682.

For a list of 1791
furniture bought for the government house, see 1792.

Nov. 25
The earliest extant record of any fire company in the city—

named, those of engine No. 13—began in this month. Also,

the first written report known to have been made of the doings
of the fire department proper was made on Nov. 4 of this year.—Costello, Our Firemen (1874), 52.

The common council revises the law for preventing and exting-

guishing fires, and, agreeable to its terms, places two fire wards

for each ward. It also ordains that "Wands, Cops & Speaking Tri-

umpets," mentioned in the law, be provided.—M. C. G. (1784-

1813), I: 685; Daily Adv., N 14, 1791.

The street committee reports a survey and regulation it has

caused to be made of Great Dock St., Little Dock St., Front St.,

and Moore St.—M. C. G. (1784-1813), I: 685-86.

For hunting, "on this Island," is announced as follows: "The
dogs will be cast off at Kissing Bridge, near the six mile stone.

On Nov. 19, the hunt is to be on Long Island, on which day the
dogs will be cast off at Graysons eddars at sunrise." The notice
is signed "Marsh, Huntman."—Daily Adv., N 14, 1791.

The common council resolves to celebrate the eighth anniversary
of the evacuation of the city by British troops, and that a public

dinner be provided at Corre's Hotel in the evening of the 25th; it orders

that the guano, not exceeding 250 lbs., be purchased for the use

of the militia on that day.—M. C. G. (1784-1813), I: 688.

The constables and marshals were allowed £10 for expenses.—Ibid.,

I: 688. The cost of the dinner was £2775.

Leather is advertised for sale at "The Leather Manufactory at

Fresh-Water, near where the old Powder-House was." This factory

was owned by Henry Brooks.—Daily Adv., N 21, 1791.

Besides the public dinner at Corre's Hotel arranged for by the

common council (see N 17), a report of the events of the day shows that a

"number of select companies of the Old Whigs of New-

York" observed the celebration. The firing of guns at the Battery

—a customary feature—took place, and the "light-horse, the regi-

ment and brigade of artillery, and the companies of grenadiers and

light infantry" appeared in the "field." The Tammany Society cel-

ebrated in the evening at their wigwam in Broadway Street.—N. Y.

Jour., N 26, 1791.

The common council orders "that the Curtains in the City Hall

which were let by the Senate of the United States he removed to the

Govt' House."—M. C. G. (1784-1813), I: 688.

John Blagge and Thos. Ingers apply to the common council "for

a Lease of the Soil under Water at the Slaughter House at Corlaers

Hook."—M. C. G. (1784-1813), I: 688-89.

A horse-race is advertised to take place on this day on Gov-

er-nor's Island.—N. Y. Jour., N 30, 1791.

Dec. 1791
John Brone, John Watts, Guilan Verplanck, John Delafiel,

and Wm. Lint, five merchants comprising the board of directors

of the Bank of the United States, (see Mr 79) thereupon de-

cided to purchase in the Manhattan market all that beef,

meat, and provisions of every description, until the 1st of

January, 1792, and for the period of one year afterwards,

for the city and the United States Army.—Daily Adv., D 5, 1792.

The shop of James Hallet, the coach-maker (see JA 22, 1792),

adjoining the John Street Theatre, is destroyed by fire. The

theatre is threatened, but is saved by the citizens.—Dunlap's Am.

Daily Adv., D 13; Gaz. of the U. S., D 14, 1791.

The common council refers to a committee a communication

from the Society for the Relief of Indigent and Distressed Debtors

Confined in the Goal, in which they suggest "the necessity of

ejecting a Wall round the Goal" to enable the prisoners to walk in

the open for air and exercise, to add to their comfort and prevent

"Terrorism."—M. C. G. (1784-1813), I: 689.

The city treasurer reports to the common council that he has

rented the Hoboken ferry for £21 per annum to Joseph Smith.

It is ordered that the Paulus Hook ferry be "sold" at public ven-

due in like manner.—M. C. G. (1784-1813), I: 689. On Jan. 6,

John Holdren leased it at £380 per annum.—Ibid., I: 693.

Payments made during the year to Ald. Stantonburgh, toward

the improvement at the Battery, have been as follows: July 25,

£2,000 (including expenses for 1790): Aug. 29, £500; Oct. 4, £500;

Oct. 12, £500; Dec. 12, £1,500, total, £5,400.—M. C. G. (1784-

1813), I: 671, 682, 675, 678, 690. See, further, N 5, 1792; D 16, 1793.

The first ten amendments to the Constitution of the United

States go into force.—Winso, VII: 466. See also the official draft

of the first 12 amendments (on parchment, framed), in Y. P. L.

(Emery Coll., U.S.).

A programme or circular of this date, announcing a performance

by the Old American Co. at the John St. Theatre on Dec. 19, gives,

with other necessary information, the following regulation: "Ladies

and Gentlemen are requested to send their Servants at Five, to

keep Places, and to order their Coachmen to take up and set down with their Horse Heads to the River, to avoid Confu-

sion." Also the following lottery tickets: "The Door-keepers are

exclusively prohibited taking money at the Doors, unless in Exchange of Places, therefore Ladies and Gentlemen will be kind enough to supply themselves with Tickets. Vivant Respublica."—From original handbill in Ennet collection, No. 11125. This is the earliest

example found of a "one way street."

Redeemers from the fire department, authorized by their

directors, companies, to meet and form a constitution for the purpose

of establishing a fund for the relief of firemen injured in the dis-

charge of their duty. Oh Jan. 21, 1792, the fire department pub-

lished a note of thanks to Messrs. Hallam and Henry "for the

donation they have been pleased to present to them, in assisting to carry the benevolent design of their fund into execution."

The Board of Fire Commissioners of the Fire Department of the City of New York.—Daily Adv., J. a 3, 1800

Hints for fire prevention are published.—Daily Adv., D 20, 1791.

A model of Jerusalem, "as it stood when our Savior was on

earth, made agreeable to the description of Josephus," size 16 by

9 feet, is on exhibition at "Mr. Hyer's, Baker, No. 7 Chatham

street."—Daily Adv., J. a 4, 1792.

The debtor confined in the "New Goal" publish their thanks to

Joseph Winter for the reasonable Relief he has afforded them by his timely supply of a whole Bullock, and a proportionable quantity of Bread," adding that they "are not without hopes that the affluent will so laudable an example."

—Daily Adv., D 27, 1791. See also D 31.

The following were the arrivals from foreign ports at the port

of New York during the year ended Dec. 1791: 170 ships and barques, 338 snows and brigs, 1 galleon, 1 polacre, 158 schooners, and 158 sloops total, 718; also 1,101 coasters. Comparing this list with that published in the Philadelphia papers, showing arrivals in that city for the same period, it appears that there was a balance in favour of New York of 151 vessels from foreign ports and 497 coasters—Gaz. of the U. S., J. a 21, 1792. When these statistics were published in Boston, the Wall and West Sts. were bought of Dr. Charles Arding and wife for £4,970; and on Aug. 22, 1792, the property was augmented by the purchase of the estate of Mordecai Gomes.—Stone, Hist. of N. Y. City, 318-27, citing N. Y. Jour. of

The city treasurer reports to the common council that he has

rented the Hoboken ferry for £21 per annum to Joseph Smith.

It is ordered that the Paulus Hook ferry be "sold" at public ven-
due in like manner.—M. C. G. (1784-1813), I: 689. On Jan. 6,

John Holdren leased it at £380 per annum.—Ibid., I: 693.

H.Event

In 1792, the Marseillaise Hymn was composed by Rouget de

Lisle (or L'Ile), at Strasburg.—Haydn, Dict. of Dates.

Ebenezer Hazard's State Papers were published in this year.

Hazard says in the preface that the object of the compilation was

to lay the foundation of a good American history. "It was the
Compiler's original Intention to visit each State in the Union, and to remain there a sufficient Time to form a complete Collection of such Materials for its History as had escaped the Ravages of Time and Accident. His Design was honoured with the Approbation and Patronage of Congress, whose Recommendation of it gained him immediate Access to the Archives of New Hampshire and Massachusetts; but before he could proceed farther, an Appointment, as Post Master General of the United States, prevented his continuing the Work in the Method he at first proposed—the papers collected since have been picked up just as they happened to fall in his Way: . . . He has thought it expedient to publish the Compilation lest it should be scattered and lost and hopeless, by laying a Foundation, another may be induced to undertake a History as at first proposed.

—Hazard State Papers, I: Preface. For what seems to be the first notion to publish such a Work.

In this year, John Vanderlyn came to New York, and after three years' study under Archibald Robertson, became a portrait painter.—Dunlap, Hist. of the Arts of Design, II: 157-59.

After two lengthy tours of Europe, he returned to the United States in 1815, and was immediately employed in painting the portraits of some of the most distinguished citizens.—Ibid., II: 162-63. In 1817 (p. v), he projected the building of the New York Rotunda.

Benjamin Tanner, probably a pupil of Peter R. Maverick (see Mr 16, 1786), was engraving in New York from this date until 1805. He worked in both line and stipple, and produced some excellent large portraits and historical subjects, especially views relating to the Revolution and the War of 1812.—Stauffer, Am. Engravers on Copper and Steel, I: 26-65. See also Dunlap, Hist. of the Arts of Design, II: 176 and footnote. For a comprehensive list of Tanner's plates, see Stauffer, op. cit., II: 508-17, and Fielding, Am. Engravers on Copper and Steel, 266-66. See also Pl. 83-2, Vol. III.

During this year, operations for grading and paving streets continued active.—M. C. C. (1784-1831), II: 695 et seq.

"Baron John Coraduis van den Heuvel, Governor of Demerara, came to New York about 1792, a refugee from the ravages of yellow fever in that island. His intention was to remain here but a brief spell, but being charmed with the location, he built his seat, which stood on the present block between 78th and 79th Streets, Broadway and West End Avenue, until the summer of 1805."—Mott, The N. Y. of Yesterday, 95-96. The Vandenhuevel mansion became a renowned hotel, known as Burham's Hotel.—Hazard, Reminiscences of an Octogenarian, 214. For view of Burnham's see Man. Com. Coun. (1857), 376. As stated by Mott, supra, the building was demolished in 1905.—Information furnished by Messrs. Clinton & Russell, architects of Astor House Apartments, now (1920) occupying the site. See L. M. R. K., III: 923; Pl. 177, Vol. III. The site must not be confused with that of the Astor House mansion, which stood south of 92nd St., 210 W. 10th Street.

From 1792 to 1797, the Kennedy house, No. 1 Broadway, was used as a boarding-house.—See descrip. of Pl. 98, III: 590.

Seven dwelling houses in Front St., between the Fly-market and De Peyster St., are destroyed by fire.—Daily Adv., Ja 10, 1792.

Livingston's sugar-house in Crown St. (Liberty St.) is offered for sale.—Daily Adv., Ja 12, 1792.

In a report to the regents, the trustee of Columbia College states that the College was greatly abused and injured, and its repair made a considerable breach upon the remaining capital.

"... At this juncture then which appears so highly favorable, the Trustees, while they acknowledge with gratitude the former beneficence of the legislature, conceive that they would be unfavorable if they hesitated to disclose to them the wants and necessities which still continue to press upon Columbia College, and to solicit for relief. Their predecessors in office were only able to execute a part of the original plan of the intended edifice, which served the purpose of the institution in its infancy. The erection even of a hall for visitations, examinations, and commencements and other public exercises, designed to be placed in the front of a square of which the present building forms only a side or wing, has for want of funds been deferred to the present moment.

"The College is besides destitute of a library, the few books which escaped the depredations of the war, not deserving that name—its philosophical and mathematical apparatus, though improved by a former donation by the Legislature, still remains incomplete; and it requires several other professors and a teacher of the French language, to perfect the means of a liberal and useful education.

"It is yet to be added, that in consequence of a city regulation for digging down and levelling the streets, the fences which surrounded the College ground have been undermined, and in a great measure destroyed; and cannot be repaired to any valuable purpose, but at the heavy expense of a stone wall, to prevent the waste of the soil, and the inconveniences which must accompany it.

"Under these circumstances, they appeal to the purse, not of any resource, but in the beneficence and liberality of the honorable the Legislature; . . ."—Assemb. Jour., 15th sess., 78-79. See Ap 11, 1792. A number of citizens assemble at Corre's Hotel (69 Broadway), and appoint Alexander Macomb, Brockholst Livingston, Abraham Duryce, Moses Rodgers, and John M'Vickar commissioners to receive subscriptions for a second bank in N. Y. City. Twenty thousand shares are subscribed, an excess of $9,000,000 over the proposed capital. The proposals for the new bank are published in full. On Jan. 19, the first payment of $200 on each share was to be made; and on Jan. 20 the stockholders were to ballot for thirteen directors.—Daily Adv., Ja 17, 1792. See also ibid., Ja 18, 19, 20, 21. The bank was to be called the "Million Bank of the State of New-York."—N. Y. Jour., Ja 18, 1792. See also McMaster, II: 81. It did not materialize.

"It may with propriety, be said, that a Tontine and Bank Mania now rages in this city. The Coffee [House] Tontine was filled some time ago, and the purposes encompassed by the purchase of the block, situated at the north east [for north-west] corner Wall and Water-streets; since which little has been said about it.

"A Tontine was opened by the Tammany Society a few days ago, for the purpose of erecting a great wig-wam, or Tammany Hall, for the convenience of the meetings, and to accommodate the growing Museum of that respectable and patriotic society. The Tontine filled rapidly, and it is rumoured, that a spacious lot is already purchased for that purpose intended."—N. Y. Jour., Ja 18, 1792. See also Daily Adv., Mr 24, 1792. See, further, Mr 8.

"The committee appointed to superintend the business of the Tontine Coffee House Institution, give notice, That they will pay a premium of Ten Guineas to the person who shall deliver in, before the 20th of February next, the best plan for the building they propose to have erected; and a premium of Five Guineas for the second best plan; the objects to be combined in the above plan are solidity, neatness, and useful accommodations. The building to be four stories high, and to occupy a space of fifty feet by seventy, being the corner of Wall and Water-streets."—N. Y. Jour., Ja 25, 1792. See, further, Mr 12.

George Knox having offered to present Trinity corporation a "Set of Lustres for Trinity Church," the Vestry orders that the committee on repairs superintend the placing of the same.—Trin. Min. (M.S.).

It is also resolved that the clerk of this corporation "be authorized to unite in a Petition to the Legislature . . . for Compensation for the Lands granted to the Corporation which fall within the State of Vermont."—Ibid.
1792
The New-York Packet (see F 3, 1791) is discontinued with the issue of this date. Early Newspapers, II: 427; Brigham, A. A. S. 1936 (1917), 474-75; Loudon and his son Samuel started a new paper on Feb. 15 (q.v.).

The "New-Line Dispatch" advertises that during the summer it will "perform the Route" between New York and Philadelphia in one day. "Boat that conveys the Passengers for the Stage, will leave the Ferry Stairs opposite Powles Hook, every Afternoon, Saturdays excepted," at 4:30 o'clock.—N. Y. Morn. Post, J 3, 1792.

Feb.
The trustees of Columbia College establish the medical school of the college on a more respectable basis by appointing Dr. Samuel Bard as dean of the faculty, and associating with him seven medical professors.—Moore, Hist. Sketch of Columbia College, 71. See also McVickar, Life of Samuel Bard, 156. This was the beginning of the College of Physicians and Surgeons.

Anthony L. Bleecker (see Ag 15, 1791) purchases for $1,000 the interest of Theodore Hopkins and Michael Joy in the Roger Morris property. The deed was recorded on Aug. 20, 1792.—Liber Deeds, XLVII: 436 et seq. Hopkins and Joy had bought the half which previously belonged to Isaac Ledyard (see J 1, 1794).—Sheldon, Jumil Mansion, 134. Bleecker advertised the house for sale on March 1, 1793.

James Watson acquires the property at the present 4, 5, and 6 State St. —Liber Deeds, LXXIII: 438; see also description of Pl. 56, Vol. I. In the same year he built his "elegant House" there.—Com. Adv., Mr 28, 1801.

"The Stock Exchange Office is opened at No. 22 Wall Street for the accommodation of the dealers in Stock, and in which Public Sales will be held at noon as usual in rotation by A. L. Bleecker & Sons, J. Pintard, McEvers & Barclay, Cortlandt & Ferrers, and Jay & Sutton."—Diary, F 15, 1792. This is the earliest mention of any attempt at organized dealings in stocks in this city. It indicates that the auctioneers had endeavoured to establish a public stock market by holding daily sales under a joint arrangement.—Eames, The New York Stock Exchange (1894), 13.

But see Mr 21.

The first issue of The Diary or, London's Register, published by Samuel Loudon and his son, Samuel, Jr., appears. Loudon began to publish The Packet, Jan. 4, 1776 (q.v.), which he has now discontinued (see J a 26) in favour of this daily sheet.—Early Newspapers, II: 442; Brigham, A. A. S. Proc. (1917), 407, 475. For a sketch of Loudon's life and work, see N. Y. H. S. Quar. Bull., Oct, 1874.

"The Committee for superintending the printing & burning the Notes issued for small Change (see F 26 and Ag 10, 1790; Mr 11, 1791) reported that they had examined & burnt the following viz:—

13000 of 1st each. . . . . . . . . £54:3:4
15000 of 2nd each. . . . . . . . . 1257:—
16000 of 3rd each. . . . . . . . . 200—

A petition of Charles Ward Apthorp and others, asking the common council to "continue the Bloomingdale Road to Morris's House," is referred to the road committee.—M. C. C. (1784-1831), I: 698. On March 12, a petition opposing this was submitted by land-owners in Harlem, and referred to the same committee.—Ibod., I: 701. See O 22.

Moses Rogers and John Titus submit a proposal to the common council to "erect one or more Mills on Haerlem Creek at Kings Bridge." Referred to committee.—M. C. C. (1784-1831), I: 698.

The legislature passes "An Act to increase the Number of Fire-Men within the City of New-York." On account of the extent of the city of New-York, 150 firemen are to be added, if necessary, to the 300 already allowed.—Laws of N. Y. (1792), chap. 9. See also Mr 18, 1797.

The legislature passes an act to enable New York City to raise money by a tax for various objects, including $2,400 for "compleating the improvements at the battery, and about the government house, and making improvements in front of the gable, alms house and bridgewater."—Laws of N. Y. (1792), chap. 10 (Greenleaf, II: 388). See May 18.

A meeting to nominate John Jay for governor is held at Corre's Hotel, 69 Broadway.—N. Y. Jour. & Pol. Reg., F 18, 27, 1792.

Congress passes "An Act to establish the Post-Office and Post- Roads within the United States." This makes and localizes various post roads throughout the country, provides for a general post-office at the seat of government, gives the powers and duties of the postmaster-general and his assistants, fixes the rates of postage, and orders penalties for infringement of the law.—Acts of Congress (1792), chap. 7.

That pleasant and much-admired seat at Harlem heights, Mar, formerly the property of the Hon. Roger Morris" (see N. Y. J. 1795), is offered for sale by Anthony L. Bleecker (see F 1). It is described in the advertisement as "distant 10 miles from New York, containing about 130 acres of good arable pasture and meadow land, including 5 acres of best salt meadow. The land... extends across the Island from river to river, and from the advantage of a communication by water on either side, and the easy transportation of manure from the city may be brought to any state of improvement required." As the residence (which was built in 1765) is the only one still standing on Manhattan Island which has survived practically intact, from so early a period, the description of it, as presented in this old advertisement, is given below in full:

"On the premises is a large Dwelling House, built in the modern style, with taste and elegance: It has in front a portico, supported by pillars, embellished and adorned in chaste and elegant taste, at the centre; a spacious dining room on the right, with an alcove, closets, and a convenient pantry and store room adjoining, and beyond these, a light easy mahogany stair case. On the left is a handsome parlour, and a large back room, particularly adapted and fitted for a nursery. A passage from the rear of the hall leads to an oblong octagon room, about 32 feet by 22, with six sash windows, making very airy apartments, and on the second floor are seven bed chambers, four with fire places and marble hearths; and a large hall communicating with a gallery under the portico, and from which there is a most inviting prospect. On the upper floor are five lodging rooms, three of which have fire places, and at the top of the house is affixed an electrical conductor. Underneath the building are a large commodious kitchen and laundry, a wine cellar, store room, kitchen pantry, sleeping apartments for servants, and a most complete dairy room, the floor a solid flat rock, and with which common attention to cleanliness cannot fail to render the place constantly cool and sweet.

"There are also on the premises a large barn, and most excellent coach house and stables. The buildings have been rather neglected of late, and will want some repair, but are in some other respects substantially firm, sound and good.

"The house has a southern prospect, and being situated on rising ground at the narrowest part of York island commands an extended view of the Hudson and the opposite range of lofty perpendicular rocky cliffs that bound its western shore, of the east river, Harlem river, Hellgate, the sound many miles to the eastward, and the shipping that are constantly passing and repassing those waters. In front is seen the city of New York, and the high hills on Staten Island, distant more than 20 miles. To the left, Long Island, Westchester, Morrisania, and the village of Haerlem, with its beautiful level, cultivated surrounding fields, exhibit a variety of the most picturesque and pleasing views; in short, Haerlem Heights, affords perhaps a prospect as extensive varied and delightful as any to be met with in the United States; and considering its healthy, desirable situation, the ample accommodation of the buildings, its proper distance from town, the excellent road that leads to it, and the many other attendant advantages cannot fail to strike the absent beholder as an eligible retreat for a gentle- man fond of rural amusements and employment, and who wishes to pass the summer months with pleasure and comfort."—Daily Adv., Mr 2, 1792. See also Pl. 167-a, Vol. III. The place was sold on Oct. 25, 1793 (q.v.).

The directors of the "Tammanial Tontine" resolve "That all shares... on which the second payment is not made by the 1st day of April next... be forfeited to the association."—Daily Adv., Mr 8, 1792. An elaborate prospectus, entitled The Plan of the New York Tammanial Association, was pub-
lished in this year. The Association, though auspiciously inaugurated, failed at this time, and a Tammany Hall was not built until 1811—Kilroe, 189-91.

12 The common council orders that a "recommendation" from the board to the inhabitants, "to clear the Ice out of the Kennedys in the Streets that the side Walks may not be overflowed," be published in the newspapers.—M. C. C. (1784-1831), I: 700.

John Watts, in behalf of the committee of merchants superintending the erection of the Tontine Coffee House, on the north-west corner of Wall and Water Sts., petitioned the common council for permission "to add to the said Building a Piazza to extend over the front Wall, in the Street," "Referred to in street committee."—M. C. C. (1784-1831), I: 701. On May 11, the board agreed to the committee report that the prayer of the petitioners should be granted, "so far as to allow them to erect a Piazza to the said Building of six feet in breadth along Wall Street."—Ibid., I: 715. See also L.M.R.K., III: 891, and PL 69, Vol. I. See, further, Mr 12.

There is read to the common council a letter from Hon. John Jay, submitting to the Board the Power of laying out & regulating Streets through his Land on Great George Street in such manner as they shall judge to be for the public convenience, and also offering, if the board shall think it expedient "to make a Canal from the fresh Water Pond to the North River, to release as much of his Land as may be required for that purpose and for Streets." Referred to the street committee.—M. C. C. (1784-1831), I: 701. This appears to be the original suggestion which eventually materialized in the making of Canal St. For the next records pertaining to the subject, see F 15 and 22, Mr 14, and S 26, 1796. See also of PL 83-3, III: 560.

The improvements at the Battery being incomplete, the common council orders that the committee in charge report to the board what further improvements are necessary.—M. C. C. (1784-1831), I: 701. On May 25, the order was renewed.—Ibid., I: 719. On June 11, Ald. Stoughton made a verbal report on the subject, and the board directed that the committee "take order for making the said Improvements & Repairs accordingly."—Ibid., I: 721.

"A Petition from the Neighborhood of the Oswego Market for permission to extend the Roof of that Building over the side Walk in Maiden Lane to accommodate the Country People" is granted by the common council.—M. C. C. (1784-1831), I: 702. For its situation (second site), see L. M. R. K., III: 959.

14 The legislature passes "An Act to incorporate the Society of Mechanics and Traders of the City of New York, for charitable Purposes." The incorporation is to run to April (first Monday), 1818.—Laws of N. Y., chap. 141, (1817). According to the following advertisement, the building on the land purchased by the Tontine Ausn., on the north side of Wall St. running west from Wall St., were torn down soon after their purchase (see summary under D 1, 791): "For sale, The materials of the three houses at the corner of Wall and Water Street, on the ground where the Tontine Coffee- house is to be erected. The purchaser to break down and remove the buildings, for which purpose fifteen days will be allowed; applications to David Grinn. If not disposed of at private sale by Monday the 24th inst. then to be sold at auction."—Daily Adv., Ap 13, 1792.

Samuel Green, of 15 Water St., exhibits a fire-escape which he calls "the Patent Machine for preventing persons and effects from houses when on fire."—Daily Adv., Ap 7, 1792.

It is ordered by Trinity revery "that Mr Robert Watts, Doctor [Wm.] Samuel Johnson, Mr [Robert C] Livingston, Mr [Hugh] Gaine and Mr [Theophylact] Bache be a Committee to confer with Mr Stuyvesant upon his Proposal for building a Church [St. Mark's] upon his Land."—Trin. Min. (MS.). See JI 8, 1793.

The board ordered to make a survey of the Cross street lying between the streets of N. and T. to be named "the cross-corner."—Daily Adv., Apr 8, 1792.

No amputation is permitted in the alms-house without consent of the commissioners. A record of this date shows this to be one of the "Standing rules." Permission is given by the commissioners, in case of a negro lad," "landed from on board a Portuguees Vessel now in our port," with his feet "frozen off," for the "Amputation of both his legs."—Minutes of the Commissioners of the Alms House and Benevolent Institution, 1797 (MS.). 22.

The legislature passes "An Act to regulate the Practice of Physic and Surgery, within the City and County of New-York."—Laws of N. Y. (1792), chap. 37 (Greenleaf, II: 425). This act was superseded on March 23, 1797, by "An Act to regulate the Practice of Physic and Surgery in this State."—Ibid. (1792), Mar. chap. 45 (Webster, III: 265).

The New York City branch of the Bank of the United States opens at No. 5 Queen (Pearl) Street.—Hardenbrook, Financial N. Y., 141; Daily Adv., Mr 29, 1792.

The heirs of Hendrick Rutgers deliver to the common council a map or survey, and a signed agreement, as "Proprietors of the Ground lying to the South of Cherry Street and North of the East River between Warren & Montgomery Streets in the seventh Ward," that Water St. will "be continued easterly in a direct line through the Ground above mentioned so as to intersect Crown Point Street agreeably to the above Plan;" 45 ft. in width, in "from the intersection of Water Street near Warren St. to Montgomery Street;" also that "Lombard Street" will be continued 45 ft. wide from Warren to Montgomery St. Agreed to and ordered filed.—M. C. C. (1784-1831), I: 704-5.

The common council orders that pavements he laid in parts of Crown, Little Queen, Thames, Great Dock, Little Dock, Front, Moore, and Broad Sts. Improvements were also made in several streets near Chatham Square.—M. C. C. (1784-1831), I: 705-6 715, 741-42.

The legislature authorizes the common council to fill in and raise the tract of land, in the Fifth Ward, called "the Meadows," bounded "northerly by Chatham-street, southerly by the rear of the lots on the northerly side of Cherry-street, westerly by the rear of the lots on the easterly side of Queen-street, and easterly by Catharine-street." Five commissioners are appointed to supervise the work. The act also provides for continuing Roosevelt St. to the East River, and Frankfort St. to Queen St.—Laws of N. Y. (1792), chap. 49 (Greenleaf, II: 447).

A law is passed for "laying out, repairing, and improving certain public Roads and Highways, within this State." This includes the post roads "on the island of New-York."—Laws of N. Y. (1792), chap. 60.

The legislature passes an act "for the better support of the hospital in the city of New York." This authorizes the state treasurer to pay to the society of the hospital "the sum of two thousand pounds annually, for and during the term of five years, to be computed from the first day of February last, which sum . . . shall become chargeable upon the duty laid . . . on sales at vendue."—Laws of N. Y. (1792), chap. 67. This act was repealed on March 31, 1792 (p.r.c.).

By an "Act to encourage Literature, by Donations to Columbia College and to the several Academies in the State," the legislature grants to the trustees of Columbia College, for the use of the institution, £2,500, "for the purpose of enlarging its library." £2000.
THE ICONOGRAPHY OF MANHATTAN ISLAND

On May 25, Benj. S. Judah made such a request concerning a May 7 building he proposed to erect in Little Water St; this also was granted.—Ibid., I: 718. On June 11, likewise, Coles & Underhill petitioned regarding a store they desired to erect "upon the southwardly side of Front Street between Coenties & that old Slip," where the ground was "not sufficiently firm for the said Building to be of Brick." They requested permission "to build the same of Wood except the Front which they wish Brick."—Ibid., I: 723. Other examples appear in the minutes on July 2, Aug. 20, 29, etc.

The building law requiring such inspection of the ground—that of March 24, 1791 (q.v.)—see Laws of N. T. (1791), chap. 46—was superseded by a new act of the same title ("for the more effectual prevention of fires and to regulate buildings in the city of New York"), passed April 8, 1796, which required that building construction should conform to the regulations prescribed in the act, under heavy penalty of failure to comply; but dispensing with inspectors to examine the ground in advance.—Ibid. (1796), chap. 55. See also F 3, 1794.

Because of inconvenience arising from there being more than one street with the same name in the city, the common council orders that the names of two streets laid out on the lands of Hendrick Rutgers, deceased, be changed, viz.—the name of the street running from to Clinton St to Bedlow St to be changed to the name of Bedlow (the present Madison St); and on account of some doubt as to whether the name of the street in the rear of Trinity Church was intended to be Lumber or Lombard, it is ordered that the said street in future be called Lumber (the present Church St.).—M. C. C. (1784-1831), I: 716-17.

David Grinn, in behalf of the Tontine Assn., publishes a notice May 15 which will call for the sale of the metal plate of the New York Tontine Coffee-house (see Mr 20, 1791) for a payment of £15 per share, on account.—Daily Adv., My 15, 1792. On May 29, the next year, he issued a similar notice, "in order to pay the bills, and complete the building." At the same time, he asked for the bills of persons having demands against the association. His address was No. 8 Little Queen (Cedar) St.—Ibid., My 29, 1793. On July 18, 1795, still anxious for building the New-York Tontine Coffee-House, he requested payment of unpaid subscriptions—Ibid., Jl 18, 1795. See, further, Jl 5.

The "Brokers for the Purchase and Sale of Public Stock" sign a written agreement that they "will not buy or sell from this day for any person whatsoever, any kind of Public Stock at a less rate than one-quarter per cent. Commission on the Specie value," and that they will "give a preference to each other" in their negotiations.—Eames, The New York Stock Exchange, 14, citing the earliest record in the possession of the Exchange. See Ja 15, Mr 21.

This agreement among stock brokers established the organization that later developed into the New York Stock Exchange. From 1792 to 1817, the brokers dealt together under various agreements and in various places, the specified places being announced by the buttonwood tree which stood in front of the present dividing line between 68 and 70 Wall St. After the completion of the Tontine Coffee House, in 1793 (q.v.), on the north-west corner of Wall and Water Sts., the brokers for a while met in that building. In 1817, (q.v.) they adopted a constitution under the name of the New York Stock and Exchange Board. They occupied a room in Washington Hall in 1819 (q.v.). When the first Merchants Exchange, at the corner of Wall and Hanover Sts., was completed, in 1827 (q.v.), the business formerly conducted by merchants, brokers, and various commercial bodies, in the Tontine Coffee House, was transferred to the new exchange, and the Coffee House was divided up into shops and offices. The Exchange Board secured a room in the Merchants Exchange at that time.—Ibid., 14-18. See also 1817, 1827, and 1869.

Authorized by the legislature on Feb. 18 (q.v.), the common council orders that £4,000 be raised "for completing Improvements at the Battery & about the Governm't House & making Improvements in front of the Goal Alms House & Bridewell."—M. C. C. (1784-1831), I: 717.

John Youle, proprietor of the "New-York East River Air Furnaces," advertised in the papers that he "has removed from his former residence at Beekman's slip, to nearly opposite his Furnace, at Corlear's Hook, just beyond the ship-yards; where he carries on the Cast Iron Foundery, In all its various branches."—Diary, My 23, 1792.

"Ordered that the Street Committee cause a Survey to be made
of the streets in the Meadow to the end that the Commissioners
name in the Act of the Legislature on that subject [see Ap 6]
may be enabled to judge of the Regulations intended & to proceed
to the Business. An ordinance is passed for the new paving of these
streets, according to the regulations reported.—'M. C. C. (1784–

The common council approves a report of the street committee
for regulating Frankfort, Jacob, and Ferry Sts.; Gold St. from
Beekman to Frankfort St; William and King George Sts. from
Beekman to Thomas St.; Gold St. from Beekman to John St.;
Cliff St. from Beekman to Golden Hill; and Fair St. from Gold to
Clausen St. An ordinance is passed for the new paving of these
streets, according to the regulations reported.—'M. C. C. (1784–
1811), I: 720. See, further, S 3.

"Vaux Hall," at the lower end of Warren St., is again offered
for sale (see D 30, 1784). "The lot is 120 feet front on Warren
street, has 15 fire places . . . The stable is 35 feet in front, on
Chambers street, and 21 feet deep." This and a building in the
rear were built two years ago.—N. T. Jour. & Pat. Regy, My 29,
1792. A similar advertisement appeared again on Feb. 8, 1794.
The price was £3,200.—Daily Adv., F 8, 1794. See also "Vauhall

"A Petition from a number of the inhabitants in the vicinity
of the Exchange praying that, Building may be removed" is
referred by the common council to the ensuing meeting of the
M. C. C. (June 26). On Oct. 20, the committee have not come
to a decision; whereupon, the board proceeded to consider the
expediency of taking down the building, but voted against it.—
Ibid., I: 736.

Nicholas Deane announces that he "has just established,
though at a great expense and under M. Boucher's directions,
a new Orleans House, has fitted up, one of which Baths may be had
with either fresh, salt, or warm Water . . . The said place is at his house called Bellevue,
2

The corner-stone of "the New York Tontine Coffee House"
is laid at the north-west corner of Wall and Water Sts. John
Broome, a director of the Tontine Committee, formed the
members of the board to constitute the funds for the laying
of money in the hands of Messrs. Moore and Robinson, the master
builders, for the purpose of regulating the workmen in different stages
of the building. The committee and gentlemen present then
referred to Mrs. Bradford's where they partook of an elegant

The corner-stone of "the New York Tontine Coffee House"
is laid at the north-west corner of Wall and Water Sts. John
Broome, a director of the Tontine Committee, formed the
members of the board to constitute the funds for the laying
of money in the hands of Messrs. Moore and Robinson, the master
builders, for the purpose of regulating the workmen in different stages
of the building. The committee and gentlemen present then
referred to Mrs. Bradford's where they partook of an elegant

_Gom. Coun._ (1833), 452, that it was built "many years before the common council ordain'd," is incorrect.

The common council permits the "St. Cecilia Society" to use the common council chamber on Saturday evenings.—_M. C. C._ (1784-1831), I: 725.

26

The managers of the city dispensary, having received from Europe four sets of apparatus for renunciation the apparently deadly from drowning, asphyxiation, etc. place them in private dwelling houses in different parts of town, "where they will be delivered to any reputable house-keeper, who shall take the trouble to call for them in case of accident."—_Daily Adv., Je 26, 1792.

July

1

A "tremendous westerly tornado" strikes New York and causes considerable damage to houses and trees. It was reported that 29 persons lost their lives in this neighbourhood, principally by the over-turning of boats.—_N. Y. Jour._, I 4, 1792. A large folio broadside, printed in four columns, with cuts of 20 coffins at the top, and two sailing vessels at the sides, was published this year in New York, the text being, in part, as follows: "A True and Particular Narrative of the Late Tremendous Tornado, or Hurricane, At Philadelphia and New York, on Sabbath-Day, July 1, 1792. When several pleasure boats were lost in the Harbor. [Here follows an account of the disaster.] Tell this not in Massachusetts, publish it not in the Streets of Connecticut, lest their sober minded young men and Maidens should bitterly reproach thee in the Day of thy calamity ..." A copy of this scarce broadside was sold with the Sturge library at The Anderson Galleries, Nov. 20, 1922. Evans mentions a Boston edition. See also _Nuggets of Am. History_, described in catalogue pub. by the American Antiquarian Society on New York books, Nov. 19, and Nov. 29, 1894.

4

The Portrait of Mr. Hamilton, Secretary of the Treasury of the United States, painted for the Citizens of New-York by Mr. Trumbull, has been received, and for the present, placed in the City Hall ... this elegant specimen of Mr. Trumbull's abilities, is reckoned one of the finest productions of his pencil."—_Daily Adv.,_ Je 4, 1792.

The common council orders "that the Battery Committee take down the Barracks & use the Materials on the Improvements making there."—_M. C. C._ (1784-1831), I: 730. See "Lower Barracks" in L. M. R. K., III: 923. See also descrip. of Pl. 56, I: 419.

Trinity vestry orders "that the Bell Intended for the Steeple of Trinity Church, which was not made Use of, be sold."—_Trin. Min._ (M.S.).

A committee, "appointed at a meeting of the Friends of Liberty," attended by "a very great and respectable concourse of citizens, on horseback and in carriages," proceeds to Harlows Heights, where they meet Chief-Justice Jay, on his return from the eastern circuit, and escort him into town. "When the procession arrived at the two-mile stone, they were received by loud huzzas from the multitude of citizens on foot assembled at that place. As they approached the town, at the head of Chatham street a federal salute was fired and a painting exhibited, on which was written, 'John Jay, Governor by the Voice of the People.'

"The procession moved through Queen, Wall, Broad, Beaver streets, and Broadway, to Mr. Jay's house, amidst repeated huzzas and plaudits from his fellow citizens. At his own door he was conducted into his house by the Committee, where he was affectionately received by his family and friends. Before he entered his house, he attempted to say something on the occasion expressive of his feelings, and to make an acknowledgment for the partiality shown him, but the loud and repeated plaudits of the people prevented his being heard.

"In several conspicuous places flags were displayed; a salute was fired at the Battery, and the bells were rung in all the Churches in the city."—_Daily Adv._, Je 11, 1792.

13

A committee of New York citizens (Nicholas Cruger, chairman), in an address, congratulates Chief Justice Jay on his attitude toward the irregular canvass of votes in the recent election of governor, saying in part: "... Whether they [the friends of liberty] esteem him would conduct as a Member of the General Congress at the most trying periods of the late war, and of the Convention which framed the Constitution of this State, or consider your agency in negotiating the treaty which secured to America the blessings of peace, liberty and safety—they find a continued display of abilities and virtue which will band your name down to remote posterity as one of the illustrious defenders of the rights of Man."—_Corresp. and Pub. Papers of John Jay_, III: 441.

In his reply, Jay said in part: "... Such is our Constitution, and such is the progress of our order and good government, with which we are blessed, that, while our citizens remain virtuous, free, and enlightened, few political evils can occur, for which remedies perfectly effectual, and yet perfectly consistent with general tranquillity, cannot be found and applied ..."—_Ibid.,_ III: 443. See also Je 13.

July

19

"More than 200 "Friends to Liberty in this city" give an "elegant entertainment at the City Tavern" to John Jay. It is called a "feast of Freedom and Friendship." A band played at intervals during the dinner, and 15 toasts "were drank under a discharge of cannon, accompanied by the shouts and huzzas of the people." When Mr. Jay retired, he was accompanied home by a committee. "After Mr. Jay had retired the company drank, [to the toast] 'John Jay, Governor by the Voice of the People—Three Cheers.' When the committee returned, the whole company broke up, and went in procession to Mr. Jay's house; and after giving him Three Cheers, they dispersed."—_Daily Adv.,_ Je 20, 1792.

Samuel Jones is paid $451.10 "for Costs in several Ejecutio. Suits for the recovery of Lands in the rear of the Bridewell."—_M. C. C._ (1784-1831), I: 732.

The common council orders "that the Street Committee take order for improving the Ground commonly called the Fields in the front of the Alms House Goal & Bridewell."—_M. C. C._ (1784-1831), I: 733. This was the present City Hall Park. Payments for this work were as follows: In 1793, Sa 29, $100; $2, $100; $30, $100; D 30, $100.—_Ibid._, II, 57, 39, 38, 57. In 1794, F 3, $100; $214, $100; I 4, $500; A 5, $250; I 5, $500; S 5, $100; A 15, $100.—_Ibid._, II, 57, 39, 38, 57.

The common council orders that the committee on improvements at the Battery "appropriate such of the buildings of the barracks as may be necessary for the erection of a Watch house at the City Hall," and report a plan for the building.—_M. C. C._ (1784-1831), I: 733. The watch-house was erected at the s. e. cor. of Wall St., on the site of No. 1 Bread Street.—See L. M. R. K., III: 973. See also descrip. of Pl. 56, I: 419. See Je 3, 1793 (p.v.).

The common council appoints a committee to direct the making of "a Copper Pump for drawing Water out of the River in Cases of fire and thereby preventing the disagreeable necessity of the Inhabitants going down into the Slips & handling the Water up in Buckets."—_M. C. C._ (1784-1831), I: 733-34. On Jan. 28, 1793, it was ordered that this pump "be deposited in the Engine House in the Rear of the City Hall." At the same time, James Kip and his son Richard were appointed firemen and given the management of this pump (ibid., I: 767), and Wm. J. Elsworth was paid $2712.16 for it (ibid., I: 768).

The common council appoints Adb. Van Zandt a committee "to locate about twenty Acres of the Common Lands to be reserved as a Statue to the memory of Mr. Van Zandt, and purchase materials to fence it."—_M. C. C._ (1784-1831), I: 734. See O 22. Lafayette takes refuge with the Austrians. They held him Aug. prisoner for five years.—_Guizot, Hist. of France._

"The Tenth of August" in Paris marks the downfall of the monarchy.—_Guizot._

Ald. Stuontburgh, of the committee on improvements at the Battery, produces "a Plan of the Ground with a Sketch of the manner in which the Committee contemplated to fence in the said Ground." It is approved by the board.—_M. C. C._ (1784-1831), I: 739. See also descrip. of Pl. 56, I: 419.

A committee of the common council having investigated the title of Joseph Smith to the house and ground at the Battery of Christopher Blundell, deceased, who received letters patent from the late Gov. Clinton, and had a good title for 99 years from 1792, it is ordered that the committee "conclude a bargain" with Mr. Smith, whose lowest price is $750.—_M. C. C._ (1784-1831), I: 739-739. The purchase is intended to help complete the Battery improvements. On Sept. 10, a bond was given to Smith for the payment of his price by May 1.—_Ibid._, I: 744. See also descrip. of Pl. 56, I: 419; L. M. R. K., III: 948, 949.

In France, from Sept. 2 to 9, the Jacobins broke open the Sep. prisons, and massacred about 1,200 adherents of the aristocracy, principally Royalists and Constitutionalists, including 100 priests.

_Haydn, Dict. of Dates_, 384.

The street committee reports to the common council that, in
obedience to the order of May 25 (q. m.), they have caused surveys to be made for the regulation of the several Streets in the Mead- 
gows. These are approved by the Board, and the specifications entered in full in the Minutes, as usual, for the regulation of Roosevelt, St. James, Chatham, Fayette, Oliver, Catharine, Bancroft, and Rutgers Sts., and Batavia Lane. See O 2.

The Board then passed an "Ordinance for the filling in with Earth and raising the Lots of Ground and Streets in the Tract of Land known as the Meadows, in pursuance of the Statute passed the 6th April 1791."—M. C. C. (1784-1813), 1: 741-43. The commissioners named in the act of April 6 did not act promptly, and, on Oct. 2, the common council requested that they proceed. —Ibid., 1: 748. On March 6, 1793, however, a new regulation of these streets was substituted.—Ibid., 1: 774-76.

The Lutheran Church council, having been informed that Mr. [David] Grim our Treasurer would wish to hire the Old Church in Broadway for a Store," appoints a committee "to Let the above mentioned Church to Mr. Grim for one year at £28 pr. Annun. —Lutheran Min. (M.S.). Grim's lease of the church was renewed on Sept. 3, 1793, at the rate of 51/2", 'he to keep the same in repair." —Ibid. See also Vol. I, p. 450. See, further, Js 5, 1795.

The common council directs that the committee on repairs to public buildings "take order for the sinking of two Cisterns to receive the Rain Water from the City Hall."—M. C. C. (1784- 
1813), 1: 745. See, further, IJ 22, 1793.

The common council orders that the treasurer, in making purchases of oil for the public lamps, give preference to the manufacturers of spermaceti:—M. C. C. (1784-1813), 1: 745.

The New York Directory and Register" for 1794 is just published, and is advertised for sale at 3 shillings 6 pence. It contains an "accurate plan of this City and part of Long Island."—Diary, S 13, 1793.

The first consecration of a bishop in America occurs in Trinity Church, when the Rev. Dr. Claggett is made bishop of Maryland.—N. Y. Mag. (1792) 557.

By vote of the national convention, monarchy is abolished in France and a republican declared.—Anderson, Doc. op. cit. 129.

The common council passes an ordinance for filling in "Copseic" (State) St.—M. C. C. (1784-1813), 1: 746. See, further, D 28, and 29, 1793.

The common council approves a regulation proposed by the street committee for "the Street newly laid out on the wysterly side of the Gov't House" (State St.)—M. C. C. (1784-1813), 1: 747.

The common council receives a letter from Abijah Hammond informing them that, at his own expense, he has imported from Boston "the boring Apparatus for sinking Wells in any place and obtaining the Water of the best quality," and requesting the board to accept it for the benefit of the inhabitants. It is ordered that the mayor inform Mr. Hammond of the board's acceptance and thanks. It is also ordered that, as an experiment, a well be sunk on the lot adjoining the city hall.—M. C. C. (1784-1813), 1: 750. Mr. Hammond's letter is preserved in metal file No. 15, city clerk's record-room.

Painting and Drawing.

"At the Columbia Academy, No. 89, William-street, New-York. Archibald Robertson,

"Duly and sensibly impressed by the encouragement the citii- 
zens of New-York have bestowed upon his endeavours to establish an academy for the arts of painting and drawing in this city, begs leave to acquaint the public, that his brother Mr. Alexander Robertson, has lately arrived from the royal academy of painting in London, where he has been under the tuition of the most cele- 
brated artists. They therefore, by joint and unwearied attention to their pupils, hope to merit a continuation of that encouragement, which Archibald Robertson has in previous instances experienced, and the public may depend that no pains or expense will be spared to make their academy useful to the citizens of this state, and to the United States in general.

"They will continue to paint portraits and miniatures, make draughts of all kinds, from nature, designs for engraving, &c.

"At their academy instruct Ladies and Gentlemen in the arts of designing and drawing (in India ink, water colours, chalks, &c.) of heads, figures, landscapes, flowers, patterns, architecture, and perspective.

"Classes for Ladies and Gentlemen as usual.

"Ladies and Gentlemen who find it inconvenient to attend the public classes, will be waited upon.

"An evening class is opened for Gentlemen, on Tuesdays, Thursdays, and Saturdays."—Daily Advertiser, O 8, 1793. See 2 and 11, and also Letters and Papers of A. Robertson, ed. by Emily Robertson (London, 1893). See, further, O 8, 1793.

The "3d century of the discovery of America (alias Columbia)" is celebrated by the "Tammony Society or Columbia Order." In the evening a monument "upwards of 14 feet in height, being well illuminated, and resembling black marble," is erected in the "great Wigwam" in memory of Columbus. The obelisk is adorned with scenes representing important events in the discoverer's life and with suitable inscriptions. An "elegant oration" is delivered by J. B. Johnstone, toasts are drunk, and patriotic songs are sung.—N. Y. Jour., S 29, O 13 and 17, 1792; Diary, O 19, 1792. See also Columbian Celebration of 1793, an address before the N. Y. H. S., O 4, 1792, by Edward F. De Lancey; Celebrations 100 Years Ago: The Tammony Society's Illuminated Monuments, by Dr. Geo. H. Moore, in N. Y. Times, Ag 4, 1889; Mag. Am. Hist. (May 1893), 1-20. The monument was placed in the Tammony Museum after the celebration.—Columbian Gaz., O 14, 1793, O 12, 1794; Am. Minerva, O 11, 1794. This celebration had been planned as early as April 6, 1791 (q. v.).

On the 31st March, 1790 (q. v.), an act was passed by the Legislature of this state, authorizing Lewis Morris, or his assigns, to build a bridge across the Haverstraw Mill, and for the term of sixty years, to receive certain tolls therein specified, as an equivalent for the expense attending the same. General Morris, anxious to give as immediate effect to an act as possible, which promises such public utility, proposes to the public the following plan:—The sum of £4000 to be raised by a tontine subscription, which it is thought will be amply sufficient to carry into execution this highly useful public undertaking. The survey of the river has been made, and an estimate of the expenses attending the building of the bridge by the celebrated Stone, who computes that a sum less than the above will be enough. . . . The tontine is to consist of 106 shares of £10 each, which six shares over and above the requisite number, the proprietor proposes reserving to himself, without contribution to the building . . .—Daily Advertiser, O 12, 1792. See Mr. 24, 1795.

The corner-stone of the White House at Washington is laid.—Gaz. of U. S., O 20, 1792; N. Y. Jour., O 24, 1792. See Mr 20, 1793.

The street committee having procured "a quantity of Post & Rails for the purpose of enclosing the Pasture in the Common Lands for the Cows of the Alms House" (see Jl 30), proposes that this use be made for the present to enclose the fields in front of the Alms House to protect the Trees intended to be planted there this Fall." It is ordered that the street committee take order for enclosing the fields accordingly.—M. C. C. (1784-1813), 1: 754. See also N 5, 1792; My 31, 1834.

The common council orders that the street committee "cause a Survey to be made of the Road contemplated to run from the Blooming Dale Road to the Heights of Harlem," and report.—M. C. C. (1784-1813), 1: 754. This seems to be in approval of the Apthorpe petition of Feb. 17 (q. v.). See, further, My 14, 1793; IJ 13, 1795.

The common council orders that the commissioners of the alms- 
house be authorized "to pull down the old Stable and to build another (using the Materials of the old as far as they will go) on such part of the Bredwell Ground as they shall judge expedient."—M. C. C. (1784-1813), 1: 756. For the new stable at the alms- 
house, see S 29, 1795.

Payments made during this year, to Alderman Stoutenburgh or Mr. Carmer, toward the improvements at the Battery and government house, have been as follows: March 12, £515:17:4; June 25, £209:15:6; Sep 10, £509:10:0; Oct 10, £609:10:0; Nov 17, £415:17:4; M. C. C. (1784-1813), 1: 701, 702, 703, 745, 754. This makes a total general expense, since the beginning of this work, of £6,051:17:4.—See D 12, 1791; D 16, 1793.

The legislature convenes. Petitions pour in from all parts of the state on the subject of the canvass of the votes for governor in the preceding May and June (see Jt 13). "A tedious investigation ensued, and it was soon discovered that in the lower House the
THE ICONOGRAPHY OF MANHATTAN ISLAND

1792 anti-federal party had a small majority." Their votes cleared the Nov. election canvassers of the charge of improper conduct. "This re- sult . . . was received by the people without surprise, but with a feeling of disgust that, at the next election, prostrated the party [the anti-federalists] by whom it had been effected."—Life of John Jay, by his son, William J. (1833), i. 204.

7. A proposed sale by private contract of the "Square on which the City Tavern stands" is announced. "This is one of the most desirable situations in this city, and may be improved to very great advantage. Its dimensions is one hundred and five feet fronting Broad Way, and about two hundred feet deep, bounded by a street on every side."—Daily Adv., Nov. 7, 1792. No suitable offer having been made for the property, the place was put up at public auction on Jan. 29, 1793.—Ibid, Ja 6, 1793. See also Ja 24, 1793.

12. The common council orders "that an Application be made to the Legislature for a Law to raise the Sum of $1,5000 by Tax for the support of the Poor & the other contingent Expenes of this City the ensuing Year & the further Sum of $1,000 for completing the Improvements at the Battery."—M. C. C. (1784-1811), i. 757. No details of an estimate for this budget for 1793 are recorded.

"Of. Ja 6, 1794; Ja 5, 1795; Ja 25, 1796.

17. What appears to have been the forerunner of the modern washing-machine is mentioned as a "Washing Mill" in The Diary, N 17, 1792.

26. The ninth anniversary of the evacuation of the city by the British is celebrated on this day (instead of the 25th, which was by Sunday) by the Tammany Society "in their great wigwam, with that good humour and hilarity, which is so conspicuous in the sons of freedom." One of the toasts at the Tammany dinner was: "May the Duke of Brunswick, in a rapid retreat, want time to grease a flagstaff." In explanation, the editor of the Journal states: "When the British evacuated New York, they were so mortified at striking the English standard at the fort, that in order to save their feelings from further disagreeable sensations, at the sight of the American stripes, they greased the flag staff, hoping by that stratagem, to prevent its being displayed."—N. Y. Jour., D 5, 1792. See N 25, 1783.

29. Wynant Van Zandt's account for making a well in Broad St. near the city hall, endorsed "filed" on this day, shows it cost $115.67. From the original bill, audited, in metal file No. 19, city clerk's record-room.

Dec. 1. A notice, dated Nov. 29, is published, of "a general Hog Hunt throughout this city," to be held on Sat. Dec. 1, at 5 o'clock. "This is the order of the Hunte; it appertrite as to bring with him one large mastiff or other dog . . . . and to attend at the Fly Market, in Water-street, precisely at 5 o'clock. The hunt will proceed down Water street, Little Dock street, &c., scour the ground near the Battery; after which 'tis to return by Great Dock-street, Queen street, up Maiden Lane and Broad Way to the Poor House, and Bridewell; where the hogs are to be deposited for the advantage of the poor and others, criminals or debtors. After this the huntsman will direct the course of the hunt agreeable to his best discretion . . . . "It is thought the sport will be fine and in great plenty, as the Wild Hog is said to abound over most of the ground."—Diary, D 1, 1792. Doubtless the notice was intended as a piece of local pleasantr.

6. Two of the bidwell rooms are to be appropriated by the commissioners "as a Work House [see My 7] for such of the Alms House Inhabitants as they shall from time to time think proper to remove thither." This is done because the almshouse is so crowded that all the paupers cannot be accommodated."—M. C. C. (1784-1811), i. 760. The need of a new and larger almshouse has become evident. See the action taken on Jan. 20, 1793.

10. "Upon the Petition of the Episcopal Church of St Peters Church in the Township of West Chester requesting the Corporation to give them the sounding Board lately removed from the Pulpit in Trinity Church, Ordered . . . and as much of the Iron work belonging to it as they may judge proper."—Trin. Min. (M.S.).

17. The eastern end of John Street was, at this time, still called Golden-Hill Street (see L. M. R. K., III: 190); as appears by a petition which Thomas Pearseal, the proprietor of "the ground fronting to Queen-street and Golden-Hill-street," submitted on this day to the legislature against granting a law "for widening the lower end of this street."—Assemb. Jour., 16th Sess., 66. 17

The accounts for the paving of Ceysey Street (State St.) show 28 that earth from "the old Fort" was used for filling in; and for this an allowance of $50 is made.—M. C. C. (1784-1811), i. 761.

A list of some furniture, etc., purchased for the government house in 1792 is prepared. On March 22, 1791 (n.y.), New York State had appropriated $800 for the purchase of furniture for the government house, and these articles, or many of them, were probably bought with this money. The list reads:

"A List of Articles purchased to furnish the Government House.

1 Large Scotch ingrin Carpet for the Octagon Room.
1 . . . . d0 . . . for the South East adjoining d0
1 . . . . d0 . . . for the South West . . . . d0 . . .
44½ Yards Carpet for Entry, afterwards applied to the
Stairs with 27 Brass Rods . . . .
1 painted Canvas Floor Cloth for the Hall
1 . . . . d0 . . . for the Pantry
1 . . . . d0 . . . for the back Entry
1 Set consisting of 2 large Mahogany dining
Tables with 2 extra Leaves to the Ends .
1 Commode Mahogany Side Board
24 Mahogany Hair Bottom Chairs
2 Large Hair Bottom Sofas
15 Crimson Worsted Moreen Window Curtains
with Tassels Line and Hooks Compleat
2 pair Looking Glasses . . . . 2 pair Brass Andirons
1 pair Geranodles . . . . 2 Brass Fenders
2 pair Branches . . . . 2 pair Tong & Shovels
3 Vace Lamps
N. B. Two of these are
felled down & broke
1 Set petification
1 Chimney Orna-
ments .
2 Patent . . . . in the ceiling giving way
not having been prop-
ably secured

"For the Kitchen.—
1 Smoak Jack & Chain
1 pair Andirons
1 pair Tongs & Shovel
1 Spit Rack
2 Spits & 12 Skewers
3 Chain Tranms .
1 Slitght Bank (f)
2 large Kitchen Tables
1 Step Lether for Cleaning
"New York Every way" Table
"Scot by the Corporation from the City Hall.
24 Crimson Damask Arm Chairs
6 Red Morocco ditto
1 Large Mahogany Writing Table—
[On the second page the following:]
2 Franklin Stoves i fixed in the Office, The other in the small
Room opposite the latter was paid for by G. Clinton if thought
useful will be chargd to the State."

—From contemporary copy of the original (and apparently official, judging from the interlineations), preserved with miscellaneous U. S. MSS., in the N. Y. Hist. Soc.

1793

In this year, Eli Whitney, of Mass., invented the saw gin for
—Annals of N.Y. Act;
Wissor, VIII: 280.

Jefferson's followers in this year began to assume the name of
—Wissor, VII: 268.

The earliest tax-book of the comptroller's office still extant
—The earliest tax-book of the comptroller's office still extant,
contains entries for 1791. It has been deposited for
in the archives of the N. Y. Hist. Soc., together with
the tax-book of 1795-1799.
In this year, the fire department consisted of 20 engines, two hook and ladder companies, 23 locomotives, 13 assistants, and 318 men.—Costello, Our Firemen, 56.

C. W. Janson, writing of his visit to New York at this time, said "I was informed, that a piece of ground in the park, which, seven years ago, was not worth fifty dollars, had been recently disposed of, for the purpose of building upon, for five hundred pounds, or rather a little more than a bill for dinner." The time of my arrival in New York was during the reign of terror in France; the baleful consequences of which were severely felt in America..."—The Stranger in Am., (1807), 93. See F. 1.

Soon after this date, Charles Balthazar Julien Féret de St. Ménin came to New York. Under the patronage of John R. Livingston, he developed his great reputation in art. He introduced, with some improvements, the engraving of portraits by means of the "physionotrace," a machine designed exactly to reproduce on a reduced scale the human profile. These portraits became very popular, and he travelled from North to South, producing about 800 of these small plates. Other than these portraits, St. Ménin made views of the remarkable places he visited, including a view of New York from Long Island (Pl. 61, Vol. 1), a view of the city and harbour from Mt. Pitt (Pl. 62, Vol. 1), a drawing of the "Clermont" on the Hudson (Pl. 78, Vol. 1), and a panoramic view of New York from Brooklyn Heights (Pl. 80-a, Vol. III).

Guigard, Notice historique sur la vie et les travaux de M. F. de St. Ménin (rare brochure in N. Y. P. L.); descript. of Pl. 62, I., 440-441; also Staulfer, Am. Engravers on Copper and Steel, I. 237; II. 1531, Pl. 56, Vol. I. See, further, 1804.

From this time until 1803, John Roberts was working in New York. He was the engraver of the so-called Taylor-Roberts plan of New York City (see Pl. 64, Vol. I). He was a versatile genius, being equally skilled in miniature painting, engraving, music, and mechanics.—Dunlap, Hist. of Art, in Design, II.: 115-117; Staulfer, Am. Engravers on Copper and Steel, I. 237. A list of his engravings is printed in ibid., II. 440-441.

John Scales, an engraver of portraits and subject plates, was continuously in New York from 1793 to 1844. He worked both fine and stipple, but with indifferent success. He engraved many of the views appearing in the N. T. Magazine in 1793-96. At times Scales united booksealing with engraving, according to the directories.—Staulfer, Am. Engravers on Copper and Steel, I. 242. There is a long list of his engravings in ibid., II.: 459-71, and more are mentioned in Fielding, Am. Engravers on Copper and Steel, 232-38. Three of his views, St. Paul's Church, the Government House, and Belvedere House, are reproduced as Pls. 54-b, 55-b, and 60-a, Vol. I.

In this year, Walter Robertson, a painter of miniatures and oil portraits, arrived in New York from Dublin. He painted a miniature of Washington and copied several portraits by Stuart.—Dunlap, Hist. of Art, in Design, II.: 118.

The original bills for services performed by Casimir Th. Goeckel, Evert Bancker, and John McComb, respectively, the city surveyors, for various periods from 1786 to 1793, are at present filed in metal file No. 12, city clerk's record-room.

In this year an assessment was made for opening Roosevelt St., and continuing it to the river.—Index to Assessment Rolls, Vol. I, in comptroller's office.

A view of government house from the west, as it appeared at this time, is reproduced and described in Vol. I, Pl. 55-b. John Burd begins the publication of the Evening Mercury. This was a quarto paper, issued every week-day morning, immediately after four o'clock. The last issue located is that of Jan. 3, 1793—Brigham, A. A. S. Proc. (1917), 409.

At a meeting of subscribers to the Tontine Coffee House, held at the coffee-house, a resolution is adopted "That as the sum subscribed for building the Tontine Coffee-House, in consequence of the advanced prices of materials and labour, has proved insufficient to complete the same, that the committee appointed to superintend that building be authorized to collect from the subscribers, such further sums as may be requisite to finish the building in a neat and economical manner..." It is also resolved that the "standing furniture required for the Coffee House" shall be supplied at the tenant's own expense (see Ja. 9), at a cost not exceeding $2,000.—Daily Ady, Ja. 23, 1793.

The committee of the Tontine Coffee House publish a notice, signed by David Grim, that the subscribers have authorized the committee to let the building from the first of May to a person "qualified to keep it in a manner satisfactory to the public." Applications must be made before Jan. 25. The committee announces that no subscriber shall be permitted to hold more than four shares of stock.—Daily Ady, Ja. 9, 1793. See Ap. 2.

Louis XVI of France is executed.—Weekly Museum, Mr. 23, 1793. See also a broadside entitled "Massacre of the French King" in Emmet collection, N. Y. P. L.

The City Tavern (at 115 Broadway) is offered for sale. The property is described as 100 ft. in front on Broadway, and 150 ft. in length.—Daily Ady, Jan. 24, 1793. A summary of events connected with changes later made in this property is as follows: On March 23, 1793, John Peter De Lancey and wife, for the sum of $6,000, conveyed the old City Tavern to nine gentlemen in trust for the subscribers of the "N. Y. Tontine Hotel and Assembly Room."—Liber Deeds, XLI: 233; Bayles, Old Taverns, 371.

In November of this same year, Nicholas Cruger, chairman of the committee in charge of the work, offered a premium of twenty guineas for the best plan of a new building to be erected here.—Daily Ady, N. 25, 1793. Work on the new hotel proceeded slowly. In May, 1795, James Wilson, out of regard for his "reputation as an architect," published a statement to the effect that the plan on which the Hotel and Public Rooms, in Broadway is now building—was not his (see My 19, 1795). Although we find no adverse criticism of the new hotel in the newspapers of the period, it is evident that such criticism existed.—See Daily Ady, My 20, 1795.

The architect was evidently Wilson.

See the first reference found to the opening of the hotel is on Feb. 22, 1797 (q. v.), when a ball was given in the assembly-room of the new tavern. The statement made in Vol. I, p. 450, that the hotel was erected in 1792 is therefore an error.

Apparently, under its early management the hotel was not a financial success; for, on Feb. 6, 1800 (q. v.), the premises, occupying the entire block on Broadway between Thames and Cedar Sts., were advertised for sale. Mr. Weeks, a builder, was the purchaser, paying only $4,000 for a building which cost over $100,000 in its unfinished state.—See N. 20, 1801.

John Lovett, formerly proprietor of the hotel at 69 Broadway (Daily Ady, N. 13, 1799), announced the opening of the City Hotel under his management in the spring of 1801.—See Je. 15, 1802 (q. v.). He remained until the spring of 1807, when Dusseauais took the building, and altered the building somewhat; and, in 1838, Gardner and Packer undertook the management, hoping to "revive its former reputation." For a view of the City Hotel as it appeared at that time, see Pl. 125, Vol. III, and description. See also descript. of Pl. 56, III: 421.

John Jacob Astor bought the premises on May 28, 1828 (q. v.). The hotel was demolished in the spring of 1849, and a block of shops was erected on the site.—N. Y. Com. Ady, Ap. 27, 1849; L. M. R. K., III: 977. For view, see frontispiece of city directory of 1796.

The common council orders that the committee on improvements at the Battery "cause an Iron Rail to be put on the circular Breast Work in the Street in front of the Government House."—M. C. C. (1784-1813), I: 767. See also descript. of Pl. 55-b, II: 417.

The French Republic declares war on England.—Anderson, Doc., op. cit., 148-51. The war lasted until Mr. 27, 1802 (q. v.). On petition by the firemen of engine No. 4, the common council orders "that the said Engine be removed from the City Hall to the English House provided in front of the Theatre in John Street."—M. C. C. (1784-1813), I: 769.

A published notice informs the public that "Proposals will be received "till the 1st day of March next, for raising the tower, and erecting the Steeple for the New Brick Church in this city" (see F. 25, 1766).—Daily Ady, E. 5, 1793. See Mr. 14. The church, after the steeple had been added, is shown on Pl. 72-a, Vol. I.

The trustees of the First Presbyterian Church order that the committee of repairs "be directed to furnish the Gallery of the New [Brick] Church with a sufficient Number of Candle-sticks."—Proceedings of the Trustees (MS.), Vol. II.

Gerardus Hardenbrook, Jr. offers for sale "that excellent Spring called the Tea Water-Pump, which has for many years supplied the city, and the shipping in the harbor, together with two Houses a Stable and three large Lots of Ground—a Lot of Ground..."
THE ICONOGRAPHY OF MANHATTAN ISLAND

at the corner of Roosevelt and Banker streets; A House and Lot in
F 9 Dyes street."—N. Y. Jour., F 9, 1793. See F 24, 1794.
11 Trinity vestry directs its committee of repairs "to Procure Plans and Estimates for a Charity School."—Trin. Min. (MS.). These estimates were presented to the vestry Mr 11 (q.v.).
18 The common council, "conceiving that the removal of the Town Clerks Office of this City to the City Hall would tend greatly to the security of the public Records & Papers," orders "that the lower Room in the southeast Angle of the City Hall [see Ap 30, 1792] and the small Room next to it be appropriated to that use.—Ordin. of the Court, II 20, 1793. On II 29, payment of £166 7s. 8d. was ordered "for repair[f] the Town Clerks Office Room in the City Hall."—Ibid., II: 25. See also Mr 25. The city clerk's office was formerly in the house of Nicholas Bogert, 28 Broadway, near the Oswego Market.—Daily Adv., Mr 30, 1793.
20 "Mr. Wilson's Tavern near Fort Washington" is mentioned in an advertisement asking for the return of a cloak taken by mistake in exchange for a "Cambric cloth lined with green baste, silver hook and eye."—Daily Adv., F 10, 1793. This was the Blue Bell Tavern. See O 12, 1753.
25 John R. Livingston advertises "Mount Pitt" for rent. Describing its advantages, he refers to "an highly cultivated garden, filled with the best fruit the climate affords." It contains "between ten and twelve acres of land, on which are the dwelling, coach and ice house, and other out buildings in a complete repair."—Daily Adv., F 25, 1793. It was again advertised in ibid. on F 4, 1794; F 6, 1795, and Mr 7, 1797. The 1794 advertisement stated that "Mount Pitt" was situated "directly back of the Belvidere Club House." Livingston's town house was at 67 Broadway.—City Directory. The hill from which "Mount Pitt" took its name was cut down in the autumn of 1794 (q.v., N 11).
Mr 4 Washington's second term of the presidency begins.—Winsor, VII: 269.
7 The legislature passes an act providing for the improvement of John St., which is only 12 ft. 4 in. wide, by enlarging its lower end in the manner described by the act. This act also provides for vesting in the corporation of the city of New York whatever "estate, right, title, interest, claim and demand" the people of the state of New York have, or which anyone at any time has left, for streets or highways in this city.—Laws of N. Y. (1793), chap. 42.
9 The legislature passes "An Act to organize the Militia of this State."—Laws of N. Y. (1793), chap. 45 (Webster, III: 20). It was amended by ibid. (1796), chap. 67 (Webster, III: 200).
10 In Paris, a decree which creates an irresponsible criminal court, known as an extraordinary revolutionary tribunal, launches the "Reign of Terror." This lasted until July 28, 1794 (q.v.), when Robespierre and his associates were overthrown.—Anderson, op. cit., 152; Guizot, etc.
12 The committee on repairs presents to Trinity vestry the estimates and plans for a charity school (see F 11). One of the estimates was "for completing the mason work only, by Pears & M'Comb," £1,152. The vestry appoints a committee "to devise ways & means for the expense," and also to pay the cost of "erecting a Steeple upon St. Paul's Chapel."—Trin. Min. (MS.). See, further, My 13 and 27.
13 The legislation incorporates the Society for the Promotion of Agriculture, Arts, and Manufactures.—Laws of N. Y. (1793), chap. 59 (Webster, III: 38).
14 The trustees of the First Presbyterian Church appoint a committee "to raise a Tower and Steeple on the New Presbyterian Brick Church, and to procure a Bell and Clock as aforesaid."—Proceedings of the Trustees (MS.), Vol. II. On July 8, they ordered that application be made to the Bank of New York for a loan of £400 for "carrying on the Building of the Steeple of the New Church."—Ibid.
18 The common council ordains that the committee on the Battery improve the embankments to prevent injury to the trees and fences there.—M. C. C. (1784-1811), I: 773. See Pl. 56, I: 421.
22 Specifications for the regulation of Warren St. between Broadway and Greenwich St. are prepared by Evert Baseler.—See original (item No. 1823 of Holden sale) in N. Y. H. S.; M. C. C. (1784-1811), I: 778.
25 One of the deputy sealers of weights and measures presents to the common council a standard yard measure, which he has procured from "the Exchequer in England." It is in accord with the standard established in the colony of New York before the Declaration of Independence.—M. C. C. (1784-1811), I: 777.
26 The common council permits the Uranian Society to use "the Room on the second floor [of the city hall] next but one to the Senate Chamber," as the room they have occupied heretofore is not sufficiently appropriated to their purpose.—M. C. C. (1784-1811), I: 777. See also Ap 15.
29 Brockholst Livingston purchases from Lindley Murray a tract of six acres known as Bellevue Place, on the East River near the present 26th St.—Liber Deeds, CDLI: 245. Conveyance was not perfected, however, until Ap 23, 1798; L. M. R. K., III: 953 ("Bellevue Hospital"); Pl. 176, Vol. III. In 1793, payment of £12, payment of £12, payment of £12 for the purpose of "accommodating the Chamber of their next and subsequent meetings."—Min. of Chamber of Com. (MS.); Bishop, A Chronicle of 150 Years, 159-51. See Je 14.
30 The cornerstone of "the New Episcopal Church" is laid "at the ground appointed for that purpose, in Ann Street."—N. Y. Jour., Ap 13, 1793. See also N. Y. Mag. (Ap, 1793), 256. The location was on the north side of Ann St., between William and Nassau Sts.—Mag. of Am. Hist. (1888), XIX: 59-60. This first site of Christ's Church was at 49 Ann St.—L. M. R. K., III: 912.
32 The common council permits "Several Young Gentlemen" to use the "building erected for the use of the Senate of the State," for a Literary Society. The petition was signed by E. Laitgh, W. Cuttig, J. W. Mulligan, W. F. Broome, J. Bainbridge, R. Riker, A. Bleecker, and P. Irving, in behalf of the association.—From the original MS. in metal file No. 6, city clerk's record-room.
38 There is advertised for sale "All the property both real and personal belonging to the New-York Manufacturing Society, consisting of a large and spacious brick building, constructed and built for the purpose, with a convenient dwelling house for the manager, and a wash house adjoining, situated in Vesey Street. . . . The materials consist of reeds, looms, a carding machine, spinning jennies, with every other machinery necessary and complete for carrying on the cotton and linen manufacture; . . ."—Daily Diary, Ap 15, 1785.
44 Washington issues a proclamation of neutrality, in view of the state of war existing between Austria, Prussia, Sardinia, Gt. Britain, and the United Netherlands, on the one hand, and France on the other.—Winsor, VII: 464, 515. For its effect, see Je 10.
45 The common council orders "that the Surveyor make a proper Plan or Survey of the Land & Meadows at and about the fresh Water Pond with the Streets which may be necessary marked thereon."—M. C. C. (1784-1811), II: 4. See also 17th Ann. Rep. Am. Soc. & Hist. Res. Soc. (1912), 122; and F 12, 1790.
47 The common council permits John Watts "to plant Trees in front of his House in Broad Way."—M. C. C. (1784-1811), II: 4. This is evidently a special permit modifying the ordinance of May 20, 1794 (q.v.), which required the removal of trees from the streets. Ten "trees and shrubs . . . containing about 50 acres, which comprehended the two farms formerly belonging to the late General De Lancey, and John Van Cortlandt," are advertised for sale. The house "was finished last September, on a plan of elegance and convenience, equalled by few houses on the continent." Its interior and exterior are described in detail in the advertisement. It was a good example of the architecture of the period. Some of its features, such as the "bed chamber floor contains five spacious chambers, with large and convenient dressing rooms to each, the park front is decorated with a portico and pediment, supported by columns and pilasters in a chaste and beautiful style; the drawing room and dining parlour, with the rooms over them, form into half hexagon projections in the front, next the river, and enclose an interior portico entrance to the hall, finished with a pediment, supported by bold columns; . . ."—Ibid.
New York, 12th August 1790.

Sir,

It is with great pleasure that, in obedience to an Order of the Senate of the United States, I have the honor to enclose their Resolution of this date, which was unanimously agreed to, and in behalf of the Senate, request that you will be pleased to communicate the same to the Corporation of this City, and, at the same time signify to them, that it is the wish of the Senate, that the Corporation will permit such articles of furniture &c. now in the City Hall, as have been provided by Congress, to remain for the use of that Building.

Yours, Sir,

Your most obedient, Humble Servant,

John Adams,

Vice President of the United States, and President of the Senate.

The Mayor of the City of New York.
and plaster, the rooms are all finished with stucco walls and cornices. . . . the farm is remarkable for the richness of its soil, and universally admired for the beauty of its landscape, intermingled with meadow grounds, pasture and knolls of natural wood land, more pleasing than all the laborous works of art. The two former proprietors of these grounds, having each planted great quantities of fruit-trees, the farm has now a double portion of the best fruit trees in full bearing. We may also mention, as a great natural advantage, the bank next the river, clothed with thriving young wood, and beautifully romantic has been improved by walks laid out . . . and by a road which leads to a small wharf, or landing place on the river.—Daily Advertiser, Mr 13, 1793.

The common council orders "that the name of the Street called Copley Street, beginning at the White Hall, and passing round by the present Park to the Kennedy's Lane, be changed to State Street."—M. C. C. (1784-1831), II: 5. There is in the Bancard collection in the N. Y. P. L. (A-B box, under "Battery") a "plan of the proposed alteration at the Battery, showing the new street proposed 18 feet wide." This street is evidently the present State St., south of Battery Pl.

May 6: Isaac Stoughton, Jr., city surveyor, is paid $7.8 for surveying the Bloomingdale Road. (The bill does not show the extent of the survey.)—From the original in metal file No. 19, city clerk's record-room; M. C. C. (1784-1831), II: 6.

Recorder Samuel Jones having completed the revision of the laws and ordinances of the city, the common council passes favourably upon them, and orders that the clerk have them printed, with the city charter "and an Appendix of such of the Statutes of St. Paul's as might relate to this Corporation of the City of this City." The titles only are entered in the minutes.—M. C. C. (1784-1831), II: 6-7. They were printed (1793) by Hugh Gaine in 8vo.

The committee appointed by Trinity vestry on March 11 (p. 6) reports that the best way to meet the expenses of building a charity school and erecting a steeple on St. Paul's Church is to let the church land on long leases. This is the same as before. There is no further record of erecting a charity school at this period, it appears likely the building plans were deferred.

On learning "that the Wall of Trinity Church burying Ground would render it very inconvenient to pave Lumber Street with foot Walks on each side," the common council orders "that a foot Walk be made only on the West side."—M. C. C. (1784-1831), II: 8.

The committee on the Bloomingdale Road reports to the common council, and the board orders "that the said Road from its commencement at Horner House to Nicholas De Puyter Barn be immediately opened to its proper & legal Width of four Rods. And thence to the Post Road at Mrs. Watkin's of the same Width if there be only a foot path, and is to be continued to attend the opening, and to confer with the owners of the land on the subject."—M. C. C. (1784-1831), II: 9. The situation of "Horns House" is shown on the first section of Christopher Collar's survey of roads, reproduced as Pl. 51a, Vol. V. See also Notes, The N. Y. of Yesterday, 4-6. See, further, Jl 13, 1795.

The trustees of the New York Society Library issue a notice that they "propose to begin the building of a Hall for the reception of their books as soon as materials can be collected—and as they are desirous of erecting a building which will be at the same time ornamental and useful, they would wish to avail themselves of the taste of the artists in this place—they will be, therefore, obliged to such as have talents in designing, to furnish them with plans as early as possible—a present of ten pounds will be made to the person whose plan shall be adopted. The plan shall be in perspective, in front, 60 in depth, and two stories high. Those who furnish plans whose plans will please them with Jacob Morton, Esq. in Broadway, within three weeks from this date."—Daily Advertiser, May 17, 1793. The building was erected at the present No. 33 Nassau St., and opened in April, 1795 (p. 6).—L. M. R. K., III: 937.

The common council grants a petition for the widening of Stony St. and orders that the corporation contribute $50 toward the expense.—M. C. C. (1784-1831), II: 10.

"Belvedere House [see Je 25, 1793], Being open for the reception of Company, and the Bowling green adjoining, being now in order for their amusement," John Avery advertises that "he will at all times be prepared to provide Dinners, Suppers, Coffee, Tea, &c. and entertainment for large parties and public bodies; . . . quails are also provided for those who may prefer that amusement."—Daily Advertiser, My 20, 1794. See J. 2. Avery was the tavern-keeper at Belvedere until May 1, 1796 (see Apr 29, 1796). The house is shown on Pl. 60-4, Vol. I.

John Ramsay having petitioned on May 20 "for the Privilege of erecting a Mill on the Stream of the Creek at Kings Bridge," the committee of the common council to whom the subject was referred reports the opinion that this should be granted, "so far forth as to commence at the west side of Kings Bridge on the north side of the Creek extending west along the Creek one hundred feet And the same length on the south side of the Creek extending across the Creek reserving a pass way of fifteen feet for small Craft to pass & repass and to pay an annual Rent of five Pounds." The board agrees.—M. C. C. (1784-1831), II: 10, 11. See, further, D. 1795, C. 108.

John Cochran, the commissioner of loans of the United States in this state, having petitioned the common council for office quarters, the board orders "that he be permitted to occupy the Exchange for the use of his Office Or if that should not be found convenient for him, that he be permitted to occupy the Room in the City Hall called the Council of Revision Room And also the Room used as a Museum whenever it shall no longer be used for that purpose: provided that whenever the said two Rooms or either of them shall be required for the public use of this State or of this City in this Permission shall cease."—M. C. C. (1784-1831), II: 10-11. On June 3, he was permitted to use, in addition, "the Lobby of the Senate Room until the Meeting of the Legislature or until it shall be wanted for any other purpose."— Ibid., III: 15.

The common council ratifies estimates and assessments "for the paving of Great George Street from Vesey Street to Murray Street," and "Chatham Row from Ann Street to the North Corner of the Presbyterian Church Yard."—M. C. C. (1784-1831), II: 11.

Trinity vestry resolves "that the Committee for Building the School House purchase the materials for Building the Steeple [see Mr 11] of St Paul's Church, and that the Trustees pay for the same."—Trin. Min. (MS.). The plans for the steeple were ready by Oct. 5 (p. v.). See also descrip. of Pl. 72.a, 1: 458.

New York was thus described in June or July of this year: June 18—

"The plan of this city is in no way regular, like Philadelphia and others, but is laid out with reference to the ground, which I think preferable to a forced and insipid regularity. The houses are chiefly built of brick, and the roofs tiled: there are a few still remaining, built after the old Dutch style, serving as a foil to the English taste that now prevails."

"The situation of the city is naturally healthy and pleasant, but the intolerable negligence of those in office, whose business it is to direct and see the streets, docks, and slips, kept clean, is such, that the presence of the streets, docks and slips (this old common jargon) is so abominably filthy, that any person coming fresh from the Country or off the water, can scarcely refrain from sickness in passing them, occasioned by innumerable kinds of the most nauseous stenches that abound in warm weather. Instead, therefore, of being surprised at the yellow or any other epidemic fever prevailing, (the fatal mortality of which, at New York, I too frequently had good opportunities of noticing in the summer of 1795,) I rather wonder they have it not every summer. . . ."

"York-Island . . . is joined to the main by a bridge, still called King's Bridge; a name so seldom met with in America, that they seem to have taken much childish pains to alter every sound approaching to royalty: witness King-street to State-street, in Boston; Queen-street to Pearl-street, in New York; and so on throughout America."

"A want of good water is a great inconvenience to the inhabitants, being there few good wells in the city. Most of the people are supplied every day with fresh water from a pump, near the head of Pearl-street, conveyed to their doors in casks. It is a reflection on this city, affluent as it is, that they do not have it supplied by pipes, which has often been proposed by individuals, but never acceded to. It would not only be convenient, but highly beneficial in the event of fire, cleansing the streets, and purifying the air. I experienced much friendship and hospitality at New York, my acquaintance lying chiefly among the friends, or quakers."—Struggles through Life, Exemplified in the Various Travels and Adventures in Europe, Asia, Africa, and America of Lewis. John Harris (and ed.), London, 1805, II: 62-63.

The proprietors of lots, and others, in the vicinity of the ex-
change, petition the common council "that Basons may be erected there for reception and accommodation of River Vessels." Referred to the street committee.—M. C. C. (1784-1811), II: 13.

A number of "Masters of Albany & other River Vessels" had complained to the common council on April 29 "of the want of a safe Bason at the North River," and recommended "the making of one at the Slip opposite to Thames & Little Queen Streets," the committee to which the subject was Referred reported "that another Bason at the North River for the accommodation of Vessels is necessary That the space between the Piers of Swartwout and Leak is the most eligible place on the Water side of this City for such Bason." The board adopts the proposal, and appoints a committee to cause it to be executed according to a plan accompanying the report.—M. C. C. (1784-1811), II: 4-5, 13-14. See also Je 10.

It is ordered by the common council "that the Committee appointed on the subject [see Jl 30, 1794] take down the old & prepare a copy of the building of a New Watch House."—M. C. C. (1784-1873), II: 14. The following is a summary of its history: The location, selected on July 22 (q. v.), was the "Corner Lot at the City Hall."—Ibid., II: 23. On July 29 (q. v.), an allowance of £200 was granted for building it.—Ibid., II: 25: It was in process of construction on Aug. 21 (q. v.), when an order was issued that it be lengthened "eighteen feet on Wall Street," and that it have a front on Wall Street to extend from its termination on Wall Street to the Corner of Telyou's House."—Ibid., II: 29. On July 29, 1794, £200 was appropriated toward the expense of erecting it (ibid., II: 25); on Sept. 30, 1793, £300 (ibid., II: 38); on Jan. 6, 1794, £90 (ibid., II: 59); and on June 10, 1794, £119167. The building was completed about Feb. 3, 1794 (q. v.). This, in 1794, appears to have been the only watch-house in the city (City Directories; Thorne, Reminiscences, 1809), and for two years later, the only one that had been completed on Chatham Sq.—See D 19, 1796. Regarding the development of the watch-house system, see N. T. Ecc. Rec., Jl 23, 1824; and City Directories, 1798, 1799, et seq. The Wall St. watch house was demolished in 1816.—L. M. R. K., III: 973. See also descript. of Pl. 56, I: 419.

This evening's performance at the John Street Theatre is substantially for James West, but the actor plans an additional entertainment for the public. He advertises: "Arid excursions having become the topic of much conversation in America, Mr. West is happy in an opportunity of exhibiting a Balloon to the ladies and gentlemen of New-York.—On Monday therefore, at 3 o'clock, P. M. he will launch a Balloon of thirty-six feet circumference, beautifully variegated, preceded by a smaller one of about twenty feet, at a dollar, the shilling will not only give admittance to the exhibition, but carry the bearer to the Theatre in the evening into Box, Pit or Gallery according to the price. The Balloon will ascend from the College Green."—Daily Adv., Jl 3, 1793. West seems to have angered the people by issuing tickets headed "Theatre Royal," for, on June 19, he made this apology: "Having learned from a number of my friends that I have given offence to the Public .... I think it my duty .... to come forward, and in the most respectful terms, to apologize for the unintended insult, it seems I have offered .... With regard to the tickets I issued with 'Theatre Royal' printed on them, .... I made use of them purely from necessity, and not with intention to insult the feelings of any person .... Without any intention to offend, I gave them in exchange for those that were handed to me at the door of the college yard; had I entertained the most remote idea that this procedure would have given rise to any disagreeable consequences, I solemnly declare I would rather have forfeited every pecuniary advantage I reaped by adopting it."—Ibid., Je 20, 1793.

A list is prepared (probably for another purpose) of the proprietors and tenants on both sides of Water St. from Peek Slip to St. James Slip.—See the original MS. (from Holden sale) in N. Y. H. S.

John Bill Ricketts, an equestrian performer, has procured a "convenient lot of ground near the government house, where he is erecting a circus." In three weeks, on returning from Philadelphia, "he bore a striking prolongation in his horsemanship."—Ibid., Je 6, 1793. His circus, described as "at the North River," was completed July 20.—Ibid., Jl 10, and 20, 1793. Described on July 27 as "on the North River, back of Mr. M'Cimb's buildings," it was advertised to be open in a few days.—Ibid., Jl 27, 1793. The date was later fixed for Aug. 8 (q. v.).—Daily Adv., Ag 2, 1793. For an account of Ricketts' career, see Greenwood, The Circus (1909), 77 et seq.

John Ireland and wife convey to George Knox the house and lane "whereon the said John Ireland now dwells."—Libr Deds., XLI: 182 (New York). This was also the mansion and land of Anthony Rutgers, for a long time known also as Ranelagh Garden. The conveyance is made for the benefit of Ireland's creditors, See F, 3, 1723; N 2, 1790; Mr 20, 1795.

The French frigate "L'Embuscade," which landed the French marines from New York at the hour of day for the purpose of forwarding the letters of Charles Genet, at Charleston, S. C., on April 9, anchors in the North River. Its salute of fifteen guns is returned from the Battery.—Daily Adv., Je 11, and 15, 1793. On his arrival at Charleston, Genet had set out by land for Philadelphia, where Pres. Washington and congress received him, while the vessel cruised along the coast seeking and capturing English prizes.—Daily Adv., Ap 20, 22, 23, Dunlap's Am. Daily Advertiser (Philadelphia, June 19, 1793), at two years later, his return to Washington brought him to Washington the French declaration of war against England. Although the treaty of commerce between France and the United States guaranteed to France the exclusive right of shelter for her ships-of-war and privateers and for their prizes, Washington at once issued a proclamation of neutrality (see Ap. 22). This produced ill feeling. The French minister attempted to fit out cruisers and "four ships of war," but he was opposed—Hildreth, United States, I: 247. See also Ag 12, 1795. Drayton reflects on his Letters (p. 18), the prevailing feeling at New-York.—See Jl 15. See also descript. of Pl. 56, I: 420, and Pl. 59, I: 433-36; also McMaster, Hist. of the People of the U. S., II: 98-100.

The common council resolves to "set apart a Dock and Basin for the Reception of coasting Vessels and small Craft which brings in provisions and food and to make "Wharfs for landing thereof." See further, Jl 17.

It also resolves to make "a proper and convenient Place for the like purpose on the North River." The board decides not to make "any further Grants of Water Lots or of the Soil between high and low Water Mark beyond Catharine Slip on the East River or to the Northward of the Corporation Dock on the North River until such Places as aforesaid be set apart and appropriated for Public Uses as aforesaid." The board resolves that, on the North River, "the space between the northernmost Grant to the Episcopal Church & the Water Lot petitioned for by Mr Harrison be reserved and set apart for the purpose of a public Wharf & Basin accordingly." A committee is appointed to examine and report "the most proper place to be reserved for a public Wharf and Basin on the East River for a Horse-office and for the purpose of Doctor of Physic."—See at Columbia College in 1796. His dissertation on "Chronic Mania," submitted to the "Faculty of Physic" in that year, is preserved in the N. Y. P. L.

Bancker makes a survey of "Mr Dugans Ground near the stone Bridge, G[reat] G[eorge] Street." The bridge is not mentioned on the plan itself, but the "Air Furnace" is shown; also a "White House." Very possibly it was the White Conduit House (L. M. R. K., III: 981).—The original sketch in Bancker Coll., N. Y. P. L. (box B-G, folder "Broadway"). See also descript. of Pl. 83-b, III: 558; My 16 and 24, Je 8, 1787.
Militia, ordered out by Gov. Clinton for the purpose, under in-
structions from the federal government, seize a French privateer
which is fitting out at New York.—Annals of North Am., 457.

A "Cap of Liberty" is erected in the Tontine Coffee House by
the friends to Liberty, Equality and the Rights of Man, amid the
acclamations of their fellow citizens, in defiance of all despotic
tyrants.—It is a beautiful crimson, adorned with a white tassel,
and supported by a staff.—N. T. Jour., Je 15, 1793; Diary, Je 14;
N. T. Jour., Je 22, 1793. See, further, Je 4, 1794.

John Drayton, describing a tour of the United States, which
he records in letters to a friend, writes of New York, in part, as
follows:

"At passing these islands [Governor's etc.], we came opposite
the battery; which is at the extreme point of the town: and is
situated much like that, which was at White Point at Charleston.
It has no merlons, or embrasures; but the guns (which are thirteen
in number) are placed upon carriages on a stone platform en barrette,
some few feet above the level of the water. Between the guns,
and the water, is a public walk; made by a gentle declivity from the
platform: and going round the ground upon which the battery
is placed. Some little distance behind the guns, two rows of elm
trees are planted; which in a short time will afford an agreeable
shade. The flag staff rises from the midst of a stone tower, and is
decorated on the top with a golden ball: and the back part of the
ground is laid out in smaller walks, terraces, and a bowling green.
Immediately behind the battery, is a fine house; built at the expense of
the state. Then in the back ground, was the city of New-York, crowded with excellent buildings: and its wharves lined with shipping, and with people. For the
day being Sunday [June 9], the inhabitants were naturally invited to the
waters edge; as well for pleasure, as excited by curiosity."

(pp. 9-10.)

In a footnote Drayton adds: "Note. The
museum has been since moved from Federal hall to the exchange,
at the foot of Broad-street: where, it offers a more extensive
gift to the spectator. Among its present curiosities is the model (in clay) designed, and executed by the celebrated
Italian artist in statuary, Mr. Ceracchi, for perpetuating the mem-
ory of America to posterity. It is made upon a scale proportioned to
one hundred feet in length, and as many feet in height: and for
grandeur, and emblematical device, is supposed would surpass
any thing of the kind, whether ancient or modern. Nothing, but
the expense attending the execution of it, has impeded its progress:
that being estimated at forty thousand guineas.—Perhaps, at
some future day, should Mr. Ceracchi be then living, the finances
of America may assist the completion of so happy a design. Here
also is to be seen Mr. Bowdler's wax-work, in the scale of the
museum. Among which, are those of Alexander Hamilton secretary
of the treasury of the United States, Dr. Franklin, and John
Hancock, late governor of the commonwealth of Massachusetts.
These, with the rest of the collection, are now placed with
an happy taste in a room sixty feet, by thirty: with an arched ceiling
of thirty feet high.

"The building in which this museum is kept, was formerly
the public resort of merchants; and has been long built. It is
supported on arcades, and is ornamented with a cupola; on the
top of which in regal times a crown was placed. But that now lies
neglected, and almost unnoticed in a corner of the museum;
giving way to the more pleasing decoration of a liberty cap."

(pp. 24-25.)

"At the upper end of Broad-street, fronting an area of three
or four acres of ground (which are laid out in public walks,
and planted with trees) are some public buildings; consisting of
a brew-dell, a poor house, and jail: with its attendant the gallows.
The criminal is here partly hidden by a lattice work; which, I
am led to believe may have a good tendency: as whether the
culprits, being, bravely or like a coward, those around are ignorant of
it . . . ."

("At the lower end of Broad-way, is the battery, and public
parade; of which, I have already given you some accounts: and
I now present you with a sketch of it, as seen from this spot.
While I was taking it, the Ambuscade sailed by, having a liberty
cap on the fore-top-gallant-mast head. . . ." (p. 20).)

"Overlooking this prospect, is the government house; placed
upon a handsome elevation, and fronting Broad-way: having
before it an elegant elliptical approach, round an area of near
a thousand yards from the house, enclosed by iron railing.
In the midst of this is a pedestal, which formerly was pressed by a leaden equestrian
statue of the King of Great-Britain: but having been dismantled
of that, for the use of the continental army, it now remains ready,
in due time I hope, to receive the statue of the President of the
United States of America."

A "vast number of houses have been built in this city, since
the war; some of which are extremely ornamental: and none more
so, than the government house. It is two stories high. Projecting
before it is a portico, covered by a pediment: upon which is superbly
carved in basso relievo the arms of the state, supported by justice
and liberty, as large as life. The arms and figures are white, placed
in a blue field: and the pediment is supported by four white pillars
of the Ionic order, which are the height of both stories . . . ."

(pp. 21-22.)

"Federal-hall, is built upon Wall-street, and fronts Broad-
street in the same manner, as the government house does Broad-
way. This, is an elegant and grand building; well adapted for a
senatorial presence. Here, I saw portraits of the president, of the
secretary of the treasury, and of the present government,
executed by colonel Trumbull as large as life; and as far as I could
judge good likenesses. The back ground of the president's portrait,
represents a part of New-York; and the British fleet sailing up
the narrows. Here, are also a museum, and library. The library
contains about five thousand volumes. The museum, was shown
as the worst advantage; being but partially exposed, and that,
in a very small room. In a footnote Drayton adds: "Note. The
museum has been since moved from Federal hall to the exchange,
at the foot of Broad-street: where, it offers a more extensive
gift to the spectator. Among its present curiosities is the model (in clay) designed, and executed by the celebrated
Italian artist in statuary, Mr. Ceracchi, for perpetuating the mem-
ory of America to posterity. It is made upon a scale proportioned to
one hundred feet in length, and as many feet in height: and for
grandeur, and emblematical device, is supposed would surpass
any thing of the kind, whether ancient or modern. Nothing, but
the expense attending the execution of it, has impeded its progress:
that being estimated at forty thousand guineas.—Perhaps, at
some future day, should Mr. Ceracchi be then living, the finances
of America may assist the completion of so happy a design. Here
also is to be seen Mr. Bowdler's wax-work, in the scale of the
museum. Among which, are those of Alexander Hamilton secretary
of the treasury of the United States, Dr. Franklin, and John
Hancock, late governor of the commonwealth of Massachusetts.
These, with the rest of the collection, are now placed with
an happy taste in a room sixty feet, by thirty: with an arched ceiling
of thirty feet high.

"The building in which this museum is kept, was formerly
the public resort of merchants; and has been long built. It is
supported on arcades, and is ornamented with a cupola; on the
top of which in regal times a crown was placed. But that now lies
neglected, and almost unnoticed in a corner of the museum;
giving way to the more pleasing decoration of a liberty cap."

(pp. 24-25.)

"At the upper end of Broad-way, fronting an area of three
or four acres of ground (which are laid out in public walks,
and planted with trees) are some public buildings; consisting of
a brew-dell, a poor house, and jail; with its attendant the gallows.
The criminal is here partly hidden by a lattice work; which, I
am led to believe may have a good tendency: as whether the
culprits, being, bravely or like a coward, those around are ignorant of
it . . . ."

("Near the buildings is an hospital, capable of containing
a large number of invalids: and some little distance from it is the
college; where about eighty students are at present . . . ." (p. 25.)

The rides in the neighbourhood of the city, are for miles
beautiful. Every elevation of ground, presenting some handsome
country seat . . . ." (p. 25.)—Letters Written During a Tour
through the Northern and Eastern States of America, by John Drayton
(Charleston, S. C., 1794). See also descript. of Pl. 59, I: 437-96.

CHRONOLOGY : THE RECONSTRUCTION PERIOD : 1783-1812

June

15

10

25
A view of the battery and harbour of New York, and the
June Ambuscade Plates, drawn by J. Drayton, and reproduced from
this work, is shown and described in Vol. I., PI. 59. This print is
the first to show the "churn" or flagstaff, which had been built
at the south-west extremity of the battery shortly after the demolhi-
on of the old fort in 1790.

The Tammany Society meets the French consuls of New York
and Boston, and the officers of the "Ambuscade."—Daily Adv.,
July 2. 1793.

"The Committee who have been charged to point out the most
convenient and proper Place on the East River to be reserved for
a public Bason or landing place, having viewed all the Lands
between Corlars Hook and those belonging to Col. Rutgers at
low Water taking into their view not only the Rocks, but also the
Current of the Tide, . . . report that the Land under Water
between Montgomery Street and the Wharf of Thomas Yares
being four hundred & thirty four & one half feet, as laid down on
a Map of said East River, in front of the Lands belonging to
Doctor Romaine George Janeway & others as the most proper
for the shoresaid purpose." The common council agree.—M. C. C.
(1784-1813), II: 16. See, however, ibid., IV: 59-97.

By order of the common council, the city pays £200 "towards
a Fence in the Fields."—M. C. C. (1784-1813), II: 17.

It also pays £400 "towards the new Bason to be made at
Thames Slip" (see Je 10).—Ibid., II: 17. Other payments this
year for this work were: Ag 15, £400; S 9, £300 O 28, £200;
D 2, £100.—Ibid., II: 18. 31, 47: 53. In 1794: Ja 20, £568:61;—
Ibid., II: 61. In 1795: Ji 13, £200; Ji 20, £200; Ag 3, £200;-
Ag 17, £200; S 21, £200. See ibid. II: 164, 166, 168, 172, 179, 197. Total, £8,566:61. By Sept. 5, 1796,
expenditures for the "Bason" amounted to £3,244:715.—Ibid.,-
II: 276.

The frigate "L’embuscade" leaves this harbour for a cruise.—

Heading her advertisement "Vest-Hall Rural Felicity At
Mrs. Amory’s in Great-George-street," this innkeeper, who proba-
ably occupied Montague’s tavern (see Bayle’s Old Taverns
of N. Y., 346), announces a concert of instrumental music.
The garden, she says, "will be beautifully illuminated . . . in the
Chinese style with 500 glass lamps. There will be tight-rope and
slack-rope dancing and “Equilibriums." In order that the garden
may appear to the best advantage, the orchestra will be placed
in the middle of a large tree, elegantly illuminated."—Daily Adv.,
Je 22, 1793. For earlier references, see Ap 5, 1794.

In France, the "Constitution of the Year I” is adopted.—
Anderson, op. cit., 171-84.

The common council pays for paying "that part of Cliff Street
lately purchased & opened by & at the expense of the Neighbor-
hood."—M. C. C. (1784-1813), II: 18.

The city pays £300 towards paving Gt Street & Chatham
Row in the fields."—M. C. C. (1784-1813), II: 18. See also
Ag 26.

The common council permits the inhabitants of Broad St.
(who have presented a subscription list "towards trying an experi-
ment with the Well at Aldo Wells for obtaining better Water")
to use "the Apparatus for boring Wells lately imported from
Boston by Mr. Hammond," and if they succeed the board "will bear
a reasonable part of the expense."—M. C. C. (1784-1813),
II: 18.

A committee of the common council reports recommendations,
to which the board agrees, on William Bayard’s petition for a
grant of water lots "in front of his Estate situate in the seventh
Ward at a place known by the name of Greenwich."—M. C. C.
(1784-1813), II: 18.

An announcement in one of the daily newspapers, reads: "The
4th of July being the anniversary of the Independence of America,
should be celebrated by the Sons of Freedom, from every class of
its citizens. The gentlemen Merchants have associated for this
purpose, and are to dine together at the Old Coffee House, the
City Tavern, the Officers of the Militia at the Tontine Coffee House,
and the Sons of Tammany at Corre’s. A subscription is opened for all the genuine Republicans in this
city of every class not already engaged to join in celebrating that
day in union, harmony and love.—Mr. Avery at the Belvidere
House [see My 20] is to provide the repast.

The expense will be apportioned to the means of the guests,
the Street, in front of the Bridewell, have made it too much of a practice to hold combinations or alterations with those in confinement, and sometimes Stones or brick bats are thrown and the glass of the windows destroy'd,—and whereas the statement of facts, having been laid before the Common Council, with a recommendation of having a wooden Blind fixed him. If you occasion such rooms as were most exposed, they approved of the measure—
(M. C., 1784-1811, II: 22). A committee is appointed to carry the recommendation into effect.—Ibid.

The common council votes in favour of taking down the market-house at Peck's Ship.—M. C. (1784-1811), II: 22. See, further, Aug 6 and Aug 22.

The common council orders that the mayor "be authorized to inform the French Consul the [that] if there should be any sick on Board the French Fleet expected here they can have use of Bedlows Island."—M. C. (1784-1811), II: 23.

The common council appoints a committee "to superintend & direct the erection of a new Watch [house] on the Corner Lot at the City Hall" (see S 16, O 23, and D 4, 1785; Jl 3, 1793.).—M. C. (1784-1811), II: 23.

The same committee is required "to make two Cisterns to receive the Rain Water from the City Hall" (see S 10, 1792.)—Ibid.

The common council authorizes the payment of £846 to Joseph Bumpard for repairs to the Battery.—M. C. (1784-1811), II: 24. This is the first reference in the Minutes (erroneously given as July 16 in description of Pl. 59, I: 415) to the flagstaff which was erected on the Battery soon after the demolition of the fort in 1790 (?). See D 19, 1796.

Capt. Dennis of the U. S. revenue vessel "Vigilant," arriving in port, states that Capt. Courtnay of the British frigate "Boston," off Sandy Hook, sends a challenge to Capt. Bumpard of the French frigate "L'Ambluscate" (L'Embuscade), which is at New York. On the following day Capt. Bumpard inscribed a note "in the Coffee-house book" accepting the challenge, and hoping to find the "Boston" at the Hook on July 30.—Daily Adv., Jl 30, 1793. At the same time, he sent a letter to Capt. Courtnay demanding first that he receive assurances from him that the letter is "unattended by any other armed vessel," and that he will not employ "any artifice or stratagem, unbecoming the character of a brave and candid soldier." Not receiving an answer, Capt. Bumpard resolves "not to disappoint the martial ardor of Capt. Courtnay," and accordingly sailed on the morning of the 31st.—Ibid., Ag 1 and 7, 1793. Nine vessels were chartered by different parties to see the action.—Ibid., Jl 30, 1793. For an account of this naval duel, see cited above; Ag 2 and 7, 1793; and Diary, Ag 6, 1793. The first news of the conflict was circulated in New York by a narrow folio handbill, dated Aug 2, now very scarce. One of these was sold with the Jonathan Trumbull collection at Anderson's, Dec 8, 1815; on its margin were written comments to the effect that the two ships fired at each other, lost a few men, and then made off from each other as fast as they could. This, however, does not correspond with the report, and will not explain more favourably to the Frenchman. For an account of the comparative strength of the two vessels, see James, Naval Hist. of Gr. Britain, I: 110-14. The colours of the "Ambluscate" were presented to the Tammany Society, "as a token of respect which those virtuous patriots merit. . . . from their Republican Brethren of France."—Diary, Ag 6, 1793.

An English traveller, C. W. Jackson, then in New York, describes the scenes in the city, during and after the engagement, thus: "The wounded were landed and sent to the hospital. I counted thirteen on pelisses and doublets that number less severely wounded. Nothing but commiseration surrounded the streets while the ladies tore their chemises to bind up their wounds. Advertisements were actually issued for linen rags for that purpose, and surgeons and nurses in numbers repaired to the sick ward. . . . I witnessed Bumpard's triumphal landing the day after the engagement. He was hailed by the gaping infatuated mob with admiration and received by a number of the higher order of Democrats with exultation. They feasted him and gave entertainments in honor of his acknowledged victory. He was a very small, elderly, man, but dressed like a first-rate admiral's fellow, and the ladies took the occasion six feet high. At this moment I verily believe the mob would have torn me piece-meal had I been pointed at as a stranger just arrived from England. I ground this supposition on the fact of a British lieutenant of the navy having been insulated the same day at the Tontine coffee house; but he escaped further injury by jumping over the iron railing in front of the house. The flags of the sister republics were entwined in the public room. Some gentlemen secretely removed the French ensign, on which rewards were offered for a discovery of the offender, but he remained in secret."—The Stranger in Am., by Charles William Janson (London, 1807), 430-31.

The common council adopts a grade for the regulation of Ann St.—M. C. (1784-1811), II: 25. For the paving of this street, see ibid., II: 86.

The common council permits William Bayard "to have a raised Area to his House [in] Wall Street."—M. C. (1784-1811), II: 25.

Resolutions alleged to have been drawn up on this day "At a meeting of a large and respectable number of the friends to Aristocracy, Peace, and Union with Great Britain," and signed by Peter Pacificus, jun. secretary," were published on July 31. These resolutions declare that it is "the indispensable duty of all good subjects to discourante the present disposition of the people in favor of France, and to endeavor . . . to kindle animosities between the Americans and French;" that all who have any intercourse with the French are "enemies and disturbers of peace," and all who buy, sell, or wear "the National Ribbon of France are friends of riot and disorder;" that the practice of saluting French ships shall be discontinued and if it will eventually tend to draw upon this country the just wrath and vengeance of the Most Sacred Majesty, George the Third, King of Great Britain, France, and Ireland, Defender of the Faith, &c. &c;" that an address requesting the governor to forbid the firing of cannon in honour of French ships shall be drawn up; and, in conclusion, "That if this address to the Governor should fail of the desired effect (which we greatly fear) this meeting will call together the friends of Monarchy throughout the state, appoint a leader, and oppose by force the entrance of French vessels; set fire to the Ambluscate frigate, tar and feather every French Democrat we find in the city; pull down the Cap of Liberty at Belvedere [see Jl 4] and the Tontine Coffee House; and bid defiance to the host of vile Republicans who infest this metropolis."—N. Y. Jour., Jl 31, 1793.

The French fleet, of 15 sail, arrives from the Chesapeake. See 1793, privateers, 1793, 1795.

An改变 from the commonwealth to the United States, returns to New York. The ringing of bells and firing of cannon greet him. He is received at the Battery by a committee appointed to present him an address, and is conducted to the New Coffee house," and thence to his lodgings in Maiden Lane.—Geneals of the U. S., Ag 10, 1793; Hist. Mag., 1st ser., III: 231. See also Diary, 1793, 1795.

An account of the French privateers, "now on our coast," is published.—Daily Adv., Ag 7, 1793.

At 12 went to Broadway, opposite Trinity Church where a multitude had assembled, and heard an address deliver'd by Col. Troup on the advantages of a state of Neutrality,—after which, several resolutions were pass'd, expressing their approbation of the President's conduct, &c, amidst the gallant conduct and shouts of the people.—about the meeting was dissolved."—Diary, 1793, 1795.
1300

THE ICONOGRAPHY OF MANHATTAN ISLAND

1793 Greenwich street."—Diary, Ag 8, 1793. "Nothing like his perform ance was ever before seen in this city."—Daily Adv., Ag 10, 8 1793. Cf, however, S 27, 1796. Ricketts advertised a variety of new feats, to be performed on Sept. 2.—N. Y. Jour., Ag 31, 1793. This was Ricketts' first circus or amphitheatre in New York; his second was opened on Nov. 24, 1794 (q.v.); and his third on March 16, 1795 (q.v.). This will correct the errors in dates given in the L. M. R. K., III, 936.

10 "At noon, hearing a discharge of Cannon I went down to the Battery, from whence I had a view of the French Fleet dress'd with Flags—(the English upside down)."—Diary Commentarium, op. cit., 179.

12 Genet is charged, in a notice signed by John Jay and Rufus King, with having said that "the President was a misled man, wholly under the influence of those inimical to France," and that he (Genet) "was resolved to appeal from him to the People, the real Sovereigns."—Diary, Ag 12, 1793. For other current newspaper mentions of the subject, see The Magazin Miscellany (ed. by Dawson), Vol. III (1866). For political history, and family connection of Genet and Gov. Clinton, see Alexander's Political Hist. State of N. Y.

15 Alex. Anderson goes "up the scaffolding of the New Episcopal Church (see Ap 11), which is rais'd as high as the eves."—Diary Commentarium, op. cit., 180.

15 The common council grants a petition of Ephraim Hart "to make a Coal Vault under the Street in front of his House in Wall Street."—M. C. C. (1784-1831), II: 27. This is the first mention in city records of a street vault for coal; although it is likely that other vaults petitioned for at private residences were for that purpose.

18 Two affrays between French and English soldiers occur on this day.—Diary Commentarium, op. cit., 180.

21 The common council orders "that bulleheads be constructed at the river in front of Roosevelt St. and Crown Street Slip.—M. C. C. (1784-1831), II: 29.

26 "On a suggestion that the Watch House erecting [see Je 3] would be too small," it is ordered by the common council "that it be lengthened eight feet on Wall Street and that it have a front on Broad Street and extended from its termination on Wall Street to the Corner of Tylows's House."—M. C. C. (1784-1831), II: 29.

26 John Buel & Co. begin the publication of a semi-weekly newspaper called the Columbian Gazettier.—Early Newspapers: 418; Brigham, A. A. S. Proc. (1917), 911. See Ag 21, 1794.

26 The common council orders "that the Treasurer expose to sale on Friday next [Aug. 30] at public Vendue the Materials of the Market and Trebbks Slip [see Jl 1]. The purchaser to remove the whole of the Materials out of the Street and fill up the Street where the buildings stands to a level with the Street on each side in fifteen Days."—M. C. C. (1784-1831), II: 29-30. In the advertisement of the sale, it was stated that the materials consisted of "good timber and bricks, and a considerable quantity of excellent Hell gate building stone."—Diary, Ag 28, 1793. The market was sold to Peter Hardenbrook (see S 2). On May 6, 1794, Anthony Bleecker & Son were paid a commission of $1 for selling these materials.—M. C. C. (1784-1831), II: 75.

26 The common council orders payment of $2321:85 for paving Great George Street, and $56:12 for paving Chatham Row (that is, the streets west and east of the Park).—M. C. C. (1784-1831), II: 30. See also Jl 1.

26 Sept. The New Market, which was sold to Peter Hardenbrook on Aug. 30, 1793 (see Ag 25), is pulled down.—A memorandum to this effect, signed by Mayor Varick, on page 105 of a manuscript record of appointments of cartmen, butchers, etc., is in N. Y. H. S. (Misc. MSS.).

5 The trustees of the First Presbyterian Church authorise Mr. Phoenix to borrow $2,000 to finish the Steeple of the Brick Church.—Proc. of the Trustees (M.S.), Vol. II. See also a humorous reference to this steeple, which "looks down with contempt on humbler Trinity," in The Diary, Ag 30, 1793.

9 An "alarming and infectious" scourge of yellow fever is raging in Philadelphia. There is much apprehension in New York that the pestilence may be brought here "by persons coming from thence after the Infection." Therefore, in order to prevent a place "out of the City," to which such persons may be sent, the common council appoints a committee "to procure the use of the House on Nutten [Governor's] Island until 1st Nov* and to provide Bunks & c if necessary."—M. C. C. (1784-1831), II: 32.

16 Thou, Swan, who advertised (Daily Adv., S 5) to deliver a lecture on "real horsemanship," gives an evening's entertainment "At the Circus, near the Battery" (see Ag 8). This he was to repeat on Sept. 15.—N. Y. Daily Gen., S 13, 1794. On Sept. 24, fireworks were to be a feature.—Ibid, S 23, 1794. On Oct. 16, "two of the most wonderful and sagacious animals in the known world" were to be shown.—Daily Adv., O 16, 1794. The last exhibition at this circus was to be on Nov. 10.—Ibid, N 4, 1794. For the opening of a new "amphitheatre," see N 24.

15 The governor issues an order that the health officer of the port shall have a black flag constantly displayed on every vessel "performing quarantine below the point of Governor's Island," in order to prevent market boats and others approaching too near.—N. Y. Jour., S 18, 1793.

16 Mayor Varick reads to the common council a letter from Gov. Clinton, which states that the health officer has informed him that a sloop from Philadelphia, which entered the harbour last evening and came to one of the wharves, has on board "a person infected with the contagious Distemper now prevailing in that Place;" that the governor is convinced "that every Measure which he was warranted by Law to take to prevent an intercourse with that City would prove ineffectual." So he submits it to "the discretion of the Corporation of this City, whether the Measures in aid of those already adopted as they might find themselves authorized to take or the necessity of the Case would justify for the prevention of so great a Calamity as the spreading of that malignant Disease would prove to our fellow Citizens."

16 The mayor informs the board "that the Inhabitants at a Meeting at the Coffee House had appointed a Committee to aid this Board in any Measures which might be adopted to prevent the introduction of that Disease into this City;" that this committee, among other arrangements, "had employed Doctors Buxton & Irwin to aid the Health Officer in his Duty & that they had employed Nathan Strong at the Whitehall & Henry Dufour at the North River to prevent Persons immediately from Phila from entering this City . . ." The board approves, and appoints a committee to act in conjunction with that appointed by the citizens, to take necessary measures to prevent the introduction of the disease here.

16 It also authorizes and requests the mayor "to appoint under the Common Seal of this City such and so many of the respectable Inhabitants in each Ward as he may judge necessary for the purpose of aiding the Magistrates in carrying into strict execution all the Measures in force for preventing the Disease. The purchase of land near Battery Rock for the erection of a Steeple for the purpose of ringing the bell in case of exigency is now in progress,"—Diary, S 28, 1793.

16 Noah Webster, of Hartford, is informed by a New York correspondent that the yellow fever "rages in Phila with an unrelenting fury," and that the magistrates in New York have issued "Strict orders to Stop all Travellers from the Southward in order to prevent, if possible, the introduction of the disease in this town."—The wars & Landing places are guarded night & day & the vessels from Phila Stoped at the Narrows to perform a Quarantine on the Ohio. It cannot exceed 40 days nor be less than 14, after due examination of the health officer & the appointed committee for that purpose.—The urgency of the circumstances render the precaution Indispensable, tho', (as you may easily conceive) it is attended with many inconveniences to the Trade & necessary Intercourse between the two places.—but the first Law of Nature is that of Self-preservation & no other consideration can oppose it.—The persons infected of the disorder or Suspected to be so, are immediately removed on Governor's Island; but Since the measures have been taken, there is but one Instance of a man coming from Phila who has been transported & who died the day after.—The alarm of the Citizens of New York has been & is still very great but till now they are without any foundation.—Letter of C. Ligarene to Noah Webster, in Noah Webster MSS, in N. Y. P. L. See S 30.

23 The common council orders that, in case the mayor should be informed of any person "being sick and suspected of the infectious
Disease prevailing at Philadelphia," he shall direct Doctors Treat, Bard, and Pitt Smith to examine them, and the board will meet the expense.—M. C. C. (1784-1831), II: 35.

Anthony L. Breckler (see Mr. 1, 1792) and Mary, his wife, sell their Roger Morris property to William Kenyon for $3,700. The deed was recorded on Aug. 11, 1800.—Lib. D. Dec., LIII: 494 et seq. Kenyon sold the place on Aug. 29, 1799 (q.v.).

On account of the yellow fever which rages in Philadelphia, all intercourse between New York and that city is stopped by hand-bill notices. A plea is published that the regulation be observed.—Rising Sun (Kingston, Ulster Co.), S 28, Aug. 1793 (in N. Y. H. S.).

On a suggestion to the landowners of the Landing of Emin Slip is being dangerous to the inhabitants, the common council orders that no cattle be landed at any place in the city to the westward of Col. Rutgers.—M. C. C. (1784-1831), II: 37-38.

The city has been suffering from a long continued drought. Mayor Varick lays before the common council a suggestion from the citizens’ committee "to prevent the introduction of the infectious Distemper prevailing in Phila." (see S 16), "that watering the streets of this City by Means of the Fire Engines would aid the Inhabitants in cleansing them and tend to correct the Air and prevent Putrifaction or offensive smell from the Kennels in consequence of the long continued drought." It is resolved "that it be recommended to the Engineers and Fire Men of this City to make the necessary arrangements for watering the several Streets of this City with the Fire Engines on Saturday next (unless a previous considerable fall of Rain should make it unnecessary), and the inhabitants are requested to aid the Fire Men in this Business."

"And it is also recommended to all the Inhabitants to work at the same time all the public and private Pumps and to scrape or sweep the Kennels that the Water may have its free Course."—M. C. C. (1784-1831), II: 31.

Payments ordered by the common council on this day for city work includes $2,751.77 "for two Cisterns at the City Hall" (see S 10, 1792, and J 22, 1793).—M. C. C. (1784-1831), II: 38.

"A Citizen" writes to one of the newspapers: "when we walk to the environs of the city, and even in it, where the houses are scattered, we find dead horses, dogs, cats, and other dead animals lying about in such abundance as if the inhabitants accustomed the stench arising from putrid carcasses a delicious perfume. We find large quantities of stagnating water that needlessly remain in many places in the vicinity of the city. . . . That Aegean stable, that sink of putridation, the fly-market, with its malignant dock, etc. is not likely to be cleaned. . . . If we have occasion to go, or if we dare advance to the concentrating point of stench and putridation, the fly-market, particularly towards the lower end of it, and the docks and slips in the neighborhood, we shall, in some measure, experience the scenes described in the accounts we have of Grand Cairo. . . . Through the breaches, or openings under the market, are likewise thrown into that dreadful abyss of corruption, many of the offals of the shambles, all manner of heads of carcasses, spoilt meat, spoilt pickle etc. both from the stalls and the street. . . . But what is still worse, the double portion of all the carrion and putrid substances that have been accumulating during the whole day and evening of Saturday, are early on Sunday morning collected into heaps in the street, there to lay all day under the full influence of the solar rays. . . . A wish has lately been intimated, that the machine should be employed in cleaning that dreadful gulf of stench, and nastiness, that lies between the slip of Fish Market. . . . because it hinders the tide and land floods from cleaning that seeming avenue of disease that runs under the whole Fly Market."—N. 1. Jour., 2, 1793.

"Resolved. That the Treasurer pay Twenty-five dollars to Mr. Lawrence as a compensate from this Board for the plans of a Steeple [see M. 22] drawn by him for their use."—Trin. Min. (M.S.), this was for St. Paul’s Chapel. See, further, Mr. 24, 1793.

The French squadron sails from the harbour.—Daily Ad., 7, 1793.

At a meeting of a joint committee from the common council and the citizens (see S 16) appointed to prevent the introduction and spread of infectious diseases in this city, a letter from the mayor of Philadelphia is read recorded on Aug. 11, 1800.—Lib. D. Dec., LIII: 494 et seq. Kenyon sold the place on Aug. 29, 1799 (q.v.). Any one from this committee, on the subject of contributing towards the relief of the poorer and most distressed citizens of Philadelphia; and it is resolved that it be recommended to the common council to furnish $3,000, and to take measures either to be reimbursed by the legislature or to have the amount refunded by a tax on the city.—From the original minutes of the committee, in metal file No. 14, city clerk’s record-room. See 0 11.

Alexander and Alexander Robertson (see 0 8, 1792) advertise the "Columbian Academy of Painting, No. 89 William-street, New-York." They are "Linnæans," and "Paint Portraits, Miniatures, make designs of every kind for engraving, &c." They state: "From the encouragement they have met with from the Citizens of the United States, they have been induced to establish their Academy on the most liberal and extensive footing, both in the Academical style of studying from nature, and as a School of Painting and Drawing—being provided with a number of casts from the antique, and a complete assortment of patterns for the use of their pupils in heads, figures, flowers, animals, &c. on [in] chalks; historical pieces, landscapes, (of which a number are views of remarkable scenes in this country) Flowers, &c. in India Ink and water colors, &c.

"Their public class for Ladies during winter, will be from 3 till 5 o'clock, afterwards, on Tuesday’s, Thursday’s and Saturday’s; an evening class for gentlemen on the same days from 7 till 9 o’clock. Private tuition as usual."—Daily Ad., O 8, 1793. See My 4, 1795.

The citizens’ and the common council’s committees (see S 16) have jointly recommended that the city furnish $5,000 "towards the Relief of the poorer and most distressed Citizens of Philadelphia, under the pressure of their present great Calamity," the board resolves to provide the sum of $5,000 for this object; that a loan of this sum be negotiated by the mayor with the Bank of New York, and that he inform the mayor of Philadelphia of this resolution and pay the sum to his order.—M. C. C. (1784-1831), II: 45.

The bank made the loan on the city’s "life," at only 5 percent interest, in view of "the benevolent use intended."—ibid., II: 45.

For a return favour from Philadelphia two years later, when New York was afflicted, see O 6, 1795.

Mayor Varick takes his oath of office before the governor at the government house.—M. C. C. (1784-1831), II: 44. In the previous year, this ceremony was conducted in the common council chambers.—ibid., I: 752.

A number of persons gather in the fields, and proceed to demolish completely two houses of ill fame, and to damage several others. Three persons are wounded by defenders using small arms, and the mayor is injured in trying to disperse the people.—Daily Ad., O 16, 1793.

On Oct. 17, the magistrates published a notice addressed to the citizens, stating that the riots on the occasion of Oct 14 and 15 were conducted by boys, apprentices, negroes, and sailors, and recommending that parents and masters keep their children, apprentices, and servants, at home in the evening. They appeal for co-operation to aid the city watch, etc.—ibid., O 17, 1793.

On Oct. 21, the common council paid $4,168 "for extra Watchmen to quell a Riot." (M. C. C., 1784-1831, II: 46). On Nov. 18, Mr. John Lovell (see Jour., 30, 1792) "for a Detachment of Light Horse on a late Riot" (ibid., I: 51); and, again, on June 30, 1794, two of the city watchmen were paid $10 each "for their Exertions & the Wounds they received in quelling a late Riot" (ibid., II: 85). Cf. the similar episode of July 17, 1799.

The following advertisement appears: "At the Exchange; New York Museum & Wax Work. Mr. Bowes respectfully informs the public, that he has added his exhibition of Wax Work (never before exhibited in this city) to the Museum. It is displayed in the centre of that spacious and elegant Hall, surrounded by a very large collection of well-chosen productions of Nature, which, together, now form one of the most pleasing and grand scenes ever offered to public view in America."

The Doors will be opened at Candlelight, and the Exhibition closed at Nine o’clock.

"The Museum and Wax Work will be opened every day, from 10 to 1 o’clock in the morning, and from 3 to 5 in the afternoon."—Daily Ad., O 16, 1793. On Sept. 2, 1790 (q.v.), the common council granted a room in the city hall for the museum, and the collection was still there on May 27, 1793 (M. C. C., 1784-1831, II: 11). It must have been moved to the exchange at some time between May 27 and Oct. 15. Cf. Drayton’s account, under Fe 15-25. See, further, N 1.

Marie Antoineet is gulliont.—Am. Minerva, J 9, 1794.
The common council authorizes the payment of £200 "towards the expenses of the Committee for preventing infectious Diseases being brought into this City," (see S 9)—M. C. C. (1784-1813), II: 46.

There were later authorizations between this date and Jan. 29, 1794, which brought the total expenditure for this purpose to £1,426:11:6.—Ibid., II: 47, 48, 49, 51, 53, 58, 61.

The common council orders that 24 additional night watchmen be employed "for preventing the introduction of the infectious distemper from Philadelphia by Passengers being landed in the Night."—M. C. C. (1784-1813), II: 46.

The common council orders "that the Street Committee be authorized to agree with M'Williams to plant Trees in the Fields at 4/-each, to warrant their growth."—M. C. C. (1784-1813), II: 46.

Gardiner Baker publishes a list of the contents of the "Museum and Wax Works. At the Exchange, New York." The attractions include living animals, birds, snakes, and fishes, preserved animals and birds, and "Artificial Curiosities." Baker adds: "The room in which the Museum is contained, is 60 feet by 30, with 20 arch of 20 feet high, on which is elegantly painted a sky blue, and intermixed with various kinds of clouds in some of which are naturally represented a thunder storm, with flashes of lightning—On the walls are elegantly painted a large number of trees, from various parts of the world. Through the width of the room are painted a number of beautiful birds... together with a large variety of foreign animals...."

"The above paintings are copied from the best historical prints, and are universally allowed to be excellent imitations, with respect to colour and form.—The whole making a most superb and magnificent appearance.—"Daily Advertiser, N. Y. 4, 1793. See Mr 31, 1794.

The common council refers to the road committee a petition of John B. Cotes "to erect a Mill on the Stream of Harlem River."—M. C. C. (1784-1813), II: 48. On Nov. 11, a similar petition of Walter and John Townsend was so referred.—Ibid., II: 49.

And on Dec. 2 (9. v.), one from John Ramsay. See, further, D 9; D 22, 1794; N 10, 1795; Mr 7, Je 13, 1796.

The day is celebrated by the ringing of bells at the following buildings: Trinity Church, St. George's, St. Paul's, Old Dutch Church, New Dutch Church, North Dutch Church, Old Presbyterian Church, New Presbyterian Church, German Presbyterian Church, French Presbyterian Church, city hall, and jail.—From a warrant issued Dec. 2 to pay 12 shillings each to the sextons and others who acted as bell-ringers, filed in metal file No. 12, city clerk's record-room. This item of expense amounted to £74.

Other city expenses, paid on Dec. 2 for this celebration, were £391:18 to John Hide for the public dinner; £41:2:13 for gunpowder for the fire, and £11:11:9 for gunpowder for the artillery.—M. C. C. (1784-1813), II: 51.

The common council refers to the committee on streets and roads: "A Memorial of John Ramsay on the Subject of his Mill lately erected on the Stream of Harlem River at Kings Bridge;" "A Petition of the Inhabitants in Partition Street for numbering the Houses" (see D 30), and "A Petition from the Mechanics Society with a plan for rendering the Piece of Ground, at the upper end of Chatham Street lately purchased by the Society, more square & convenient for the erection of a Hall for the said Society."—M. C. C. (1784-1813), II: 52.

Samuel Ellis and others petition the common council for enlarging Hudson's Market (Bear Market).—M. C. C. (1784-1813), II: 53.

On Dec. 9, the common council ordered "that they be permitted to enlarge the said market by erecting a Market House of twenty feet in width in Vesey Street between Greenwich and Washington Streets under the direction of the Street Committee."—Ibid., II: 54. De Voe says that the new market was usually referred to in the records as the "Upper Hudson," but that the butchers and patrons called it the "Buttermilk Market."—De Voe, History of New York, 211-212.

In Paris, the "National Convention" adopts what has been called the constitution of the "Reign of Terror."—Anderson, op. cit., 194-204.

George Bune & Co. begin the daily publication of The American Minerva, Patroness of Peace, Commerce, and the Liberal Arts.
1794—

In this year, Samuel Morey of Conn., who commenced his experiments on the Connecticut River in 1790, propelled his steamboat from Hartford to New York City at the rate of five miles an hour. "Chancellor Livingston, Judge Livingston, John Stevens, and others, were on board this boat when they went from New York to Greenwich."—Preble, Chron. Hist. of the Origin and Development of Steam Navigation, 35 and sq. In 1797, Morey exhibited another steamboat on the Delaware.—Ibid., 40-41.

The Prince de Talleyrand spent part of this year in New York City. He states in his memoirs: "I witnessed the return of the first American trading expedition to Bengal; the ship owners connected with it were largely repaid for their outlay, and in the following year, fourteen American vessels started for India from different ports, in order to obtain a share of the enormous profits secured by the English company ..."—Memoirs of the Prince de Talleyrand (ed. by the Duc de Broglie, trans. by Beaufort and Hall, 1899), l. 181-182. See pls. 26-27. "The case of the Calabar," opp. p. 352, of the house in which Talleyrand was said to have lived, on the Bloomingdale Road, near the Hudson River and 75th St., once known as Major Thompson's, but in 1865 Perritt's mansion. Herbert L. Stone wrote of this period: "I had the pleasure of seeing Mr. Jefferson in an old two-story house in that [Cedar] street, and there was Talleyrand, whom I used to meet at the house of General Hamilton and of Noah Webster, with his club-foot and passiveness, immovable countenance, sarcastic and malicious even in his intercourse with children."—Stone, Hist. of N. Y. City, 422. Dr. Francis, speaking of Aaron Burr's home, "Richmond Hill," said: "Here Talleyrand, who in the morning had discoursed on the tariff with Hamilton, passed perhaps the afternoon of the same day with Burr, on the subject of the free trade and commerce with Great Britain, associated with Volney, while the Syrian traveller, in his turn, descanted on theology, the races of the red men, and Niagra. I cannot well conceive of a greater intellectual trio."—Francis, Old New York (1866), 17-18.

In this year, New York court cases were first published in Coleman's and Gaine's Cases.—See Hist. of Bench and Bar, l. 239. Alexander Anderson, a native New Yorker, is generally recognized as the "Father of Wood-Engraving in the United States." He began to work as a copperplate engraver in this year, and, even after taking his M.D. degree at Columbia, continued his former profession. He attained considerable proficiency in this branch of art, and, in 1820, became interested in the wood-engravings of Bewick and his followers. Though Dr. Anderson was entirely self-taught, he soon established an enviable reputation in this new field. His use of the "white line" in wood-engraving was peculiarly successful and effective.—Stauffer, Am. Engravers on Copper and Steel, l. 8-9; Dunlap, Hist. of Arts of Design, l. 134-36. For a list of his engravings, see Stauffer, op. cit., l. 11-14, and Fielding, Am. Engravers on Copper and Steel, 47-50. On October 1, 1794-98, Elkanah Tisdale was established in New York as an "Engraver and miniature painter." He worked in both line and stipple, but his plates possess little merit. He was a better designer than engraver, but his best work was as a miniature portrait painter.—Stauffer, Am. Engravers on Copper and Steel, l. 272-75. In the list of his engravings mentioned in ibid., l. 535-39, occur one of the "New Theatre" and one of the "New City Tavern." Additional plates are listed in Fielding, Am. Engravers on Copper and Steel, 285-86.

In or about this year, Archibald Gracie built a country-seat, overlooking the East River.—The Picture of N. T. (1807), 186; cf. Liber Deeds, CXIX: 194 (New York); Mag. Am. Hist. (Nov., 1879), 609-92. The house is still standing on the north side of 86th St., between Avenue B and the East River, within the enclosure of Carl Schurz (East River) Park.—See L. M. R., III: 549: Pl. 175, Vol. III.

In this year, Charles-Balthasar-Julien Féret de Saint-Mémin drew and engraved his "View of the City and Harbour of New York, taken from Mount Pitt, the seat of John R. Livingston, Esq." which is reproduced and described in Vol. I, Pl. 62. This is the most interesting and beautiful view of the period showing the city from the north. A similar view, similar view, drawn by Archibald Robertson, bearing the date "11th April 1779," and showing the fortifications in the foreground, is owned by Harris D. Colt, Esq. It belonged originally to the splendid collection of about fifty sepia drawings of American cities, etc., made by Robertson just prior to and during the Revolution. For a brief description of such of these views as are of New York interest, see Jl 12. 1776. This collection now belongs to the N. Y. P. L. (Spencer Fund).

A view of Belvedere House, as it appeared in this year, is shown in Vol. I, Pl. 60-a. This building was erected in 1792 (see Je 25, 1792) as a sort of country club. It occupied a beautiful site overlooking the East River, on grounds bounded by the present Montgomerie, Clinton, Cherry, and Monroe Sts. For mention of the house in this year, see Ag 625; see also Henry Waessey's account under Mr 24.

The present firm of W. H. Schieffelin & Co., wholesale druggists and manufacturers of pharmaceutical preparations, was originated in 1794 by Jacob Schieffelin, whose warehouse was at 193 Pearl St.—King's Handbook (1897), 911.

"This day the new-built Episcopal Church, entitled Christ's Church in Jan., in Soho, was dedicated; and the door opened."—N. Y. Daily Gaz., Ja 1, 1794. The sale of pews was to commence on March 25.—Daily Ady., Mr 18, 1794. This congregation, the first Episcopal one in the city independent of Trinity Church, had been incorporated in 1793. For its later history see Mag. Am. Hist. (1888), XIX: 60-62; L. M. R. K., III: 532.

Abraham Brower is admitted to partnership with Samuel Loudon and his son, and their paper appears as The Diary or Evening Register.—Brigham, A. A. S. Proc. (1917), 407; Early Newspapers, II: 419. See O 22.

Thomas Greenleaf changes the title of his paper (see My 4, 1790) to Greenleaf's New York Journal & Patriotic Register.—Early Newspapers, II: 414; Brigham, A. A. S. Proc. (1917), 434. He started another paper on Mar. 11, 1795.

"The city treasurer lays before the common council an estimate of Expenses of the City & County of New York for the Year 1794 including Fees of Collection & other Deductions." It shows a total of £20,000, and is to be raised by tax, for which purpose the board approves a petition to the legislature for a law authorizing the raising of the money by a tax.—M. C. C. (1784-1831), II: 54. This was the annual proceeding. Cf: Ja 5, 1795; Ja 25, 1796.

Pursuant to resolutions adopted at its previous session, the legislature begins its seventeenth session, at Albany. It adjourned on March 27.—Assembly Jour. (1794), 3, 180; Senate Jour. (1794), 3, 54. It next met at Poughkeepsie (see Ja 6, 1795).

"From a calculation made on good ground it appears, that the banks in this city [New York] circulate to the amount of three
1794 millions of dollars. This is probably a sixth or seventh of all the current specie and bank notes in the United States.”—Am. Minerva, I 3, 1794.

13 Congress passes a law providing that, on and after May 1, 1795 (p. 21), “the flag of the United States, be fifteen stripes alternate red and white. That the Union be fifteen stars, white in a blue field.”—Laws of U. S., 3d cong., ch. 1.

14 The vestry passes a resolution that “the Four Streets to the Southward of Hubert Street be named as follows: Vestry Street, Light-street, Desbrosses Streets, and Watts Street.”—Trin. Min. (M.S.).

16 Aaron Burr, writing from Philadelphia to his daughter Theodosia, says: “On Sunday se'might (I think the 26th) I shall, unless baffled or delayed by ice or weather, be with you at Richmond Hill.”—Mem. of Aaron Burr, I: 375. This reference shows that Burr occupied Richmond Hill at least three years before he procured his long lease from Trinity Church (see My 1, 1797). In 1795, he was still in possession of the house (see Ja 5 and S 17, 1795). The city directory for 1794 gives Burr’s address as “office in Partition-street, and house on Richmond hill,” but the directories for 1795-97 record only the business address.

Another authority states: “The house at Richmond Hill, Greenwich Village, in which Aaron Burr lived, was a notable resort for the learned and elegant people of New York. . . . Burr occupied it for a country residence before he became Vice-President. There he entertained Jerome Bonaparte, Talleyrand, Volney, Louis Philippe, and many other notable foreigners, as well as the leading members of New York’s early aristocracy. . . . It was the habit at Burr laid his far-reaching political plans. Jefferson, Madison and Hamilton all visited and dined there. Mayor Edward Livingston, beloved of the people, was an especially favored guest. . . . The gateway to the grounds stood about at the end of MacDougal Street, and north of the gate was a pond, generally called Burr’s Pond.”—Moss, The Am. Metropolis, III: 304-5. See also Pélign, Theodosia, the first Gentlewoman of her time, chapter on “Richmond Hill,” and Parton, Life of Aaron Burr, 154.

19 The first steps are taken for building a new almshouse. The common council decides that “the present Buildings” have “become unfit for the comfortable accommodation of the Poor and in so ruinous a Condition as not to justify the expending any more Monies therein in repairs.” A petition to the legislature is decided upon, “for leave to set on foot a Lottery for the raising of $40,000 to defray the Expenses of erecting a new Building competent for the Purpose.” Such petition is at once read and agreed to by the board, which orders that it be sealed, signed by the mayor, and given to the members of senate and assembly from this city.—M. C. G. (1784-1831), II: 60. See also Man. Cor. Coun. (1806), 601. See, further, Je 16.

20 John Vennor, before the common council “Certificates and Vouchers to support the Claim of this Bd against the Public for the Arms & Accoutrements taken out of the City Hall & furnisht to the Continental Troops raised by this State in the Year 1775.” The board orders that a petition to congress for payment for them be prepared.—M. C. G. (1784-1831), II: 60. Congress rejected the petition.—Ibid., II: 79.

21 The city pays (1797) $1,747 “towards the Expenses of the Committee for prevent[ing] the spreading of infectious Disease.”—M. C. G. (1784-1831), II: 61.

22 Half of Blackwell’s Island is again offered for sale (see Mr 8, 1784), regarding which information is offered by Joseph Hallett of 204 Water St., or by Josiah Blackwell of Newton, L. I.—N. Y. Jour., Ja 22, 1794.

24 John Butler founds a society of Unitarians in New York. He was doubtless the first Unitarian who preached here. He issued his first public notice on this day.—Daily Adv., Ja 24, 1794; McMaster, Hist. of the People of the U. S., II: 238 et seq; Winson, VIII: 487. His meeting-place was an “assembly-room” on Cortlandt St., near Broadway.—Ibid. A so-called “Unitarian Society” is mentioned in his published notice in the Daily Adv., Mr 14, 1794. His notices ceased in April, two months prior to the arrival in New York, on June 4 (p. v.), of Joseph Priestley, the scientist, afterwards known as one of the founders of Unitarianism in America. The first preaching in New York after Unitarianism became recognized as a distinct religious denomination was on April 25, 1819 (p. v.). See also Winson, VIII: 487.

The common council appoints a committee to determine whether the made ground on the East River front in the vicinity of Wall St, is sufficient to bear buildings of stone or brick.—M. C. C. (1784-1831), II: 62; see also ibid., II: 68, 74-75, and many other similar examples, between 1791 and 1796, showing the operation of the law governing such cases, referred to under date of May 3, 1792 (p. v.).

11 A letter, signed “Democrat,” is published, appealing to “all true Republicans” to change the names of King, Queens, Princess, and Duke Sts.—Am. Minerva, F 11, 1794. This was answered later by “Condor,” whose objection was that “the names of towns, cities and streets in America are standing historical monuments of our country.” The Long Island and New England, Holland, Germany or France, the first settlers came, and the names of King and Queen street tell us we were once subject to a foreign monarch. This so far from being a reason for abolishing the names, should be a reason for preserving them . . . .”—Ibid., Ap 19, 1794; and see D 30, 1795.

Nevertheless, the following notice was published (probably late in the year) regarding alterations made in the names of certain streets, and in the method of numbering the houses:

“That was formerly known by the names of Little Water-street, Albany-pier, Louis, Governor’s, Hallett’s and Jones’s wharfs, and Front-street, are now called Front-street, from White-hall to Beckman-slip.

“Little Dock-street, Cruigan’s wharf, and Water-street, are now called Water-street, from Front-street to Catherine-slip.

“Pearl-street, Great Dock-street, Hanover-square, and Queen-street, are now called Pearl-street, from State-street, near the Battery, to Chatham-street.

“Duke and Stone streets are now called Stone-street, from Whitehall-street to that part of Pearl-street formerly called Hanover-square.

“Princess and Beaver streets are now called Beaver-street.

“The numbers in all the above streets begin at the West end.

“Smith-street, William-street, and King George-street, from the Old-slip to Pearl-street, near Chatham-street, are now called William-street, and the numbers begin at the Old-slip.

“Great George-street and Broadway, are now called Broadway, from the Government-house (where the numbers begin) to a little beyond the Hospital.

“Copie-street, near the Battery, is now called State-street, and the numbers begin at Whitehall-street.

“Prince-street is now called Rose-street, and the numbers begin at Frankfort-street.

“Golden-hill and John-streets are now called John-street, and the numbers begin at Broadway.

“Crown-street is now Liberty-street, and the numbers begin at Maiden-lane.

“Fletcher and Cooper streets are now called Fletcher-street, and the numbers begin at Pearl-street.

“Little Queen-street, is now Cedar-street, and the numbers begin at William-street.

“Broadway, it was intended by the Corporation, that what was formerly King-street should be called Congress-street, . . . but the Corporation have lately appointed it to be called Pine-street, and the numbers begin at Broadway.

“Maiden-lane and the Fly-market, are uniformly called Market-street in this Directory [for 1794]; but the Editor understands, that from Broadway (where the numbers begin) to No. 112, corner
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1. John Ireland advertises to let "That beautiful garden, near the Hospital, called the Ranlach" (see Ap. 5, 1788). In the garden are apple, pear, peach, plum, and cherry as well as nut trees, berries of all kinds, flowering shrubs, asparagus, etc. There is a "very charming grove" as well as a "tolerable good dwelling house adjoining the garden." Applications are to be made to Ireland, on the premises. —Daily Advr., Mr 5, 1794; L. M. R. K., III, 952.

2. Jonathan Ludlow, a friend of De Witt Clinton, writes that the news of the recapture of Toulouse is celebrated in New York by the ringing of Bells ringing of Cannon hoisting colours singing & dancing to the Tune of the Carnaginis in the Tonifie in the evening & the special meeting of the Democratic Society attended by congratulations & other expressions of republican joy which Mar. was read in the Countenances of all the well wishers to the pure cause."—Letters to De Witt Clinton (MS.), I: 24, in Columbia Univ. Library.

3. All "True Republicans" are invited to secure tickets for a collation at Corre's Hotel, 69 Broadway, to commemorate the "glorious account" lately received of the recapture of Toulon and the "successes of our brave Republican Friends and Allies." Officers and soldiers of the militia are requested to appear in uniform.—Daily Advr., Mr 10, 1794. American and French officers and about 800 citizens "paraded through several of the Streets with the two Flags join'd and the Liberty Cap, to Corre's Hotel where a Colla-
tion was provided for such as had tickets."—Alex. Anderson's Diary (MS.), in Columbia Univ. Library.

4. Edward Livingston writes from New York to De Witt Clinton: "The English party is apparently unabated here[;] after finding from two specimens we gave them that the People were no longer desirous to bear the insulting injuries of Britain[,] the warmest of her Friends acknowledge that She has 'misused us past endurance' . . . the Ministerials now talk of nothing but a Standing Army who are to Swim across the Atlantic & pluck the Crown from George's Brow—while they give 20,000 Dolls to fortify our port they are to raise 15 Regiments to guard it—We are in Great Tribulation at the loss of the bill for fortifying the harbour for every Military man that I have conversed with thinks the provision of Congress so totally inadequate that we must be forced to Supply the deficiency by Subscription unless the Legislature try a Second bill" (see Mar. 20).—Letters to De Witt Clinton (MS.), I: 25.

5. As to the causes of ill-feeling between the provinces of Lower and England, see McMaster, Vol. II, chapters 8 and 9. They are also indicated in the instructions to Jay on April 19 (p. v.), and in the treaty of Nov. 19 (p. v.).

6. "Baron Stuben has been to take a view of the harbor of this city, to ascertain, for his private satisfaction, the best place for erecting fortifications. We hear he is decidedly of opinion, the best place for the town, several miles from this city. This place was contemplated by the British, during the last war; in case they had been necessitated to guard the city from an attack by sea. It is judged that resistance at that place will be as effectual as any other, and certainly stand at a distance from the city will be the most eligible."—Am. Minerva, Mr 17, 1794.

7. The common council orders that the committee on improvements in the Fields (see JI 53, 1792) "employ a Person to keep the Boys & Cattle from injuring the Trees." —M. C. G. (1784-1811), II: 68.

8. The proprietors of hackney carriages publish a scale of fares for different parts of the city, "to prevent impositions by the Coachmen." Among the items are the following: "To take up and set down one or two passengers within the town, to the south of the tea-shop-pump." 4s. "For waiting for company in town, each hour," 4s. "To carry or fetch one passenger to or from Belvidere, by day," 4s. "For every other exceeding one," 2s. "To carry or fetch one or four passengers to or from Belvidere, by night," 8s. "To go to Bell-View," 16s. "To round Apthorpe's tour," £1.8. "To go to Harlem, one day," £1:12. "To go to Harlem, half a day," £1.12. "To go to the fort," £2. "To go to King's Bridge," £2.8. —Daily Advr., Mr 18, 1794.

9. George Buncy calls his paper American Minerva, Patroness of Peace, Commerce, and the Liberal Arts, And the New-York (Evening) Advertiser. On the following day, the name was shortened to American Minerva, And the New-York (Evening) Advertiser. —Brigham, A. A. S. Proc. (1917), 548-82.

11. At a meeting of the citizens at the Cocoa House a committee of five is appointed "to dispatch an express to-morrow to the Assembly [at Albany] with a petition for a greater sum for fortifications [see Mr 13]."—Anderson's Diary, 1794 (MS.), 50. See Mr. 26.

Of his visit he writes: "... We moored our vessel at Burlington slip . . . and . . . I landed, and enquired out the Tontine coffeehouse. New York is much more like a city than Boston, having broad footways paved, with a curb to separate them from the road. The streets are wider, and the houses in a better style. . . . The Tontine tavern and coffee-house is a handsome large brick building; you ascend six or eight steps under a portico, into a large public room, which is the Stock Exchange of New York, where all bargains are made. Here are rows of every ship's arrival and clearing out. This house was built for the accommodation of the merchants, by Tontine shares of two hundred pounds each. It is kept by Mr. Hyde, formerly a woollen draper in London. You can lodge and board there at a common table, and you pay ten shillings a day, whether you dine out or not. No appearance of shop windows as in London; only stores, which make no show till you enter the house. House rent is very dear; a hundred pounds stabling a year is a very usual price for a common storekeeper. . . ."

"... In the evening called on Mr Jay, brother to the Ambassador, and took a walk with him and Mr Armstrong, to the Belvidere, about two miles out of New York towards the Sound— an elegant tea drinking house, enclosed with a gallery, at one story high, where the company can walk round the building and enjoy the fine prospect of New York harbour and shipping . . ."

"From hence we crossed the Boston road, to another tea drinking house and garden, the Indian Queen. This place is filled by Frenchmen with their families. Here they all wear the tri-coloured cockade, I observed, whether aristocrats or democrats."—*Jour. of an Excursion to the U. S. in the summer of 1794*, by Henry Wharton, (1795), 73-74.

"Resolved That the Committee appointed for that purpose proceed with the Building of the Steple of St. Paul's Church according to the Plan agreed upon by the Vestry."—*Trin. Min. (MS.).* The steepel was designed by James Lawrence (see O 3, 1793). It was finished by Dec. 1 (q.v.).

An embargo for 30 days is laid on all ships and vessels in the port of New York—*Laws of U. S., 3d cong., p. 140.* On April 18 the embargo was extended until May 25—*Ibid., p. 141.* See also McMaster, *Hist. of the People of the U. S., II: 173-74.

"The legislature passes "An Act authorizing the Erecting of Fortifications within this State." This is done because the monies that may be appropriated by the congress for fortifying the city and port of New York may not be sufficient. The sum of $50,000 is appropriated "for the purpose of repairing and erecting fortifications at or near the city and port of New-York." George Clinton, Matthew Clarkson, James Watson, Richard Varick, Nicholas Fish, Eheenzer Stevens, and Abijah Hammond are named commissioners, with full power to repair and erect such fortifications. They are to procure cannon and ammunition, by applying first to the president of the United States. They may appropriate part of the accommodation of the buildings and equipping of one or more floating batteries." Other commissioners are named for the western and northern frontiers.—*Laws of N. Y.* (1794), chap. 41 (Webster, III: 61). The legislature made further provision on April 6, 1795 (q.v.).

"As the deprivations committed by the Algerine corsairs on the commerce of the United States render it necessary that a naval force should be provided for its protection," congress authorizes the president to provide and equip four ships of 44 guns each and two of 36 guns each.—*Laws of U. S., 3d cong., chap. 12.* The keels of three of these frigates were laid, but when the U. S. made peace with Algiers in 1795 (q.v., S §), their building was stopped. They were later completed, and the first one, the "United States," was launched on May 10, 1797 (q.v.). They were the foundation of the U. S. Navy.—*McMaster, Hist. of the People of the U. S., II: 170-71, 321-24.*

"The legislature passes an act to "prevent the bringing in and spreading of Infectious Distempers in this State." It provides, among other things, that from time to time Governor's Island may be appropriated for the purpose of erecting hospitals to accommodate infectious patients only. Any grant made by the Regents (see Mr 31, 1790)—*Laws of N. Y.* (1794), chap. 53 (Webster, III: 68-69).

"On the night of the 27th, two English vessels attempted to leave port by way of Hell Gate, "notwithstanding they knew of the embargo." On the morning of the 28th, the collector of the port requested "the Brigadier General of the Militia of this state" to assist him in pursuing and bringing them back, but the time being too short to call out a detachment of militia, "a number of young citizens of different regiments stepped into the customs house boat, under the command of an officer, and proceeded up the East River, shortly after which the two vessels were safely moored in our harbour."—*Greenleaf's N. Y. Jour.,* Mr 29, 1794.

Gardiner Baker writes from the Exchange to the common council, soliciting their "favour and approbation to occupy the vacant lot of ground, on the corner of Pearl Street fronting the Battery as A Menage for the use of the Present Living Animals and Birds that belong to the Museum [see N 1, 1793] and those that may hereafter [sic] be collected, the present number consists of Five Animals and Two Birds." He declares that if his request is granted he will "Cows the Lot to be enclosed with a neat fence, which shall be handsomely painted, so as to be in some measure ornamental."—*Misc. MSS. (Box B) in N. Y. H. S. the common council accorded to the petition on April 1 (q.v.).

The common council refers to the street committee a petition of William Valleau for permission to erect and fill in a bulkhead "so far to the River in front of his Ship Yard at Cullers Hook as to enable him to launch Ships."—*M. C. (1794-1831),* II: 69.

"The common council grants to Gardiner Baker, keeper of the Museum, "the use of the small Corner Lot at the end of Pearl Street near the Battery."—*M. C. (1794-1831),* II: 69.

"The methods employed to prevent yellow fever being conveyed to New York are indicated in a common council order to pay one Verdin Elksworth $47.8 for "the storage of Baggage of Passengers from Phila during the late infectious Fever—the use of his Boats by the Committee and for subsisting the two Marshalls stationed at Powhus Hook by order of the Committee."

The legislature having granted money to "indemnify the city for the expense incurred last year in levying the Malignant Fever at Phila being brought into this City," the common council orders that the mayor be requested to draw an order, on behalf of the board, on the state treasurer to pay the city treasurer.—*M. C. (1794-1831),* I: 71.

The commissioners "appointed to direct the fortifications, proposed at this port," go down to The Narrows. On the following day "they proceeded to Governor's Island, to examine and determine on the most proper places to erect forts and other works for the defence of the city and harbour."—*Greenleaf's N. Y. Jour.,* Apr 5, 1794.

"It is in contemplation to add furnaces with apparatus on an entire new plan, to all the fortifications at the entry of the harbours of the United States by which shot may be heated Red Hot, and then the arrangements calculated on the prospect of war should not be neglected, nor too long postponed . . . Great Britain has acted unwisely and unjustly; and there is some danger of our acting intemperately."—*Corresp. and Pub. Papers of John Jay, IV: 2-3.* See Apr 19.

"As many people are now setting out trees in the streets of various parts of the city, would it not be advisable to observe some uniformity and exactness in setting them out? In the Broad Way particularly, a continuation of trees from Trinity Church, along what is called Jarvis's Parade, as far as St. Paul's, would look very beautiful, and cause the said Parade to be cool and pleasant for a walk in the summer mornings."—*Diary, Apr 9, 1794.* See also descrip. of Pl. 68-b, I: 452.

"Major Varick, "as one of the Commissioners for erecting Fortifications for the Defence of this City," informs the common council that the commissioners "had determined on the erection of Works on Bedlow's Isle & on Ellis's Isle and that the Law under which they acted required that the Land on which the Fortifications are erected must be vested in the People of this State and therefore that it will be necessary for this Board to grant surrender
& assign the said Isle called Bellows' Isle & the Soil from high to low Water mark and assign to that Isle called Ellis's Isle for the Purposes of erecting Fortifications as aforesaid." The board orders that the clerk prepare the draft of a grant and report it to be published. — M. C. (1784-1831), II: 71-72. See, further, Ap 21.

The common council orders that the outside street or wharf from Whitehall Slip to Coenties Slip be 70 ft. wide. — M. C. (1784-1831), II: 72. The importance of the split was that the British fortifications, when lowered into the water and roundly ducked, then taken up, dragged through the streets and beat with clubs as it passed, to the no small diversion of the boys and other spectators. Such is the mode some nations adopt to manifest their zeal for religion, and their abhorrence of its enemies."— Diary, Apr 19, 1794.

The president appoints Chief-Justice Jay envoy extraordinary from the United States to "the Court of His Britannic Majesty." — Correspond. and Pap. Papers of John Jay, IV: 6. Jay's instructions, dated May 6, and signed by Edmund Randolph, secretary of state, give a clear statement of the causes and objects of the mission, the principal aim of which was "to repel war, for which we are not disposed, and into which the necessity of vindicating our honor and rights might drag us, should the British ministry, should they be resolved on war, with carrying with them the British nation; and, at the same time, to assert, with dignity and firmness, our rights, and our title to reparation for past injuries." These injuries and ways of redress are thus concisely summarized: "I. One of the causes of your mission being the vexations and speculations committed on our commerce by the authority of instructions from the British Government, you will receive from the Secretary of State the following documents [the official correspondence with Great Britain]. . . . You will perceive that one of the principles, upon which compensation is demanded for the injuries . . . is, that provisions . . . are not to be ranked as contraband . . . Compensation for all the injuries sustained, and captures, will be strenuously pressed by you . . . If the British ministry should hint at any supposed predilection in the United States for the French nation, as warranting the whole or any part of these instructions, you will stop the progress of this subject, as being irrelevant to the question in hand. It is a circumstance which the British nation have no right to object to us; because we are free in our affections and independent in our government. Instead of answering, upon the authority of the correspondence between the Secretary of State and Mr. Hammond, that our neutrality has been scrupulously observed.

II. A second cause of your mission, but not inferior in dignity to the preceding, though subsequent in order, is to draw to a conclusion all points of difference between the United States and Great Britain, concerning the treaty of peace . . . You were a minister at its [the treaty's] formation, the Secretary of Foreign Affairs when the sentiments of the Congress, under the confederation, were announced through your office; and as Chief Justice you have been witness to what has passed in our courts, and know the real state of our laws, with respect to British debts.

III, IV, and V. Jay is given discretion as to entering into negotiations for a commercial treaty; and, if he so decides, he shall make a treaty with certain stated objects, relating to reci-

19. Apr. 4

proportion, imports, safety of neutral commerce, contraband, blockade, visit and search, privateers, export of military stores, convoy of merchant ships, fishing grounds, inheritance by aliens, sale of prizes of war, pirates, shipwreck, safety of Americans in British dominions, indemnity for losses, war, troops in Canada along Great Lakes, etc. General instructions are added regarding such treaty. — Ibid, IV: 10-21. See My 12, and N 19.

A "fatigue party, consisting of about 50 officers of the regi-

ments of artillery and brigade of militia, of this city," perform a day's work on the fortifications on Governor's Island. — Daily Ady, Apr 19, 1794.

In accordance with the common council's order of April 14 (p. v.), the clerk produces "the Draft of Grant to the people of this State, Bellows' Isle & the Soil from high to low Waters Mark around Ellis's Isle for the purpose of erecting Fortifications for the Defence of this City and no other with a proviso that whenever all or any part of the Premises shall be no longer used for the purpose of Fortifications the same be revert to & vest in this Corporation." The board approves and orders that the grant be engrossed, sealed, and signed by the mayor. — M. C. (1784-1831), III: 71. Liber E of City Grants, p. 22 (in comptroller's office). Cf, however, Je 7 and 13, and Ag 10, 1796.

The common council orders that a ferry be established between New York and Nuttern (Governor's) Island, and appoints a committee to report regulations for it. — M. C. (1784-1831), II: 73. On May 5, this committee reported that it had agreed with John Hillyer to keep this ferry for one year from May 1, "He to provide a sufficient number of good Boats to carry Passengers and to receive three pence for each Passenger, to carry all fatigue Parties gratis & to keep in Repair the Ferry Stairs & to have the exclusive Privilege of the Ferryage." — M. C. (1784-1831), II: 75. See, however, Jc 22, 1795.

The common council orders that the artillery officers and the officers of Col. Post's light infantry companies have permission "to exercise in the Saloon of the City Hall." — M. C. (1784-1831), II: 73.

The common council orders that the following alterations be made in the names of the following streets: Stone St., Duke St., and the little street from Duke St. to Hanover Sq., to be considered one continuous street, and named Stone St.; Verlattenberg and Garden Sts. to be one continuous street, which shall be named Garden St., to be named Pine St.; Little Queen to be Cedar; Crown to be Liberty; Prince to be Rose; and Beaver and Princess Sts. to be one continuous street named Beaver St. — M. C. (1784-1831), II: 73-74. See also F 11.

A number of cartmen volunteer "to go on Governor's Island on Saturday next [April 26], to assist building the Batteries." They appeal to other New York cartmen, "possessed of the least spark of patriotism," to meet at the ferry stairs at Whitehall at eight o'clock that morning. — Daily Adv, Apr 23, 1794.

A news item states: "We hear that the Tammany Society are determined to improve the present opportunity of adding to the incidents of their distinguished zeal for the safety and welfare of the Republic in general and of this port and city in particular, by turning out to work with their own hands upon the fortifications in the harbor. By actions of this kind, the dignity and honor of true Republicans is shown." — Kilroe, St. Tammany, 187-88, citing Columbian Gaz., Apr 23, 1794. See My 2. For the reasons for these patriotic demonstrations on the part of the citizens, see Mr 13.

This is the day appointed for the Democratic Society to work on the fortifications on Governor's Island. — Daily Adv, Apr 26, 1794. According to a letter of April 3, the Democratic Soc. of N. Y. City, of which James Nicholson was president, had "the same objects in view" as the Republican Society of Ulster County. — Ibid, Apr 17, 1794.

The members of the Tammany Society were to meet on this day at "Tammanian Hall," to go to work on the fortifications on Governor's Island. — The Diary, Apr 29, 1794.

In the evening, the "English Republicans" or "natives of Great Britain, and Ireland" were to meet at "Mr. Ellis's Tavern in Water-street, near Crane Wharf," to fix a day to work on the fortifications. — Daily Adv, Apr 30, 1794. They appointed May 10 for the purpose. — Diary, My 3, 1794.

The students of Columbia College meet at "the old coffee house" at five o'clock, and fix upon May 8 for assisting at the fortifications on Governor's Island. — The Diary, My 2, 1794.

"To be sold at auction, On Friday, the 9th May, at 12 o'clock on the premises. The materials of the City tavern [see Ja 24, 1793], and the two adjoining buildings, the purchaser to remove the same, on or before the 15th June. A. L. Bleeker and Sons." — Daily Adv, My 1, 1794.

"The Republicans—Ship-Carpenters" are this day to meet at "Eden Hunt's Tavern, Water-street," to decide when to work on the fortifications on Governor's Island. — Daily Adv, My 1, 1794.

The Jayceemen Hatters . . . who may be inclined to assist at the public works, now going forward at Governor's Island," are requested to meet on the evening of May 5, "at the house of Mr. Bush in the Fields." — Daily Adv, My 3, 1794.
1794 This is the day appointed by the cordwainers of the city to work on Governor's Island. They are to meet at "the house of Mrs. Amory."—Daily Adv., My 5, 1794.

1 The Lawyers, disposed to contribute their labor towards completing the fortifications on Governor's Island are requested to meet at Hunter's Tavern tomorrow [May 6] to make necessary arrangements.—Daily Adv., My 5, 1794.

2 This is the day appointed by the St. Andrews Society of the State of New York to work at the fortifications "now erecting upon Governor's Island."—Daily Adv., My 5, 1794.

3 A "Professorship of Humanity" is instituted at Columbia College.—Assem. Jour., 18th sess., 8c. This was filled by the Rev. Eliah D. Rattoone.—His. of Columbia Univ., 78-79.

4 The "Penny-Malsters and Hair-Dressers" of this city are to work on this day on "the fortifications now erecting on Governor's Island." They are to assemble at the Exchange.—Daily Adv., My 6, 1794.

5 A committee of the General Society of Mechanics and Tradesmen is appointed to "confer with the Commissioners of Fortifications, to ascertain when it would be most desirable for the Society to assist at the public works on Governor's Island."—Annals of the society (1882), 31. Arrangements were subsequently made to contribute a day's work.—Daily Adv., My 24, 1794.

6 The students at law are requested to meet at "Mr. Hunter's tavern, Broadway, late Corre's hotel," on May 8th, to appoint a day "to contribute their labor towards completing the fortifications on Governor's Island."—Daily Adv., My 7, 1794.

7 "The patriotic Grocers of this City who are disposed to assist at the Fortifications erecting on Governor's Island, are requested to meet at the Old Coffee House," on the evening of May 9.—Daily Adv., My 8, 1794.

8 The Chamber of Commerce passes resolutions approving of Jay's mission to England.—Daily Adv., My 10, 1794. See also N. Y. Jour., 21, 1795.

9 The "patriotic Schoolmasters in this city" made arrangements "at citizen Gad Ely's schoolroom," on May 6, to assist at the fortifications on Governor's Island on the afternoons of this Saturday and the next.—Diary, My 8, 1794.

10 "The zeal of our fellow citizens, in aiding at the Fortifications does not yet abate, although there have been bodies of volunteers of 50 to 100 every day during the past 3 weeks."—Greenleaf's N. Y. Jour., My 10, 1794.

11 Chief-Justice Jay, envoy extraordinary to Gt. Britain (see Ap 19), sails from New York for England. A large number of citizens, assembled at the Battery, cheer and fire a salute as his vessel passes out of the North River. The Tammany Society celebrated its anniversary in the evening and toasted his mission as well as "the liberties of France."—Daily Adv., My 13, 1794.

12 Writing to Mrs. Jay, in a farewell note on May 12, Mr. Jay said: "... I have seen this day's newspapers, and the Philadelphian democratic resolutions published in them. They give me no concern, and I hope they will be equally indifferent to you. The less you say on such subjects, the less will you flatter the importance of those who may not wish us well...."—Corresp. and Pub. Papers of John Jay, IV, 21. In a footnote, Henry P. Johnston, editor of Jay's letters, adds this explanation: "... The resolutions referred to in the letter were adopted by one of the many Democratic clubs in the country which grew out of, and formed the popular enthusiasm over, the French Revolution. The Philadelphian Society denounced the English mission less than it reflected upon the President's appointment of Jay. It was claimed that his office of Chief Justice had been degraded to partisan uses—step 'the most unconstitutional and dangerous in the annals of the United States.'"

13 "Great credit is due to the citizens of New York for the spirit and unanimity with which they aid the works on Governor's Island. The voluntary services performed on the fortification amounts to many thousand days work. The zeal of all parties in that State, proves, that however different on speculative points, or certain measures of government of little importance, yet all men agree to put the country in a posture of defence. The difference of parties seems to be this; whether we shall go to war before it is necessary or not."—Am. Miner., My 12, 1794.

14 "The patriotic republican Bakers" of the city are to meet "at the flag staff, on the battery to contribute one day to the erection of the fortifications on Governor's Island."—Diary, My 8, 1794.

15 The cooper's are "to attend at Whitehall Dock" on this day, for the same purpose.—Daily Adv., My 9, 1794.

16 This is the day appointed by the tallow chandlers "to contribute their labour" toward erecting fortifications on Governor's Island. Boats are to be provided at the exchange.—Daily Adv., My 9, 1794.

17 This members of the Provident Society were requested "to attend at White Hall Dock" on this day to work on the fortifications.—Daily Adv., My 10, 1794.

18 The common council passes ordinances for "filling in Greenwich St. from Rector Street to the Battery;" and for "making the side walks from Pearl Street to front Street."—M. C. C. (1784-1831), III, 77.

19 This day was scheduled by the banns and curriers for their work on the Governor's Island fortifications.—Diary, My 15, 1794.

20 The "Moulders and others belonging to the Foundaries in this city," at a meeting held at "Brennynsen's tavern" on May 15, agreed to work on the fortifications on Governor's Island on May 17.—Diary, My 15, 1794.

21 "Citizens Rouquet and Migwevp" publish an advertisement in French that they "have opened an Academy of Arms, Dance, etc. in their lodgings in the Ambuscade hotel No. 241 Broad Way near the Bowling Green."—Greenleaf's N. Y. Jour., My 24, 1794.

22 Henry Wansey records (see, however, My 12): "Dined with Mr. Jay bee Mr 24, and in the evening went to the [John Street] theatre, with Mrs. Sands and her two daughters. ... the actors mostly from England: price of admittance for the boxes, one dollar. A very bad piece; a new one [the Paris] is going to be built by subscription, under the direction of Hodgkinson, the present manager...."

23 In 1790, there was but one[ ] printing press in New York; now there are near twenty, and some map engravers. The following newspapers are published at New York: the Daily Advertiser, American Miner, Daily Gazette, Daily Post, Greenleaf's N. Y. Journal, and one other that I do not know the name of [The Herald]. There were at least two presses here in 1740...."

24 "... I moved to more private lodgings, at Mrs. Loring's, near the battery. This is the pleasantest situation imaginable. Our common sitting room was fifty feet by thirty, and twenty feet in height, with windows on two sides of it. As we sat at dinner, we could see the vessels, on one side of the room, sailing out of the harbour; and on the other, the same turning up Hudson's River, apparently sailing round the house, within fifty yards of us.... At this house lodged Mr. Genet, the late French Embassador...."

25 "Mr. Genet is on the eve of marriage with General Clinton's daughter. Being a Girondist, he must not return to France again: he has now bought an estate near Jamaica, in Long Island, where he intends to reside...."—Journal of an Excursion to the U. S., 75-76.

26 On this day, the "members of the Deacon Society of this city, who propose assisting at the Fortifications erecting on Governor's Island," are to meet at "the Grand Deacon's house, in James's Street."—Daily Adv., My 17, 1794.

27 The Journeymen Cabinet Makers were requested, on May 15, "to attend the Masters with their apprentices" at the house of Jacob Brower, 29 Nassau St., on the 20th, to assist at the fortifications on Governor's Island.—Diary, My 15, 1794.

28 The German Society of New York, at a meeting presided over by the Baron Frederick William von Steuben, adopts a resolution that "all its members and all the German inhabitants of New York in general, if it was desired, should work for a day at the fortifications on Governor's Island," as "Life of Steuben, by Frederick Kapp (N. Y., 1859), 594. See Je 5.

29 "The New York Society for the information and assistance of persons emigrating from foreign countries" is established. It is made necessary by the great increase of emigration from Europe to the United States, due to "the oppressions of many of the governments of Europe, and the public calamities likely to ensue." Correspondents prove to the President that men may differ on the points of Protection and Liberty, yet studies on their arrival "in consequence of their being unacquainted with the manners and customs of the country, and the most eligible mode of establishing themselves in their several professions." The society adopts a constitution. The president is Wm. SIng, and the secretary L. Wayland.—Am. Miner., Jl 15, 1794. See O 15 and 21.

30 The "Republican Stone-Cutters in this City" are to go to
Governor's Island this day to contribute one day's labor to the fortifications.—"Daily Adv., May 24, 1794.

The French and American truants are to contribute a day's work at the fortifications. See My 31, 1794; and Wansey's Jour. (1796), 81.

The common council orders "that an Ordinance be prepared to prevent the danger arising from the watering of Horses at the public Pumps."—M. C. G. (1784-1811), II. 79. The title of the ordinance, as passed on June 2, is "A Law to prevent danger from Horses going loose or at large in the Streets of the City of New York."—Ibid., II. 80.

Wansey goes to Governor's Island to see the fortifications.

"General Clinton was there to inspect the trying of some cannon just planted on the new battery, and we . . . afterwards returned with his Excellency, in his eight-ored barge." . . .

Wansey, Sec., to the federal hall, ; there I was shown a handsome library, with a large collection of books; some good paintings also by Trumbull (an American artist, student under West) of General Washington, Governor Clinton, and Mr. Hamilton.—"Wansey's Jour., 82-83.

This is the day appointed by the "associated body of House Carpenters of the City," on May 26, for their work on the fortifications. "The house carpenters are to meet at the Flag-Staff on the Battery."—Daily Adv., My 26; see also Jc 3.

Wansey describes 'Dickson's cotton manufacture at Hell Gates, about five miles from New York;" also one at Brooklyn. He mentions one at Beverley, Mass., and another at "Paterson, fifteen miles west of New York." He adds shrewd critical observations on the way these establishments should be conducted.—Wansey's Jour., 88.

Hugh Torrance, president of the associated body of house carpenters of the city, announces that they are to meet in front of Trinity Church this morning to go to work on the fortifications at Governor's Island. All carpenters are invited to "join in the laudable fatigues of the day."—Daily Adv., Je 3, 1794.

The Republicans in Ireland "are about to meet on the 12th of this month at the home of Mr. O'Sullivan, at the foot of the Mountains, to consider the situation of the country and the measures that may be necessary to be adopted for the safety of the nation."—Ibid., Je 12, 1794.

"John Jacob Astor, No. 149 Broadway, Corner of Crown-street, gives Cash for all kinds of Furs; and has for sale A Quantity of Hatter's Fur. Also to Let on Leases Several pleasant situations of Lots in the Bowery; a little North of the Bull's Head Tavern."—N. Y. Daily Gen., Je 3, 1794.

Rev. Joseph Priestley, LL.D., arrives from England. Addresses from the colleges and societies of New York are presented to him, including the Democratic Soc., the Tammany Soc., the Associated Teachers, and the Republican Natives of G'th Britain and Ireland. He declines to join the Democratic Society. As explained by Henry Wansey, "The first principles of this Club is a rooted aversion to any change, and a close attachment to the old etab.'d principles of Fancipolitics."—Wansey's Jour., 87-90, 261-83; Observations on the Emigration of Dr. Joseph Priestley, and on the several addresses delivered to him, on his arrival at New York, a religious-political pamphlet, by William Cobbett (London, 1794). Later editions appeared under Cobbett's pseudonym "Peter Porcupine."—Sabine's Dict., IV: 185-86. See also McClintock, II: 207.

Wansey, describing the public buildings in New York, says the "Governor's House" is "a very handsome brick building, with a portico, similar to the mansion house in London. . . .

"The exchange, he says, "is a very poor building, standing on arches." It has been "disused since the Tontine coffee house was built, at which place the merchants now meet and transact their business."—Wansey's Jour., 92-93.

"The library, or Literary Coffee-house, now building, is in form and style something similar to the governor's house, though not so large."—Ibid., 93. The Society Library on Nassau St. was under construction at this time.—See My 16, 1793, and Ap, 1793. Wansey's observation doubtless applied to the library rather than to the Tontine Coffee House in Wall St., which had recently been opened. Compare the view of the library (see Kepp's Hist. of the N. Y. Society Library, 230) with the view of the government house (Pls. 61 and 66) and see the view of the Tontine Coffee House (Pl. 69, Vol. I).

"Columbia College is a handsome old edifice. The Hospital and the Workhouse appear in the same style, and adjoint to it."—Wansey's Jour., 93. See Landmark Map, Vol. III.

"In the front of Trinity Church is a monument to the memory of General Montgomery."—Ibid., 93. This, of course, is an error for St. Paul's Chapel.

The constitution of the N. Y. Tontine Assn. bears this date. It states that 203 shares were subscribed for, at $200 a share, severally depending upon a life selected by each subscriber, who stated the age, etc. of each nominee, during whose natural existence he was to receive his equal proportion of the net income of the establishment. Upon the death of the nominee, the subscriber's interest ceased, and his interest became thereby merged in the owners of the surviving nominees. The "nominations" by the subscribers were not completed until March, 1795.

The preamble names its building the Tontine Coffee House. It directs that it be kept and used as a coffee-house. On the opening of the Merchants' Exchange, a little to the west on the opposite side of Wall St., the interests of the shareholders demanded a change in this particular; and they applied to the court of chancery for permission to let the premises for general business purposes; and by its decree in 1834 the restrictions were removed.—From article by Fredk. De Peyster in Mass. Com. Coun. (1822), 428-59. The Constitution and Nominations of the Subscribers to the Tontine Coffee House (47 pp., 480) was published in 1796. There is a copy with the De Peyster papers, in the N. Y. Hist. Soc.

For full account of the tontine system, and the early history of this association, see the De Peyster article, op. cit., and an account published by him in 1825. See, further, Ja 21, 1797.

The first American neutrality act is passed by Congress.—Witors, VII: 465. It defines the principles of neutrality, and prescribes penalties for their infraction.—Acts of Congress.

The German Society assembles in the morning "at the Lutheran school-house in Nassau St., and, led by their president, proceeds with painting colors and music, through Broadway, down Whitehall, to Governor's Island." Here the mayor allotted lots to them and they worked until sunset.—Life of Friedrich Wilhelm von Steuben, by Friedrich Kapp (N. Y., 1859), 594.

The governors of the N. Y. Hospital agree upon an address to the citizens, as an appeal for contributions, and they order that it be signed by their president and published. It contains a history of the society and of its building, beginning with 1779, when first organized; followed by the petition of March, 1779, to Lieut.-Gov. Colden for incorporation; the grant of a charter on June 13, 1771; the raising of funds under the provisions of a by-law; the petition of Feb. 2, 1772, from the governors to the assembly asking for a grant of money, and the act passed giving them $500 per annum for 20 years; the arrival from England of Dr. John Jones with a proposed plan of a building in which some alterations was approved by the governors; the partial destruction by fire of the unfinished building, Feb. 28, 1775, involving a loss of $5,000, the society's petition, in the next month, to the assembly for a grant of $4,000, which, being secured, was spent in rebuilding; the occupation of the building during the war as a British garrison; its later restoration, and its first occupancy as a hospital in January, 1791; the memorial and contract of March 1792, which secured from the assembly a grant of $2,000 for five years, etc.—Daily Adv., Je 21, 1794.

Dr. John Rodgers, president of the "New York Society for promoting Christian Knowledge and Piety," publishes the constitution of this society, one of the objects of which is to distribute the Bible and religious tracts among the poor.—Herald, O 27, 1794.

The annual meeting on June 5, 1795, was held in the federal hall.—Greenleaf's: N. Y. Jour., Je 13, 1795.

The "Yankees" resident in New York, "who are destitos of adding their Republican mite in forwarding the fortifications on Governor's Island," are requested to meet at the "Coffee House" on June 12.—Am. Minerva, Je 7, 1794.

This was the Merchants' Coffee House.—L. M. R. K., III: 979.

A committee of the common council, appointed to confer with Trinity corporation regarding a petition which the church has made, reports, and the board decides to "grant their Estate and Interest in the Soil between High & low Water Mark so far into the River as to extend to the East side of a Street, of 50 feet wide, 150 feet West of Washington Street" (which is to be continued).

19

This is on condition that Trinity corporation, without delay, "dig out Greenwich Street agreeable to the Regulation thereof, so as to make it convenient for the passing of Carriages of Pleasure & Burthen And also that they do without delay lay a good & sufficient Wharf or Bulkhead, the out-parts of which to be 120 feet from Washington Street aforesaid and make and the said Street of 70 feet wide and 100 feet broad and frame together with the said Wharf or Bulkhead in good order & Repair."—M. C. C. (1784-1831), II: 81-82. This resolution was delivered to Trinity vestry on June 16, and accepted.

—Ibid., II: 87; Trin. Min. (MS.). See, further, Jl 14. This is the first proposal in regard to the opening of the street later known as West St. In 1798 (q.v., Feb. 12), the city sought over from the legislature to make this street. Concerning the date of actual opening, see descrip. of Pl. 71, II: 456, where it appears that, while West St. existed in some form as early as probably 1800, it was not actually laid out and regulated until 1830.

The common council orders payment of £314 to Evert Bancker, Jr., "for the half of his Acc for numbering the Houses;" £109: 1710 to Isaac Terhune "for printing & putting up the numbers & Names of the Streets" and £315 to Wm. J. Elsworth "for tin plates for the numbers."—M. C. C. (1784-1831), II: 82. On March 9, 1795, £1216 was paid "for putting up the Names of Streets 6th Ward."—Ibid., II: 133. This was in accordance with the method adopted on Dec. 30, 1793 (q.v.). On Oct. 30, 1797, the common council paid £9:30 to Jonathan Furman "for numbering the Houses in several Streets in Long-St.," and £145 to Gov. Clinton issues an order that "All Ships and Vessels of War belonging to Foreign Nations other than such as are employed in Commerce, coming into this Harbour, are forbid approaching the City nearer than one mile Southward of the Southernmost Point of Governor's Island; and all other Ships and Vessels of the Description first mentioned now in this Port, are with all convenient speed to remove to a situation conformable to the above."—Daily Adv., Je 13, 1794.

At this time Henry Wansey returned to New York. He thus refers to the favourite lodging-houses: "Mrs. Loring's pleasant lodging house being too full to admit me, I took up my quarters at Mrs. Gordon's No. 137, Greenwich-street, a new built pleasant house, paying eight dollars a week, for lodging and boarding."—Wansey's Jour., 1794.

The common council orders payment of £20147 for "the Expenditure of the Corporation on Goverts Island" (see S. 1793).—M. C. C. (1784-1831), II: 83.

The common council appoints a committee "for purchasing Materials for the erection of a new Alms House." Add. Stoutenburgh is made chairman.—M. C. C. (1784-1831), II: 89. See Je 30.

Grant Thorburn, writing in 1845 of events and the appearance of the city at this period, said, among other things:

"There was only one hosiery-store in the city; it was kept by Mr. Winslow, at number nine Wall-street. . . . Then, there was not a broker in Wall-street. . . . Mr. Winslow's shop was in an old frame-building, next house to the corner of Wall and Broad-streets, on the Broadway side, in Wall-street. The first house round the corner, in Broad-street, was an old Dutch frame-building, the gable-end fronting the street, with five or six steps to climb up to the stoop, having a broad board on each side of the door, forming a comfortable seat for eight persons. Here John Babbs kept an iron cage manufactury, wherein to confine tame birds in a free corsery. . . . From this stoop that general Hamilton addressed the sovereign people, assembled in front of the old City-hall, in 1795, to consider on, dispose of, and discuss the merits of the famous British treaty, whose fate was then pending before Congress. [Here he describes the burning of the treaty at Bowling Green.] A large buttonwood-tree stood at the corner of Broad and Wall-streets at that time . . . [see descrip. of Pl. 67, I: 446]. I verily believe it had stood there since the days of Governor Van Twiller. On the opposite corner, where Burtell keeps his blank-books [in 1845], there stood the only [not so] watch-house then in New York. Next to the watch-house, in Broad-street, was the residence of the worthy and venerable Doctor Anthon. Lower down dwelt Conrad W. Ham, who, for crackers, cakes, oyl cooken, was second to none. This was the house of Nicholas Boge. On the opposite side of the house of Alderman John Nitche. These three were the last of the Mohicans, and with them may be said to have perished the last of the Dutch dynasty in Broad-street." (pp. 145-150.)

"In my own time I remember the old Tea-water pump, which stood between Centre and the rear of the lots on Chatham-street; which was then, in 1794, considered the only water we could obtain fit for drawing tea. It was brought to our doors, and sold for a penny-halfper gallon. It is said that I, and my companion, believed, if not, indeed believed, it up about eighteen years ago. I found the water brought by a pipe into a liquor store, in the house No. 126 Chatham-street. I drank of it to revive recollections." (p. 214)—Thorburn, Fifty Years Reminiscences of New-York (1847).

A list is prepared of the proprietors, tenants, and measurements of Old Slip, from Pearl to Front St.—See the original MS. (item No. 21, J, M. N. Y. Hist. Soc.).

John Ireland conveys to the city as much land as may be necessary to continue Barley St., at its present width, from its termination at the east side of Ireland's land, through his land, to that of Trinity corporation.—Liber Ancient Conveyances, I, 22, in register's office. Barley St. was the name of the present Duane St., from Greenwich to Pearl St.—See L. M. R. K., III: 998.

The sail-makers of New York are to meet at the exchange to "join the fatigue" at the fortifications.—Greenleaf's N. Y. Jour., Je 21, 1794.

The first regiment of militia of New York City and County, and other citizens, assemble on their regimental parade, and proceed to Governor's Island, where they perform a day's labour on the fortifications. This "fatigue party" consisted of 264 men.—Dutch Jour., 1794.

The "Patriotic Sawyers" are to meet on this day "at Hunter's Hotel, Broadway," to appoint a day for work at the fortifications.

Greenleaf's N. Y. Jour., Je 18, 1794.

Wansey mentions James Rivington as the "bookseller, formerly of St. Paul's Church-yard," and who is "still a cheerful old man."—Wansey's Jour., 1794.

"The Commissioners appointed to repair and erect Fortifications in the City of New-York and its vicinity, present their thanks to the members of the Corporations, the Militia and the different Societies . . . of their fellow citizens who have contributed their aid in forwarding the works on Governor's Island. Considering the advantages which will at all times result from being in a respectable state of defence, and to which works may be applied by affording proper places of confinement for Culprits, and thereby forwarding the views of the Legislature in mitigating the rigor of our criminal code, the incompetence of the sum allowed, and the difficulty of procuring laborers at this season of the year, the Commissioners feel themselves justified in calling on their fellow citizens for a continuance of their liberal aid."—Daily Adv., Je 25, 1794.

Gravesend (Coney Island) is already a "summer resort," according to Wansey, who says: "A Mr. Bailey, of New York, has just built a very handsome tea-drinking pleasure house, to accommodate parties who come hither from all the neighbouring parts; he intends also to have bathing machines, and several species of entertainment. . . . So much complimentary resort to this pleasant island on each fine Sunday, from New York and other places, as to keep four large ferry boats, holding twenty persons each, in constant employ. Between three and four thousand persons had passed over that day."—Wansey's Jour., Ju 18-19.

Wansey makes the following observations about New York:

"It is a clean, healthy town, the streets pitched with pebbles, and the foot-way paved and raised as in our principal towns; in some places with broad stone, in others with brick only.

"The soil is very sandy, and soon burnt up by the sun; it would take rain almost every other day. The water is very hot to drink, except at one pump in Queen-street, which is called the tea-water pump; and another at Mrs. Loring's & near the Battery. . . ."

"In respect to their buildings, I date a new era from their acceptance of the federal constitution. Then they began to feel themselves united as a nation, and all their public works and undertakings seem to have commenced in a more important style. . . ."

"Most of the families of New York have black servants. I should suppose that nearly one fifth of the inhabitants are negroes, most of whom are free, and many in good easy circumstances. . . ."

"A friend wrote me from thence in December, 1794, that there had been upwards of eight hundred and fifty new houses built that year, and yet hardly one to be got, though the rents were
doubled within the last seven years. This is owing to the great increase of its trade, and it bids fair in my opinion, to be the largest city in the union. They have some very elegant curiosity-shops, coaches, and post-chaises. One of a maiden lady (with a Dutch name) who lives a few miles out of New York, that cost eight hundred guineas. It was built in England (by Hatchet, I believe.) In country places they are fond of driving one horse chaises, on account of the bye roads.

"No stages are allowed to travel on Sunday. The day, however, is not so rigidly observed as formerly.

"All vegetables are very dear; Mrs. M told me, it cost her generally half a dollar a day for cabbages, carrots, and potatoes, and but a moderate sized family.

"Almost all the beer drank at New York is brewed in London. They have one or two breweries here, but they do not succeed very well. I was often in company, at dinner, with a Mr. Leipner, who owns the brewery in Greenwich-street. He says, there is not barley enough raised for home consumption. . . . They [the farmers] do not drink much beer themselves, preferring cyder and whiskey, which they get without buying." 

Wasney here mentions the prices of various provisions.—Wasney’s Jour., 235–36.

He also describes the mode of conducting an election: "The mode of voting is exact, and simple and possible. I was at New York during the election: I saw no additional bustle in the streets. The names of the Candidates having been published, the proper officers went about, through every ward, door by door, and received each persons vote, in writing sealed up, which was afterwards opened before the Committee, setting in the Hall, and there registered. No canvas by the Members; no holiday on the occasion; no appearance of tumult or indistination. The sum total for each Candidate being made up, they are inserted in the newspapers." He cites an instance of electioneering, which was universally reproached.—Ibid., 244–45.

The common council pays Ald. Stoutenburgh (chairman of the committee for building a new almshouse) £6,000 towards materials for that purpose.—M. C. C. (1784–1814), II: 85. For later expenses see Ap. 5, Je. 17, 1796.

The common council orders payment of £216 for lamp-posts, £74 for watchmen’s boxes, and £414 for "a Fence Gov’t. House."—M. C. C. (1784–1814), II: 85.

July

Professor Samuel Latham Mitchell makes a report to the Senators Academicus on "the present state of Learning in the College, collected from written statements handed in by the Provost and one of the professors with a detailed account of the college ground given at Columbia."—Hist. of Columbia Univ., 1754–1904, 77–80.

Anderson says: On this day "Tisdale & Tanner (Engravers) made me a visit & look’d over my Copperplates &c."—From Alex. Anderson’s Diary, for 1794 (MS.), in Columbia Univ. Library, 120.

Payments made by the city for the celebration of the Fourth of July this year consist of £751.94 for gunpowder; £3211 for a public dinner; £128 for the constables, etc., etc. for the Sessions of the Churches for ringing Bells" and £25176 for gunpowder for the militia.—M. C. C. (1784–1814), III: 89, 95.

"The committee appointed to report on the most eligible situation for erecting a new Theatre request the favour of all those gentlemen who have already subscribed, also those who wish to become subscribers, to attend this Evening, 8 o’clock at the Tontine Coffee House."—Daily Advertiser, Jl 8, 1794, Sen. Ag. 19.

The "New Theatre" here projected later became famous as the Park Theatre. Brown says that plans for the theatre were furnished in 1793 by Mark Isambard Brunel, the French engineer who built the Thames tunnel.—Brown, Hist. of the N. Y. Stage, Ill: 11. See also descrip. of Pl. 91, III: 577. When the theatre was opened on Je 29, 1798 (q. v.), credit for its construction was given to the Messrs. Mangin.

The common council permits a "Society of young Men by the name of the Hounian Society" to use "the Room in the City Hall in common with the other Societies."—M. C. C. (1784–1811), II: 87. According to a permit of July 21, this was the common council chamber. On that day "the Society of Teachers in this City" were requested to propose to meet in "the Common Council Chamber at such times as it shall not be wanted for public use or occupied by the Societies who have the use of it."—Ibid., II: 89–90. Of Ap. 15, 1793.

In connection with the grant of water lots to Trinity corporation, and the making of streets on soil so gained and filled in (see Je 10, the street committee reports to the common council that it has "caused a Survey to be made (and which is herewith presented to the Corporation) of that part of Greenwich Washington Reade & Duane Streets which are connected with the Grant agreed to be made to the Corporation of Trinity Church." It also makes the following suggestions:

"First That the Grant heretofore promised to the said Corporation [Trinity] between Chambers and Reade Streets he limited to the dotted Line intersecting the said Grant, from the East Corner thereof on Washington Street & Reade Street to a Point on the West side thereof so as to be parallel to the line of Duane Street. Note the Angle B.

"Second That the said Corporation be requested to Release to this Board the Land which lies adjoining to the River west of Washington Street and between Reade & Duane Streets. If the said two Objects be obtained, a spacious Square will be formed between Washington Street and the new Street intended in the Front on Hudsons River and open to the Harbor or Baron that may hereafter be made in front thereof."—M. C. C. (1784–1814), II: 87, 92. Trinity vestry acceded to these proposals.—Ibid., II: 90. In 1807, Duane Market was built on the "spacious Square" west of Washington St., between Reade and Duane Sts.—L. M. R. K. III: 1958.

A list is prepared of the proprietors and tenants of Wall St. from Pearl to Front St.—See the original MS. (item No. 1822 from Holden sale), in N. Y. H. S.

Robespierre, after having put to death 2,774 persons, is himself guillotined, and the "Reign of Terror" ends.—Guizot, etc.

The following detailed description is published to accompany an engraved view of Belvedere House (see Pl. 60–a, Vol. 1): "Belvedere House . . . is situated on the banks of the East rivers, about a quarter of a mile beyond the pavement of the eastern extremity of the city of New-York. It was built in the year 1792 [see Je 25, 1792], by thirty-three gentlemen, of whom the Belvedere Club is composed. The beauty of the situation induced them to extend their plan beyond their first intentions, which were merely a few rooms of the house, as they erected the present building, as well to answer the purposes of a public hotel and tavern [see My 20, 1793], as for their own accommodation.

"The ball-room [see D 17, 1793], which includes the whole of the second story of the east front, is an oblong octagon of forty-five feet in length, twenty-four wide, and seventeen high, with a music gallery. This room is occupied by the Club on their Saturday meetings during the summer months, to the right of which is a room that day, is the only exclusive privilege which the proprietors retain. The windows of this room open to the floor, and communicate with a balcony twelve feet wide, which surrounds the eastern division of the house, and affords a most delightful promenade.

"The room on the ground floor is of the same shape and dimensions of the ball-room, and is generally used as a dining and supper room for large companies and public entertainments.

"The west division of the house is composed of two dining parlours, a bar-room, two card-rooms, and a number of bed-chambers. The west front opens into a small court-yard, flanked on each side with stables, a coach-house, and other offices. The little grounds into which the east front opens, are formed into a bowling-green, gravel walks, and some shrubbery, in as handsom a manner as the very limited space would admit."

"The want of extensive grounds is, however, much compensated for by the commanding view which the situation gives of the city and adjacent country. The prospect is very varied and extensive; a great part of the city, the bay of New-York, Long-Island, the East river as far as Hell-Gate, the island of New York to the northward of the city, and a little of North river, with its bold and magnificent bank on the Jersey side, altogether form a scenery which the vicinity of few great cities afford."—N. Y. Mag., Ag. 1794. See Ag 20 and N 11.

The common council orders "that the Triangular Piece of Ground at the junction of the Post- & Bloomingdale Roads be appropriated to the use of the Alms House for a Burying Ground," and that the Road Committee take order thereto.—M. C. C. (1784–1813), II: 92. See S 15, and O 16, 1794; Jl 3, 1793. This was later the site of Madison Square. For the evolution of this locality, see L. M. R. K. III: 970 (title "Madison Square").
The common council gives a permit "to the Proprietors of the Aug. Tontine Hotel about to be erected" to make an area to the building.—M. G. C. (1784-1831), II: 92. This was the City Hotel on Briarcliff Hotel, M. R. K., III: 977.

Mayor Varick, in a charge to the grand jury, defines the position and powers of the United States and the duty of citizens respecting neutrality, for the protection of citizens of the belligerent powers who are in New York. He refers especially to the treatment received by the officers of the British ship "Thetis" (Capt. Cochrane) which was recently in this port. He asked for an inquiry into the facts of the case.—Minutes (M. C.) of Court of Quarter-Sessions, VII: 231. See also Washington's proclamation of neutrality, April 22, 1783. The grand jury reported to the court on Aug. 9 that they were unable to discover evidence on which to base a presentment in the "Thetis" case.—Ibid., VII: 238.

A count is made, from lists published in The New York City Directory, to show the number of householders and other persons occupying stores, shops, etc. for the years 1790 to 1794, respectively, with the following result: In 1790—4,500; 1791—5,800; 1792—6,700; 1793—7,700; 1794—9,000. —Greenleaf's N. T. Jour., Aug. 9, 1794.

An advertisement for the sale of horses mentions the stable as on "Brewery Hill, Maiden Lane."—Am. Minerova, Aug. 11, 1794. This must refer to the rising ground from about Gold Street to St. John's Church Lot, where Maiden Lane was steepest, and where there is still a considerable rise in the land. The brewery of Anthony Rutgers stood on land now known as Nos. 47-51 Maiden Lane; the dwelling being at No. 59.—See My 27, 1772.

The common council decides that it cannot grant a request of Edward Livingston "to remove at his own Expense the Building lately erected at the Battery for a Laboratory & to place the same on the Ground of the Gov't House along the Rear of the Lots fronting Pearl Street to the end that he may be enabled to erect a House on the Corner Lot of Pearl Street with a front on State Street."—M. G. C. (1784-1811), I: 94-95. For Livingston's further action in the premises, see O 27.

New Theatre [see J 8]. The Committee appointed to regulate and modify the proposals offered byMessrs Hallam and Hodgkinson, after having made every enquiry are of opinion, no place that is to be purchased can be found eligible as where the present Theatre stands.

"They have had a plan, given in by Mr. Wilson, which merits their most decided approbation, in which every accommodation and convenience has been minutely attended to, and they are convinced that the countenance of the friends to an elegant and well regulated stage in general.

"The terms as proposed by Messrs. Hallam and Hodgkinson have been adopted under the following modifications:

1. Every subscriber shall have his choice, whether he prefers seven per cent as legal interest, or five per cent and a free ticket of admission to every performance (benefits and charity plays excepted).

2. A committee and treasurer will be appointed by the subscribers, to form all contracts, pay all demands and call for such proportions of payment as necessity may require.

3. Those whose shares may hereafter be purchased out according to ballot, by the managers, shall have the use of their free ticket for the following season, every one of which are regularly to consist of seven months.

4. The committee, fearful that the proposed sum of ten thousand five hundred pounds would not be adequate to the expence, upon an estimate made, have thought proper to encrease the number of subscribers to eighty, they making at one hundred and fifty pounds each, twelve thousand pounds.

5. The committee offer this plan to the public, with the hope that such as wish to make up the number of subscribers wanted, will be as early as possible, that the necessary arrangements may be made to commence next spring and materials purchased the present autumn."—Daily Advo, Aug 19, 1794. Meetings of the subscribers were held several times during the next few months.—Ibid., S 5, 1794, Ja 27, Ja 28, and F 3, 1795. Later the number of subscribers was raised to 100 (see F 24, 1795).

With this issue (midaged Aug 23) the title of John Buell's paper (see Aug 22, 1793) is changed to The Columbian Gazetteer. Buell reverted to the original title on Sept. 4.—Brigham, A. A. S. Proc. (1917), 391. It was discontinued with the issue of Nov. 13 (9 v.).
ment of £10,15,9 was made "for repairs to the Pest House at Belle vue."—M. C. G. (1784-1811), II: 132. 

The common council ordered "that the Corporation of the Hospital be permitted to bury their Dead in the triangular Piece of Ground near the three Mile stone" (see Ag 4).—M. C. G. (1784-1811), II: 102. Cf. O 16. For change of locality for the potter's field, see Ap 10, 1797.

The common council gives permission to James Watson, "to make a Gate on the Battery opposite to his House."—M. C. G. (1784-1811), II: 102. For illustrations showing the fence at the Battery, see Pls. 56 and 59, Vol. I.

No cases of yellow fever in New York City have come to the notice of the committee of health at this time, but three deaths have recently occurred from fever contracted on shipboard.—Greenleaf's N. T. Jour., S 20, 1794.

Tiebout's "uniform companies" meet at "Citizen Hotel, Broad Way," to drink patriotic toasts "in commemoration of the Decree of the French Nation, in which they abolished Monarchy."—N. T. Daily Gaz., S 22, 1794.

A petition is being handed around for signatures, asking the common council to order the removal of the hay scale "from where it now stands [in State St.], to White Hall Slip."—Greenleaf's N. T. Jour., S 21, 1794. It was ordered removed on Dec. 8.—M. C. G. (1784-1811), II: 116-17.

The common council refers to a committee a petition from Joseph Corre, "proposing to erect & light a number of Lamps on the Battery for the accommodation of the Citizens in their Even Walks; and praying the Privilege of erecting a small Build on the fourth End for the vending small Drinks & Fruits."—M. C. G. (1784-1811), II: 104.

Gardiner Baker advertises his "Menage of living Animals and Birds," the collection of which was begun in May last, and which is at "the corner of Pearl Street, fronting the Battery" (see Mr 31).—Herald, S 29, 1794. See, further, Je 13, 1796. He also advertises a "New Museum," in the Front Rooms of the Exchange, opposite the entrance of the Museum and Wax Work."—Ibid., O 15, 1794; Am. Minerva, O 14; Daily Adv., O 17, 1794.

Notice is published that proposals will be received for the digging out and filling in of in Augustus St. (City Hall Place), according to survey,—Daily Adv., O 8, 1794; L. M. R. K., III: 99.

William Sing, president of the society recently established to assist immigrants (see My 22), publishes a notice demanding that masters of vessels and others treat immigrants with suitable kindness and attention. This notice is made necessary because of the ill usage which they have suffered.—Greenleaf's N. T. Jour., O 15, 1794. See O 21.

The corporation, we hear, have appropriated for the burial of strangers, a lot without the bounds of this city, instead of the Potter's-field [see Ag 4 and S 15] now used for that purpose. The new ground is to be planted with trees. It would be desirable that the measure should lead to a general removal of burial grounds from the center of the city."—N. T. Daily Gaz., O 16, 1794.

Alexander Anderson records in his diary; "Stopped at A. Tieckou's shop and saw 3 engravings done by his brother Cornelius in England."—Alex. Anderson's Diary, for 1794 (MS.), 227.

The common council orders "that the Committee for improvements in the Fields [the Park] direct the Bridewell Fence to be made."—M. C. G. (1784-1811), II: 111.

The common council appoints Benjamin Taylor a city surveyor.—M. C. G. (1784-1813), II: 111.

Thomas Dunn delivers at the Middle Dutch Church an address, published in a pamphlet titled, "The Discourse delivered in the New Dutch Church Nassau Street, Oct. 21, 1794, before the New York Society for the Information and Assistance of Persons Emigrating from Foreign Countries (L. Wayland, N. Y., (1794). See My 22.

Meares, Lewis Gaultier and Co. No. 68 William street, inform the public, they have built a new large and elegant assembly room, for the accommodation of public and private assemblies; they have also, either rooms for the accommodation of large or small companies—dinners, suppers, &c., both in the English and French taste, and all sorts of Liquors."—Daily Adv., O 27, 1794.

Mr. Hunter, the public stockkeeper, hands to the common council "The Copy of a Declaration in Ejection in a Suit brought by Edward Livingston for the Strip of Ground at the Battery whereon the public Artillery Store is erected adjoining the Lot at the Corner of Pearl Street lately purchased by him of Edward Gris-would." The board orders that the paper be delivered to the recorder, "as Atty & Council for this Corporation," to be defended.—M. C. G. (1784-1811), II: 112. Cf. Ag 18.

The common council refers to a committee "A Petition from sundry black Men in this City praying the Aid of this Board in purchasing a Piece of Ground for the interment of their dead."—M. C. G. (1784-1811), II: 112. See, further, Ap 7, 1795.

"The present time may be considered as an era in the history of the New-York stage. The management is changed; and a new house is to be built by the present Managers, with the assistance, and under the patronage of men of the first fortune and taste in the city. The company we may expect to be newly organized, and new performers have joined it since it was here. The next month is the time fixed for commencing the first campaign in New York, under the new arrangements, and the last which is to take place in the Old House."—N. T. Mag. (1794), 655-56. The management of the company was now vested in Hodgkinson and Hallam, Henry having sold his share.—Dunlap, Hist. of the Am. Theatre, I: 216-17, citing a letter written by Hodgkinson describing the transaction. See Oct. 15.

Trinity vestry appoints a committee, of whom Mr. Stuyvesant is one, to "procure plans of a Church Intended to be erected on the Ground to be granted to this Corporation by Mr. P. Stuyvesaitd."—Trin. Min. (MS.). See L. M. R. K., III: 933 (St. Mark's Church).

John Avery informs the public "that the obstacles which in some measure impeded their frequenting Belvidere, are now removed, that the huge hill, in Division street, called Jone's hill, or mount pit, is now cut down and the hollow beneath filled up which has with great pains and expense repaired the street leading from that hill between the trees to his house, by filling up the ditch, and widening the street without the trees, sufficient for three carriages abreast— that he has also erected lamp posts, from one end to the other, and lamps will be lighted at his own expense on Notice of any public or private party assembling there at Night."—Daily Adv., O 16, 1794.

"For the accommodation and amusements of such parties, Belvidere Ball rooms is now opened, and decorated—there are also four other neat rooms on the same floor, and a Ladies Room on the next floor above—which altogether furnishes conveniences unequaled in this city, and the terms for Balls or Assemblies shall be made reasonable."—Daily Adv., N 11, 1794. See Ja 23, 1796.

The Eve Post of to-day had its beginning in 1801 (q. v., N 16).

The common council appoints a committee "to direct a Survey of the Land at the Alms House Goal & Bridewell preparatory to the erection of a new Alms House" (see Ja 20)—M. C. C. (1784-1811), II: 115. See, further, My 16, 1796.

The "Treaty of Amity, Commerce, and Navigation," negotiated by John Jay with the British ministry (see Ap 19), and commonly called the Jay Treaty, is completed and signed in London. Jay sends it to Edmund Randolph, secretary of state, by packet, with letters to Washington, Hamilton, and others. He himself was detained in England until spring by the state of his health and the severity of the winter.—Corresp. and Pub. Papers of John Jay, IV: 33-54.

"The chief features of the treaty may be briefly summed up: Pay for the negroes carried off by Carleton was not provided for; the right of search was not renounced; the crown of Americans to a fair share of the British West Indian trade was not allowed; no American trader could enter a port of Bermuda, or St. Kitts, or St. Eustatius, or of an island of the Caribbean sea, subject to the
west corner of "Oyster Pasty" or Exchange Alley, on some vacant lots belonging to Col. Wm. Smith.—The Circus (1909), 82-83. See also descriptive of Pl. 36, II, 420.

The common council gives a public dinner on this anniversary of the evacuation of the city by the British. John Hyde was paid £4611 for it on Dec. 8.—M. C. C. (1784-1811), II: 117.

"Mr Cressin informs the public he has opened a New Theatre at the Military Academy, in Ann street, where he will perform on Thursday and Saturday; and on the other days at the Little Theatre, Broadway, above St. Paul's opposite the Park."—Diary, N. Y. 1794.

A notice, addressed "To the Sportsmen of New York," is published, announcing that, "A person having arrived from Kentucky, has brought a large Buffalo, [and] intends to divert the gentlemen with a general hunt on Saturday the 29th, to start at the hour of one o'clock, from Mr. Lambert's Tavern at Greenwich."—Diary, N. Y. 1794.

Baron Steuben dies, and is buried on his estate in Oneida Co. This news, in a report from Albany dated Dec. 15, was published in New York, with a sketch of his life, on Dec. 26.—Am. Minerva, D 26, 1794; Karp, Life of Steuben, 600-4. He usually spent his winters in New York.

Work on the fortifications on the different islands adjacent to New York, is reported. Gen. Ebenezer Stevens publishes a notice asking that demands against him be presented.—Am. Minerva, D 2, 1794. The work was not completed until about Jan. 28, 1796.

"We announce, that the steeple of St. Paul's church [see Mr 24] is finished. The last scaffolding was struck on Saturday. This truly beautiful fabric, though constructed without aid of timber, exhibits an appearance of compactness and solidity equal to any stone structure of the kind; and while it displays the skill of the architect, it evinces the good taste of the Gentleman of the Vestry."—Danlup & Claypole's Am. Daily Adv., D 6, 1794. See descriptive of Pl. 54-b, Vol. I, which shows the church shortly after the erection of the teeple. See Ap 11, 1796.

The Theatre, is in the hands of Mr. William and Hodgeson, respectfully acquaint the Citizens in general, the Theatre will open This Evening, the 15th of December, with the opera called Love in a Village . . . To which will be added, a Comedy, in two acts, Called, The Lyar."—Daily Adv., D 15, 1794.

"It is with admiration that strangers, and with the most agreeable sensations that the citizens of New-York must view the improvements of this place,—the years 1791 and 92 have completed one of the most pleasant walks and prospects in America (perhaps in the world) and this season has nearly finished an elegant steeple, and other ornaments, to St. Paul's Church, which does honor to the designer and executors: But among all these improvements, it has been matter of surprise, that this city has been so long without a chime of bells; and numbers are not without the hope, that the tower of St. Paul's is destined to be a repository of so great an acquisition: It is true, some have observed, that so great an expense ought not to be borne by one society—granted; yet no person (I am persuaded) will a moment doubt, but that, should a subscription be set on foot for the express purpose, at the Tontine Coffee-house, it would be filled in one month, with a sum adequate to the accomplishment of it."—Greenleaf's N. Y. Jour., D 17, 1794. See also I: 457.

Another buffalo hunt is announced (see N 26). It is to be held on this day, "at the Sign of the Huntsman and Hounds, five miles from town, on the Kingsbridge Road." The notice states that, "As the Buffalo is to be hunted with Hounds, no Bull Dog or large Cur will be admitted; It is requested no gentleman will bring with him any Dog of that description."—N. Y. Daily Gaz, D 17, 1794.

A "Petition of John Ramsay for a further Privilege [see 22 27, 1793] of erecting a Mill Dam on Harlem River at Devoes" is referred by the common council "to the Committee on the Petition of John B. Coles."—M. C. C. (1784-1811), II: 118.

The common council permits Bartholomew Skatsa "to occupy the No. East Room in the third Story of the City Hall."—M. C. C. (1784-1811), II: 120. The record does not state in what capacity he secured this permit, but a clue to his position at this time may be found in the fact that, on July 22, 1802 (9 v.), he succeeded Kinier Skatsa as doorkeeper and messenger of the common council, and was made keeper of the city hall. As late as 1806, he was a
The great 1795, good Broadway. The list sold well-known as this—a century 212.

The events transpiring in Paris, in which the United States, through its ministers, was directly interested in 1794—7 are told by McMaster in his usual graphic style, all the facts being drawn from original sources of information, in his Hist. of the People of the U. S. Vol. II, pp. 256 et seq. These were largely the affairs in which James Madison was instructed as minister to France, which continued into 1797, when he published a vindication of his conduct in the famous View of the Conduct of the Executive in the Foreign Affairs of the United States.—Ibid., II: 260–335. These events were reflected in many happenings in New York and other cities.

W. Winterbotham, an English traveller, writes of New York:

'The plan of the city is not perfectly regular, but is laid out with precision. The situation of the ground, the ground which was unoccupied before the peace of 1783, was laid out in parallel streets of convenient width, which has had a good effect upon the parts of the city lately built. The principal streets run nearly parallel with the rivers; these are intersected, though not at right angles, by streets running from river to river. In the width of the streets there is a great diversity. Water-street and Pearl-street, (common Queen-street) which occupy the center of New York, are very conveniently situated for business, but they are low and too narrow, not admitting, in some places, of walks on the sides for foot passengers. Broad-street, extending from the Exchange to City-hall, is sufficiently wide; this was originally built on each side of the creek, which penetrated almost to the City-hall; this street is low but pleasant. But the most convenient and agreeable streets are those by the Hudson and East rivers, which is formed by the junction of the Hudson and East rivers, occupies the height of land between them upon a true meridional line, rises gently to the northward, is near seventy feet wide, adorned, where the fort formerly stood, (which has been lately levelled) with an elegant brick edifice for the accommodation of the governor of the State, and a public walk from the extremity of the point occupied by the fort to the Battery, which is called the Battery, is now the Battery Park—demolished; also with two Episcopal churches, and a number of elegant private buildings. It terminates, to the northward, in a triangular area, fronting the bridelaw and alms-house, and commands from any point, a view of the bay and narrows.

'Since the year 1788, that part of the city which was buried in rubbish and decay has been most streets widened, straightened, raised in the middle under an angle sufficient to carry off the water to the side gutters, and foot-ways of brick made on each side. At this time, the part that was destroyed by fire is almost wholly covered with elegant brick houses.

'Walk-street is generally fifty feet wide and elevated, and the buildings elegant. Hanover-square and Dock-street are conveniently situated for business, and the houses well built. William-street is also elevated and convenient, and is the principal market for retailing dry goods. Many of the other streets are pleasant, but most of them are irregular and narrow.

'The houses are generally built of brick and the roofs tiled; there are remaining a few houses built after the old Dutch manner, but the English taste has prevailcd almost a century.

'Upon the subject of water, it has been remarked that New York, being the most magnificent edifice in this city is Federal-hall.' Winterbotham's description of this is taken verbatim from the Mass. Mag. of June, 1789, which is already entered in the Chronology under that date. Continuing, he says:

'The city is esteemed the most eligible situation for commerce in the United States.

"A want of good water is at present a great inconvenience to the citizens, there being few wells in the city; most of the people are supplied every day with fresh water, conveyed to their door in casks, from a pump near the head of Pearl-street, which receives it from a spring almost a mile from the center of the city. This well is about twenty feet deep, and four feet diameter. The average quantity drawn daily from this remarkable well is one hundred and ten hogheads of one hundred and thirty gallons each. In some hot summer-days two hundred and sixteen hogheads have been drawn from it, and what is very singular, there are never more or less than three feet of water in the well. The water is sold commonly at three pence a hoghead at the pump. Several proposals have been made by individuals to supply the citizens by pipes, but none have yet been accepted.

"New York is the gayest place in America; the ladies, in the richness and brilliancy of their dress, are not equalled in any city in the United States, nor in Charleston, South-Carolina, which has heretofore been called the center of the beau monde."—An Historical, Geographical, Commercial and Philosophical View of the American United States, by W. Winterbotham (London, 1795), II: 315-20. See also the description written at about this time by P. J. B. Nougaret in Beaux de l'Histoirr des Etats-Unis de l'Amérique septentrionales (Paris, 1815), 215-15.

John Hazrith, writing of this period of his career, said: "I took my departure from New York. For the first 160 miles, to Albany, there is a choice to go by either land or water. I took a place in the mail-coach, or coachee, (as these vehicles are termed,) which set off at three in the afternoon, passing between the ruins of Washington and Lee Forts, on York-island, over King's Bridge."—Stretches through Life (1808), II: 140.

Referring to the "pioneer-settlers" who have "squeatted" in the "back country," he writes: "A great proportion of them are the wild Irish, who emigrate by ship-loads to America; and if I mistake not, will in time prove a more formidable enemy to the states on the sea-coast, than the Indians. In New York, I have seen five or six hundred of them landing at a time, nine out of ten of whom refused employ at any wages, saying they were going westward, where they have friends who had advised them."—Ibid., II: 157.

Peter Gassner, writing to David T. Valentine in 1854, gave the following recollections of New York in the year 1795: "New York then contained about 40,000 inhabitants, and the city did not extend in Broadway much beyond the Hospital. On both sides of Broadway, as far as the eye could reach north, hills full 30 feet high occurred the ground now occupied with private houses;—common country road, unpaved, with rocky clay banks skirt ing it on each side, and crossed at Canal street by a stone bridge, the outlet of the Collect pond to the Hudson river.

"An actor named John Young, had shot an officer in the Park, who was about to arrest him for debt (we imprisoned debtors at that day in the old jail, now Hall of Records). Young was convicted of murder, and was executed upon the rising ground spoken of, about where the Carlton House stood, corner of Broadway and Leonard street.

"This was at the end of 1795. I distinctly remember the military in the streets and the departure of my father in his military costume to guard the execution. We then lived at the corner of Chatham and Pearl streets, in a house and from the roof ... I saw the gallows and the crowd of people surrounding it, as at that time there was no house of any height to obstruct the view from Chatham street to Broadway."—Man. Com. Coun. (1859), 388.

In 1795, the old Dutch church erected more than a century before on the Stuyvesant Bowery had fallen into decay, and was removed to give place to St. Mark's Church.—Man. Com. Coun. (1866), 550.

In this year, William Winstanley came into prominence as a painter in New York by painting and exhibiting, in Greenwich Street, a panorama of London.—Dunlap, Hist. of Arts of Design (Goodspeed ed.), II: 77. For a short account of Winstanley's career, see ibid., II: 77-78. Alex. Anderson called the panorama "an entertainment new & highly delighting to me," and described it briefly in his diary.—Pasko's Old New York, I: 242.

An impression of the mayor's seal of 1795 is in the John Poulding collection, presented to the N. Y. H. S. in 1844.

For an account of the private residences in New York in this year, see Man. Com. Coun. (1853), 561; and for a list of the principal wealthy citizens of this year, see ibid., II: 8-17.

A record exists of butchers in the Fly Market, 1789 to 1795, and of those in the Exchange Market, 1789 to 1795—See "N. Y. MSS., 1761-1800," in N. Y. H. S.

A map of the s.e. part of the city, from the Battery to Crown Point along the East River, was made in this year.—See the
1795, original, filed as map No. 110 in bureau of topography, borough
- president's office.

Jan.

The government house as it appeared at this time is thus referred
to in printed description of the view mentioned above under 1793
(see Pl. 55-b, Vol. I): "... Its situation, in point of pleasant-
ness, is perhaps exceeded by few in the United States, having a
beautiful prospect of the harbour, of Long-Island, Staten-Island,
Governor's-island, the Jersey shore, etc. ... the whole of the
building appears to be executed in a style which reflects much credit
on the professional ability of those who had the direction of it,
Messrs. Robinson, Moore and Smith.

"The view here given is taken from the northwest corner of the
Battery, near the end of Greenwich-street: it exhibits a part of
the city and some portion of the green and walk on the Battery."—
N. T. Mag., Jan., 1795.

James William makes a "Plan of Mrs. Ann White's estate
known by the name of the Vineyard." This was copied by Evert
Bancro Jr. in 1795.—From original in Bancro Coll., N. Y. P. L.
(box B-F, folder C).

1 Jacob S. Mott and William Hurtin, Jr., begin the publication
of a weekly newspaper called Mott and Hurtin's New-York Weekly
Chronicle. The last issue with this title was that of April 16, 1795,
after which the firm dissolved.—Brigham, A. S. Proc. (1917), 468;

Mr. Ricketts announces that, on Jan. 3, at the "New Amphi-
thetheatre, Broadway," after his feats of horsemanship he will present
Mons. Ambrose, a celebrated artist in Italian fire-works, who will
exhibit a specimen of his ability, which will be "infinite superior to
anything of the kind ever exhibited in this city."—N. T. Daily
Gaz., Jan. 1, 1795.

3 Dr. Alexander Anderson records in his diary his "taking a walk
with the Ship-yards to see the Keel of the Frigate."—Pasko's Old
New York, Ag. 1889. This was the keel, just laid, of one of the 44-
gun frigates built, by order of congress, at Chesman's ship-yards.
—Greenleaf's N. Y. T. Jour., Ja 14, 1795.

The city's budget for 1795, to be raised by taxation, is again
estimted (cf. Ja 6, 1795).—M. C. C. (1794-1815), II: 121. See Ja
12, 1796.

5 "Mr. Smelzel reported that Mr. [John] Cambbell [Camphell]
Scoullar, had master, had requested to be admitted to our
Church in Broadway on a Lease for a Term of Year and Rent, as this
Board should agree upon. On his part he promised to Lay out $300
in Repair on the same, in Order to make the same fit for an Academy
and further promises that our Congregation should have free use
thereof for Divine Services, every Sunday and ones every Week, if
Desired."—Lutheran Min. (M.S.). The old church building had
previously been leased to David Grim (see S 6, 1792). See also Ja 12.

6 In a letter to his daughter at Philadelphia, Aaron Burr writes:
"You see me safe arrived in New-York. I have passed but one
hour at Richmond Hill [see Ja 16, 1794]. It seems solitary and un-
describable to you. ..."—Davis, Memoirs of Aaron Burr,
I: 385. See S 17.

6 The eighteenth session of the state legislature begins at Pough-
keepsie (see Ja 7, 1794). On Jan. 14, resolutions were passed for
an adjournment to New York City, where the senate and assembly
met on Jan. 20 (q.v.).—Assemb. Jour. (1793), 5, 16-18, 19; 
Senate Jour. (1793), 3, 8-9.

A handbill of the "New Amphitheatre," announcing the pro-
gramme for "this evening," including a "Fricaceous Dance" and
feats of horsemanship by Mr. Ricketts, shows the admission to be
half a dollar to the pit, and one dollar to a box; and that "a Box
Book is kept from ten o'clock in the morning till three in the
afternoon."—From original handbill, in N. Y. P. L.

9 The prisoners in the jail publish effusive thanks for the dona-
tions of beef during the "Holydays."—Daily Adv., Ja 9, 1795.

A motion is made in the Lutheran council "that the Church in
Broadway should not be leased [see Ja 4] but built up, for the use
of this Congregation," but the motion is lost," after further Debates
and Explanations, of the Smallness of our funds and otherwise
Doubltful situation of gaining a Majority of Members in Our Congregation in favour of Building up the present Site." It is re-
solved, however, to ask for subscriptions for the purpose.—Lutheran
Min. (M.S.). Although $800 had been raised by Jan. 19, the board
did not have courage enough to go ahead, and on Jan. 22 resolved
to lease the church to Mr. Campbell, for not more than five years,
at the rate of $60 per annum on condition that he "put the Church
yard in a good fence."—Ibid. On Feb. 2, it was found that Camp-
bell's plans for alterations differed materially from those he first
promised (see Ja 5), and the matter was dropped.—Ibid. See also
Vol. I, p. 450. See, further, My 20, 1797.

The Tammany Society resolves "That it is the opinion of this
Society that the President of the United States, in using his best
endeavours to support on all occasions the laws and constitution of
these states, entitles him to the warmest approbation of every
lover of their prosperity and happiness," and that a committee be
appointed "to draft an address to the citizens of the United States,
and publish the same."—Daily Adv., Ja 21, 1795. See Ja 21.

Peter Stuyvesant having offered Trinity corporation £800 and
a lot of land, 150 by 190 feet, for a church (see Ja 8, 1793), the vestry
resolves to accept his proposal, and to raise the sum of £5,000
towards the cost of the building.—Memorial of St. Mark's Church
(1899), 49, citing Trin. Min. (M.S.).

Having adjourned from Poughkeepsie (see Ja 6), the legislature
meets in New York on this day. It continued to hold sessions here
until Nov. 11, 1796. Alba boy was chosen as the next meeting-place.
—Assemb. Jour. (1793), 205 ibid. (1796), 3; ibid. (1796-97), 3; 30;
Senate Jour. (1793), 10; ibid. (1796-97), 31; ibid. (1796-97) 3, 13, 23.
See N. Y. 21, 1796.

The address signed by Jonathan Little, grand sashem, is issued
by the Tammany Society "to the People of the United States.
This endorses Pres. Washington and the Federalist policies.—Daily
Adv., Ja 21, 1795. The Republican members of the society repudi-
ated the address on Feb. 2 (q.v.).

"Hallam and Hodgkinson, anxious to preserve not only the
peace of the house [John St. Theatre], but perfect approbation of every
part of their audienc, respectfully acquaint the citizens and
public in general, that in future they wish to recommend, no side
Box to be taken for a less number than 8; the Boxes to be kept
locked and a screw-key to them all deposited with the Box keeper,
who will shew the proprietor of any Box for the night, to his
number the moment he arrives and unlock for him: a bolt will
also be made inside of each door, to prevent any interruption and
shall the boxes not taken, will be left entirely open for such ladies
and gentleem as do not take seats, or who honor the Theatre casu-
ally. The mistakes that have unfortunately happened recently
make some resolution necessary that may tend to prevent the like
in future. Gentlemen not perfectly acquainted with the rules of
the Theatre, may be guilty of indecorum, not from intention, but
want of information.

The managers hope the above method will be found adequate
to the removal of so disagreeable a circumstance: it is their wish
to act in the most open and unbiassed manner to every one, and
should it happen that the rules, peace or good order of the house
should at any time he interrupted, they deem themselves compelled
to point out such measures as shall if possible restore its tranquility.
They wish the Theatre be esteemed a moral, rational and indis-
fensible amusement, free from the least riot or disorder.

"N. B. No persons of ostentious ill fame will be suffered to
occupy any seat in a box where places are already taken."—Daily
Adv., Ja 21, 1795.

With either this or the next issue of his paper (see Ap 3, 1793),
Archibald McLean changed the title to The New York Gazette
—Brigham, A. S. Proc. (1917), 407; Early Newspapers, II: 419. See My
5.

The "Assurance Company of the State of New York" draws
up in New York City a petition to the legislature for incorporation.
—from original in Emmet collection, No. 11615.

Sometime in this month, the title of The Diary or Evening
Register was changed to The Diary, & Universal Daily Advertiser,
—Samuel Loudon, Jr. became the sole publisher.—Brigham,

The Tammany Society, meeting at "Tammanal Hall," adopts
the following resolutions: "Whereas in consequence of a resolu-
tion of Tammany Society, passed at their meeting on the 19th Jan,
last [p. v.], there has been published a Political Address to the
Citizens of the United States, signed by the Grand Sachem and
countersigned by the Secretary,

The Society acknowledges neither political principles for its
establishment, nor political object for its pursuit, but is founded
on the broad basis of natural rights, and is solely designed to "Connect American Brethren in the indissoluble bonds of Patriotic Friendship.

And whereas, if it be not strictly against the Tammanal Con-

1316 THE ICONOGRAPHY OF MANHATTAN ISLAND
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

The annual revenue arising from the estate belonging to Columbia College, exclusive of some bonds which are not at present productive, amounts to fifteen hundred and thirty-five pounds.

The price of labor and materials for building were so high that the time of receiving the £1,500 for erecting a wall about the College ground, and the £5,000 for adding a hall and wing to the College [see Ap 11, 1792], that the trustees did not immediately apply these sums to their respective objects, but vested them in the funded debt, and waited a more favourable opportunity. Though the expense of building continued to increase, yet there was a necessity for undertaking the wall last summer, on which £6511:1 have been expended, and it is not near half finished. So great is become the want of lecture rooms for the professors, and a hall for public exhibitions and commemorations, that the trustees intend, without delay, to convert their stock into cash and undertake the hall and wings; relying on the known generosity of the legislature to afford further aid if circumstances require it."—

The Chamber of Commerce gives "a Splendid Dinner" to Alexander Hamilton, "the late Secretary of the Treasury," at its hall in the Tontine Coffee House. The company consists of about two hundred gentlemen, including the chancellor of the state, the judges, the speaker of the assembly, the recorder of the city, the president of Columbia College, and many other public officers.—Daily Adv., Fe 18, 1795.

The legislature passes an act authorising the mayor, aldermen, and commonalty of the city of New York to raise a sum, not exceeding £14,000, by taxation, for the support of the poor of the city, "and for purchasing further materials to build a new almshouse in the said city; for making repairs and improvements in the goal and bridewell of the said city."—Laws N. Y. (1795), chap. 12, cf. Mr 9.

At some time between this date and March 28, the title of the New York Gazette (see Ja 28) again became New-York Daily Gazette.—Brigham, A. A. S. Proc. (1797), 404, 426. See Ap 27.

Notice is published that "The Indians lately arrived in this city, will attend the theatre this evening."—Daily Adv., Mr 6, 1795.

The common council refers to the street committee "A Petition from the Proprietors of Lots on Delancey's Ground for a general Regulation of the Streets in that Quarter."—M. C. C. (1784-1811), II: 130.

The common council permits the use of the "Mud Bridge" for two months at £100 a month "for digg'ing out & lowering the River at Brunswick in New Jersey for the purpose of erecting a Bridge over the said River."—M. C. C. (1784-1811), II: 131. This yielded an income amounting to £18512.—Ibid., II: 179-80.

James Harrison & G. Parkyns advertise proposals for publishing 24 American views "in Aquatinta" by Parkyns. The advertisement, headed "American Landscapes," reads in full as follows: "Proposals. By James Harrison & G. Parkyns, For Publishing in Aquatinta, Twenty-Four Views; Selected from some of the most striking and interesting prospects in the United States; each of which Views will be accompanied with a descriptive account of its Local, Historical, and other incidental Peculiarities. By Mr. Parkyns, Author of the 'Monastick Remains and Ancient Castles in Great-Britain.' Conditions: I. That the work shall be published by Subscription: and that each Subscriber shall engage to take the whole set of Views, and pay for each engraving, if black or brown, 3 dollars; and if coloured, 5 dollars. II. That the dimensions of each engraving shall be 24 by 17 inches, executed in aquatinta, and published upon paper of a superior quality. The publication to commence immediately: and one engraving to be delivered to the Subscriber, or his assignees, by the first Monday of each succeeding month, until the proposed series shall be finally completed. III. That with the last View of the series, shall be delivered an engraved Title Page; an elegant characteristic Vignette; A Map of the Route, connected with the prospects exhibited in the course of the work; and an Alphabetical List of the Subscribers. Subscriptions are received by James Harrison, at his Warehouse, Maiden-lane, New-York; and by all the principal Printers in the United States."—Am. Minerva, Mr 10, 1795.

Most unfortunately, this publication evidently fell through. The only view in the proposed series known to have been engraved is the one of Georgetown and Washington of which only two impressions are
known, one in the Library of Congress, and one in the author's collection.

Jacob Morton and others, trustees of the N. Y. Society Library, petition the assembly for "a grant of a sum of money to pay a balance due for erecting a building for the library."—Assembly Jour. (Childs & Swaine ed.), 118. See Apr.—

Mr. Ricketts, owner of the "Amphitheatre," has recently declined to permit the use of it by Mr. Wignell's company, of Philadelphia, for a summer theatre, believing that "the introduction of a Second Theatre here would be opposed by the Citizens generally."—Daily Advertiser, Mr 14 and 18, 1795. But see Ag 23, 1795. See also Greenwood, The Circus (1809), 83, and L. M. R. K., III: 934.

As a "Testimony of the high Sense this Board entertain of the public Services of Alexander Hamilton especially in the administration of the Office of Secretary of the Treasury of the United States," the common council resolves to present him with the freedom of the city. —M. G. C. (1784-1811), II: 132. Hamilton acknowledged the honour on April 12 (q.v.).

Wm. Furman and Theodotus Hunt petition the common council for leave to establish a ferry "from the new market at Catharine Slip across to the opposite shore on Long Island," with "a suitable number of Boats."—From the original petition, filed No. 18, city clerk's record-room. The petition is referred to a committee.—M. G. C. (1784-1811), II: 132, 135. On June 1, the common council ordered that Hunt and Furman be licensed "to keep a ferry from Catharine Slip to any part of Brooklyn for five Years to keep two large Boats & two small Boats & to pay into the Treasury four Pounds per month."—Ibid., II: 150.

The common council orders payment of $5000 for the erection of a Fence at the Bridewell.—M. G. C. (1784-1811), II: 132.

The assembly passes "An act for the more effectual prevention of crimes," which alters the punishments for various offenses and appoints commissioners for erecting within the city and county of New York "a strong prison of confinement and labor."—Assembly Jour. (1795), 113, 114-15, 115-19. Daily Advertiser, Mr 13, 1795.

Samuel Osgood and others, trustees of creditors of John Ireland (see Mr 5, 1796), convey to Eeningham Embree the house and land formerly of Anthony Rutgers, and for some years known as Ranelagh Garden.—Liber Deeds, LI: 30. This instrument recites a pretended sale to one Knox (see Je 8, 1793), and sale at public auction to highest bidder on Nov. 14, 1794. Between this time and the date of the sale of the lots on Church St., south of file No. 18, city clerk's record-room. The petition is referred to a committee.—M. G. C. (1784-1811), II: 132, 135. On June 1, the common council ordered that Hunt and Furman be licensed "to keep a ferry from Catharine Slip to any part of Brooklyn for five Years to keep two large Boats & two small Boats & to pay into the Treasury four Pounds per month."—Ibid., II: 150.

The common council orders payment of $5000 for the erection of a Fence at the Bridewell.—M. G. C. (1784-1811), II: 132.

Samuel Osgood and others, trustees of creditors of John Ireland (see Mr 5, 1796), convey to Eeningham Embree the house and land formerly of Anthony Rutgers, and for some years known as Ranelagh Garden.—Liber Deeds, LI: 30. This instrument recites a pretended sale to one Knox (see Je 8, 1793), and sale at public auction to highest bidder on Nov. 14, 1794. Between this time and the date of the sale of the lots on Church St., south of file No. 18, city clerk's record-room. The petition is referred to a committee.—M. G. C. (1784-1811), II: 132, 135. On June 1, the common council ordered that Hunt and Furman be licensed "to keep a ferry from Catharine Slip to any part of Brooklyn for five Years to keep two large Boats & two small Boats & to pay into the Treasury four Pounds per month."—Ibid., II: 150.

The common council orders payment of $5000 for the erection of a Fence at the Bridewell.—M. G. C. (1784-1811), II: 132.

The assembly passes "An act for the more effectual prevention of crimes," which alters the punishments for various offenses and appoints commissioners for erecting within the city and county of New York "a strong prison of confinement and labor."—Assembly Jour. (1795), 113, 114-15, 115-19. Daily Advertiser, Mr 13, 1795.

Samuel Osgood and others, trustees of creditors of John Ireland (see Mr 5, 1796), convey to Eeningham Embree the house and land formerly of Anthony Rutgers, and for some years known as Ranelagh Garden.—Liber Deeds, LI: 30. This instrument recites a pretended sale to one Knox (see Je 8, 1793), and sale at public auction to highest bidder on Nov. 14, 1794. Between this time and the date of the sale of the lots on Church St., south of file No. 18, city clerk's record-room. The petition is referred to a committee.—M. G. C. (1784-1811), II: 132, 135. On June 1, the common council ordered that Hunt and Furman be licensed "to keep a ferry from Catharine Slip to any part of Brooklyn for five Years to keep two large Boats & two small Boats & to pay into the Treasury four Pounds per month."—Ibid., II: 150.

The common council orders payment of $5000 for the erection of a Fence at the Bridewell.—M. G. C. (1784-1811), II: 132.

The assembly passes "An act for the more effectual prevention of crimes," which alters the punishments for various offenses and appoints commissioners for erecting within the city and county of New York "a strong prison of confinement and labor."—Assembly Jour. (1795), 113, 114-15, 115-19. Daily Advertiser, Mr 13, 1795.

Samuel Osgood and others, trustees of creditors of John Ireland (see Mr 5, 1796), convey to Eeningham Embree the house and land formerly of Anthony Rutgers, and for some years known as Ranelagh Garden.—Liber Deeds, LI: 30. This instrument recites a pretended sale to one Knox (see Je 8, 1793), and sale at public auction to highest bidder on Nov. 14, 1794. Between this time and the date of the sale of the lots on Church St., south of file No. 18, city clerk's record-room. The petition is referred to a committee.—M. G. C. (1784-1811), II: 132, 135. On June 1, the common council ordered that Hunt and Furman be licensed "to keep a ferry from Catharine Slip to any part of Brooklyn for five Years to keep two large Boats & two small Boats & to pay into the Treasury four Pounds per month."—Ibid., II: 150.

The common council orders payment of $5000 for the erection of a Fence at the Bridewell.—M. G. C. (1784-1811), II: 132.

The assembly passes "An act for the more effectual prevention of crimes," which alters the punishments for various offenses and appoints commissioners for erecting within the city and county of New York "a strong prison of confinement and labor."—Assembly Jour. (1795), 113, 114-15, 115-19. Daily Advertiser, Mr 13, 1795.

Samuel Osgood and others, trustees of creditors of John Ireland (see Mr 5, 1796), convey to Eeningham Embree the house and land formerly of Anthony Rutgers, and for some years known as Ranelagh Garden.—Liber Deeds, LI: 30. This instrument recites a pretended sale to one Knox (see Je 8, 1793), and sale at public auction to highest bidder on Nov. 14, 1794. Between this time and the date of the sale of the lots on Church St., south of file No. 18, city clerk's record-room. The petition is referred to a committee.—M. G. C. (1784-1811), II: 132, 135. On June 1, the common council ordered that Hunt and Furman be licensed "to keep a ferry from Catharine Slip to any part of Brooklyn for five Years to keep two large Boats & two small Boats & to pay into the Treasury four Pounds per month."—Ibid., II: 150.

The common council orders payment of $5000 for the erection of a Fence at the Bridewell.—M. G. C. (1784-1811), II: 132.

The assembly passes "An act for the more effectual prevention of crimes," which alters the punishments for various offenses and appoints commissioners for erecting within the city and county of New York "a strong prison of confinement and labor."—Assembly Jour. (1795), 113, 114-15, 115-19. Daily Advertiser, Mr 13, 1795.
The legislature passes an act to enable the city of New York to raise by a lottery a sum not exceeding $10,000 for building an almshouse. It states that this city "from its situation is necessarily the receptacle of a greater number of paupers than any other city or county within this State." The common council, in its petition to the legislature (see Mr. 9), had stated "that the building appropriated for the reception of the poor and indigent inhabitants ... are so decayed" that the poor cannot be accommodated "with any degree of comfort." With money raised by taxation, the city has "provided many necessary materials for the purpose of erecting a new building," but "by reason of the expensive and necessary annual improvements in the said city since the late war which have been borne by the inhabitants thereof with great cheerfulness it would be too great a burden on them to raise the monies which will be required for the erection of this necessary building by an immediate tax." Hence the common council has asked the privilege of operating a lottery.—Laws of N.Y. (1795), chap. 37; M.C.C. (1784-1813), II: 131. See Ap. 7.

Dr. Alex. Anderson records in his diary: "... Rejoicing for the successes of the French in Holland—early in the morning a discharge of Cannon—and the Ships dress'd in Flags.

At noon, after another discharge of Cannon from the French ships, the Marseilles Hyman [The Marseillaise] was echoed from the city..."—A. Anderson's Journal for 1795 (MS.), 61, in Columbia Univ. Library; Paolo's Old New York, O. 1, 1889.

The common council appoints managers for the almshouse lottery (see Ap. 6), and directs that they report a "Scheme" for it.—M. C. G. (1784-1813), II: 136. See Ap. 13.

A plan submitted by Benjamin Taylor "to convey Fresh Water through the city..." in common council of committee and referred to the committee which is considering the proposals of Mr. and Crane (see Mr. 30)—M.C.C. (1784-1813), II: 137. Nothing seems to have come of these proposals. The subject was revived on Feb. 1, 1796 (p.v.).

The common council agrees to a report of a committee, appointed on Oct. 27, 1794 (p. 5), which states that it has been ordered to the petition of the "Black People," having found "a Piece of Ground containing four Lots of 100 by 25 feet each which can be purchased for $500." These lots lie "in the seventh Ward near where the Mansion House of James Delancey stood" (see Ap. 27, 1791); the committee believes that they are "in a proper Place," and that the city "should contribute $100 towards the purchase of these Lots," and the Abolition of the Commanity of the City of New York in trust for a burying Ground for the Black People.—M.C.C. (1784-1813), II: 137. The burying-ground was the site of the present No. 193 to 197 Christie St.—See L. M. R. K., III: 927. See, and cf. J. 1 and 22.

The common council deposits in the clerk's office a release from various grantees to the city of lands owned by them "to continue the Bloomingdale Road through the same of the breadth of four Roads."—M.C.C. (1784-1813), II: 137.

The common council refers to the street committee a petition of the Proprietors of Water Lots between White Hall & Coenties Slip for permission "to run out Piers for Harbours for the trading Vessels;" also a petition from the proprietors of Lots between Moore Street & the Exchange praying that "the completion of the latter may be enforced."—M.C.C. (1784-1813), II: 137.

A permanent line is established on the East River. The common council records the fact that "the unlimited extension of this City into the East River, by making further Grants to the Proprietors of Water Lots," has "long been conceived injurious if not ruinous to the internal and low parts of this City through want of the necessary descent for carrying off the Water out of the Streets into the River;" and that the board has judged "that a Wide and spacious Street along the front of this City would tend very much to it's ornament, convenience & safety." It therefore directed the street committee "to cause a Survey & Chart of the front of this City along the East River with the line of such Street marked there on, to be made and reported to the Board." (See, however, Mr. 8, Feb. 12, 1796.)

This council has reported such chart, "with the Lines of the said Street which is to be of the Breadth of seventy feet and beyond which no further Grants into the River are to be made or any Buildings or Wharfs erected or made excepting such Piers as the Board from time to time shall hereafter deem necessary for the safety of Shipping & the convenience of Trade & Navigation." Having frequently had this chart under consideration, and made alterations in the lines, the board now agrees upon the course of these lines, and enters a description of them in the minutes. They are "the inner side of the intended Street of 20 feet wide."—M. C. C. (1784-1813), II: 138-39. Cf. Ap. 14, 1794. This regulation was altered on Feb. 10, 1796 (p.96), the street referred to being South St. See, further, Jl 18, 1796.

The "New York Dispensary" is incorporated.—Laws of N. Y. (1795), chap. 61. The dispensary was at the corner of Nassau and Beaver Sts.—See Jl 17 and 24, 1791. For a description of it in later years, see Goodrich, Picture of N. Y. (1828), 295.

The legislature passes an act for the encouragement of schools. The city and county of New York are together given annually $1,588 for this purpose, the amount to be raised by taxation.—Laws of N. Y. (1795), chap. 75; see also ibid. (1801), chap. 77. See, further, S 23 and O 17, 1796.

Geo. Gray, tavern-keeper, advertises that, after April 11, the "New York Gardens," on Greenwich Road, lately kept by C. F. Brannon, will be reopened.—Daily Adjv., Ap. 9, 1795; City Directory. This place was formerly known as "Brannon's Garden," and was situated at what is now the south-west corner of Spring and Hudson Sts. In 1798, Joseph Tyler kept it, and called it "Washington Gardens."—Com. Adjv., D 14, 1798; L. M. R. K., III: 977. See D 22, 1801.

Alexander Hamilton writes from Albany to Mayor Varick acknowledging receipt of his certificate of the freedom of the city of New York (see Mr. 16). He says: "Among the precedings I have received, of the approbation of my immediate fellow Citizens, none is more acceptable or more flattering to me than that which I now acknowledge, etc."—From the original letter, in metal file No. 17, city clerk's record-room, endorsed "read & filed May 18th: 1795."—See M. C. C. (1784-1813), II: 148. The letter is reproduced as the frontispiece of ibid., Vol. I.

The managers of the almshouse lottery present several "schemes" to the common council (see Ap. 7), and one is adopted and entered in detail in the minutes.—M. C. G. (1784-1813), II: 139.

There is presented in New York the first translation from the German drama to be acted here, Schiller's "Räuber."—German Drama in English on the N. T. Stage, by Louis Baker (1915), 8.

Federal Republicans hold a meeting at the "City Assembly Room" in William St. to nominate candidates for the state assembly.—Daily Ady., Ap. 15, 1817. Political sales were also held here as well as at the Tontine Coffee House, Wall and Water Sts. After the completion of the Tontine Hotel at 115 Broadway, the City Assembly held its meetings there.

The Lombardy Poplar Tree has lately made its appearance in the streets of New York [see Jl, 1799]. Those who have planted it have made a bad choice. If shade is the object of street planting, it affords none. It's a mere May pole. . . .—N. Y. Mag. (1795), 258. For further account of the tree, see D 31, 1799. See also "Notable Trees in New York City," in 18th Ann. Rep. Am. Scenic & Hist. Pres. Soc. (1913), 191-99, where the trees referred to are the "giant tulp of Inwood," the "Livingston Cedar of Lebanon," near Throgg's Neck, and the "De Lancey Pine."—

Dr. Alexander Anderson records in his "diary" he going to Brooklyn, where he walks "along the bank as far as Wallabout," and "sees the remains of the Prison ship."—Paolo's Old New York, I: 239-40.

The common council accepts an offer from Mr. Ricketts of the "Profits of an Evenings Exhibition at his Amphitheatre for the purpose of purchasing Fuel for poor Families in the Winter Season."—M. C. C. (1784-1813), II: 140. The sum of $542 was collected and paid to the city council for this purpose.

Because persons have set fences in the river below low water mark on the Jersey shore, on the south side of Paulus Hook, where the drawing of scines is thereby obstructed, the N.Y. Common council passes "A Law to prevent the setting of Fences or other Obstructions in the River, within the limits and Jurisdiction of the City of New York." This board orders Mr. Shoo, who is employed to take fish for the use of the almshouse and bridewell, cause all such fences, stakes, and other things which may obstruct his casting or drawing his seine, to be removed.—M. C. C. (1784-
1795. 1814, II: 141–42. Certain inhabitants of Bergen wrote to Mayor Apr. 20. 1830. 20. Varick relative to a dispute with Mr. Sloo which this order pro- 23. 1795.—Matt and Hurtin’s “New-York Weekly Chronicle” changes its name to 25. 1803, In the New-York Weekly Chronicle. The last issue located is that of Oct. 1, 1795.—Brigham, A. A. S. Proc. (1917), 503. 25. 1795.—"Proposals are advertised for the publication of a portrait of Washington, Engraved by Robert Field, late of London, from the original painting by Walter Robertson;” also “An Equestrian Portrait of the President, attended by Colonel Hamilton, as his aid-de-camp, painted and executed by the same artist.”—Am. 27. 1803, Varick, "New-York Daily Gazette and General Advertiser."—Brigham, A. A. S. Proc. (1917), 404, 426. 28. The “New-York Alms-House Lottery” is advertised. It is for raising $10,000,000, agreeable to the act of the legislature of April 6, 1795 (s. v.), "for the purpose of building a spacious Alms- 29. Any one between this date and May 13, the title of the New-York Daily Gazette was changed to New-York Gazette and General Advertiser."—Brigham, A. A. S. Proc. (1917), 407 Early Newspapers, II: 419. See F 1, 1796. 31. A list is prepared of the proprietors, lessees, and occupants on Murray St.—See the original MS. in N. Y. Hist. Soc. at 1805 in Holden sale. See also the lists of those on Robinson St., between Grand and George Sts.; those on Smith St., from Garden to Dock St.; and those on Vesey St., from Greenwich St. to Broadway, (items Nos. 1814, 1818, and 1820 in Holden sale, filed in box labeled "New-York MSS. 1761–1800," in N. Y. Hist. Soc. 33. The position for the Bun of the U.S., having 15 stars and 15 stripes, goes into effect.—See Ja 13, 1794. 34. The "Columbia Academy of Painting, Is removed to No. 135, William-street." 36. "Archibald & Alexa. Robertson, Linnerns, Paint Portraits, Miniatures, Devices, Designs of every kind for Engravers, &c. 38. "At their Academy, Ladies and Gentlemen are instructed in Painting and Drawing History Pieces, Landscapes, Flowers, Fruit, Architecture, Perspective, &c. in water colors, chalk, India Ink, &c. 39. "Classes for the Summer season are now opened from six to eight in the morning; for Ladies on Mondays, Wednesdays, and Fridays; and for Gentlemen on Tuesdays, Thursdays, and Saturdays. Private tuition as usual. Costs $6, 1795. See O 2 and 11, 1794; O 8, 1792; O 1, 1802. 41. The common council permits John B. Coles and other inhabitants of the First and Second Wards who own water-lots between Whitehall and Coenties Slip, "to make five Piers each 120 feet long & 40 in Breadth on the East side of the 70 feet or permanent Line [see Ap 7] as agreed to & laid down in a Survey of the East side of the Slip"—"to build between the Piers that is proposed to be made between Coenties and the Exchange Slips will be 160 feet;" the latter slip will be widened 100 ft.; and the piers between the Whitehall and Exchange Slips will be 110 ft. apart.—M. C. C. (1784–1813), III: 144. 43. The corner-stone of the Park Theatre, covering the (present) Nos. 21–23 Park Row, is laid. From inscription on the corner-stone, quoted by Brown in Hist. of the N. Y. Stage, I: 69. See also Wilson’s Mem. Hist. N. Y., III: 147, and L. M. R. K., III: 985. The May Messes, Mangio were the architects.—See Ja 29, 1798; and descrip. of Pl. 75, I: 467. Quarrels between Hallam and Hodgkinson, original lessees and managers, delayed the opening of the theatre until Ja 29, 1798 (p. v.).—Brown, op. cit., I: 11. See O 2, 1796. 45. The paper published since March 20, 1794 (s. v.), under the name of American Minerva, and the New York (Evening) Advertiser now becomes the American Minerva, an Evening Advertiser.—Brigham, A. A. S. Proc. (1917), 283 Early Newspapers, II: 418. See My 2, 1796. 47. Greenleaf, the publisher, moves his office to 54 Wall St., the seventh door from the Tontine Coffee House.—Greenleaf’s N. T. Jour., My 6, 1795. 49. Thomas Greenleaf begins the publication of The Argus, & 51. Greenleaf’s New Daily Advertiser.—Early Newspapers, II: 418; Brigham, A. A. S. Proc. (1917), 351. See My 16. 53. The common council pays £195.5. "for Trees on the Battery."— 55. M. C. C. (1784–1831), II: 147. 57. The Tammany anniversary is celebrated as usual with a procession from their wigwam to the Presbyterian Church in Wall St. and thence to “Brother Hunter’s Hotel.”—N. Y. Mag. Hist., 59. 59. Samuel Latham Mitchell, M.D., professor in Columbia College, delivers the anniversary oration. His address was afterwards printed as a brochure with the title The Life, Exploits, and Precepts of Tammany; the famous Indian Chief (N. Y., 1795). A copy of this publication, presented by John Pintard in 1807 to the N. Y. H. S., was acquired by the N. Y. P. L. in Ford collection. 61. Twenty-four brass cannon, “lately from the foundery at Springfield,” are “paraded on the Battery for the purpose of being proved.” On being discharged, thirteen of them burst. Although a great number of spectators were present, nobody was hurt,—"which indeed is a miracle, for the pieces flew in every direction, several of them falling through the roofs of houses in various parts of the city."—Greenleaf’s N. Y. Gen. & Gen. Ady., My 15, 1795. 63. Thomas Greenleaf of changes his name to New-York Daily Advertiser.—See My 16 to The Argus, or Greenleaf’s New Daily Advertiser.—Early Newspapers, II: 418; Brigham, A. A. S. Proc. (1917), 353. See Ag 3, 1796. 65. "I went to the Coffee house to know the meaning of an uproar, in consequence of a badge of Freedom fixed up by some Patriots—a number of men, chiefly French, were singing and kneeling before it."—A. Anderson’s Jour., for 1795 (MS.), 92. 67. “This day a number of the republican citizens of New York, under military honors, are to erect a superb (carved) Liberty Cap at the Tontine Coffee House, in lieu of the less elegant one lately taken down [see F 6, 1794] from thence.”—Argus, My 18, 1795. The news report of the event is as follows: “At 6 o’clock yesterday afternoon a number of Liberty Caps were placed at the Tontine Coffee House, and erected a superbly executed Liberty Cap of carved workmanship, suspended upon a Tomahawk, between the thirteen stripes and the tricoloured flag, under which is scrolled the following emphatical inscription,—‘Sacrificed to Liberty,’ the ensemble forming a handsome decoration for the Hall of the Tontine. 69. As soon as the Cap was fixed, three cheers were given, and the Marseilles Hymn sung by the American and French citizens present. 71. "The following toasts were then given, attended with 3 cheers each. 1. He who dares to insult this Cap will incur the detestation of every true republican. 2. The three Republics, America, France, and Holland. 3. The company then repaired to the upper hall, where they partook of some refreshment, danced the Carmagnole, and withdrew. 4. "Five uniformed companies made a public parade ... on passing the Tontine they gave three rolls ... "—Ibid., My 19, Minerva, My 19; Daily Ady., My 19, 1795: N. Y. Jour. & Pat. Rot., My 17. 5. "Three American," in a published letter “To the People of the United States,” reviews events since the passage of the Jay treaty of amity and commerce, showing the British insults still suffered by Americans.—Argus, My 19, 1795. 73. The common council ordered that the clerk report “a Plan for reforming the great Court Room in the City Hall so as to render it more comfortable and convenient for public Business,” with
an estimate of expense.—M. C. C. (1784-1831), I: 149, 151. On June 26, and again on Aug. 17, payment of £50 was made towards this object.—Ibid., I: 179, 172. On Nov. 9, £250 was paid "towards the Repairs to the City Hall" (ibid., I: 197); while on Jan. 11, 1796, £60 was paid "for reform of the G5 Court Room & for Repairs to the City Hall" (ibid., II: 208).

James Wilson, the architect, at 148 Broadway, publishes the following statement: "To the Public. A regard for my own reputation as an architect, induces me to take the liberty of informing the public, (and particularly the citizens of New-York, to mention of which I am grateful for the kind -managed so far on the City Hotel and Public Rooms, in Broadway, is now building, is not a plan of mine."—N. Y. Gaz. & Gen. Adv., May 19 and 25, 1795; Daily Adv., My 20, 1795.

"The attention of the town was yesterday [My 20] much engaged by the circumstances of the removal of the French Flag, which had been attached (with the American) to the Liberty-Cap that was replaced on Monday evening [see My 18], in the Coffee-room of the Tontine Coffee- House...it appears that circumstances strongly concurred to fix the act on a Mr. Anderson, who arrived within a few days from England."—Daily Adv., My 21, 1795; Gaz. of the U. S., My 22, 1795. Another news report calls it "the Flag of the French Republic, recently put up by the Republican Citizens of New-York, in union with the American Convention..." signed by "Walker Bicker in behalf of the Republican Citizens of New-York," offers a reward of $500 for securing "in any jail of the United States" a certain "William Anderson, or any other person or persons who shall have been guilty or concerned in the said theft."—Argus, My 21, 1795; N. Y. Jour. & Pat. Reg., My 23, 1795; Herald, My 23, 1795. Affidavits of eye-witnesses, dated May 20, charging Anderson and his companions with the theft, are published in the Argus, op. cit. On May 21, a temporary flag of bunting replaced the original.—Ibid., My 22, 1795. See also McMaster, II: 214-15.

Thomas Twining, sojourning in New York, writes in his diary: "I walked to the Museum...It was an older and more extensive collection than the similar one at Philadelphia. It contains—"Twining, Travels in Am. 100 Years Ago, p. 156.

Publication of the New-York Evening Post (see D S, 1794) is suspended.—Early Newspapers, II: 418; Bragham, A. A. S. Proc. (1917), 411.

"...at one o'clock, our beloved and most respected Citizen John Jay, arrived in the Ship Severn, Capt. Goodrich, in 42 days from Bristol. An immense concourse of Citizens were in a few minutes assembled on the wharf, who received and conducted him amidst repeated acclamations to his house in Broad Way; when Mr. Jay addressed them, as nearly as we recollect, in the following words: "'Fellow Citizens, these marks of your attention to me are highly grateful—I can never forget them—and the recollection of them will give a new motive to do, what shall be agreeable to you, and conducive to the general welfare. I thank you for your kind reception, and am happy to be again in my own country, and in the midst of you, my friends, and fellow citizens.' Acclamations of cordial applause answered the address; and the Assembly separated with mutual congratulations.

At six o'clock a joyful peal was rung from the bells of the city, and at seven a federal salute was fired from the Battery, which was returned from the fort on Governors Island."—Daily Adv., My 29, 1795. This hearty welcome was doubtless largely due to his being governor-elect. See Ap., J: 8 and J: 11.

The common council rejects a petition "for extending the Portico of the Theatre erecting on Chatham Row across the Foot Walk of the Street."—M. C. C. (1784-1831), II: 150. This is the Park Theatre. See My 5.

The common council refers to the land committee a petition from Jacob Morton "for a renewal of the Lease of the Commonslands at the Dove Tavern."—M. C. C. (1784-1831), II: 150.

The common council orders payment of £100 "towards paving in the Fields."—M. C. C. (1784-1831), II: 151. On Je 22, another payment of £2500 was made.—Ibid., II: 159. On May 16, 1796, £100 more.—Ibid., II: 240. This probably refers to foot- ways.

The common council orders payment of £100 to Mangel Minthoro "towards the Lot of Ground purchased for a burial place for the Black people" (see Ap 7).—M. C. C. (1784-1831), II: 151. See further, Je 22.

A letter from Philadelphia to a New Jersey newspaper states that "A gentleman in New-York, who owned a farm of 300 acres of land adjoining the Bowery road, was offered for the sum of $50,000 in York currency, which he refused to accept. The offer was upwards of £5,666 per acre."—N. J. State Gaz., Je 9, 1795.

From the 6th to the 15th of this month, the books of the N. Y. Society Library were moved to the new building (see Ap).—Keep, Hist. of N. Y. Society Lib., 224, 225, 231.

The joint Committee of both houses of the Legislature, for canvassing the votes for the Governor and Lieutenant Governor of this state, with a number of respectable citizens, waited upon Mr. Jay, on Saturday, to congratulate him upon his election; and at twelve o'clock, a federal salute was discharged from the Battery, in consequence of this event."—N. Y. Mag. (1795), 383. See Ap.

The common council adopts a regulation of Orange St., to carry surface water from Chatham St. into the Fresh Water Pond.—M. C. C. (1784-1831), II: 159.

Trinity vestry resolves "that the Committee of Leases take measures to dig out Greenwich Street as directed by the Corporation of the City [see Je 10, 1794] and attend to Mr. Rhinelander's completing his Contract with this Board in order that this Board may obtain from the City Corporation The Grant of the water Lots promised to them under certain Conditions."—Trin. Min.

"A new two story House, brick front...lying in Broadway, commonly called New-Road, about one mile from the city" is advertised for sale. "It will suit a genteel private family, who would wish to reside in the country."—Argus, Je 9, 1795. For the various names, and the progressive development, of Broadway, see L. M. R. K., III: 994-95.

The common council orders that the managers of the almshouse lottery (see Ap 6, 7, 13, 28) "pay to the City Treasurer such Monies as they shall from time to time receive for Lottery Tickets & take his Receipt."—M. C. C. (1784-1831), II: 156. See Ji 27.

The cost of erecting a fire-engine house at the Fly Market is £255:11s.—M. C. C. (1784-1831), II: 156.

The horses of the "Northern Stage," descending the Harlem hills start at a full gallop. The driver and a passenger, on trying to get out, are thrown out and killed.—N. Y. Jour., Je 20, 1795. Thos. F. Devoe, in his MS, notes on events in Harlem (in N. Y. H. S.), says that Benson McGowan told him that, because of this fatality, the name "Break-neck Hill" was thereafter applied to the spot.

The committee on the subject of a ferry from New York to Governor's Island (see Ap 21, 1794) makes an oral report to the common council, which orders that it be referred to the commissioners for directing the public works on the island "to make such Arrangement for the establishment of a safe & convenient Ferry...as they shall judge most proper." It is also ordered that the keeper of the ferry be permitted to demand six pence each way, from every one excepting those employed at the public works and the troops in garrison there.—M. C. C. (1784-1831), II: 157.

Isaac Fortune and others, "free People of colour," who have recently formed the African Society, make petition to the common council for a permit to use certain lands, that they have acquired, for burial purposes. They state that their society is for the purpose "for promoting the Morals, by promoting a spirit of brotherly Love and a strict Regard to the Laws of the State; and also with intent to procure a place for the erection of a building for divine worship and the interment of People of Colour." The city, Trinity Church, and various individuals, have aided the
THE THEOLOGY OF MANHATTAN ISLAND

The city celebrates the Fourth in the usual manner. An expense of $15 for 5000 tories and marines, and of $24 for rings of bells, is incurred (M. C. C., 1784-1851, II: 162); also $25 "for the Expenses of illuminating the Gov’t House & City Hall," and something under $40 at Simmons’ tavern (ibid., II: 165).

A tri-weekly paper called Gazette Parisienne et Américaine, having alternate columns of English and French, appears without the name of the publisher. The issue of July 17 bears the imprint of John Delaplaine—Brigham, A. L. S. Proc. (1795) 430; Early Newspapers, II: 420.

A number of citizens petition the common council for "the use of the large room in the city hall usually occupied by the Legislature to hear preach therein the celebrated Rev’d Ed. Wickescher."

"-From original petition (in metal file No. 18, city clerk’s record-room), endorsed "read July 6th 1795 & rejected;" M. C. C., 1784-1851, II: 161. Rev. Elkannah Winchester was a preacher of the Universalist faith. As payments were still going on for alterations in this room (see My 18), which is referred to in the Minutes (II: 161) as "the great Court Room," it is likely it was not yet ready for use.

"A Release from Samuel Delaplaine & Wife to this Corporation of the Lots of Ground near where the old dwelling House of James Delancy stood in the 7th Ward in trust for the use of the black people as a burial Ground" (see Je 22) is read and approved by the common council, which orders that it be recorded and deposited among the "Corporation Deeds."—M. C. C. (1784-1811), II: 161. See also L. R. K., III: 937. This ground should be distinguished from the old Negroes’ Burying Ground, just north of the wall which was formerly Van Borsum’s land. See O 4/14, 1673; Je 27, 1796.

The common council adopts a report of the road committee on a plan or survey for continuing the Bloomingdale Road (see My 30, 1791) "from the place where the ancient Road terminated at the Bar of Nich. De Peyster which is the place where the dwelling House of Adrian Hoogland formerly stood."

"The details of the survey are entered in the Minutes.—M. C. C. (1784-1851), II: 164.

The common council refers to the street committee a petition for digging out Broadway north of Barley (Duane) St.—M. C. C. (1784-1851), II: 164.

A notice is published that "A meeting is to be held on the 18th (Saturday) at the City Hall to express the detestation of the people against the treaty made with Great Britain."—Daily Adv., Jl 15, 1795; McMaster, II: 218.

"Last Thursday evening and Friday morning [July 16 and 17], notices appeared in all the public papers, requesting a meeting of the citizens, at 12 o’clock on Saturday, for the purpose of joining with our fellow citizens of Boston, who last Monday unanimously adopted resolves start published in the New-York Telegraphic Magazine in New York. This lasted until February, 1799—Ford, Check-List of Am. Mag. Printed in the 18th Cent., 50.

The secretary of state waits upon John Jay at his home in Broadway, and administers to him the oath of office as governor of the state, after which congratulations are extended to him by a number of citizens. Stephen Van Rensselaer is sworn in as lieutenant-governor.—N. Y. Mag. (1795) 447.

The substance of the Jay treaty with England (see N 19, 1794) is made public in New York.

Notwithstanding that Jay had been inaugurated governor on July 1 (q.v.), the excitement against the treaty, and the denunciation of Jay as the one responsible for it, is intense. At a public meeting in Broad St., Hamilton while defending Jay’s work, was struck in the face with a stone thrown by a member of a mob which had burned copies of the treaty before the house of the British minister. The portrait of Jay was burned, and chalking in large white letters on the walls of a big building were the words: "Damn John Jay! Damn everyone that won’t damn John Jay! Damn everyone that won’t put lights in the windows and sit up all night damning John Jay. An effigy displays Jay supporting a pair of scales which has the treaty on one side and a bag of gold on the other, and saying: "Come up to my price and I will sell you my country."—Political Hist. of the State of N. Y., by DeAlva Stanwood Alexander (N. Y., 1906), I: 65; citing John Jay’s Second Letter on Davidson’s Federalist (N. Y., 1864), 19; Daily Adv., Jl 3, 1795. See also Jl 20; and McMaster, II: 216-26, and authorities there cited.
chronology: the reconstruction period: 1783-1812

1793
a great tumult, about 500 of them drew off again, proceeded to the battery, formed a circle and there burnt the treaty, opposite the government house."—Argus, Jul 20; see also Alexander Anderson's Journal for 1793 (MS.), p. 149-50, in Columbia Univ. Library; Pasko's Old New York, II: 102-3; Grant Thoburn's Fifty Years' Reminiscences of N. Y. (1845), p. 148-50. The chief objections to the treaty were: 1. Not non-renewable; it gave the right of search; it called for no indemnity for the injury done by holding the posts; it yielded advantages no American ought to yield but with his life; it settled principles dangerous to the lives and liberties of the people."—McMaster, History of People of U. S., II: 218-21. For contemporary articles criticizing it, see Greenleaf's N. Y. Journal, Jul 23, 21 29. See also the report of this incident as given in a letter by John Jay to his son, in the Washington Papers, and published in the Richmond of Aug 7, 1793.

1794
A new ferry is established between Catharine Slip, near the ship yards, across to a new stairs, near Mr. Sands' rope walk, on Long Island.—Daily Advertiser, Jul 28, 1795. See also L. M. R. K., III: 942.

1795
The grand jury publishes the statements: "From a minute examination they are sorry to be able to assert, with truth, that they find the markets loaded with filth and garbage to a degree that excited the mingled emotion of fear and disgust; . . . The grand jury also express a very neglected and offensive state, . . . are of opinion that if a regular set of scavengers were appointed to each ward the evil complained of would be considerably removed.

"The Grand Jury also present as a nuisance of the worst sort, the unlimited permission of so many petty Taverns and Grog Shops in the city and its vicinity; these, instead of being an accommo
dation to the public, are considered (at least most of them) as nothing better than haunts of debauchery and nests of vice, and they become the more obnoxious to the peace and good order of the city, their being so generally resorted to on the sabbath day. . . ."—Daily Advertiser, Apr 13, 1795.

1796
John Murray and other residents in the vicinity of St. George's Chapel, "alarmed at some recent Robberies committed in their neighborhood, and conscious of themselves much exposed from the remoteness of their Residence from the usual Stations occupied by the Watchmen, are desirous to erect a Watch-house at their own expense to be placed at the South Corner of the said Chapel, and beg the Corporation will infuse them with one of the City-Watchmen."—From original petition in (metal file No. 18, city clerk's record-room) endorsed "read & filed 17th August 1795 regulating funds for further Consideration.

The common council approves a report of the street committee presenting plans for regulating Fisher (Bayard), George, Harman (East Broadway), and Cheapside (Hamilton) Sts.—M. C. (1784-1811), II: 171. It is impossible to identify the George St. here referred to, as five streets were formerly called George St.—See L. M. R. K., III: 1000.

Trinity vestry resolves: "That the Committee to Superintend the Building of St Marks Church be directed to proceed with the same until it is under cover and no further."—Trinity Min. (MS.). This is the first mention of this church by these names. It also resolves "That the Committee of Leases take such order respecting levelling the Negro Burial Ground as may be proper."—Trinity Min. (MS.).

The Directory is established in France.—Anderson, op. cit., 221.

Gardiner publishes the Tammany Society's resolutions of June 25 (q.v.), which give him possession of the museum, and adds: "The Museum has, in the course of this summer, undergone an entire new arrangement much for the better, and is daily becoming more useful and pleasing and there has lately been added to it many valuable pieces of nature and art. The literary part has increased with astonishment, and the Library consists of upwards of five hundred volumes, most of which respect the history of this country, and the Proprietor is adding to it daily. Catalogues of this Library is preparing, and when done will be printed, by which it will be found, that it contains the best history of our country that is collected together. The Proprietor, in order to make this Library really useful to his country, requests and privileges every person, who is 21 years of age or upwards, without any expense, to resit to it every day, and read any of the books, or take any abstracts that may suit his purpose, (for this purpose a room is set apart particularly having no connection with the Museum.)"

"The Corporation of this city, ever disposed to encourage patriotic undertakings, and favourably impresscd with the importance of the present, (as being useful and ornamental to the city) they have generously granted the Exchange in Broad-street, for the use of the Museum.

N. B. Any article which it may be wished to present or deposit, will be most thankfully received by the Proprietor."—N. Y. Directory (1795), p. 15. Essentially the same announcement was printed in the Am. Minerva, Ja 29, 1796. See Ja 25, 1796.

Dr. Alexander Anderson becomes physician at Bellevue, to take care of patients suffering from the epidemic (yellow fever).—From his diary, pub. in Pasko's Old N. Y., II: 189, the original MS. being in Columbia Univ. Library. "In 1795, that part of the fire which destroyed the specimen of our calamity was remark.ably distinguished by peculiarity of circumstances and situation (aided by the singular regularity of our rains), seemingly well calculated for the accumulation and decomposition of all kinds of perishable animal and vegetable substances."—Medical Repository (1795), II: 315-25. On 10th (q.v.), Anderson made a report of the deaths and cures at Bellevue. See also the entries in his diary under 1795, S. 9 and 12, 1796, and p. 26, 1796, in the Medical Hospital. For another contemporary account of the epidemic, see Ag 26. See also History of the Yellow Fever, as it appeared in the City of New York in 1795, by Alex. Hosack, Jr., M.D. of N. Y. (Philadelphia, 1797).

Washington approves the Jay treaty (see N 19, 1794), with the advice and consent of the senate. — Senate Journal and Pub. Papers of John Jay, IV: 182-83. See also Windsor, VII: 172, 269, 556, 616-67, 517. McMaster, II: 245, and passim; Gerard, Treatise on the
THE ICONOGRAPHY OF MANHATTAN ISLAND

1795 Writing to Noah Webster, Dr. E. H. Smith of this city gives Aug. 26 this account of the yellow fever epidemic: "The prevailing fever still continues in the neighborhood where it first broke out. And except in one single instance, I believe, has not been below Rock- near Burling Slip—nor rather in John St. near Burling Slip. . . . The fear of contagion has been so great, that the bodies of persons dying of fever of any kind, have been immediately removed, after death.—Alarm in the City seems to have practically nearly subsided. The disease is hardly to be termed contagious—there not being more than four instances in which there is suspicion of contagion.—Letter from E. H. Smith to Noah Webster, among Noah Webster MSS, in N. Y. P. L. A letter of the same writer (see S 29) shows that he was unduly optimistic when writing to Webster. See Ag 28.

28 The "Committee of Health" reports that 20 persons have died of "the present epidemic" since Aug. 24. They are "so fully persuaded that the disorder with which we are principally, if not altogether along the eastern shore of this city, is a local malady; that they have directed various measures to be pursued for the removal of its most probable sources." They further report that the number of sick has "considerably decreased," and that two only have died "in the last 24 hours."—N. Y. Com. Adv., Ag 29, 1795. A letter of the same date received in Philadelphia from a New York correspondent expresses a different view: "The fever now prevails in Water-street; my family and myself are unfortunately in the midst of it. There are buried from our neighbourhood eight or ten every night.—God only knows what will become of us."—Ibid., S 5, 1795. See S 4.

31 Gov. Mifflin of Pennsylvania issues a proclamation prohibiting all intercourse between Philadelphia and New York for one month, or until the proclamation be revoked, on account of "an infectious disease" (yellow fever), existing in New York. In consequence, Gov. Jay of N. Y. State made an investigation through the Medical Society, the College of Physicians, and the common council, of New York (see S 8), and on Sept. 9 was able to write to Gov. Mifflin an authoritative report. This report, covering extensive correspondence, was published in the Herald, S 90, 1795.

The reason for Gov. Jay's prompt and thorough investigation was that Gov. Mifflin's proclamation, "by exciting alarm throughout this and the neighboring states, and in foreign countries, naturally tends to produce embarrassment to the commerce of this city; and to interrupt that intercourse with the country which is at all necessary to the convenience and intercourse of both."—Ibid. These reports show that, from July 30 to Sept. 8, 59 deaths were reported to the health committee. From Sept. 25 to 28, from 14 to 27 died daily, the number gradually decreasing.—Ibid. See also ibid., S 2 and 9. See, further, S 4.

By the end of October, the epidemic had about disappeared.—Ibid., O 31; N. Y. Jour., O 31. A new building was erected at Bellevue during the sickness.—Herald, N 7, 1795. See also N. Y. Jour., J 1, 1796.

The editor of the Commercial Advertiser contends that the governor of Pennsylvania displays a "most unfriendly disposition" in his proclamation "prohibiting all intercourse by land or water with N. York and Norfolk for the space of one month, or until the order shall be revoked, under the penalty of 500 dollars." This action was taken, it is claimed, "on the authority of private letters, without ever writing to our health committee for a state of facts." The disease "has not proved contagious enough to occasion any general alarm in New-York." The editor adds: "Is this a generous return for 5000 dollars raised in New York to assist the suffering poor of Philadelphia, during their calamity?" (See O 15, 1793.)—Com. Adv., O 4, 1795. Under the same date, the chairman of the health committee writes to the chairman of the board of health of Philadelphia expressing the belief that the proclamation has been made on information that is unfounded, and requesting copies of letters of information received by them, "together with the names of the gentlemen who wrote them."

The hope is also expressed that in the future the Philadelphia legislature will hear the justice to believe them full as capable of controlling disease, the mode of treatment, and the number of deaths. He says: . . . the north-eastern part [of the city] is almost wholly deserted, by the well. Not less than 20,000 have fled.—From the original MS, filed with Miscellaneous MSS. at N. Y. H. S. See also An Account of the Epidemic Fever, which prevailed in the City of

A treaty of peace and amity is signed by the United States and Algiers. The United States agree to pay a sum of 22,000 "Algerine sequins" (about $1,200) in maritime stores.—U. S. Treaties, Conventions, etc. (1776-1800), 1-6. The cost of the treaty, including the redemption of prisoners, presents to the Algerine government, and gratuities or bribes to officials, was stated by the Secretary of the Treasury as $992,465.25. To have completed the six frigates ordered under the act of March 27, 1794, would have cost $1,142,160.—Wm. VIII, 761; McM aster, II, 176.

Complaints having been made of "great Damage being done by Goats going at large, to the Trees & Shrubs as well in private Gardens as in the Places set apart as public Walks for the Inhabitants," the common council ordains "that it shall not be lawful for any Goats to go at large in any part of this City. Goats found at large shall be thereby forfeited to and become the property of any Person who shall seize & take such Goats." It is made lawful for such person "to kill or destroy or seize & take & appropriate such Goat to his or their own use."—M. C. (1784-1831), II, 176.

Mayor Varick lays before the common council a letter of Sept. 6 from Gov. Jay on the subject of the proclamation issued by Gov. Mifflin (see Ag 31) suspending all intercourse between New York and Philadelphia. The common council considers this, together with "a Report made to his Excellency on the 5th Instant by the Medical Society in this City And also a Report made to his Excellency by the Health Committee in this City on this day;" and thereupon resolves that the mayor be requested to inform Gov. Mifflin, in letter, answer to this letter, that he board be informed, the reports correct, and "that a much greater Degree of general Health prevails in this City at present than is usual at this Season of the Year."—M. C. (1784-1831), II, 177.

A society, just formed, "for the purpose of aiding & assisting the Magistrates in the due execution of the Law against the propagation of the Lards Day," is commended by the common council.—M. C. C. (1784-1831), II, 178. At the next meeting, it was ordered that the law "for the suppression of Immorality," and the ordinance "for the due observance of the Lord's Day called Sunday," be published in the newspapers.—Ibid., II, 179.

Ricketts reopens his "Amphitheatre" on Broadway, the place having "undergone a thorough alteration, with scenery, machinery, decoration, etc."—Greenwood, The Circus (1909), 85. See also N 3, 1794.

An advertisement, published in New York, calls the attention of "Sportsmen" to the "Beaver Pond Races," which are to begin Oct. 14. The course is around the pond, which is at Jamaica, L. I.—Daily Adv., S 15, 1795.

Cornellius and Alexander Tiebout advertise proposals to publish portraits of George Clinton and John Jay. "Engraved by Cornelius Tiebout, Citizen of New-York; now resident in London," and "Taken from original paintings of our celebrated countrymen, Gabriel [sic] Stewart and the late Joseph Wright."—Argus, S 16, 1795.

Aaron Burr writes from Philadelphia to his daughter Theodora: 17 "By this post I received a letter from Colonel Ward, requesting leave to remove his family into my house, Richmond Hill [see Ja 5]. He lives, you may recollect, in the part of the town which is said to be sickly. I could not therefore refuse."—Davis, Memoirs of Aaron Burr, I, 387.

Dr. E. H. Smith writes to Mason Fitch Cogswell, a physician and surgeon of Hartford, Conn., an account of the yellow fever epidemic in New York (for an earlier letter, see Ag 26). He gives proofs, which he believes them full as capable of controlling disease, the mode of treatment, and the number of deaths. He says: . . . the north-eastern part [of the city] is almost wholly deserted, by the well. Not less than 20,000 have fled.—From the original MS, filed with Miscellaneous MSS. at N. Y. H. S. See also An Account of the Epidemic Fever, which prevailed in the City of

The common council orders that the city treasurer "settle with & pay Brockholst Livingston the arrears of Rent due on the Lease of Belle Vue House."—M. C. C. (1784-1811), II: 179.

The common council orders that the Bowling Green be appropriated for the temporary use of the governor.—M. C. C. (1784-1811), II: 180. See Ap 22, 1798.

The council orders payment of $5,000 to the commissioners of the almshouse for the relief of families "distressed & necessitous by reason of the present epidemic Fever in this City."—M. C. C. (1784-1811), II: 180.

The common council appoints a committee "for the erection of a new Stable at the Almus House for the public."—M. C. C. (1784-1811), II: 180. The old one was pulled down on or about Nov. 9, 1792 (g. r.). On Oct. 19, payment of $50,000 on account of the new stable was made (ibid., II: 191), and on Nov. 23 a balance of £591,141½ (ibid., II: 201). Cf. Je 26, 1798.

Mayor Varick reports to the common council the receipt of a letter from Mayor Clarkson of Philadelphia, enclosing a donation of $5,000 from the citizens of that city "to be applied to the use of the Poor and distressed of your City.

The letter recalls the "generous Assistance" of New York (see O. 11, 1791) at the time of "our Affliction two years ago"—M. C. C. (1784-1811), II: 181. Mayor Clarkson's letter appears also in N. Y. Com. Adv., O. 8, 1795, together with a letter of thanks from Mayor Varick. For the first application of the fund, see M. C. C. (1784-1811), II: 192, 197, 212.

The council orders the making of an ordinance "for the Regulation of the Teas Water Men in order that they may be compelled to assist in supplying the Engines with Water in case of Fire."—M. C. C. (1784-1811), II: 185.

The effect of the yellow fever epidemic on the city is thus described to Noah Webster by a New York correspondent: "The City is entirely deserted, no business of any kind going on, every day has the appearance of requiring the fall ships to arrive every day which I suppose will bring the Merchants to town. I am afraid that your return to town would be attended with danger as the Physicians here say that the infected air would have a greater effect on a person coming from the Country than on those who have remained in town."—Letter of Joseph Dudley Webb to Noah Webster, among Noah Webster MSS., in N. Y. P. L.

Anderson gives the following "List of Deaths & Cures this season" at Bellevue:

<table>

29 remaining under care.

—A. Anderson's Jour. for 1795 (M.S.), 217. On Aug. 24 (g. t.), Anderson had been appointed physician at Bellevue.

On account of the crowded condition of the bridewell, which is partly occupied by paupers from the almshouse, the common council orders that the ground-floor of the jail be fitted up for the confinement of vagrants.—M. C. C. (1784-1811), II: 185, 191. On Jan. 2, the balance of the city's account for repairs to the jail, to the amount of £777.10½, was paid.—Ibid., II: 208.

Anderson says: "the City begins to look more lively—numbers are flocking in."—A. Anderson's Jour. for 1795 (M.S.), 225. On Oct. 24, he recorded: "The City begins to resume its usual appearance and a revival of business accompanies the return of health."—Ibid., 228. For a condensed account of the epidemic in New York, see 1795.

The common council orders that the pavement of Greenwich St. be completed "to the Fence at the Battery," also that the pavement "of the South side of the Street between Kennedy's House & the Battery" be completed, and made to meet that of Greenwich St.—M. C. C. (1784-1811), II: 192.

"By reason of the great sickness in this City and the absence of many of the inhabitants the collection of Monies, on the Tax for supporting the Poor & other contingencies, has not been equal to the sums required for defraying the current Expenditures." The common council therefore orders that the city treasurer negotiate a loan of $3,000 at the Bank of New York.—M. C. C. (1784-1811), II: 192-93, 196. It should be observed that, at this period, both the pound and the dollar are used in the various financial records of the city. Regarding the introduction of the dollar, see 11 June 1785, N. Y. P. L.

R. Taylor makes "A Map of a parcel of Land belonging to the Estate of the late Sir Peter Warren lying at Greenwich in the Outward of the City of New York, plotted to a scale of 200 feet to an inch." It shows "Abbington Road or Love Lane," "The Shoot Road," "Warren Road," "Southampton Road," "Fitz-Roy Road," "Great Kill Road," "Union Road," "Old Greenwich Lane," and "Slusher Road." The original map is preserved with the Warren papers in the N. Y. H. S.; see also A. Pl. 5b, Vol. III.

Mayor Varick informs the common council of his intention to purchase "about twenty Acres of the Common Lands (situate on the North side of the Land on which the House commonly called the Dove Tavern near the five Mile stone) whenever the Board shall be disposed to sell those Lands." The application is referred to the land committee.—M. C. C. (1784-1811), II: 196.

The mayor lays before the board a letter of Nov. 9 from the inhabitants of Southwark (Philadelphia), expressing sympathy for the sufferers of the citizens of New York. While rejoicing to hear "of the restoration of Health to the Inhabitants" of this city, they have collected, and send to the mayor, the sum of $505.25 "for the use of the sick & sufferers."—From the late malignant Fever.—M. C. C. (1784-1811), II: 197-98.

The health committee having applied for an advance of $3,000 to defray the expenses of Bellevue Hospital, $400 is so advanced "out of the Revenue fund to be charged to the State of New York."—M. C. C., II: 198.

Isaac Stoughton, "late Chairman of the Committee for purchasing Materials for the erection of a new Alms House," renders an accounting of the expenditure of part of the moneys put into his hands. Referred to committee of accounts.—M. C. C. (1784-1811), II: 198, 200. See, further, P. I., My 16, 1796.

Because his lot is not "new made Ground agreeable to the Words of the Law," the common council refuses to permit Jas. W. Lent "to erect his Building over the Water on Flies and to fill in the Lot at a future Day."—M. C. C. (1784-1811), II: 196, 198.

The common council having referred to a committee, on Oct. 26, a petition from Haines & Thompson "to erect Stairs at the White Hall Slip for the accommodation of the Staten Island & Eliz. Town Boats," the committee reports that proposals have been made "by Persons interested in the Passage Boats from Staten Island & Eliz. Town, to erect a Pier at the South East point of the Battery for a Landing Place, and to erect a Bridge to extend from the said Pier along the Battery on the West side of Whitehall Slip to the Street in front of the Slip, as a Passage to and from the said landing place." The board, however, is of the opinion that it would be improper to order or consent to the erection of any Wharf or other Building on the West side of Whitehall Slip lest it might be construed to interfere with the Reservation in the Charter respecting the Soil in the River round the Battery.

It is also determined "that a convenient Stairs ought to have been made in the Wharf or Pier on the East side of the Slip opposite to front Street as a landing Place for the passage Boats." It is ordered that the committee attend to "the making of a Stairs in the body of the Wharf on the East side of that Slip and to be forever kept up & maintained in good Order at the Expense of the Grantee of his Assigns of the Lot adjoining to the Slip."—M. C. C. (1784-1811), II: 192, 198-99.

The common council, "being under the necessity of making large advances of Money to discharge the Expences of the Health Committee & Bellevue Hospital incurred during the late Epidemic Fever in this City," orders that the treasurer negotiate a further loan with the Bank of New York (see O. 26) of $5,000, to be covered by city bond.—M. C. C. (1784-1811), II: 200. See, further, N. 30.

The common council orders that the committee on repairs to the city hall "take order for completing the lower Room, for the use of the Clerk of the Supreme Court," —M. C. C. (1784-1813), II: 200.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1797. The city surveyors, Casimir Th. Goernich, Evert Baucelen, Jr., and B. Taylor, petitioned the common council for larger fees, claiming that the legal price of eight shillings "for laying out a House Lott is insufficient for their subsistence. They also state "That the Duties of their Office, in consequence of the extension of the City, requiring much more Thought and Attention than heretofore, are prevented thereby from embarking in any other Concern . . . whereby they might improve their Circumstances", for the purpose of collecting the waters thereof, for the use of Mills and that such Dam should be the foundation of the Bridge to be built across the said River. He "is desirous to commence the building of the said Mill Dam & Bridge early in the approaching Spring." Therefore solicits the "Corporation to confirm the Grant, so that he may legally go on to dam & pond the Waters of that River and of course cover with it, the said Lake, upon this Hyde’s account between high & low water mark and as it would be of consequence to the early prosecution of this undertaking that the Contracts for the necessary Timber should be made this Fall, before the Hudson River is shut with Ice, & the communication stopped, he hopes the Corporation will come to as speedy a determination upon this subject as their convenience will admit of." From MS. copy of the Coles Times in metal file No. 20, city clerk’s record-room.

On Nov. 30, this representation was referred to the street committee.

M. C. C. (1784-1811), II: 202. On March 7, 1796, the common council approved the committee’s report favouring the petition.

Ibid., II: 233. See, further, Je 13, 1796. A public dinner is given at the city’s expense in celebration of the evacuation of the city by the British. John Hyde’s account for (£40) was paid Dec. 10.—M. C. C. (1784-1811), II: 204. This day had been designated by Gov. Jay as a day of prayer and thanksgiving, particularly for the cessation of the plague of yellow fever. The proclamation was issued on his own authority, without legislative provinice, and was the first so issued by a governor of the state. It was immediately assailed by Democratic newspapers, although he gave ample reasons for issuing it. His recommendation that there be a prayer for the preservation "of the valuable life and usefulness of the President of the United States" was represented as an insult to those who differed from the governor as to the value of Washington’s life and the extent of his usefulness.—Life of John Jay, by his son William Jay (1833), I: 353-366. See also Daily Advertiser, N 11, 1795.

The common council orders the treasurer to negotiate with the Bank of New York for a further loan (see N 23) of £4,000, to be applied "towards discharging the Debts incurred by the said Committee during the late epidemic Fever in this City," and orders that a bond to the bank for that amount be prepared.—M. C. C. (1784-1811), II: 201. The common council appoints a committee "to treat with Mr. Brockholst Livingston as to the purchasing of him the rest of Bellevue Hospital & Land" (see S 10, 1794)—M. C. C. (1784-1811), II: 202.

Repairs to the "Mud Drudge" cost the city £200.—M. C. C. (1784-1811), II: 202. On Dec. 10, a payment of £75 was made for "Wages &c. in working the Mud Drudge."—Ibid., II: 204. A Saturday afternoon in the latter months that "White and all of the Mud Drudge Act £357.18 s. 6 d." On Feb. 15, £717.17 s. was paid for repairs.—Ibid., II: 218. On Sept. 3, 1798, an account of £430.17 s. was paid for "For Works the Mud Drudge in clean up the public Ships."—Ibid., II: 467.

Dec. The common council orders that Abram Van Gelder, chairman of the lamp committee, "continue in the use of the Room in the Building which contains the latter lamp-records."—M. C. C. (1784-1811), II: 203. He died in April, 1796, and his son Abr. Jr., succeeded him in this office.—Ibid., II: 234. Specifications are prepared under direction of the street committee for the regulation of "Broadway from Barkeley Street to the Archd Bridge," and of various other streets. These were not entered in the minutes until June 26, 1797. They state that the "arched bridge will remain at it’s present height being 10 feet 7 inches above the surface of the Meadow."—M. C. C. (1784-1811), II: 760.

Five British vessels of war "ride, opposite our Fort." They are the "Theesis," of 38 guns; "Cleopatra," of 26; "Hussar," of 28; "Spencer," of 25; and "Esperance," of 18 guns. "The city is now well guarded from the Algerines."—Argus, D 10, 1795. See also descript. of Pl. 56, I: 421. Regarding the relations of the U. S. and other nations with Algiers see Dict. of U. S. Hist, by Jameson, title, "Algerine War." See also Mr 27, 1794. The common council orders "that the Clerk make the usual Publication in the News Papers against the firing of Guns &c on the approach of the New-Year."—M. C. C. (1784-1811), II: 205. During the year 1795, the vessels entering this port from foreign ports numbered 941.—See Am. Gazeteer (1797), article "New-York City."
The city directory for 1796 contains a view of the "New City Tavern," at the present 115 Broadway.

The New York directory of this year contains the name of P. C. Verger. The only known state of Verger is "The Triumph of Liberty," a fine folio plate in the French manner, signed "Engraved by P. C. Verger, Nov. 1796." Stauffer is doubtless in contending that Verger was not a copperplate engraver, that this plate was engraved in France for the American market, and that it was brought over here by Verger and published by him in New York.—Stauffer, *Am. Engravers on Copper and Steel*, 1811. The author of the collection partly based on this rare, ambitious, and beautiful print.

In an address to the senate and assembly, Gov. Jay says: "It continues to be worthy of consideration how far the severe penalties prescribed by our laws in particular cases admit of mitigation; and whether certain establishments for confining, employing, and reforming convicts will not immediately become indispensable."

"Senate Jour. (1796), 6. On Jan. 7, a committee was appointed by the senate "to consider and report upon that part of his Excellency's Speech relating to establishments for confining, employing and reforming Criminals."—Ibid. (1796), 7. See Ja 28.

The common council appoints a committee "to report a Regulation for the Burial Ground commonly called the Potter's field" (see Ap 4 and O 16, 1796)—M. C. (1796-1811), II. 204. On Jan. 13, the committee appointed to apprise John With the able Person as Grave Digger at and to have the Charge of the Potter's field, reported that they had agreed with David Marshall.—Ibid. II: 210.

A New York advertisement of this date reads: "History of New-York. A Continuation of Smith's History of the Late province now State of New-York, containing all the interesting events that took place between the years 1732 and 1792—will be published in this city in the course of the year."—*Am. Minerva*, Ja 18, 1796.

It was not published, however, until 1829 (q.v.).

An advertisement informs the public that on Jan. 25 at Belvedere House there "will be performed an Evening's Entertainment, of Vocal and Instrumental Music, under the direction of the Managers of the Old City Concert. The Vocal parts by Miss Broadway. After the Music, a fine Ball, Where the city band will attend Between the Musical performance and the ball, tea and coffee will be given gratis. Tickets of admission, only one dollar each. . . .—*Am. Minerva*, Ja 23, 1796.

The city treasurer presents to the common council an estimate of the expected public expenses (the budget), of the city and county of New York, for the year ending June 18, 1796—M. C. (1784-1815), II: 208-9. Cf. *Ja* 5, 1795; *Ja* 9, 1797.

Gardiner Baker invites the common council to visit his museum, promising "to shew a very pleasing Philosophical Experiment with Electrical Fluid united with Inflammable air, the Effect will be Shewn with a brass Cannon." He adds: "I have the pleasing satisfaction to inform You, that the Museum has lately become entirely my own property. The Tammany Society having given me the whole of their property under certain Conditions [see Ja 25, 1795], and I hope from this Circumstance that the same will under the Patronage of your Board, and an Interested Public, become ornamental, to our City, our Country, and myself."—Miscell. M.S. (Box B), in N. Y. H. S.

The committee appointed to consider Gov. Jay's recommendation regarding criminals (see Ja 6) reports to the senate that in its opinion "bills ought to be brought in for reforming the Criminal Code, of this state, and erecting state prisons for the reception of convicts." This being agreed to, a bill "for erecting State Prisons," and another "for the more effectual prevention of crimes," are introduced.—*Senate Jour. (1796), 23. On Feb. 15, the bills were consolidated into one.—Ibid. (1796), 39. This was passed by the legislature on March 26 (q.v.). Bills having the same titles as those introduced on Jan. 28 had been under discussion in 1795 (q.v., Mr 17 and Ap 1), but failed to pass.

A report from the department of war, regarding the fortifications of the ports and harbours of the United States, shows that "Governor's Island has been fortified with a fort made of earth and two storeys, provided with protection, partly lined with brick, partly with stone, two air-furnaces, a large powder magazine, and a barracks for the garrison; the whole Completed."—*Gen. of the U. S. (Phil).* Ja 28, 1796. This became Fort Jay.—See O 19, 1798.

The common council appoints a committee "on the subject of supplying this City with fresh Water," and orders that it advertise for proposals.—M. C. (1784-1811), II: 212. See Ap 20.

At a meeting of the commissioners of the almshouse and bridge, a report is adopted showing that in 1784 there were 114 boarders in the almshouse who were natives of Ireland; now there are 148, the expense of whose support is over $6,000 a year. They express alarm at the growing expense of the department, "arising, not so much from the increase of our own poor, as from the prodigious influx of indigent foreigners into this city." As the department is caring for 770 paupers, at an annual expense of $31,570, they advise that the city act to reduce the amount of the legislature to support the poor. This report being read in common council on Feb. 5, it was ordered that 200 copies be printed in handbills. One of these is now preserved in metal file No. 15, city clerk's record-room, see reproduction in *M. C.* (1784-1811), II: 212-13.

On Jan. 15, 1798, the commissioners presented to the common council a report of a similar condition, when it was ordered that another handbill be printed and sent with a petition to the legislature, asking for relief.—Ibid., 416.

Trinity vestry resolves to determine "at their next Meeting . . . the propriety of procuring a Clock and Bell for St. Paul's Church, and a Ring of Bells for Trinity Church."—*Trin. Misc. (M.S.).* A similar resolution had been passed on April 11, 1799 (q.v.). See also Ap 11, 1796.

A newspaper advertisement reads: "Theater. The Public, are respectfully informed, that the entertainments for the season will commence on Wednesday, Feb. 10, with the favorite Comedy, of the Provok'd Husband, or, The Journey to London. . . . To which will be added The Spoil'd Cudl. . . .

"N. B. The house has been new ornamented, and thoroughly aired."—*Am. Minerva*, F 8, 1796.

A map of the property of Trinity Church Corporation from Broadway to the Hudson River and between Rector and Thames Sts., bears this date. It is filed in the bureau of topography, before president's office, as map No. 111.

The street committee reports to the common council "A Description, from an actual Survey made, of the outer [West] Street, along the West side of this City, which is to be the breadth of seventy feet and beyond which no Grants ought to be made nor Buildings erected." It is entered in full in the minutes: "Beginning at the center of the arch'd Bridge over the Run of Water called the Bounded Killite or Rivule 6 of the same. . . .

The same committee also reports "an alteration in the permanent Line of the outer [South] Street in front of the City on the East River, as was agreed to on the 7th of April 1795." (q.v.). The description of this alteration is also entered in full.—M. C. (1784-1815), II: 214-15.

The committee on the Commons lands reports "That they have had a Survey made of the Commons contemplating that the same may hereafter be improved as part of the City, to which end they have had Streets regularly laid down. They are unanimously of Opinion that the best Mode of improving the same is to sell at public Vendue the one half and to leave the other for the Term of twenty one Years." The reasons for this belief are stated, and sales are estimated. One of these terms is that the part sold shall be subject to an annual Rent of one bushel of Wheat per Acre." This was amended at the next meeting of the board to read "Your Bushels for each Block or Square per Annum." It is the committee's opinion that the contemplated sale and lease should be made as soon as convenient, "that those who may be induced to buy may have it in their Power to improve the same before the next Summer when the Committee believe the alarm occasioned by the late Epidemic will induce many to buy and improve and thereby tend to encrease the value of the public property." The board agrees to the report, and requires that the committee take order for carrying it into effect, and that the Sale commence at the City Hall on the 15th March next" (see, however, changes of date on Mar. 7, etc.)—M. C. (1784-1811), II: 218-24, 247, 249-50; and A. Pl. 9, Vol. III.

The board also orders that the same committee "direct that the middle Road be laid out of the breadth of one hundred feet."—
THE ICONOGRAPHY OF MANHATTAN ISLAND

The common council appoints a committee "to confer with the Proprietors of the Ground through which the contemplated Canal is to pass from the fresh Water Pond into Hudson River, and to report the Result."—M. C. G. (1784-1831), II: 217; describes.

Frontispiece II, Vol. III, p. 540, and of P. 85-9, III, 560. This was Jay's suggestion of March 12, 1792 (q. t.). See, further, Mr. 14.

"The commissioners of the sluicehouse lottery report that at least 6,000 remain in their hands unsold (see also Jl 27), and that John Rogers and his associates have made an offer to purchase all of them at $10 each, on certain terms, provided the drawing of the lottery be postponed to the first Monday in April. The board agrees, provided the tickets continue to be sold to the inhabitants at $10 each to March first.—M. C. G. (1784-1831), II: 217.

Joseph Delacroix buys from the ministers, et al., of the Dutch Reformed Church, for $5,550, a plot of ground on the east side of Broadway (No. 112), between Pine and Cedar Sts. (now covered by the Equitable building).—Libre Delds, LXXXIV: 63. Here he established a garden restaurant, and engaged in the business of a caterer for 10 years. For a history of the ground and Delacroix's enterprise, see N. Y. Times, N 29, 1912; L. M. R. K., III: 581. He sold the plot on April 28, 1856, for $100,000.—Libre Delds, CCCL: 604. See, further, F. 22, 1797.

The following advertisement appears in a paper under the heading "Tea Water Works!": "The Corporation of the city of New York, having determined that it would be expedient to supply the city with good water, by means of water works and having appointed a committee of their body [see Fl 1], to report the proper plan for carrying their intentions into immediate effect. The committee do hereby give public notice that they are ready and will be happy to communicate with any person or persons on the subject and to confer with them on the best plan for promoting so desirable an improvement as the one contemplated."—Am. Merc., Feb. 1796.

"A Project or Proposal of Mons' Mainshin [Mangio] & Brother Enginiers for making a Dock or Bason in the low Grounds at the fresh Water Pond as a safe Harbor for Shipping & to drain off the Water from that Quarter into the Rivers" being read, the common council orders that it "be taken into consideration with the subject of the contemplated Canal from the fresh Water Pond into Hudson River" (see Mr. 13, 1795).—M. C. G. (1784-1831), II: 218. The text of the original document, lithoeth unpublished, is given herewith in full:

"Sketch of a project to construct Docks in the interior of the town, in new york

"When a nation is enlightened, sickness grows a-pace, and wise men are appointed to provide for the public happiness, then great projects are to be Executed.

"under the influence of heaven born Liberty, artists unfolding their ideas, enjoy themselves in presenting them to the knowing men, who do not fail to forward and protect such projects, as calculated to increase the happiness of Society.

"the city of new york appears to be designed as the future center and metropolis of commercial world; as lying at the mouth of two large and Beautiful rivers, on which are imported from the remotest interior parts the productions of fertile and daily improved countries, and commanding an extensive Bay the safest and most strongly defended in the union.

"the author of nature in Bestowing so many advantages on the same spot, should perhaps have left his work imperfect, if it were without a place fit to receive the shipping and shelter them against wind and ice.

"Eager to cooperate in as much as it stands in our power, to the splendour of so an interesting city, we have Conceived a project corresponding to many useful ends, and therefore deserving the most serious attention of the ruling men. The aim of it, is to multiply the commercial means, to facilitate the manufacturing intercourse, to make the air purer and more salubrious, and not only clean an infectious spot that Begets yearly distempers, But convert it to public uses so that it should increase the riches, and salubritie of the town.

"that project is to dig, in the place in the rear of the rope-yard where lies now a stagnant and mephitical pond, a Basin large enough to contain the whole of the Merchants, to give to it such form as make it useful to many purposes, and to open canals Between the north and east river, so that the ebb and flow should make that place very healthy,—that Basin would Contribute to the enlargement of the town By Carrying the trade in the center, and the ships would Be sheltered against the too frequent damages and losses which happen on both Rivers[.]

"that project would be of an immense Benefit to the town By vastly enhancing the price of surrounding land, making every point fit for commercial Businesss, and affording the most convenient place to suit stores upon.

"By a strict examen, and some operations on the ground we are thoroughly convinced of the possibility of that great project.

"We will now draw But the sketch of the work, the particulars of which shall Be given when the project will have been agreed to, and settled.

"it should Be dug a large dock in the Back part of the teas-water pump, and smaller one on the side of north River, the former for the ships to lie in sheltered, the latter to construct, Repair, and careen them.

"these docks should be disposed in such way, as By means of gates, to Be shut and open at will, to Receive much or less water, and what would Be Vastly commodious, the small dock wanting chiefly But Little water would have it, when the large one would have its water levelled with the highest tide.

"as it is essential to such projects to be as profitable as possible, the waters of Both Basins should not only Be daily Refired and in their flooding carry away the slacks of that part of the town. But the upward and retrograde motion of the tide, could set a going civil, or military manufactures established on mechanical ways, and consequently encrease By so much the opulence of the town.

"although it should Be necessary that the town in that part should be intersected with canals, the facility of communications would By no means Be obstructed, on the contrary the construc-

22

tion of them in the same time when they would be a fine prospect, should afford proper sewers the town generally wants of.

"the earth extracted By digging, could Be applied to raise the ground of some streets, to level some other; and to many useful purposes. But to Be shore now we think that the proposed establishment is not only good in itself, But absolutely necessary, in order to Make the town salubrious, which is not liable to contagious distempers But Because it is not sufficiently ordained.

"such advantages as we have shortly Related are deserving of the most serious attention; and the expenses the project will occasion, can not comparatorize its immense utility for in that hypothesis, new york could Boast to unite all conveniences for an immense trade, private manufactories to carry it on, other public and military necessity to afford whatever necessary less dry, war, and fortification; a pure and salubrious air; elegant Buildings and constructions, and shortly everything Requisted to contend, any outvie any chief city in the world.

"it would Be no doubt a tripping objection to say that By putting this project in to execution, the tea water pump should Be destroyed, such an inconveniency could not withstand the more momentous advantages Resulting from the docks; and Besides that loss can be made up By a torrent of fresh water that can Be directed in the town, upon what we shall enter in some explanation if thought necessary.

"If By that sketch our project is considered as useful one, we shall explain the particulars of it, and geometrically demonstrate that it can be effected. if on the contrary the circumstances prevent to put it in actual execution, we shall Remain comforted. By thinking that in our endeavours to Be useful to the public good, we have conceived it and found the Reasons of its possibility.

"New york february 15, 1796

"Mangio Brothers

"engineer"

A few years later, John McComb, Jr., in collaboration with one of the Mangio brothers, won the competition for the design of the present city hall.—See A. P. 24, 1800.

The "Gates of the Enclosed Ground in front of the Alms Hs" are out of order, and "the Ground Trees" are injured by
Cows & other Creatures getting in." The common council takes steps to correct this, advancing £100 "towards Repairs to the Gates & filling in the Enclosed Ground in front of the Alms H."—M. C. C. (1784-1831), III: 219-21.

The last fetal issue of the Gazette Francaise et Americaine appears. With the succeeding issue the size was reduced to quarto, the title changed to Gazette Francaise, and the paper printed wholly in French.—Brigham, A. A. S. Proc. (1917), 450-51. See My 5, 1797.

"Some French Performers, lately arrived in this city, respectfully inform the public, they mean to give Two Performances, the first to take place on Thursday Evening, March 3d—The Entre- tainments will consist of—One small French Peice, two Ballet Pantomimes, and several Dances. Messrs. Hallam and Hodgkinson, respectfully inform the public in general, that having received application for the use of the Theatre for two nights, on behalf of some French Comedians, and being assured they possess gentlemen who can make people laugh, they mean to perform, on non-regular play nights. —Am. Minerva, Mr 2, 1796.

"The committee appointed to report upon the repairs needed by the Fly Market informs the common council that "the upper & middle Market require new Floors and the latter a new Roof... and also that the upper part of the Market is in great need of new paving." As these repairs would afford only temporary relief, the committee suggests "that the upper Market should be raised & widened and the present Roof which is in good Condition be supported by Brick Pillars & cilleled with Lath & Plaister & that the Pavement should be raised along the Market so as to give descent for the Water towards the Houses instead of the Market and that these Alterations should be made as soon as the Season will admit." The middle market "should have a very temporary Repair till next Season when it should be rebuilt in a corresponding manner." The committee is directed to carry out the repairs suggested.—M. C. C. (1784-1831), II: 222-23. See My 16 and 18, Jl 25, Ag 22.

The street committee reports that they "have viewed the Place where John B. Coles purposes to erect the Bridge or Dam" (see N 4, 1795), and favour the grant to him on reasonable terms.—M. C. C. (1784-1831), II: 225. For the board's terms, see Jl 13.

The common council orders "that the Sale of the Common Lands (see F 10) be postponed 'til Tuesday the 19th day of April next."—M. C. C. (1784-1831), II: 223. On April 11, it was further postponed to May 10, a longer time than was expected being required to stake out the lots "agreement to the numbers on the Map of the Common Lands" (see A. Pl. 9, Vol. III).—Ibid., II: 225. On Nov. 22, the land committee reported the sale, in June, of 58 lots for £17,600.—Ibid., II: 304-5.

"As to the state of society, you will find more English men and English manners in this place than in any other on the continent, yet divested of that reserve and haut ton so prevalent in the old country. There is a society of merchants that meet every Saturday at the Belvidere—a house most pleasantly situated on a hill a little way out of the city, and commanding a fine view of the adjacent country."

—Jour. of a Tour in Unsettled Parts of No. Am. in 1796 and 1797 (London, 1861), 120-23.

Thomas Marshall writes from Paterson, N. J. to Mayor Varick: "An Advertisement in the New York papers announcing the intention of the Corporation to adopt some more eligible Plan of Supplying the City with Sea Water [see F 20], has induced me to take the Liberty of addressing you in the present Instance. If I understand the Advertisement right, the Committee are only delegated with the powers of Enquiry or Investigation, and of..."
Course cannot come to any Conclusion that may be decisive either as to the person to be charged with the Superintendent of the prison, or the precise System to be adopted to Accomplish the Object Contemplated. However Sir from the Views I have been able to take of the Matter, I am induced to conclude that the Aid of a Steam Engine will be deemed Essentially Necessary, under this Impression (I beg leave to assure you Sir with the Utmost diffidence of my own Merits) I ground a great part of my pretensions to the magnitude and extensive Undertakings, and in some of them Steam Engines have been used, the Construction and Management of which I flatter myself equally to— I have been about five years in America & Plan'd, Constructed and Directed the Cotton Mill and its Complicated Machinery & Water Works for the Manufacture at Paterson—for fourteen Years past I have been in the Constant habit of Superintending Blacksmiths, Turners, Millwrights, Labourers &c &c and am tolerably well Acquainted with what is done by the respective Tradesmen and Labourers in this Country for a Days Work—the Method of Making Models for both Iron and brass Castings I am perfectly familiar with, and my Conduct and Capacity for what I undertook for the Society can be easily known from Mr Hamilton, Mr Low, Mr. Barbour and any other of our Directiors in New York. My time will expire with this Company next Month, when I flatter myself I shall be able to procure from the Board of Directors when duly Convened, an honorable testimonial of my Services, thus Sir I have taken the Liberty of troubling you, and respectfully Soliciting your Vote in my favour, if upon further Investigation I may be deemed proper for the Office."—229.

To the original letter in Tomlinson Coll, deposited by Mercantile Library Ass'n in N.Y. P. L. No action appears to have been taken on Marshall's proposal.

John Minshull presents to the common council "his Remarks in writing on the subjects of cleansing this City and supplying it with fresh Water."—Ref.—M. G. C. (1784-1811), II: 223.

The mayor issues warrants for the revenue fund be charged to the state of New York, to be applied towards disbursing the expenses of the health committee, and f24812 8 (out of the fund received from Philadelphia), "towards the Relief of Persons who become necessitous by the Epidemic Fever last Summer."—M. G. C. (1784-1811), II: 226.

A large lock and key for the jail cost £10.—M. G. C. (1784-1811), II: 226. The collection of the N. Y. Hist. Soc. contains the key of one of the jail locks.

Announcement is published that a fox hunt will be held on "this Island" on Saturday, March 26. "The dogs will be cast off at Kissing bridge at day break." On the 24th, the hunt will take place at Jamaica, L.I., where the dogs will be "cast off at Rhodes Swamp at sunrise."—Ib. Minera, Mr 24, 1796.

The legislature passes "An Act more effectually to secure the Port of New York." A harbour-master is to be appointed, whose duties are defined in the act.—Laws of N. Y. (1796), chap. 41 (Webster; III: 182).

The British sloops of war "Jean Bart" (28 guns) and "Spencer" arrive at New York. On April 7, the frigate "Hussar" came in.—N. Y. Jour., Apr 8, 1796; Argus, Apr 5, 1796.

The common council appoints a committee to examine the lots "lately filled in on the East River between the Exchange & Coopers' Landing to determine whether they will bear foundations for Buildings of Stone or Brick."—M. G. C. (1784-1811), II: 229.

The common council orders that the mayor issue his warrant on the treasurer to pay the commissioners of the almshouse and bridewell £1,000 on account for the almshouse.—M. G. C. (1784-1811), II: 229. See also J6, 1794. A summary of subsequent payments is as follows: In 1796: £7, £3,000; J1 11, £1,200; J1 25, £5,000; Apr 10, £7,500; Apr 22, £2,000; May 29, £5,000; S 5, £1,000; S 12, £1,000; S 19, £1,000; O 3, £2,500; O 24, £4,000; N 9, £3,000; D 5, £2,000.—Ib. 229, 253, 286, 260, 274, 276, 278, 279, 286, 297, 300, 308. In 1797: J1 15, £1,000; Mr 13, £1,000; My 29, £1,000; J1 12, £6,000; D 27, £9415.—Ibid., III: 319, 339, 353, 366, 414. In 1799: My 13, £59115.—Ibid., III: 545.

An act of the legislature is passed "for the more effectual Prevention of Evidences of Fire to regulate Buildings in the City of New York." It repeals certain former acts for the same purpose; and provides that all buildings more than 25 feet high (two stories) shall be built of stone or brick, with a party or fire wall rising 12 inches above the roof, and "shall be covered, except the flat roof thereof, with tile or slate, or other safe material against fire, and not with boards or shingles, and that the flat of any roof may be covered with boards or shingles. Provided such flat do not exceed two equal fifth parts of the space of such roof, and there be erected around the same flat a substantial balcony or ballustrade." The law does not apply to roofs, spires, and cupolas of churches and other public buildings; nor to buildings erected since March 31 and before Sept. 1, 1796, not exceeding 25 feet in height; nor to buildings situated north of a line drawn from the outlet of Liensperg's Mill, eastward along the north side of North River, to R. Livingston's and Abraham Carman's houses.—Laws of N. Y. (1796), chap. 55. The original petition to the legislature for the passage of a law against the erection of wooden buildings within certain limits is preserved in the Emmet Coll. (item No. 11637–89), in N. Y. P. L. These laws are among the earliest forerunners of modern fire Ordinances.

The treasurer of the state is ordered to pay to the society of the hospital "the sum of one thousand pounds annually for the term of four years in addition to the sum directed to be paid to the said society for the term of five years [see March 31, 1795] the first annual payment of the said sum of one thousand pounds to be immediately advancd by the treasurer of the state and directed to discharge their debts and make necessary repairs to the said hospital."—Laws of N. Y. (1796), chap. 57. The provision was renewed for an additional five years on March 7, 1800.—Ibid. (1800), chap. 21.

The five-year grant of £750 per annum to Columbia College for the payment of salaries (see Ap 11, 1792) is extended by the legislature for two more years.—Laws of N. Y. (1796), chap. 57.

Trinity vestry again resolves "that a Clock and Bell be procured for St Pauls Chapel and a Ring of Bells for Trinity Church," and a committee is appointed to procure them.—Trim. Min. (MS.). The clock and the bells did not arrive until Jan. 31, 1799 (q.v.).

Owners of lots "on front Street between the Crane Wharf & Pecks Slip" petition "that the said Street may be opened to Pecks Slip." Referred to street committee.—M. G. C. (1784-1812), II: 239. The committee passes "An Act to admit into the Lots lately filled in there, to determine whether they will bear foundations for Buildings of Brick or Stone."—Ibid., II: 250.

For the purpose of widening Beaver Lane, the city buys lots of John Delafield, and one of Henry King which is at the corner of Broadway.—M. G. C. (1784-1811), III: 230, 235, 235, 245, 269, 273.

The committee on the North River ferries reports that it has "sold" them at public auction. The Paulus Hook ferry went to John Holden for 3 years at an annual rental of £500; and the "Hobook" ferry to Joseph Smith for 3 years at £120. "The Purchasers were put under bonds. The conditions require that each ferry 'be provided with two large Boats for the convenience of Horses and Carriages' and two Row Boats for the convenience of Passengers. The service is 'from Sunrise till 9 OClock at Night from the 1st May to the 12th October, and are not to be excluded from double Ferriage after Sunset.' The lessees are to keep the stairs at the landing-places in repair.—M. G. C. (1784-1811), III: 213.

At a meeting of the commissioners appointed to build a state prison, it is ordered that Isaac Stountenburg inquire of the common council to determine whether they will bear foundations for Buildings of Stone or Brick."—M. G. C. (1784-1811), II: 229.
The common council appoints a committee "to locate a proper Piece of Ground for a place of Intermittent & to treat with the Proprietor as to the Price."—M. C. G. (1784-1831), II: 240. See, further, Ap 10, 1797.

The common council pays $200 "towards the rebuilding of the Fly Market."—M. C. G. (1784-1831), II: 242. The specifications for the new improvements were projected on March 7 (q.v.). See My 30.

The common council having ordered on May 16 that the clerk prepare an ordinance "to prohibit the sale of Horses at Auction in the vicinity of the Tontine Coffee House," such an ordinance is presented and passed, entitled "A Law to prohibit the selling of Horses in certain Parts of Wall Street & Water St."—M. C. G. (1784-1831), II: 239, 240. See, further, Ap 10, 1797.

The common council appoints a committee to "contract for the sinking of a new Block at the Corporation Wharf North River," and appropriates $300 towards it.—M. C. G. (1784-1831), II: 240, 242. On May 30, repairs were decided upon instead of a new block.—Ibid., II: 244. As to the probable character of the "block," see My 1, 1793.

The French frigate "Insurgent" (6 guns) arrives at New York from "Cap Francais." "The Insurgent is one of the Brest fleet."—N. T. Jur., My 31, 1796. She left on June 26.—Ibid., Je 28, 1796.

Several inhabitants having petitioned "against placing any part of the Fly Market in Front Street," the common council ordered that the Committee for rebuilding the Fly Market take order for disposing of the Materials of the old Building.—M. C. G. (1784-1831), II: 243. The original petition is in metal file No. 18, city clerk's record-room. See, further, Jl 25.

The committee appointed on May 16 (q.v.) reports a "Plan of the new Alms-House," and the board orders that the committee "take order for the building thereof, as to the Labor & Workmanship by Contract And that they take the necessary Means for purchasing Materials and to appoint a proper Person for that Purpose and to superintend the erection of the House The Stories to be of the following Height viz* Cellar 9 feet—1st Story 10 feet. 2nd 10 feet & 3rd 9 feet."—M. C. G. (1784-1831), II: 243-44. See, further, Je 29, 27, and Ag 22.

Wm. Alexander Duer, in his reminiscences (pp. 46-49), describes in detail Fitch's experiments on the Collect with his steamboat, in the summer of this year. This description opens as follows:—"Passing on one occasion with a companion across the fields near the 'Kellk,' we were startled by a sound which, for the moment, I mistook for the blowing of a shawl of porpoises which had found their way from the river. But on proceeding to the bank overlooking the pond in the rear of Broadway, we descried a boat, which I supposed at first to be on fire, but soon perceived that not to be the case, as her movements were regular, and produced by paddle-wheels at her sides, which, in my wisdom, I supposed to be driven by the smoke issuing in a thick volume from her pipe, after the manner of the Jack for roasting, in my father's kitchen." A more complete extract from the reminiscences will be found in Vol. I, in the description of Pl. 54-b, where a map of the Collect and its surroundings and a drawing of Fitch's boat are reproduced and described.

A new theatre is opened at "Free-masons Hall, at the house of Mr. Martling, No. 87, Nassau street, corner of George [Spence] street opposite the Brick Meeting."—Am. Minerva, Je 3, 1796. For Martling's Tavern, see Mr. R. K., III, 7.

John Jay writes to Mayor Varick:—"Considering the works erected on Governor's Island, and the obvious objections to having a lazaretto near a garrison, I am solicitous to procure some other place for that purpose. . . . As Bedloe's Island, which belongs to the Corporation, has hereforebeen used and considered as a proper place for the purpose I think it would be agreeable both to the State and to the citizens of New York that it should be purchased by the State, and the intended lazaretto built there in preference to Governor's Island, in case the French intend soon to remove from it as I have understood they propose to do; for I have no desire to interfere with any arrangements between the Corporations and them relative to it. . . ."—Corresp. and Pub. Papers of John Jay, IV: 217. (The conveyance of April 21, 1794, by which the state appears to have been overlooked.) See, further, Je 12.

Gov. Jay's letter of June 7 (q.v.), "proposing to purchase"—
Bedloe's Island from the city, "as a place whereon to erect a
June 13 Lazaretto for the reception of Persons infected with contagious
Fever," is read in common council, and the board decides "that a
Grant be made of the said Island to the People of the State of
New York (for the consideration of five Shillings) for the purpose
of erecting such Lazaretto & for such other purposes as the Legis-
lature shall from time to time direct."—M. C. G. (1784-1831), II: 248.
See, further, Ag 10, N 1, and D—

The common council decides that John B. Coles shall pay £5
annually for the privilege of erecting his Dam & Bridge [see N 24,
1795] on the Corporation Right of soil between High & Low Waters
Mark in Harlem River and also for the Injury which may arise
by overflowing the said Soil between High & Low Water Mark
provided always . . . that Mr. Coles and his Assigns do make
and keep in Repair at their own proper Cost & charge the Road
leading across the said Soil between High & Low Waters
said Dam or Bridge."—M. C. G. (1784-1831), II: 248. See S 25.

"The Corner Lot on Pearl Street and State Street belonging
to this Corporation & occupied by Gardiner Baker as a Menage
for keeping Wild Animals [see Mr 31, Ap 1, and S 29, 1794] being
complained of as a Nuisance," the common council orders "that he
remove those Animals and deliver up the said Lot in clean & good
Order to be, on or before Jue 15th. Jue 21st. for the purpose
mentioned,"—M. C. G. (1784-1831), II: 248. On June 20, the order was suspended.—Ibid., II: 250.

The common council hears a petition for filling up the Exchange
Slip. It is referred to a committee and reported "what proportion
of the Expend the Neighborhood will bear."—M. C. G.
(1784-1831), II: 248. The original petition (in metal file No. 10,
city clerk's record-room), endorsed "read June 17th 1796," hears
date of April 22, and shows that the Proprietors and inhabitants
residing near the Exchange Slip complained that, as this slip
remains open, and "it is generally filled with boats Loaded with hay,
which from being surrounded by a number of large stores to
which any fire that might happen on board a hay boat must un-
avoidably communicate," creates a serious hazard. They also
state that, in summer, fish gather in the slip and cannot be
captured. This is offensive and dangerous to health. They ask
that the slip be filled in to the Extent of the permanent Line." See Je 20.

A Request of the Commissioners appointed for the erection of
the State Prison for a Grant of the Soil between High & Low
Waters Mark on Hudson River opposite to two acres of Land by
them purchased of Abijah Hammond to erect the said State
Prison on, was read & granted for the consideration of five Shil-
lings."—M. C. G. (1784-1831), II: 250. The land on which the state
prison was built is shown on two surveys, dated June 21 and
23, 1796, in Bancker Coll. (box G-M, folder "Greenwich Village"),
in N. Y. P. L.

The board orders "that the Committee on the new Alms
House be authorized to employ a Person to superintend the Work-
men's diet and pay the Wages for the Carpenters and the other
Craftsman in the Building,"—M. C. G. (1784-1831), II: 250. Two were appointed at the
next meeting.—Ibid., II: 251. See, further, Je 27.

The common council receives two petitions opposing that of
June 15 (q. v.) which sought the closing of the Exchange Slip.
These are dated June 15, one being the petition of Peter Godet.
These ask that the slip be cleaned instead of being filled up. Godet
states that he has made "a wharf along the Exchange slip from the
Arch to the permanent line (being about 316 feet)," and has leased
the land to several persons who derive their support from "the
trade carried on with the Market and other boats that come in the
slip." The other petitioners state that this slip "has always been
as healthy as any other part of the City," and that they
"have formerly at great expense erected a market," etc.—From
the originals in metal file No. 16, city clerk's record-room. See O 24.

The common council grants permission to fill up "the Old Slip
to the south side of Front Street," on condition "that the neighbor-
hood fill it up at their private Expend—the Bulkhead or Wharf to be at the public Expend."—M. C. G. (1784-1831), II: 250.

Archibald Robertson makes a sketch of "New York from Hobock Ferry House New Jersey." This sketch, which was owned by
the late Dr. Thomas Addis Emmet, was engraved (with slight
modifications) and published by Francis Jukes in 1800. This print
is reproduced and described in Vol. I, Pl. 73. Through a slip, the
authorship is there erroneously attributed to Alexander, instead
of Archibald, Robertson. The following note is found on the June
original: "New York from Hobuck June 24 June 36—New York from
Hobuck N. J.—shores—drawn by Archibald Robertson my father.—A. J. Robertson 19 W. 25th St."

The common council agrees to the report of a committee to
27 which had been referred a memorial of Henry Kip and others, who
offered proposals "to settle and adjust the boundary Lines between
the Corporation and the Claimants of the Land called the Negroes
Burying Ground." This was the land first owned under a will
by Cornelis Van Borsum, Oct. 14, 1673 (q. v.), and which was
used for a potter's field for negroes.—L. M. R. K., III: 927.

One of the principal features of this report is "That a Street
sixty five feet wide to remain a public Street forever be laid out &
opened opposite to Chambers Street and to extend from the Broad
Way to the East side of George Street as the same is delineated on
the Map herewith delivered and from that to the West side of
Augustus Street to the Place there marked x on the said Map."—
M. C. G. (1784-1831), II: 252-53, 264, 272-78. The original
report is in metal file No. 19, city clerk's record-room. The street
referred to was an extension of Chambers St. eastward from
Broadway, and marked the northern boundary of the Park.—
Man. Com. Coun. (1865), 568. The old "Negroes' Burying Ground"
was mentioned above. The street, named for the new one at
Christie St.—See JI 6, 1795. See, further, Mr 17, 1800.

The common council orders payment of £10 "for the Work-
man on laying the first Corner Stone" of the almshouse.—M. C. G.
(1784-1831), II: 253. The building was completed on or about
May 1, 1797 (q. v.).

A printed circular of this date is issued from the superintend-
ter's office of the City of New York, containing the act of the legislature
of May 28, fixing taxes on various kinds of carriages and abolishing
the carriage taxes of 1794.—See one of these circulars in N. Y.
P. L.

Isaac Weld, Jr., describing New York among other places men-

The streets are narrow and inconvenient, and, as but too commonly is the case
in many American towns, are dangerous and often uncleanly. . . .

The streets near the North River are much more airy; but the most agreeable part of the town
is in the neighborhood of the battery, on the southern point of the island; . . . and affords a most charming walk; and, on a summer's evening, is crowded with people.

From the battery a handsome street, about seventy feet wide, called Broadway, runs down the middle of the town; between it and the North River run several streets at right angles, as you pass which you catch a view of the water, and boats plying up and down; the distant shore of the river also is seen to great advan-
tage; . . . a spacious quay had been formed the entire
length of the city, on either side, instead of having the borders of the rivers crowded with confused heaps of wooden houses, piles,
store-houses, and contract cabins. In the open water, the vessels, however, were so crowded together that vessels could not pass, and a most busy commerce, whether in direction, New York would have been one of the most beautiful seaports in the world. All the sea-ports in America appear to great dis-
advantage from the water, when you approach near to them,
from the shores being crowded in this manner with irregular masses of wooden houses, standing as it were in the water. The federal city [Washington], where they have already begun to erect the
same kind of wooden wharfs and store-houses without any regu-
larity, will be just the same. It is astonishing, that in laying out
that city a grand quay was not thought of in the plan; it would
since certainly have afforded equal, if not greater accommodation for the
shipping, and it would have added wonderfully to the embellish-
ment of the city.

Many of the private houses in New York are very good, par-
ticularly those in Broadway. Of the public buildings there are none
which are very striking. The churches and houses for public worship
amount to no less than twenty-two; four of them are for Presby-
terians, three for Episcopalians of the Church of England, three
for Dutch Reformists, two for German Lutherans and Calvinists,
two for Quakers, two for Baptists, two for Methodists, one for French
Protestants, one for Moravians, one for Roman Catholics, and one
for Jews.—Travels through the States of North Am., and the Pro-
vinces of Upper and Lower Canada, during the years 1795, 1796, and

The city's Fourth of July expenses this year are: £4013 for
Catherine Simmons for a public dinner; £214 to Riner Skatts
The common council orders "that the Ground in the 6th Ward formerly used or intended as a Reservoir for the Water Works be appropriated as a Place to deposit the Dirt & Filth taken out of the Streets."—M. G. C. (1784-1831), II: 254.

The common council having been informed "that the French Republic stood in no further need of the use of Bellows Island," the governor having represented to the board (see #7) "that the Commissioners of the Health Office had determined the same to be the most proper Place for the erection of a Lazaretto," and the board having agreed (see #15) to "grant & surrender the said Island to the People of the State of New York for those Purposes," it now orders "that the Consul of the French Republic be respectfully informed that the Season renders it necessary that immediate preparation should be made by the Commissioners of the Health Office for the comfortable Reception & accommodation of such sick Persons as they may find it necessary to send there," and that he be requested to give the necessary orders "for the speedy removal of the Buildings & Materials erected & placed there at the Expendence of the French Republic."—M. G. C. (1784-1831), II: 257.

The mayor mentions to the common council "a Proposal of Mr. Long regarding the Survey & Plats of all the Streets in this City." It is referred to the street committee with instructions to confer with him.—M. G. C. (1784-1831), II: 257. See, further, Ap 11, 1797.

By this time, South St. (see Ap 7, 1795,) in the neighbourhood of "the Whitehall," which had been filled in. The material used, however, contained filth, and this, it is believed, caused the sickness which now depopulated it. In consequence, the common council passes four ordinances for filling up sunken lots there. The first is: "A Law for raising the new Street of 70 feet wide [South St.] lately laid out & made fronting on the East River between Whitehall Slip & Moore Street in the 1st Ward."—M. G. C. (1784-1831), II: 258-59. Another ordinance was passed on Oct. 24.—Ibid., II: 295. See, further, Ji 12, 1797.

The Yellow Fever spreads much alarm throughout the city—I believe it is a fact that there are several cases of it, at present."—Alex. Anderson's Diary, 1796 (MS.), 175. See later entries in his diary under S 9 and 12. See, further, S 23, 1797.

The common council passes an ordinance for raising and making South St. from the west side of Moore St. to the Exchange Slip (Broad St.) and between De Peyster St. and the Fly Market Slip (Maiden Lane).—M. G. C. (1784-1831), II: 260.

On Oct. 23, 1797 (q.v.), an order was issued that the proprietors of water lots between Coenties Slip and Catherine Slip be required to make and finish South St. by Oct. 1, 1798. Ibid., II: 399. A regulation of South St. was reported and approved on June 3, 1799 (q. v.).—Ibid., II: 531. The permanent line of South St. between Whitehall and Broad St. was fixed in 1809.—Ibid., V: 660. See also Memorandum of the condition of Coenties and Burling Slip in 1809.—Ibid., V: 712. Cf. Ap 7, 1795.

The common council approves of the street committee's specifications for regulating Bayard St. "from the Bowery Road to the proposed Canal" (see F 15, Mr 14); also Mulberry and Mott Sts., and parts of Chatham Sq., Catherine, Winnie, and Full Sts. —M. G. C. (1784-1831), II: 262.

With 450 Irish immigrants, the common council grants $300 towards subsisting the said passengers during the time of their Quarantine."—M. G. C. (1784-1831), II: 263, 264-65.

The common council refers to the road committee a petition of John B. Coles "for a Road to be laid out to the Bridge erecting across Harlem River."—M. G. C. (1784-1831), II: 265, 274. For the act enabling him to build this bridge, see Mr 24, 1795. On Sept. 5, the committee submitted a sketch or survey of several roads, and the board adopted one of these, described as follows: the "Road of four Rods wide to commence at the South West Corner of the field, near the School House, belonging to the Dutch Church at Harlem and thence on a direct Line through the said field and thence on the Land of John S. Sickels to the said Bridge."—Ibid., II: 275, 277, 279, 315.

The common council orders payment of $500 more (see Mr 16) "towards the rebuilding of the Fly Market."—M. G. C. (1784-1831), II: 266.

The Lady and Gentleman's Pocket Magazine of Literary and Polite Amusement is begun. In November, it was discontinued.—Ford, Check-List of Am. Mag. Printed in the 18th Cent., II: 1809.

The consequence of the recommendation of the medical faculty of Columbia College, the governors of the New York Hospital appropriate $500 towards the purchase of a medical library. The members of the college faculty "contributed books from their private libraries and part of their fees of public inspection. An Hospital Library was thus established, which was further augmented by the purchase of the medical library of the late Dr. Romayne, in 1800, and by the accession, in 1805, of the library of a private association of physicians, under the name of the Medical Society of New-York, who gave their books on condition, that they and such of their sons as should become practitioners of medicine in the city of New-York should have the free use of the Hospital Library." In 1805, the governors appropriated $450 annually out of the funds of the establishment for the purchase of books.—Account N. Y. Hosp. (1820), 5; Blunt, Stranger's Guide to City of N. Y. (1817), 70. The New York Academy of Medicine has a brass tablet on the wall of the library with this inscription, "The Library of the Society of the New York Hospital Founded 1796 consisting of twenty three thousand volumes was presented to the New York Academy of Medicine by the Board of Governors of the Society in 1831."—The alterations and repairs in the buildings on Bedloe's Island, to render them fit to receive the sick, are completed.—See D, 1796.

Thomas Greenleaf again changes the name of his paper (see My 16, 1795). It now becomes Argus. Greenleaf's New Daily Advertiser.—Early Newspapers, II: 418; Brigham, A. A. S. Proc. (1917), 381. See S 16, 1798.

A charity vestry resolves that the Plan reported by the Committee of Leases [of the vestry] for strengthening and widening Greenwich Street, meets the Approbation of the Board and they do consent that the same be carried into Effect."—Trin. Min. (MS).

The common council approves "A Grant & Survey of Bedloe's Island to the People of the State of New York for the purpose of building thereon a Lazaretto & for such other purposes as the Legislature shall from time to time direct; with a proviso that when ever it shall no longer [be used for those Purpose[s] it shall revert to & re vest in this Corporation." The board orders that the grant be sealed, and signed by the mayor.—M. G. C. (1784-1831), II: 263-69; Libr E of City Grants, p. 23 (in comptroller's office). See Je 15, Ji 11, 1797.

The common council orders "that the Ald of the respective Wards direct the number of the Ward to be painted on Scavengers' Carts in like manner as those of the Cartmen."—M. G. C. (1784-1831), II: 270.

The commissioners in the southern District, appointed to superintend the erection of a State Prison, at New-York, have purchased a piece of land, of three acres, for this purpose, situated on the North river, at a distance not far from Gray's Gardens. The commissioners, it is said, have consulted and advised with the philanthropic Caleb Lowndes, of Philadelphia, on the eligibility of this spot, for the State Prison, who has highly approved it, as being, in many respects, particularly as to elevation and contiguousness to water, the best of any in the vicinity of the city."—Greenleaf's N. Y. Jour. & Patriotic Reg., Ag 16, 1796.

Among the Philip Schuyler papers in the N. Y. P. L. is a folder containing a manuscript ground-floor plan and an elevation of the New York State prison, together with a number of descriptive notes and estimates, dated Philadelphia, April 19, 1796, and addressed by Caleb Lowndes, the "Instructor of the Penitentiary System of Prison Discipline," to Thomas Eddy, one of the New York commissioners. These were evidently sent by Lowndes in answer to an inquiry for information regarding prison design and administration. The plan and elevation correspond closely to those reproduced in Eddy's Account of the N. Y. State Prison (N. Y., 1801), and were evidently the architect's drawings. See also descrip. of Pl. 71, I: 455-57. See, further, N 28, 1797.

An African lion is on exhibition "at the Ball-Alley, in the Fields, next to the corner of Murray-street, in Broadway."—Greenleaf's N. Y. Jour., Ag 19, 1796.

The common council orders a committee to proceed with the rebuilding of the Fly Market (see Mr 7), from Water to Front St., by contract; and that the old building be sold and removed.
THE ICONOGRAPHY OF MANHATTAN ISLAND

James C. Lawrence having written a letter demanding $100 "for a Plan or Elevation of the new Alms Hs" (see My 30), the common council decides that this sum is extravagant, but agrees that he be paid $50, and orders that the Mayor issue his warrant on the Treasurer for that amount.—M. C. G. (1784-1813), III: 272.

The common council orders payment of $600 more "towards Fly Market."—M. C. G. (1784-1813), II: 274. See My 16, Jl 25. See further, S 12.

Settlement (1784-1831), 245. 1797 1 Washington's 1796, "Its... 22

A letter from the commissioners of the health office is read at the common council meeting, "informing that the Lazarette on Bedlows Isle is now prepared for the Reception of Persons with Infectious Disorders" (see Ag), and that therefore, they "have no longer use for the Hospital at Belle Vue." The board appoints a committee to report on the future Disposition of Belle Vue.—M. C. G. (1784-1813), II: 275. On Sept. 12, the board ordered that the committee "make a Settlement with the Commis-9

9 A year.

23 The common council meets to distribute among the charity schools and religious societies of the city the sum of $444 out of the money granted by the legislature on April 9, 1795 (g,v). and out of that raised by tax in the city for the encouragement of schools. A committee is appointed to report to the board the sums to be granted to each of the charity schools.—M. C. G. (1784-1813), II: 281. The committee reported on Oct. 24.—Ibid., 296. See further, N 7.

26 The board also resolves to apply to the next legislature "for legal provision to establish public Schools in this City."—Ibid., 281, 296.

The common council orders that the committee on the subject of a canal from the Collect to Hudson River "he instructed to confer with the Proprietors of the Swamp for the obtaining such Parts thereof as may be required to make the said Canal of the Breath of 40 feet and a Street on each side of the Breath of 30 feet."—M. C. G. (1784-1813), II: 282.

An engraved postal-route map of the United States bears this date. For description, see Addenda.

John B. Coles grants to Gen. Lewis Morris, of Morrisania, 27 the "Right of passing the Bridge over the Harlem River [see Je 13; 1795] from Harlem to Morrisania, free from any Toll, Imposition or Molestation whatsoever" from him or from his heirs, etc. He adds that the said Right of passing and using the aforesaid Bridge shall extend to his Carriage when he is in it, or when employed in his actual Service, and also to his Horses, Cattle and Teams of every kind. . . ." This grant means that Coles relinquishes all claim for Morris's tolls, amounting to about $50 a year. It is given in consideration of 4 shillings.—From the original MS. in N. Y. Hist. Soc.

William Seaman, M.D. (citing Dr. Bayley's letters), reviewed in Oct. 1798 the causes of yellow fever in New York. "The chief prevalence of the disease [yellow fever] in 1796," he said, "seemed evidently fixed where, from our former experience, we ought reasonably to have expected it. For no doubt, at that time, the neighbourhood of Whitehall, from the nature of materials where-with a large dock was there filling up, aided by the noisome exhalations, from the exposed bottom of the Exchange-slip at low water, must certainly have been rendered the most noxious part of the city." Other neighbourhoods were also affected that year, for example, around the place "where Roosevel-street drain empties itself into an inlet which was then open quite up to the southerly side of the Water." Dr. Seaman observed that nearly half the deaths from this disease in 1796 originated "in a small part of East George-street," and that the greater part of the remaining originated "around and just below the Fly-market." The southerly part of East George Street, much of which was, broken, muddy, and filthy from neglect, is described. The same condition prevails near the Market. "The slip. . . . on each side of this central spot, have been left, during the summer, to be furtively filled up by the free contributions of the neighbour-10

hood. Hence they have become the common receptacles of rubbish and filth of every description."—Medical Repository (1798), I: 315-25. Two copper-plate engravings, in the same work, show the docks and streets north and south of Wall St. See also Dr. Bayley's report to Gov. Jay, Dec. 1796.

"Our great buildings make good progress. The [City] Hotel will soon be partly in use and has the finest room I ever saw, large enough to accommodate four sets of dancers or three hundred covers at Dinner. The Alms House of two hundred and fifty feet front and three stories is now standing. The Play House [Park Theatre] is roofed and the State Prison has three hundred men working on it. The wharves project every where beyond East R. Es rivers as far as Lighthouse, Rutgers Sts."—Letter in Rutherford's Family Records and Events, 1771-72. See also descrips. of Pls. 61, 65 and 71, I: 443, 455.

The common council appoints a committee "to examine & report whether the Senate & Assembly Chambers in the City Hall cannot be so altered as to make more Room for the accom-11

modation of the Members of the Legislature whose numbers are considerably increased."—M. C. G. (1784-1831), II: 286. The committee reported next day that the alterations could be made without much expense, and the board ordered that this he done.—Ibid., 287. See N 9.

7 Mr. Riccette has purchased a lot in the rear of the present circus [see Je 6, 1793; N 25, 1794], to front Greenwich street, on which he has planned to erect a most superb edifice, for the purpose of his exhibitions the next season.—Greenleaf's N. Y. Jur., O 7, 1796. The new circus opened on March 16, 1797 (g,v). The lot was evidently one of those advertised on Feb. 7, 1795 (g,v), for sale on Feb. 26, 1795. In anticipation of the opening, it was mentioned often in the press.—See N. Y. Gaz. & Gen. Ady., F 25, Mr 5, 4, 6, 8, Diary, Mr 7, 11, Minerva, Mr 11, 14, 1795, and other current newspapers.

The common council orders that the city treasurer receive from the state treasurer the money which the city is entitled to under the "Act for the encouragement of Schools" (see Ap 9, 1795).—M. C. G. (1784-1831), II: 294.

A committee of the common council reports favourably on a petition for an additional watch-house in the Seventh Ward, and states that in their opinion "the most eligible Situation for the
The common council passes an ordinance prohibiting every boat and vessel, except the Paulus Hook ferry-boats, from coming into Cortland Slip.—M. C. C. (1784-1831), II: 295-96.

The common council orders that the clerk prepare a report to the legislature "on the subject of the late Alms House Lottery" (see Ap 15).—M. C. C. (1784-1831), II: 296, 298.

Gov. Jay, in a message read before the senate and assembly, says: "Difficulties were experienced in executing the benevolent intentions of the Legislature respecting a Lazaretto in the vicinity of this city. Ground conveniently situated could not be purchased; and the placing it on Governor’s Island, where it could not have been erected at a proper distance from the garrison, was liable to strong objections. These difficulties have been removed by the liberality of the Corporation of the city. They have granted to a private individual the use of a building at Ag to for this and such other public uses as the Legislature may from time to time direct. Certain buildings, erected there by the French Republic, have been purchased, and prepared to serve the purpose of a Lazaretto for the present—But as additions and alterations will be necessary; and as precautions should be taken to prevent that island from being further diminished, by encroachments of the water, the appropriation of some money for those objects, will be requisite. . . ."—Assemb. Jour., 20th sess, 5.

A number of the clergy and laity of the "Presbyterian, reformed Dutch, Associate Reformed, and Baptist Churches" form the New York Missionary Society.—Argus, N. 5, 1796.

An encounter takes place in Cortland St.: "between the honorable John Rutherford, Esq. a Senator of the United States, and Sir John Temple, Vice Counsel of his Britannic Majesty," Rutherford "attacked Sir John with a huge bludgeon on suspicion of his being the author of a publication in which he supposes himself called 'young Gripe-all,' and charged with being a Tory during the war." Sir John "defended himself with a small horse-whip." The public prosecutor was not conveyed.—Pitily, a Place to House to House to House to dirty linen bedding &c. &c. may immediately be sent.

In describing the causes of the fever in different parts of the town the following account is given: "The Dockspoken of in the South Eastern part of the City, which were in so loathsome a state, have been completed, and generally covered with a sufficient quantity of good Earth, Gravel, or Sand: the grounds have been drained, or where that has not been practicable, the surface has been rendered uniform, with clean earth. The Vacancies under the Stores which were built on piles, have been filled up in a proper manner; . . . Wharves have been kept free from rubbish and filth. In short so much care and industry has been bestowed here, to remove the nuisances which so generally abounded, that where a person was before almost without quarter, he can now pass without experiencing the least offensive smell.

Secondly, let us see what has happened at the South West part of the Town. Between the White Hall and exchange slips, a new Dock has been made, running on an average sixty feet in the river—extending 458 feet in front, and nine feet in depth. If nine square feet are calculated to be equal to a Cart load, it will be found that 2,400,000 foot, is a Question to fill up this Dock, which were accumulating from July 1792 to July 1796. And what has been the nature of the materials employed for this purpose? It is difficult to answer the question, except in very general terms, namely, every thing subject to decay and corruption.

In the month of April of this year I had frequent occasions to visit White Hall. The stench which already issued from the Docks was highly offensive, and on enquiry I found that the matter which had been employed to make the new ground, consisting principally of the dirt which had been accumulating in the streets during the

For Windsor Chairs for Senate & Assembly Rooms.—M. C. C. (1784-1831), II: 300. On Dec. 5, £42101 was paid "for alterations in the Senate Chamber" (see O 3).—Ibid., II: 308.

The legislature holds its last session in New York before removing permanently to Albany.—See Ja 20, 1795; N 21, 1796.

Forty thousands in the lower part of the Market are sold at public auction for £470.—M. C. C. (1784-1831), II: 301. Nine stands in the upper market were later sold for £498.—Ibid.: 307; De Voe, Market Book, 200-1.

Trinity vestry appoints a committee to consider the propriety of making St Marks Church [a] Distinct Church from this Corporation and if such disposition can be legal.—"Trin. Min. (M.S.)."

Rutger Rutherford writes to his son John: "Our Assembly has adjourned to meet at Albany and never more sit here. It all depended on Jacob Morris’s vote which the Yorkers were in strong hopes of, this made the Senate equal and the Patroni gave the casting vote. . . .--Rutherford, Family Records and Events, 173, See N 11, 1796; Mr 10, 1797.

The common council passes an ordinance entitled "A Law for prohibiting any Ship or other Vessel or Brake of any sort, etc. which usually bring to this City fire Wood & Articles of Provisions" from coming into or lying in the Coffee House Slip—the Old Slip and Coenties Slip."—M. C. C. (1784-1831), II: 304.

The corporation celebrates the evacuation of the city, as usual, with a public dinner, this time in the city hall. Catharine Simmes again is the caterer, her charge being £55756, which was paid on Nov. 25, M. C. C. (1784-1831), II: 306.

Dr. Richard Bayley reports to Gov. Jay the condition of the hospital established on Bedloe’s Island, and of the docks where "the late malignant fever" is supposed to have originated. He states in part: "The necessary buildings for the sick on the Island are First. A large and well ventilated House to contain the patients during their sickness. Secondly, A small building to receive the sick, on their first arrival, where they are to undergo a proper cleansing: This might be provided with Bathing-tub, the means of warm-bathing, and necessary cloathing of every kind, Thirdly—a separate building for convalescents, which may be the means not only of saving many Eyes, but also, in the event, prove highly economical, by greatly expediting the recovery of the sick—Fourthly. A separate building to which the dead should be immediately conveyed.—Pitily, a Place to House to House to House to dirty linen bedding &c. &c. may immediately be sent.

In describing the causes of the fever in different parts of the town the following account is given: "The Dock spoken of in the South Eastern part of the City, which were in so loathsome a state, have been completed, and generally covered with a sufficient quantity of good Earth, Gravel, or Sand: the grounds have been drained, or where that has not been practicable, the surface has been rendered uniform, with clean earth. The Vacancies under the Stores which were built on piles, have been filled up in a proper manner; . . . Wharves have been kept free from rubbish and filth. In short so much care and industry has been bestowed here, to remove the nuisances which so generally abounded, that where a person was before almost without quarter, he can now pass without experiencing the least offensive smell.

Secondly, let us see what has happened at the South West part of the Town. Between the White Hall and exchange slips, a new Dock has been made, running on an average sixty feet in the river—extending 458 feet in front, and nine feet in depth. If nine square feet are calculated to be equal to a Cart load, it will be found that 2,400,000 foot, is a Question to fill up this Dock, which were accumulating from July 1792 to July 1796. And what has been the nature of the materials employed for this purpose? It is difficult to answer the question, except in very general terms, namely, every thing subject to decay and corruption.

In the month of April of this year I had frequent occasions to visit White Hall. The stench which already issued from the Docks was highly offensive, and on enquiry I found that the matter which had been employed to make the new ground, consisting principally of the dirt which had been accumulating in the streets during the
THE INCOROGRAPHY OF MANHATTAN ISLAND

1796 winter season, and that besides Dogs, Cats, Hogs etc. there had been actually, two Horses buried in the rubbish, which had died in the Spring, in a Small hovel, erected on the margin of this Nuisance.

"I must take notice, also, of some other circumstances relative to many of the Houses about white-hall, . . . namely the state of the ground in the rear of the houses, which, in consequence of the streets being raised, is, in many places, considerably below the ordinary level, and therefore liable to accumulate matters, which in the process of decay, produce vapours which render the air impure, and in confined situations are often the cause of fever—Also, the old and decayed state of many of the houses and the inattention to cleanliness, which is always neglected when people of the poorer kind are much crowded together . . ."

Before I conclude I must take the liberty of mentioning to your Excellency what has hitherto been the condition of the Hospital, lately established upon Bedlow Island; I am induced to do this in order . . . that measures will, in consequence, be taken to provide for that Hospital in such manner, as may be necessary, to complete the establishment, and give it extensive utility.—The necessary alteration and repairs which the Buildings on Bedlow's Island required, to render them fit to receive the sick, were not completed until the beginning of August. As soon as those were done, application was made to the commissioners of Health, for a supply of necessaries to accommodate the sick; which at this period was sent to the Hospital from White Hall, and from several Vessels just arrived from sea. The Commissioners directed the Beds and bedding, which had been used the year before at Bellvue, to be sent to the new Hospital upon Bedlow Island; but unfortunately those articles were in a very filthy state and altogether improper for present use. But as the sick were already at the Hospital, we had no alternative but to select the cleanest of those articles, and use them in that state . . .

"Under these circumstances, the consequences were such as might naturally be expected, for within eight days from the time that those articles were brought to the Hospital, those people who had been employed in transporting the bedding from Bele Vue, the nurses who had attended the sick, and the steward of the Home were attacked with fever. The attending Physician Monsieur Bouvier, was also much indisposed for several days. From this distressing situation, however, the Hospital was soon happily relieved by a supply of Beds—bedding, and such clothes as were necessary for frequent changes, and placing the sick in a state of the greatest cleanliness. From the period that this was done, neither nurse, visitor, nor any kind of attendant, were known to be attacked with fever."—Report of Dr. Richard Bayley to Gov. Jay (MS.), preserved with "The Jay Papers," (box No. 2, Item No. 9), N.Y. H. S. See also Minerva, Mr 16, 1797.

5 There was a certain Person who supplied this City with Water by Means of Pipes (see F 20) are read in common council and referred to a committee.—M. G. C. (1784-1831), II: 307. See also D 28.

The common council contracts with John Morton, proprietor of the Daily Adv., to do the city's printing, at an annual allowance of £35.—M. G. C. (1784-1831), II: 307. Morton's contract did not give him a monopoly, as we find that both on Feb. 1, 1796 (q.v.), and in Feb., 1798, Geo. Forman (ibid., II: 419) was doing special printing for the city. On April 2, 1798, Hopkins & Co., also, were paid for printing.—Ibid., II: 430.

The common council adds £150 to the £800 formerly granted (see S 12) "towards the new Pier in Coenties Slip."—M. G. C. (1784-1831), II: 308.

9 A report having been in circulation that the water of the Tea-Water Pump begins to fail, and also, that the proprietor will not allow any more water to be drawn from it than is absolutely necessary for the use of the citizens for tea and drinking; the subscriber begs leave to contradict the said report, and inform the citizens that notwithstanding the extremely dry season, the source of the Tea-Water has not in the least diminished; and so far from his refusing any demand for Water, he hereby offers the citizens a plentiful supply of water for their own and other family uses. Any order for one or more hogsheads of water, directing the place where to be delivered, sent to the pump, will be immediately attended to. The price of the water is 4s. per hogshead, containing 140 gallons. William C. Thompson.—Minerva, D 6, 1796; De Voe, Market Book, 267.

9 A fire breaks out in one of the stores "on Murray's Wharf, Coffee-house Slip," at the lower end of Wall St. The whole block between the slip and the Fly Market, on the east side of Front St., is consumed.—Minerva, D 9, 1796; Argus, Dg 19 and 1796. About 40 stores, warehouses, and dwellings were burned, with a loss of about $1,000,000. The progress of the fire was arrested by pulling down the Fish Market.—N. Y. Jour., D 13, 1796; Gaz. of the U. S., D 12, 1796; Rutherford, Family Records and Events, 175. See F 27, 1797.

14 A paragraph headed "Serious Case of Alarm!" appears in one of the broadsheets: "Citizens! Scarcely a day passes but we are once more called upon to attend to your safety. It is no longer a doubt—it is a fact, that there is a combination of incendiaries in this city, aiming to wrap the whole of it in flames!—The house of Mr. Lewis Ogden, in Pearl-street, has been twice set on fire—the evidence of malicious intention is indubitable—and he has sent his black man, suspected, to prison. Last night an attempt was made to set fire to Mr. Lindsay's house in N. W. 3d St. The combustibles left for the purpose are preserved as evidence of the fact. Another attempt, we learn, was made last night in Beekman-street. A bed was set on fire under a child, and his cries alarmed his family.

Rous, fellow citizens and magistrates—your lives and property are at stake. Double your night-watch—and confine your servants."—Minerva, Mr 14, 1796.

The common council offers a reward of $500 for the discovery of the incendiaries who have been causing numerous fires in the city. It also recommends that the citizens form themselves into companies for a night-watch.—Minerva, D 16, 1796.

Mr. Little's Porter-House in Pine-street is designated as the meeting-place of the "young gentlemen of this city, who are willing to contribute to the preservation of the Public Safety, at this critical juncture," the object of the meeting being to form an association for the purpose.—N. Y. Jour., & Pa. Reg., D 16, 1796.

A contributor to the press writes critical observations regarding the powers and usages of the government of this city under the Moneymarker Charter, which is still in force.—Am. Minerva, D 17, 19, 21, 25, 1796.

The new watch-house at the head of Chatham Sq. (see O 17) is completed.—M. G. C. (1784-1831), II: 512. The old one at No. 1 Broad St. (see J 3, 1793) remained until 1816.—L. M. R. K., III: 973. The Chatham Sq. watch-house property was sold by the city in 1827.—Goodrich. Pictures of N. Y. 135.

James Davidson is paid £212 13s. 4d. for "Flag Halliards at Battery."—M. G. C. (1784-1831), II: 512. The flagstaff as it appeared at about this time is shown on Pl. 56, Vol. I.

Mayor Varick lays before the common council a letter from the mayor of Savannah, Ga., "on the subject of their Distresses in consequence of the late destruction of that City by fire." The board requests Mayor Varick "to represent the Matter to the Speaker of the House and the Assembly in Georgia that perhaps the Legislature may grant them some Relief in the premises."—M. G. C. (1784-1831), II: 314.

"Proposals of Joseph Brown & his Associates for supplying this City with good Water" are read in common council and referred to the same committee as the proposals of Dec. 5 (q.v.).—M. G. C. (1784-1831), II: 314. See Ja 29, 1797.

Before this year, Cherry Street was extended to Montgomery St.—Pl. 64, Vol. I. See 1725; My 28, 1790; 1799 also L. M. R. K., III: 996; Pl. 174, 175, Vol. III.

Prior to this date, Fourth Street, running from Division St. to the south (House) St., one block east of Third (now Eldridge) St., was laid out, as it appears on the map of 1797 (Pl. 64, Vol. I). It was the present Allen Street.—See Ag 28, 1809; 1817; L. M. R. K., III: 1000; Pl. 175, Vol. III.

In this year, a little ship-of-war of about ninety tons, named the "Betsey" (built in New York in 1792, and originally rigged as a brig, for a Charleston packet), sailed from New York, in command of Capt. Edmund Fanning, and was the first vessel to carry the stars and stripes around the world.—"Voyages Round the World," by Edmund Fanning (1833), 6th ed. The "Betsey" was built so far "up in the town" as to require launching across three streets. The voyage, lasting two years, was a commercial success. On its return the ship was moored at the Fly Market wharf, and received hundreds of visitors daily.—"Patio's Annals" (1840), 240-41; Admiral Preble's Hist. of the Flag.
The quarterly Medical Repository is started in New York by
Dr. Sam'l L. Mitchell, Edw. Miller, and E. H. Smith.—Sabin,
*Dict. of Bioth Relating to Am.*, XI: 556.

In this year, the congregation of the second Associate Reformed
(Scott) Presbyterian Church was organized, and a house of wor-
ship built (in Magazine (Pearl) St., between Broadway and Ene.
St. It was a substantial stone building, 66 by 56 feet.—Greenleaf,
*Hist. of the Churches*, 206.

In this year, C. Milbourne made a water-colour sketch of the
government house, now owned by the N. Y. H. S.; this is repro-
duced as Pl. 66, Vol. I.

In this year, George Holland made a water-colour drawing
looking up Broad St. at federal hall. This important and interesting
drawing, now in the author's collection, is reproduced and de-

Doyers St. dates from this year, when Hendrick Doyer, after
purchasing the property in 1793, had the street cut through. For
the history of the Doyer family and its relation to this prop-

In this year, William Barker, "a capital script engraver," was
in New York working for the New *Encyclopedia* published by
A list of Barker's engravings may be found in ibid., II: 22, and in

An engraver named Valdenius was associated with St. Memin
(see *Memin*, 1797, 9), so that the prints issued by the latter are
said to be "St. Memin & Valdenius, No. 12 Fair St., N. Y."—Stauffer,
*Am. Engravings on Copper and Steel*, I: 280; Fielding, *Am.
Engravings on Copper and Steel*, 40, 290.

At some time between 1797 and 1800, the house at No. 1
State St. was erected. It was demolished in 1913.—See descript.
of Pl. 164-5, III: 486.

For view of the New Theatre, "in Chatham-Row" (the Park
Theatre), see frontisp. of the City Directory, at the N. Y. H.

*The American Universal Magazine*, edited by Richard Lee, and
published by Budd & Bartram, Phila., appears. It ran for 4 vols.,
ending Mar., 1798.—Ford, *Check-List of Am. Magazines Printed
in the 18th Cent.* (1889), 11.

The senate and assembly convene at Albany in accordance
with resolutions adopted at their previous sessions (see *Ja* 20,
1795; N 11 and 21, 1796).—*Assem.journ.* (1797), 3; *Senate Journ.
(1797)*, 3. See Mr 10.

Presumably, Gov. Jay also took up his residence in Albany at
this time (see F 25).

The office of secretary of state, however, was maintained in
New York until 1798, when it was transferred to Albany.—Pub.
Papers, 1798, *Govt. of the state of N. Y.* I: 11.

The legislature passes "An Act concerning the Appointment
and Election of the Charter Officers of the Cities of New-York,
Albany, and Hudson, and concerning the Mayor's Court of the
City of New-York." It provides that the mayor and other charter
officers of N. Y. City shall be appointed annually by "the person
administering the government of this state, by and with the advice
and consent of the council of appointment." The mayor and
recorder of the city of New York, or either of them, is given power
"to hold the court of common pleas, called the mayor's court,
... without the presence of any of the aldermen." But the
aldermen are not thereby prevented "from sitting as judges in the
said court."—*Laws of N. Y.* (1797), chap. 1 (Webster, III: 205).

An account is published regarding the charges of the lottery of
the United States. While not referring to particular ones in
New York City, the general observations do explain their charac-
ter: "... Cities, churches, canals, piers, bridges, academies,
and alm-houses have been raised and supported by this species
of taxation. ... Unfortunately many of those who have under-
taken the management of Lotteries in this country, have been
either incompetent or indifferent to the completion of the object,
or have basely turned their own personal emolument, which has
cast a shade on one of the safest, and in our opinion, one of the
certest modes of promoting a public institution, whilst
thousands and tens of thousands of dollars are going yearly out
of this state to the Lotteries of other states, and even to those of
Europe—... Our Lotteries have been distinguished for their
punctuality, and resorted to with confidence, by our neighbours!
... One set on foot, for the purpose of erecting a suite of public
offices, including a commodious exchange, custom house, post
office etc. etc. which would strikingly contribute to its ornament
in the eyes of foreigners or strangers, and the convenience of the
inhabitants in general of this oppulent and prospering city, there
may be no doubt, but it would meet with particular and merited
encouragement."—*Greenleaf's N. Y. Journ.*, Ja 14, 1797.

Thomas Howard publishes his plans for "Floating Engines,"
that to pump water from the river and convey it in leather hose,
the engines to be made by John Bristow, the inventor, of Ratcliff
Highway, London.—*N. Y. Gaz. & Gen. Adm.*, Ja 16, 1797. The
plan is intended as "the most effectual means of extinguishing
fire." The hydraulics and hydrostatics of this plan, its operation
and objections, were discussed in a correspondence in the *Am.
Gaz.*, referring to an article by Howard in the *N. Y. Gaz. & Gen.
Adm.* of Ja 5; this writer's letter is copied in ibid., Ja 14. Such engines,
according to Howard, had been in use in London.—*Diary*, F 17,
citing the Daily Advertiser.

Gov. Jay, in a message to the assembly, lays before them a
report made to him by the commissioners for erecting state prisons
in New York and Albany, with their plans and a statement of
expenses to Nov. 30 last. He recommends that ground be allotted
for the buildings.—*Diary*, F 7, 1797. *Messages from the Governors*,
II: 387. See F 3.

At this time, the Tontine Coffee House was kept by John Avery.
—*Daily Adv.*, Ja 21, 1797. It was advertised to let.—*Ibid.,* Ja 24,
1797. In May, it was taken by the proprietor who first occupied
it, John Hyde. For the auction terms, see *Ja* 31, 1797. It was
closed later, for, on Oct. 23, 1799, it was advertised to "re-open"

The clerk of the common council is ordered to "publish an
Advertizement for receiving Proposals sealed to supply the City
with good Water by Means of Pipes, until 15th May next."—

The legislature passes a law (see *Ja* 20, 1795) which suspended
the powers of the commissioners for erecting a State Prison, in the
county of Albany. This decrees that "the state prison to be built in the city of New-
York, shall be considered as the state prison for the whole state."—
*Laws of N. Y.* (1797), chap. 12. See Mr 17.

"I took a walk with A. Tiebout to Tisdale's and viewed a sketch
which he has been making of the battle of Lexington."—
*Alex. Anderson's Diary*, for 1797 (MS.), 10.

The following advertisement, headed "Notification For Prop-
sals to supply the City of New-York with Water," is inserted
in the papers by Robert Benson: "The Common Council, impressed
with the great utility and comfort which would arise from a supply
of fresh Water in this city by means of Pipes or Aqueducts, are
very desirous of receiving Plans and Proposals for that purpose
[see Ja 30]; and have directed me to this further notice: That
it is their wish to treat with any persons who are disposed
to contract or undertake the business; and to that end receive
Proposals, sealed, at the City-Clerk's Office in the City-Hall,
until the first day of May next."—*Diary*, F 4, 1797. See Mr 15.

The electoral votes are opened and counted in the presence
of both houses of congress; the result shows that John Adams is the
choice for president, and Thomas Jefferson for vice-president.—
*Gaz. of the U. S.*, F 9, 1797; McMaster, 703; Winsor, 269, 314.

An act is passed by the legislature "to prevent the bringing in
and spreading of Infectious diseases in this State." It provides
for the appointment of three "Commissioners of the Health Office
of the City of New-York," with power to make and execute orders
for cleaning the streets, sewers, cellars, vaults, etc. in this city,
and remove all putrid and offensive substances, at the city's expense.
They may examine coasting-vessels coming to New York, even if
not subject to quarantine. After the first of July next, "no person shall dress sheep or lamb skins, or manufacture glue, nor shall any soap-maker, or tallow-chandler, or starch-maker, or maker or dresser of vellum, carry on any of their processes or operations of their said trades, which produce impure air, or offensive smells, such as tryng or melting of fat or tallow, boiling soap, fermenting grain, or other substances for starch, washing, fermenting, or oiling skins, or vellum, at any place within the city of New-York, south of the south side of Grant [Grand] street, and of the south side of the said street continued until it intersects the easterly side of Mulberry-street, and south of the west line, from the intersection aforesaid, continued to Hudson's river. . . .” It is made lawful for the common council “to treat and agree with” such manufacturers for the removal of the fixtures used in their trades.—Laws of N. Y. (1797), chap. 16.

At the solicitation of certain manufacturers of soap and candles, whose works were so situated and carefully managed as neither to endanger health nor be offensive to their neighbours, the act was amended on March 6, exempting them on certain conditions.—See The Case of the Manufacturers of Soap & Candles (pub. by the association of tallow chandlers and soap makers, N. Y., 1797), in N. Y. S. A notice is published calling for “Contractors” to dig out and fill in Fisher, Charlotte, Cherry, Clinton, and Rutgers Sts.—Argus, F 11, 1797.

“Trinity vestry resolves to put "a new Roof on St Pauls Church."—Trin. Min. (M.S.)

It also resolves "that the Committee of Leases sell at public auction not more than thirty four Lots of Ground lying in Barclay, Duane and Greenwich Streets and Jay Street. . . ."—Trin. Min. (M.S.).

The common council agrees to ask John Halsey "to import from Hamburgh two fire Engines with long Hoses, to convey Water from the River into the interior of the City, of superior Quality and on cheaper Terms than those made in this Country."—M. C. C. (1794-1813), II: 232. See also committee on Bellevue Hospital (see S 5, 1796) recommends that it should "be let for one Year from the first day of May next with Condition that if it should be wanted at any time in the course of the Year as an Hospital the same or such part thereof as may be required to be immediately surrendered up to the Corporation for that purpose." The board directed the clerk to advertise for sealed proposals.—M. C. C. (1794-1813), II: 324. It was so advertised the next day.—Daily Advertiser, F 21, 1797. See, further, Ap 10.

Washington’s sixty-fifth birthday is celebrated. The Battery guns are fired and several “festive boards” are spread. A ball takes place “at the new spacious and elegant Assembly-Room in the Toatine City Tavern, Broadway, on the west side of the street, in the Old Blanchard’s,” according to an advertised notice "from the Museum." The ball was the first held in the new building which later was known as the City Hotel. Delacroix used five rooms at his new restaurant at 112 Broadway (see F 15, 1796) for a dinner which, “for taste, and elegance, we presume, has never been surpassed, if ever equalled in this city.” The news report describes the elaborate decorations.—N. Y. Journal & Patriot, Régis, Mr 1, 1797. See My 2.

“Vendors of Fish” petition the common council “that the Fish Market House, which was pulled down at the time [of the late Fire [see D 9, 1796], may be rebuilt.”—M. C. C. (1794-1813), II: 232. See Mr 27.

Among the letters now comprised in the printed collection of Gov. Jay’s correspondence and public papers, the first from Albany after that city became the state capital (see Ja 20, 1795; Ja 3, 1797) bears this date. This letter, addressed to the Rev. Jedediah Morse, thanking him for a copy of his Geography, and expressing pleasure to learn that he will at least endeavor to prepare a history of the American Revolution, presents in general terms a résumé of the documentary and printed sources that should be consulted in the preparation of such a history. He says, among other things:

“...So much of our colonial history as casts light on the Revolution, viewed under its different aspects, and considered in all its anterior relations, will be essential. I think our colonial history is strongly marked by discriminating circumstances relative to our political situation and feelings, at three different periods: 1st, down to the revolution under King William; 2d, from thence to the year 1765; and 3d, from that year to the union of the colonies in 1774.”

“As to documents—public and private journals of Congress; the papers mentioned or alluded to in them, such as certain reports of committees; letters to and from civil and military officers, ministers, agents, State governors, &c.; the proceedings of the standing committees for commerce, marine, fiscal, political, and foreign affairs,—all merit attention.” Other source material is referred to in the same general way.—Corresp. and Pub. Papers of John Jay, IV: 223-25.

The plan for “Ricketts’s New Theatre,” on Greenwich St., usually referred to as a “Circus” (see Mr 16, 1797), which is now under construction, "far surpasses any other of the same description in the United States. Every box commands a full view of the Stage. It is decorated in a style of peculiar neatness, and... the patent lamps are to be numerous..."—N. Y. General Advertiser, Mr 3, 1797. The building is also referred to as "a New Amphi-theatre."—Ibid., Mr 6, 1797. It was circular in form.—Daily Advertiser, Mr 17, 1797. The location was at Nos. 82-84 Greenwich St. (L. M. R. K., III: 986), as is indicated by an advertisement referring to it as opposite No. 85.—Daily Advertiser, Jr 21, 1798. See also description of Pl. 56, Jr 433. For further description, after alterations, see F 19, 1799. The opening of "Ricketts’s New Circus" was on March 16, 1797 (§ 6).

The administration of John Adams begins.—Winsor, VII: 269, 334, 351 F 20, 1798.

The following item of news is published regarding a "Philosophical Experiment of a Parachute"—"Mr. Blanchard has just now made a new solid Air Balloon, which neither stones nor snow balls can destroy, as they did the former, at the moment of departure. This tri-coloured Balloon, loaded with a parachute and several quadrupeds, will ascend from the Ball Alley [see Ag 19, 1796] the Day 4th March. . . . This large Balloon with 1200 ells of taffety, destined to the 46th ascent of Mr. Blanchard, is likewise finished and will be exposed to public view in a few days.”—N. Y. General Advertiser, Mr 4, 1797. "Mr. Blanchard’s miniature balloon had a beautiful ascension, but the parachute, in its descension, did not prove sufficiently strong to let the quadrupeds down with safety, for they pulled the balloon out of Mr. Gardner Barker’s yard."—Daily Advertiser, Jr 19, 1797.

"We hear that the model of a machine for supplying this city with water, now building by Messrs. Newton and Taylor [see Mr 18] in the city-hall, will in a few days be ready for inspection."—Minerva, Mr 9, 1797; N. Y. Journal, Mr 11, 1797.

The legislature passes an act for erecting at Albany a building for the safe keeping of the state records. This also provides that if the governor does not convene the legislature, by proclamation, between the first Monday in July and the first Tuesday in January, in any year, it shall meet on the latter date at the place to which it has adjourned or, if no place has been chosen, at Albany.—Laws of N. Y. (1797), chap. 31. See Ja 3, 1798.

Philip Freneau and Alexander Menut establish a tri-weekly paper called The Time Piece; and Literary Companion.—Brigham, A. A. S. Proc. (1917), 500; Early Newspapers, II: 429. For the simplified title, see S 15.

The common council orders "that the Committee on the erection of the new Watch House at the head of Chatham Street [see O 17, 1796] take order for procuring a small alarm Bell for that Building."—M. C. C. (1794-1813), II: 329.

"Vendors of Fish." A large Multas of "Ricketts’s New Circus, Greenwich-street" (see Mr 3), is opened with "A Grand Display of Horsemanship, by Messrs. J. B. Ricketts, F. Ricketts, Masters Hutchins & Franklin—Clown by Mr. Franklin, lately from the Royal Circus, London." The programme included also songs, duets, a "new Comic Dance, called the Peasant of the Alps," and a pantomime called "The Old Soldier, or the Two Thieves."—Advertisements: "Lower Box 8. . . Upper Box 60—Fist 46."—N. Y. General Advertiser, Mr 16 and
The legislature passes "An Act for the relief of John B. Coles and to provide for the laying out of new roads." This recites that, although Coles "had erected a bridge across Harlem river" (see S 27 and N 4, 1796), and a road has been laid out from said bridge to East Chester, yet the damages to the persons through whose land the road is laid are not paid, part of it is not opened, and Coles has expended a considerable sum in making, clearing, and repairing the said road. The law directs that the road be immediately declared a public highway even though the damages are not paid, that Coles and his assigns at their own expense cause the road to be cleared and properly made, and that they may hereafter, for 30 years, charge an additional toll for passing over the bridge, not exceeding 50% above the present toll.—Laws of N. Y. (1797), chap. 61. See N 19, 1798 and 2, 1799.

The legislature passes "An Act for the Establishment and Support of a Lazaretto."—Laws of N. Y. (1797), chap. 67 (Webster, III: 295). This was repealed by "An Act to provide against Infections and Pestilential Diseases," passed March 30, 1798.—Ibid. (88), chap. 65 (Webster, III: 290).

The legislature grants 500 to Columbia College for the preservation and care of its anatomical museum.—Laws of N. Y. (1797), chap. 68.

The Play-House shut up, in consequence of a Dispute among the Managers. It began the 29th, and much Confusion that Night, occasioned by reason of an agreement that Mrs. Hallam should not be employed, being introduced on the Stage by the old Captain to her Conduct."—Journal of Hugh Gaine, II: 164. See Ap 1.

The Managers of the Theatre ordered the Bills for Monday, Apr. leaving out Mr. Hollandson's Name."—Journal of Hugh Gaine, II: 164. This dispute led to the issue of Narrative of his Connection with the Old American Company from September, 1792, to March, 1797, by John Hodgkinson, New York, 1797.—Ibid., II: 164 (footnote). Dunlap says: "After long disputes between Hallam and Hodgkinson, matters were finally settled in May, and [William] Dunlap entered upon his managerial duties."—Dunlap, op. cit., I: 287-90.

The legislature amends "An Act for the more effectual Prevention of Fires, and to regulate Buildings in the City of New-York."—Laws of N. Y. (1797), chap. 99 (Webster, III: 312).

A list is prepared of the proprietors, etc., on Old Slip from Water to Front St, showing measurements of lots.—From the original MS., item No. 1895 from Holden sale, filed with "N. Y. Maps 1791-1800," N. Y. Hist. Soc.

"The gentlemen subscribers to the new Balloon," to the number of 169, are informed by a published notice that "from this day Aerostatic Experiments will be exhibited in the enclosed ground of the Ball Alley, No. 247 Broadway."—Diary, Ap 6, 1797.

No persons having offered to lease Bellevue Hospital and the land around it, the committee (see F 20) informs the common council "that Smith Fisher the present Occupant would continue thereon on such reasonable Rent as the Board should set," and keep it in good order for a year from May 1; also "that it should be wanted at any time in the Course of the Year as an Hospital the same or such part thereof as may be required for that purpose to be immediately surrendered when required. The said Council agrees to continue for a year from April 1, at a rent of 325. 3/12. M. C. C. (1784-1813), II: 315, 316. On May 1, the city paid for work and supplies at Bellevue.—Ibid., II: 343. See My 30.

The common council decides (see My 16, 1796) to purchase for £1,800 "A Piece of Ground containing about 90 Lots parcel of the Land of Willi' Smith bounded on the Road leading from the Bowery Lane at the two Mile Stone on Greenwich," and to do without "for a public burial Ground." (This was the "Market field.")—M. C. C. (1784-1813), II: 335, 336. The road here described was the Sand Hill Road, or Greenwich Lane, the eastern end of which was later known as Art St. and then Astor Place, and the part of which west of Broadway was closed in 1825-6.—See L. M. R. K., III: 1001, under "Greenwich Lane." The land above described became the site of Washington Square (see Je 19, 1826.—L. M. R. K., III: 1001. See Ap 24; My 29, 1797.

Joseph Fr. Mangin, in response to an application from "a member of the Corporation" asking him to state the conditions
THE ICONOGRAPHY OF MANHATTAN ISLAND

1797 on which he will "deliver the regulating plan of the city," replies as follows in a letter to the common council:

"I shall make a particular map of the city with the position of all the houses, bays, and lots, the number marked on, a field book containing the names of the owners of and the streets, squares, warfs and wards, the levelling of the whole city will be added to the map and included in the field book; the wrong levels which exist and the way to correct them in the future; the exact calculation of the moving of the Terreins [terrains] in the part of the city which is not still built, to avoid useless expenses and the means to supply the city with waters, as equally as possible in all the streets, by the Shortest and least expensive directions."

"The Map which shall be laid before the Corporation shall not be less than Six feet Square.

"Each member shall have a map about three feet Square.

"In order to make this map I cannot use of the plans already made to avoid the errors and mistakes.

"I shall warrant the precision and exactness in all the work which may be then Visited by inspectors.

"In order of executing this work with all the care possible, it requires at least two years. According to this I will demand Three Thousand dollars as much for myself as for the workmen wanted. I demand only this sum because I reserve for myself the right of raising a Subscription in which I shall give a Share to the corporation for indemnifying it of the Three Thousand dollars which shall be advanced to me for my expenses.

"I shall furnish each of the subscribers with a map three feet Square with the field book containing all the explanations wanted."

(signed) "Maugdin."

—From original letter in metal file No. 18, city clerk's record-room. See, further, O 16.

12 Thomas Palmer announces that he has opened the "Bloomington I on and Farm, near the Six Mile Stone, lately in the occupation of Mr. Oldhew."—Daily Adv., Ap 12, 1797. See also N. Y. Gaz. & Gen. Adv., My 17, 1797, and Je 3, 1797.

17 "A bear-headed is held on this day in 'near Runkle's Hill,' which terminated unfavorably to the sporters; for the bear got loose, and hanged, most fraternally, some of the spectators."—N. Y. Gaz. & Gen. Adv., Ap 19, 1797. See also O 1, 1763.

18 James Kent is admitted and sworn as a freeman of the city. On the same day, he produced "a Commission under the Great Seal of the State appointing him to the Office of Recorder of this City," signed the oaths of office, and took his seat in the common council.—M. C. G. (1784-1811), II: 337. He was succeeded by Richard Harison on March 12, 1798 (q.v.).

19 "On the application of the Inspectors of the State Prison," the common council ordered "that the western moiety of the Bridewell be assigned for the confinement of the State Prisoners until the building be erected & ready to receive them."

—M. C. G. (1784-1811), II: 338.

In their report to the legislature on Jan. 17, 1798 (q.v.), the inspectors stated that they had expended $5,782.47 in fitting up the bridewell, "so as to make it in their opinion, sufficiently secure," and that in June, 1797, "the convicts were removed, nearly all of whom were in want of clothes, which were supplied them, their rooms, etc. were kept clean, and their provision served them in as decent and regular manner, as circumstances would admit."—Assemb. Journ. (1798), 83; N. Y. Jour. & Patriotic Reg., F 7, 1798. On Jan. 15, 1799, the inspectors reported that, after accounts for repairing the bridewell had been settled, they found the total amount was $3,516.25 instead of $2,780.47.—Assemb. Journ. (1799), 84.

The common council ordered "that the Common Council Chamber be assigned for holding the Courts for the trial of Causes of Ten Pounds & under."—M. C. G. (1784-1811), II: 338. See, further, Ag 28, O 16, O 30. The expenses of this court were paid by the city.—See ibid., II: 408, 419.

18 The committee of repuls of Trinity is asked to "take Order for pulling the Pences adjoining to the Cemetery of Trinity Church and the Cornish [sic] of said Church—and that they provide 500 Plank and 500 Boards.

"—Trin. Min. (MS.).

20 Jacob Adams, in a petition to the common council, states that he " hath established two Packets between the Ports of Boston and New York," which have "frequentated the Coffee House Slip ever since the month of August last." Being informed that "the Corporation have prohibited all vessels, excepting Market Boats and Packet Boats, from frequenting said Slip," he adds that he may continue to bring his packets into the slip, as the most convenient place for the public.—From the original MS., in metal file No. 18, city clerk's record-room. No action on this petition appears in the minutes.

Political meetings are held at Gauiter's Assembly Room in William St., at Richard Varian's in the Bowery (the Bull's Head Tavern), and at Hunter's Hotel (69 Broadway).—Greenleaf, N. Y. Jour. & Patriotic Reg., Ap 22, 1797; Bayles, Old Taverns of N. Y., 347. By Nov. 13, 1799, Hunter had been succeeded by John Lovett as proprietor of the popular tavern at 69 Broadway.—Daily Adv., N 13, 1799. See also Com. Adv., F 6, 1801.

"On a representation by the Inspectors of the State Prison," the common council ordered "that four additional Watchmen be employed two of them every Night at the Goal till the State Prisoners can be removed."—M. C. G. (1784-1811), III: 339.

The common council refers to a committee "A Memorial of the Proprietors of Ground in the vicinity of the Ground lately purchased [see Ap 10] by the Bd for a public burying Ground, praying that it may not be appropriated to that use."—M. C. G. (1784-1811), III: 339. This petition made by the Proprietors of Ground West of theاحة object is that the ground is "so near the City and is contiguous to the publick roads leading from the East to the West part of the Town," also that the field "lies in the neighborhood of a number of Citizens who have at great expense erected dwellings on the adjacent lots for the health and accommodation of their families during the summer season, and who, if the above design be carried into execution, must either abandon their seats or submit to the disagreeable sensations arising from an unavoidable view of and close situation to a burial place of this description destined for the victims of contagion." They also point out "that, from the rapid Increase of Building that is daily taking place both in the suburbs of the City and on the Ground surrounding the field alluded to, it is certain that in the course of a few years the above-mentioned field will be drawn within the precincts of the City." Among the 57 signers of this memorial are the names of Tredwell Jackson, Nich. Low, Alexander Hamilton, Richard Harison, Ph. Livingston, Henry Rogers, Egbert Benson, Arch. Gracie, Chas. Ludlow, Isaac L. Kip, Thos. Ludlow, Guilan Verplanck, John Wilkes, James Cumming, Cary Ludlow, Leon. Bleecker, etc.—From the original MS., in file No. 5; in city clerk's record-room. On May 15, the committee's report described another piece of ground which the petitioners were willing to buy and present to the city, but the mayor's casting-vote decided against it.—M. C. G. (1784-1811), III: 348-49. On June 26, Jacob Blackwell offered "to give in exchange a greater [amount] of Land for that lately purchased for a burying Ground."

The council postponed the matter:—Ibid., III: 359. Another petition for substitution of other land was rejected on Aug. 28.—M. C. G. (1784-1811), III: 380. See, further, My 29.

Iron grates for the bridewell cost $2,683.28.—M. C. G. (1784-1811), I: 340.

The board also appoints a committee "to report Regulations for the Alms House."—M. C. G. (1784-1811), II: 343. For regulations at the first almshouse, see Mr 1, 1761.

Trinity Church leases the Richmond Hill estate to Aaron Burr for 69 years.—Liber Deeds (register's office), LXV: 512. The property had previously been leased to Abraham Mortier (see My 1, 1767). The fee always remained in Trinity Church. See description of Mortier's lease of the Richmond Hill property (which extended for 99 years was paid by "Old John's land," comprising 24 acres, 3 rods, and 36 perches), among the Banker papers, in N. Y. P. L.; mentioned in Vol. I, p. 359 (q.v.). See also descrip. of P1 55-4, I: 416-17.

The city appropriates $4,040 for making a broad walk at DeW's Slip.—Journal B, 78, chamberlain's office.

The common council refers to a committee "An Application of
Cortlandt Van Buren to hire the Powder Magazine at Inclamberg."—M. C. C. (1784-1815), II: 343. See Ag 21.

Joseph Delligier, proprietor of a "Portable Camera Obscura," who has been "repeatedly applied to by persons to place the same upon the Battery for the purpose of taking the Views of the Country adjacent thereto," has not thought proper to do so without permission from the Corporation. See the comment of Lt. M. C. C. from original petition in metal file No. 18, city clerk's record-office, endorsed "May 10th, 1797 rejected." The petition is not entered in the M. C. C.

Joseph Delacroix (see F 22) advertises his "Ice-House, No. 112 Broadway," where he furnishes ice cream. "The House and Garden will be open from 10 o'clock in the morning till 10 at night."—Daily Adv., May 2, 1797. He now petitions for it.

"The United States" (see May 17, 1794), the first naval vessel built under the Constitution, is launched at Philadelphia before a large assembly.—McMaster, Hist. of People of the U. S., II: 337-24, citing New World, May 11, 1797.

The common council rejects a petition asking "for the use of part of the Lot whereon the Laboratory is erected at the Battery on the Corner of Pearl & State Streets," and directs that the ground "be put in fence."—M. C. C. (1784-1815), II: 146. Just prior to and soon after the British capture of New York (see JI 11 and O 28, 1776), there was a laboratory near the liberty-pole. The uses to which this building was put are not revealed in the records. See also Je 29, 1798.

The "Widow Dunlap & Rotb Simmons," in a petition to the common council that the "New Street, the 2nd Street formerly Golden hill forty one feet fronting on said John street with six feet deep in order to widen said street that they have not received any compensation what ever for the same theho Neighbors have been paid for their ground they have lost on said street . . . that they are heavily assessed and taxed for the payment of said compensation to their neighbors." They ask relief.—From the original MS. in metal file No. 18, city clerk's record-room, endorsed "rejected."—M. C. C. (1784-1831), II: 346. See also My 29.

The following "Communication" is published: "Blanchard [the balloonist] has at last taken his flight—not in the air, as he had proposed, but on dry land. He made his exit with his family about the first instant; whither, we cannot tell. All hopes of an ascertained return at an end: and this circumstance is a proof that his conduct towards Mr. Baker lost him the confidence of the citizens."—Diary, My 11, 1797.

The common council opens "the sealed Proposals delivered into the Clerks Office agreeable to notification in the News Papers for supplying this City with Water." They are from Taylor & Newton (May 18), Hugh S. McClennen, Peter Banner, William Harris, Nicholas L. Henry, and E. D. J. 1798, John Page, and Christopher Colles. Consideration of them is referred to the committee on "the Proposals of Joseph Brown & his Associates" (see D 28, 1796).

"M. C. C. (1784-1831), II: 347. See F 12, 1798.

Sebastian Bauman, lieut.-colonel commandant of the "Regiment of Artillery," resigns his commission, because of the appointment of a junior officer, Hughes, as brigadier-general. On April 22, all the other officers of the regiment had resigned because they saw no prospect of rising beyond lieut.-colonel. The entire correspondence, general orders, memorials to Gov. Jay and his replies, May and other papers in the case since Dec, 1795, were pubd in a pamphlet entitled A Statement Explanatory of the Resignation of the Officers of the Regiment of Artillery, of the City & County of New-York (1797).

Division St., which is the "only direct way at present to the Bellevue and Corbett's Hotel," is impassable from lack of repairs.—Herald, My 15, 1797.

It is ordered by Trinity vestry "that proper Grants be prepared and executed for conveying the Property of this Corporation in Greenwich Street, in Washington Street as far as Rhinelander's Brewery, in Hudson Street, as far as the pasture Fence, at Moore Street, in Duane Street, Barclay Street, and Jay Street to the Corporation of the City of New-York."—Trin. Min. (M.S.). See also Je 20.

The old Lutheran church in Broadway is rented for one year.—Lutheran Min. (M.S.).

"Vaughall gardens No 112 Broad-Way [see My 2]. Joseph Delacroix informs his friends, etc. that in the beginning of June next his gardens will be elegantly decorated in a new taste, in which will be fixed a large Orchestra, for the accommodation of 15 of the best Musicians, & three times a week, there will be a Vocal Instrumental Concert. The place will be provided with all kinds of refreshments. Those who desire to subscribe for the whole season shall have a deduction."—N. Y. Gaz. & Gen. Adv., My 20, 1797. See, further, Jl 4.

"John Avery, late keeper of the Tontine Coffee House, has removed to that large, airy and elegant building, formerly the property of Dr. Samuel Bard, No. 42 Broad street, contiguous to Federal Hall . . . the capaciousness of this house, yards and garden, running back to new-street, covered with fruit and forest trees . . . the encouragement and support with which the subscriber has been favoured in this line of business, during a three years residence at Bellevue, and one at the Tontine Coffee House . . . John Avery."—Daily Adv., My 23, 1797.

On June 12, 1798, Edward Bardin announced his intention of keeping a "Boarding and Lodging House" there.—N. Y. Gaz. & Gen. Adv., Je 12, 1798. The next year, Michael Little moved from Pine St. into it.—Daily Adv., My 14, 1799. He called it "Little's Hotel." His advertisement, dated June 19, said that "a Book" was kept there "for taking seats in the Swift Sure."—Penn's Gazette, Ga 21, 1799. It was the meeting-place of the "New York Rangers."—N. Y. Gaz. & Gen. Adv., N 18, 1799. On Aug. 31, 1803, Mrs. Little became its proprietor.—Am. Citizen, S 1, 1802. On Oct. 11 of this year (q.v.), the long-room of this tavern was destroyed by fire. In December, it was advertised for rent from May 1, 1804.—N. Y. Gaz., May 1, 1804. David Ross bought the lessee.—Ibid., My 6, 1805. Little then became manager of the American Hall, at n. w. cor. of Broadway and Park Place.—City Directory. In 1806, P. L. Duport opened in the Broad St. house a school for dancing, limited to forty pupils. He refers to the house as "Ross' Hotel."—People's Friend, O 10, 1806. In 1809, it was called Kent's Hotel.—N. Y. H. S. Coll. (1841), 492.

See also Mag. of Am. Hist. (1879), III: 165, citing a mention of Little's Coffee House by Brillat-Savarin, the gastronome, author of La Physiologie du Gout, in which an account is given of this "Café-taverns," where turtle soup and "welch-rabbit" were served.

On this day, Dr. Anderson went "to Bellevue, now converted into a house of Entertainment."—Alex. Anderson's Diary, 76. See My 30.

Another "Vaughall" is opened, the third resort of that name in different parts of the city up to this time. For the former ones, see L. M. R. K., III: 981. It is advertised as follows: "New Vaughall Gardens. Pearl-street, no opposite the Menage, two doors from the Battery. Peter Thorn . . . begs . . . patronage, for a house and garden he has just set up in the above mentioned place, under the name of Apollo's Garden, . . . Ice Cream, Cakes, Punch, and any Liquors; as also warm tea from the cow every morning. There are several rooms in the house for separate apartments.

"The Garden is elegantly set up with a quantity of boxes lighted with lamps in a fine & new stile, will be opened on Thursday evening next, 25th May."—Daily Adv., My 26, 1797. For the Fourth of July, Thorn (or Thorfin) announced that he would have "a regular Band of Music and Fire Works."—Ibid., Jl 3, 1797. On July 25, he advertised it for sale, with an ice-house nearly full of ice.—N. Y. Gaz. & Gen. Adv., JI 25, 1797. See Je 12, 1798.

19 - "The Panorama, in this city, is to be opened this evening, for the first time. This beautiful invention in optical philosophy has been so far improved by Mr. Baker as now to exhibit views by artificial light, the result of his own experience. Among other views in the Panorama, is one of an original painting of the city and harbour of Charleston (S.C.) with James & Sullivan's Islands." - "Time-Piece, My 29, 1797. The panorama was at 222 Greenwich St.

21 - "Daily Adv., S 27, 1797. A panorama had been exhibited in New York in 1795 (q.v.)."

22 - "The common council resolves that "the Ground commonly called the Potters field" (see Ag 4, S 15 and O 16, 1794; and Ja 11, 1796) be abandoned as a cemetery, and directs the land committee "to take order for preparing the Ground lately purchased as a burying Ground [see Ap 10 and 24] & for the erection of a House for the Superintendant." - "M. C. C. (1784-1811), II: 351. The old potterfield was at Madison Sq.; the new one at Washington Sq.- L. M. R. K., III: 970, 972. See also "Man. Com. Curr. (1896), 465, and 23d Ann. Rep. Am. Scien. & Hist. Fem. Soc. (1918), 160-73. See N. 6. The potterfield at Washington Sq. was abandoned in 1849 (q.v. Jr. 23, 1811)."

23 - "The common council grants a petition of Geo. Doolitt (architect—see Je 22) who says: "In commencing the building of a new York Bank House, I feel a very great necessity to obtain as considerably a part of Wall Street, & William St., opposite to the lot of ground intended for said Bank, with privilege to erect a pale fence round the same, just as to you may approve right."—From a letter in metal file No. 19, city clerk's record-room. A marginal note next to the entry in the minutes reads: "Bank of New York & Branc Bank of United States." - "M. C. C. (1784-1811), II: 351. Doubtless the use of the streets was desired for the storing of building materials. See Je 13 and 22. See also Pl. 72-b, Vol. I.

25 - "Steps are taken to install a sewerage system in the Park area. The common council orders that the street committee be authorized to survey to be made of Chambers Street and a Plan of the intended Common Sewer from the Alms House Gaol & Bridewell to Hudson River." - "M. C. C. (1784-1811), II: 378, 379. On Sept. 4, when the work was begun, an inspector was appointed, and the board advanced $1,000 "towards the new Alms House Drain." - "Ibid., II: 382. On Oct. 11, $1,000 more; Oct. 17, $1,000; Oct. 23, $500; - "Ibid., II: 395, 398, 400. On Oct. 23, the board ordered that two carts be employed "to fill up the sewer from the sewer to the Alms House to the brushes," and directed the committee to make "an agreement with the sewer to the Alms House." - "Ibid., II: 400. On Oct. 30, $1,000 more was paid.-"Ibid., II: 402. On Nov. 9, the sewer was nearing completion, the board then ordering that the committee contract for constructing necessary drains from the three buildings.- "Ibid., II: 405. On Nov. 27, $1,000 was paid towards the sewer, and on Dec. 22, $2,000 towards "the Sewers & Drains at the Alms House." - "Ibid., II: 409, 411."

26 - Wm. Bowne, in a petition to the common council dated May 18, 1796, relates, that in 1791, he contributed $500 "toward the expense of purchasing a House & Lot in Cliff Street in order to lay open said street. . . . He is now taxed over $500 "toward defraying the expense of encroaching the width of Golden Hill," and this be "cannot view as of any material advantage to him." He asks "reasonable relief."—From the original MS. in metal file No. 18, city clerk's record-room, endorsed "Petition of Wm Bowne agt the assessors of New York.—read May 20th 1797 and rejected." The common council decides that it can give "no Relief in the Premises." - "M. C. C. (1784-1811), II: 352. See also My 10.

28 - "The common council passes favourably upon a petition from proprietors of lots in the Common Lands regarding making passable those roads which are "most necessary & immediately required." - "M. C. C. (1784-1811), II: 349, 356.

Abel S. Fisher announces that he has rented "Belle-vue," and opened it as a "Tea Garden and Bathing House." The bathing-house furnishes warm and cold, salt and fresh, baths.—"Daily Adv., My 30, 1797. See also My 25.

As the money granted by the legislature for the erection of a new wing to Columbia College (see Ap 11, 1792 and F 25, 1795) has all been spent, and as no further aid has been granted for the completion of the work, the trustees are obliged to suspend building operations and a committee is directed to sell the perishable building materials which remain on hand.—"Moore, Hist. Sketch of Columbia College, 73-74.

Moses Oakley, formerly of the "Bloomfield Inn and Farm" (see Ap 12), advertises that he will open on June 2 at "his new and pleasant situation," at Bloomfield, "five and a half miles from New York."—"Daily Adv., Je 1, 1797; see further, N. Y. Gaz., My 26, 1802. On Feb. 26, 1805, the "Sun Tavern" (apparently the same place), "formerly the property of David Oakley, about five miles from the city . . . now occupied by Abraham G. Hammond," was advertised for sale.—"Morn. Chron., F 26, 1805.

With either this issue or the next the name of The New York Prices Current (see 1796) was changed to Ovam's New-York Price-Current, and Marine Register.—Brigham, A. A. S. Proc. (1917), 481. See My 25, 1799.

The city allows £208:10 for a bulkhead in Roosevelt Street and for extending the common sewer into the river, and £40 for filling in the street in Peck's Slip.—"Journal B, 84, chamberlain's office.

Trinity vestry appoints "a Committee to take such Measures as they may think proper for opening[? Murray Street]."—"Trin. Min. (M.S.)."

The foundation-stone of the "United States Branch Bank" is laid by the president, Cornelius Ray, at No. 38 Wall St. More and Robinson are the master-builders.—"Daily Adv., Je 15, 1797. The site was the present 72 Wall St.—Hardenbrook, Financial N. Y., Vol. I.

The trustees of the First Presbyterian Church pass a resolution that the new church (see Je 21, 1795) have "the front of 60 feet on Rutgers Street, the side of 50 feet on Henry Street, and 15 feet back from both streets."—"Proc. of the Trustees (M.S.), Vol. II.

The corner-stone was laid soon after this, on the land donated by Henry Rutgers. The church was opened May 13, 1798 (q.v.).—Miller, Memoir of Rev. John Rodgers, 268.

Complaint having been made on May 29 that the tan-yard of John R. Livingston and others, near the Fresh Water Pond, "lies open with the Fats [vats] exposed to the great Danger of the Children & others passing through the same," an ordinance is adopted requiring Livingston "to cause the said Tan Yard to be enclosed with a good Fence & the Tan Vats to be filled up with good wholesome Earth that the said Tan House to the said buildings may be made thereby in the thriving Business" by the first day of Aug next under the Penalty of £500.—"M. C. C. (1784-1811), II: 352, 356. In compliance with this resolution, a written order, signed by Robt. Benson, clerk, was served on Livingston the same day. From this it appears that all the "Fence" there had been removed, and that the vats were "full of stagnant Water."—See original order (a copy of which was served) in metal file No. 17, city clerk's record-room.

A petition is presented to the common council from inhabitants of the Sixth Ward, most of whom "live Adjacent to a pond at the foot of what is Commonly Called pot-baker's hill" (see L. M. R., III: 967). The stagnant waters of this pond make it a nuisance, and dangerous to health. The Drear that formerly led from this pond into the Fresh-water-pond being filled up a number of Dead animals being thrown into it now in a State of putrefaction together with a pernicious matter running from a Glue Manufactory Causes your petitioners to be Apprehensive if left as at present during the hot Season it may prove fatal to the Health of the Inhabitants that live near the same. . . .—From the original MS., in metal file No. 18, city clerk's record-room, endorsed "Ord'rs passed Jun. 18th 1797" and "for filling all the low & sunken Lots on the southwest side of Magazine Street by the first day of Sept next under the penalty of £50 each Lot."—"M. C. C. (1784-1811), II: 356.

The common council orders that the spout of the Tea Water Pump be raised two feet and lengthened, "so as to deliver the Water at the outer part of the paved Walk." It also directs that

A riot occurs "at a place called Topsail Town, near the Exchange." With the assistance of the civil officers, "a fair fleet of about 20 sail . . . got under way . . . and . . . arrived safe into their destined harbour—Bridewell."—*N. Y. Gaz. & Gen. Ado.*, Jl 3, 1797. This appears to have been the location formerly known as "Canvas Town."—Ag 26, 1798.

The mayor lays before the common council a letter received from the governor, which states "that the Commissioners appointed to procure Arms Ammunition & other military Stores have "fixed on a Piece of the Common Lands at the junction of the Post & Blooming Dale Roads part of which hath been for some time used as a public burying Ground," and that the governor has "signified to the Commissioners his approbation of their engaging in the necessary Buildings at that Place for military Stores provided this Board should consent to grant to the State as much of the said Ground as might be requisite." The board decides at once to grant this piece of ground to the people of the state "for the purpose aforesaid reserving such part as hath been used for the interment of the Dead & a convenient Piece for a Passage thereto from the Post Road," and orders that the clerk prepare the grant.—*M. C. G. (1784-1811), II: 366.

For the celebrations of this day, the common council paid on July 12, 162.6 to John Norris "for Exposco at his House . . . for ringing the public Bells," and 162.6 for gumpower.—*M. C. G. (1784-1811), II: 368.

Elaborate new decorations and illuminations which include a representation of a forest and various emblematic and patriotic traceries, an obelisk, etc. are arranged by Jos. Delacroix in his garden at the Broadway, all of which are described in detail in his announcement.—*Daily Ado.,* Jl 4, 1797, and *N. Y. Times,* N 29, 1812; see, further, My 1, 1798.

At this time, there were three stage lines to Philadelphia.—De Voe's newspaper index, *citing Diary,* Jl 12, 1797.

Pres. Adams appoints three envoys to proceed to France and endeavor to renew the relations which had been so rudely broken by the Directory."—Treaties and conventions concluded between U. S. and other powers (1873). 996. The Directory had recalled the French minister to this country, and would not receive our new minister, Pinckney, when he arrived to succeed Monroe. Other acts of the Directory served to make every American ship "a good prize" for the French.—*Ibid.* 997-99. The treatment of these acts, as revealed in the "Declaring War" article in *V. W. Diary,* Ap 3, 1798, well suited to warn with France (see *Ap 70, Jl 9, 17, 1817, and 1818*).

In a petition to the legislature for the grant of a water-lot opposite his farm, to build a dock, Philip J. Livingston, of Throgs Neck, Westchester Co., states that he has planted on his farm a nursery of fruit-trees, more than 20 acres in extent, to supply the city of New York with fruit.—*Col. Land Papers,* 1002.

E. Tisdale writes to the mayor and aldermen stating that he has it "in contemplation to publish an Engraved Portrait of Columbus," and requesting permission "to make a Copy of the Picture in Federal Hall," which he believes "is the only Likeness extant of that great man."—*From the original letter in metal file No. 17, city clerk's record-room. This was the picture presented to "the house of assembly" of this state by Mrs. Farmer on March 12th, 1798.*

"The thoughts of Engraving have occupied my mind today; I could not help looking back to the pleasures of that art, like the Italians to the flesh-pots of Egypt—I had even resolved to indulge myself now and then in engraving on wood, and cut several patterns for tools which I proposed to have made, but the dread of being 'unsaleable' as water deterred me, and I laid by the patterns."—*Anderson's Diary, 1797 (M.5), 167.

Brig. Gen. Hughes, having been notified that the president of the United States would be in the city on Jl 27, gives orders for the uniform companies of grenadiers, infantry, horse, and artillery, to assemble at 9 o'clock in the morning opposite Trinity Church to be in readiness to receive him. Officers of militia who are not on duty are to assemble in uniform at Hunter's Hotel. Lt. Col. Morton is directed "to wait on the President at or near Paules Hook, and attend him to the city."—*Purse's Gaz.,* Phila., Jl 28, 1797.

Dr. Anderson writes: "I have now but little business of the
medical kind to attend, and have therefore devoted some of my
time to engraving—this latter kind of employment has not as
yet yielded any profit, for I have only been making experiments
and practicing.—The beautiful specimens of Bewick’s work have
been the means of stimulating me to improve in the art of Engraving
on wood.

Alex. Anderson’s Diary, 1797 (MS.),
July 29
31
St. is extended, so that the whole street from Chat-2
ham (Park Row) to Bayard St. is now named Mulberry St.—
M. C. C. (1784–1831), II: 372. The northern part had hitherto
been called Ryndert St.—L. M. R. K., III: 1099.

"The inhabitants near the corporation dock, in a petition to the
common council, complain of "the number of Hay-Boats landing
collectively there," discriminating the Market, and Wood-Boats
and other Vessels, which resort in great Numbers to said Wharf
and Basin, (being adjacent to the Market)." The masters and
owners of these vessels "cannot unload across said hay-boats."
The petitioners recommend "the spacious Wharf and Basin near
Mr. Tenbrook’s, for the more convenient accommodation of said
Hay-Boats, it being a place of little resort, and suitable for that
purpose."— From the original petition, in metal file No. 18, city
clerk’s record-room, endorsed "Ord’s passed." The ordinance
prohibits the landing of hay at the corporation dock after Aug. 15—
M. C. C. (1784–1831), II: 373.

August
Robert Gilmore, of Baltimore, visits New York, and makes
notes and pen sketches of places and events. He refers to the
New York Battery as "the grand public promenade of the ladies," and to the
Tompkins City House as "the house where the merchants &
deck every body almost assemble at night to hear what is going on, and see each other." Gilmore’s journey extended to
Boston, and included New York and Philadelphia on his way
home. His notes, with 19 pen-and-ink drawings of places visited,
are in the Boston Public Library. The drawings of New York
interest are:

*View of New York taken on the road to Utrecht baths, that
leads through the narrow's.*

*View of Broadway (New York) from the Battery.*

*View of the Governors house at New York.*

The manuscript is printed, and the drawings are reproduced,
in the Boston Pub. Library Bulletin for April, 1892, Vol. XI,
No. 1 (whole No. 88), with biographical notes.

The Duc de la Rochefoucault Liancourt describes the city:
"New York is, next to Philadelphia, the largest and best
town in the United States. These two cities rival each other almost
every respect. Philadelphia has hitherto had the advantage,
but from the fine situation of New York there is reason to expect
that sooner or later it will gain the superiority. [See 1790.]"

"It is calculated that this city contains a present upwards of
fifty thousand inhabitants. There have been no less than four
hundred and fifty new houses built here in this present year. It
is increased and beautified with unheard of quickness; a circumstance
owing, no doubt, in a great measure, to the immense benefit
its trade has derived for these two or three years from the present
state of Europe.

This quarter of the city [the burnt section] has been rebuilt
since the peace, and is now one of the handsomest parts in it. The
town had formerly been built without any regular plan, whence
everywhere almost, except what has been rebuilt in consequence
of the fire, the streets are small and crooked; the foot-paths, where
there are any, narrow, and interrupted by the stairs from the houses;
and the houses much better built. There is not in any city in the
country a finer street than Broadway [I]; it is near a mile in length,
and is meant to be still farther extended: it is more than a hundred
feet wide from one end to the other. Most part of the houses are
of brick, and a number of them extremely handsome. From its
elevated situation, its position on the river, and the elegance of the
buildings, it is naturally the place of residence of the most opulent
inhabitants. Broadway is terminated, at one end, by a handsome
square, in the front of which is the governor’s house, built in a
very good stile of architecture, upon the spot where the fort stood
before the revolution. The demolition of this fort has also left
between the governor’s house and the river a large space, which
has been formed into a public walk, upon the banks of Hudson’s
River, and from thence round to East River, commands a view
as far as the narrows at the entrance of the roadstead. Thus, in
this promenade, the eye embraces at once all the outliers of this great
port, and sees all its shipping come in and go out. This walk which
is called the Battery, might undoubtedly be kept in better order,
and be made more agreeable to the use it is intended for, by plant-
ing some trees, &c, but as it is, its situation makes it incomparably
the most delightful public walk any where to be found.

"The fortifications erected upon Governor’s Island, to defend
the entrance of the harbor, are partly of brick and partly of
earth; they are in a respectable state of defence. The works were
begun two years ago, upon a very good plan, by M. Vincent, a
French engineer, and eighty thousand dollars granted by congress
have been already expended upon them; but it will take a great
deal more to complete them. . . ."

New York was, till 1818, the seat of the legislature of the state,
which has since that time transferred to Albany. The
building in which the legislature held its sittings, and which con-
tains also the courts of justice, is one of the most elegant, or at
least, the most spacious in the city. It is, however, much inferior
to the descriptions given of it in all the American Gazettters.

"There are here nineteen places of worship, belonging to dif-
ferent religions.

"There are three markets at New York, but all of them small
and narrow, very much inferior to those of Philadelphia, both in
size, and in neatness and regularity. . . ."

"The water is, in general, bad at New York, . . . There is a
pump placed at the [northern] extremity of the city, where those
families that are not satisfied with the wells and common pumps,
get their water. The spring which supplies this pump belongs to
one of the inhabitants, and is by him let for twelve hundred dollars,
to a person who is said to sell daily from fifteen to twenty thousand
gallons, and sometimes more. This water is known in the town by
the name of tea water."

He describes the hospitals and public charities, and the "poor’s
house." Of the latter be says: "... it is seldom a good institu-
tion either in a political or charitable point of view. According
to the acknowledgment of the inspectors of the poor at New York,
the poor-house of New York produces paupers." He advocates
the establishing of "benefit clubs, where the working class might,
by contributing a small part of their earnings, secure for them-
seives, in their old age, a support arising from their economy.
. . ." He also describes the city dispensary.

"At New York the poor are rich, and poor towns on the conti-
inent, there are a great number of prisoners for debt." He men-
tions the society for their relief; and other charitable societies,
including "the relief granted by the state and city of New York
to the unfortunate colonists who escaped from St. Domingo, and
which has been continued ever since the year 1793, when it was
begun. . . . The distributors of these succours have been
Lawrence Everey and Richard Larson, both Quakers . . .

"There are two banks established at New York; one of these
is a branch of the bank of the United States . . .; the other
is the bank known by the name of the New York Bank. . . ."

Prisons and criminal jurisdiction are described. "The new
prison at New York is already nearly finished, and it is upon a very
complete plan. It is enclosed four acres, and nothing is wanting
in respect of security, extent, good air, division of the different
classes of prisoners. . . ." This is the state prison.

He describes the country around New York; also "the manners
of New York," and mentions several persons of note whom he has
met,—Jay, Hamilton, Burr, ex-Gov. Clinton, Edmund Livingston,
Kosciusko and Nieuwercize.—Travels through the U. S. of North Am.,
in the years 1792, 1793, and 1794 (London, 1795), IV: 327–47.

A complete set of bells for Trinity Church has been received
from London. The bells are eight in number, with the figures
complete of frames, wheels, ropes, &c. The largest weighs
upward of 2400 lb. being much heavier than any other in the city.
—N. T. Mag. (1797), 446. An "elegant clock" is also received.—
Greenleaf’s N. T. Jour, Apr. 5, 1797. See also descr. of Pl. 68-b,
L: 452.

A stage line is established between New York and Bennington,

Aug.
The common council orders that the almshouse committee "direct such of the Materials of the Old Alms House as may [be] useful to be taken [for] the purpose of putting the Ground lately purchased for a burying Ground [see Ap 10] in order & the erection of a small Building for the Superintendent."—M. C. C. (1784-1811), II: 377. Sept. 1797

Trinity vestry orders "That the Committee of Repairs have a next substantial Railing put around the Roof of Trinity Church."—Trin. Min. (MS.). See also descrip. of Pl. 56, I: 421.

"The inhabitants of the city of New York . . . are . . . informed that a company of Comedians . . . are arrived on town on their return from Philadelphia, and having permission of Messrs. Hodgkinson and Dunlap mean to open the Theatre, John street, in this city for two nights only. The first performance will be this evening, the 18th of August."—Daily Advt., Ag 18, 1797.

The common council appoints John McLean "Keeper of the public Magazine for Gun Powder at Inclanchard [see My 1 and cf. Jl 3] provided that all the Gun Powder stored there be at his Riske."—M. C. C. (1784-1811), II: 377. See Aug 28.

Ricketts's new circus, on Greenwich St., is opened as a summer theatre by Wignell and Reinagle of Philadelphia (see Mr 14, 1795), who have postponed the opening from Aug. 21 out of deference to Mr. Hodgkinson of the John Street Theatre.—Daily Advt., Ag 18, 21, 24, and S 8, 12, 1797. Wignell advertised a performance of plays on St. Suydam and Mud House, next of the kind, at the public Theatre at Albany."—Ibid., S 8, 1797. On that night, an "anonymous and scandalous publication" was "handed from the John-street Theatre," charging Wignell and Reinagle with opposing Hodgkinson, and with filling their "coffers" under the "reasonable pretext of charity." Wignell then obtained publication of a letter "To the Public," exposing Hodgkinson's mistaken hostility.—Ibid., S 12, 1797.

The common council grants permission to the Harmonical Society to use "the lower back Room" in the city hall, "provided they can accommodate with [!] the Court for the Trial of Causes of Ten Pounds & under" (see Ap 17).—M. C. C. (1784-1811), II: 379. "Of O 16. The original petition, dated Aug. 23, preserved in metal file No. 16, city clerk's record-room, shows that this society had been established nearly two years, "on principles similar to St. Cecilia's Society," and had been compelled to meet at a public house, contrary to the wishes of its members and against the advancement of the society. It therefore petitioned the common council "for the Use of the Room occupied by St. Cecilia's Society in the City Hall on Thursday evenings, or any other Room in the said Building."—John B. a leather dresser and manufacturer of glue, having petitioned on July 3 for relief on account of having to remove the implements of his business out of the city, the common council, on advice of its committee, allows him £3412.—M. C. C. (1784-1811), II: 366, 379.

The common council orders that the ground belonging to the city in the vicinity of the old powder magazine be surveyed, staked out and given to the city for a public house, contrary to the wishes of its members and against the advancement of the society. It therefore petitioned the common council "for the Use of the Room occupied by St. Cecilia's Society in the City Hall on Thursday evenings, or any other Room in the said Building."—John B. a leather dresser and manufacturer of glue, having petitioned on July 3 for relief on account of having to remove the implements of his business out of the city, the common council, on advice of its committee, allows him £3412.—M. C. C. (1784-1811), II: 366, 379.

The common council passes an ordinance for digging out and filling in Broadway from Murray St. to "the Arched Bridge."—M. C. C. (1784-1811), II: 384. See also D 4. For the same sort of work on Broadway above the bridge, see N 29, 1802.

A petition, read in common council, for filling up sunken lots on Delaney's ground near the Bowery Lane, shows that a pond has formed here (at or near First and Grand Sts.), and as there are five slaughter-houses in this vicinity the health of the inhabitants is endangered. From original petition (in metal file No. 18, city clerk's record-room), endorsed "read Sept 11th 1797 & referred to Street Committee."—M. C. C. (1784-1811), II: 384.

The common council agrees to a "Regulation" (grading, etc.) of Front St. from Burling Slip to Peck's Slip. The specifications are recorded in three sections: Burling Slip to Beckham Slip, Beckham Slip to Crane Wharf, and Crane Wharf to Peck's Slip.—M. C. C. (1784-1811), II: 384-5.
The common committee orders "that the Proprietors of Water Lots between Counties Slip & Catharine Slip be & they are hereby required to cause the Street of seventy feet in breadth on the East River called South Street [see Ji 18, 1796] in front of their respective Lots to be made & finished by the first day of October in the year 1798. And also that they cause their respective Lots to be extended out to the said Street & completely filled in with wholesome Materials to a proper height by that Day."—M. C. C. (1784-1831), II: 399.

The board also orders that the street committee examine Peck's Slip, James's Slip, and Catharine Slip, and report what improvements—vide are necessary for such improvements at James and Catharine Slips were approved on Oct. 30.—Ibid., II: 402. Regarding Peck's Slip the board approved the committee's report on Nov. 6, which required extending the piers into the river "so far as to make suitable Accommodations for the Market Boats beyond front Street."—Ibid., II: 401.

James Morris and William Johnson, justices of the court for trying causes to the value of $10 (see Ap 17), petition the common council "for the necessary Fuel for the Chamber appropriated to the public use in which they sit; and hope as they are members of a public Court they will be furnished with fuel at the public expense."—Ibid. They also request permission to meet in the city clerk's room. Granted.—M. C. C. (1784-1831), II: 401.

"The Grand Jurors at the last Supreme Court having presented as a Nuisance a certain Lot of Ground at the Corner of Pearl & State Streets belonging to this Board & occupied by Gardiner Baker as a Menage or Place for the keeping of wild Animals" (see Mr 31 and S 29, 1794), the common council orders that Baker "be notified to provide another place to keep his Measage & that he remove from & surrender the said Lot by the first day of May next."—M. C. C. (1784-1831), II: 401.

An advertisement reads: "For Sale. That valuable property on which the Old Theatre now stands containing three lots in front on John-street, together with three lots in the rear of said ground, also an alley, as will appear by the Map. The building to be valued and taken down. For terms of sale, enquire of Dr. Gamage, 20 John Street."—Daily Adov., N 1, 1797. See D 8, 1797.

The committee of the common council appointed Sept. 23, 1796 (g.v.), for the distribution of funds to encourage and maintain schools in the city and county of New York reports "that the annual Sum appropriated by Law and the annual Sum directed to be expended by Tax for that purpose is not sufficient to meet the Year to $2372." A schedule is presented for the proper distribution of one-sixth of this ($472), as the law provides, to the several charity schools in the city. The report adds that "the other five sixth Parts of the said Sum amounting to $2360 ought to be applied towards the erection support & maintenance of one or more Free Schools in the said City & which Schools ought to be established under the direction of Commissioners to be appointed for that purpose by the Corporation." To this the board agrees.—M. C. C. (1784-1831), II: 404.

Casimir Th. Goerick addresses a letter to the common council in which he states: "The proposing of making a Map of this City by M. Mangin, is confined to the Limits of the present improvements of this City, without having reference to the new and unimproved Ground; since this will not answer the expectation, and use of the Map, to your Board; We therefore do come forward, as Joint Partners with the following Proposals. For furnishing the Corporation, with a general and accurate Map of the City of New York, from the Battery easterly to Sandy Hill Road at the two Mile Stone, Westerly and Southerly to the extremity of the Grants, as likewise the present Situation of the Docks, Ships and Peers; Into the Said Map, to ascertain the different Heights from high Water Mark, to the present Wall Plates at every Slip and Street at both Rivers, and from thence at every Intersection of the different Streets; The Ascents and Descents, will appear into said Map, not alone by Shadowing, but likewise in Cylers at the different Intersection of the Streets; To complete Field Books to be made of the difference of the Levels of each Street, Distances, etc.

"The Map laid before the Corporation shall be about six feet
square, for being a Record into the Office, and an other of about
three feet Square for common use to the Corporation.

It is estimated, that the above Work as Joint Partners can
not be performed in a satisfactory manner for less than three
thousand Dollars.

"The right of raising a Subscription for having the Map
of about three feet Square engraved, of which we propose to give an
equal share with each of us to the Corporation, after eighteen or
twenty Maps have been struck of, for the different Members, of
the present Corporation and our selves, and the expenses for
engraving the Plate and operations is paid.

"We do engage our selves to finish this Work in eighteen
Months at the lowest

[signed] "Casimir Th. Goerck
Mangin"

——From original letter in metal file No. 18, city clerk's record-room.

On account of the excessive rates charged by cartmen, and
because some of them operate without license or number, the law
regulating them is revised. All licenses are revoked, and they are to
be newly licensed under the new regulations. They are arranged
in classes or companies, each class having 49 cartmen and one
foreman. The foremen are given power and authority to see that the
companies comply with, and to report vacancies. No cartman is permitted to have in his employ more than one cart.

No person under 21 years of age is permitted to drive a cart, without special permission from the mayor.—M. C. C. (1784-1831), II: 405-6.

The street committee, to whom were referred the proposals of
Mangin and Goerck, city surveyors, for making "a Survey of all
the Streets of this City" (see J1 11, Mr 20, Ap 11, O 16, N 8), reports that these surveyors will "undertake the Business on certain Terms mentioned by the Committee." The board accedes to this arrangement, and requests the recorder "to aid the Committee in drawing the Articles of Contract."—M. C. C. (1784-1831), II: 407. See, further, D 4 and 11.

The committee orders "that the Committee of Leases cause a
correct Map to be made of the whole Estate of this Corporation."—
Trin. Min. (M.S.).

The British sloop of war "Hunter" arrives at New York.—
N. T. Jour., N 22, 1797.

The ferry to Brooklyn is leased to Gilbert Van Matte for three
years from Nov. 15, at a rental of $2,000 a year.—M. C. C. (1784-
1831), II: 408. For the terms of the agreement, see ibid., II: 381.

Evacuation Day is celebrated. The militia parades.—Jour.
of Hugh Gaine, II: 181. John Hyde is paid $537.17 for a public dinner;
and John Ten Eyck $57.87 for gunpowder.—M. C. C. (1784-1831),
II: 410, 411.

The new State Prison, beautifully situated on the banks of the
Hudson, about one mile from the upper western suburbs of this city,
is opened for the reception of criminals, about 90 of whom are conveyed
there from the old jail. "By the governor's proclamation, all
criminals, under the laws of this state, are in future to be committed
to the State Prison."—Time, D 4, 1797; N. T. Jour. & Patriotic Reg., D 2, 1797.

In their report to the legislature in Jan., 1798, the inspectors of
the prison stated that 60 prisoners were removed to the state prison
Nov. 28, 1797, and that "The Board of Inspectors attended in person at the prison during their removal, which was conducted with the aid of the City-Watch, with much quietness and good order."—Assem. Jour. (1798), 8; N. T. Jour. & Patriotic Reg., F 7, 1798.

The prison was bounded by Washington and Christopher Sts., a
line parallel to and south of Perry St., and the North River.—L. M. R. K., III: 973; and descrip. of pl. 71, II: 455. Thomas Eddy, describing it in 1801, said: "The buildings and courts comprise four acres of ground. A more pleasant, airy, and salubrious spot could not have been selected in the vicinity of New-York. The west front overlooks the river, into which a spacious and convenient wharf has been extended beyond the prison wall. The upper apartments command an extensive view of the city, harbour, islands, and the adjacent country. The principal front is on Greenwich-Street, the centre of which is projected and surmounted by a pediment: there is a corresponding projection and pediment in the west front. The whole length of the front is 204 feet, from each end of which projects a wing extending towards the river, and from them spring two other wings in the same direction, of less extent. There are two stories above the basement, each fifteen
feet high. The roof is covered with slate, and the pediment is
covered with a handsome cupola. The walls are composed of freestone. The whole fabric is of the Doric order, and contains fifty-
four rooms, twelve feet by eighteen, for prisoners, sufficient for the accommodation of eight persons in each. In the north wing is a large room with galleries, neatly finished for a place of worship.
The apartments in the centre of the edifice are appropriated to the use of the keeper and his family.

"The women are confined in the north wing of the prison, on
the ground floor, and have a courtyard entirely distinct from that of
the men.

"At the end of each wing, and adjoining them, is a building of
stone for solitary cells. Each building contains seven cells. The
cells are eight feet long, six feet wide, and fourteen feet high: the
windows are eight feet from the ground.

"Parallel to the front, along the rear of the yard, is a building
of brick, two hundred feet in length, and twenty feet in breadth,
two stories high, which contains all the work-shops. In the interior
court are two pumps with excellent water, and a large basin sup-
plied with water from the river, in which the prisoners frequently
bathe during the warm season, for the purpose of cleanliness and
health.

"The whole is surrounded by a wall of stone twenty-three feet
high on the river side, and fourteen feet high in front, extending in
length on one side five hundred feet, and in breadth two hundred
and seventy-nine feet.

"The north side of this enclosure is allotted to keep fuel, and
materials for the use of the prison. The area on the south side
is appropriated to a garden, which is in excellent order, and produces
all the vegetables wanted for the use of the prison, the keeper and
his family.

"... The whole expense of the ground, buildings, and wharf was twued hundred and eight thousand, eight hundred and forty-six dollars.

"The distance of the prison from the thickly inhabited parts of
the city, is a circumstance which at present readers escapes more
easily to be effected. Considering the rapid increase of New-York
for the last ten years, it is probable that in double that portion of
time, the State-Prison will be the middle point of the western part
of the city, and be environed with well-built streets. ..."—Eddy,
Account of N. Y. State Prison (N. Y., 1801), 17-20. Eddy's
book also contains a plan and an elevation of the prison, both signed
by Joseph F. Mangin, who was probably the architect (see descrip.
of pl. 75, I: 467). For a view of the building, see pl. 71, Vol. I.
See also Man. Com. Coun. (1831), 461.

James Striker and Samuel Stilwell, "the trustees of the School
at Bloomingsdale," in a petition to the common council, state that,
eight months ago, they renewed their contract with the teacher at
the School in Bloomingsdale, for the next academic year, but the
petitioners, having been unable to agree with the teacher on either
the new contract or the terms of the old one, have been forced to
petition the council for assistance "out of the money's granted by the
Legislature of this State for the support of Schools."—From original petition, in metal file No. 18, city clerk's record-room.

The common council ratifies an estimate and assessment "for
digging out & filling in the Broad way from Scott L Clarks House
to the arched Bridge & the other Streets in connection," the work to be done by Philip Ruckle by Oct. 1, 1798.—M. C. C. (1784-
1831), II: 410, 607-9. This was the well-known "stone bridge.

—See pl. 83-b., Vol. III.

The first payment, $200, is made to Mangin & Goerck, on the
acc. of their Contract to make a new Survey of all the Streets.—
M. C. C. (1784-1831), II: 410. On Jan. 15, 1798, $100—ibid.,
II: 417. On May 21, 1798, $500—ibid., II: 443. See, further, F 4 and Ap 10, 1799; also D 11, infra; and S 26, 1802.

The council permits Col. Baum, the postmaster, "to erect a Portico to cover the Door of the Post Office from the weather."—M. C. C. (1784-1831), II: 410. Sebastian Baum, the postmaster, resided at 30 Wall St.—City Directory, 1797. No other address for the post-office is given at this time.

The "New Circus" on Greenwich St. takes the name of "Laillon

CHRONOLOGY : THE RECONSTRUCTION PERIOD : 1783-1812
and Jaymond's Circus." To make it more comfortable, "stoves have been deposited in different parts of the house." —Daily Advo., D 5, 1797.

11 The managers of the Old American Company being compelled to hold performances again in the John Street Theatre, "they beg leave to give an assurance that every careful examination of the building has been extended to, and the House newly decorated, so as to make it an object worthy general patronage, until the New Theatre [Park] is ready for their reception." —N. T. Gen., D 8, 1797.

This reopening of the old playhouse, however, was of short duration; in about a month, the last performance to be held there was advertised as such, and this notice or prediction proved to be correct.—See Ja 13, 1798.

12 The board of city council makes present to the common council a draft of articles of agreement between the board and Goerck & Mangin, "for the making of a Survey & Map of this City with all the Streets & Water Lots." The board approves of it, and orders that it be sealed and executed.—M. C. G. (1784-1811), III: 411. The original rough draft of the articles of agreement is preserved in metal file No. 19, city clerk's record-room. See also descrip. of PL 70, II: 454.

13 In a report of the corporation counsel on April 15, 1807, giving his opinion as to whether Stuyvesant St is a public street, he stated that Goerck & Mangin contracted "to make a New Map of the City from the Battery to the Sandy Hill road at the two Mile Stone and Easterly including the Street on which the New Episcopal Church stands on Stuyvesant Grounds to the East River, and Westly to the North River so as to include the Sandy Hill Road and the State Prison. By the Contract the Map was to contain certain specific Descriptions, and a Field Book to accompany the same and they were to deliver another Map upon a smaller Scale which was intended for Sale to indefinitely the Common Council, &c." —Ibid., IV: 398-99. About a year later, Goerck died.—See N 19, 1798.

14 Mr. Winstanley, in a letter to the mayor, states that he has painted an altar-piece, in the expectation of its being purchased by the vestry of Trinity Church; but that there is no private room in the city large enough to exhibit it (it being 16 feet high), and he asks permission to put it up for a few days in the large court-room.—From the original letter in metal file No. 17, city clerk's record-room.

15 The common council approves an "Estimate of the Monies which will be required to be raised by Tax for defraying the public Expenses of this City the ensuing Year." For the city alone, and the city and county jointly, this totals £19,931.6.—M. C. G. (1784-1811), III: 412-13. In his "Financial Hist. of the City," Valentine said that about $50,000 was required to be raised by taxation in 1798, in addition to the ordinary revenue.—Man. Com. Coun. (1859), 514.

16 There is a "little Confusion on the Dock with the Capt. of the British S. of War Hunters, about impressing American Seamen." —Jour. of Hugh Gaine, II: 185.

17 There is so much ice in the East River that many people pass over it to Brooklyn.—Jour. of Hugh Gaine, II: 184.

18 The governors of the New York Hospital for the first time publish a report of the administration and operation of that institution. The N. Y. H. S. has a copy of this report which is now extremely scarce. See also N. T. Times, My 14, 1809.

19 The New York Harbour was drawn this year from a survey made under direction of the corporation and a military committee. It is filed in the bureau of topography, borough president's office, as Map No. 112.

20 The mayor's office this year was at No. 1 Pine St. There were two watch-houses, one at No. 1 Broad St., and the other at No. 1 Division St.—City Directories.

21 "Bowling has been water-coloured drawing of Broadway and Chatham Row, made in this year, by John Joseph Holland, showing St. Paul's Chapel, the house of Mr. Walter Rutherford, etc., is reproduced and described in Vol. I, PL 68-b.

22 Francis Kearny, a pupil of Peter R. Maverick (see Mr 16, 1786), practised as an engraver in New York from 1785 to 1801. "Kearny founded his fame as an engraver upon a faithful copy of 'The Last Supper,' after Raphael Menghini, and he engraved some other capital work of a large size. He did considerable work in line, stipple, and aquatint for the magazines, Annuals, and book publishers." In 1801, he moved to Philadelphia.—Stauffer, Am. Engravers on Copper and Steel, I: 148-49. For a list of his plates, see ibid., II: 261-65, and Fielding, Am. Engravers on Copper and Steel, 154-62.

23 From 1798 to 1810, Archibald and Robert Kennedy occupied —the Kennedy house, No. 1 Broadway. See descrip. of Pl. 93, III: 590.

24 Pursuant to the act of March 10, 1797 (q.v.), the legislature Jan. opens its twenty-first session, at Albany.—Assemb. Jour. (1798), 2; Senate Jour. (1798), 3.

25 Gov. Jay, in a speech read before the assembly, says, in part: "At least two arsenals for the reception and safe keeping of military stores, are thought to be necessary—one at New-York, and another at this place [Albany]. For the one at New-York the corporation of that city have liberally and gratuitously granted to the people of the State, a large and valuable lot of ground, and the commissioners have my approbation to erect an arsenal on it." —Assemb. Jour., 21st sess., 6-7. See Mr 30.

26 "New Theatre, opposite the Park.—This immense pile, we are informed, is to be opened on Monday the 2d [error for 29th] instant. It will be the most commodious, as well as the most elegant Theatre in America. . . ." —N. T. Gen. & Gen. Adv., Ja 5, 1798. See Ja 19.

27 "Those Ladies and Gentlemen who wish to bid an Adieu To the John-Street Theatre, Are respectfully informed this is the Last Night of ever performing at that Establishment. A Comedy, interspersed with songs, called, The Connoisseur: Or, He would be a Philosopher. To which will be added, A Musical Butlerra, called, The Tragedy of Tragedies, with the Life and Death of Tom Thumb the Great."—Weekly Museum, Ja 13, 1798. There is some doubt as to what finally happened to the John Street Theatre. Smith, N. F. in 1796, 167, says it was demolished in the following year, and Wilson's Hist. of the City of N. Y., IV: 469, states that it was converted into a carriage factory. In 1845, the site was occupied by Grant Thornbur's seed-store.—Thornburn's Reminiscences (1845), 168. On April 16, 1921, the site was marked by a tablet.—N. T. Times, Apr 17, 1921.

28 On reading a report of the commissioners of the almshouse, the common council approves the draft of a petition to the legislature, asking relief from "the heavy burthen imposed on this City in the maintenance & support of Emigrant Poorers who have gained no legal settlement in any particular Place." The board also orders that the report be printed in handbills to be sent to the legislature with the petition.—M. C. G. (1784-1831), III: 416. Geo Forman did the printing for £4.—Ibid., II: 419. Of the similar situation on Feb. 1, 1796.

29 The inspectors of the state prison make a report to the legislature. After mentioning the temporary use of the bridewell (see Ap 17, 1797) and the opening of the prison (see N 28, 1797), they state: "Since the State-Prison has been occupied numbers of prisoners have been received from the different counties, and the number now in confinement is, One Hundred and Twenty-Nine, Men and Women.

"The unfinished state of the Prison, prevents the Inspectors from employing the whole of the prisoners at present, a number however are employed at makin shoes, mats, straw-hats, &c.

"The plan of the building appears judicious, and well calculated for the intended purpose, and the Inspectors anticipate the pleasing satisfaction they will derive, when the walls around the premises, the whole-chopped roof, &c., are completed. One hundred prisoners employed at nail-making, spinning, weaving, sawing marble, grinding paint and plaster of Paris, and other useful occupations.

"The diet served daily to the prisoners is, much, made of Indian meal and molasses, for breakfast; soup, from ox heads and beef, with potatoes and rye bread, for dinner; and the same kind of provision for supper as for breakfast. The expence of this diet is, as nearly as can be calculated, six cents per day, for each person, &c.

30 The legislature passes "An Act to encourage the writing a History of this State." It recites that "Samuel Miller of the city of New-York, minister of the Gospel, hath in his memorial to the Legislature, set forth that he is now engaged in collecting materials for a History of the State of New York." Permission is given to him to search the records, etc., in the secretary's office, and to make abstracts, etc., without payment of fees; also the supreme
CHRONOLOGY : THE RECONSTRUCTION PERIOD : 1783-1812 1349

The Committee appointed to superintend the building of a new House, to whose subscribers the House will be opened in the course of the present month [see Ja 22]. They regret very much the necessity that has compelled them to consent to its being exhibited in an imperfect & unfinished state; but circumstances impossible for them to control has rendered it unavoidable. They have made a temporary agreement with the managers of the Old American Company, by which the subscribers will, for the present, be entitled to an uncompensated right of free admission, benefit nights excepted."—Daily Adv., Ja 19, 1798.

Gov. Jay lays before the assembly a report from the commissioners of the state prison, and adds, "That the late benevolent alterations in the criminal law of this State [see Mr 26, 1796] may have a fair and full trial, it appears to me indispensable that the State Prison be speedily and completely finished."—Assembly Jour. (1798), 64. In their report the commissioners stated that they needed $73,146 to finish the prison building.—Ibid. (1798), 107. The sum was granted to them by an act of March 30 (q.v.).

The Park Theatre opens with "As You Like It."—Daily Adv., Ja 29, 1798; Brown's Hist. of the N. Y. Stage, I: 11. See also Goodrich, Picture of N. Y. (1858), and descrip. of Pl. 91, III: 577. A newspaper account of the opening states: "The public expectation, which has been long excited, in relation to the New Theatre, was gratified on Monday evening last [Jan. 29], when the dramatic exhibition commenced in it. Immense numbers of people crowded in, on the opening of the doors, and continued to resort to the house, long after the representation had begun. . . . The audience part of the New Theatre is a segment of a large circle—and of course, the spectators, even in the front boxes, are bunched within a very convenient distance, both for seeing and hearing. The Pit is remarkably commodious. The Boxes are disposed in three rows, one side to the other of the stage—the Gallery is thrown back of the upper front boxes. The total omission of pillars, as supports to boxes, avoids a common and great obstacle (in Theaters) to the view—and when the house is filled, presents an unbroken line of spectators, which forms no uninteresting part of the spectacle.

"The stage is remarkably commodious—and no language will give the real magnitude and idea of the scenery, which is universally spoken of as surpassing for elegance and effect, everything of the kind heretofore seen in America."—Spectator, F 3, 1798. Another paper adds: "The house is made to contain about 2000 persons.

"Great credit is due to the Messrs. Mangin, who were the architects of the house, for their skilful and commodious arrangement. Their name be said to Mr. Cunill, as the machinist, and for his taste as scene-painter."—Daily Adv., Ja 31, 1798; Greenleaf's N. Y. Jour., F 3, 1798. At first the theatre was called simply the "New Theatre;" later it became known as the Park. The receipts on the opening night were $1,232.—Junip., Hist. of the Am. Theatre (1851), 216. See F 21.

The common council orders "that the Committee on Schools enquire into the subject & report their Opinion as to the establishing of the School in the Alms House & the African School as free Schools under the Statute for the encouragement of Schools."—M. C. G. (1784-1831), II: 418.

The common council allows the same pay to the "upper Watch" as to the "lower Watch."—M. C. G. (1784-1831), II: 418.

The common council permits Furman Cheseaux "to dig across Cherry Street for the launching of a Vessel." This is on condition that he "do without delay put the Street in the same Condition that he found it."—M. C. G. (1784-1831), II: 418.

Richmond Hill is the scene of a daring robbery, amounting to $5,000, during which Mrs. Grenville Temple is present.—Columbia Sentinel (Boston), F 7, 1798. See also ibid., Ja 24, 1798. Mrs. Temple was the daughter-in-law of the British consul-general.—Prime, Some Account of the Temple Family, II: 260.

"Stuart's full-length portrait of Washington delivering his farewell address to congress is exhibited by Gardiner Baker at the "New City Tavern, Broadway." (see Ja 24, 1793)—Daily Adv., F 3, 1798. For Alex. Anderson's opinion of it, see F 6.

Feb.

The common council provides for having the lamps lighted 24 nights in a month, instead of 21 nights as heretofore.—M. C. G. (1784-1831), II: 419.

This morning I went to the Tontine Tavern and regaled myself with a view of Mr. Bakers painting of Genl Washington, by Stuart—allowed to be a masterpiece."—Alex. Anderson's Diary, 1798 (MS.), 21.

"A Proposal of Jonathan Hunt to supply the City with fresh Water" is read in common council and referred to the committee on that subject.—M. C. G. (1784-1831), II: 420.

"The common council permits William King for 12 days to place in the Fields "his Timber for the Frame of a House."—M. C. G. (1784-1831), II: 420. Permits to use space in streets and other public places, for storing building materials during the erection of buildings, were granted as exceptions to city ordinances against street incumbrances, which were enforced even in colonial times. On Feb. 19, likewise, Geo. Gosman was permitted to place in Cortlandt St. bricks for a house he intended to build there.—Ibid., II: 424. It was not permitted, however, to lay timber in the streets in front of any of the public slips.—Ibid., II: 440.

In a petition to the legislature, approved on this day for presentation, the common council states that, "as well for the Ornament & Improvement of the City as for the encouragement of the Trade and commerce of the State and the Safety of Shipping at the Wharves of this City," the petitioners "have lately directed [see Ap 7, 1795; F 10, 1796] a permanent Street of seventy feet wide to be laid out and completed [South St. and West St.] at and on the extremity of their Grants already made and hereafter to be made to Individuals . . . South and West of which Streets no buildings of any description are to be permitted to be erected, so that Vessels lying at the Wharves may be secured from Fires.

"That by reason of the curving and otherwise irregular State of the Shore at low Water Mark in the East and North Rivers, at the time of the making of the Grants by the predecessors of your Petitioners, a General Map of which, if ever made, cannot now be found, the Grants heretofore made are deemed to extend to unequal Distances into both Rivers, which occasions difficulties in making Orders for Vessels at both Ebb and Flood in both Rivers to wash away all Ditt and Flitch from the Wharflyes and thereby render the health of the Inhabitants of the City more safe and secure: but Doubts have also arisen whether Your Petitioners can compel any of the proprietors of the Lots fronting thereon and who may be unwilling to make those Streets for public Use, in any given reasonable time to be appointed by the Common Council.

"And Your Petitioners further shew that part of their plan aforesaid was to extend piers at right Angles from the said permanent Streets into the Rivers, at proper distances from each other to be determined by the Corporation with suitable Bridges for the Accommodation of Sea Vessels, and so constructed as to admit of the same at both Ebb and Flood in both Rivers to wash away all Ditt and Flitch from the Wharflyes and thereby render the health of the Inhabitants of the City more safe and secure: but Doubts have also arisen whether Your Petitioners can compel the individual proprietors of the Wharves to sink and lay out those piers; or if they shall refuse, whether Your Petitioners will be authorized to sink and build those piers at the Expanse of the City and receive the Wharfage without incurring a Breach of the Conditions and Covenants contained in their Grants to Individuals.

They therefore ask that the legislature "will confer such power and authority to your petitioners as shall be proper to remove the difficulties and Doubts above stated . . ."—M. C. G. (1784-1831), II: 420-21. A law to the desired effect was passed on April 3 (q.v.). See also Ja 10, 1794.

The common council receives a petition from Isaac Man for "payment of a quantity of Pine Logs procured on a Contract with the Corporation in the year 1775 [see N 8, 1774] for Pipes of the Work to lead Fresh Water through the streets." This is referred to a committee.—M. C. G. (1784-1831), II: 423. Man petitioned again on Feb. 25, 1799 (q.v.).

"The common council refers to the street committee a petition of the inhabitants of Roosevelt Street "for an alteration in the Regulation of Chatham Street to lead [carry off?] the Water at the Tea Water Pump."—M. C. G. (1784-1831), II: 423.

The common council orders "that the Company of the fire
THE ICONOGRAPHY OF MANHATTAN ISLAND

1798. Engine No. 15 at the City Hall take Charge of the new Engine Feb.
19 House at the City Hall, ... "—M. C. C. (1784-1831), II: 424.
21 The members of the committee appointed to build the New Theatre report that they have spent all the money subscribed and that they are still in debt to the amount of $68,000. "The waste, mixture and mismanagement in erecting this building are perhaps unexampled."—Dunlap, Hist. of Am. Theatre (1832), 321. See F 27.
22 Washington's birthday is celebrated by a federal salute and a "grand" ball at the Tontine Assembly Room. "Mr. Barker exhibited the immemorial portrait of this great man [see F 1]. ... The museum was handsomely illuminated."—N. Y. Gaz. & Gen. Adv., F 21, 1798; Spectator, F 24, 1798.
26 The common council orders "that the Clerk advertise for receiving Proposals to rent Bell Vue Hospital for one Year from the 1st April next; on Condition that if the whole or any part of the Buildings or Land should in the course of the Year be wanted as an Hospital or Lazaretto, the same or such part thereof as may be required to be immediately surrendered up."—M. C. C. (1784-1831), II: 425. See, further, Mr 12.
27 "The Committee appointed to make reports of the best mode for extricating the affairs of the New Theatre from their present embarrassments [see F 21]; request the attendance of all persons concerned, at the Tontine Coffee House, at 12 o'clock, on Friday next, to receive and consider of said report.

It is expected that universal and punctual attendance will then be given, as the concerns of the Theatre have come to a crisis which admit of no further delay."—N. Y. Gaz. & Gen. Adv., Mr 1, 1798.

Mar.
28 "A Subscriber" writes to the printers of one of the newspapers:

2 "I have, for a long time past, heard our Corporation have received several proposals, and plans, for supplying our city with Water through the streets, by works, etc. But as I have heard nothing of late, about it, I conclude they have given it up—I pay for Ten Water Only about Six Pounds Per Annum; which, I think a great tax for one small family; for I am of opinion, that such works were erected (which there is no difficulty in doing) and each house was taxed, from two to six pounds per year, calculating 4000 houses in the city, it would produce forty thousand dollars per annum, which, in my opinion, would, in a very few years, pay for All the possible expenses such an undertaking would amount to, as well as do that body of City Guardians much honor—and preserve the city from the great danger of fire, etc."—N. Y. Gaz. & Gen. Adv., Mr 2, 1798. See S 4.
12 Following the order to advertise for proposals (see F 26), the clerk presents to the board "sealed Proposals from George Shonnard, Palmer & Charlotte Cannon for the New Theatre and Belle Vue Hospital & Land." Before opening them, the board determines "that it should not be let for the purpose of keeping a public House." On opening them, it appears "that Shonnard offered £30—Palmer £50 & Johnson £50." These proposals are referred to the land committee, "to enquire into," and to ascertain if the writers intend "to use it as a public House." It is ordered that the committee "dispose of it in such manner as best to answer the Purposes for which the Place was purchased."—M. C. C. (1784-1831), II: 426.
Shonnard's letter (dated F 26 and preserved in metal file No. 16, city clerk's record-room) states that he understands "the occupier of the Belle Vue may be removed," nevertheless he applies "for the House, knowing then unto belonging". He asks withdrawal, and re-entent for, and "whether the Corporation would keep it as an Hospital in case of the malignant Fever raging in the City again; or to let it as an Inn," for which purpose he believes "the Belle Vue formerly was kept." He offers to lease it for one or more years. See, however, Ap 2.
20 The legislature passes "An Act to incorporate the Firemen of the City of New-York." The object is "the more effectually to enable them to provide adequate funds, for the relief of disabled and indigent firemen, and for the purpose of extinguishing fires." Their corporate name is to be the "Fire Department of the City of New-York," and the incorporation is to extend until the first Tuesday in April, 1818.—Laws of N. Y. (1798), chap. 40 (Webster, Illis, 1801); Costello, Our Firemen, 59.
23 The United Insurance Company, which was founded in 1795 or early in 1796, is incorporated, with a capital of $300,000. The charter allows it to insure against fire as well as marine risks. This was the first marine insurance company founded after the Revolu-
tion, the first one being in 1759, and the next in 1779.—Progress of N. Y. in a Century, by Stevens (1876), 423; Laws of N. Y. (1798), chap. 41. See Mr 23, 1798.

The legislature incorporates the "Mutual Assurance Company of the City of New York."—Laws of N. Y. (1798), chap. 46. The common council orders "that it be recommended to the Proprietors of Water Lots between Coenties Slip & Catharine Slip to cause the new street of seventy feet in breadth called South Street & lately laid out on the East River to be made in front of their respective Water Lots by the first day of January next." The order to these proprietors requires that the water lots be filled "with good wholesome Earth [so as to prevent their being recep-
ticles for Filth or Dirt of any kind."—From the original order in metal file No. 17, city clerk's record-room; M. C. C. (1784-1831), II: 428.

The state legislature repeals the act passed on March 19, 1787, (g.v.), granting and securing to John Fitch the sole right and advantage of making and employing the steam boat by him lately invented;" and grants similar privileges to Robert R. Livingston for 20 years, providing he builds within 12 months a steamboat that will move at the rate of at least 4 miles an hour, and that he "at no time omit for the space of one year to have a boat of such construction plying between the cities of New-York and Albany."—Laws of N. Y. (1798), chap. 55.

The legislature passes "An Act to provide amendments and alterations in the Criminal Law of this State, and for erecting State Prisons." This new law states more specifically the powers of the courts in respect to imprisonment in the state prison for certain offences, the various officials authorised to visit the prison, the powers of the inspectors, etc. It also appropriates a further sum of $71,346 for finishing the prison.—Laws of N. Y. (1798), chap. 36.

The legislature passes "An Act to provide for the relief of persons and places infected with infectious and pestilential Diseases." Three persons are to be appointed commissioners of the health office at the city of New-York, who shall make rules for cleaning the streets, etc. Nuisances, ill factors which are offensive to health, are to be removed if found harmful, by warrant of the mayor or recorder directed to the sheriff, on the representation of the commissioners. Vessels, in certain cases, are subject to quarantine. The duties of commanders and pilots of the health officer of the port, are defined. Moneys are appropriated for repairing the buildings for the reception of the sick on Bedlow's Island.—Laws of N. Y. (1798), chap. 65.

The legislature passes an act appropriating a sum not exceeding $3,000 for the erection of a "proper building sufficient to secure and preserve the field artillery and small arms belonging to this state, and to be placed in the city of New-York."—Laws of N. Y. (1798), chap. 68. See, further, II 9 and Ap 10.

A tragedy in five acts by William Dunlap, entitled "André," is performed by the Old American Company, at the New (Park) Theatre.—N. Y. Gaz. & Gen. Adv., Mr 30, 1798. It was published this year by T. & J. Swords, N. Y.

The Tablet and Weekly Advertiser becomes the Tablet. The April last issue found is that of June 25, 1798.—Brigham, A. A. S. Proc. (1817), 499. See 0 25, 1797.

The legislature incorporates the "New York Insurance Company," in which are associated Archibald Gracie and others, to carry on the business of "maritime insurance," and insurance upon "houses, goods and lives."—Laws of N. Y. (1798), chap. 71.

In a letter to the common council, the commissioners of the health office show "that if Government should proceed to complete the Fortifications on Bedlow's Island & more especially if Troops should be placed there in the course of the ensuing Summer it will in their Opinion become improper to continue the Lazaretto there." They ask if the board "will indulge them with the use of Belle Vue which appears to them to be the only proper Place they at present know of to accommodate the Sick from Sea and such from the City as may be attacked with pestilential or infectious disorders for the ensuing Summer." The board decides that the commissioners "may have the use of Belle Vue for the purpose aforesaid."—M. C. C. (1784-1831), III: 419.

Messrs. Pearsall, Bowne, and Stillwell, in a petition to the common council, propose "to open a Road through their Land at Bevering Dale to the Commons," and ask "that it may be con-
tinued through the Commons." The board determines "that on the Petitioners laying out a Road of sixty feet in breadth through
their Land this B^4 will continue it through the Common Lands."

—M. C. G. (1784-1811), II: 429.

2 The common council rejects a petition of the English Lutheran Church "to purchase or Lease the Piece of Ground on Magazine Street wherein the old Powder House has stood,"—M. C. G. (1784-1811), II: 429. For the new powder-house, see Jl 3, 1797.

3 Pres. Adams transmits to congress the "X Y Z dispatches" from France. —Annals of Cong. (1797-99), 3322-32. These relate to an attempt by certain Frenchmen to exact a private "douverce" from the American people who sought to negotiate a treaty with the French directory. —McMaster, II: 368-69. See also: France at War.

4 The legislature passes "An Act concerning certain Streets, Wharfs and Piers, and the Almns-House and Bridewell in the City of New York."

"It makes it lawful for the common council to lay out and extend streets and wharves adjoining the rivers to the width of seventy feet. This would "conduce to the improvement and health of the said city, as well as to the safety of such ships or vessels as may be employed in the trade and commerce thereof."

These streets and wharfs shall be made "at the expense of the proprietors of land adjoining or nearest to the said streets or wharfs, in proportion to the breadth of their several lots."

Such proprietors "shall also fill up and level at their own expense . . . the spaces lying between their said several lots and the said streets and wharves to be filled by the proprietors of said intervening space of ground in fee simple."

The act also gives the common council power to appoint five overseers of the poor, who shall be known as "The Commissioners of the Alms-House and Bridewell."— Laws of N. Y. (1798), chap. 80 (Webster, III: 406). The names of the five commissioners so appointed were made in April 30,—M. C. G. (1784-1811), II: 432-33, 476. See also Jl 11.

5 The city pays Breckholst Livington $580 "in full for Rent of Belle Vue to 1st May next."—M. C. G. (1784-1811), II: 430. See, however, Ap 16.

5 By a vote of 59 to 21, the assembly resolves "That the Comptroller is directed to require and required to lease from year to year until other Legislative provision be made in the premises, upon the best terms he can get for the same, the house belonging to the people of this State called the Government House, situate in the city of New-York, with its appurtenances." The resolution had been passed by the senate.—Assembl. Jour. (1798), 321-24. This did not become a law. See, instead, Ap 25; also My 2 and 5.

6 The legislature passes "An Act regulating the future meetings of the Legislature." It provides that the legislature shall convene each year on the last Tuesday of January, at Albany, unless some other place is designated by the governor's proclamation, or unless the legislature shall designate some other place.—Laws of N. Y. (1798), chap. 104 (Webster, III: 426).

7 The opinion of Messrs [Alexande] Hamilton and Harrison with respect to the Possibility and Mode of forming a distinct Corporation for Saint Mark's Church" (see N 14, 1796) is read by Trinity vestry.

It is resolved "That the said Church be so far finished as to be fitted for the Celebration of Divine Service, viz., the lower Part of the Church the Front of the Gallery to be finished and the Floor of the Gallery rough laid and that the Committee for building St. Mark's be authorized to require on what Terms the said Church can be so far finished by Contract . . . ."—Trin. Min. (M.S.).

16 The common council orders "that the Treasurer provide for the payment of [to] Breckholst Livington the consideration Money viz.$1500 for Belle Vue" (see S 10, 1794; N 3, 1795; S 5, 1796).—M. C. G. (1784-1811), II: 431. See, further, Ap 23.

16 The common council orders "that the Street in front of the Bridewell & where the Almns House formerly stood [see Je 10, 1797] be assigned as a Place for exposing Horses for sale at public Auction And that an Ordinance be prepared prohibiting the same in any other place in this City except in the seventh Ward."

—M. C. G. (1784-1811), II: 431. Such rules were already prohibited, by ordinance, in Wall St.—See My 23, 1796; Mr 28, 1804.

16 The common council orders "that the City Surveyor shall release to the common council a piece of their ground on which the new watch-house at Chatham Sq. has been erected (see D 19, 1796), the board permits the society to extend the south line of their land at the head of Chatham Sq.—M. C. G. (1784-1831), II: 431.

In view of the unsettled state of international relations, a committee of the Chamber of Commerce, consisting of William Nelson, Ebenezer Stevens, and John Delelfield, presents a memorial to the common council "representing the defenceless State of this City against the Attacks of a few inferior Vessels of War," and praying for "an indemnification of this Board to the amount of about 4000 Dollars for defraying the expense of providing & mounting on field Carriages 18 or 20 heavy Cannon.

For £4,000, Breckholst Livingston conveys to the city the 7½ of ground, containing 9 acres around the front of the Manor of Bellevue estate.—Liber Deeds CDLI: 24 (M. C. G. (1784-1811), II: 433-34. See Ap 1, 1793; and L. M. R. K., III: 953 ("Bellevue Hospital"). This conveyance included the north-west corner of the present Ave. and 24th St., which, added to land already owned by charter grant, comprised the area afterwards used for a corporation storage-yard. This area was further increased under the Laws of N. Y. (1807), chap. 115.—Prendergast, Record of Real Estate (1914), giving liber of conveyances. See also Ap 16.

Nicholas Governor and others release to the city "a certain Street at Corlears Hook." The common council accepts it, and orders that it be called Governor St.—M. C. G. (1784-1811), II: 434. In view of the resolution of July 13, 1799 (q.v.), it became necessary, on March 24, to confirm the purchase of Governor St. by a new resolution.—Ibid.: 416.

Peter Augustus Jay, writing from New York to his father, 16 Gov. Jay, describes a meeting on this evening of a society for free debate, in which a lively discussion occurred between Democrats and Federalists on the question: "Is it most expedient under existing Circumstances to lay an Embargo, or to arm our Vessels in abundance of our carrying trade?" It was carried in favour of the former, and a committee was appointed, consisting of Mr. Corine, Col. Morton, Mr. Everson, Col. Stevens, and Mr. Hoffman, "to form an Address from the Meeting to the President and Congress of the U. S. approving of the Measures which have been pursued with respect to France and expressing a determination to support the same." He expects, from this, that the whole Federal ticket will be carried in this city at the coming state election. In a letter of May 6, he described another meeting as very disorderly, although "Many of our most respectable people were present," in which the Democrats attempted to pass "a Vote of Censure on those proceedings" of April 26. He added: "Bets to a great Amount have been laid on your Election at the odds of ten to one in your favor" (ibid., III: 717-18), and finally by an act suspending commercial intercourse with the French Republic (see Je 13).

On considering the Chamber of Commerce memorial of April 23 (q.v.), the common council resolves that the governor be requested "to make an Application to the President of the United States for sixteen long eighteen Pouders of those now at West Point mounted upon travelling Carriages or as many of them as can be spared with the proper Apparatus & Ammunition to be used in the Defence of this City, if necessary, until other competent Provision shall be made for that purpose either by the United States or the Legislature of this State . . . ."—M. C. G. (1784-1831), II: 435-36, 439.

The board also orders that the mayor issue his warrant on the treasurer to pay Col. Stevens $4,000 on account "towards providing proper Timber for Carriages & other Apparatus for the said Carriages in case the same should be necessary."—Ibid., II: 436. See, further, Je 13.

The common council grants the use of the Bowling Green in
front of the government house to John Rogers on condition that
he keep it in good order and allow "no creatures to run on it."—
M. C. G. (1784-1813), II: 436. See Je 12, 1799.

The common council appoints a committee "to direct a Survey
to be made of the Ground which it will be proper to assign as
Liberties of the Goal."—M. C. G. (1784-1813), II: 436-37. The
original bill of Jos. F. Mangin for making a survey of the jail
"liberties," when an alteration in their boundaries became neces-
sary on digging for the foundation of the city hall, in 1802, is on
file in the record-room, dept. of finance, Hall of Records.

The common council orders that stone be procured "to secure
the outside of the Battery," and that persons be employed "to
collect those lying on the South side."—M. C. G. (1784-1813),
II: 437. See also My 13, 1799.

Judge Henry Brockholst Livingston, having written a humor-
ous political slant in the Argus, was assaulted on the Battery by
one "Jimmy" Jones, and in a duel which resulted Jones was killed.
—Hunt, Life of Edw. Livingston; see also Argus, My 12, 1798.

1 Jacques Madeleine Joseph Delacroix occupies, under a 7-year
lease at $1,000 a year (Libert Deeds, LIII: 417), the Bayard mansion
and grounds near Booker's Hill (see 1732), forming the block now
included between Grand, Broome, Crosby, and Lafayette Sts.
He establishes here another pleasure resort, and calls it Vauxhall
Gardens; this is to be opened to the public on May 7—Daily Adv.,
My 4, 1798.

He already occupied a "Vauxhall" at 112 Broadway (see F
22, 1797), which he and his sons for several years continued to
keep, as well as the up-town garden. The city directories show
that the Bayard property was occupied by Delacroix as Vauxhall
until 1805. Although by 1805 he had established a third Vauxhall,
at Fourth Ave. and Astor Pl. See J. M. R. K., III: 945 (Bayard
mansion); and ibid., III: 981 (the several Vauxhalls); also,

After opening his new "Vauxhall Garden" on the Bayard
estate, he advertised that, four times a week, there would be
"Harmonical Music;" but that, "In case of uncertain weather,
the music will attend at his House, No. 112, Broadway."—N. Y.

Meanwhile, his place at 112 Broadway was probably open
only part of the time; for, on May 25, Delacroix's two sons, Louis
and Joseph, Jr., advertised that they would open it on July 30,
and be its managers.—Daily Adv., JI 25, 1798. See Js 9, 1799.

2 "It is reported (but we hope without foundation) that the
superb edifice lately occupied by the Governor of this state is Let,
& is soon to be converted into a tavern! / I Good God."—Spectator,
My 2, 1798. See My 5.

"The American Pantheon, or, Peale's Collection of Portraits
of American Patriots, will be exhibited, for a few days only at
no. 126 Broadway, corner of Cedar street, and nearly opposite the

"Mr. Peale's advertisement refers to "two public discourses"
(on moral questions) on Sunday, May 6, at "the French Theatre
in Greenwich street."—Time Piece, My 4, 1798. This was Ricketts'
 circus-building.—See O 17, 1798. For E. Palmer. —See Je 26, 1798.

John Avery (see My 2) advertises that he "has removed to
that superb mansion, next the Battery, known by the name of the
Government House, which is opened as a Boarding House."—

Joseph Corre opens the Columbian Garden, a place of resort
and refreshment, situated near the junction of State and Pearl
Sts., "adjoining his house facing the Battery."—Daily Adv.,
My 5, 1798; Ap 27, 1799; Com. Adv., JI 4, 1799. As shown by
the city directories, the place was discontinued about 1810.

The common council orders that cells be made "for the confine-
ment of disorderly Persons in the Alms House."—M. C. G. (1784-
1813), II: 439.

The common council permits William Allen "to occupy the
Gun Powder Magazine" at a reasonable rental.—M. C. G. (1784-
1813), II: 439.

The new Presbyterian church at the corner of Henry and East
Rutgers Sts. (see Je 23, 1795; Je 13, 1797) is opened for wor-
ship.—Com. Adv., My 12, 1798. It was a frame building, 86
by 64 ft.—Greeneal, Hist. of the Churches in N. Y., 132; Miller,
Memoir of Rev. John Rodgers, 268. This was the fourth church
of this denomination erected in New-York.—Goodrich, The Picture
of N. Y. (1828), 219. See further, My 24, 1799.

The common council permits Joseph Corre "to make a Gate to
May 14

fence of the Battery in State Street opposite to his Garder,
leaving the one in front of his House to remain."—M. C. G. (1784-
1813), II: 439.

An advertisement reads: "Richmond Hill, formerly Abraham
Mortier's adjoining the City, will be Let for one or more years,
and immediate possession given; any quantity of land from one
to one hundred acres may be had with the premises. Furniture
suited to the house will be let with it or sold to the tenant. The
garden is in complete order and great forwardness; the ice house
well filled."—Com. Adv., My 17, 1798. In the following year
(see My 22, 1799), Richmond Hill was again advertised for lease.

Cornelius Smock and Elizabeth Frances advertise that "they
have opened a House of Entertainment at No. 12 Water Street,
... (Mrs. Frances having followed that business for many years...
during the life time of her late husband Samuel Frances)."—N. Y.
Gen. & Gen. Adv., My 17, 1798. See also descp. of Pl. 1674, HIS: 850.

John Avery announces that "The Elizian Boarding and Lodge-
ing House, known by the name of the Government House, near
the Battery, New York, Is now open for the reception of Ladies

The common council permits the Society of Friends "to brow
State Street and Pearl Street opposite to their mansion, to prevent
interruption from the Noise of Carriages during their General
Meeting; on Condition that they afterwards remove it & clean the
street."—M. C. G. (1784-1813), II: 442, 547, 716. The original petition of May 20, 1799, is filed in the city clerk's
record-room (file No. 18).

It is reported to the common council that someone has "sunk
a Wharf at Corlear's Hook at the Place contemplated to be reserved
as a public Bassoe or Ship."—M. C. G. (1784-1813), II: 442.

The common council appoints a committee to work in conjunc-
tion with Col. Stevens "to attend to the Measures that have already
been taken or which it may be proper to take for the
Defence of the City & Harbor of New York." (see Ap 30 and 30),
and to report to the board as occasion may require.—M. C. G.
(1784-1813), II: 443, Je 15, 1798.

The common council permits Anthony L. Bleeker and others
to sink a well, at their own expense, "in the Broad Way nearly
two Miles from the City Hall."—M. C. G. (1784-1813), II: 444.

In this month, congress passed three acts relative to aliens.—
Jooe Acts of Congress. These alien laws and the sedition laws of July
(p. 8) together created a ferment of opposition.

The Battery is being used as a military drill-ground, for the
training of young men, three days a week, from 5 to 8 o'clock,
p.m.—Com. Adv., Je 2, 1798.

A patent spiral side-wheel is in use "at the Saw-Mill at Corlear's
Hook, on the East River, owned by Messrs. Hallet and others.
Their mechanism is described in an advertisement offering it for sale.

A daily paper, the New-Yorker from New York, writes from
Philadelphia to Gov. Jay: "The bill for prohibiting all intercourse
with France is now before us, and will probably pass." He reviews
the military strength of the United States, adding: "The spirit
of the people of New York seems to be exerting itself for the
safety of the City. I have sent to Col. Hamilton Baron Steuben's
ideas on the subject and also have given them to Mr. McHenry,
who is to go to New York next week, and fortunately is in posses-
sion of certain plans and maps, made by a Mr. Smith, and approved
by Montressor and a board of engineers, intended to point out the
proper place and the best method of fortifying the harbour of New

Jay replied on June 25: "In my opinion it would be both just
and proper to declare the treaty with France to be void, but I
think it would be more advisable to direct replenish that we declare
war at present, for the public mind does not appear to me to be
quite prepared for it. ... Should it be the case, the Jacobin
leaders will continue to persuade their deluded followers that the
Government is chargeable not only with participation, but with
a desire to prevent an accommodation; which they affect to believe
probable not only from the treating of our Envoy's, etc., etc.
"When the mass of our people are convinced that war would
be just, necessary and unavoidable, they will be content that it
should be declared, and will support it vigorously. ..."—Ibid.,
IV: 244. For the action of congress, see Je 13.
1798

The semi-circular brick building, two storeys high, in the yard of the new jail, used for workshops for prisoners, is burned. Here "almost every trade and business" had been carried on during the year since the building was erected. Each criminal "was forced to live in the first story. It is the common council's wish that the place be turned into a public kitchen where the criminals may be obliged to pick oaks." The nails produced here sold for about $500 a week. The fire was supposed to have been started by prisoners igniting the moss and curled hair stored in the garret.

12 The "New York Grenadiers," commanded by Capt. Duryee, one of the oldest companies in the state, advertises for recruits to enroll for service until the end of the summer. This is a common council, citizens of martial character and grenadier size—5 ft. 9 in. to 6 ft. 4 in. in height—are wanted. The call says: "At a crisis like the present, when the political horizon of our country is dark and gloomy, and war seems inevitable, it becomes the duty of every member of society, who professes to have the welfare of his country at heart, and is able to bear arms, to step forward with alacrity, and learn to use them for their country's good."—N. Y. Gaz. & Gen. Adv., Je 12, 1798.

B. Isherwood advertises the opening, on this evening, of "Ranelagh [error for Ranelagh] Garden, near the Battery (late known by Vauxhall)," where he will have a "band of vocal & instrumental music."—N. Y. Gaz. & Gen. Adv., Je 12, 1798.

13 B. Isherwood again advertised the place with certain improvements, and with a concert in the garden, which will be "handsomely lighted with variegated lamps."—N. Y. Gaz. & Gen. Adv., Je 12, 1798. But, on June 11, 1799, Isherwood again advertised the place with certain improvements, and with a concert in the garden, which will be "handsomely lighted with variegated lamps."—N. Y. Gaz. & Gen. Adv., Je 12, 1798.

Congress suspends all commercial intercourse between France and the United States—Laws of U. S., 5th cong., chap. 70. See Je 28 and Jl 7.

A subscription paper is being circulated among New York merchants, "and considerable sums of money are already subscribed, which are intended to be applied to the purchase, arming and equipping of several vessels, to cruise on our coasts for the protection of commerce."—Speech, No. 76, cited by Ford in Jour. of Hugh Gaine, Ii: 199.

A joint meeting of several committees—one of the officers of "the late Army & Navy of the United States," one from the Chamber of Commerce, and one from each ward of the city—having been held in the city hall on June 8, and a resolution having been passed that application be made to the common council to incorporate a Croton for obtaining a Loan of fifty thousand Dollars to be applied toward the Defence of this Port and City, in confidence that the same will be reimbursement by the General Government, or provided for by the Legislature of this State," the board now resolves to add an amount not exceeding $50,000 for this object." And that an Application shall be made to Congress and, if necessary, to the State Legislature for the Reimbursement thereof." The board appoints a committee to direct the expenditures of this sum in conjunction with such persons as may be appointed by the several committees. The $1,000 already advanced for this purpose (see Ap 30) is to be considered as part of the $50,000—M. C. C. (1784-1831), II: 446-47. A certified copy of this resolution is preserved in metal file No. 17, city clerk's recordroom. See Jl 31 and descript. of Pl. 56, I: 429. See, further, Je 25 and Ap 31.

The common council agrees to a committee report prescribing the duties of the street commissioners. One of these is to "see that the Gutters are bottomed with hard Brick or cut Stone."—M. C. C. (1784-1831), II: 448. See Ap 3.

Marlting's Tavern (see Je 3, 1796) becomes the meeting-place of the "New York Patriot Blues," attached to the First Regiment.—N. Y. Gaz. & Gen. Adv., Je 16, 1798. In 1809, there was a military meeting at Marlting's to form an Artillery Company.—N. Y. Gaz. & Gen. Adv., Je 18, 1807.

"A Letter from the Mayor & Aldermen of Philadelphia recommending Mr. [Chas. Wilson] Peale's new con[structed] & improved fire Places as highly beneficial," is read in the common council. The board orders that the Committee on Repairs direct an experiment to be made on six of the fire Places in the Alms House.—M. C. C. (1784-1831), II: 431. That is, the old ones are to be altered. See the original draft of which, on June 10, to metal file No. 16, city clerk's recordroom. See, further, D 7.

The common council passes an ordinance extending to May 1, 1799, the time within which South St., "lately laid out on the East River from Counties Slip to the old Slip" (see Ap 7, 1795; Jl 18, 1796; F 12, 1798), is to be completed, and the water lots filled up "out to the said Street."—M. C. C. (1784-1831), II: 451. The common council resolves on (June 11) to provide a sum not exceeding $50,000 "towards the erection of Works & providing Cannon & military Stores for the defense of this City & Harbor," now authorizes Ald. Furman, one of the committee then appointed, to draw $10,000 from the Bank of New York, to be applied to that purpose.—M. C. C. (1784-1831), II: 452. The same amount was ordered to be drawn for the same purpose on July 11, Aug. 20, Sept. 10, Oct. 2, and Dec. 31.—Ibid., II: 458, 462, 467, 475, 491. This made a total of $60,000. Regarding the city's reimbursement, see Ja 21, 1799.

"Great preparations for War."—Jour. of Hugh Gaine, Ii: 199. Work is begun "on the Battery near the Flag Staff."—Jour. of Hugh Gaine, II: 199. See Jl 5.

A regulation for fortifying the Battery (see Ap 23 and 30). Regret is expressed at this destruction of "the finest walk in the world," but the undertaking is "to save our liberties and to save the world."—Ibid., II: 452-53. See, further, Ag 10, D 31.

The common council orders "that one of the City Watchmen be stationed to guard the Laboratory at the Battery."—M. C. C. (1784-1831), II: 453. On July 23, it was ordered that a watchman be placed "at Col. Stevens' Laboratory."—Ibid., II: 457. See, further, Je 30, 1797.

"On reading a Petition of a number of Inhabitants in the Bowery Lane complaining of the Dangerous Practice of running or racing Horses in the public Road or Highway," the common council passes an ordinance against this practice "in any public Street or Road within this city."—M. C. C. (1784-1831), II: 453-54. See also Ag 30, 1798.

Work is begun on the fortifications (see Je 28).—N. Y. Gaz. & Gen. Adv., Je 30, 1798. See, further, Jl 27.

Congress passes an act defining treason, and to punish sedition. July

Regarding the effect of the alien and sedition laws, see Winor, VII: 252, 269, 334; McMaster, Vol. II.

Dr. Joseph Browne (see D 8, 1796) addresses to the corporation of the city a "Memoir on the utility and means of furnishing the City with Water from the river Bronx." In this he sets forth the city's imperative need of fresh water, the manner in which the principal European cities are supplied, and the inadequacy of all the sources on Manhattan Island, including the Collect Pond. After praising the quality of the water of the Bronx, he explains how the river could be diverted from its course and "thrown into Haerlem river, at about 8 miles distant from the City-Hall," and then continues: "let us suppose it now at Morrisania, and emptying itself into Haerlem River, out of the little creek that divides the land of Colonel Lewis Morris, from that of Mr. Governor Morris; it will then be about 40 feet below the height of the Park, in front of the Goal, &c.—it will therefore become necessary to elevate it at least as high as this spot; probably it might be still better to give it a greater elevation, (for instance) as high as the cemetery land in the vicinity of the Dodge, about five miles from town, which is about 40 feet above the Park, or 80 feet from high water mark." With much detail Browne next proves that the power of the Bronx itself "may be made use of, as the only agent
THE ICONOGRAPHY OF MANHATTAN ISLAND

1798

Requisite to deliver at a reservoir near the Dove, all the water necessary for the daily consumption of New York. From the reservoir at the Dove, a pipe of conduit of six inches diameter, will be requisite to deliver the water to a principal reservoir in, or near the City." He estimates the expense to be about $200,000.—

Proc. of the Corporation of N. Y. on Supplying the City with Pure and wholesome Water: With a Memoir of Joseph Brexton, M.D. on the same subject (printed by John Furman, N. Y., 1799).

This appears to be the first suggestion that New York City should be supplied with water from a source off Manhattan Island. For the common council's action on this "Memoir," see D 17.

4

Plans are formed for celebrating the "Fourth" with parades, a review of "D'Alilly's ground," an exhibition in St. Paul's Church, etc. N. Y. Gaz. & Gen. Adv., Je 8 and Jl 4, 1798. The city's expenses for the celebration, paid on July 16, were $120 for 8 Cask Gun Powder and £74 for "the Sextons ringing the Bells."—M. C. (1784-1851), III: 457. The public dinner was served this year by Edw. Bardin, whose hill amounted to £397—ibid., II: 464.

The Society of the Cincinnati, after holding a business meeting at "Federal-Hall," adjourns to Belvedere House to celebrate "the Anniversary of American Independence." Many patriotic toasts are drunk.—Spectator, Jl 7, 1798.

John Delacroix advertised that, on the Fourth of July, there would be "Grand Fireworks in the evening, accompanied by Several Transparent Paintings executed by Mr. Snyder" at his Vauxhall Garden, near Bunker's Hill (see My 1). He provided "two neat Carriages," which would "ply between his house, No. 112 Broadway [see F 22, 1797], and his Garden, at one shilling each person."—N. Y. Gaz. & Gen. Adv., Je 25 and 29, 1798. The last fireworks of the season there were advertised to be held on Aug. 2, having been postponed from July 27 "on account of the arrival of the president, which retained a great number of citizens in town."—Daily Adv., Jl 25, 1798. See, also Jl 4, 1799.

Corre holds a "Grand Concert," and exhibits his "Transparent Paintings."—Am. Museum, Jl 2, 1800. See My 14, 1800; Ag 12, 1801. Transparent paintings have been mentioned heretofore, when shown in front of the John St. Theatre (see Jl 4, 1796), and when displayed at Washington's inauguration (see Ap 30, 1789).

For an explanation of the art, see Jl 4, 1807, where the only authoritative work on the subject, published in that year, is cited.

5

"The intended fortifications on the battery of New-York are begun. The plan and extent of them are not particularly known."—Genius of Liberty (Morristown, N. J.), Jl 3, 1798. See, however, Jl 27, Jl 21.

As "the treaties concluded between the United States and France have been repeatedly violated on the part of the French government; and the just claims of the United States for reparation of the injuries committed have been refused, and their attempts to negotiate an amicable adjustment of all complaints between the two nations, have been repelled with indignity: and whereas, under authority of the French government, there is yet pursued against the United States, a system of predatory violence, infringing the said treaties, and hostile to the rights of a free and independent nation," congress declares the treaties no longer binding on the United States.—Laws of U. S., 5th cong., chap. 84.

9

The defence committee represented the purpose of the common council "that a bill to erect a Building on [see Mr 30] for the deposit of Artillery with its Apparatus," and, on examination, thinks "the Triangular Piece of Ground lying on the North East side of the Gaol and bounded by the Gaol Fence, Chatham Street & Tryon Row, to be the most proper for the purpose." The board determines that this ground "may be laid out for the; Bjopoe therefore leaving the Street along Tryon Row at least forty feet wide."—M. C. (1784-1851), III: 455. For further history of this site, see L. M. R. K., III: 923.

16

Congress adjourns, to meet on the first Monday in Dec., the day fixed by the constitution for the annual meeting. An account of the transactions of the session just closed, regarding the relations between the United States and France, is contained in an open letter, dated at Phila., July 23, written by Robt. G. Harper, a delegate from So. Carolina, to his constituents, and pub'd as a pamphlet in Phila., in Aug. It is entitled, Jl 18, 1798. Account of the Principal Proceedings of Congress, in the late session, and a sketch of the state of affairs between the U. S. and France in July 1798: . . . It reviews briefly the casus belli, the naval and financial situation in the U. S., and conditions in France. An earlier account of this sort was written by Harper at greater length in May, 1797, entitled Observations on the Dispute between the U. S. and France. . . .

17

To the 3d ed. of this was reprinted for circulation in Ireland, and bears a Dublin imprint.

"We hear the new troop of horse under Colonel Giles has assumed the name of the 'Washington troop.' They have their regular periods of meeting for exercise, at 5 in the morning: and from the emulation that prevails among them, it is expected their evolutions and movements will in no shape be inferior to the elegance and martial appearance of their dress. Altho many of the gentlemen composing this troop are foreigners of ample fortunes, they are determined, if necessary, in common with native citizens, to defend the country and its laws with their lives."—The worthy commander of this inimitable troop has the honor to know his duty; and while he unites in his character as well the prudence as the bravery of a soldier, it cannot fail to inspire his subordinates with respect and confidence."—Spectator, Jl 21, 1798.

A political anniversary is the cause of local disturbances in New York. On the evening of July 21, there was "some Confusion at the House of Comm. Nicholson where Mr. Gallatin lodged; also at the House where Mr. Lyon, a Member from Vermont (of Congress) [lodged] likewise at Mr. Edward Livingston's Dwelling."—Jour. of Hugh Gaine, II: 200. This led to the following protest, sent by "A Committee of the Sixth Ward" to Mr. Greenleaf: "A number of 'unemployed,' would be soldiers,' who, from their behavior, is presumed, received a billingsgate education, preambulate [sic] the streets from 10 o'clock till midnight, vociferating God save the King, Hail Columbia, &c, using epithets and expressions which would disgrace a Porcupine—damning Livingston for a Jacobin, Democrat, Frenchman, &c, with several other phrases too indecent for publication. Those who desire to indicate that the friends of order and good government are cautioned to refrain from offering any further insults to the Representatives of the People; their parents, masters, and guardians, are responsible for their conduct, for should any serious consequences ensue from a repetition of the nefarious proceedings of this nocturnal banditti, they, and they only, are accountable."—Mr. Edward Livingston, the true and faithful friend of liberty, and the upright guardian of the public weal, has several thousand friends in this city, a number of whom have fought for the independence and liberty of this country, while the parsons of the majority of this dastardly Fry, were basking in the sunshine of Royal favour. The majority of the citizens of New York approve the principles and conduct of Mr. Livingston, and are ready to defend him, if it come to a contest, to the last reptile Tories Faction: . . . Greenleaf's N. Y. Jour., Jl 25, 1798.

An open letter is written to Col. Elhoezer Stevens, "Chief Engineer of the works on New York Island," urging that floating batteries and gunboats be built. Without them, the writer thinks, "any works whatever would not be competent to secure that part of the city exposed to the Bay." He suggests where they might be placed to advantage.—Com. Adv., Ag 17, 1798. See also Mr 19, 1807.

The building of fortifications (see Jl 3) progresses rapidly.—Jour. of Hugh Gaine, II: 200.

". . . in the Evening on the Battery there was a little Confusion about Cockades."—Jour. of Hugh Gaine, II: 101. See Jl 27.

Pres. Adams comes to New York from Philadelphia on his way to Britain, Mexico. His start was from New York. John C. Hughes met him at Powles Hook, and escorted him across the river in the custom-house barge. A boat from the British frigate "La Topaz" was also sent to accompany him, and the frigate fired a
July 27

1798

salute when he embarked. "After landing, the President was joined by a large number of civil and military officers. The several military corps, under command of Col. Morton, . . . moved from Courtland street down Broadway, when federal salutes were fired from the Battery and Governor's Island. The President and officers followed in the rear of the troops, and were greeted with incessant acclamations of joy from the sidewalks, windows, and even house tops. He walked uncovered, and bowed politely to the numerous spectators . . . the simplicity of his dress and equipage is no inconsiderable evidence of those "spur republican virtues for which he has always been so deservedly celebrated." The President retired to his son's house in Beaver street, where all the troops passed to review before him, and thence passed up Broadway to Trinity Church and were there dismissed. The bells of Trinity were rung for a considerable time."—Russell's Gaz. (Boston), Ag 6; T. G. & Gen. Ado., Jl 28, 1798.

"The citizens of New York are exercising themselves to raise fortifications on the Battery. Although the work was started only a few days ago (see Jl 28 and 30), "strong ramparts of protection and defence, are in great forwardness—heavy cannon have been brought to the city, and, in a few days, will show their terrific muskets from their intended situation."—T. G. & Gen. Ado., Jl 27, 1798.

See Ag 24.

In the evening, five young Americans, including Pres. Adams's secretary, Samuel Malcolm, while walking on the Battery, were attacked by ruffians. The published report of this incident, which brings American and French patriotic sentiment into conflict, shows the spirit of the times: "Animated by the presence of our illustrious President, who had that day entered the city, under the display of our flags, and the thunder of our cannon, amidst the glitter of swords, a host of British houriotes, and the shouts and acclamations of assembled thousands, they were singing, as was very common throughout the town, the Federal song—"Hail Columbia." A much larger number of boatmen and low fellows, from the wharves and docks, immediately collected; and, instigated by the deluding demon of French Jacobinism, and no doubt by some of its mad or corrupted votaries, here approached our young men and dispersed them—driving them—leading them—accompanying them—acclamations and countrysides the infamous French song "Ca Ira!" Heavens, what a contrast! How honorable to those who wore the badge of Americanism—How degrading and traitorous in the others. Both parties quickly met each other, and it was not long before the alien crew, conscious of their superior numbers, began the dastardly attack, and first insulted, and then beat and bruised them in a most shameful manner. Mr. Samuel Malcolm, one of the young men, seemed to be particularly singled out as the object of their infernal hatred. It was aslaid if he was the secretary to the President, and on being answered in the affirmative, three or four ruffians grabbed him, and altho' he defended himself with great courage, yet he received considerable injury. . . .

The next evening, "the young men who wore the cockade" (the "heathen crew") came to a body in a any attack that should be made on the mark [the cockade] they had assumed to evince their disposition to support our government against the insolence, perfidy, ambition and rapacity of France.

A large number of opposite opinion collected; no attack, however, was made, or insult given.—Claypole's Ado. (Philas.), Ag 1, 1798.

Pres. Adams, "his Lady," and niece, leave New York, and go to "the rest of his son-in-law Col. Smith," in Westchester, where he is to remain a few days on his way to Braintree, Mass. He is escorted by the "Washington troop, commanded by Col. Giles," and accompanied in carriages by Maj.-Gen. Clarkson, Brig.-Gen. Hughes, and others.—Porcupine's Gaz. (Phila.), Jl 31, 1798; Alex. Anderson's Diary, 1798 (M.), 98.

E. H. Smith, M.D., in a letter to Dr. Cogswell of Hartford, dated Sept. 2, 1798, said:

"As early as the last of July, some cases of fever occurred at Contoocook, Exchange Slip, More [Moore] Street, & that vicinity. The complaint was principally, if not entirely confined there. I do not know how many sickened or died: perhaps 40 of the first & 40 the last: not more.

As the heat was declining at the south end, & while it had excited no alarm, the disease suddenly appeared at New Slip, at the other end of the City. This was still more circumstantial, affecting only a few houses (not more than 10) near a very filthy spot, which has been more or less visited by fever every year since my residence in N. York . . . ( . . . I do not suppose that the whole number up to this time exceeds 35) nine died. The rest removed, & the houses were mostly deserted.

An occasional very little alarm, and that little was rapidly subsiding, when federal salutes were fired, when several very respectable citizens, were suddenly, & nearly at the same time, seized with fever, on the west side of Pearl St. above Burling Slip, up John St. as far as Wall St. & in Elbow lane (now Cliff St.) & in Gold St. . . .

"In about a week several deaths had happened, & the alarm began. It is now scarcely a fortnight since the first of these last cases happened. Within the last week the greater part of Pearl St. from Wall to Cherry Sts. & the eastern part of the town, has been evacuated. This is certainly disproportionate to the cause. Of the extent of that cause it is difficult to pronounce decisively.

"If, however, I say that 600 people have been & are sick, & about one in ten have died, I imagine that I quite equal, & perhaps exceed the truth. . . . The desertion of that part of the town, which is most affected, renders the number of new cases comparatively small. . . ."—From the original letter, filed with "Miscellaneous MSS." in the N. Y. H. S. See also The Spectator, Jl 7, 1798; and An Account of the Malignant Fever, lately present in the City of New York, by James Hardie (1799).

An interesting drawing of "Haerlem Town" was made at this time by Archibald Robertson, and is now in the Emmet collection, N. Y. P. Libr. Library. This drawing shows the third Dutch church, which was built in 1788 and demolished in 1824. The drawing is reproduced and described in Vol. I, Pl. 60-b.

The common council refers to the committee on fortifications a proposal of Wm. Child "to provide reflecting Telescopes to discern Shipping at a great distance."—M. C. C. (1784-1831), Jl 7, 1798.

The common council permits George Pock to "make a passage from the river, under Cherry Street to draw Timber &c for the building of a Ship of War in his Yard," on his agreeing to restore the street and wharf in good order as soon as the ship is launched.—M. C. C. (1784-1831), II: 460.

In a message to the legislature, Gov. Jay says that he finds it inexpedient to build a useful arsenial for the $3000 appropriated at the last session (see Mr 30), and that it does not appear advisable to begin one "on a plan that would require a larger sum, under an expectation that further and further appropriations would be made to carry it on and finish it."—Messages from the Governor, II: 425.

. . . three ships of war are building at New York—a 44, a 36, and a 32, in various stages of forwardness.—From Boston correspondence in The Commonwealth of (Newark), Ag 21, 1798.

One of the city physicians complains to Mayor Varick of the vender of fruits and vegetables who "Make a Custom, When the Butcher is Gon, to Move in [the Bear or Hudson] Market with their Coffee & Frute, and by that Means Collect Numbers of Edo, Drunks, & Durtv Men Seating and Lying on the Stalls, So that the Butchers with Difficulty Can Scarcely make them Even Look Deaseat, as the Hursters, more or less of them, Stays until 9 or 10 O'clock at night, & their Frute Draws Larg Ganges of unruly Boys, Disturbing the Peaceable Inhabitants."—De Voc. Market Book, 222-23.

On Aug. 20, the common council ordered the deputy clerks of the market to "cause all the Hucksters & Vendors of Fruit & Vegetables to be removed from the public Market Places & Streets adjacent at Sun Set every Day except Vendors of Vegetables on Saturday."—M. C. C. (1784-1831), II: 462-63.

The health commissioners notify the common council that the Swamp or Meadow between the fresh water Pond & Hudson River is overflowed with standing Water & requires immediate Measures to be taken for draining it." The board so ordered.—M. C. C. (1784-1831), II: 462. On Nov. 5, payment of $50118 was made "for opening the Drain at Lisipards Swamp."—Ibid., II: 478.

Mr. Brearceis is erecting a "very extensive building" at the corner of Warren St. and Broadway, "for the sole purpose of military exercise." The undertaking has been aided by the "Washington Military Society."—T. G. & Gen. Ado., Ag 22, 1798.

The volunteer companies are ordered to hold themselves in readiness "to march at a minute's notice." In the evening there is "some Confusion" at the old Coffee House between Mr. . . .
cannon had by this time been placed on the Battery, as is evidenced by a recorded recent attempt to spike one of them. It is recommended that guards be posted every night to protect the cannon and fortifications.—N. Y. Gaz. & Gen. Adv., Aug. 24, 1798. See N. 8.

25. "This said, at least 10 People died this Day, and that the City grows very Sickly."—Jour. of Hugh Gaine, II: 201.

26. "It becomes very sickly especially in John Street and Cliff Street and several have been taken off lately."—Alex. Anderson's Diary, 1798 (N.Y.), 114.

The legislature passes an act "for the further Defence of this State." It states that the "fortifications already constructed in the city of New-York and its vicinity, are still greatly inadequate to the defence of the said city and its port. The sum of $150,000 is appropriated for completing fortifications, to be expended under the direction of the president. The sum of $185,000 is appropriated for the purchase of arms, etc., and for building an arsenal (see Mr. 30).—Laws of N. Y. (1798), chap. 5 (Webster, 436). See, further, S. 26.

The common council orders that the "Sedan & Bedstead at the City Hall, & the public Hearse" be placed at the disposal of the commissioners of health.—M. G. C. (1784-1831), II: 464.

Gov. Jay writes from Monticello to Governor Gaine, recommending military arrangements at New York. (Hamilton has lately been appointed inspector-general of the U. S. Army with the rank of major-general.) He says, in part: "... The rifle corps and a few of the new light-infantry companies are established. ... The defence of the port, etc., in my opinion, should be under your direction. The measures will be concerted between us. ..."—Corresp. and Pub. Papers of John Jay, IV: 249. In a letter to Pres. Adams on Sept. 26 (p. 92), Jay recommended such an arrangement relative to the use of public funds for the city's defence.—Ibid., IV: 241.

"The Town full of Trouble. People moving out very fast."—Jour. of Hugh Gaine, II: 204.

Sept. 1 to the City Tavern on Broadway.—Spectator, S. 1, 1798. It remained here until its occupancy of the government house, May 1, 1799 (q.v.).

... about the beginning of August, upwards of twenty persons between counties and the Old Slip, were attacked with what appeared to be common cobra; about the 12th, a number of persons in the neighborhood of the New Slip died, but at present [Sept. 3] there appears to be no cause for alarm in that quarter. ..." This account, taken from the "postscript" of the N. Y. Gaz. of Sept. 3, mentions other places also, and the causes of the yellow fever at this period.—Porcupine Gaz. (Phila.), S. 4, 1798.

The common council receives and files a report from the health commissioners "of the number of Death's & of Persons sick with the prevailing Fever at Belle Vue." It advances $200 toward the relief of indigent families who are or shall become distressed during the present prevailing sickness.—M. G. C. (1784-1831), II: 466.

The common council passes an ordinance for the first paving of South St, from Exchange Slip to Counties Slips.—M. G. C. (1784-1831), II: 466. See, however, Ap 29, 1799.

Avery assures the public that there is "No yellow fever at the Gov't House."—N. Y. Gaz. & Gen. Adv., S. 4, 1798.

The following appears in a daily paper under the heading "Machinery for getting clean cool uncontaminated Water into New-York."—The New-Yorkers are like the rich man told of in the Parable, they have no clean cool water to slack their thirst, when the flames of the plague are devouring their vitals. Yet they pretend their city-water is very pure and nice. It is no such thing. The Collect behind the Tea-water Pump is a shocking hole, where all impure things center together and engender the worst of unwholesome productions; foul with excrement, frog-spawn, and reptiles. That delicate pump is supplied. The water has grown worse manifestly within a few years. It is time to look out some other supply, and discontinue the use of a water growing less and less wholesome every day. Some effect to say the water is very cool and refreshing. Every body knows the contrary of this. ... Sept. 5. Can you hear to drink it on Sundays in the Summer time? It is so bad before Monday morning as to be very sickly and nauseating; and the larger the city grows, the worse this evil will be.

Begin therefore in time to provide against the awful and solemn accidents arising from a carelessness on this subject. Already it has been whispered by some vigilant travellers thro' our city, that the New-Yorkers are like the Dog in the Manger, they will not provide aquedects themselves nor let anybody else do it. This is a reproachful saying, and there can be little doubt the public spirit, for which our city is justly celebrated, will shew the required craft upon them is unmerited and unjust.

"Our civil and criminal police is equal to any on the continent. In science and politics New-York affords as eminent characters as any in the land...; and in their contributions to their suffering fellow citizens or distressed strangers, and in their payment of taxes for public purposes, no class of men launch out their money more liberally or freely, than the New-Yorkers. And yet with all this nobleness of character and zeal in doing good, they can reconcile themselves to drink the nasty wash and slops carted about from the Collect:... Take the matter into consideration, and resolve every man for himself, to leave no stone unturned to have this grand object of watering carried thro'. Stick to it, until you do it.—Work every mother's Son, until the noble job is done.—For plague will make a yearly slaughter until you furnish better water.—Then New-York will be as famous as old Rome was, and the other cities may learn from us how to do clean things."—Com. Adv., S. 5, 1798. See also De Voe, Market Book, 268.

The common council appoints a committee to assist the health commissioners "during the present sickness in the City." They are authorized, "to take such Measures for the Relief of the sick & indigent and to employ such Persons under them in the execution of the Business and also to direct such Physicians to attend the indigent sick as to them shall appear necessary & proper & to make the necessary arrangements with the Health Commissioners with respect to the admission of sick Persons at Belle Vue Hospital." The common council will defray all expenses incurred by the committee.—M. G. C. (1784-1831), II: 468. The expenses of the committee, prior to Dec. 3, amounted to $4,600; on that date a payment of $1,599:81 was authorized "for Bell's of their Acre."—Ibid., II: 469, 470, 471, 476, 483.

Sometime between this date and Nov. 13, the Diary and Mercantile Advertiser (see Mr. 20, 1797) became simply the Mercantile Advertiser.—Brigham, A. A. S. Proc. (1917), 408. Cf. Early Newspapers, II: 419.

The yellow fever "now rages, in different degrees, at Newport—Portsmouth—Portland—Portland—Newport—New-London—New-York—Philadelphia—and, reports state, that some of the most elevated places in the most southern part of this country. We hear no more about the sickness in Albany—It is on the decline at Boston."—N. Y. Spectator, S. 19, 1798. A writer in the same issue of the Spectator, who subscribes himself "Theorist," treats at length of the causes of yellow fever, as he conceives them. His treatise begins thus: "This dreadful disease baffles all our skill and ingenuity; reason cannot discover its principles, nor account for its operations, no further proof of our ignorance is necessary than the many and various opinions we have about its origin and cure. And its great mortality under our most skillful Physicians."—Ibid., S. 19, 1798.

Thomas Greenleaf having died (see S. 14), his papers, Argus, Greenleaf's New Daily Advertiser, and Greenleaf's New York Journal & Patriotic Register, are suspended. The Argus was resumed on Nov. 5 (q. n.), and the Journal on Nov. 7 (q. n.), by Ann Greenleaf.—Brigham, A. A. S. Proc. (1917), 379: 436. Early Newspapers, II: 418, 424.

Dr. S. L. Mitchell writes from New York to Noah Webster: "New York this time has got a plague indeed. The Scourge is applied severely and cuts deep. I am satisfied more if possible than ever of its local origin. Nobody now talks of importation. It is to be met two from all sides to be a hitherto pestilence. The Inhabitants have really poisoned their City by the accumulation of Excrement, putrid Provisions, and every unclean thing. There is besides this however certainly another cause which is
1798
Sept. 17

The predisposition to this Disease induced by gross Animal Diet and long use of strong malt liquors, Wines and distilled Spirits.

I have witnessed so many Instances of it, that I am satisfied, if some of our citizens breathed an Air as pure and balmy as the breezes of Eden, they would endanger this Sickness by their way of Life. They would breed it within them. To get the better of these Visitations will therefore require more than municipal Regulations. An alteration and a considerable one too, of Housekeeping and modes of Life will be necessary.

The daily reports you see in the Advertiser. Three of the Papers have stated, that during the same days as the Large Cunzine, whose death was published some time before it actually happened; he died however about 8 or 9 hours after the paragraph appeared, of Dr Scandella, the Italian Traveller, who was taken sick the day before his intended departure for Europe. He lodged at the Tontine Coffee-House. The Keeper finding him sick was about to send him away when Dr E. H. Smith entered on a Visit of friendship. He took him home, where he yesterday died, notwithstanding all the assiduities of friendship and the utmost exertion of our professional Skill, of Peter M'Dougall; John H. Remsen & John B. Jones. The French escape as usual, and I believe the Negroes have a slighter form of it. Poor Smith is sick himself. He was moved from Pine St last night to Mr Seth Johnson, very uns well—He has been much fatigued. I hope to find him better to-morning."

(Dr. Smith died of the fever two days later, an obituary appearing in the Sept. 22 issue of the Spectator.)—Letter of Dr. S. L. Mitchell to Noah Webster, among Noah Webster MSS., in N. Y. P. L. Dr. Mitchell was a professor in Columbia College and, under date of Nov. 4, 1797, had written to Dr. James Haworth, "Radelforish Traveling Physician from the University of Oxford," emphasizing the value of lime as a purifying agent. In the middle of English, where calcium earth abounds the population is healthy, fairly free from plague and if they arebest by pestility the mortality is very low. In the county of Perth in Scotland the age used to abound but a lucky accident led to the discovery of the efficacy of lime on that soil not only in increased productiveness of the land but also in "greater pro -portion of the air," the age of plague. In America the analogy follows. "The site of New-York is a sandy loam, or gravel, except that part where the plaque has usually prevailed hitherto, which is built upon salt meadow, mire swamp, and rotten trash. There are local causes enough to engender the worst forms of distemper, as happened at the famous asizes in Oxford, where the filth, accumulated around the wretched criminals in prison, generated pestilential matter enough to poison and a considerable number of the court and attendants."—Medical Repository, Vol. II, No. 1, Article X. Perhaps it was Dr. Mitchell who subscribed himself "A Physician" to a Communication appearing in the Spectator of Sept. 22. The writer says: "We are sorry to say that many of the streets are particularly offensive at this moment; that the water stagnating in many of them, is highly putrid—examine its color, it is the bilious and of a lancinating, affording every moment a poisonous vapor, which preys on the vital spark of all who are exposed to its atmosphere. Would it not be practicable to have the gutters in our streets frequently strewed with a sufficient quantity of quick lime? This, we presume, would be a powerful source of destruction to the contagion."

-Chronology: The Reconstruction Period: 1783-1812

"In consequence of the continuance, and we are sorry to say, increase, of the prevailing Epidemic," the Spectator announces: "We are under the necessity of printing but a sheet.—"

N. Y. Spectator, Sept. 22, 1798.

Gov. Jay writes to Pres. Adams, with reference to the law of Aug. 27 (p. v.), which appropriates not more than $150,000 towards the defence of the city and port of New York, to be expended under the direction of the president, that he has "lately obtained on loan 100,000 dollars of the above-mentioned sum," and submits to the president "whether, as Major General Hamilton [see Ag 30] is a national officer in whom great confidence may be reposed, it would not be expedient to authorize him to concert with me the plan of laying out this money to the best advantage and to appoint him to superintend the execution of it. I think it would be best that I should leave the money in the Bank of New York, and appoint a proper person to audit and keep the accounts of the expenditures directed from time to time by General Hamilton relative to the works, and pay them as they become due by checks on the bank."—Gorrep. and Pub. Papers of John Jay, IV: 250.

"The inmates of the debtors' jail issue an address to the public." At a time when a "mortal contagion" is raging and when "the destroying angel hovers over the city, with his sword unsheathed, and a pestilence walks in darkness and at noonday, leveling all the victims of men, beg leave to address the city and to the spreading miseries of our unhappy and deplorable situation, not doubting but we shall meet that humanity and attention of which the citizens of New-York are on all occasions, so liberal. Confined within the walls of an unhealthy and loathsome prison—deprived of the necessities of life—our wives and children daily falling victims to the epidemic or starving for want of our aid—The fever already among us, which in some instances, has proved mortal, and threatens instant death to all—The principal part of our Creditors and Attorneys dispersed thro' the country—The Sheriff's office shut, and all public business at an end; and We left alone to starve or die with the yellow fever—are calamities which we presume calls loudly on humanity for relief!"—N. Y. Spectator, Sept. 26, 1798.

Bellevue has been enlarged to accommodate the numerous yellow fever patients. The newspapers have frequently referred to the hot and wet summer and bad drainage as the probable causes.

"In connection with the epidemic of yellow fever, Noah Webster contributes to the Spectator an article on pestilential diseases. He lays down the general principles that "Pestilential diseases of all kinds usually originate where they spring," that "pestilence is a progressive in their malignity, and several of them usually follow in a series or order;" there are certain periods when the diseases "invade whole quarters of the globe nearly at the same time, and sometimes both hemispheres;" and the duration of these periods "is various, from five to ten, fifteen and even twenty years."

After tracing the history of the yellow fever scourges in America, Yellow fever patients. The newspapers have frequently referred to the hot and wet summer and bad drainage as the probable causes.

"There is nothing new in the horrors of the present plague. The same scenes have happened in every period of a few years, from the days of Homer. . . . The present sickness will subside and soon be forgotten, and men will proceed in the same round of folly and vice. All our habits will continue—and the same practice of piling together buildings, accumulating filth, and destroying fresh air, and preparing in those materials for pestilence, which will continue to assume greater virulence and to prove more destructive to human life, in proportion to the magnitude of our cities. If more wisdom should be exerted in America, it will be a glorious but an unexpected event."—Spectator, Sept. 29,
1798. In 1799, Webster published, in New York, a work entitled: "A brief history of epidemic and pestilential diseases; with the principal phenomena of the physical world, which precede and accompany them, and observations deduced from the facts stated. A testimony to the thoroughness with which he prepared himself for this work is the collection of letters on the subject written to him by eminent physicians from many localities. These are preserved among the Noah Webster MSS. in the N. Y. P. L., and they have been frequently quoted in the Chronology."

There is an alarm-bell in the cupola of the federal hall is apparent from a news report stating that it is rung on this day for a fire.—N. Y. Gaz. & Gen. Advo, O 1, 1798.

Gardiner Baker, proprietor of the New York Museum, dies at Boston.—Daily Advo., O 5, 1798. The museum was continued by Mrs. Baker.—See Mr 11, 1799.

Oct. There are not so many deaths as yesterday, but the sickness still rages. The deaths now are mostly in Butler's and Delancy's Ground.—Jour. of Hugh GAIGE, II: 207.

The common council orders payment of $40 for the relief of indigent families from St. Domingo.—M. C. G. (1784-1831), II: 472. On Nov. 1, $80 was paid for the relief of the "St. Domingo Refugees."—Ibid., II: 478. See, further, Ja 25, 1800.

Trioty, the only church open in the city, contains only about 40 persons. It is hoped the fever is nearly over.—Jour. of Hugh GAIGE, O 20, 1798.

From Aug. 20 to Oct. 30, there were 1,903 deaths in New York, 1,310 being from yellow fever. About 2,400 persons have been dead daily by public and private bounty.—Columbia Centinal (Boston), N 10, 1798.

Nov. There have not been collected during the prevalence of the fever; the city treasury is exhausted; and the watchmen, lamp-lighters, and others, remain unpaid. The common council, therefore, orders that the treasurer negotiate a further loan (of not over $2,000) from the Bank of New York.—M. C. G. (1784-1831), II: 477.

The common council orders that Charles Loss and Jas. C. Lawrence be appointed city surveyors as soon as they become naturalized citizens of the United States.—M. C. G. (1784-1831), II: 477. Loss qualified, and was duly appointed on May 13, 1799 (g. t.).

Ann Greenleaf resumes the publication of her deceased husband's paper, the Argus. Greenleaf's New Daily Advertiser (see S 16).—Early Newspapers, II: 418; Brigham, A. A. S. Proc. (1913), 378.

Publication of Greenleaf's New York Journal & Patriotic Register (see S 16) is resumed by Ann Greenleaf.—Brigham, A. A. S. Proc. (1913), 434. The paper was discontinued with the issue of March 8, 1800 (g. t.).

The guns on the Battery (see Ag 24) are tested with a service charge, under the direction of Col. Stevens.—N. Y. Gaz, & Gen. Advo., N 9, 1798.

Josep de la Croix (or Delacroix), the confectioner and caterer, of the Vauxhall Garden, 111 Broadway, advertises that "the New Circus, now Pantheon," is fitted out "in a very commodious manner; a floor being fixed of the same height as the stage which is at present 100 feet long, and therefore may serve for the representation of dances and concerts, halls, public entertainments, horse and foot, military exercises, as the floor can be removed when necessary. . . . Four large stoves are placed to heat the theatre. . . . Shortly a subscription will be opened on the same plan as the city and junior assembles. . . ." Wines and liquors are to be obtained on the premises.—N. Y. Gaz, & Gen. Advo., N 9, 1798. See also Ag 24.

Sir John Temple, British consul-general to "the Northern States of America," dies at New York.—Columbian Centinal (Boston), N 24, 1798.

The late improvement on the post road thro' West Chester, is an interesting object. The distance from Harlaem to East Chester is shortened 3 or 4 miles by means of the new bridge; but what is of more consequence, the goodness of the new road makes a greater difference. It is without hils or stones, and the finest road in this part of the country. . . ."—Com. Advo., N 19, Nov. 1798.

The Medical Society has appointed a committee to investigate the causes, progress, and probable means of preventing a return of the yellow fever. The common council now does the same.—M. C. G. (1784-1831), II: 481. For the city committee's report, see Ja 24, 1799.

The common council appoints a committee "to obtain from the Representatives of Casimir Th. Gareicck, late one of the City Surveyors [see D 11, 1797] such Maps Minutes & Papers as may be of public Use."—M. C. G. (1784-1831), II: 482. See D 3.

Joseph Delacroix advertises that "the formerly New Circus, now Pantheon," is completed, and will be opened on Nov. 26 (inside of the famous 24th) in commemoration of the birthday of York by the British. "There will be a Concert and Ball . . .; the room is large enough for four sets of country dances; . . . spectators may take possession of the boxes. . . . , and eight small rooms are furnished near the Theatre for the reception of company. . . . The Theatre will represent a view of Broadway, the background of which will be seen transparently; the evacuation of New York: the ancient Fort will fire a salute of 16 guns on the arrival of our well-beloved Washington; the scene will then change. . . . To conclude with a band of warlike music and a discharge of cannon."

Delacroix also proposes, for the winter season, to make "the Pantheon, formerly New Circus," convenient for every sort of public entertainment. Subscriptions are opened to "the Merchants, and Citizens," (laid before the city council), to the number of $1,310. Twelve halls will be given during the season, the members themselves to choose the managers. He proposes a similar subscription for "the Young Gentlemen of this city." He adds that "The Pantheon will often vary in its scenery and decorations."—Daily Advo., N 24, 1798.

For the public celebration on this Evacuation Day, the city paid $160, 31 for gunpowder and $4115 (to Bardin) for the public dinner.—M. C. G. (1784-1831), II: 484.

"We understand that Monday next [D 3, g.t.] is appointed for the re-opening of the New [Park] Theatre, new modled, finished and decorated in a style as superb as it is new, and altogether unparallel'd on this continent. The Company, we are told, forms a mass of varied power and excellence, which when directed by a man who can have no personal bias to sway him from the grand object of affording satisfaction to the public, may be expected to produce as much and as excellent Theatre entertainment as we have at any time experienced. . . . The musical department we are pleased to be informed will be conducted by Mr. Hewit, whose abilities are well known to the public and justly appreciated."—N. Y. Spectator, D 1, 1798.

The New [Park] Theatre, in this City, was opened last evening [D 3] for the entertainment of the public. The decorations which the interior of this edifice has lately received, have rendered it by far the most superb and statly spectacle to which Americans have been hitherto admitted. The dimensions of the hall, the spaciousness and central situation of the stage, the commodious distributions of the seats, the projection of light and the magnificent display of painting and architecture in the casements, the columns and the cupola, are adapted to afford the utmost delight to a judicious spectator.

"The stage is supported by double columns on each side; their pedestals and shafts are painted with uncommon delicacy, and exhibit a vivid resemblance of variegated marble. The base is Arcite and the capital adorned with the foliage of the Corinthian order. The entablature by which they are surmounted, is enriched with sculpture. . . ."

"A continuation of the pedestal, in a semi-diliptical form, constitutes the front of the lower range of boxes, which are sixteen in number. . . ."

"The second tier of boxes are twelve in number, a gallery being substituted in place of the four opposite the stage. . . ."

"Above these, conforming to the area of the Pit, arises a vaulted ceiling or dome. . . . The surface is an azure scene, interspersed with floating clouds, between which celestial forms are visible. In the front, a Medallion of Washington appears, sustained by an Eagle. The bird is grasping the emblems of abundance and is accompanied by Gemini, who suspend their wreaths and garnets, over and around the bust."
An ordinance for the appointment of a Comptroller
Passed September 6, 1802.

1. Be it ordained by the mayor, aldermen and community of the City of New York in Common Council convened, and it is hereby ordained by the authority aforesaid, That a discreet Librarian shall be appointed by this board to be called and known by the name of the Comptroller of the City of New York.

2. And be it further ordained, that it shall be the duty of the said Comptroller to examine and to liquidate all claims, and to audit all accounts against this Corporation in all cases whatever, and to report the same to the board at each subsequent meeting for its order in the premises, and also to countersign all warrants to be drawn on the Chamberlain or Treasurer of the city for the payment of all moneys, directed by the board, and in cases where the Comptroller cannot adjust the same without the interference of the board, he shall examine such claims, and report the facts containing it with his opinion thereon, and to examine, adjust and settle the accounts of all persons indebted to this Corporation, and all other public officers, and others entitled with money or who shall have received any monies for this Corporation, and shall not have accounted for the same as they ought to have done, and to take charge of all the Real Estate of this Corporation.
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1783-1812

Joseph F. Mangin, in a letter to the common council, explains the circumstances of a demand made upon him by "the gentleman charged to make the plan of the Harbour of New York," who wanted from Mr. Mangin "the map of the City," and how he refused, because he was busy in completing the map begun by Mr. Goerck. He says, of the map of the city, that "this is not the plan of the City such as it is, but such as it is to be."—From the original letter, in metal file no. 15, city clerk's record-room.

Mangin's letter refers to a demand made on him "by Mr. Loss the engineer surveyor" for the use of "the unfinished survey & Plan of this City which he and Mr. Goerck, dec'd contrac-toed to make." The city council considered the proposal proper, and directs that Mr. Loss be allowed "the use of the survey and Maps in the clerks office of the water Lots on the East and Hudsons Rivers."—M. C. C. (1784-1831), II: 485. The Goerck-Mangin Plan is reproduced and described as Pl. 70, Vol. I.

The members of the committee appointed "to investigate the Subject of supplying the City of New York with Water" report that they "incline to the Opinion that the Bronx River will afford a copious supply of pure and wholesome Water," and that "They incline also to think that the Plan suggested by Doctor Joseph Brown [see Jl 2] for conveying the Waters of that River, is with some few variations, the most eligible that can be adopted." They suggest "that Mr. Weston who has been the Engineer for the several Companies in this State and whose design is well known, be requested to examine that River with the situation of the Grounds to be employed in the Aqueduct and... to report his Opinion to the Corporation with the requisite Plans & Esti-mates." The members also report that they are persuaded that "the Undertaking ought to be pursued by and under the Control of the Corporation as the immediate Representatives of the Citizens in general." To effect this they recommend "That an Act be prepared & presented to the Legislature, investing the Corporation with the Powers necessary to effect the great End they have in view and granting them the Monies arising from the Tax upon Sales at Auction in the said City with such further Aid as the Legislature may think proper to enable them... to defray the expenses incident to the Undertaking." After drawing the report the common council orders that the mayor write to Mr. Weston (see J a 17, 1799) and that the recorder prepare the law mentioned (see D 27).—M. C. C. (1784-1831), II: 486-87; King, Memoir of the Croton Aqueduct (1843), 90-91. See also D 24.

Gouverneur Morris returns to New York on his recall from his post as minister to France, and takes "lodging in the Government House;" he was entertained by friends for some days before he retired to his home at Morrisania.—Diary and Letters of Gouverneur Morris (1888), III: 377; Sparks, Life of Morris, I: 476.

The common council orders "that 500 Copies of the Proceedings of this Board [see D 17] together with Doctor Browns Memoir [see Jl 2] on the subject of supplying this City with Water, be printed in Pamphlets."—M. C. C. (1784-1831), II: 489. Payment of £15 for John Furman.—D 24.

The budget of expenses for the city and county of N. Y. to be raised by tax in 1799, if authorised by the legislature, amounts to $190,000.—M. C. C. (1784-1831), II: 488.

Recorder Richard Harrison presents to the board three bills, one "for raising Monies by Tax to defray the public Expenses of this City," another "for amends the Act for the better settlement & support of the Poor," and a third "for supplying this City with pure & wholesome Water" (see D 17). These are approved and ordered to "be delivered to the Representatives of this City & County in the Legislature with a Request under the Common Seal that they obtain the passing of the said Bills into Laws."—M. C. C. (1784-1831), II: 490. See F 25, 1799.

A statement is prepared showing the "Tonnage Employed in the port of New York for the years 1797 & 1798 with a Comparative statement between the 2 years Ending Each the 31st December."

It gives the tonnage by countries, and grand totals.—See miscellaneous "N. Y. City MSS., 1761-1800," in N. Y. H. S.

The report of the committee on fortifications and the military committee shows a total expense, since June 9 (n. s.), of $75,144.56 for building four batteries, and arming and equipping and arming artillery stores, building arsenals, and surveying the harbour. The report is signed by Alexander Hamilton, Ebenezer Stevens, John B. Coles, Gabriel Furman, and John Bogert.—See the original statement of accounts, in metal file no. 15, city clerk's record-room.

1798 Dec.

3

"Over the stage and each range of boxes hangs a canopy of green and gold. This assemblage of splendid and graceful objects is made to strike the eye with uncommon force by means of a glass chandelier, containing sixteen lights, depending from the centre of the dome in the Green Room. It was executed around it. No exertion has been spared to render the illumination of this fairy scene compleat. The number of lights, exclusive of those employed on the stage and in the orchestra, amounts to seventy six.

"The curtain is not unworthy to accompany the rest of the embellishments. It is of blue mohair fringed with gold; in the centre is the lyre of the muse, surrounded with the usual symbols; a riband below. It gives the scene of the theatrical limitation is conveyed in these words:

"'To hold the Mirror up to Nature.'"

"On the whole it may safely be asserted that nothing in America or Europe surpasses the interior of this edifice in the fitness of its arrangement, for the purpose for which it is designed, and in its nature to delight judicious spectators, by the embellishments of painting and architecture."—Com. Adv., D 4, 1798. See D 14. The actual cost of the theatre amounted to more than $719,000.—Brown, Hist. of the N. Y. Stage, I: 12.

The common council refers to the street committee a letter from Mr. Mangin, one of the city surveyors, on "the Subject of the Contract [see D 11, 1797], entered into by him & Mr. Goerck dec'd for Surveying the City Map of this City."—M. C. C. (1784-1813), II: 482-83. See F 4, 1799.

A letter from Nicholas J. Roosevelt (see My 15, 1779) "on the Subject of supplying this City with Water" is read in common council and referred to the committee on that subject.—M. C. C. (1784-1813), II: 483. See D 12.

The common council refers to the health committee a letter from Chan. Wilson Peale (see J 1 23) proposing to sell to this board "his patent Right of erecting Chinnies & fire Places according to his newly invented Plan, within the Limits of this City."—

M. C. C. (1784-1813), II: 483. On Dec. 17, the board agreed to the committee's report that the city take the assignment of the patent and pay Peale $500.—Ibid., II: 485. This amount was paid on Dec. 17.—Ibid., II: 486.

Richard Bayley, the health officer, in a long letter to the common council, gives the history of "the pestilential disease which has lately prevailed in this City." He presents a retrospect of events "which have annually taken place in this city during the warm months since the year 1795." He shows where the yellow fever broke out, the weather conditions, and what ordinances should be in operation to establish cleanliness. From the original letter (reprinted "read & filed Dec. 27th 1798") in metal file No. 15, city clerk's record-room.

During the various changes in name and management of Ricketts's New Circus, Ricketts himself had been on tour. A news item was published Nov. 24 contradicting a report that he had broken his neck in Canada, "in taking his surprising leap over the stage with a hayoynette," and stating that he had arrived in Albany on his way to New York.—Com. Adv., N. 24, 1798. Now he advertises "Ricketts's Circus," which he intends to open on Dec. 6 for the coming season. "Stoves are erected in different parts of the House to render it comfortably warm."—Ibid., D 5, 1798; Daily Adv., D 4, 5, 6, 1798. His advertisement does not appear again, and this is the last record we find of him in New York. His circus in Philadelphia was destroyed by fire Dec. 17, 1799.—Argus, D 23, 1799, citing the Aurora and see Greenwood, The Circus (1800), 90. It was not his New York circus or pantomime (as stated in Vol. I, p. 352) which burned.

The common council receives a letter from Judge Cooper of Onego County "proposing on a Contract to lay Pipes in the Streets to convey Water through this City," and refers it to the "Committee on that Subject."—M. C. C. (1784-1813), II: 484. See D 17.

"Hamlet was last evening [Dec. 14] received at our Theatre with those demonstrations of pleasure which has uniformly attended the representations of it, since the principal character has been in possession of Mr. [Thomas] Cooper..."

"It gives pleasure to the friends of literature to observe the Theatre, this season, takes precedence of all other amusements. We hope every exertion will be made to keep alive the favourable impressions which the late exhibitions have made on the public."—N. Y. Spectator, D 19, 1798. See Mr 20, 1799.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1799

Prior to this year, Watts Street was laid out.—See Pl. 70, Vol. I; L. M. R. K., III: 1013; and Ag 9, 1802.

Prior to this year, Cherry St. was extended to East St. (the river).—Pl. 70, Vol. I. See 1735; My 28, 1790; and 1797; also L. M. R. K., III: 965; Pls. 174, 175, Vol. III.

In this year, the legislature appointed commissioners to procure a new site for quarantine. They selected 30 acres, belonging to St. Andrew’s Church, at what is now Tompkinsville, Staten Island.—Morris, Mem. Hist. of S. I., II: 375.

... They have forced the Hudson back about 200 feet by encasements composed of large trunks of trees, sunk with an enormous weight of stones. On all sides new houses are raising and streets extending. ... The whole number of streets is 137, the principal of which are Front, Water, Pearl, William, Nassau, Greenwich, Wall, Broad street, and Bow Way. Bow Way is the principal street in this city for beauty, it begins at the Batter and runs in a direct line to what is called Sandy Hill, an extent of two miles, crossing 24 streets and 4 lanes. There are now 12 public ships for the accommodation of coasting vessels, 19 Wharves, and 5 Docks for the accommodation of ships of any burden, a navy yard, and a number of private yards for ship building. That part of the city which in 1788 [evidently error for 1778], was buried in ruins [see Ag 3, 1778], is now wholly covered with elegant brick houses. ...

The number of places for public worship, are three for Presbyterian Baptists, one of which has lately received the addition of an excellent chime of bells, four for Baptists, two for Scotch Presbyterians, one for the Associate Presbyterians, three for the Dutch reformed, one for German Calvinists, one for German Lutherans, one for English Lutherans, three for Methodists, one for Quakers, one for French Protestants, one for Universalists, one for Independents, one for Moravians, one for Roman Catholics, and one Synagogue. Besides these, there is the college, 22 acres, New Almshouse, an extensive building, house of Correction ...; there are also three public clocks, as well regulated as any in Europe. The city is accommodated with five markets in different parts which are furnished with a great plenty and variety of provisions in neat and excellent order. ...

except that of Rhode-Island and Portland, in the district of Maine, the harbour of New-York, which admits ships of any burden, is the best in the United States.

“... This city is esteemed the most eligible situation for commerce in the United States. ... But in the staple commodity (flour) Pennsylvania and Maryland have exceeded it—the superfine flour of those States commanding a higher price than that of New-York; not that the quality of the grain in this State is worse, but because greater care is paid in those States to the inspection and manufacture of that article ...

New York is the gayest place in America; the ladies in the richness and brilliancy of their dress, are not surpassed in any part of the city in the United States, not even in Charleston, South-Carolina, which has heretofore been called the center of the beau monde ...

The number of inhabitants in the city and county of New-York, which in 1776 was 10,821 amounts now to above 70,000 ...

Societies for improvement in knowledge or humanity in this state are rapidly increasing; in the city of New-York are the following societies. ‘The society for promoting useful knowledge.’ This society is upon an establishment, but similar to the Philosophical Societies in Europe and America, but it is not incorporated. The members meet once a month. Secondly, ‘The society for the manumission of slaves and protecting such of them as have been or may be liberated.’ This society meets once a quarter. Both of these societies consist of gentlemen of the first character in the city, and of some in other parts of the State. Besides these there is a medical society, a mechanic society, incorporated by law, a society for the relief of poor debtors confined in gaol, a manufacturing society, an agricultural society lately established, of which the members of the legislature are ex officio members, a medical society, a humane society, and a society for the support of a new and beneficial establishment, the lying in hospital, which was lately incorporated by the state legislature ...

The building [the college], which is only one third of the intended structure, consists of an elegant stone edifice, three complete stories high, with four stair cases, twelve apartments in each, a chapel, hall, library, museum, anatomical theatre, and school of experimental philosophy.”—From New and Complete System of Universal Geography, by John Payne (1799), IV: 304-2, 309, 314.

In this year, there were published, in Philadelphia, the legal papers in a subscription bound, at the Rt. Rev. Chas. Inglis, D.D. (formerly rector of Trinity Church, New York, and at this time bishop of Nova Scotia), which claim, in 1798-9, he endeavoured to establish before the commissioners for carrying into effect the 6th article of the “Treaty of Amity, Commerce, and Navigation” between Great Britain and the United States (see N 19, 1794).

In this year, Peter Maverick engraved from a survey and drawing by Goerck & Mangin, city surveyors, an official plan of the city of New York. See Vol. I, Pl. 70.

An interesting water-colour drawing of Broadway and Wall St. made in this year, by John Joseph Holland, showing Trinity Church, the City Hotel, etc., and owned by Trinity Corporation, is reproduced and described in Vol. I, Pl. 68-a.

The common council decides that one commission of streets and roads is sufficient. Their annual salary is fixed at $500 per year.

For sale or to Let, For 6 years, if not sold before February next. That remarkable Lot and large House, No. 112 Broadway, opposite the City Tavern, being 373 feet front and 140 deep with a large stone cistern, a very large ice house, a fine garden of fruit trees, handsome wood, and yards. ...—Daily Ad., Ja 9, 1799.

This was DeLacroix’s “Vaubilh” or “Ice House Garden.” It was not sold by DeLacroix until 1816.—See F 15, 1796; F 22, My 2 and 20, Ja 4, 1797; My 1, 1798; Ag 8, 1799.

Mr. Weston, of Phila., on receiving Mayor Varick’s letter requesting him to investigate the Bronx River as a source for supplying the city with water (see D 17, 1798), informs the common council “that he will repair to this City as soon as possible and engage in the Business.”—M. C. C. (1784-1831), II: 492-3. Weston was in the city on Feb. 1 (q.v.).

The common council permits Dr. Wm. Burrell “to give Lectures in the great Court Room in the City Hall on the subject of Epidemics and Contagion.”—M. C. C. (1784-1831), II: 493.

A rumour that the common council has withdrawn from circular the act as a matter of change, has resulted in the refusal by many citizens to receive them in payment. The board orders that the clerk publish in the newspapers a contradiction of the rumour.—M. C. C. (1784-1831), II: 493.

In their annual report to the legislature, the inspectors of the state prison declare that they have established a "manufactory of shoes;" and that 6a convicts "are employed in the various branches of this business." They report also: "The clothes for the prisoners have this year been all made in the house; and the women prisoners have been employed at sewing, washing, ironing, &c. &c.

The work-shops in the prison-yards being now erected, and the appropriation made last session of the Legislature [see Mr 30, 1798] being supposed sufficient to finish the building, it is hoped in the spring, the prisoners will be mostly employed in shoe and nail making, &c. &c.

In order to carry into effect the humane designs of the Legislature, the prisoners have been treated with humanity, in supplying them with wholesome provisions, clothing, &c. &c. At the same time, rules have been established to promote cleanliness, regularity, industry and sobriety.

A hospital has been established, and a physician appointed, whose duty it is to attend twice every week, and an assistant resides in the prison, who compounds and administers the medicines under the direction of the physician ...

It being generally from ignorance and corrupt manners that crimes proceed, a mitigation of punishment ought to be accompanied by a diffusion of knowledge ...; under these impressions the Inspectors have supplied each prison room with a bible and
school books, by which means many that were quite ignorant on their coming into the prison, are now able to read the scriptures; and the purpose for this to instil in each prisoner at writing and arithmetic; such indulgence however will depend on their own good behaviour.

"The inspectors are of opinion, that the convictions for petit larceny are much increased by the number of petty taverns and grog shops throughout the State, but particularly in the city of New-York; and it is much to be lamented that horse racing, cock fighting, and houses of ill fame are not more effectually suppressed, as they only serve to encourage idleness, gaming, drunkenness and many other vices, that engender smaller crimes, which lead to greater ones. . . ."

-A. Jour. (1799), 83-86.

A news item reads: "The publication, by order of the Common Council of this city, of Dr. Brown's Memoir of the utility and means of furnishing the city with water from the River Bronx [see Jl 2, 1798] is a proof of the candor of that Body, and must meet the approbation of every citizen. The Doctor has written with considerable ingenuity. It is to be wished that he had taken into consideration the effect of the extreme heat and cold to which the works must be exposed—An aqueduct twelve miles in length is liable to twelve times the accidents of an aqueduct of only one mile. It will demand a long time to repair, and it may be that the work permanent a much larger sum than he states; but were it to cost three times as much it must be done."—Com. Adv., Ja 16, 1799. See Ja 18.

"The citizens of New-York, will learn with Satisfaction that an Engineer [William Weston] of great experience and abilities has been sent for by our corporation, in order to ascertain from actual surveys the best means of introducing water from the Hudson river into Brown's river. Should the bed of that stream be found to lie higher than the level of the City, we understand it is the determination of the Corporation to proceed to the important undertaking with as little delay as possible. In a measure that must combine such numberless conveniences, and incalculable benefits, as we in contemplation, we believe every heart that wishes well to the City will cheerfully concure."

—Com. Adv., Ja 18, 1799. For a criticism of the plan to introduce water from the Bronx, see Ja 24.

The common council orders that a memorial, signed and sealed by the mayor, be presented to the legislature "praying that provision be made for repaying the $60,000 provided by this Board towards the fortifications lately erected for the Defence of this City."

-M. C. C. (1784-1811), II: 492. See Je 13 and 25, 1798.

On Oct. 14, 1799, the mayor presented to the common council the state comptroller's warrant on the state treasurer for this amount with interest. —Ibid., II: 577.

"A Letter from John Kortright of Harlem covering a Release of a parcel of Ground purchased by himself & others of Elizabeth W., for the sum of $50 which have diminished in value by the road from the Post Road to Meutte David's Vly on Hudson's River, is read in the common council meeting and referred to the road commissioner. The board directs that the parties be informed "that a Road of less than 60 feet wide cannot be accepted & worked at the public Expenditure."—M. C. C. (1784-1811), II: 494.

On Feb. 4, a letter on the subject from John P. Waldron was read and referred to a committee.—Ibid., II: 579. This road cannot positively be identified. It does not seem to have been opened on these lines; and without doubt one of the streets of the old village of Manhattanville took its place. They were all 60 ft. wide.

The common council, after a hearing, orders to be printed a report submitted by the joint committees of this board, the Chamber of Commerce, the Medical Society, and the commissioners of the health office, who were appointed (see N 19, 1798) "to investigate the causes of the pestilential disease which has lately prevailed in this City, and to suggest the best means to prevent its return." The causes, which are considered at length, were "Deep Damp Cellars and Filthy Sunk Yards," "Unfinished Water Lots," "Public Slips, Sinks and Privies," "Burial Grounds," "Narrow Streets," "Sailor, Drunken House and an Anchor," "Gauging up Made Ground," "Putrid Substances," "Water," and "Tents" (the scarcity of which compelled the poorer inhabitants to stay in the infected parts of the city). For each of these causes suitable corrective measures are recommended.—M. C. C. (1784-1811), II: 494-99.

This report was supplemented on Jan. 28 by an additional report, more in detail, and stronger and more specific in its recommendations. One recommendation was that "All empty carts, hackney coaches, or sleds for hire, standing in any of the streets, squares, or on wharves, south of Pearl and Cherry streets, or the east of Greenwich street, shall . . . be arranged one behind another, five feet distant from the kennels on each side, . . . so as to make foot passengers on the side-walks safe from vicious horses, leaving the middle part of such street, and the kennels free and open for cleaning."

Another was that "No cartman shall ride shavings, litter or straw . . . otherwise than in sheaves or bundles without a tight box of four feet high, and six feet long, . . ."

Another: "The open space between Water street and the head of the Old Slip, is recommended as a proper place for the sale of ship's tackle and materials, earthen ware in crates, hogheads or hulk, and every other place for the sale of those articles at auction."

"Also: In suggesting the means of removing the causes of pestilential diseases, we consider a plentiful supply of fresh water as one of the most powerful; and earnestly recommend that some plan for its introduction into this city, be carried into execution as soon as possible."

The common council thereupon ordered that the recorder prepare a law to be passed by the legislature granting adequate powers to this board to carry the proposed regulations into effect.

—Ibid., II: 590-8, 509. The original draft of the supplemental report, containing 15 folio pages, is preserved in metal file No. 19, city clerk's record-room.

The common council pass L447142 for "an additional Building at the Belle Vue Hospital."—M. C. C. (1784-1811), II: 24

"A Citizen" addresses the following open letter to the city corporation: "Having heard that your honorable body have it in contemplation to supply this city with water, by means of diverting the course of Brown's river, I think it my duty to give all the information . . . respecting said river. The Bronx does not contain a sufficient quantity of water for the supply of this city. From an accurate measurement it is found to contain 38 by 15 inches in the months of July, August, September and October, when the greatest quantity of water will be necessary for supplying the inhabitants, and cleansing the city the river is often found to be below that estimate. This objection will be constantly increased with the growth of the city and its population. . . . In a pamphlet lately published by Dr. Brown, he asserts that the Bronx river has its principal source in a lake to the northward of the White Plains. I allow that it receives some contributions from the above mentioned lake; but do not grant that it has its principal source there.

. . . I have been informed by . . . farmers living on the banks of the Bronx, that the stream twenty and thirty years ago, was almost as large again as it is at present, and if this be true the same causes which have diminished this river hitherto will of course produce the same effect hereafter. . . . The water of this river has no pungent qualities so far as I have been able to learn, but yet it is not used for culinary purposes, by those people who live on its banks, unless it is impossible to obtain spring water. . . . All the water in the Bronx river during the four dreary months in the year will not turn a water wheel of 20 feet diameter and 36 inch bucket, with force sufficient to throw the water 50 feet high, exclusive of furnishing a sufficient quantity for the use of the city. Since the Bronx cannot be brought to this city without pumps and engines, could not the same machinery with greater facility and less expense be erected in the vicinity of the Collick. If the water of the Collick itself is objected to wells sufficiently large might be made near its margin, which will remove that objection."—Daily Adv., Ja 24, 1799. This was answered by a "Bronxite" on Jan. 30 (q.v.).

Chancellor Robert R. Livingston writes from Clement to Thomas Jefferson concerning steam navigation or, as he says: "of an invention with which I have a few days past amused my leisure hours." This was two years before he met Robert Fulton in Paris, when the two became associated, two years after he had constructed a steamboat that was a failure, and one year after he had obtained from the legislature of the state of New York a grant of the right to navigate by steam the waters of the state (see Mr 27, 1798). Fulton's biographer refers to "Chancellor Livingston, who had, by his own experiments, approached as near success as any other person who before Fulton had attempted to navigate
... by Steam."—Clarkson, Biographical Hist. of Clermont or Livingston

Jan. 26

A "Bronxite," answering the letter of Jan. 24 (q. c.) concerning the disadvantages of the Bronx River as a source of water supply, says: "Will the citizen be good enough to inform the Committee within where it was that the accurate measurement of the Bronx was taken, when it turned out to be only 28 by three one half inches? ... Mr. Lorrillard has a snuff mill situated on the Bronx just below where Dr. Brown recommends it to be diverted from its present channel. The Float Boards of his water wheel are five feet in length, the aperture of the pipe, on the same side, five feet to length—the head and fall of water six feet—during the driest year of last summer this mill was able to work twelve hours per day—the water then that fell on this wheel and was discharged below it, was 34 cubical feet per second, which is 62 one half pounds per foot, is equal to 11,457,000 gallons in 12 hours—which is nearly forty times the quantity that is supposed to be necessary for the supply of New York at 250,000 gallons per day.

The Citizen wishes up by recommended the City to be supplied out of that stinking mud-puddle the Collect, or as he calls it the Collic. I would advise him to make a little further alteration in the name, and call it Colic—it will then be descriptive of its effects. ... P. S. Since writing the above I have seen a man who has resided within a few rods of the river Bronx, almost all the days of his life, and now near sixty years of age, he says that he believes the Bronx to be full as copious now as it ever has been in his time—and that he has never heard it observed by his neighbours that it diminishes in quantity."—Daily Adv., Ja 30, 1799.

A Bell of immense size, together with a large Clock of a superior structure [see Ap 11, 1799], has come out per the Cheese

Feb. 4

man, from London, for St. Paul’s Church. The weight of the Bell was understood to be 75 C. The Church steeple is in readiness to receive them, and the citizens may shortly expect to be gratified with a display of their elegance and usefulness."—Com. Adv., Ja 31, 1799. This clock did service until 1917, when it was replaced by a new one.—N. Y. Times, Ap 24, 1917.

Mayor Varick informs the common council that Mr. Weston (see Ja 14) has arrived at New York "to assist this Board with his Opinion & Advice on the subject of supplying this City with wholesome Water." The committee on that subject is thereupon ordered to "wait upon Mr. Weston & communicate to him the Intention of this Board."—M. C. C. (1784-1854), II: 590-91. For Weston’s report, see Mr 14.

On this day, also, a letter from Mr. Mangin "on the supplying of the City with Water" was read and referred to the committee.

Ibid., II: 510.

A payment of $500 is made by the common council to the admin-istrator of the late Casimir Th. Gerck "for his Moeity of the 2nd payment on the Contract to make a Survey & Map of the City."—M. C. C. (1784-1854), II: 510. For further references to the map, see Ap 10.

Wm. Byron advertises for sale the "White Conduit-House, the house adjoining on the north, four vacant lots to the south, and two on the rear to the west." The situation, he describes as "pleasant, airy and healthy, on the height of Broadway."—Daily Adv., Fe 6, 1799. Having failed to secure a purchaser, Byron later offered the houses to let.—Ibid., Jl 30, 1799. The White Conduit House and garden stood at the present 341 Broadway. A tavern had existed here since 1725.—See Mr 27, 1799.

Franklin and Johnson are the equestrian performers now advertised to appear, on Feb. 8, at the "Pantheon, or New Circus," on Greenwich St.—Daily Adv., Fe 7, 1799. On Feb. 19, the advertisement announces: "In the course of the Pantomime, a View of The United States Frigate."—Ibid., Fe 19, 1799. On the same day (p. 2), the building was advertised for sale or rent. Early in April, several addresses were introduced in the programme.—Daily Adv., Mr 30; Com. Adv., Ap 2; N. T. Jour., Ap 3, 1799.

Then tragedies became a feature.—Com. Adv., Ap 20, 1799. On June 4, the old name of "Ricklett’s Circus" was revived.—N. Y. Gaz. & Gen. Adv., Je 4, 1799.

James Fennell was to open it as a summer theatre on June 17, his advertisement stating that "All kinds of refreshments and other amusements will be within the doors of the Pantheon" (Daily Adv., My 25; N. T. Gaz. & Gen. Adv., Je 12, 1799), but the opening was postponed (ibid., Je 18, 1799). Other events are described in Greenwood, The Circus (1909), 98-101. For the last important occurrence this year in the history of this playhouse, see Ag 27, 1799.

Congress passes "An Act further to suspend the Commercial Intercourse between the United States and France, and the De-

Hamilton writes from New York to Gov. Jay: "The survey of this port to the Narrows inclusively has been executed and the expense defrayed out of the funds of the Corporation. But it is interesting to the question of the defence of our port to have a survey of the bay below the Narrows to Sandy Hook. There are sand banks critically situated which merit consideration as proper sites for fortification. Such a survey was made under the direction of the British commanders and a Mr. Hill possesses a draft of that part of the bay. He will not take less for it than 800 dollars; am told the survey of the upper part cost 600 dollars. In proportion, that of the part below will be moderate at 800. ... "—Corresp. and Pub. Papers of John Jay, IV: 254.

A New Yorker writes a long letter to a friend on the subject of the city’s water supply. He says in part: "It seems to be generally allowed, that a greater supply of water is wanted in the city of New-York, than we have hitherto enjoyed, for the common wants of life, and for the purposes of extinguishing fires, and cleansing the streets. ... It appears to be a generally adopted opinion, that we must go to some distant place to acquire this deaderatum; and Bronx river is the present object of investigation. From this source, if practicable, it is expected the city will be supplied with a necessary quantity of water for drinking and culinary purposes." The writer here declares that it will be useless as well as unnecessary to bring the water from the Brons into the city, because it is very unhealthy, and the supply from the Tappan pump is both pure and sufficient for drinking purposes. He then continues: "When the Bronx river was first mentioned, it was generally supposed that the height of its source would enable us to bring it into town, by pipes, or an open canal, without the aid of steam engines; but, it appears now, that they must necessarily be used at Hasen-rem, after the Bronx is brought there—to raise it to a height at two stations, of 80 feet above the level of the River. What a complicated business this will become, should it ever be adopted! The ground near the tea water pump, the vicinity of the white Conduit house, or Bunker’s hill, would give us springs, if wanted, ... but it is not wanted—the inhabitants of New-York have already as much good water as they can use—when the town occupied its site, if one hundred and thirty springs are to supply it, establish two hundred—the spring will never fail us. ... That a copious supply of water is wanted to cleanse the city and extinguish fires, there can be no doubt. The means of acquiring this supply, are plain, simple, and can be put into immediate execution. Sea water is as good for this purpose as fresh; perhaps better. I would advise that a water tower should be erected on the East River, above Corlear's-Hook, and another above the State-Hall, on the North-River, on the plan of the water tower at Somerset Stairs in London. ... Two such structures would supply us with abundance of water."—N. Y. Gaz. & Gen. Adv., F 18, 1799.

The common council orders that as much of the public burying-ground (now Washington Sq.) as may be necessary he fenced with boards, and the rest with posts and rails; also that trees be planted on the grounds.—M. C. C. (1784-1854), 273. On May 15, payment of $287.72 was made "for a Fence & plant'd Trees at the City bury Ground."—Ibid., II: 545. Orders for completing the board fence were given on Ap 7, 1801 (q. v.).

"The New Circus, or Pantheon," situated in Greenwich St., is now offered for sale or to let for six years time, from the 25th March next. "Said Circus may be employed for a play house, hansomcarriage, or assembly room, there being a floor which can be put up and taken down at pleasure; also all sceneries necessary for comedies, tragedies, pantomimes, &c. There are rooms fronting the street in each corner of the house, suitable for families to live in, and having no communication with the other parts of the building. Also a stable that will accommodate twelve horses.

"Daily Adv., Fe 7, 1799.

The history of this playhouse through the rest of this year was marked by frequent changes.—See F 7, and Ag 27. See also a sketch, dated 1799, of the grounds occupied by the "Circus or

Mayor Varick informs the common council "That on Friday last [Feb. 23] Mr. Burr one of the Members from this city in the Assembly of the State together with John Murray Esq[.] as the President of the Chamber of Commerce, Giulian Verplanck Esq[.] as the President of the Office of Discount and Deposit of the Bank of the United States in this City, Peter H. Wendover as the President of the Mechanic Society together with Major General Hamilton and John Broome Esq[.], ... called on him and stated to him in the Presence of the Recorder, ... that great difficulties had arisen in the mind of the Members to permit the Powers of the Board to be vested in this Board, by the Bill for supplying this city with water [see D 27, 1798] and the Bill for investing this Board with adequate Powers in relation to certain objects of importance to the Health of the City; that it was Problematical whether those Bills would Pass in the form Proposed and he therefore submitted the Propriety of this Board requesting the Legislature that if those Bills respectively should not be deemed Proper in the form by the Board, the Legislature should make such Provisions on the several Subjects thereof as to them should appear most eligible.

"That after some Conversation with Mr. Burr and the other Gentlemen accompanying him the Recorder and himself requested that their Propositions might be stated in Writing to be communicated recommending the same. And that the Nature and Circumstances of the Difficulties which have attended the several applications made on the behalf of this Board to the Legislature should also be stated.

"Resolved further that the above Resolution be communicated by Mr. Burr and Major General Hamilton [see F 26] without delay; and as the objects above alluded to are of great importance to the Welfare of the City, the Mayor be requested to call a special Meeting of this Board as soon as he shall receive the proper communications in consequence of the above Resolution."—M. C. C. (1784-1785), II: 314-15.

So far as the minutes disclose, no bill for supplying the city with water had been introduced into either the Senate or the Assembly up to this time.—Senate Journ. (1799), 3: 144; 179; 4: 144; 26, F 26.

Isaac Man again petitions for payment for "a quantity of Pine Logs, furnished the Corporation on a Contract entered into in 1774 [q. v., N 8], for Pipes to supply the City with Water." The members of the common council to whom his former petition was referred (see F 19, 1798), thereupon report "that from the great lapse of Time & the not being able to have recourse to the Board of Accs[.] & Papers which were taken away by Mr. Cramer the then Treasurer of the Corporation who joined the British Army & with them left this Country, they had not been able to obtain satisfactory Evidence of the delivery of the Pine Logs agreeable to the said Contract nor of the payments which probably might have been made to Mr. Man on acct[.] thereof." After hearing this report the board determines that it is 'their Duty as Trustees for the public to leave Mr. Man to substantiate his Demand by a Suit at Law.'—M. C. C. (1784-1785), II: 515.

In reply to Mayor Varick's letter enclosing the resolutions of the common council on Feb. 25 (q. v.), Alexander Hamilton writes: "The Resolutions of the Common Council discover a mistake as to the Characters under which the Gentlemen named in them made their Communication to yourself and the Recorder. They did not pretend to appear in an official Capacity, but intended to be considered merely as private individuals.

"As such they gave information which they thought might be useful to the City. Specific Propositions in Writing were requested from not proposed by them—these were sent in an informal shape, because it was not meant to attach formality to their interposition. Having a previous conversation with the Mayor and myself, I have no objection to authenticate them by my Signature—and I freely add that the changes in the Plan of the Corporation which they suggest have the full concurrence of my Opinion." In his summary of the "Propositions," Hamilton states that in the corporation's plan for supplying the city with water, the expense is to be defrayed by a grant from the legislature of the revenue arising from sales at auction (see D 17, 1798), and that it is very doubtful whether the legislature will grant this," diminished as it is of Revenue, on which it is supposed the Corporation will be relied." He also declares that even if the grant were made, the sum realized would fall far short of the requisite amount, "if the business be done on a Scale sufficiently extensive." As "it will Promote the Convenience of the Citizens and secure the final Success of the object to let in the aid of a Capital to be created by the voluntary contributions of individuals," the suggestion is made that a Company be incorporated of all those who shall subscribe the fund with a Capital not exceeding a Million of Dollars to be composed of Shares of fifty Dollars each, the affairs of which to be managed by seven directors annually chosen by the Subscribers, except that the Recorder of the City for the time being shall always be one." The plan also includes a provision that the city corporation have the privilege of subscribing for any number of shares not exceeding a third, "to enable them to do which a Grant of the Auction duties to continue to be solicited, and a power to be asked to raise on the City an annual revenue equal to the interest and gradual reimbursement of the Principal of such additional Loans as may be found necessary." As a further argument for the incorporation of the company, Hamilton and his associates contend that the Prompt and vigorous execution of the Work would... will be better effected by Commissioners to be appointed for the special Purpose, than by a body whose attention must necessarily be engrossed and distracted by a great multiplicity of other avocations."—M. C. C. (1784-1785), II: 517-19. See F 28.

Alexander Hamilton's letter of Feb. 26 (q. v.) and the plan of having a company supply the city with water instead of its being done by the city corporation are read in common council, and a resolution is passed stating that, "altho' the members of this Board have not been unwilling to subject themselves to great trouble and responsibility from a sense of Duty, yet having no private Motives to wish for any peculiar Agency in this business, they will be perfectly satisfied if the objects in View are pursued in any Way that the Legislature may think proper by which their fellow Citizens may be benefitted in the most easy, safe and effectual Method, and the Charter rights of the City remain inviolate." A copy of this resolution, "together with the Papers and Proceedings of the Board relating to the Subject," is ordered to be sent to "such Members of the Board as are at present in the Legislature."—M. C. C. (1784-1785), II: 520-21. See Mr. 27.

An act of Congress creates the revenue flag of the U. S. For a description of this, and its later alteration, see Preble, The Flag of the U. S. (1888), 320-21.

A general post-office is established at the seat of government, under the direction of a postmaster-general.—Laws of U. S. (1799), chap. 149.

The common council reads and refers to the lamp committee a communication regarding a "New Mode of constructing & placing Lamps in the Streets," which was "preludged by Mr. Bidlinger."—M. C. C. (1784-1785), II: 521.

An earlier proposal of this kind was made by one Thomas Whitney, of 40 William St., who wrote to the common council an undated letter regarding an improved method of constructing street lamps so that they would consume about half the quantity of oil then used,—which "by Mr. Elsworth's acct[.] amounts to 8 or 9 gallons per Lamp yearly." He offered to supply such lamps, and the board expressed the wish to see one at its next meeting.—See the original letter in metal file No. 5, city clerk's record-room.

Wm. Elsworth, mentioned in this letter, was appointed March 29, 1791, to direct the placing of public lamps (ibid., I: 613); and was made superintendent of lamps April 25, 1796 (ibid., II: 233); and resigned Oct. 23, 1797 (ibid., II: 400).

A petition, about 100 signatures of "Owners and Occupants of Houses and Lots of Ground, on which the first and second Ward of Vicinity," asks for the removal of the "Exchange" (or Broad St.). It states that, when these memorialists presented a former petition for the same purpose, they were given to understand that the pleasure of the Corporation was against the
1799 prayer. . . . Now, they explain "That the Exchange, together with the Drain or Common Sewer, over which the Exchange is built, are Receptacles for Filth and Immorality."

That during the past moderate Weather contaminated Air was continually issuing from out of the said Drain, and particularly so, when the wind was to the Southward which Enriches your Members to the most dreadful Consequences and permits the free circulation of Air, and in short, to say the most of it, is visibly a Theatre for Obscenity.

That your Memorialists having maturely surveyed the premises, are of opinion, that the said public Building called the Exchange, instead of being a benefit, is in every sense of the word a public Nuisance; and your Memorialists verily believe that unless every Nuisance is thoroughly removed a return of the said Malignant or Yellow Fever may be expected. . . .—From the original MS., in metal file No. 18, city clerk's record-room, endorsed "... consideration postponed till next meeting of the B^3;" M. C. C. (1784-1831), II: 525.

The petition was granted March 11 (q.v.). The "Committee of S^3 Mark's Church" (see Ap 25, 1799) reports to Trinity vestry that St. Mark's has been completed. The sabbath of the 11th (q.v.).

By a vote of seven to five, the common council decides to grant the petition of March 4 (q.v.) "for the taking down & removing the public Building, in the lower part of Broad Street, called the Exchange," and appoints a committee to "take order" to remove it between May 20 and June 20 next, "reserving for the public use the Bell & stone flagging in & about the said Building & such other Articles as they shall judge proper." The also orders that the clerk "notify M^2 Baker the present Occupant of the determination of the Board on this Subject and that she remove from the said Building by the 20th of May next."—M. C. G. (1784-1831), II: 523. Mrs. Baker was the proprietor of the museum. She moved it from the Exchange to No. 22 Green-st.—N. Y. Gaz. & Gen. Adv., My 17, 1799.

The common council orders "That the northeastern upper Room in the City Hall be set apart for the holding of the Court of Chancery; And that the Clerk of this Board take order for putting the said Room in proper order."—M. C. C. (1784-1831), II: 523. On May 6, payment of £1172 was made for a carpet for this court-room.—Ibid., II: 524. The "middle lower Room on the East side of the City Hall" is made the record-room of this court.—Ibid., II: 527.

Dr. Ball presents to the common council a report of "Dr Mitchell" (Dr. Sam'l L Mitchell) on "the Plan of an Elogeple for correcting the foul Air in crowded Court Rooms," The board, while "sensible of the Ingenuity of the Invention," cannot "determine as to the Means of carrying it into execution."—M. C. C. (1784-1831), II: 524.

The common council adopts rates of ferrage for the Paulus Hook and "Hoboken" ferries, varying with the articles carried, a long list of which is entered in the minutes. For example, a small table, 4 pences; a mahogany chair, 2 pences; a chest of tea, 2 shillings.—M. C. G. (1784-1831), II: 524-26.

Weston William (see E 4) reports favorably to Mayor Varick "on the practicability of introducing the Water of the River Bronx into the City of New-York." Although he admits that it would take less time and less money to use the Collect as the source, he contends that the supply from the latter would not be as great nor the quality as good.—Report of William Weston, Esquire, on the practicability of introducing the Water of the River Bronx into the City of New-York (printed by John Furman, N. Y., 1799). See Mr 16.

In response to a petition from John Averey, the senate agrees that the last quarter's rent for the government house be relinquished by the state as a "compensation for the necessary repairs he has made to the said house, and losses sustained relative to the same."—Senate Jour. (1799), 72, 80.

Mr. Weston's report on the subject of supplying the city with water, is referred to the common council, and the board orders "that it be printed in Pamphlet in like manner as that of Dr. Browne on the same subject and that a manuscript Copy be immedi-

ately sent to the Members of this B^3 in the Legislature at Albany."—M. C. (1784-1831), II: 527. John Furman was paid £5316 6s. for printing the Weston report.—Ibid., II: 523.

The new theatre is for the first time called the Park.—N. Y. Gaz. & Gen. Adv., Mr 20, 1799.

The legislature passes "An Act to regulate the passing of Carriages, Wagons, Carts and Sleighs by each other in the City of New-York." When persons meet, each "shall go to that side of the street on his left."—Laws of N. T. (1799), chap. 41.

Mr. Fairlie from the committee consisting of the members attending this House from the city and county of New-York, to whom were referred sundry memorials relative to supplying the said city with water, reports in favour of the memorialists and introduces a bill entitled "An act for supplying the city of New-York with pure and wholesome water." The bill is read a first time and, by unanimous consent, a second time also. It is committed to Aaron Burr, J. Lansingh, and Mr. M'Neil.—Assembly Jour. (1799), 296. The bill was passed on April 2 (q.v.).

The legislature passes an act for the gradual abolition of slavery in New York State. It provides that "Any child born of a slave after the 4th of July next shall be deemed to be born free;" with, however, the proviso that such child continue a servant until a certain age, as if it had been bound to service by the overseers of the poor. The owner of a slave was permitted to manumit such slave immediately.—Laws of N. T. (1799), chap. 62.

John Malden, Jr., writes to Mrs. G. Miller, and L. M. R. K., Ill: 937. He is desirous of having permission to plant some Trees before my Houses in Pearl Street—being the one I at present reside in, & the New One adjoining—please to mention it to the Common Council on the first of next week. . . .—From the original letter, in metal file No. 18, city clerk's record-room. No action appears in the minutes.

The common council orders that thereafter permission will not be granted to sink a rain-water cistern in the street unless it is made and armed with brick or stone.—M. C. C. (1784-1831), II: 529.

The common council rejects a petition of Messrs. Ellis and Clarkson to plant trees in front of their houses in Liberty St., "because the Street is less than 40 feet wide;" and orders "that a notification be published informing the Inhabitants that Trees may not be planted in any Street of the Width of 40 feet & upwards."—M. C. C. (1784-1831), II: 529-30.

The legislature passes "An Act for supplying the City of New-York with pure and wholesome Water." This act incorporates Daniel Ludlow, John B. Church, John Watts, Joseph Browne, and their present and future associates as "The President and Directors of the Manhattan Company," which company shall be formed for the aforesaid purpose. The capital of the corporation is limited to $2,000,000, the price of each share is to be $50, and there are to be 40,000 shares, 2,000 of which may be subscribed for by the mayor, aldermen, and commonalty of the city of New York. The affairs of the company are to be in the hands of the recorder of the city and 12 directors elected annually by the stockholders, on the second Tuesday of December. The following directors are appointed—Daniel Ludlow, John Watts, John B. Church, Brocholst Livingston, William Edgar, William Litch, Packhal N. Smith, Samuel Osgood, John Stevens, John Browne, John B. Coles, and Aaron Burr. Besides being empowered to erect dams, lay pipes, and do other things necessary toward supplying the city with water, the company is authorized to employ all such surplus capital as may belong or accrue to the said company in the purchase of public or other stock, or in any other mercantile transactions or operations not inconsistent with the constitution and laws of this state or of the United States, for the sole benefit of the said company.—Laws of N. T. (1799), chap. 84. This will correct Vol. I, p. 392, which mentions "David" Ludlow.

Under the powers granted by the last-mentioned clause, the Manhattan Company opened an office of discount and deposit (see My 15), and later started a bank. It has been a common
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1801

The "Columnist Gazette," weekly, appears. It was discontinued
with the issue of June 22 (2p.).—Brigham, A. A. S. Proc. (1917),

The common council grants to the managers of the "State
Road Lottery" the use of a room in the city hall to draw the
lottery, and of the wheels and apparatus remaining of the former
lottery.—M. C. C. (1784-1812), II: 531.

Mayor Varick lays before the common council "the new Map
of the City made by Mq Mangin," and the board commits it to
a committee "to examine & correct as to the Names of the Streets;
& also to report a Mode for obtaining subscribers to the
Work."—M. C. C. (1784-1812), II: 532. See, further, Jl 15;
and N 30, 1801.

The mayor represents to the board "that Mq Mangin requested
a further advance of Money" (see D 4, 1797), but "as the state of
his Acres against the Board could not be immediately known,"
the mayor suggests lending him $500 "on his Note payable in six
Months." The board agrees.—Ibid. See, further, Ag 14; also,
regarding the notes, N 28, 1803.

The common council adopts the recommendations of a commit-
tee report on street cleaning, which provides for collecting "Street
Dust" at a certain place and selling it. For conven-
ience in carrying this arrangement into effect, the city is divided
into three districts, in which the streets are to be swept and
the dirt removed in daily rotation. Carts are to be hired to remove
the dirt and manure "either to Vessels or to some place to be
provided in or near to the City for the Temporary deposit of such
parts as may not be taken away daily by Yennels;" and, to avoid
too long a delay or too large an accumulation at the place of
Temporary deposit, "two Petit Augers" (pettiaugers or pergian)
are to be employed occasionally to remove the manure from the
first place of deposit to one more distant, and "when not engaged
in doing this they may be employed in delivering Manure at such
Landings as may Suit the Convenience of purchasers." The new
regulation also provides "That two Men with Carts and Bells be
employed to go daily through the two Districts that are not Sweep-
ing for the purpose of Collecting the Garbage and Offals from
Yards and Kitchens for which purpose they shall Ring the Bell at
Suitable Distances to Notify the Inhabitants to bring out the
same and put it into the Carts." It further provides for the appoint-
ment of two street commissioners, whose duty shall be to "Exam-
ine and correct the Nicks and Yards," and report when they
need to be filled up, altered or cleansed, employing a super-
intendent or other persons to accomplish this work, sell the manure,
keep accounts, etc.

The board at once appointed a second street commissioner—
John Bogert—in addition to Richard Furman; made them city
surveyors, and ordered that the "Drudge" for cleaning out the
docks and slips be put under their direction.—M. C. C. (1784-1812),
II: 532-54.

The common council receives a letter from Daniel Ludlow,
president of the Manhattan Company, together with a copy of
the company's charter (see Ap 2).—M. C. C. (1784-1812), II: 534-
35. See Ap 11.

The common council refuses to grant a request of Wm. Nelson
"to plant a Row of Forest Trees in front of his Lot at the upper
end of the Broad way adjoining the Sandy Hill & to erect a tempo-
rary Fence about eight Feet from his Line for their protection;" but
does permit him to "plant his Trees on the outer Edge of what
will in time be the foot Walk of the Street & secure them with
Boxes."—M. C. C. (1784-1813), II: 535. The land of William
Nelson was at the south-west corner of the road leading from
Greenwich to Bowery Lane (the Sand-hill Road) and Elbert St.
(now Greene St.).—Libe Deeds, LVII: 108. On the present map
of the city, it lay on the west side of Greene St., north and south
of Waverly Place, which was cut through the property.

James L. Smith, venue master, in a petition to the common
 council, recites the fact that the city "has been pleased to establish
a Horse-Market opposite the Bridevedi," that, "from the great
concourse of people that attend the Sales," he "experiences many
incidents, and especially that posts be erected bordering on the
foot-path, in order to make last there the Horse intended
for Sale." He also "requests permission to have a Rostrum erected
on the spot, Something similar to a Sentry Box," in order that he
"may not mix with the crowd at the time of Sale," and that he
"may have a better opportunity of noticing the bidders by being
exalted in the course of business."—From the original petition,
in metal file No. 15, city clerk's records in Borough Hall.

The first meeting of the president and directors of the Man-
hattan Company (see Ap 2) is held at the Tentine City Hotel,
and Samuel Ogood, John B. Coles, and John Stevens are appointed
a committee "to report with all convenient speed, the best means
to be pursued to obtain a supply of pure and wholesome water
for the City of New York."—Greenleaf's N. Y. Jour., My 22, 1799.
See Ap 17.

The corporation pays £4,000, the first requisition on its sub-
scription to 2,000 shares of the Manhattan Society.—Journal B,
153, chamberlain's office.

The Manhattan Company resolves that a sum not exceeding
$1,000 be appropriated to defray the expenses of the committee,
appointed on April 11 (p. n.), for securing information as to the best
mode of supplying the city with water.—Greenleaf's N. Y. Jour., My
22, 1799. The committee advertised for advice on April 26 (p. 2).

Walter Rutherford writes: "Hammond has sold his fine house to
Vandenheuvel for £3,000, and taken a house in Liberty St. ...
He sold two acres at Greenwich for five hundred dollars each for
the two banks that build immediately."—Rutherford. Family
Books and Events, 188.

Aordon Burr, Wm. Laight, and John Watts advertise on behalf
of the Manhattan Company that "a book for receiving subscrip-
tions is opened, and that they will attend at the Tentine City
Tavern in Broadway, on Monday the 22d inst, and thenceforth
daily until further notice, from 11 to 2, and from 5 till sunset,
every day; at which times and place all citizens disposed to en-courage
the institution may attend for the purpose of subscribing."—

"Souci" addresses the following open letter to the president
and directors of the Manhattan Company: "Having understood
that it is contemplated as a temporary measure, to erect a Steam
Engine on the margin of the Collect, to force its waters thro the
streets, as a means of cleaning them and the common sewers of
the city, thro which its filth is principally discharged—I take
the liberty of laying before you a few observations on the probable
effects of such a measure.

"From information I have received from old inhabitants, it
appears that the Collect has within a few years been surprisingly
diminished in depth, from a great accumulation of earth, bricks,
dyke materials, and other similar matter, which may be either
be estimated at 3 feet, each foot in depth of the pond contains
2,830,552 gallons of water; the whole water therefore contained
in the brim of the pond amounts to 7,141,575 gallons—admitting
that 400,000 gallons of water be taken from this pond daily, for
17 days for the intended purposes, the whole brim will then become
bare—consequently about 3 feet of this putrefying mud will be
left to the full influence of the summers sun. I have not taken into
the account any supply from internal springs, because there is
no evidence of there being such; at present there is not apparently
any discharge at all from the Collect, of course the supply can be
only adequate to the quantity daily evaporated. ...

The great object intended by introducing large quantities
of water is to remove the lead from the streets and common sewers, every species of animal and vegetable life undergoing a decomposition. To uncover five acres of putrid mud, nearly in the centre of the city, with a view of scowering occasionally half an acre of common sewers, is to me
an idea the most monstrous, and capable of producing effects
the most pernicious. ...
1799 19

"I am well aware it will be said that it is not intended to take the waters immediately from the collect, but to dig one or more large wells in its vicinity, in my opinion such strokes do not alter the principle—i.e. the Collect must either be the source of the springs in its neighborhood or the effect of them. . . . It may possibly happen that a large well may be dug near the Collect and give 400,000 gallons of water per day and not exhaust the source. If the experiment be made I shall be glad to find it true—I am afraid, however, that there is not much rational ground for the hope.

"You are placed in a very delicate situation, the powers you possess were sought for by the Corporation, but the Legislature has given the Collect the right of priority. If the Collect is supplied, it is not to be supposed that it ever will be made to agree with the other springs.

"Samuel Osgood, John B. Coles, and John Stevens, have been appointed a committee "to report to the Corporation of the Manhattan Company the best mode of procuring a supply of Water from sources in the vicinity of the city, & the probable expense thereof" (see Ap 11), advertise that they "will gratefully receive any information on this important subject, which any of the citizens may please to communicate to them, more particularly with respect to a proper spot of ground for digging a well, and the quality of the water, and how many gallons might probably be obtained every 24 hours."—Greenleaf's "N. Y. Jour.," My 1, 1799. See Ap 22.

A fire breaks out on the west side of Washington St., between Cortlandt and Dey Slips, and consumes the whole block except three houses. A newspaper report adds: "Several buildings at a considerable distance from the conflagration, were frequently set on fire from the flames carried by the strong westerly wind—one of them reached even to the steeple of St. Paul's Church; and in a few moments the base of the Northwest Urr was in a blaze. One of the workmen employed about the Church was immediately let down by a rope from one of the upper apertures, and cut it away, when the fire was soon extinguished."—Ad., Ap 22, 1799; Conn. Courant, Ap 29, 1799. See also Rutherford, Family Records and Events, 189. The loss by the fire was estimated at $20,000. The list of the buildings destroyed was published later; it included houses in Greenwich, Dey, Washington, and Cortlandt Sts. Those in Greenwich St. were: "two elegant three story houses, belonging to John Rogers, Esq., one occupied by Lady Temple [widow of the late Sir John Temple], the other by Gov. Cranford."—Daily Ad., Ap 23, 1799. See Ap 22.

The common council decides to exercise its option, granted in the Manhattan Company's charter (see Ap 2), of subscribing for 2,000 shares of stock in the company. At the same meeting it grants $799.67 to William Weston "for his Services & Expenditures in drafting & reporting on supplying the City with water."—M. C. C. (1784-1813), II: 353-355, 357.

"Christopher Colles writes to the committee of the Manhattan Company: Being willing to comply with your request, of furnishing you with notes relative to the Water Works, I herewith lay before you such memoranda as I can recollect, and judge may be necessary, for your consideration.

"The well which was sunk in the place which I pointed out to you last Saturday, was thirty feet diameter, at the inside, and about twenty-eight feet deep, below the surface of the ground; the soil towards the bottom was a very fine running sand; I sunk this well until I had eight feet water; . . . This Water would raise a latter with Soap, and would wash well: As to the quantity, the Steam Engine (which we once worked for twenty-four hours without intermission) threw out two hundred gallons of Water, fifty feet high in a minute. In about an hour after it was set going, it would lower the Water two feet; but by continuing pumping, we could not lower it another inch. The Steam Engine had a Cylinder, of twenty inches diameter, and seven feet long; the Pump was eleven inches diameter, and the stroke—six feet—the Engines made ten strokes in one hour, with a consumption of three or four loads of hickory wood, per day, many of the present inhabitants have seen it working [see Mr 1 1776]."

An idea has been proposed, of sinking a well, and erecting a Reservoir in the area, opposite the Bridewell and Poor House. I cannot think this an eligible situation, as it is doubtful whether the Water will be good, as most of the adjoining Wells are brackish; the digging in this place may also be more difficult. The only ground I know of that would be within the reach of the Water is that which would be supplied to a Machine of any considerable power in this place, might almost as well be taken out of the East River. Moreover, there is no high ground convenient for the erection of a sufficient Reservoir.

With respect to Bronz's River, there appears to be many difficulties. . . . Colles also makes proposals for engineering and superintending the execution of the work. He estimates the total expense as $44,520, and if this should be the case, "expects for his services . . . eighteen dollars per week for subsistence; and the sum of three thousand pounds at the completion of the work."—Report of the Manhattan Committee (printed by John Furman, N. Y., 1799), 17-24.

For William Weston's suggestions, see Ap 26.

In response to the advertisement of the Manhattan Company's committee (see Ap 20), Elias Ring submits a plan for securing the water from the Collect. He urges that the reservoir be erected in the "Park," and estimates the expense of the undertaking as $100,000.—Report of the Manhattan Committee (printed by John Furman, N. Y., 1799), 29-37.

On July 22, 1799, the Committee of the Manhattan Company resolves that $50 be distributed "among the Persons who were most active in extinguishing the late Fire at the Steeple of St. Paul's Church."—Trin. Min. (M.S.). It also orders "That St. Marks Church be consecrated on Thursday the ninth Day of May next" (q.v.).—Ibid.

The common council rejects a petition of Alexander Lamb, keeper of the debtors' "goal," in which he pleads that provision be made for lighting the debtors' house, and extinguishing and cleaning the jail, which has not been done since the removal of the criminals from that jail to the bridewell. Altemations made in the sheriff's department, under acts of the legislature, have so reduced this keeper's fees that he is unable to provide lighting, white-washing, and cleansing. He points out the consequent dangers to safety and health.—From the original MS. in metal file No. 18, city clerk's record-room. Engraved with the report is a letter from one of the imprisoned debtors addressed to Mayor Varick, endorsing the petition; also "An Estimate of the present annual Disbursements for the Goal of the City & County of New York, so far as respects the lighting, white washing & cleansing the same." This amounts to $535. See also M. C. C. (1784-1813), II: 356-357.

The common council appoints a committee to report needed improvements in the system of extinguishing fires.—M. C. C. (1784-1813), II: 357.

The common council orders payment to Jos. Newton of $8.10 "for removing & putting up the Portraits in the City Hall."—M. C. C. (1784-1813), II: 357.

William Weston, in a report to the committee of the Manhattan Company, recommends that pipes be used for the mains to be laid from "the Reservoir to the Government House," down Beekman St. and down Wall St., because, although more expensive than wooden ones, they would be permanent. He estimates that the "total expense of the work to be done this year, including the cleaning out of the Pum-well, rebuilding it, formation of the Reservoir, fencing round the ground occupied by the Company, building Engine house, first cost and operation of the Steam Engine, cast iron Cylinders and wooden Pipes, laying the same, opening and filling the trenches, turn-cocks and Fire Plugs, wheel-barrows, planks, picks, shovels, shears, and other necessary materials, including contingencies of all kinds, . . . will amount to not less than the sum of $24,515 exclusive of the purchase of the ground for the Reservoir, Steam Engine and Well."—Report of the Manhattan Committee (printed by John Furman, N. Y., 1799), 11-17.

Aaron Burr, Wm. Laight, and John Watts (see Ap 19) advertise that "Subscriptions to one thousand shares of the capital stock of this company, will be received at the office of the company, at the tontine city tavern, on Monday the twenty-ninth instant, from six until eight o'clock in the forenoon, and thenceforth daily, until one thousand shares shall be subscribed. No person will be allowed more than five shares, and those who have not heretofore subscribed will be given preference."—Ad., Apr 27, 1799.

Nicholas Roosevelt writes to John B. Coles, Samuel Osgood, and John Stevens that he will undertake to build "a Steam Engine, capable of raising two million gallons of water, in 24 hours, to the height of 50 feet. . . . at the price of $15,000; and find..."
hands, fuel, &c. for 2000 per annum, when the quantity of water required does not exceed 300,000 gallons, and so, in proportion, for any larger quantity, up to two millions. In this estimate, I incluse the highest price of the wood and the water...

I will engage to finish this work by the month of March, next ensuing, at farthest, and as much sooner as possible."—Report of the Manhattan Committee (printed by John Furman, N. Y., 1799), 11.

On April 5, Roosevelt wrote that he "might engage to put up an Engine for the [Manhattan] Corporation, within the space of three or four months, capable of raising 300,000 gallons of water, to the height of 90 feet, in 24 hours, and find the pumps, pump rods, and frame for the engine, for the sum of nine thousand five hundred dollars."—Ibid., 12. On May 6 (p. o), the committee recommended that Roosevelt's letter offer be accepted.

The common council appoints a committee "to take charge of Belle Vue House & Land and to direct such Things to be done for its preservation as they shall judge necessary."—M. C. C. (1784-1813), II: 519.

The common council resolves "that it shall be the Duty of the Street Commissioners [see Ap 10] to take Charge of all the Real Estate & other Rights belonging to this Corporation from which any Revenue is or may be drawn for the purpose of improving the same and increasing the Revenue thereof And that in order to promote the same this shall be the Duty of the Commissioners to give a convenient Time to furnish this Board with an accurate List of all such Real Estate & other Rights together with the amount of Revenue at present arising therefrom."—M. C. C. (1784-1813), II: 519.

The common council refers to the street commissioners a petition for paving South St. "from the Exchange [Slip] to Coenties Slip."—M. C. C. (1784-1813), II: 519. On May 6, an ordinance was passed for the purpose.—Ibid., II: 541. On June 5, a regulation of this part of the street was adopted.—Ibid., II: 551. On June 17, estimates and assessments for the paving were ratified, and a collector of the assessment money appointed.—Ibid., II: 553.

In a letter to the common council, Abigail Hammond states that he is sending another petition article on the plant at Greenwich adjoin the state prison ground, and desires to convey one part to the city for a market and the other parts for streets, on condition that the city will grant to him the land between high and low-water mark and the right to establish a ferry from a certain point shown on the plan.—From the original letter, in metal file No. 15, city clerk's record-room, endorsed "June 25th: 1799 [p. o] taken into consideration (see Minutes)."

Walter Rutherfurd wrote on March 22: "... The Government House is to be Custom House after Mayday, what a pity."—Rutherfurd, Family Records and Events, 188. See also L. M. R., III: 974, and descript. of Pls. 61 and 66, II: 442, 443.

The following article addressed "To the Citizens of New York" appears in a daily newspaper: "Your attention and curiosity having been so much excited by a paper passed at the late session of the Legislature, incorporating Aaron Burr, Dr. Brown, John B. Church, John Watts, and others, into a company, styled the 'Manhattan Company' [see Ap 2]; and your interests being materially affected by this most extraordinary Law, it is important that some of the circumstances attending it should be laid before you...

"The necessity of a supply of pure and wholesome Water has long been acknowledged. The Corporation of the City, anxious to comply with your wishes in this respect, employed an Engineer of great experience (Mr. Weston) to survey the River Bronx, and other streams and springs on this Island and in its vicinity; who in an able report [see Mr 14], which you must have seen decided on the practicability of obtaining a sufficiency of good water for the consumption of the City. They immediately had a petition draughted praying the Legislature to empower them to carry into effect this important object. This was sent to the Members of the Assembly from this City then at Albany, who were requested to lay it before the Legislature, and to promote by their influence its adoption—had of complying with this request... they suppressed the petition, and deputed Aaron Burr to this City to procure an application from individuals, praying to be erected into a Company, for the said purpose; He accordingly, by the address which he so well knows how to employ induced a number of professors and some respectable steady men to unite in an application for this purpose—With this in his pocket our Machiavel returns to Albany and when he presented it to the Assembly declared that it was not the wish of the Inhabitants of New York to entrust their Corporation with this business...; by these solicitations and representations, and by promising to the influential members to pay their assistance with such nippy returns as they might wish to subscribe, he procured the Law in question to be passed..."

"The manner in which this measure was promoted, corrupt and wicked as I have stated it, is not more objectionable than the measure itself—By this Law a Capital is created of Two millions of Dollars which according to the declaration of the subscribers may be invested in a Bank, an India Company, an Insurance Company, a Company for the sale and purchase of Bills of Exchange and public and private stock, and what to themselves is of the least importance—Water Works;... and they are not obliged to furnish a supply of water under ten years from the date of the act... Why do the subscribers declare that supplying the City with water the apparently begun, will not really be commenced, until the profits arising from Banking, India, business, &c. are sufficient to pay the Expense.

... This Manhattan Company, furnishes the first instance of an unlimited Act of Incorporation—of a complete monopoly in effect—of immense powers, unnecessarily granted to a few individuals to act in a society at large cannot partake of—of scandalous duplicity...

"That a supply of good water is essential to the welfare of this City, cannot be denied—but it was not necessary that a Company should be incorporated for this purpose—the Corporation of the City, men whom we all know who possess the public confidence, stood ready to carry into effect so desirable an object—they only asked to be employed in it: they did not ask for the power of forming a Bank, an India Company. ... Nothing can equal the mischievous tendency of this law, but the gross indecency of placing effectually at the head of a company, whose capital is two millions of dollars, a man whose pecuniary concerns are publicly known to be in the utmost possible embarrassment.”

Already, these questions are asked: "Is this project of raising up a Bank, an India Company, an Insurance Company, a Company for Water Works, a Stock Jobbing Company, all in one, intended to benefit the Community at large, or to enrich those individuals who were in the secret? If the Community was to be benefited, why had not all an equal chance for subscribing? Why was nearly half of the whole number of shares, engraved by Members of the Legislature and their connections before the law passed, or previous to its being published? Do the men who were concerned in such selfish, such corrupt practices, deserve your confidence? Will you by again electing such men give a premium to villany?—Is the masterhand, who moved at will the eight remaining puppets, again to be your representative?..."—N. Y. Gaz. & Gen. Advt, My 1, 1799, "Four of the members of the assembly from the city, Messrs. Storm, Furman, Arcarius and Nexsen, were opposed to this flagitious transaction."—Ibid., footnote. See F 25, My 22.

On this day and on Dec. 29, Gouverneur Morris made mention in his diary of the presence of the Chevalier d'Orleans (Louis Philippe) in New York and "Morrissiana."—Diary & Letters of Gouverneur Morris (1889), II: 578.

John R. Coates, president of the " Harmonical Society," publishes a notice "that the society have removed their place of meeting to Vauxhall, Broadway, nearly opposite to the Tontine City Tavern."—Daily Advt, My 2, 1799. This was Delacloux's.—Ibid., N 6, 1799.

John B. Coles, Samuel Osgood, and John Stevens make a report to the Manhattan Company on the information they have received regarding the best mode of supplying the city with water. As it is "extremely desirable, that a part of the city, at least, be furnished with a supply of Water, during the ensuing summer," they recommend that Nicholas Roosevelt's offer to build a steam engine in three or four months (see Ap 29) be accepted, and that "the ground belonging to the Corporation of the city, on which Mr. Coles erected an Engine before the declaration, for a similar purpose, should be purchased without delay. The well which was formerly sunk thereon should be opened again, and deepened, if necessary; a reservoir formed, and the pipes procured and laid as far as is deemed expedient during this season." Contrary to Mr. Weston's report of April 26 (p. o), they urge that wooden pipes be used
because iron ones would be too expensive. Weston's report and
May Colles's letter (see Ap 22) are laid before the company, and solu-
6 tions are passed empowering Osgood, Coles, and Stevens "to deal
for any goods with the Company, for the conveyance of water, made of yellow
and white pine logs. From 500 to 2000 will be immediately wanted of iron 12 to 14 feet in length. . . . The pipes must be delivered
at the city of New York, on or before the 1st of August next."—
Greenleaf's N. Y. Jour, My 8, 1799.
9 This is the day appointed for the consecration of St. Mark's
Church.—Memorial of St. Mark's Church in the Bussey (1899).
10 The committee appointed by the Manhattan Company on
May 6 (q.v.) writes to the common council "respecting lands
formerly occupied by Mr. Christopher Colles for a Well & Reservoir
which they are informed belong to the Corporation." The commit-
tee asks the following questions:
"First. Whether they are willing to sell the same to the Man-
hattan Company & the value they put them at
second. Whether the Corporation prefer leasing them forever:
If so at what rate by the Year for a Lot of one hundred by twenty
five feet
"Thirdly. Whether the Corporation will permit the Man-
hattan Company to occupy the Grounds aforesaid until it shall be
ascertained whether the Waters are pure and wholesome and also
adequate to the supplying of the City and if a failure should be
found in either Respect, then to give up the Grounds leaving
them in the state they found them, otherwise, then enter into a
Treaty with the Corporation for those Grounds."—M. C. C.
(1784-1831), II: 543. The original letter is in metal file No. 15,
city clerk's register room.
This letter came before the common council on May 13, and it
was then decided to postpone consideration of the first and se-
cond questions, but to accede to the third. The street commis-
sioners and Alderman De La Montagne were appointed "to exam-
ine and report to the Board the bounds State & quantity of the
Ground."—M. C. C. (1784-1831), II: 544.
13 Agreeable to the order of Nov. 5, 1798 (q.v.), the common
commissioner orders that a warrant be made out appointing Chas. Loss
a city surveyor.—M. C. C. (1784-1831), II: 542.
The common council votes against filling up the Exchange
Ship, as proposed by a petition on April 29, and orders that the
street commissioners employ the "Mud Drudge" in cleaning it out
"to a proper Depth of Water."—M. C. C. (1784-1831), II: 544.
The common council orders payment of $600 "For Stone on
the Outside of the Battery."—M. C. C. (1784-1831), II: 545. See
also Ap 30, 1798.
15 The president and directors of the Manhattan Company pass a
resolution "That so much of the surplus capital of the com-
pany as may be deemed necessary, be employed in discounting
paper securities, and that with a view, thirty days in each case,
an offer of discount and deposit, be established at such time and place, and
under such regulations as may be hereafter ordained."—Green-
leaf's N. Y. Jour, My 23, 1799. See My 22.
John Avery announces that he has removed from the govern-
ment house "to that airy situation No. 10 William Street, for two
years past occupied by Me Boorman as a boarding house."—
Com. Adv. My 15, 1799. The government house had been con-
verted into a custom house on May 4 (q.v.). See also My 30.
17 The spacious New Bath, on the North River, in the rear of
Trinity Church, is now open for the season . . . Warm and Cold
19 The common council gives orders for the erection of a fire-engine
20 house on the shoalhouse yard "for the two Engines imported from
Hamburgh."—M. C. C. (1784-1831), II: 547. See F 15, 1797.
21 The common council directs that the treasurer let out "the
Corner House at the City Hall" (watch-house—see Je 2, 1793)
until May 1, 1800, deeming it inexpedient to take it down at
present.—M. C. C. (1784-1831), II: 548.
22 "Socrates" publishes a series of questions on the origin, powers,
23 and intentions of the Manhattan Company, which he calls upon
Aaron Burr to answer. He declares that he is "not personally
645 desirous of inculpating Mr. Burr, but only wishes to investi-
24gate the origin of the Manhattan Company which he considers the
most outrageous insult ever offered to an afflicted city. This
company must and will be destroyed, or else confined to some
justifiable object. The writer does not even know what are the
two true answers to some of the following questions, but as he thinks
the Socratic method useful in the investigating of truth, he means to
pursue his queries, and he advises parties concerned to answer
them. Socrates is one of the people, and it is his right to investi-
gate the conduct of those who hold themselves up as candidates
for public trust." Among the questions "Socrates" asks are the following:
"Is the Manhattan Company instituted for the purpose
of bringing water into the city or of banking and speculation?"
"If it is instituted for the purposes of banking and speculation,
whether there are not as much the whole of the act [see Ap 2] appear to
talk of water . . . ?"
"If the Manhattan Company can now establish a bank is it
not authorized to pursue for the space of ten years any speculations
the most foreign to the bringing of water, without expending one
cent for that purpose? If they should choose so to do, can you,
as a lawyer, point out any remedy that can be pursued against
them all after the ten years are past."
"Is there anything in your character or that of your associates
calculated to insure the citizens against the abuse of such unheard
of powers?"
"Are not the general and undefined powers under which your
company now propose to set up banking, stock-jobbing, Jewsing,
&c. derived from a clause of seven lines and a half, in the eleventh
page of the law, as now printed in this city?"
"What do you mean by the words 'surplus capital' in the
clause aforesaid? Do you mean the remainder of the company's
capital after the supply of water is completed? If so by what
authority do you commence banking at present?—Com. Adv.,
My 22 and 23, 1799. Another New Yorker, under the signature of
"Money Attacked," on May 23, 1799, attacked the company.
Aaron Burr advertises: "Richmond Hill. To Be Let, and
immediate possession given, the House and Farm, adjoining Lippes-
ward's, formerly the property of Mr. Abraham Mortier; any
quantity of land, from five to fifty acres, will be let with the house.
The Garden is in complete order, and great forwardness, and the
Ice-house well filled."—Greenleaf's N. Y. Jour, My 22, 1799.
Mr. Daniel S. Travers, a young gentleman of genius and
ability, late a pupil of Rush, the famous Carver, of Philadelphia,
some time since arrived in this city, has lately completed the
ornaments of the ship Adams, soon to be launched [see Je 8] at the
Walaboghy, L. I." The ornaments are thus described:
"On the head of the ship is the figure of the President, repre-
sented in the attitude of addressing both Houses of Congress.
In his left hand is a scroll, supposed to be his address—his right
is raised in a spirited position, as if in the act of addressing the
courts of America. . . .
"On the stern, in the centre of the Tailfin, are the Arms of
the United States, supported by Sybile and Neptune. . . .
"For the edification of the public, a copy of the Presbyterian Church
on Rutgers St. a bell which he has imported from England. The trustees
appoint a committee to raise money by subscription to erect a
cupola for it. Such subscription was renewed on Oct. 21, 1800.—
Proc. of the Trustees (M.S.), Vol. II.
James Oran changes the name of his paper (see Je 3, 1799)
to the New-York Price-Current.—Brigham, A. A. S. Proc. (1897), 481.
The common council resolves that Ald. Carmer take order "for encozing the old Potters field burying Ground..."—M. C. G. (1784-1831), II: 549. This had been abandoned as a cemetery on May 29, 1799 (q.v.). Later, this was the site of the United States arsenal (see Jl 18, 1796) and, still later, was included in what is now Madison Square.—L. M. R. K., III: 976. See, further, N 1, 1807.

June

J. B. Prevost advertises that "The Manhattan Company Intend shortly to employ a superintendent to conduct the works necessary for conveying water into the city: the salary to be paid to such superintendent will be 1200 dollars per annum. Persons possessing the knowledge and qualifications to execute this important work, will apply by letter accompanied by the best recommendations they can produce."—Greenleaf's N. Y. Jour., Jl 2, 1799.

"Saturday last [June 8] at half past 12, the United States frigate Adams was launched from Mr. Jackson's Navy Yard, at the Wallabout, Long-Island. She looks extremely beautiful upon the water. The Governor, Jay Cutter hauled round from the North River, and lately Federal Salute. She is one of the handsomest modelled vessels in the United States, and will, as it is supposed by judges, be an uncommonly fastailer."—Gaz. of U. S. (Phila.), Je 11, 1799. See also My 22.

"The Adams is a ship built after the model of the Flora, English frigate, a vessel that out-sailed every thing that ever came in sight — we believe it will be a 52-gun frigate, the heaviest of such vessels of which she carries 24. She is 710 tons burthen, and will carry 225 men—commanded by Richard Valentine Morris, (son of the old General, of Morrisania) ... She will sail in about two months, and it is rumored her destination is the Mediterranean and Gibraltar station; she will find enough amusement in that quarter no doubt—... she sailed over to town yesterday afternoon [June 9], and will set sail with all possible dispatch."—Ibid., Je 13, 1799.

"It gives us pleasure to learn that measures for supplying the city with water are going into immediate execution. A number of laborers are busily employed in clearing out the spacious well adjoining the Collet, which was dug and stoned for the same purpose previous to the revolution.

"The public welfare, the source of infinite gratitude to the citizens, provided they find the current of water is made to keep pace with the current of discounts."—N. Y. Spectator, Je 12, 1799.

The common council orders that Bowling Green in front of the government house be kept in order, and that the grass be cut for the public horses.—M. C. G. (1784-1831), II: 552.

The common council refers to a committee a letter from the Manhattan Company signifying "that they would want a Part of the enclosed Ground in front of the Bridewell to raise a Reservoir for supplying the City with Water."—M. C. G. (1784-1831), II: 552. See Jl 22.

The office of the Manhattan Company "is Removed to No. 23 Wall street, in the house lately occupied by Mr. George Scriba."—Greenleaf's N. Y. Jour., Jl 12, 1799. Thought it has not been possible to prove by real estate records that No. 23 Wall St. is coincident with the later No. 40 (the present site of the Manhattan Bank), on the chart made by Dr. Edward Hagarman Hall in preparing his article about the confusion of numbers on Wall St. (19th Ann. Rep., Am. Soc. & Hist. Pres. Soc., 1914, p. 107), No. 23 occupies the lot now No. 40. Dr. Hall consulted all the records of the Title Guarantee and Trust Co. and was carried to Wall St. property, supplanting this research by careful inspection of the directories, and his conclusion may be accepted.

15 Dr. Edward Miller of New York writes to Noah Webster expressing fear "that, in the event of an hot and unfavourable summer, a renewal of the [yellow fever] ravages of last autumn [see S 17, 1798] will be our fate." He declares that "Philadelphians are setting us a noble example of zeal & public spirit in bringing water from the Schuylkill in large quantity..." Much good must unquestionably result from this enterprise. For altoge... a plenty of water running thro' the streets cannot annul an epidemic constitution of the atmosphere, I am persuaded, from the attraction which water possesses for miasmata, that a great deal of local mischief may thus be washed away."—Letter of Dr. Edward Miller to Noah Webster, among Noah Webster MSS., in N. Y. P. L.

"A Citizen" writes a vigorous complaint about the lack of cleanliness in the streets.—N. Y. Spectator, Jl 19, 1799.

Joseph Brown advertises that "Proposals for building by contract a stone Reservoir, to be placed in the Park, capable of holding a million of gallons, will be received by the subscriber until the 1st day of July next.—The building will be oblong octagon, and consist on the outside of a stone wall, 12 feet high, built of Holl-Gate stone, laid in good mortar: of an inside stone wall of the same height, of Newark stone, neatly jointed, and laid in terrace or good cement, an interval of 18 inches must be left between the two walls to be well filled with good clay. The bottom of the Reservoir will consist of a thick layer, of good clay well rammed, then a layer of flagging stone laid in cement, on that a course of brick laid in tar and sand, and then a course of Newark flagging stone neatly jointed and laid in terrace or good cement. The building to be completed by the first day of June next.—The Proposals must specify the sum demanded, the times of payment, and the sureties for the performance."—N. T. Jour., Je 22, 1799. See, however, Jl 22 and My 5, 1800.

A reservoir was eventually erected by the Manhattan Co. on the north side of Chambers St., between Broadway and Centre St. It was demolished in 1914.—L. M. R. K., III: 976. See also 22d Ann. Rep., Am. Soc. & Hist. Pres. Soc. (1917), 510-22.

The Columbian Gazette (see Ap 6) is discontinued. —Brigham, A. A. S. Proc. (1917), 391.

The common council, acting upon Abijah Hammond's proposal of April 29 (q.v.), decides that, while it cannot accede to it at present, it is disposed to erect a Warehouse in front of Hammond's Street as a landing place for the accommodation of himself and the public."—M. C. G. (1784-1831), II: 554-55.

The first appearance of Hammond St. is on the Goedeck-Mangin map, made in 1798-1800.—See L. M. R. K., III: 1001. A wharf, near this street, is shown. Other streets in this vicinity, surrounding the prison, appear on this map, probably as projected by Hammond. No ferry was established there as he requested, however, the one at Christopher St. not being established until 1841.—Ibid., III: 942.

A subscription-list for "Green Turtle served at Abel Harbrock's House on East River at the ten-mile stone" is advertised as opened "at 54 Nassau St."—Daily Adv., Je 29, 1799.

The common council orders that the street commissioners "take order for removing the Building from the Lot at the East End of the Alms House lately recovered from. . . . Proviso."—M. C. G. (1784-1831), II: 556.

The common council passes an ordinance "for continuing the Pavement of Chambers Street in front of the Alms House to Augusta Street."—M. C. G. (1784-1831), II: 557.

Crooke's Tavern, at 259 William St., is designated as the meeting place of the "Black Friers."—Daily Adv., Jl 1, 1799.

Delacroix again holds a notable celebration of the Fourth of July at his Vauxhall Garden (cf. Jl 14, 1798). "His beautiful garden was opened at 6 o'clock in the morning, and the colors were hoisted under a discharge of 16 guns. The 16 summer houses being the names of the United States, each were decorated with the Emblematical Colors belonging to each State, and ornamented with Flowers and Garlands. At 5 o'clock in the evening, the sixteen cars containing each Summer-house, were lined around the music, to the Grand Temple of Independence, which is 20 feet diameter, and 20 feet high, . . ."—in the middle of which was presented, the Bust of the great Washington as large as life, and near him a Grand Gold Column, representing the Constitution,
and below the said Column the Figure of Fame, 6 feet high, July 559. presentning to him with one hand a Crown of Laurel, and with the other holding a Trumpet, announcing to the public that she conferred Real Merit. Round the Pedestal were seen Military Trophies. The sixteen colors above-mentioned were placed round the Pedestal, at the sound of Martial Music—and at each color being placed round the Bust it was announced by the firing of cannon...—Spectator, I, 6, 1799. See D 16.

In response to a petition from some of the members of the congregation of St. Paul's Church, Trinity vestry appoints a committee "to enquire what will be the Expense of providing Organists for St George[s] and St. Paul's Churches."—Trin. Min. (MS.)

On the same day, Mr. Laight, a member of the committee of leases, reports to the vestry "that the South East End of the Land belonging to this Corporation in the Occupation of M. Williamson would be a proper Situation for a Burying Ground," and it is ordered that the company "conclude a Bargain with Mr. Williamson for so much of the said Ground as may be necessary and fence and prepare the same for the Purpose aforesaid."—Ibid.

The common council orders that the mayor be requested to cause a "Precept" to be issued for summoning and returning a jury to determine what recompense is due to the land owners on whose lands a certain new road is to be opened. This road is to run from the new Bridge over Harp River [now Harp River Street] through the Lands of John P. Waldron, Joseph Mott, Peter Benson, Sampson Benson, Lawrence Benson & the Common Lands of the Township of Harlem, to a Station on the Post Road between the 6 & 7 Mile Stones so as to meet the new Road lately laid out and made, through the City Common Lands, called the middle Road.

The board approves a map or survey of the proposed new road, and it is filed in the clerk's office.

To the above-mentioned council's record, see also, Vol. II, p. 526.

On reading a memorial of Dr. Nicholas Romaine relative to laying out streets at Corlear's Hook, the common council orders "that the East & West Streets on Rutgers' Land be continued through the Lands to the Eastward to the East River or until they intersect Grand Street, That Scammel Street be encreased to the Breadth of fifty Feet And that Ferry Street be of the same breadth of And that there be no other Street between Montgomery Street & Scammel Street nor between Scammel Street & Ferry Street."

—M. C. (1784-1831), II: 559. The original petition, with street plans, is filed in metal file No. 1799. See, however, Aug 23, 1798, regarding Governor St. V.

A "person" having been found in one of the docks on the North River with marks of violent death, it is suspected that he was murdered in a house of bad character on the corner of Murray and Greenwich Sts., where he was seen the previous evening. A mob of 500 or 1,000 persons assembled, and with three cheers determined to demolish the house. They were prevented by the timely intercession of the mayor and some of the magistrates. The Washington Troop and a detachment of infantry were ordered under arms to disperse the mob. To them "much praise is due for their spirited exertions."—Com. Adv., I, 18, 1799.

On July 20, the common council, at a special meeting, ordered that 2,000 copies of a handbill be printed and distributed, admonishing and cautioning the inhabitants to preserve the peace, on account of mobs which for several nights have tried to destroy the house at the south-east corner of Greenwich and Murray Sts. Thanks are expressed to the militia and others who have helped to suppress the riot.—M. C. (1784-1831), II: 560. On July 29, the board paid a bill of £512 for liquor to the Artillerymen in quelling a Riot in the Night of the 18th Inst.—Ibid, II: 563. Cf. the similar incident of Oct. 14, 1793 (p. 27).

"The Board consent that the Manhattan Company erect a Reservoir for supplying the City with Water on the N E angle of the Alms House Yard."—M. C. (1784-1831), II: 561. For previous action in this connection, see Je 20.

The common council appoints Dr. Adolph C. Lent, at $4.00 a day, to collect facts relative to the appearance and progress of the fever with which the city is or may be afflicted during this season.—M. C. (1784-1831), II: 563. On Sept. 9, the board paid him $7.22.—Ibid, II: 571.

The "New York Lying-in Hospital," according to announcement on July 23, is to open on this day for the reception of patients. The governors of the hospital secured for the purpose "a very commodious House" at No. 2 Cedar St.—Com. Adv., II, 28, 1799.

Mr. Adams, the lessee of the public docks and slips, renew for the ensuing year this lease with the city at $10,000.—M. C. (1784-1831), II: 564.

Earlier in the year, Delacour planned to close his "store" at this address.—Daily Adv., Ap 5, JI 29, 1799. See, further, D 7.

The common council orders payment of $300 and Mr. Mangin "on Acc't of his Contract for making a new Survey & Map of the City (see Ap 10), taking his note for the same."—M. C. (1784-1831), II: 566. See, further, D 12; and S 26, 1802.

The committee of Trinity vestry "respecting St. Mark's Church" reports that "the first Step necessary for the Organization of that Church would be to convey the Church and Land adjoining to the Corporation of St. Mark's Church when the same shall be formed; therupon [no order]."—Trin. Min. (MS.)

Mr. Lynch, while writing to the press an account of a plan, now in contemplation, of "to alter totally what exists on the East River," instead of the ships being indented with slips and docks, "it is to form one great segment of a circle, the arch of which will extend from the Battery to Coarer's Hook; a space of 100 feet, immediately contiguous to the water, is to be left without a building; and about 80 feet distant from the first wharf, a range of other wharves is to stretch the whole length of the town, here and there through the same, in metal file whichever wanted, thrown across from the main wharf to the outer." The advantages of the plan are explained.—Daily Adv., Ag 19, 1799. The plan, in somewhat modified form, was initiated in 1801.—See Ag 5, 1801.

A Petition for a new & enlarged Market at Catherine Slip "is read & postoned."—M. C. (1784-1831), II: 566. See, however, Ag 25, 1800.

William Kenyon (see S 25, 1793) sells the Roger Morris property to Leonard Parkinson for £3,000. The deed was recorded on Jan. 21, 1800.—Liber Deeds, LVII: 354. See also Shelton, Jumel Mansion, 134. See also My 26, 1800.

An item of New York news states: "The Water-Works of the Manhattan Company progress with astonishing rapidity, Pipes are already laid through Chapel-street nearly down to Pearl-street end, the stone of which was ordered out of the city clerk's office last month, and in a month hence we may expect that Pearl, from Chapel-street down, will be completely supplied with pure water."—Gas. of U. S. (Philas.), Ag 31, 1799.

Col. Aaron Burr and John B. Church, of New York, brother-in-law of Alexander Hamilton, fight a duel with pistols at "Hobuck Ferry," on the Jersey shore. They come to an amicable understanding after one shot.—Centinel of Freedom (Newark), S 10, 1799; Winkfeld, Hist. of Hudson Co., N. J., 1.

Mr. Lynch has removed his Office to the upper end of Sixth street, between the Fort and the Rope Walks, near Sheridin's Gardens on the East River, on the ground usually called Delancy's ground; where all Law proceedings are requested to be sent for Mr. Lynch or Mr. Rose."—Daily Adv., S 4, 1799.

The common council orders that the treasurer negotiate a draft of $5,000 with the Bank of New York, to defray public expenses, and $5,000 with the Manhattan Co., to pay the installment due on the shares of the common stock, in the proportion of M. C. (1784-1831), II: 570. On Dec. 16, another loan of $5,000 was obtained of the Bank of New York, secured by the city's bond, to defray public expenses.—Ibid, II: 588.

Ordered that such Butchers as shall abandon their Stalls in the Markets on Acc't of the prevailing Fever be permitted to sell...
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1799

Meat at their respective Houses in the out parts of the City or to erect Standings where Provided & on the express Condition that they keep an Acc of the Meats they kill & sell to be rendered on Oath to the Clerk of the Market and pay the Fees thereon according to Law.—S. P. A. 1799.

20

John Town advises that he "has erected Ferry Stairs on the Dock the south side of the State Prison (Greenwich) . . . and provided Boats for carrying passengers, etc., between there and Hoboken Ferry, New Jersey."—Greenleaf's New Daily Adv. S 21, 1799. See also L. M. R. K., III: 547.

21

It is announced that "The Bank of New York will be removed to the new Building at Greenwich, in the vicinity of the City, on Monday morning the 22 inst. and will open for business during the usual hours."—Spectator, S 21, 1799.

Oct.

The last issue found of the Gazette Française (see Mr 2, 1798) is that of this date.—Brigham, A. A. S. Proc. (1717), 471.

Nov.

The common council appoints a committee "to enquire into the State of the public Markets in the City & report such Improvements in the Regulation thereof as they may deem necessary."—M. C. C. (1784-1811), II: 580.

9

The "St. Caecilia's Society" meets in the federal hall at this time.—Com. Adv., N 9, 1799.

10

The government of the Consolidate begins in France, with Napoleon as first consul.—Anderson, Doc., op. cit., 668-70.

Ships and vessels that are supposed to aid Church wardens and vestrymen have been chosen for St. Mark's Church, and measures taken for the incorporation of that church by "the Stile of the Rector, Church wardens and Vestrymen of the Protestant Episcopal [Church] of St. Mark's in the Bowery of the City of New York." It is ordered "That the Committee of Leases be instructed to designate such lots as it may be proper to convey to the Corporation of St. Mark's Church and may produce them a Revenue equal to two hundred Pounds per Annum."—Trin. Min. (M.S.).

A committee of the "Law Society of the City of New York," in a petition to the common council, dated Nov. 7, acknowledges "the indulgence of several years' privilege to meet in the police-room. By recent arrangements, this privilege is necessary prohibited. They now ask permission to meet once a week, in the common council room, or such other room as shall meet the approbation of the honorable Corporation."—From original petition in metal file No. 18, city clerk's record-room. See also Com. Adv., N 18, 1799. The board permits them to convene in the room used by the court of chancery.—M. C. C. (1784-1811), II: 582.

The following advertisement, addressed "To the Public" and signed by Daniel Ludlow, president of the Manhattan Company, appears in the newspapers: "The legislature at their last session were pleased to incorporate the Manhattan Company, for the purpose, among others, of supplying the city of New York with pure and wholesome water. . . . Notwithstanding the intervention of a malignant fever, which occasioned so great and so large a desertion of the city, the works have never been suspended; and although of the months of the last session, their meeting, the directors are happy in announcing to their fellow citizens, that conduit pipes are laid in several of the principal streets, and that water is now ready to be furnished to many of the inhabitants and to all the shipping in the harbour. From actual experiment there is no doubt that one of the wells already opened will yield to five thousand families a daily supply of at least fifty gallons each of a quality excellent for drinking and good for every culinary purpose.

"The following regulations have been adopted for the distribution of water among the inhabitants of the city.

1st. Those who are desirous of being supplied from the aqueducts of the company will please to apply personally or in writing to the superintendent of the works, who will keep a register of the number of the applicant, the amount and situation of his house, and of the rate which he is to pay. The superintendent will also direct a proper person to tap or pierce the main pipe opposite to his house, for the insertion of the smaller or lateral tube, by which the water is to be conveyed into the building.

2d. The lateral or small pipe must be procured and laid at the expense of the applicant. . . . The company recommend the use of lead pipes.

3d. Although water will be continually running in the pipes, and the inhabitants will not be limited in its use, yet it will be proper to guard against any unreasonable waste which may happen from negligence or other cause. . . . To prevent in some degree any wasteful consumption of water, the pipes leading it into the houses must be completed and fixed under the direction of the superintendent. . . ."

No one shall supply water received from the aqueducts any neighbour or person not living in the house furnished by the company.

4th. The rates at which the water will be delivered are as follows:—For every house or building, containing not more than 4 fireplaces, there shall be paid the sum of five dollars per annum; and for every fire place exceeding four in any house or building there shall be paid an additional one dollar and twenty-five cents provided however not more than twenty dollars shall be paid for any private house or building.

6th. From the preceding rates are excepted buildings in which manufactures are carried on, requiring a larger supply than usual. Stables and taverns, with the proprietors of which separate agreements will be made.

7th. All payments for water shall be made quarterly, to wit, on the first day of February, May, August and November in every year; one quarter to be always paid in advance.

8th. Upon default in payment as aforesaid, or in case of in- fraction of any of the preceding regulations, the pipe through which the water is conveyed to the house will be immediately cut off.

Thursdays, from 8 o'clock in the morning until 2 o'clock in the afternoon, trains will be supplied at the rate of 20 cents per hoghead. A fountain for the purpose is erected at the extremity of Dye-Street, where boats may conveniently lie, and casks or hogheads be filled without the trouble of putting them on shore. Fountains for the same purpose will be raised in other parts of the city.

On the whole, Works of this kind being in a great degree new in this country, it is not possible to foresee all the cases for which it may be necessary to provide. Experience will suggest many improvements in the mode of distributing the water; the directors therefore expressly reserve to themselves the right granted by the act of incorporation of making from time to time such change in those regulations and such further by-laws and ordinances for preserving the works of the company, and for conveying water through the city, as they may think proper, except only as to the rates above mentioned, which shall undergo no augmentation for the space of five years."—Greenleaf's N. Y. Jour., N 16, 1799.

The common council refers to the street and road commissioners petitions for establishing a public ferry from Horns Hook to Halley's Point across the East River.—M. C. C. (1784-1811), II: 583.

On Feb. 3, 1800, two other members of the board were added to the committee "on the Petition for establishing a Ferry across the East River at Hellgate & opening a public Road thereto."—Ibid., II: 608. See further, S 10, 1800.

"A Citizen" writes to one of the newspapers: "Being unacquainted with the determination of the Directors of the Manhattan Company with respect to their progress in laying the pipes for the conveyance of water through the city, I would suggest the propriety of immediately furnishing the ships on the east side of the town with pipes, as it is the most proper season to dig up that offensive made ground of which they are generally composed . . . Therefore, if the pipes are laid as above mentioned, and water freely brought to the most filthy places, much benefit may be expected."—N. Y. Gen. & Gen. Adv. N 20, 1799.

Edward Bardin again serves the public dinner on Evacuation Day, his bill against the corporation amounting to $43:6.6.

M. C. C. (1784-1811), II: 585.

At this time, Marlborough Tavern was the meeting-place of the Tammany Society.—Com. Adv. N 25, 1799. It was still the "wigmaw" of the society in 1807.—Am. Citizen, S 18, 1807. For a history of this tavern, which stood at 170 Nassau St., on the site later covered by the Am. Tract Soc. building, see Emmet collection, 1819. See also L. M. R. K., III: 979.

The owners and occupants of dwelling-houses fronting on Chatham St. petition the common council for the removal of "the Engine House standing in front of the New Watch-House near the head of the said Street," which is considered "a great obstruction and incumbrancy to the said Street," and a nuisance on account of the filth which gathers around it.—From the original MS. in metal file No. 18, city clerk's record-room. This is referred to the street commissioners "to take order thereon."—M. C. C. (1784-1811), II: 584. For this watch-house, see L. M. R. K., III: 973.

17
The proper Institute, his May, o'clock. The Mount, our meeting the full. The Engine at the State Prison to be properly armed & accounted to quell or suppress any conspiracy or insurrection which may at any time happen in the State Prison."—M. C. C. (1784-1831), II: 585.

"Confectionary Manufactory. J. D. Ogden, No. 14 Broad Wy. [F. 23, 1799], informs the public in general, that he has now in the store, a large assortment of Sugar Workes, best quality. Likewise, cordials, syrops, sweetmeats in boxes ready for exportation, at a fixed price. He undertakes to provide entertainments at persons houses, so as the persons have no trouble at all: At the fixed hour the table will be extremely well furnished, at a most reasonable rate than can be provided by one self."—Daily Adv., D 7, 1799. This is earliest notice of a business of this kind in New York. See, further, J 9, 1801.

Delacroix also announces that, during the winter, his "Vauxhall Garden near Bunker Hill" (see My 1, J 4, 1798: J 4, 1799) "will be open every day for the reception of Ladies and Gentlemen. Entrance Free." He thus describes it: "There will be found a large Room, 45 feet long, well heated by two fire places, convenient for concerts, balls, and all other entertainments, able to contain 150 persons. Private companies who would wish to give balls, concerts, or parties, will be well satisfied with the price and attention given them. Those who wish to make use of it, will agree on the price, including the carriages or stages, which J. D. will provide to go for the persons, and take them back. Near the place is another, where tea will be kept ready on the hour demanded, without the company's being in the least troubled. Ladies will find a room to deposit cloaks, shawls, &c. A subscription is likewise opened for balls, concerts, &c. to be filled with 60 persons, at 25 dollars for once a week. Until the end of April, carriages and stages will go for the company and take them back again. Each subscriber to bring a Lady. Price of refreshments, one shilling each glass." He adds that he has "provided himself with a proper person to attend the said place," and "flatters himself that the public will be satisfied."—Ibid., D 7, 1799. See Ap 14, 1800.

"Resolved, that the Committee of Repairs [of Trinity vestry] have the small Bell and its appendages in St Paul's Church taken down and the same be given to St Marks Church."—Trin. Min. (MS). "It having been suggested to the Board that the Clocks in the different Churches of the City would be better regulated if they were under the direction of the City Corporation who would employ a proper Person to regulate them. Whereupon Resolved that the Corporation of the City employ (during the pleasure of this Board) a proper Person to regulate and keep in Repair the Clocks in St George's, St Paul's Churches, at the expense of the said Corporation."—Ibid.

The common council orders "that the subscription Monies collect'd for Mangin's new Map of the City be paid to the Street Commis'rs who are authorized to advance him $500 on his Note."—M. C. C. (1784-1831), II: 586. See also Ag 14.

The announcement of the death of Washington is published in New York.—Daily Adv., D 15; Com. Adv., D 20; Greenleaf's N. Y. Jour., & Pat. Reg., D 21. His death occurred on the evening of Dec. 14 at Mount Vernon; the formal announcement, as given out by Tobias Lear, his private secretary, was published by Greenleaf in New York on Dec. 25. The newspapers were printed with heavy black borders until Dec. 24, inclusive. There is in the N. Y. Pub. Library an undated broadside, apparently issued at this period, entitled "A summary of the principal events of the life of the illustrious General George Washington." It was printed by L. D. Dewey, 119 Nassau St.

The common council passes a resolution "that it be signified to the several religious Societies in this City as the Worthy of this Board, that they cause their respective Churches to be dressed to mourning," and that their bells "be muffled & tolled every Day from 12 to 1 o'clock" until Dec. 24 inclusive; that "it be recommended to the Owners & Masters of Ships & Vessels in this Harbour to hoist their Colours half Mast" until Dec. 24 inclusive; that "the Members & Officers of this Corporation do wear a black Crape on their Arms for Six Weeks," and that "it be recommended to the Inhabitants of this City to do the like."—M. C. C. (1784-1831), II: 588-89. This was published the next day.—Daily Adv., D 21, 1799. For several responses to this request, vide infra.

Trinity corporation meets at the house of the rector, "the R! Rev'd Bishop Provost," and a committee is appointed for putting the several churches belonging to this corporation in mourning, on account of the death of "the Late Lieutenant General George Washington."—Trin. Min. (MS). Brigade orders for the city and county of New York and the county of Richmond regarding the death of Washington are issued by Brig.-Gen. Hughes, quoting from the division orders of Major-Gen. Clarkson, the statement that "no outward form can shew, nor any Language express, the Feelings which this melancholy Event has exercised in the bosoms of those who, by devoting themselves to the Military Services of their Country, have acquired the proud title of his Brethren in Arms." He recommends that the officers and soldiers of the militia, when in regimental, wear black crepe on the left arm for six months.—Greenleaf's New Daily Adv., D 24, 1799.

"In consequence of the afflictive intelligence of the death of General Washington, the [Park] Theatre will be closed for the ensuing week."—Com. Adv., D 21, 1799. It was reopened on Dec. 30 (q.v.).

Robert Troup writes from New York to Gov. Jay: "... We are taking measures here to pay suitable honours to the memory of this greatest and best of men [Washington]. Our whole city appears to be penetrated with the profoundest grief. Our churches are decked in mourning and solemn music will play day by day at 12 o'clock. Our citizens wear mourning. Mr. Government, at the request of the Corporation, is to pronounce an oration. Committees are forming to concert a general plan for the expression of our grief, and I have no doubt we shall transmit to our posterity the most honorable proof of the consideration in which we hold the illustrious founder of our liberties. ..."—Corres. and Pub. Papers of John Jay, IV: 259. Jay acknowledged this on Dec. 28, with approbation, saying of the proposed oration: "I hope it will not be hurried; it had better be a little delayed than not be finished."—Ibid., IV: 260.

The Tammany Society issues the following notice: "Sachems and Warriors, our Great Chief is no more!—Washington is dead!—Heaven's high decree forbad his longer stay! His feats of War, and deeds of Peace—those places now begin to live!—Haste to rally round our Council-Fire, (This Evening) to chant in solemn Dirge his mighty deeds!—By Order of the Grand Sachem D. Dodge, Sec.—N. Y. Gen. & Gen. Adv., D 23, 1799.

The managers of the Tontine City Hotel publish a notice to the subscribers to the "City Assembly" that the gatherings will commence on the evening of Jan. 2. "The Ladies are particularly requested to appear in white dresses, and to lay their shawls in a full suit of mourning, as a token of respect to the memory of the father of his Country, George Washington."—Daily Adv., D 23, 1799.

Isaac G. Ogden, secretary of the "Philharmonic Society," publishes a notice to the members to attend "at the usual place of meeting" (cf. Ap 23, 1799 et seq.), on the evening of the 26th, to make arrangements "in concert with the other Societies, for paying suitable honours to the memory of George Washington."—Com. Adv., D 24, 1799. The present society of this name was founded in April, 1824 (q.v.). At a meeting of committees from the corporation of the city, and from several societies, held at the city hall, "to make the necessary Arrangements, for paying suitable Honours to the Memory of the late General Washington," the mayor is appointed to take the chair, and resolutions are passed that the funeral procession take place on Tuesday, Dec. 31, and that a sub-committee, consisting of Brig.-Gen. Hughes, Brig.-Gen.-Stevens, Col. Morton, Maj. Fairfax, and Maj. Stagg, have full power to prepare a plan and carry it out.—Greenleaf's New Daily Adv., D 26, 1799.

"A large and elegant collection of War-Work consisting of 56 figures as large as life" was exhibited by N. and E. Street at Snow's Hotel, 69 Broadway. It was removed in May, 1805.—N. Y. Gen. & Gen. Adv., D 26, 1805; Ap 3, 1805. Snow's Hotel was formerly Corre's (see Ja 28, 1791), John Lovett's (see My 7, 1794), Hunter's (see Ap 22, 1797), and Lovett's again (see Ap 22, 1798).

"Regulations relative to the procession for rendering funeral honors to the deceased General Washington" is the title of a broadside of this date, published in New York, a copy of which is in N. Y. P. L. The funeral was held Dec. 31 (q.v.).
A sermon on the death of Washington is delivered by Samuel Miller, A.M., one of the ministers of the United Presbyterian Churches of the city. This was published by T. & J. Swords, N. Y., in 1800.—See copy in the N. Y. P. L.

The "Chevalier d'Orlans" dines at Morristania.—Diary of Governor Morris (1888), II: 180.

"The appearance, on this day, of Miss Juliana Elmore Sands, a beautiful young woman, whose body was found on Jan. 2, 1800, in the well of the Manhattan Company, was for many years a sensational mystery in New York City.---Man. Com. Com. (1861), 632-36; Com. Adv. Jue 3 and 6, 1800; and Harper's New Monthly Mag., May, 1872, pp. 224-25.

The Park Theatre reopen with "The Robbery" and "The Ship-Wreck." The scenery is draped in black, and the words "Mourn, Washington is Dead" are painted in large letters on a black background. Before the performance Thomas Cooper delivers a Monody on the death of Washington.—Spectator, Jue 4, 1800.

A committee on butchers' stalls reports that an hereditary right to the stalls and standings in the Fly Market does not exist, as has been believed.—M. C. C. (1784-1831), II: 593.

This being the day, "appointed by the Citizens of New-York to pay the most Solemn Funeral Honors to the Memory of their beloved Chief and Fellow-Citizen General George Washington," every kind of business ceased, and every thought was "employed in preparation for the melancholy solemnity." The committee of arrangements announced the plans the day before.

"The Citizens, in their Military and Civil Habiments, with the Foreigners of various Nations, all eager to join in testimonies of veneration for the Great Deceased, having assembled in their appointed order, the procession moved under the guidance of Signals, to the mournful sound of Minstre-Guns and Minstrel Bells, in the following order:

Officer and Eight Dragoons,
Sixth Regiment, in Plaatoes, by the left,
With Arms and Colors reversed—Drums and Fife in Mourning,
Eight pieces of Field Artillery, Taken in different Battles during the Revolutionary War from the British, Cavalry, Rifle Company, Military Officers, Officers of the Navy of the United States, Adjutant-General of the United States and Suite. Major Gen. Hamilton and Suite. Citizens. St. Stephen's Society, Tammany Society, In the following order:

[The various tribes, etc. are mentioned at length]
Mechanic Society, Masonic Lodge,
The Lodge mentioned at length
Manhattan Company,
Bank of New-York.
Chamber of Commerce.
Marine Society, Collegians.
Regents of the University.

Music.

Anacreontic and Philharmonic Societies,
In complete Mourning—the grand officers bearing Wands, decorated with crape—the Members wearing their Badges with Crape and Bows of Love Ribbon.

Clergy, in full dress, with white Scarfs.

Twenty-four Girls, in white robes, with white surpplies and turbans, strewing laurels during the Procession.

Committee of Arrangement

Each Pall-Bearer was accompanied by a member of the Cincinnati in full mourning, with a white crepe-bow on the outward arm, and bearing a black Banner, denoting some important act of the deceased. The Pall-Bearers and members of the Committee of arrangement, wore the badges of the Cincinnati and black scarfs with white roses on the bows. The Urn, with its attendant decorations, was supported by eight Soldiers, (with others attending for relief) upon a Bier in form of a Palanquin, six feet by four. This elegant assemblage of Emblems, consisted of a funeral Urn, three feet in height, adorned with black drapery and a wreath. The Bier was placed upon the flat-band, behind which the American Eagle, four feet high, cloud-borne, with extended but drooping wings, appeared to hover over the ashes of the Hero, holding in his beak a laurel wreath; these figures were supported by a rich Pedestal and cornish of burnished gold—Underneath was a second pedestal, rising from the Bier, crowned with black, on the front and rear of which, the Laurel wreath was represented, tied together by the American stripes, and crowned by the American Constellation, the whole on a ground of black.—The sides were adorned with military trophies, composed of Military Standards, Cavalry and Infantry, with the Standards of the United States, and of the Society of the Cincinnati. In the centre of the trophies was represented the Eagle, with the other emblems and mottoes of the Society, surrounded by branches of laurel—the whole decorated with black drapery, fringed and festooned. This superb and appropriate ornament formed an elegant Mass of thirteen feet in height.

Immediately following,

The General's Horse in Mourning,
Led by two black Servants in complete mourning, with white Turbans.

Cincinnati as Chief Mourners, and other Officers of the late War, Corporation of the City.

Eight Dragoons.

Officer.

"On the arrival of the procession at St. Paul's Church, the Military halted, and opening their ranks, made an avenue, through which the Bier and the officials immediately attendant on it, passed into the Church—The Troops leaning on their reversed arms.

"After the Funeral oration . . . the Bier was deposited in Cemetery, and the last Military Honors performed over it. . . ."

---Spectator, Jue 4, 1800.

The expenses of the procession were borne by the city. On Jan. 27, 1800, the committee for arranging and directing it was paid $1,582.91.—M. C. C. (1784-1831), II: 607. The city also paid $31.25 for "Blacksmith Work at St. Paul's Church for the Eulogium on the Death of Gen'l Washington" and $319.2 for candles, $2410 for music, and $2 for other disbursements on this occasion.— Ibid., II: 611.

Peter Gassner, writing in 1859 regarding the Washington obsequies, said: "I saw the mock funeral . . . from a window in Broadway. The large urn, eagle, inverted boots, and girls distributing flowers, are as fresh in my mind, as if occurring yesterday."—Man. Com. Com. (1859), p. 388.

The funeral oration, delivered in St. Paul's Church by Governor Morris, was published in 1800 under the title An Oration upon the Death of General Washington.

Robert Troup, writing on Jan. 1, 1800, to Rufus King concerning the ceremonies, said he considered the Morris oration a failure, as it had "the effect of a cold historical narrative, not that of a
warm, impressive address."—C. R. King, Life and Correspondence of Dec. Rufus King (1836), III: 170. See, however, Ja 6, 1800. Many other orations and sermons were delivered, in other cities, on this occasion, and published in 1800. See N. Y. P. L. catalogue.

At this time the Battery and Bowling Green, where the procession gathered, was profusely set out with the Lombardy poplar trees. From 1800 to 1805, they infested the whole island, if not most of the middle, northern, and many southern states. —Francis, Old New York (1866), 23. Regarding its introduction into New York see Ja. 1709, and Ap 18, 1795.

The city debt at the close of the century was about £15,500 all in bonds.—Man. Com. Coun. (1859), 514.

In 1800—

Probably in this year were drawn, by Archibald (I.) Robertson, two interesting views within the city, one showing the Old Brick Church on Chatham Row, Beekman, and Nassau Streets; the Park Theatre, St. Paul's Chapel, etc. and the other the north-east corner of Wall and William Streets, with the Bank of New York, the New York Insurance Co. and the Bank of the United States, Branch. These drawings are reproduced and described in Vol. I, Pls. 72-a and b.

Probably in this year, John Wood made the sketch of "New York from Long Island" which was engraved by W. Rollinson and issued in 1801. This is one of the most artistic engraved views of the city. It is reproduced and described in Vol. I, Pl. 74. An impression in the author's collection printed entirely in colours must be one of the earliest engravings so printed in this country.

An enumeration of the inhabitants of the city of New York taken by G. W. Wall during the winter of 1800-1 shows that the population numbered 60,489.—Miller Papers in N. Y. H. S. The total is given as 60,515 in the 13th U. S. Census Bull. (1910).

In 1800, "New York had its most fashionable population in Wall and Pine streets, between Broadway and Pearl streets; and also on Pearl street from Hanover Square, (now Old slip) to John street; some along State street; and also in Broadway, from below Wall near to the Battery."—Watson's Annals, 188.

Between 1784 and 1800, "the west side of Chatham street, between Tryon row and Duane (then Bailey) street, was fully built up. One of the leading business places established was that of Peter and George Lorillard, tobacconists. . . . An establishment of more public interest than any other was the Boston Stage-house and Lively Stables, situated on the corner of Pearl (then Queen) street.

"The descent of Catamuts hill having been accomplished, the traveler on the old Boston road, or present Chatham street, reached a principal thoroughfare, leading from the Smiths valley, then a most important part of the city, to the interior. The roads formed a junction and thereafter followed one course to and along the Bowery lane. This road was the present Pearl street, the first street made of which in the vicinity of the Wall Street.

It was extended to the Fresh Water pond at an early period, and several tanneries were erected along its northerly side, a block or more west of the present Chatham street. When the public magazine was erected on the island in the pond [see N 21, 1728] this was the way of access, and hence that portion became known as Magazine street; but, being a natural continuation of Pearl street, the same name was applied after the pond was filled up, the magazine removed, and the old landmarks obliterated."—Man. Com. Coun. (1866), 610-11.

Felix de Beaujour, a Frenchman, describing the United States from 1800 to 1810 made the following remarks about this city: "New York has a more smiling aspect [than Philadelphia] and appears more like a European town. . . . The esplanade called the Battery, standing on the saltant angle formed by the Hudson and the sea in their junction, presents one of the most beautiful points of view that can be imagined. . . ." A wrong plan for the defence of New York has been adopted. This place is too much shut up in the strip of land which it occupies; it is not defended by nature, and it is impossible to do it by means of art, because it cannot be enclosed in a polygon; the most that ought to be attempted is the defence of its approaches."—Beaujour, Sketch of the U. S. of North Am., trans. by W. Walton (1814), 76, 123.

For view of firemen at work, 1800, see old firemen's certificate, reproduced in Man. Com. Coun. (1860), 608.
The city treasurer submits to the common council an "Estimate of the Expenses of the City of New York for the year 1800." Items charge to city and county jointly amount to $30,000; in which is added $10,000 for the city's operating expenses, making a total budget of $150,000.—M. C. (1784-1831), II: 598.

Rev. Samuel Miller, pastor of the First Presbyterian Church, who is writing a history of New York State (see J. A. 1798), petitions the legislature that "a Gentleman of highly respectable character and worthy of the most entire confidence" may be permitted to take the Dutch records in succession from the secretary's office to his home in Albany for the purpose of making translations and extracts for Dr. Miller.—Assem. Papers, V: 107. On Feb. 6 and 7 the assembly and senate passed a joint resolution authorizing James Van Ingen, clerk of the assembly, to remove the Dutch records for this purpose.—Assem. Jour. (1800), 52; Senate Jour. (1800), 23. Dr. Miller soon found that the translations would cost too much for his private undertaking, and he submitted another memorial to the legislature (see J. A. 22, 1801). See also A. J. F. van Laer's report on The Translation and Publication of the M.S. Dutch Rec. of N. Neth. with an Account of previous Attempts at Translation (Albany, 1910).

On account of the sickness prevailing in the last few years at elections in the city, the council requested an account of law suits in the Court of Common pleas called the Mayors Court," as well as for other reasons, the common council resolves that a petition be presented to the legislature begging leave to present the following bills at the present session:

To change the time for holding the annual election of charter officers in this city from Sept. 29 to the third Tuesday in November in every year; and that the persons elected be sworn into their respective offices on the first Monday in December.

To extend the term of the mayor's court from three to five days;

To amend, and incorporate into one statute, all the laws making alterations in the charter of this city; and also such as respect the powers and holding the mayor's court, and the court of general sessions of the peace, and which respect the one only and do not form a part of "the General Laws of the State at large;"

To make certain specified revisions respecting the powers and authority of "the Special Justices for preserving the peace."—M. C. (1784-1831), II: 604-5. See Mr 21.

The senate concurs in an assembly resolution of Jan. 28 for honoring the memory of Washington by shrouding the speaker's chair and the chair of the senate in black, and by seating upon the left arm during the session; also by appointing a committee to take further action on Feb. 22 (g. v.).—Assem. Jour., 23rd sess., 7-8, 11.

The common council orders that a petition, sealed with the common seal of the city and subscribed by the mayor on behalf of the board, be presented to the legislature, stating "that among the various other Causes which probably tend to promote Disease in this City during the Summer & Autumnal Seasons are the Buildings erected in many Parts of the City on Lots of Ground so short as not to admit of Yards of sufficient Size and in many Instances of none at all by which Means those Buildings are deprived of the benefit of a free circulating Air & the Cellars or other Parts thereof become the Receptacles of the Filth & Dirt of the Families. That the Buildings erected on the Lots on each side of Moore Street, the Lots on W. St., and on the North End of Broad Street in the Exchange Slip and the Lots on the West Side of the Fly Market Slip (the Buildings on which are generally very Slight & in many Cases in a decayed Condition) are particularly of this Description, That to remove the Evil it is conceived that if those Lots together with the adjoining Lot could be taken, by an Agreement with the Owners or an Appraisement by Verdict of a Jury, and formed into Lots of proper Size and disposed of to Persons who would erect proper & wholesome Buildings thereon, reserving sufficient Yards, the Health & Comfort of the City would be greatly promoted." The petition is to pray for a legislative provision "for removing the Evil & providing indemnification to the Owners."—M. C. (1784-1831), II: 609.

The Blue Lacy Tavern, at 115 Broadway, only recently completed (see summary under J. A. 24, 1795), is offered for sale. It is described as follows: "The large Brick Building, situated in Broadway, commonly distinguished by the name of the Tontine City Hotel, containing the elegant Ball room, Tea room and Card rooms, made use of by the City Assembly. The premises contain the whole square, bounded on the east side by Broadway, one [sic] the west side by Temple-street, on the south side by Thanes-street, and on the north side by Little Queen-street [Cedar St.], being upwards of 100 feet in front on Broadway, and 170 feet in depth. The House is so well known as not to need any particular description." The terms are ten percent cash; the remainder in six annual payments. Anyone interested is directed to apply to the cashier of the Bank of New York for particulars.—Com. Adv. F 6 to O 29, inclusive, 1800; descrip. of Pl. 125, III: 688; L. M. R. K., III: 577.

The legislature passes "An Act to cede to the United States the jurisdiction of certain islands situate and in and about the harbour of New York." These are "Bedlow's island," "Oyster island" (Ellis Island), and "Governor's island, on which Fort Jay is situate."—Laws of N. Y. (1800), chap. 6 (1 Webster 169). For history of Bedloe's Island, see Ap 20, 1876; for that of Ellis Island, see J. A. 20, 1875. See also Smith, Governor's Island (1925).

This being the day recommended by congress on Jan. 6 (g. v.), and by the common council on Feb. 17 (M. C. 1784-1831, II: 610; N. Y. Gaz. & Gen. Adv. F 20, 1800), to the people of the United States publicly to testify their grief for the death of Washington, all the public offices are closed, business is suspended, and the city exhibits "the appearance of respectful sorrow." Appropriate sermons are delivered in the various churches.—Spectator F 26, 1800. The oration of Rev. John Mason at the Brick Presbyterian Church and the Funeral Eulogy of Dr. Wm. Linn to the Society of the Cincinnati at the Dutch Church were published this year.—See copies in N. Y. P. L.

The common council orders "that Water be taken of the Manhattan Society for the use of the Debtors Goal."—M. C. (1784-1831), II: 611.

The Argus, Greenleaf's New Daily Advertiser and Greenleaf's New York Journal, & Patriotic Register are sold to David Denniston and discontinued with the issues of this date. Denniston established the American Citizen and General Advertiser (on Mr 10) in place of the former and the Republican Watch Tower (on Mr 12) in place of the latter.—Spectator C, 1917, 383, 434; Early Newspapers, III: 422.

"The Cap of Liberty is once more displayed at the coffee-house!" [see Je 14, 1793; My 18, 1795]. Although a miniature, and an appendage to the monument of Washington, it still excites sensations unpleasant to many friends of the good old order of things. It has become so offensive to many frequenters of the Tontine Coffee-House, that we should not be surprised, should an editor, in this waxy picture be removed from its present situation."—Am. Cit. & Gen. Adv. (formerly Argus), Mr 17, 1800. See, further, Je 2.

By act of the legislature, several changes are made in the government of the city: 1. The annual election of charter officers is changed from Sept. 29 ("the feast day of Saint Michael the Archangel," as prescribed in the Dongan Charter of 1686) to the third Tuesday in November, the officers elected to be sworn on the first Monday in December thereafter.

2. In case any of the aldermen or other officers of the city shall "refuse to serve, or die, or remove out of the said city" before the expiration of his term, or if he shall not be "legally qualified to serve," the common council shall call a special election to fill the vacancy.

3. No person shall vote as a freethinker "unless he shall be possessed of a freehold estate, in lands or tenements in his own right or that of his wife, to the value of fifty dollars or above all debts charged thereon . . . and shall have possessed the same (except it came to him by descent or devise) at least one month before the day of such election." Furthermore, the said freethinker may be required by the inspector of election to certify under oath as to such possession.

4. Any one voting as a freeman may be required to testify to three months' residence in the city immediately prior to the election and one month's residence in the ward.

5. The mayor and recorder may hold the court of common pleas called the mayor's court without the presence of aldermen.

6. Courts of general sessions, instead of being held quarterly, are to be held in alternate months beginning in June, and courts of special sessions may be held at any time the common council may
The “handsome Frigate New-York, pierced for 35 guns,” is launched at “the lower ship-yard...” amidst the acclamations of thousands surrounding the citizens. A fire is sent from the “Aspasia,” “Indian,” and the government cutter “Jay,” which are decorated with the “colours of different nations.”

The “New-York” is the voluntary product of New York City merchants—Conn. Gaz., Ap 30, 1800. This vessel is highly praised for her form and workmanship. Mr. Carpenter is the builder, and Capt. Robinson is appointed to her command. It is to be loaned to the government. The statement is published that “Our little navy grows apace. May it soon be fully competent to the protection of our commerce against all insults and depredations.”—Conn. Courant, Ap 28, 1800. See also Daily Adv., Ap 25, 1800, and des. of Pl. 56, 1: 420.

An act of congress, “to make further provision for the removal and accommodation of the Government of the United States,” gives the president power to direct the removal of “the various offices belonging to the several executive departments of the United States” from Philadelphia to Washington, after the adjournment of the present session of congress. It carries appropriations for furnishing the president’s house and the capitol, and for making foot-ways in the city of Washington. Included is this a provision of $5,000 for the purchase of books for use of congress, and $5,000 for putting up an apartment in the capitol to contain them. Laws of U. S. (printed for Mathew Carey, Phila., 1804), V: 150; Acts of Congress (1800), chap. 37.

Gov. Jay writes to the Rev. Dr. Morse: “The approaching general election in this State will be unusually animated. No arts or pains will be spared to obtain an anti-federal representation, in order to obtain an anti-federal President, etc., and through him give other chimeras...”—Corresp. and Pub. Papers of John Jay, IV, 266. See My 5.

A dinner is given to the builders of the three ships of war, “Adams” (see Je 8, 1799), “President” (see Ap 10, 1800), and “New-York” (see Ap 21, 1800). The published report of the event states: “...the awnings of the ship President were handsomely erected over the green and the table, so that when the Belvidere house—A table was placed under them and a very plentiful and elegant entertainment was provided...” Three ships of war, equal in strength of materials and perfection of workmanship to any which it is believed the world can furnish, have been launched in this port within twelve months, and the facility of constructing more increases with our exertions.”—Daily Adv., Ap 26, 1800.

Theophilus Parsons writes to John Jay. “The next election May be an important event... I believe that at this time the universal sentiment of the Federalists is, to support Mr. Adams, with all the activity and perseverance such a measure deserves. The Jacobins appear to be completely organized throughout the United States. The principals have their agents dispersed in every direction; and the whole body act with a union to be envied. There is no more villainy or intrigue among the fellow travelers than among the Jacobins; but they have a system, perhaps, to create a difference of conduct resulting from a difference of sentiment. Their exertions are bent to introduce into every department of the State governments unprincipled tools of a daring faction, to render more certain the election to the Presidency, of the great arch priest of Jacobinism and infidelity.”—Corresp. and Pub. Papers of John Jay, IV, 269-70. See My 7.

Ald. Coles, on behalf of the Manhattan Co., represents to the common council that the company has “determined to erect a large Reservoir for the supply of the City with pure Water,” and that “a Piece of Ground in the highest part of the City in or near the Park” is considered as “most proper for the purpose.” He requests that a committee he appointed to confer with the committee of the Manhattan Co. on the subject of “the most proper place... the quantity of Ground required and what reasonable compensation” ought to be made to the city. The subject was referred to the committee of June 12, 1799 (q.v.).—M. C. C. (1784-1813), II: 625.

In a letter to Gov. Jay, Alexander Hamilton says: “You have been informed of the loss of our election in this City. It is also known that we have been unfortunate throughout Long Island and in Westchester. According to the returns hitherto, it is too probable that we lose our Senator for this District.”

“The moral certainty, therefore is that there will be an Anti-Federal Majority in the ensuing legislature, and the very high probability is that this will bring Jefferson into the Chief Magis
The committee on repairs of St. Mark’s Church is authorised to have a fence erected around the church, which until this time has stood in the open fields.—Memorial St. Mark’s Church (1899), 120-21. For a view of the church in 1799, see ibid., opp. p. 112.

Joseph Corre announces that he “has erected” the “Mount Vernon Garden,” in Leonard Street, two Streets above the hospital... which will open to-morrow after the concert. “Large entertainments will be provided for companies or societies; he has erected a range of buildings to contain tables from thirty to two hundred feet long; and so constructed as to admit said company only, if requested. Tea, Coffee, and Refreshes will also be provided every day till 6 o’clock P.M. As it is his wish to keep his garden genteel and in good order, the tickets of admittance will be 1 s 6 d and for harmony 2 s. 4 d. which will entitle the bearer to the same refreshments as heretofore. To prevent any impositions from the servants, the rules and prices of the different refreshment, will be put in conspicuous places in the garden. Wanted immediately, Two waiters and a cool, who can be well recommended for their honesty and sobriety. Corre adds, “Columbia Garden [see My 5, 1798] is opened on the same principle as above.”—Am. Cat., Gen. Ad., My 14, 1800. See Ag 10, 15, 1801.

According to Bayles, Corre’s Mount Vernon Garden was formerly the White Conduit House.—Old Taverns of N. Y., 399. This, however, appears to be an error.—See L. M. R., III: 980 and 981. See, further, Jl 4 and 9, and Ag 29, 1800.

The common council also states that “They are in the regular receipt of the Gallery of Fashion consisting of a set of elegant coloured prints, periodically issued under this title at London,” also that “their Washington Print is completed and to be seen.”—Daily Ad., My 24, 1800. “Longworth’s Shakespeare Gallery,” with a catalogue of the paintings shown there in 1823, was described by Henry B. Dawson in Old New York Reminisc., 79-88 (no date), in N. Y. P. L. By “the celebrated prints that constitute the Shakespeare Gallery” is doubtless meant the prints published between 1790 and 1804 by John and Josiah Boydell, of London, from the paintings by British artists, illustrative of Shakespearean scenes. The gallery was advertised in the N. Y. Directory, 1801-2. It is also described in Hist. Mag., 2d ser., I: 102.

The common council adopts regulations for the better government of the watch.—M. C. (1784-1831), II: 660-61. One of these provides that “No Aliens shall be employed as Watchmen;” but this was revoked on June 2 and 16.—Ibid., II: 653, 656.

The common council orders that Ald. Coles and the street commissioners “agree with some Person for a Contract to erect a Bridge across Bensonic Creek at Harlem,” and make report—M. C. (1784-1831), II: 650. A payment was made by the city toward this object on June 2; (Ibid., II: 613); another on Oct. 27; (ibid., II: 677); and one on Dec. 29; (Ibid., II: 694).

Leonard Parkinson purchases from William Kenyon for $750 sixteen acres of land north of the “Land late of Colonel Roger Morris” (see Ag 29, 1799). The deed was recorded on Aug. 14, 1800. (See Deeds, LVIII: 595 et seq. In 1810 (p. 9, Mr. 9 and Ap 28), Parkinson sold his property to Stephen Jumel.

John Byrne, keeper of the Tontine Coffee House, publishes a notice to “the gentlemen Auctioneer” that he intends charging on Sales at Public Auction, sold before the Tontine Coffee House, either in Wall, or Water, streets, 8 s. per sale, and at the same rates on all Sales sold in the Tontine Coffee House. He wishes to mention to the gentlemen, that they will not dispose of any articles opposite to the Tontine which may be the least offensive; nor placing any merchandise, or other articles so as to incommode the going in, or coming out of the Tontine, and that all anchors, cables, and other articles, be removed as soon as possible, after the Sales are over.—Daily Ad., Jl 5, 1800. Cf. Pl. 69, Vol. I.

After Byrne’s death (see N. Y. Spectator, S 10, 1801), James Rathwell was appointed keeper on Feb. 13, 1823; John Hyde took it again, May 3, 1804; and, on Nov. 9, 1805, after the fever, it was

May 14 1800

tracy, unless it be prevented by the measure which I shall now submit to your consideration, namely the immediate calling together of the existing legislature.

“In observing this, I shall not be supposed to mean that anything ought to be done which integrity will forbid, but merely that the scruples of delicacy and propriety... ought to yield to the more solid and natural sense of the public interest. It is not on the taking of a legal and constitutional step, to prevent an atheist in Religion and a fanatic in politics from getting possession of the helm of the State. You, Sir, know in a great degree the Anti-Federal party, but I fear that you do not know them as we do. ’Tis a composition indeed of very incongruous materials, but all tending to mislead some of the members of the government by depriving it of its due energies, others of them to a Revolution after the manner of Buonaparte. ... The calling of the Legislature will have for object the choosing of Electors by the people in districts. This (as Pennsylvania will do nothing) will insure a majority of votes in the United States for a Federal candidate. This measure will not fail to be approved by all the Federal Party; while it will no doubt be condemned by the opposite. As to its intrinsic nature it is justified by unequivocal reasons of public safety. The reasonable part of the world will, I believe, approve it. ...—Corresp. and Pub. Pap. of John Jay, IV: 270-72. Jay endorsed this letter: "Proposing a measure for party purposes, which I think it would not become me to adopt."—Ibid., IV: 274 (footnote). Gray, Scudder, writes to the President in behalf of Federalists in Congress," on the same day, and also suggests convening the legislature for the purpose mentioned by Hamilton.—Ibid., IV: 273.

John Campbell (see Ja 5, 1792) again applies to the trustees of the Lutheran Church for a lease of “the burial Church in the Broadway," and his petition is referred to the vestry. At the same meeting it was resolved "that the Church yard in the Broadway be enclosed, partly with a stonewall and a boardfence in a decent manner."—Lutheran Min. (MS). See Jl 8.

Daniel Phoenix, city treasurer, offers the American Museum for sale. His advertisement reads: "To be Sold, the collection of curiosities made by Gardiner Baker, deceased, formerly exhibited in the Exchange, and at present in the building erected for the Panorama in Greenwich-street. ... By an agreement with some of the members of the Tammany Society [see Je 25, 1793], the late Gardiner Baker has bound himself in an obligation, under the penalty of 10 pounds each, to grant to them their wives and children privilege of visiting the said museum [free] from expense; it will therefore he sold subject to this condition: The building in which these articles are at present, was the property of the widow, and any damage or loss to the annual subscription will be sold repaid to her for the remainder of the term ... if not previously disposed of it will be sold at auction on the premises at 11 o’clock in the forenoon."—Com. Adv., My 10, 1800; descrip. of Pl. 95-b, III: 384. The museum was sold to W. L. Waldron (see S 15).

On March 17, the surviving trustees of the proprietors of the “late Negro burial Ground” [see Je 27, 1796] stated in a memorial to the common council (as had previously been done on May 27, 1799) that they were ready to convey to the city the “Gore of Land at the Corner of Broad Way & Chambers Street,” adjoining the northerly side of the almshouse yard, in exchange for “the Conveyance to be made by this Board to the said Trustees.” It was ordered that the conveyance from this board be performed accordingly.—M. C. (1784-1831), III: 548-49, 615. The property described is conveyed to the board releases "of all the Ground to the South of Chambers Street," the board approves the draft of a release to them of "the Ground on the North side of the said Street and also of three certain Lots in the vicinity" (described in committee reports on June 27 (q.v.) and July 19, 1796), and orders that this release be sealed, and that the mayor subscribe to this for the purpose of building vaults at a price not less than $25 for a single vault.—Proc. of the Trustees (MS), Vol. II. For vaults built and sold, if any, vide ibid.

The common council permits the managers of the "State Road Lottery" to use "the Great Court Room" (common council chamber) for the drawing of the lottery.—M. C. (1784-1831), II: 625. See also D 10.

The trustees of the First Presbyterian Church authorise the committee of repairs to dispose of the ground in front of the old church and the property belonging to the purpose of building vaults at a price not less than $25 for a single vault.—Proc. of the Trustees (MS), Vol. II. For vaults built and sold, if any, vide ibid.
THE ICONOGRAPHY OF MANHATTAN ISLAND

10 The mayor presents to the common council a warrant of the state auditor on the state treasurer to pay, to the order of the common council, the sum of $12,865 to defray various outstanding debts for the fortifications. An order on the state treasurer, signed by the mayor, is still arranged to pay this amount to Ald. Bogert, to be by him applied to discharge the accounts.—M. C. C. (1784-1831), II: 634.

11 The rapidity with which the Manhattan Water works in this city go on, is worthy of remark—already six miles of pipes are laid through the principal streets—and upwards of four hundred houses are supplied with water.—N. Y. Gaz. & Gen. Adv. Je 11, 1804. See, further, Jl 6, 1805.

13 The Temple of the Sun... as represented in Kotzebue’s tragedy of Pizarro,” with a number of other elaborate fireworks, is advertised to be shown at the Vanwinkle Garden (Delacroix’s) on this evening. The notice adds: “No Light on the Barn, No Exhibition.”—Daily Adv., Je 11, 1804.

On June 30, a “Patent Federal Balloon, or, Vertical Aerial Coaches,” was advertised at this garden by the patentee, Phineas Parlier. Here, “Valets-dinamiers may experience a restoration of Health, the motion being highly approved of by the faculty, and persons in health may receive the pleasure of being transported in a safe and easy Carriage 1500 feet per minute, nearly 20 miles an hour, slower if they choose. They have a variety of Landscapes frequently in the world, and alternate views of the Waters of the East and North-Rivers, of the City of New-York, and the neighbouring Villages.—Eight persons take seats at a time...” —Ibid., Jl 2, 1800.

The area covered by this Vanwinkle is indicated in an ad. of a house for rent “in Mary street, opposite the east end of Mr. Delacroix’s Garden,” showing that the garden extended eastward as far as Mary St.—Daily Adv., Jl 17, 1800. See, further, Jl 4, 1800.

14 Napoleon defeats the Austrians at Marengo, and comes into possession of the whole of northern Italy.

18 Trinity vestry agrees to give for the support of the charity school the “Lands & bounded on the south by Rector Street in length 172 feet—by Greenwich Street in the west 108 feet 10 inches—by Lots No. 25, and No. 3, on the North and by Lumber Street on the East, including the Charity School House and Grounds now appropriated to its use.”—Trin. Min. (M.S.).

15 Mayor Varick lays before the common council a letter from Dr. Saml Mitchill, professor of natural history, chemistry, and agriculture, at Columbia College, “in which he recommends the use of Lime Stone in the erection of Buildings & paving Streets in this City, in preference to the Heath Stone.” The board ordered that it be printed, and that Dr. Mitchill be thanked.—M. C. C. (1784-1831), II: 636. See also Ag 18.

16 The report of the committee on a plan for the government of the almshouse is read in the common council, and consideration of it is postponed until the second Monday of July. The original report, a lengthy document, is preserved in metal file No. 20, city clerk’s record-room. It is ordered to be printed.—M. C. C. (1784-1831), II: 639. See, further, O 6.

23 Joshua Isaacs, president of the board of trustees of the Congregation of Shearith Israel, writes to the common council requesting that, inasmuch as a recent city ordinance deprives this congregation of the privilege of burying in their own cemetery the bodies of such of their members as die of pestilential disorders, “and as the religious customs of the Jews forbid them to bury their dead in the same cemeteries with those of other denominations,” they ask that part of the potter-field “may be separated from the rest and granted to them, so that they may fence in and partition the same as a burying ground for the exclusive use of their own Congregation.”—From the original MS. in metal file No. 20, city clerk’s record-room. The common council the petition is “read & postponed.”—M. C. C. (1784-1831), II: 641.

A petition dated June 14 comes before the common council, signed by residents in Front St. near the Fly Market, complaining that the street is “almost continually shut by Market Women, Cookley Boys, Coffee tents, &c., and that this injures their business. They ask their removal to the upper part of the market, or “that they may be so arranged that the avenue may at all times be open for Carts & Passengers.”—From the original MS., to metal file No. 20, city clerk’s record-room. The board refers it to the committee on the Fly Market.—See endorsement on ibid.; also M. C. C. June 30 (1784-1831), II: 641. The committee’s report, also endorsed on the petition, dated June 30, expresses the hope “that all such persons as are commonly denounced hucksters and stand below the lower Meat Market of the Fly Market be removed, and that the clerk of the Market provide them with stands opposite the Meat Market.” An advertisement reads: “The American Museum Revived. The Museum will be open for public inspection on the 4th July next at No 226 Greenwich street.”—Am. Cit., Je 30, 1800. See S 15.

The royal assent is given to the act of union of Great Britain and Ireland.—Ann. Reg. (1800), 23.

14 The fourth of July expenses are $10,000 for ringing of bells, $158 for the public dinner (served by Jos. Tyler), and $157-55 for gunpowder.—M. C. C. (1784-1831), II: 643, 644, 645.

At Delacroix’s Vauxhall (see Jl 13) the day is celebrated with cannon-firing, fireworks, and the display of an allegorical structure, in honour of Washington, called the “Temple of Memory” (80 ft. front, 40 ft. high, and 150 ft. in circumference), as well as a large model of Mount Vernon (20 ft. high, 25 ft. long, illuminated with hundreds of coloured lamps).—Daily Adv., Jl 2, 1800. See also programmes of fireworks, etc. here, in Daily Adv., Ag 13, 1803; My 26, Je 18, 1801; N. Y. Gaz. & Gen. Adv. Mt 5 and 7, 1801.

At Corre’s Mount Vernon Garden, elaborate fireworks, as well as busts and figures imported from Europe, are advertised to be shown.—Daily Adv., Jl 2, 1800.

The tavern-keeper, announces that he has removed from “the Circus Coffee House, Greenwich street” to “the Bunch of Grapes, No. 11 Nassau street, near the Federal Hall.”—Daily Adv., Jl 5, 1800. See Mr 30, 1803; O 22, 1806.

“On July 2nd, the vestry referred matter to trustees.—Ibid. See also Vol I, p. 450.

A summer theatre is to be opened on this day at Joseph Corre’s Mount Vernon Garden with a performance of “Miss in Her Tors,” or the Medley of Lovers.” Corre “has engaged several principal performers belonging to the [Park] Theatre, and proposes to exhibit Theatrical Entertainments, on Mondays, Wednesdays and Fridays.”—Daily Adv., Jl 9, 1800. Regarding Corre, see Dunlap, Hist. of Am. Theatre (1832), 277-79. Also see Sonneck, Early Opera in Am., 106-7. The theatre was at the north-west corner of Broadway and Leonard St.—L. M. R. K., III: 985.

“The place late Abraham Morter’s known by the name of Richmond Hill” is offered for lease. “The tenant will have the use of a large and spacious ice-house well filled...”—Am. Cit., Jl 9, 1800. See N 5, 1801.

A curious balloon is thus advertised: “The Great Mustapha, or, a Wonderful Arrocastatique Machine in the Shape of A Giant, Thirty feet high, dressed in a Turkish Habit, is to be seen at the Old Ball Alley, No. 247 Broadway, till the end of the month, when it is to be raised in the air, the same way as a Balloon.”—Daily Adv. Jl 1, 1800.

“Proposals will be received until the 20th inst. for caulking, paying, and painting the Parapet at Fort Jay, Governor’s Island, in the following manner, viz., The top to be caulked, seams paid [covered] with pitch, or coat of tar, and one of tar and Spanish brown, and to be rough cast, with a clean gravelly sand. The inner side to be paid with two coats, the last a lead colour: The outside to be paid also with two coats, the last a grass green; and the Pickets to be painted a Spanish brown. ... [Signed] Ebenezer Stevens, Agt. War Department.”—N. Y. Gaz. & Gen. Adv., Jl 12, 1800.
1802.— .

East river, and possesses the advantage of a perpetual tide, which runs through it with rapidity, and renders it cool, fresh and salutary.

The committee of leases of Trinity Church is empowered "to treat with the Vestry of the Lutheran Congregation for the purchase of a strip of ground at the Corner of Broadway and Rector Street. . . ."—Trin. Min. (M.S.). See Ag 13.

The vestry of Trinity also empowers the committee for the purchase of organs for St. George's and St. Paul's Churches "to furnish from Great Britain Organs for each of the said Churches.

"Ibid.

The common council agrees that "the neighborhood be permitted to erect a Market House of forty feet wide & twenty feet long in Breninos [Spring] Street, west of Greenwich Street, provided the proprietors of the Lots on each side extend the Breach of the said Feet to eighty feet."—M. C. C. (1784-1831), II: 643, 644. Cf. De Vor, Market Book, 375-76. The market was built on Spring St., between Greenwich and Washington Sts. and was called the Spring Street Market.—L. M. R. K., III: 959. See O 27.

The common council passes an ordinance to pave Broadway from "the present pavement" to Leonard St.—M. C. C. (1784-1831), II: 684.

"Butchers in the Fly Market petition the common council for permission to bring into the market, at their own expense, the water from "the Manhattan Water Works, for the purpose of making pickles and cleaning the said Market."—From the original MS. in metal file No. 20, city clerk's record-room. Granted.—M. C. C. (1784-1831), II: 643.

The common council of "the Church of the African Society" (see Mr 21) is to be laid at the corner of Leonard and Church Sts.—Am. Cit., Ji 29, 1800. This society is the Zion African Methodist Episcopal congregation which was organized in 1796. The church was taken down in 1820 (g.v.), and a larger one erected on the same site.—Greenleaf, Hist. of the Churches of N. Y., 321. See also L. M. R. K., III: 930.

Aug.

The common council determines that "to continue Rector Street of its breadth to the Broadway [a] parcel of the Ground appertaining to the old Lutheran Church & now belonging to the United German Lutheran Church is required," and orders that street commissioners "treat with the Proprietors of the Ground so required as to the Price to be given for the same."—M. C. C. (1784-1831), II: 647. See S 8.

The common council receives another communication from Dr. Mitchell (see Je 23), this time regarding sinks and privies, and again the bond orders that it be published for the information of the citizens. —M. C. C. (1784-1831), II: 649.

According to a petition of this date, the market at the foot of Catharine St. (see Ag 19, 1799, and Ap 14, 1800) was "now Building."—M. C. C. (1784-1831), II: 649. On Dec. 29, a payment of $4,921.54 was made for this market.—Ibid., II: 664.

Joseph Corre, "intending to retire from public business," offers the "Mount Vernon Theatrical Garden" (see Ji 9) for sale. He says: ", . . . the street [Leonard] when regulated will raise the garden from 12 to 20 feet above the level of the streets, all around, which will form a proper Mount . . . the main Street [Broadway] is now paving to the very corner of the street which will render the walk much easier; there is a well of good water as good as any in the City."—Daily Adv., Ag 29, 1800. See My 28, 1801.

On examining sealed proposals, the common council awards the care of the public slips and wharfs to Alexander Mowatt, who entered a bid (in behalf of Jotham Post) of $12,010 per annum from Sept. 1, 1800, to May 1, 1802.—M. C. C. (1784-1831), II: 650-52. Post immediately asked permission to transfer the contract to Moses and Daniel Coe, but the board voted against releasing him from his bargain, and Post gave the necessary bond (ibid., II: 662, 664).

Dr. James Tillary makes a report to the public concerning the health of the city. He says: "It has been rumoured over the city, that the yellow fever exists about the Ship-Yards, particularly near George-street. . . . It is very true that the neighborhood of the Ship-yards, and in some other parts of the City, there have been several pretty severe cases of the common remitting bilious fever, which this season never fails to produce; but as far as I have heard, there has been but one death.

"We have reached the first of September without much cause of alarm, and there is good ground to hope, that a merciful Providence intends to shield us this year, from the pestilence we have so much cause to dread."—Spectator, S 3, 1800. See also Medical Repository (1801), IV: 207. See O 30.

The street commissioners inform the common council that they have conferred with the trustees of the United German Lutheran Churches relative to their ground in "the head of Rector Street" (see Ag 15), and that "the said Trustees are willing to dispose of a sufficient quantity of their ground to widen Rector Street to the same width as the Street of Trinity Church," and agree as to the price. "The land desired is "Eleven feet in width, commencing in the rear nine feet four inches in front on Broadway and ninety seven feet six inches in length on each side." The commissioners suggest that the board "have recourse to the Law on that Subject."—M. C. C. (1784-1831), II: 653. The original MS. report is in metal file No. 20, city clerk's record-room. On Oct. 29, a jury awarded the Lutheran Church $1,000 for the land.—Lutheran Min. (M.S.), under Mr 9, Je 30, and S 2, 1821. On May 18, 1801, the common council paid $1,500 to "The Corporation of the United German Lutheran Churches in the City of New York" for the Ground taken of them to widen Rector Street agreeable to certain Proceedings had on the 29th Oct last in the Mayors Court of this City.—M. C. C. (1784-1831), II: 738.

There is read to the common council a petition dated Aug. 26, 12, and signed by 51 petitioners, beginning with Elizabeth Mannell, and including Aug. Van Cortlandt, Alex. Macomb, Jacobus Dyckman, A. Hamilton, James Beekman, J. Schieffelin, and others, which states that they, and the public in general, "suffer great Inconvenience, and Danger, from the public Road, as it now runs between the nine & ten Mile Stones, through the Land of Doct. Samuel Bradburth, ascending that very difficult & dangerous Hill [on Harlem Heights], being the only direct Way of Communication for the State at large to the City." They believe "there can be a more easy & safe Road made for public Convenience . . . that the Road may be altered greatly for the better by passing up on the west Side of the Valley, where a Sufficiency of Land can be purchased for a Road, & made & kept in Repair at less Expense, than the present one."—From the original MS, in metal file No. 20, city clerk's record-room; M. C. C. (1784-1831), II: 653.

The street commrs, to whom this was referred, reported on Oct. 6 in favour of the petition, stating that Dr. Bradburth would take $1000 for the ground through which the road would pass.—Original MS. in metal file No. 20, city clerk's record-room. Cf. Ap 1, 1799.

The committee on Sam. Blackwell's petition relative to establishing a ferry and laying out a road at Hora's Hook (see N 18, 1799), reports "that they have Caused a Survey to be made agreeable to a plan herewith presented," also that they have interviewed proprieers concerning the purchase of the ground, and, as they cannot agree upon a price with them, they recommend submitting the question to a jury. The road description, which is entered in the minutes, shows that the road is to begin at the East River at high-water mark, 15 ft. north of Archibald Gracie's boundary line. condemnation proceedings (to borrow the modern term for the legal proceeding) are initiated to ascertain the value of the land.—M. C. C. (1784-1831), II: 663-64. Regarding the ferry, see ibid., II: 739, 737-38. On May 18, 1804, 5775 was paid to Arham Good Will, and $5,000 to the devoise of Nicholas Cruger's for the road rights.—Ibid., II: 738. On Aug. 3 of that year, the board ordered the street commrs to "immediately proceed to open & make the said Road."—Ibid., III: 15. On Aug. 17, the board
THE ICONOGRAPHY OF MANHATTAN ISLAND

1800 refused to consent to an alteration in the road, on Mrs Cruger’s Sept. petition; but on Sept. 14 ordered the street com’rs to determine by survey whether “the new road to Horns book” should be altered—3rd., III: 18, 26.

11 Wm. C. Thompson (see D 6, 1796) offers for sale “A part of the Tea Water Pump, consisting of Ten Twelfths of the whole. The whole property consists of 3 lots of Ground, each 120 by 25 feet, with the Pump and Houses.”—Am. Cmt., S 11, 1800.

15 Jonathan Dayton and Aaron Ogden having requested permis-sion to erect a wharf or pier on the west side of the Whitehall Slip for the exclusive use of the Staten Island and Elizabeth-town ferry-boats, the common council agrees to a committee report which states “That this slip from its local Situation Seems to be the natural point of Communication with Staten Island, Elizabeth Town and many other parts of New Jersey, and is the only Landing place for the Ferry Boats from those places, but from its present unimproved State Horses and Carriages Committee be to allow these Boats except at high Water, and their Numerous Passengers some old and infirm and Women and Children, are not unfreq-ually in bad and windy weather obliged to Climb across the Decks of Several Vessels loaded with Hay and other Lumber to get out and into these Ferry Boats—Your Committee therefore recommend that a Peir be built from the inner part of the White Slip out into the River adjoining of the Battery, and for a plan made by Robert Valentine and now laid before the Board, which will likewise give very Considerable Accommodation, to the River Crafts and the many Boats that are Constantly Communicating with the Shipping in the lower Harbour—Mr. Ryers and Mr. Crane have both Offered to build this Peir at their own expense Provided the Corporation will give them a Lease thereof for Twenty-one years, but Your Committee are of opinion that the Various Public Accommodations that this Peir will afford are too important for the Corporation to put it out of their Power and Control.

There are thirteen Elizabeth Town and Staten Island Ferry Boats Mr. Crane who has Leased the five former for three Years, Offers thirty Dollars for each Boat per Annum for the Accommodations and Services in the Peir and Street and will afford him, and the owners of the Staten Island Boats will probably pay about half that Sum for each Boat of theirs.” The board orders that the committee “take Measures for obtaining Proposals to build the said Pier on Contract.”—M. G. C. (1784–1813), II: 647, 654.

In a petition to the common council, dated Aug. 12, Jacob Hansen, Henry Siegler, Philip Webbers, Jacob Shute, John Hopper, and Andrew Shute offered the following appeal: “That your Peti-tioners being residents, with sundry others, in the Seventh Ward, at or near the district called Bloomingdale, finding it inconvenient to attend public worship in the City at such a distance, and observ-ing that many, in consequence of that inconvenience, neglect such worship altogether; have a desire of erecting a Church for the accommodation of themselves and their neighbours. That, as they are in a situation and the buildings in the Ward are not eligible for this purpose, they have concluded, the spot where the cross-road over Jackson-bergh, near the four mile stone, meets the middle road, would be most central and best meet the wishes and convenience of the neighbourhood.

That, as this ground belongs to the Corporation and now lays in common and unimproved, your Petitioners, . . . take the liberty to request that so much of that land as will suffice for erecting a Church and School house and laying out a Cymetry, may be granted to them as Trustees for the purpose, as it is probably an object of growing importance for the City in general to have extensive burial grounds provided at a competent distance, your petitioners humbly suggest, whether it would not be proper to have the Cymetry ample spacious and large.

That your petitioners engage to release the ground to the Corporation of the said Church, which is intended to be of the denomination of the Dutch reformed Church, as soon as the same shall be organized, . . .”—From the original MS. in metal file No. 10, city clerk’s record-room. After reading the petition, the common council resolves “that the public Grounds which remain under me, be reserved for the same purposes & there-fore that it would be inexpedient to grant the prayer of the said Petition.”—M. G. C. (1784–1813), II: 655. The first “Hansen-ville” church was erected in 1814 (q. v.).

W. I. Waldron offers for sale “the American Museum consisting of a valuable collection of Natural and Artificial Curiosities, to-gether with a great number of excellent Paintings—the lease of the lot on which the same present stands, and also the building.”—Am. Cmt., S 15, 1800.

The trustees of the First Presbyterian Church order that “The Rail-fence in the front of the Old Church he made new . . .”—Proc. of the Trustees (MS.), Vol. II.

Hugh Gaine, in a petition to the common council, acting for a number of inhabitants of Greenwich St. in the Seventh Ward, asks permission “to erect a Market on his ground opposite Leonard Luxperand’s, Esq. in the said Ward, upon the same Terms, and under the same Restrictions they have done to those that have lately applied to them for the like Favour.”—From the original MS., in metal file No. 20, city clerk’s record-room; M. C. C. (1784–1811), I: 566. See Jl 22 and O 27.

Representatives of France and the United States sign at Paris a convention by which peaceful relations between the two countries are restored (see Je 13, 1798); the treaty of 1783 is annulled, and all spoliation claims of American citizens against France are post-poned. On Feb. 18, 1801, the U. S. senate ratified the convention after expunging the article regarding spoliation claims and limiting the treaty to eight years. Bonaparte signed it on July 31, 1801, with the proviso that the elision of the second article should be made by referral to the article related. The senate also agreed to this, and the United States thus assumed France’s obligations to American citizens.—

Laws of U. S., 7th cong, 2nd sess., sec. 19–xlviii; Avery, Hist. of U. S., VII: 214–16. “The claims for indemnity thus involving upon the United States, known as the French Spoliation Claims, have been from that day to this the subject of frequent report and discussion in Congress.”—Winson, VII: 367 (footnote). See also D 1, 1872.

The common council adopts extensive “Rules for the Government of the Alms-House” (seeJe 23). The board ordered, on Jan. 12, 1801, that 300 copies of the rules be printed. One of these was sent to the board and was to be attached to the entry in the minutes, which records the adoption of the rules.—M. C. C. (1784–1813), II: 661– 73, 700.

“there are upwards of 50 three-story houses, and nearly the same number of two-story, now building in this City, a striking proof of the growing popularity of New York.”—Spectator, O 8, 1800.

Richard Crosby begins a course of lectures and experiments in aerostation at the Adams Hotel, William St. On Oct. 27, he launched a balloon from Mount Vernon Gardens.—Daily Ado., O 14, 30, 1800.

A pamphlet entitled Letter from Alexander Hamilton concerning the Public Conduct and Character of John Adams, Esq., President of the United States, appears. This reviews Adams’s public life from the commencement, denouncing the man without a “fortunate foibles of a vanity without bounds, and a jealousy capable of discoloring every object,” and strongly criticizes his administration, particularly his French policy.—See copy in N. Y. P. L. and Hammond, Hist. of Political Parties in the State of N. Y. to 1840, I: 147–52. “The plan of Hamilton was to print it privately and send copies to men whose good will and influence were necessary to secure Pinckney’s election to the presidential chair. But his scheme was defeated, for scarcely had the printer put the pamphlet in type when a copy was procured from the office, carried to Burr, extracts prepared, and sent off at once to the chief Democratic newspapers in the States.”—McMaster, Hist. of People of the U. S., II: 594–5. Adams took no public notice of the pamphlet, but Noah Webster and a number of others issued answers to it.

For a list of some of these replies, see ibid., II: 597.

The common council orders “that the Market House lately 27 erected between Greenwich Street & the River in the 6th Ward [see Jl 21] be called & known by the Name of Greenwich Market.”—M. C. C. (1784–1813), II: 677. However, the market was generally called the “Spring Street Market.”—De Voe, Market Bills, 375. See also a public Sey market, S 519.

“The Floating Engines,” long expected (see Ja 18, 1797), have arrived from England, in charge of the “gentleman [Mr. Howell] who went from this place to superintend the manufacturing of the same.” Two engines, “on an entire new plan, on carriages with
CRONLGY: THE RECONSTRUCTION PERIOD: 1783-1812

1801

A manuscript survey of the Collect Pond, made this year by Charles Loss, C.S., is reproduced and described in Vol. I, Pl. 58a. This is the earliest survey of the Pond and its immediate surroundings which has been found, although Valentine’s Manual for 1856 contains a reproduction of an interesting sketch, drawn from memory by David Grim, showing the Pond and its immediate vicinity in 1742. See also descpr. of Frontispiece II, Vol. III.

During this year, the grounds of the New York Hospital were "inclosed with a brick wall and converted into gardens for the accommodation and benefit of convalescent patients."—Account. N. York Hosp. (1804, 4, 4, 5; 1805, 5, 3), preserved in N. Y. H. S.; descript. of Pl. 88, III: 571.

The common council ordered that the clerk "negotiate a purchase, on behalf of this Board, of the eight Lots of Ground belonging to Lewis Pintard & which project into the public burying Ground in the 7th Ward, at the price of one thousand Dollars."—M. C. C. (1784-1811), II: 689.

1805

The common council ordered that the clerk "negotiate a purchase, on behalf of this Board, of the eight Lots of Ground belonging to Lewis Pintard & which project into the public burying Ground in the 7th Ward, at the price of one thousand Dollars."—M. C. C. (1784-1811), II: 689.

1850

The common council ordered that the clerk "negotiate a purchase, on behalf of this Board, of the eight Lots of Ground belonging to Lewis Pintard & which project into the public burying Ground in the 7th Ward, at the price of one thousand Dollars."—M. C. C. (1784-1811), II: 689.

1801

A manuscript survey of the Collect Pond, made this year by Charles Loss, C.S., is reproduced and described in Vol. I, Pl. 58a. This is the earliest survey of the Pond and its immediate surroundings which has been found, although Valentine’s Manual for 1856 contains a reproduction of an interesting sketch, drawn from memory by David Grim, showing the Pond and its immediate vicinity in 1742. See also descpr. of Frontispiece II, Vol. III.

During this year, the grounds of the New York Hospital were "inclosed with a brick wall and converted into gardens for the accommodation and benefit of convalescent patients."—Account. N. York Hosp. (1804, 4, 4, 5; 1805, 5, 3), preserved in N. Y. H. S.; descript. of Pl. 88, III: 571.

The common council ordered that the clerk "negotiate a purchase, on behalf of this Board, of the eight Lots of Ground belonging to Lewis Pintard & which project into the public burying Ground in the 7th Ward, at the price of one thousand Dollars."—M. C. C. (1784-1811), II: 689.

1801

A manuscript survey of the Collect Pond, made this year by Charles Loss, C.S., is reproduced and described in Vol. I, Pl. 58a. This is the earliest survey of the Pond and its immediate surroundings which has been found, although Valentine’s Manual for 1856 contains a reproduction of an interesting sketch, drawn from memory by David Grim, showing the Pond and its immediate vicinity in 1742. See also descpr. of Frontispiece II, Vol. III.

During this year, the grounds of the New York Hospital were "inclosed with a brick wall and converted into gardens for the accommodation and benefit of convalescent patients."—Account. N. York Hosp. (1804, 4, 4, 5; 1805, 5, 3), preserved in N. Y. H. S.; descript. of Pl. 88, III: 571.

The common council ordered that the clerk "negotiate a purchase, on behalf of this Board, of the eight Lots of Ground belonging to Lewis Pintard & which project into the public burying Ground in the 7th Ward, at the price of one thousand Dollars."—M. C. C. (1784-1811), II: 689.

ance of Public Patronage to the Shakspeare Gallery." He stated—

"That the Prints and Paintings in this collection are already very valuable." It was at "11 Park."—N. T. Directory, 1801-2. For description of the gallery, see My 24, 1800.

4 - The building in 1808 and 1809, three hotels, of occasional local prominence in the news of the day, were Matthews Hotel, No. 34 Nassau St. (see N. T. Eve. Post, D 5, 1801; N. T. Herald, My 12, 1804); Coon's Tavern in John St., where the annual election of governors for the N. Y. Lying-in Hospital was held in 1803 (see N. T. Gen. & Gen. Adv., Mr 30, 1803); and Raper's Tavern, on the Bowery Road, where the butchers met as an organized society (see N. T. Herald, Ja 30, 1809).

- In about this year, Wm. Charles, a Scotch engraver and publisher, came to New York. He "engraved in line, stipple, and in aquatint; but he is best known by his series of caricatures chiefly of events connected with the War of 1812 or with local politics." He removed to Philadelphia about 1816.—Stauffer, Am. Engravers on Copper & Steel, i. 45. See also Dunlap, Hist. of the Arts of Design, III: 289.

- In this year, Buffalo, N. Y. was founded by the Holland Land Co. It was at first called "New Amsterdam," but later assumed its present name.—Smith, Hist. of Buffalo and Erie Co., III: 13-23; Ketchum, Hist. of Buffalo, 143 et seq.

A committee of the Manhattan Co. applies to the common council to lay "the Right to the fresh Water Pond," and the board appoints a committee to confer with them.—M. C. C. (1784-1831), II: 694. See, further, Mr 25.

- The common council passes an ordinance for filling up and raising Greenwich St. with wholesome earth "from the end of the present Pavement to the Bridge at Bastilles Killieket" before March 15—M. C. C. (1784-1831), II: 694.

- Jos. Delacroix, on offering his Vauxhall, at 111 (now 126) Broadway (the site of the Equitable Building), for sale or rent, describes it as having "two stores in front." The house is "31 1-2 feet front, 146 deep, and two stories high, connected with a long building that two stories more might be raised upon it with very little expense." There is "a fine garden with fruit trees—a new stone cistern, a very large ice-house; and a large room in the rear of the garden, 26 feet deep, and 37 1-2 front." He gives terms of payment.—N. Y. Gen. & Gen. Adv., Ja 9, 1805.

- The place was not sold, however. Although Delacroix was carrying on his second Vauxhall, on the Bayard place, farther up Broadway (see L. M. R. K., III: 981; and My 1, Jl 4, 1798; Jl 4, D 7, 1799; Ap 14, etc., 1800), he continued in possession and operation of the first at 126 Broadway as a large, garden, conservatory, florist, distillery, and retail store (see D 7, 1799; Ap 14, 1800). On June 6, 1801, he established the firm of Jos. Delacroix & Son "in the Confectionary business" here.—Daily Adv., Je 6, 1801. The next year, he added to his stock at this address "genuine beautifying Perfumery, the most in vogue in Europe."—Ibid, D 18, 1802.

- Delacroix had established his third Vauxhall on the Astor property, near the present Astor Place (see Je 30, 1804; Ap 20, Je 5, 25, Jl 4, 1805), he again offered his property at 112 Broadway for sale.—See Jl 24, 1805.

- The common council adopts a committee report which recommends that the proprietors of lots on South St., between Whitehall St. and the Fly Market, be required to build fifteen piers before Nov. 1, 1802. These piers are considered "of the first importance to the Commercial Interest of this City, more especially as the Corporation have caused the permanent Line within that Space to have been Completed and thereby have Deprived the Shipping of the Accomodation they heretofore had at the Old Piers." The exact position of each pier is prescribed. The order requires that each shall be 160 ft. long and 30 ft. wide, "and to be formed by three Blocks or Butments of thirty feet each and three Bridges of the same Size," and that they shall be declared in the grants to be "Publick Highways and Subject to the future Ordinances of Corporation as the Public Streets of the City now are."—M. C. C. (1784-1831), II: 698-99. On Feb. 23, the board appointed a committee to report "the most proper manner for effecting the Measure."—Ibid, III: 712. On June 1 (q. v.), an ordinance was passed for building the piers.

- The "Committee of Federal Freeholders of the City of New York" sends a letter to Gov. Jay upon his intended retirement from public life. The letter states in part: "To attempt to retrace the variety of arduous and honorable exertions which have marked your public career, would be an office to which we do not feel ourselves equal. Neither does it require our testimony to record, what will ever find an indelible memorial in the minds and hearts of the enlightened and just, that in the great events which accom plished the American Revolution, you were among the most conspicuous. . . . The part you acted in forming the constitution of the State, and in promoting the adoption of the National Government, the important treaty which terminated the controversy for independence, and the Convention which lately preserved your Country from being involved in another perilous war . . . are a few of the many Acts that bear witness to the truths we have mentioned."—Corresp. and Pub. Papers of John Jay, IV: 286-87. On Jan. 27, Jay sent an appreciative answer to the letter.—Ibid, IV: 288-89.

On reading a letter from Thomas Morris to the mayor on the subject of Compensation to Major L'Enfant for his Services in planning & rebuilding the City Hall for the accommodation of Congress agreeable to the Resolution of this Board on the 12th October 1789 (q. v.), the common council determines that "on Major L'Enfant's making Application himself the same would be taken into consideration."—M. C. C. (1784-1831), III: 701. This action was probably promted by L'Enfant's refusal to accept, in 1790 (q, v., My 14), the 10 acres of Common Land. See, further, Je 8, 1805.

"We learn that many Century Sermons have been lately preached, recapitulating the principal events of the Century lately closed. These, when published, will be valuable additions to our stock of materials for a history of the United States."—Com. Adv., Ja 19, 1801.

The first parliament of the United Kingdom of Great Britain and Ireland meets in London. The king's address was delivered on Feb. 2.—Ann. Reg. (1801), 42, 207-8.

Dr. Samuel Miller addresses a petition to the legislature asking it to make measures for the translation of the Dutch records (see Ja 22, 1800) "at the expense of the State."—Assem. Papers, vi: 283. For the legislature's action, see Mr 25.

Five Indian chiefs, four Senecas and one Tuscorora, accompanied by their interpreter, arrive in New York on their way to Washington. They left the city on the 30th.—Com. Adv., Ja 26, 1805.

Following the board's decision of Jan. 19 (q. v.), P. Charles L'Enfant presents a memorial, dated Jan. 23, to the common council in which he says that in 1789 he was "planned & superintended the making of various alterations, Additions & Improvements to the & to the Building called the City Hall . . . so as to fit it for the reception & accommodation of Congress."

"That the Edifice as so altered & improved met with the general approbation of Congress, of the then Officers of your Corporation, & of the Citizens at large, & was considered as a work ornamental, & reputable to the city.—That the execution of the plan required great attention & exertion on the part of your Memorialist as the time for accomplishing the object was short."

"That the Corporation, besides an expression of its sense of the Services of your Memorialist, pass'd a resolution for granting him Ten Acres of the Corporation City property as a compensation for the same [see O 12, 1789]."

"That your Memorialist has never receiv'd the grant intended, or any remuneration for the services upon which the occasion, which he has stated.

"That a change of situation which has reduced him to the greatest pecuniary distress obliges him to depart from his original intentions on the subject and address himself to the justice of your honorable Body for realizing to him a competent reward for his exertions."

"That if the Lots shall have been otherwise dispos'd of he is willing to accept in lieu of them such an equivalent as to your body shall appear reasonable & just.—Nor can he doubt that in your honor & liberality will be found a sure pledge to him for the success of an application founded upon the basis of unquestionable right, and recommended by a situation every way entitled to sympathy."

"For which your Memorialist will be happy to make his sincere acknowledgments."—From the original MS., in metal file No. 25, city clerk's record-room.

On reading the petition, the common council resolves to allow
Maj. L'Enfant offered $790 "in full discharge of all further claims against this Board for or on Account of his said Services," and directs the mayor to issue his warrant accordingly.—M. C. C. (1784–1831), II: 703-4. See, further, F 16.

Feb. 7 The new City Tavern, at 115 Broadway, is again offered for sale (see, F 8, 1809). This time, the notice adds: "If not previously disposed of, it will be sold at public auction at the Tontine Coffee House on the first Tuesday in March next."—Com. Adv., F 7, 1801.

At the same time, it was in active operation as a hotel. It was the meeting-place of the Federalists (Daily Adv., F 19 and Ap 13, 1801), and the scene of concert and ball (Com. Adv., F 18, 1801).

A map of the Fresh Water Pond (the "Collect"), and of adjacent streets and lots, bears this date. It is filed as map No. 152 in the "Topographical Bureau" (formerly "Bureau of Design and Survey") in borough president's office, Municipal Bldg.; and is reproduced as PL 38-a, Vol. I. See reference to it under Mr. 25.

The electoral votes are counted in the house of representatives, with the following results: Thomas Jefferson, 73; Aaron Burr, 73; John Adams, 65; Charles Pinckney, 64; and John Jay, 1. The house thereupon begins to ballot to determine which of the two highest candidates shall be president. The Republicans vote for Jefferson and the Federalists for Burr, with the result that eight states (including New York) are found to be for the former, six for the latter, and two divided. Nine being necessary for a choice, the vote stands without change upon the second ballot. On the third ballot the Federalists finally gave in, and Jefferson was elected on the thirty-sixth ballot by the votes of ten states.—Annals of Cong., 6th cong., 1022-34.

The common council orders that the road committee take measures for the completion of the old stone masts on the Post Road from the city hall to Kingsbridge, and to set up new stone masts in the present three-mile stone up the middle of the road, and across Benson's Creek to Cole's Bridge across Harlem River.—M. C. C. (1784–1831), II: 708. See also L. M. R. K., III: 960-61.

"On reading a letter from Elias Kane to the Clerk covering a letter from Major L'Enfant to Mr. Kane, in which the Major signifies his unwillingness to accept the Allowance made him by this Board the 26th Ulto. 3d for his services in planning & directing the Improvements to the City Hall for the accommodation of Congress in 1789 & requesting this Board to reconsider the subject & make him a greater Allowance," the board determines "not to reconsider the subject."—M. C. C. (1784–1831), II: 709. See, further, Ap 17, 1820.

Francis Childs and Sarah, his wife, convey to the United States for the purpose of being used as a public property.—House Ex. Doc., 41st cong., 33 sess., No. 15, pp. 4-5.

Mar. 4 The Baptist meeting-house in Gold St., established in 1760 (q.v., Mr. 14), is removed.—Benedict, A Gen. Hist. of the Baptist Denom. (1813), I: 540; Life of Spencer Huntington Cane, by his son (1806), 249. The new one built there was opened on May 2, 1822.—N. Y. Ed. Post, My 1, 1822. See also L. M. R. K., III: 928.

"It is said that an attempt is to be made in Congress for the temporary removal of the seat of Government, and that New-York is contemplated as the place of removal."—Com. Adv., Mr 3, 1801. On March 4, announcement was made that "The idea of removing the seat of government from the city of Washington has been relinquished."—Ibid., Mr 4, 1801.

The Republicans of New York City hold a celebration in honour of the auspicious occasion. The Federalist papers make no mention of this, but a Republican newspaper thus describes it: "The day was ushered in by the discharge of 16 cannon from the Battery, and the ringing of bells. Early in the day the colors of a principal part of the persons in the harbor were hiasted. At ten o'clock the artillery and principal uniform companies met at the Battery, where they formed a procession, the rear of which was composed of a great number of respectable citizens, and proceeded up Broadway to the Presbyterian Brick Church, where the military divided and presented arms, while the citizens passed and took their seats, during the whole scene of a hand and a band. At twelve o'clock the artillery at the Battery again fired, and was immedi-ately followed by a salute from the fort at Governor's Island; after which the Essex frigate... fired 16 guns, which were succeeded by the same number from the U. S. brig Richmond. After the oration, the military again formed, and proceeded down Beekman street, into Pearl street, thence up Wall street, to the City Hall, down Broad street, and through Beaver street to the Battery, where they paraded, fired a feu de joie and dismissed to partake of an entertainment prepared by Messrs. Adams, Maturin and Spier;..."—The day closed with a discharge of cannon and the ringing of bells."—Am. Crit., Mr 5, 1801. See also M. C. C. (1784–1831), II: 717-18.

On a representation by the street commissioners, the common council decides to bear the expense of filling in the west side of "the Causeway opposite the Meadow Ground of Mr. Anthony Lisenard," which, by the present regulation of Greenwich St., "will become in a dangerous Situation."—M. C. C. (1784–1831), II: 715.

At the same time, the board orders that the street com'r's "enquire into the State of the Corporation property along the Hudson to the end that those who use it may be called on for compensation."—Ibid., II: 715-16.

The legislature, by an act "for the better support of the public buildings in the City of New York," appropriates that part of the annual sum of $12,500 for five years starting from Feb. 1, 1800.—Law of N. Y. (1801), chap. 26. On March 2, 1801 (q. v.), an act was passed to continue this donation for another five years.

The legislature passes the following resolution: "That the Secretary of this state be authorized to permit James Van Ingen to take certain volumes of the records of this state, written in the Dutch language, in succession, from the Secretary's office to his own dwelling-house, in the city of Albany, for the purpose of making such translations as in the opinion of the Comptroller, Surveyor-General, and the said James Van Ingen, shall be deemed useful in aiding the Rev. Samuel Miller in collecting materials for his history of New-York [see Ja 19, 1798, Ja 22, 1800, and Ja 23, 1801], and that legislative provision shall be made for paying the expenses attending such translations; and that the same shall be entrusted to the care of the said Samuel Miller for the term of years, in order to aid him in completing the history aforesaid; which translations shall immediately hereafter be deposited in the Secretary's office for the use of this state."—Assembly Jour. (1800-1), 221; Senate Jour. (1800-1), 94. This was the first legislative provision for the translation of part of the records at public expense. No translations, however, appear to have been made under this resolution.—Van Laet, The Translation and Publication of the MS. Dutch Rec. of N. Neth. with an Account of Previous Attempts at Translation (1910), 9. For the next step, see Ap 9, 1805.

The common council adopts conditions for letting out "the new Ferry from Catherine Slip to Sands Wharf at Brooklyn."—M. C. C. (1784–1831), II: 732-21, 732. See Ap 4.

The common council orders "that the St. Commis's agree with a competent Person to take the Charge of regulating the public Clocks in this City for any Sum not to exceed $500 per Annum."—M. C. C. (1784–1831), II: 732.

The committee appointed on Jan. 5 (q. v.) reports as follows on the Manhattan Co.'s application relative to the Collect Pond: The company has "caused a Survey to be made of the Colic & the Ground around it [see F 10] & have marked out the lines of the Ground that will be wanting for the use of the said Company as will appear by the Survey accompanying this Report;" and the committee is "of Opinion that it would be inexpedient for this Board to take any Measures on the subject; but leave it to the operation of Law." The board agrees.—M. C. C. (1784–1831), II: 722.

The legislature passes an act "for the more effectual prevention of fires and to regulate buildings in the city of New York. There are restrictions on building houses of certain construction within certain limits, and penalties for violation of this requirement. Certain earlier acts on the subject are repealed. This act relates also to the appointment and exemption of firemen.—Law of N. Y. (1801), chap. 83.

The legislature passes a police act "more effectually to discover and apprehend offenders in the city of New York." The police
Resolved that the Burying ground . . . be enclosed with wall and boards in a decent manner.

Resolved that a new vault be built at the lower end of said burying ground in lieu for the one which now will come in the Street, and of course must be taken up. Resolved that the several corps to be taken up, be carefully and in the most decent manner removed to the new vault.—Lutheran Min. (MS.).

One who has been absent from New York for ten years describes the changes he sees: "In 190 the Battery was extended by docking out into the river; the old Fort was levelled, and the Government-House erected in its place: these great improvements paved the way for others.—Mr. Watson built his elegant Houses in State street [see Pl. 56], and in 1792 [q. v.] Mr. Hammond built his first good House in the field—and, with a liberality and taste that did him honor, planted, at his own particular cost, the Park, which the Corporation immediately enclosed. In 1799 [q. v., Ap 2] the Manhattan Company was established for supplying the city with water. All the principal streets are now handsomely paved, and . . . kept clean and respectable. In 1790, few besides old houses were to be seen; they are now almost obscured by new ones.

"When I left London the common topic in conversation respecting America was, the great improvement, extent and prospect of the city of New York—O. . Beckman-street [is] not yet opened to Crane-wharf. . . Orange-street, near the Tea-Water Pump, has been opened to accommodate a Rope Walk; Banker street . . . has been opened to Pearl-street, while Beckman-street, in the busiest part of the city, is kept a standing irregularity, inconvenient to all, and a prejudice to the value of the property it would improve by passing through.

"Chelastre is another blind gut that would, by opening to Pearl-street, benefit the constitution and health of the city, as well as the proprietors of the ground. . . ."—Com. Ado, Mr 28, 1800.

"A Citizen" answering this communication on April 7, said: "It is a singular and striking paradox, that in proportion to the excess of the city's property in this city, our comforts are diminishing. Our lots are become so valuable that we quarrel with our neighbours for a quarter of an inch of ground; and we build our houses so high and so close together, that we exclude light and fresh air. In a little time if we go on in this track we shall shut out ourselves. There is not one convenient thoroughfare between the North and East river, and there is hardly one merchant in New York but sees the end of it.

"The shipping of the port increases faster than we provide docks—Why not plant mooring chains in the stream for empty vessels to make fast to?"—Ibid, Ap 7, 1801.

The legislature passes an Act to provide against infectious and pestilential Diseases. A "health-office," under the superintendence of three commissioners, is continued in N. Y. City, and the act in the health condition of the city and counties. In 1805, this act was published, with an appendix of extracts from the supplemental acts relating to the health of the city, dated April 2, 1805, Feb. 28, 1804, and March 9, 1805, together with the city ordinance which carried the act of March 9 into effect.—See Health Laws of N. Y. (1805), a copy of which is in the N. Y. T. L.

A ferry act is passed by the legislature, again forbidding anyone except the corporation of the city of New York to erect or keep a ferry between this city and Nassau Island.—Laws of N. Y. (1810), chap. 106. This was substantially re-enacted on April 21, 1819 (q. v.), amended June 15, 1822, and embodied in the revised law of 1815.— Revised Statutes, II: 355. For a thorough discussion of later legislation relating to ferries, see Hoffman's Treatise on the Estate and Rights of the Corporations, 283 et seq.

The legislature orders that "the public building erected in the city of New-York for the reception of convicts" shall be called "the State prison."—Laws of N. Y. (1801), chap. 121.

The legislature passes an Act to divide this State into counties. There are 30 in number, designated by name, with their boundaries defined.—Laws of N. Y. (1801), chap. 123. On April 7, another act was passed, "for dividing the counties of this State into towns."—Ibid, (1801), chap. 165.

The legislature passes an act authorizing the common council to "make such bye laws and orders for the better regulating and arranging with uniformity such new buildings as shall be erected for habitations or for the purposes of trade and commerce;" to regulate and alter "the streets, wharves, and slips in such manner as shall be most commodious, shipping and transportation;" to lay out "as far as the same has not already been done . . . regular streets or wharves of the width of seventy feet in front of those parts of the city which adjoin to the East river or sound and to the North or Hudsons river, and of such extent along those rivers respectively as they may think proper" and to "direct piers to be seek and completed at such distances . . . as they . . . shall think proper in front of the said streets or wharves so adjoining and extending along the said river and the said piers to be connected with the said streets or wharves by bridges."—Laws of N. Y. (1801), chap. 129.

All "true lovers of Sport" are invited to "attend at the New Circus in the Bowery, opposite Mr. Spicer's Inn, where will be . . . a most magnificent display of dogs in various events;" on Monday, Tuesday, and Wednesday next [Ap 6, 7, and 8], precisely at 4 o'clock, p. m. on each day. The Urus and Bull will be fought alternately with the same dogs, not only to gratify the spectators, but to Convince the public, that the Urus, though far inferior to, the Bull in size, and diminutive in appearance, is greatly superior in strength, activity, mettle, and management.—Am. Cit., Ap 4, 1801. See Ap 19, 19, 1801.

The state legislature expresses its belief that "certain articles of the constitution [see Ap 20, 1777] are of doubtful construction, or have been found inconvenient in practice," and plans for the election of delegates (see Ap 25) to a constitutional convention, to assemble at Albany on Oct. 13 (q. v.). It was provided that the number of delegates to be chosen "shall be the same as the number of representatives of the several houses of assembly from the respective parts of the several counties of this State," and the purpose of the convention shall be to consider the parts of the constitution "respecting the number of senators and members of assembly . . . with power to reduce and limit the number of them;" also to determine "the true construction" of the article relating to appointments.—Laws of N. Y. (1801), chap. 159.

The common council refers to the street come's a petition from Sam. Stillwell and others for "opening a Road through Jacob Harsens Land & across the Commons." M. C. C. (1784-1831), II: 724. See L. M. R. K., III: 1002 (Harsen's Road).

On opening sealed proposals, the common council accepts the offer of Townsend & Nostrand of $3,600 per annum for three years for the old ferry to Brooklyn, and that of Jonathan Titus $3,504 for the same term for the new ferry to Brooklyn (see Mr 23).

The common council orders that Ald. Carner "enclose the whole of the Piece of Land, purchased for a public burying Ground, adjoining the two Roads with a tight Board Fence." M. C. C. (1784-1831), II: 725. This was the present Washington Sq. site. See Ap 10, 1797, F 18, 1799.

"Philanthropist" Sunday, May 16, 1801, published a number of the papers: Amongst the 15 amusements that have lately been offered to the public, there is none so inconsistent with the manners of the age as that of Bull or Urus baiting. . . The owner or owners of the Urus has built a large circus in the Seventh ward of this city, for the purpose of continuing those scenes of cruelty [see Ap 41] . . . It might be proper for the authority to interfere.—Am. Cit., Ap 15, 1801. See Jl 6.

The campaign for governor and lieutenant-governor of New York State commences, the following being the candidates: Republican ticket—George Clinton for governor, and Jeremiah Van Rensselaer for lieutenant-governor; Federal ticket—Stephen Van Rensselaer (the present lieutenant-governor) for governor, and James Watson for lieutenant-governor. Gen. Hamilton, in support of the Federal candidates, "has been haranguing the citizens of New York, in different wards, in his usual style of imprecation and abuse against the character of the venerable Mr. Clinton. . . ."—Centinel of Freedom (Newark, N. J.), Ap 28, 1801. The Republican ticket won.—Ibid, My 5, 12, and 19, 1801.

The census of the city and county of New York, subscribed by John T. BAINBRIDGE on this date, shows the names of heads of families; the number of free whites, male and female, in groups of ages to 10, to 16, to 26, to 45, and over 45 years; all other persons, except Indians not taxed: and slaves,—all listed separately by
wars. It shows (page 274) a total population of 60,483, for all wards, including Blackwell's, Randall's, and Miller's Islands.—

From the original MS. of the Archives of the N. Y. H. S.

The common council permits Richard Varick to make vaults and areas on the front and side "of his House he intends building on the Corner of Broadway & Robinson Streets."—M. C. C. (1784-1831), II: 734. (One way for the student to determine with comparative certainty when a residence was built is to find through the indexes to the volumes of minutes of the common council or proceedings of the board of aldermen the dates when permits were granted to the original owner to make vaults, areas, bow-windows, fences, etc.)

Richard Varick is owner of a "Right of Soil" on the Hudson River shore, 188 ft. 6 in. wide, in the Fourth (formerly West) Ward, in front of Davy's Dock (which Dirck Davy received by city grant Oct. 14, 1745), and he now applies for the water lots in front of this "Right of Soil," agreeable to a committee report in his favor dated Oct. 12, 1795. Pending this grant, he petitions the common council for a permit "to sink Piers & build Bridges upon a range with the Corporation Wharf to the northward thereof and to form a Bason on & in front of his Right of Soil aforesaid for his own use & emendment." Granted.—M. C. G. (1784-1831), I: 734-35.

June

Deed from Anthony Lispenard & Effingham Embree of a parcel of Land for the purpose of a Street of fifty feet in breadth from Hudson Street to the Ground claimed by John Quackenbous is presented to the common council, and the board orders that it be filed and recorded.—M. C. C. (1784-1831), II: 735. The street thus established was Leonard St.—Ibid. marginal note: "L. M. R. K., June 20, 1829, On Matters." Its full text appears in the minutes hereafter. A similar request of one for a grant to treat with Mr. Quackenbous for so much of his ground as might be necessary to continue Leonard St. (so named here) to Broadway, at a width of 50 ft., instead of 40 ft. as in the Lispenard and Embree conveyance.—Ibid., II: 740. On June 11, when the street com's report, the board determined that the demised and demand by Quackenbous were too high.—Ibid., II: 747. The council in its extremely anxious state of mind, grants标题 as a measure to avoid the necessity of its committee of leases that Brannon (Spring) St. be ceded to the city, provided the city will regulate it by filling it up and digging it out without exposure to the vestry.—Trin. Min. (M.S.), M. C. G. (1784-1831), III: 1. See N 16.

Trinity vestry passes a resolution "that the inner doors of the Churches under the Jurisdiction of this Corporation be in no case whatever opened for the purpose of the state or City-Elections."—Trin. Min. (M.S.) The vestry also resolves "that the Charred house belonging to Trinity Church be removed, and that the committee of repairs ... provide a suitable vault for that purpose."—Ibid.

Trinity vestry appoints a committee "to enquire as to the expediency of building another church, as also to make rigid and proper observations on the beautiful structure"—Trin. Min. (M.S.). The committee reported favorably on March 8, 1802 (p. v.). The new church became St. John's Chapel.

The common council passes an ordinance authorizing "the laying of Timber in front of the foot or side Walks, instead of Stone in all new Streets which shall hereafter be ordered to be paved."—M. C. G. (1784-1831), II: 747.

Health Com'r Furman reports to the mayor that ships are landing more sick persons at the marine hospital than the "State Buildings at the Establishment" can accommodate; and that temporary sheds and tents have been provided. As funds allowed by the state are insufficient, the commissioners apply to the city for aid, and the board advances $1,500, expecting the legislature to repay it.—M. C. G. (1784-1831), II: 749-50.

After the sale of Fraunces Tavern, by Sam. Fraunces, on April 23, 1785 (p. v.), to Geo. Powers, a Brooklyn butcher, it was bought by Dr. Nicholas Romayne on April 30, 1795, for £2,100 (then equivalent to $5,500); and, on June 24, 1800, by John S. Moore. It is now acquired of Moore by Thos. Gardner for $7,500. Gardner's granddaughter married the Count de Dion, and it was from her, living in France, that the house was purchased, in 1904 (p. v.), by the Sons of the Revolution. It therefore remained in the Gardner family for over 100 years.—Liber Deeds, LX: 439; Drown, A Sketch of Fraunces Tavern (1919), 18. Asa Bird Gardner was not of this family, as has been believed by some writers on the subject of Fraunces Tavern. Thos. Gardner (the name
THE ICONOGRAPHY OF MANHATTAN ISLAND

1801 is spelled without the i) was ancestor of the Eugene Keteltas June family, and of the Thos. Gardner McCarty family (who are French 22 with an Irish name), etc.—From information supplied by Miss Jennifer Macarthy, historical expert of the Title Guarantee and Trust Co.

For views of Fraunces Tavern showing its various transformations, see Reports of the Am. Scenic & Hist. Pres. Soc. for 1904 and 1907. See also L. M. R. K., III: 978.

"John B. Coles petitions the common council for a grant of the soil from high-to-low-water mark "at his Bridge over the Harlem River," as the name was promised to him at the time he undertook to build the bridge (see N 24, 1795). The petition is referred to a committee.—M. C. C. (1784-1811), III: 1.

On June 29, the committee recommended that the grant be made to him "opposite to his Ground & adjoining the Bridge on Harlem River being a Distance of about six hundred feet," on condition that he convey to the city the land which runs through his land to the bridge and that he pay the quit rent of $5 agreed upon on June 13, 1796 (q.v.).—Ibid., III: 5. The engrossed grant was approved on July 20 and ordered to be signed and sealed.—Ibid., III: 10, 11.

A concert under the direction of "Mr. Hewitt" is advertised to be held on this evening at the "United States Garden, No. 233 Broadway, near the Park (in the rear of the house formerly occupied by the late Mr. Coles)"; present by Mr. Coles. —L'Oracel, June 22, 1801. This garden bore the same name in 1808, under the proprietorship of Charles Bernard.—L'Oracel, Ap 26, 1808. Hewitt appears to have been the first musical director or orchestra leader mentioned in the city's annals.—See another reference to him in Daily Advertiser, Ag 4, 1801. He was also a music publisher.—N. Y. Ev. Post, N 30, 1801.

July 4

For the 4th of July, this year, Delacroix has erected a "grand Amphitheatre" at his Vauxhall Garden on the Bayard property, "from which the whole exhibition may be seen." "No gentleman will be admitted without accompanied by a lady." Applications for seats are to be made at his store, 122 Broadway.—Daily Advertiser, Jl 4, 1801. On July 14, he sold the price of admission, 45c, would "entitle the bearer [of a ticket] to a Glass of Ice Cream, or a small Glass of Sherry."—N. Y. Gaz. & Gen. Advertiser, Jl 14, 1801. See, further, Jl 20, 1802.

Water pipes are now being laid so extensively that the common council appoints a committee "to apply to the Manhattan Co. on the subject of the bad state of the Pavement in many of the Streets occasioned by their being broken up to lay the Aqueducts and since not put in the Order they were found."—M. C. C. (1784-1811), III: 10, 18.

"Bull-baiting, within a high enclosure on the Bowery, is complained of as a "shocking" spectacle.—Com. Advertiser, Jl 6, 1801. See also Ap 4 and 15.

The common council appropriates $1,500 to be applied toward the "opening of Belle Vue Hospital or the erection of additional Buildings on Staten Island" for the accommodation of the employees. These grants.—M. C. C. (1784-1811), III: 8-9. On July 13, the committee in charge reported that it would be most expedient "to provide additional Accommodations at the Quarantine Ground on Staten Island."—Ibid., III: 10.

The common council resolves "that John Jay Esquire be requested to permit his Portrait to be taken and placed in the City Hall at [as] a public Testimonial of the great personal Respect and high regard this Board entertain of his distinguished Patriotism and eminent public Services."—M. C. C. (1784-1811), III: 10.

On Aug. 3, Gov. Jay's reply to the mayor was read, and a committee was appointed to agree with a "competent Artist to "perform the Work."—Ibid., III: 15. On July 10, 1804 (q.v.), arrangements were again made for painting this, or possibly another, portrait of Jay, this time by Trumbull. The Trumbull portrait is the only one now in the city hall.

"A Panther from the Wilderness of Niagara, will be baited with eight Dogs on Thursday the 2d July, on Bunker's Hill. ... The Panther may be seen until the time of Balting at the Circus Greenwich-street."—Com. Advertiser, Jl 18, 1801. A "severe and interesting fight" between a panther and a lion was advertised to be held on Dec 25.—Am. Citizen, D 22, 1801.

In a letter to the press, a citizen suggests that the streets be swept in the evening, instead of in the morning, and that the Manhattan Co. provide water for wetting the streets before they are swept.—Com. Advertiser, Jl 21, 1801.

The corporation of the city has "actually begun" the plan of filling up all the slips on the East River, and carrying the wharves farther out into the river (see Jl 1), "so that a space of 150 feet will be left between them and the nearest buildings." The buildings are to be of brick, of uniform height, and fire-proof, and will extend from the point of the Battery to Corleer's Hook. "The wharves are now more to be indented and broken by slips and docks—where the fifth of the city accumulates and rots, and proves by its poisonous exhalations the fruitful source of pestilence and death. ... In order to give vessel, however, a protection from ice, etc., and to enable them to load or to discharge their cargoes with greater convenience than by lighters, as in some parts of Europe, square or oblong wharves, or piers, are to be formed in front of this permanent wharf, ... at convenient distances from each other, with bridges thrown across to the permanent wharf."—Daily Advertiser, Ag 5, 1801.

Isaac Newton Ralson begins to publish a weekly entitled The Ladies' Monitor.—Early Newspapers, II: 421.

Mount Vernon Garden (see My 14, 1800) opens its summer season this year, with the "celebrated Comedy of the Child of the World," by M. D. March 1801. Besides Mr. Hodgkinson, are the Hallam family, Jefferson, and other prominent players of the time in New York. The play is followed by a "Grand Concert," an ode to Liberty spoken by Mr. Hodgkinson, etc.—Daily Advertiser, Ag 10, 1801. See Ag 12 and 15.

Audience addresses the following communication to the press: "The Summer Amusement at Mount Vernon Garden, commenced on Tuesday evening the 11th of April. "The Child of Nature, was represented. ... We were sorry that Mr. Delacroix manifested a resentment certainly unbecoming; and his Horn Blower presumably stopt many of us, even in the very avenue to Mount Vernon. Mr. D. should recollect that a large body of performers cannot be maintained by one or two nights acting in a week, and that their postponement in consequence of such an alteration from one night to the next is a serious monopoly, but a continuation of the usual number, necessary for their support. Mr. D. should also recollect, that in this country we have no monopolies—if he should please to give Fireworks every evening, he has an unquestionable right, and so have the performers to act at Mount Vernon. The public in America are not to be told, on Monday you must go here, and on Tuesday you shall go there; they must be the judges between the various Amusements and where they choose to visit it."—Spectator, Ag 15, 1801; see Ag 15, 1801; Ja 2, 1802.

The common council orders payment of $1,000 to the street comrs for "a new Mud Machine to clear out the Slips" $222.50 for "filling Greenwich Street at the outlet of Liebenow's Swamp;" and $1,000 for "New Pier at White Hall."—M. C. C. (1784-1811), III: 16-17.

From the newspaper controversy between Joseph Delacroix and Joseph Corre, regarding their holding entertainments on the same evening (see Ag 12), it appears that Delacroix was "the first to establish a Vauxhall in this city in Broadway." (see F 22, 1797). He says that "It is now six years [?] since the Tuesday's, Thursday's and Saturday's were the days designated for the amusement of the public in his Gardens, which days he has always kept, and never intruded upon any other. Mr. Corre then established his Columbia Garden (see My 5, 1799) near the Battery, and gave Concerts like wise the other three days, without ever taking away any of Mr. D.'s days. At all times the New York Theatre [Park Theatre] days were fixed, and never when the weather proved bad was it given the next night, but always the second day after. ..."—Spectator, Ag 15, 1801; see also references to this controversy in Com. Advertiser, Ag 13 and 14; N. Y. Gaz. & Gen. Advertiser, Ag 13, 1801. See Jl 4, 1805.

Gov. Jay, by advice of the council of appointment, having appointed Edward Livingston mayor, Livingston "came into the Common Council & produced his Commission which was read, and after taking & subscribing the Oaths prescribed & directed by Law & left his seat in the Chair at this meeting. The Mayor & Mr. Livingston took the Chair and then with the Members of the Board proceeded in to the Common Hall where his Commission of Mayor &c was with the usual solemnities again read & published. [The "Common Hall" is shown on Pl. 32, Vol. I.]"
"Mr. Mayor & the Board being returned to the Chamber proceeded to Business."—M. G. C. (1784-1813), III: 19; Hammond, *Hist. of Political Parties in the State of N. Y.*, II: 185. It should be observed that this proceeding was evidently derived directly from that in yoga the British Office which he has executed for nearly twelve years with the highest, Ability Vigilance Zeal and Integrity."—M. G. C. (1784-1813), III: 21-22.

At a special election 12 delegates are elected to the state constitutional convention (see Ap 6) due assembl at Albany on the second Tuesday of October (see O 13).—*Spectator*, Ag 22 and 29, 1801.

"Mr. John Habermehl reported from the Committee that they have had the Churchyard in Rector Street enclosed with a stone wall and pale fence, and also have had a new vault built in said Churchyard agreeable to the resolve then [see Mr 27, 1801] made and that they now render their account with the several vouchers for the same amounting to the sum of $947 3/100.

Mr. John Habermehl having supplied the venerable at the above price, Mr. Cheeiman the Master-workman refusing paying for the same, on motion of Mr. Cannman it was ordered that the Treasurer pay him $1 25/100 the amount of his bill."—*Lith. Min.* (MS).

The common council appoints a committee "to consider of the propriety of taking the signal poles at Staten Island under the administration of the Corporation."—M. G. C. (1784-1813), III: 27. Sec 12, 1802.

The common council appoints a committee "to confer with the Manhattan Company relative to a Compensation for the injury done the Streets of this City by laying their pipes. . ."—M. G. C. (1784-1813), III: 29, 34.

The common council orders that the committee of repairs be directed to have Greenwich House in the Lot adjoining the City Hall."—M. G. C. (1784-1813), III: 30. See, further, My 13, 1805.

The common council orders "that the Mayor be requested to report to this Board a plan for the improvement of the Battery."—M. G. C. (1784-1813), III: 30. See, further, N 2.

Since the middle of September, cases of yellow fever have appeared, and since Oct. 1, 35 persons have died of it. Some of the patients have been sent to the lazaretto on Staten Island.—*N. Y. Gaz. & Gen. Adv.*, O 8, 1801.

The United States frigate "Boston," in leaving East River at high tide, goes on "the reef at the Battery." She was floated after removing her guns.—*N. Y. Gaz. & Gen. Adv.*, O 9 and 12; *Boston Gaz.*, O 15, 1801.

Trinity vestry directs its committee of repairs to "Plant William and Walter W器件 the fence of the burial Ground enclosed at Greenwich" (the Washington Sq. site).—*Trin. Min.* (MS).

In accordance with the act of the legislature of April 6 (q.v.), delegates to the constitutional convention meet in Albany and elect Aaron Burr as president.—*Spectator*, O 14 and 21, 1801; *N. Y. Gaz. & Gen. Adv.*, O 19 and 20, 1801. For the results of their deliberations, see O 27.

Persons residing in the vicinity of the Tea Water Pump petition the common council that the butchers be allowed "to erect Stalls there for the prevalence of the present sickness." The board orders that the mayor take such measures as he shall think proper. —M. G. C. (1784-1813), III: 42.

The common council passes "A Law for procuring regular Bills of Mortality in the City of New York." It provides for the keeping of accounts by "the sexton or other person, having charge of the several burial places in this City."—M. G. C. (1784-1813), III: 43-44.

The constitutional convention, which assembled at Albany on Oct. 13 (q.v.), concludes its deliberations, having agreed upon several changes in the constitution, the first changes made since its first meeting (see O 15). It is decided that the assembly shall hereafter number 100, and "shall never exceed one hundred and fifty." (Heretofore, it had consisted of "at least seventy members" and never was to exceed 200). The number of senators is fixed at 32; whereas, previously, the number was to increase with the population to a limit of 100. Appointing power is "vested concurrently in the person administering the government of the state for the time being and in each of the members of the council of appointment.” (Heretofore the senate had a hand in appointments, and the governor presided, and also council without a vote except in case of a tie.)—Clark's *Manual* (1816), 54-56. See also *N. Y. Gaz. and Gen. Adv.*, O 21, 24, 27, 28, 30, N 2 and 4, 1801, and Lincoln, *Constitutional Hist. of N. Y.*, 596-612.

The common council resolves "that Ordinances do pass for bringing Broadway through the Landa formerly belonging to Robert Randal and deeded [or], and also to continue Broadway until it meets the Bowery lane, agreeably to the present Map of the City."—M. G. C. (1784-1813), III: 46.

The common council authorises the mayor to expend a sum not exceeding $200 for improvements at the Battery (see S 25).—M. G. C. (1784-1813), III: 46.

Aaron Burr writing from New York to his daughter Theodosia says: "Richmond Hill will probably be sold within ten days for one hundred and forty thousand dollars, which, though not half the worth, is enough and more."—Davis, *Memoirs of Aaron Burr*, II: 156. On Nov. 9, he added: "The sale of Richmond Hill goes on, and will, I believe, be completed within eight days. The price and terms are agreed some little under works retard the conclusion."—ibid, II: 157. However, on Nov. 20, he wrote: The sale of Richmond Hill is all off; having, in the mean time of confining the money, partly by whim and partly by accident."—ibid, II: 160.

Thirty lots, a part of the church estate received from Queen Anne, are granted to St. Mark's Church as a permanent endowment.—*Memorial St. Mark's Church (1899)*, 52-53.

On Tuesday next the 10th inst. there will be an interesting and severe fight between a Panther and a Bear, at the New Circus in George-street, corner of Bedloe-street, where the spectators will be accommodated without being in any danger whatever. . . .—*N. Y. Gaz. & Gen. Adv.*, N 9, 1801.

An example of "Expeditious travelling," at this time, is that of a merchant who left New York at 3 o'clock in the afternoon, and arrived at Boston (a distance of 266 miles) the evening of the next day.—*N. Y. Gaz. & Gen. Adv.*, N 14, 1801.

The common council appoints a committee "to procure and report plans for a publick building to be erected contiguous to the Bridewell and Alms house, and to expend such sum, not exceeding the price of the place, which they shall think necessary for that purpose."—M. G. C. (1784-1813), III: 51.

The common council refers to a committee a petition "for opening and levelling Brannon Street, from Greenwich Street to the Broadway."—M. G. C. (1784-1813), III: 52. This appears to Brannon (the present Spring St.).—See Je 8; and L. M. R. K., III: 994. On Aug. 5, 1802, the street had not yet been ceded to the city.—M. G. C. (1784-1813), III: 100. See, further, Ag 30, and D 13, 1802.

The first issue of the New-York Evening Post appears. This paper was established by Alexander Hamilton and his political friends as a Federalist organ. It was printed by Michael Barnum and edited by William Coleman. It is now the oldest daily in the larger American cities which has kept its name intact.—*NewYork, The Evening Post. A Century of Journalism* (1922), 9-20; Brigham, *A. A. S. Proc.* (1917), 411. See J 2, 1802.

The Bank of New York sells to Ezra Weeks the block on which the New York Tavern on Broadway stands, extending west to Temple St., between Thames and Cedar Sts. (see J 24, 1795; F 6, 1803).—*Ether Deals*, LXI: 450. A prior deed to the bank is not of record (memorandum in Title Guaranty and Trust Co.). The bank may have acquired the property from a master in chancery on foreclosure; or at a sale in the Tontine Coffee House, such as that which, it was said (see F 7, 1801), might be held on March 1, 1801; or the bank may have acquired it directly from the trustees of the N. Y. Tontine Hotel. The following report of the purchase is published: "Were it not for the fact that a Mr. Weeks, who purchased the Tontine City Hotel in Broadway. This immense pile, which in its unfinished state, cost upwards of 100,000 dollars, was sold for 48,000! It is said Mr. Weeks intends to convert the lower part of this building into stores, and finish the upper part for dwellings."—*N. Y. Gaz. & Gen. Adv.*, N 20, 1801.
THE ICONOGRAPHY OF MANHATTAN ISLAND

1801: descrip. of Pl. 125, III: 688-89. From this statement it appears that the hotel was never completed under the "Tontine" proprietors. It is possible that only the assembly-room was in condition for public use prior to its purchase by Weeks. See, further, Mr 39. The common council orders "that the different Feras in this City be heretofore known and designated by numbers progressively beginning at the Battery and that the same be numbered under the direction of the Street Commissioner."—M. C. C. (1784-1831), III: 57. The order was repeated on Sept. 25, 1815 (q.v.).

On account of the inconvenience arising from there being several streets of the same names, the common council orders "that the Street Commissioner be directed to attend to the completion of the New Map of the City, and that he be authorized to employ M. Richard Furman to assist him in the execution of that duty."—M. C. C. (1828-1841), III: 62. This evidently refers to the Goerck-Mangin Map.—See Ap 10 and Jl 15, 1799.

Robert Troup writes from New York to Rufus King in London: "For twelve days past the city has been much agitated with a duel between Hamilton's eldest son Philip and a Mr Escher—a brother lawyer of mine and a violent and bitter democrat. . . . Young Hamilton was mortally wounded and soon after died. Never did I see a man completely overthrown with grief as Hamilton was here. The scene I was present at when Mrs Hamilton came to see her son on his deathbed (he died about a mile out of the city) and when she met her husband and son in one room beggars all description. Young Hamilton was very promising in genius and acquisitions and Hamilton formed high expectations of his future greatness. . . . At present Hamilton is more composed and this agency was to attend the business but his country is strongly stamped with grief. Escher has not since made his appearance at the bar. There is a general current of opinion agt. him except among the violent democrats."—Life and Correspondence of Rufus King, ed. by Charles R. King (N. Y., 1897), IV: 28.

John Minchul, author of a new comedy, "The Gig," having read and sung the first two acts to audiences, is to read the rest of the play to them in the lecture room at "Tyler's Brown's Gardens," and 24, 1801. These newspaper references to Minchul and his comedy, appear to be entirely jocular, "We ought in justice to crown him Poet Laureat of America." Dr. Francis said in 1857 that "Tyler's was "still held in remembrance, by some few surviving graduates of Columbia College, as a resort for commencement-supper."—N. Y. during the last half Century (1857), 15. For other agencies to attend this comedy, see Ap 9, 1792; "Old Taverns of N. Y.," 414. It was formerly Brannon's Garden. L. M. R. K., III: 977. See, further, F 11, 1806.

1802

In this year, the Regents granted to Columbia, jointly with Union College, certain lands in northern New York, at Lake George, Troy, Schenectady, and Crown Point. With the revenue of these lands, building operations on the new wing of Columbia (see Je 1797) were resumed, and the hall and recitation-rooms on the north end were completed.—Hist. of Columbia Univ., 1754-1904, 33; Moore, Hist. Sketch of Columbia College, 76. In 1805, the trustees of the college applied to the legislature for aid in finishing the new wing and repairing the old, but no grant was made.—Assemb. Jour., 28th sess., 1792, 293. See also Di 19, 1809.

In this year, Peter Maverick, the son of Peter Rushdon Maverick (see Mr 16, 1786), was in business in New York as an engraver. He later moved to Newark, N. J., where he became the teacher of Asher B. Durand. He finally returned to New York and conducted an extensive establishment as a general engraver, copperplate printer, and later, lithographer. He was one of the founders of the National Academy of Design in 1820.—Stauffer, Am. Engravers on Copper & Steel, I: 179-77. For examples of his work see Pl. 70, Vol. I, and Pls. 80-b and 82, Vol. III.

In this year, John H. Contio, previously a confectioner in the lower part of Greenwich St., took charge of Montagnie's garden; in 1802 he conducted it until 1805 (q.v.), and was succeeded by Augustus Parrie. In after years, a building called the Parthenon was erected upon this premises, which, in 1825, was occupied as a museum under the auspices of Robert Peale.—Man. Com. Corr. (1856), 548.

In this year, the Quaker meeting-house on Liberty St., which was erected in 1755 (q.v.), was taken down, and a new one was built on the adjoining property purchased in 1790 (q.v.)—L. M. R. K., III: 928. Cf. Onderdonk, Annals of Hempstead, 180, and Throop's Reminiscences, 137-39.

On the levee level between "Billion" and "Bantam" began about this time. This hill stood at about the junction of Grand, Orange, and Elm Sts., where later was erected Centre Market.—Cozens, Geological Hist. of Manhattan Island (1843), 22-23; L. M. R. K., III: 965. See 1811.

In this year, William Birch drew a view of the city of New York from the heights of Long Island. This view, in two states, is reproduced and described in Vol. 4, Pls. 76 and 77.

The New-York Herald, a semi-weekly edition of the New-York Evening Post (see N 19, 1801), is established. It was published by Michael Burnham and edited by William Coleman.—Brigham, A. Y. New-York (1817), 477; Cozzens, History of New-York, II: 34.

The summer theatre at Mount Vernon was then offered for lease. "The theatre will be forty-two feet in length, and forty feet in breadth, with dressing rooms, and a cellar underneath. There will be, for the present, six wings on each side, twelve wood, twelve street, and twelve palace wings; two wood, one street, one palace, and one horizon scene. The theatre and the front part is entirely altered, for the better accommodation of the audience, at a very great expense; it will be divided into boxes, pit and gallery."—Daily Adv., Ja 12, 1802.

Balls and other entertainments are held at this time at the "Old Assembly-Room," 68 William St.—N. Y. Ev'ning Post, Ja 2, 1802. See also Com. Adv., Ap 6, 1802.

The [American or Tammany] Museum, etc., is to be held at a Mr. Hills, but his country is too high, the lot is 42 front and rear, and 75 feet deep . . . ."—N. Y. Gaz. & Gen. Adv., Ja 11, 1802. On Feb. 11, it was still in the possession of W. I. Waldron.—Ibid., F 11, 1802. In 1810 (q.v., Mr 21), it was purchased by John Scudder.

The United States declares war against Tripoli.—Winner, Feb. VII: 370. See My 14, 1801.

1803

In 1803, the State prison will make a report to the legislature in which they say in part: " . . . the number of convicts sent to the Prison has considerably increased. This must be, in general, ascribed to the increase of our population, commerce, wealth and luxury—but the examination of the annexed and former tables, by which it will appear that three-fourths of the whole number of convicts from the city of New-York, will lead to the same particular, which may deprive the accommodation of the Legislature. The great number of petty-taverns and grog-shops, amounting to near twelve hundred, by holding out temptations to vicious indulgences . . . tend to promote habits of idleness, vice and dissipation . . . This growing evil might be, in some degree, corrected, by a law prohibiting the granting of licences for taverns to grocers, and to none but such persons as should prove to the satisfaction of the Mayor, that he had a room and two spare beds at least to accommodate boarders, and by limiting number of tavern licences to one-fourth of the present number. . . Other causes of the depreciation of morals among the people, which may with propriety be submitted to the cognizance of the Legislature, are Horse Racing, and the savage practice, lately introduced, of baiting animals with dogs, and the immoral, unchristian and barbarous custom of Dueling, which has increased of late years in this city, to a degree perhaps unparalleled in the history of any civilized people. If persons, principals and seconds, concerned in duels, were by law disfranchised, and declared incapable of holding any office of honor or profit, and otherwise legally disabled, it would tend to discourage this practice, and give great satisfaction to the moral and religious, the most numerous and solid part of the community . . . In the year 1800, seventy nine convicts were sent to the State prison for petty offences, for one and two years, and of that number five-sixths were from the city of New York.—In the year 1801, ninety five convicts for petty offences were
sent to the State-prison, under Sentence from one to two years, of whom five-sixths were from the city of New-York. In the Bridewell prison and house of correction, either by means of force, or by fainting, stone or iron Bridge may easily, also, expensively, be made to render the passage of vessels easy; but it must necessarily contract by its Butments and Piers, the space at present occupied exclusively for the passage of the water. Now as a given quantity must be discharged in a given time, if the passage he contracted, its velocity must necessarily be increased in proportion as the passage is narrowed—whereby the anchorage of vessels on either side of the Bridge, must be rendered extremely unsafe. I need only to cite Chelsea-gate, where in consequence of the nearness of the banks to each other, the passage has always been the terror of navigators. A Bridge built of wood on wooden piles, in some measure obviates the difficulties attending stone piers; but the destructibility of the material, both from the worm and its natural decay, the great length of pile... must forbid an attempt of this kind. There is fortunately another mode unembarrassed with any of those difficulties, that is both cheaper in the construction, and almost as durable as time itself. Few who have thought on this subject, have probably recollected, that the water dividing the Islands is not a river; but an arm of the sea whose current is formed by the influx and reflux of the tide—that being the case it is evident, that if a Dam could be extended from one island to the other, the current would be destroyed... and for the communication between the Sound and the North River, it would only be necessary to construct a lock in the dam for the free passage of all vessels of burthen. This Lock... should be placed on the New York side... This dam should be constructed of stone, not only for the benefit of the road to be made on its top...

"—Daily Advertiser, F 19, 1802. This suggestion was adversely criticized on Feb. 22.—Ibid., F 22, 1802. See also F 20 and 21. "Common Sense" writes to one of the daily papers: "If a bridge from New York to Brooklyn was built on piers, there would be an impetuous current between each of them, so that nothing but small row boats could pass with safety, except at slack tide or still water. The intercourse between New-York and Brooklyn has been, and at present is, carried on by means of twelve boats and 24 men. These have done and still do all that is necessary. The men are paid each 10 dollars per month. Their board ten dollars more. The whole expense is about twenty dollars per day or six hundred dollars per month. It is supposed to be the cheapest ferry in the world."—Mercantile Advertiser, P 19, 1802.

The next step toward building the new city hall is found in an advertisement published in the Daily Advertiser and the American Citizen and General Advertiser, of this date: "PREMIUM OF 350 DOLLARS. The Corporation of the City of New York having it in contemplation to build a new Court House and City Hall, the underwritten premium is offered for the purpose, hereby offer a premium of three hundred and fifty dollars for such plan, to be presented to either of the subscribers prior to the first day of April next, as may afterwards be adopted by the board. The site of which it is to be erected is situated [sic], covering an area of three hundred by two hundred feet. The plan must shew the elevation of the four stories. The interior arrangement of the building must comprise four court rooms, one for the common council, and appropriate rooms for the city watch, and the housekeeper, in the vestibule or wings. Occasional purposes may require other apartments, which may also be designated. A calculation of the expense requisite for its construction must accompany the plan.

"J. B. Prevost" Salah Strong
"J. B. Coles" Philip Brasher
"Robert Lenox"

"The Daily Advertiser of Feb. 20 observed editorially: "The project will undoubtedly regard as well the embellishment of the City as the purpose of accommodating the Courts, Common Council and Public Offices. Buildings designed for posterity ought to be on a scale commensurate with their object." See J 26."

A New Yorker addresses the following communication to the press: "It appears that a petition is now before the public, for the purpose of obtaining permission to build a Bridge over the East River [see F 18]; it is a subject of so much consequence to the
THE ICONOGRAPHY OF MANHATTAN ISLAND

1802 city of New York and the State in general, that it requires the most Feb. serious consideration. There are but few who know the immense 20 and growing trade of this place to the Eastward, and perhaps no person can tell the very great injury it will be to that intercourse, when we consider there must be several foundations sunk in the river for a Bridge to rest upon. From the amazing quantities of ice generally floating during the winter season in the East River, it is seriously apprehended that the obstruction occasioned by a Bridge will materially injure the harbour. ...—Daily Adv., F 20, 1802. See F 23, Mr 10.

19 Caligula" commenting on the remarks of "Hydraulicus" (see 19) in regard to the projected bridge across the East River, asks: "Would it not be a greater convenience to the public, and extend the field of speculation, to erect a bridge from the Battery to Elizabethtown, as we should connect Boston with Philadelphia, and it would be pleasant crossing for strawberries."—Daily Adv., F 23, 1802. See Mr 10.

Mar. 6 Nassau Hall, Princeton, is gutted by fire. Only the walls are left standing. The original plans, with few alterations, were followed in rebuilding.—Maclean, Hist. of the College of N. J., II: 34-35.

8 The committee of Trinity vestry appointed to decide on the expediency of building another church (see Je 8, 1801) reports favourably, and it is ordered to "enquire for a proper situation."—Tr., F 10, 1802.

10 "Hydraulicus" again discusses the projected bridge. He says: "I am not at all surprised or disappointed at finding great opposition made to the project of building a Bridge from this city to Long-Island [see F 19, 20, and 23]; it arises principally from an idea, that it might injure the harbor. ... For my own part, the only motives that have induced me to an interest in this pursuit, are from conviction, that it would not injure the navigation, and that it would greatly promote the convenience and advantage of both Islands, and save the lives of many valuable citizens. It appears to me, that all the inducements to bridge-building that can possibly exist in any part of the world, are applicable here. Is it to accommodate passengers that bridges are built? Then at least two hundred thousand annually will be grateful for the facility afforded them. Is it that an outlet and opening from a city situated on a barren island, to a fine country extending 150 miles in length, is a desirable thing? Then is a bridge essential to enjoy these advantages. A stranger would suppose, on hearing the outcry made against this proposal, that the signers to the petition were about to ask the Legislature to build a bridge at the expense of the state, and to give them the dividends of that company. But they not only ask for leave to build one at their own cost but they pray the Legislature would appoint men, who have no interest in the bridge or the adjoining lands, to determine how it shall be built, and where it shall be placed for the accommodation of the public—for whose interest it is impossible for a petition to be couch'd in more liberal terms.—There can be no reason why the Legislature should withhold from the signers, the same consideration which you grant to the petitioners, except from the idea, that it might injure the navigation of the harbor, or endanger the health of the city.—If such be their conviction, it ought not to be granted; and if such can be demonstrated to be even the probable result of it, I would instantly abanodn it, and I believe the same from all the gentlemen who are at present desirous of it. ...—Daily Adv., Mr 10, 1802.

"Hydraulicus" continued the discussion on March 12, dilating upon the numerous advantages of a dam.—Ibid., Mr 12, 1802. See Mr 15.

11 "The well known and justly admired Mansion, called The Belvedere House, with its appurtenances" is to be sold at auction on March 22. "The situation and prospect cannot be surpassed in the neighborhood of New-York. The house is modern, elegant, and commodious, well calculated for a large genteel family, or for public entertainment. It has every useful accommodation of stabling, coach-houses, &c. &c. with a large ice-house in the best state and well filled. The ground, about an acre, is laid out with acknowledged taste and ornamented with beautiful trees and shrubs, in a flourishing condition."—N. Y. Even Post, Mr 11, 1802. It was offered for sale again on Feb. 19, 1803.—Ibid., F 19, 1803. On Feb. 1, 1806, John Smith offered it for lease.—N. Y. Gen. & Gen. Adv., F 1, 1806.

15 "Philo-Hydraulicus" writes to one of the papers: "Hydraulicus [see F 19 and Mr 10] and his confederates in bridge-making in the modern language of approbation, certainly deserve Mr. well for their persevering assiduity in theories and calculations. I shall leave their practical energies to operate without comment. If they produce a work of public utility, the convenience and gratitude of society will reward them—if they flounder, they are still secure. For the events of the last year have afforded convincing testimony, that the most sublime theory, and the most absurd practice, when united, form the perfection of human virtue and talents."—Daily Adv., Mr 15, 1802.

A committee of the legislature, to whom was referred a petition of the trustees of the Roman Catholic Church of St. Peter, reports that, in their opinion, "whenever legislative provision shall again be made for the assistance of the other Churches in educating and elevating poor children, the same provision ought equally to be extended to the aid of the petitioners."—Assemb. Jour., 27th sess., 233.

The Treaty of Amiens ends the war between France and England (see F 1, 1793).—Anderson, Constitutions and Dicts., Illus. of Hist. of France, 1789-1807, 294-95.

A number of Philadelphia book-sellers "inform the Book-sellers throughout the United States, that circumstances permitting, it is their intention to attend at the Book Fair proposed to be held in New York on the 1st of June next."—Daily Adv., Mr 30, 1802. See Ap 14.

16 Whereas the imprisonment of persons convicted of Petit Larceny, and other inferior offences, in the city Prison of the city of New-York has not been attended with the beneficial consequences of reforming the convicts, and of preventing crimes; and as the confinement of such offenders promiscuously in the State-Prison would be productive of public inconvenience," the state legislature authorizes the common council "to cause to be erected, or prepared within the said city, a strong building to be called the Prison for solitary confinement, or to build Cells in the Bride-well or some other proper building, and prepare the same for that purpose." The new prison is to be under the charge of the common council and to be supported by the city.—Laws of N. Y. (1802), chap. 17.

John Lovett announces that the City Hotel (115 Broadway) will be opened on May first. "A handsome Coffee-room will be fitted up in the principal story; where gentlemen may have tea, coffee, chocolate, soups, and refreshments in general, at the shortest notice. All the leading newspapers in the Union, will be regularly circulated. Post, Ps 50, 1802. See also Aurora (Phil.), F 15, 1805; Daily Adv., JJ 12, 1802; Ap 14, 1807.

The following extract "of a letter from a gentleman in New-York" is published in a Philadelphia paper: "Since I wrote you last, I have been to see the Steam Saw-Mill, which is the wonder of New York. ... I am told by one of the workmen, that they have sawed, with one saw, 4,000 feet of white pine boards, in the space of 14 hours, which took one half chaldron of coal."—Aurora (Phila.), Ap 2, 1802.

2 The inhabitants in Water street, between the Fly Market and Burling Slip, have planted both sides of the street uniformly with Lombardy poplars, very neatly enclosed. This laudable example will, it is hoped, be imitated by our fellow citizens in general.—Daily Adv., Ap 7, 1802.

14 Twenty-four of the Booksellers of the City of New-York have agreed to attend at the Literary or Book Fair to be held in this City on the first of June next [p. v.]. To accommodate those who may attend at this Fair, they have taken Mr. Bardin's Long Room, at the Old Coffee-House, which will be open for the transaction of business, from ten o'clock in the morning till two in the afternoon, during the continuance of the Fair.—It is recommended to Booksellers in seaport towns, and in towns accessible by Water Carriage, to bring fair samples of the articles they may have for sale or exchange; and those remotely situated will perhaps dispatch business by bringing all the articles they mean to dispose of at this Fair.—Daily Adv., Ap 14, 1802.

A ball-bounding is advertised to take place "at the Minor Theatre, opposite Van Rens's Tavern, Bowery-Lane."—N. Y. Gen. & Gen. Adv., Ap 17, 1802.

The people residing in the North-West Territory north of the Ohio are authorised to organize themselves into a state.—Laws of U. S., 7th cong., chap. 40; Annals of N. Am., 488.
The new Baptist church in Gold St. is to be opened on this day.

—N. Y. Eco. Post, My, 1, 1802. This replaces the one built in 1760 (q.v., Mr 14).

"It is built of stone, 60 feet by 65, and cost, including its furniture, about 25,000 dollars. It is situated... on a lot of 125 feet, frontage. At a Dedication of the Gen. Hist. of the Baptist Denomination in Am. and other parts of the World (1820), 364. See also L. M. R. K., III: 928, and F 20, 1842.

Congress passes "An Act to incorporate the inhabitants of the city of Washington, in the district of Columbia."—Laws of U. S., 7th cong., chap. 52.

Edward Savage informs the public that the "Columbia Gallery, containing a large collection of Ancient and Modern Paintings, Prints and Sculpture, is now open for their inspection... To this collection Mr Savage has added several pieces of his own amongst them is the original of the Washington Family."

The gallery is in Greenwich St., "at the building known by the name of the Pantheon near the Battery."—N. Y. Gen. & Gen. Advr., My 11, 1802. See also July 31, 1803. The Washington family group, now owned by Thomas B. Clarke, is on exhibition (1925) in the American wing of the Metropolitan Museum.

Signals are regularly kept on Staten Island (see S 14, 1801). Their manager depends upon the merchants of New York for compensation.—N. Y. Gen. & Gen. Advr., My 21, 1802. See, however, Ag 12 and N 3, 1802; Ja 4, 1803.

In this month the title of the New-York Journal (see My 22) was changed to New-York Journal and Weekly Monitor, the publishers having bought out a magazine called The Lady's Monitor (see Ag 8, 1801). In October, the paper was sold to Ming & Young who established The Weekly Visitor (see O 9).—Brigham, A. A. S. Proc. (1917), 452.

"Several Book-sellers have arrived in this city, from Philadelphia and the eastward, to attend the first Literary Fair ever held in the United States. A large assortment of Books has been forwarded as samples, to be exhibited to the trade. The Fair is to commence this morning; we understand at Bardin's Long room in the Old Coffee House; which has been engaged for the purpose by the society of Book-sellers in this city."—Daily Advr., Je 1, 1802.

"The proceedings of the meeting were opened by choosing Mr. Hugh Gaine, of this city, Chairman, and Mr. M. Carey, of Philadelphia, Secretary—after which Committees were appointed to report rules for the future management of the business of the Fair. Considerable numbers of other Book-sellers from different parts of the United States appeared to give it a trial in town in the course of this week."—Ibid., Je 2, 1802. See Je 7.

The book Keepers attending the literary fair (see Je 1) adopt a report of a committee "appointed to arrange the business of the Literary Fair," which recommends: "That a committee be appointed to consist of six gentlemen, two from Philadelphia, two from New York, and two from Boston, to take the subject of the Literary Fair under consideration, and prepare rules and regulations for its future government.

"That, as the object of the Fair is to benefit regular book-keepers only, no person be admitted to do business at the Fair, during the hours fixed for exchanging books, who does not keep a book store, and make book-keeping his regular business.

"That the book-keepers who may assemble at the Fair in October next, shall form themselves into a company or association, and subscribe such rules and regulations as may be agreed on; after which no person shall do business at the Fair, unless duly admitted by ballot; the vote of two thirds of the members present being necessary to admission." The New Yorkers chosen for the committee suggested in the first paragraph were Isaac Collins and James Swords. The delegates at the fair also adopted an address "To the Book-sellers of the United States" and passed five resolutions.

"The project had to struggle with many disadvantages. Its novelty—the want of previously fixed regulations—the remoteness of the persons concerned from each other—the expense of travelling... The success of the enterprise has been equal to all other efforts, founded on a deliberate study of society in the United States; and already the book-keepers how advantageous the plan must become, when it obtains extension and maturity..."

"By the simple operation of exchange, many thousand volumes are brought into circulation which might otherwise have lain on the shelves for years..." The resolutions were as follows:

1. Resolved, That it be earnestly recommended to the printers and booksellers throughout the United States, to use their utmost endeavours to improve the quality of the books they publish in order to establish and support the reputation of the American manufacture of books and to render it deserving of the patronage of the friends of their country.

2. Resolved, That it be likewise recommended to our brethren, to avoid, as much as may be, any interference with the interests of each other, by the republication of books already printed in the United States.

3. Resolved, That it be recommended to the importers of books, to discontinue the importation of all books, of which good and correct editions are printed in this country.

4. Resolved, That the continuation of the Literary Fair be strongly recommended, to all persons interested in the publication of Books in this country; and that it be held twice a year—on the first Tuesday of April in New-York, and on the first Tuesday of October in Philadelphia.

5. Resolved, That it be recommended to the Booksellers in the principal towns of the United States, to form themselves into associations, for the purpose of corresponding with each other, in order to promote the general interest..."—Am. Cit. 11, 1802; Independent Chron., Jl 19, 1802. See Je 11.

"The next day it was found that the accommodation for business was not sufficiently spacious, for numbers of book-sellers thronged in every day afterwards even until Saturday the 5th, on the noon of which day, the number of volumes, large and small disposed of, was estimated at considerably more than half a million!

"The transactions of the Literary Fair did not terminate even on Saturday, and it is certain that had the booksellers remained another week, a vast quantity of additional business might have been done. The success of the Fair has, however caused measures to be already taken for its extension, and for this purpose another Fair will be held in Philadelphia on the first Tuesday in October, and the next Fair at New-York on the first Tuesday in April, 1803—and so continuing semi-annually."—Am. Cit. 11, 1802.

"A subscription is circulating in this city, for the purpose of imparting from Paris, exact models in Statuary, of the Venus de Medicis, the Apollo Belvidere, the Hercules Farnese, and the Group of the Laocoon, which are intended as exemplars for American Artists..." The subscription is to follow it with the means to accomplish these objects. Should this subscription succeed... it is proposed to extend it to procure other copies of the great remain of Antiquity. Were a society instituted, of sufficient spirit, to establish an adequate fund, the interest of which only to be applied, for the purpose of procuring from Europe, Models of Architecture, Sculpture, Painting: the effects would be progressive and infinite."—Daily Advr., Je 30, 1802.

This was the beginning of the Academy of Arts. See O 27.

James Rivington dies at the age of 78.—Com. Advr., Jl 6, 1802. July 4. His body was buried in the cemetery of "the New Dutch Church."—Daily Advr., Jl 7, 1802.

At the Park Theatre, the 4th of July is celebrated (on this day, May 1759) by a performance of a tragedy—"Bunker Hill, or, the Death of Warren;" followed by "a Drama, never before performed, called, The Retrospect, Or, American Revolution. With Scenery and Machinery entirely new. In Course of this Piece will be represented, the Principal Events in the Revolution..." The advertisement describes the scenes. The last Scene will exhibit an elegant Perspective View of the lower Part of Broadway, with the Fort, Barracks, &c. as they stood at the time commemorated when just evacuated by the British, the English Flag Flying. The Bay is seen, and the English Fleet departing. General Washington enters attended by the Citizens of New York, who had been in voluntary Exile, while it was in Possession of the Enemy. The American army follows. During the Production, is seen the well known Action of the Sailor, who, when it was found that the Lines of the Flag Staff on the Fort were destroyed [cf N 24, 1781], climbed to the Top, and striking the English Colors, displayed the American Flag triumphant..."—The Hodgkinson's and Hallams are among the players.
Very remarkable programmes are also announced for this day at Delacroix's Vauxhall Garden, and Corre's Mount Vernon Garden.

At the Mount Vernon Garden, the proprietors announce, "having found, from last year's experience, that the audience, particularly the Ladies, were exposed to the evening's Dew, he has erected a new and much more spacious and convenient Theatre, the part allotted for the audience, being at a very considerable expense, rendered as commodious and agreeable as any winter Theatre." July 5 being the closing date of the Park Theatre, Mr. Hodgkinson has undertaken the management of the Mount Vernon Theatre. The programme for July 5 at this theatre includes a comedy ("All the World's a Stage"): a "Grand Pastichio, Consisting of Songs, Recitations, &c." (the list of which is published, as usual); a pantomime; transparent paintings, and fireworks.—Daily Adv., JI 3, 1802.

12. "The present enquiry of Vice-President Burr, to General Hamilton, arose from the circumstance of the General's having used all his influence with the members of the House of Representatives, to induce them to prefer Mr. Jefferson—when the votes for President were found to be equal between Jefferson and Burr [see F 11, 1801]. This preference the Vice-President never has forgiven."—Daily Adv., JI 12, 1802. See JI 11, 1804.

17. "Much discussion has taken place concerning the Navy Yard, purchased for Government at the Wallabout, on Long Island [sic], said to be purchased very judiciously, others that it was very proper.

"Ships may be built here with great advantages. . . . Labourers of all sorts . . . can always be got. . . . Adjoining the Navy Yard, is one of the best places in the world for Securing and Seasoning Timber. The Live Oak materials now there, are in an admirable state of perfection. They are so judiciously disposed for the Naval Constructor, Mr. Wm. Sheffield, that while they are water-Seasoning, they are at once secure from the worms, and even from the incendiary attempts of an enemy." . . .—Daily Adv., JI 17, 1802.

20. Delacroix introduces another new idea in summer-garden entertainments. This is the employment of an equestrian performer, who began a successful season at the Vauxhall Garden on this day.—N. Y. Gen. & Gen. Adv., JI 19, 24, 1802. This was the Vauxhall on the Bayard place. See, further, S 18.

22. The common council hears the reading of letters that have passed between the mayors of New York and Philadelphia regarding a "pestilential fever in that City." The board appoints a committee "to ascertain and report such arrangements as they shall deem necessary to preserve the health of the City."—M. C. (1784-1831), III: 91. Their report was made on July 26, when a committee was appointed to carry it into effect. Ibid., III: 94-97. See, further, Ag 9.

The common council inquires if it is proper for the city to fill in the "two Lots belonging to the Corporation of Trinity Church and intended for Streets to be called Vestry and Leight Streets."—M. C. (1784-1831), III: 91.

Rinier Skaats resigns his office of doorkeeper and messenger of the common council. The board appoints Bartholomew Skaats (see D 29, 1794) in his place, and also as keeper of the city hall.—M. C. (1784-1831), III: 92. Together, they held these posts for more than a decade, and were among the notables of the time. See Man. Gen. Couns. (1857), 444; N. Y. Times, IX: 134.

The common council orders that the laws, ordinances, and public resolutions, of the board of aldermen hereafter be published in the American Citizen and the Evening Post; the contract with the Commercial Advertiser to be discontinued at its expiration.—M. C. (1784-1831), III: 93. The choice of a paper in which to publish the city's announcements changed from time to time until the establishment of the City Record by the Charter of 1871.

The common council orders that the street com'y "be directed to procure a survey of the middle road [Broadway] from the arch bridge to D' Livingstone house and present the same to this board with all convenient speed."—M. C. (1784-1831), III: 94. See, further, Ag 9.

The common council permits the "Kine pock institution" to inculcate the paupers of the almshouse.—M. C. (1784-1831), III: 98. See Ag 14 and 19.

On July 26, 1802, the common council pays $10 to J. B. Prevost to reimburse him for the cost of "surveying the Lot of ground on which it is intended to build a City Hall."—M. C. (1784-1831), July 26, III: 99. See O 4.

Two representatives of De Witt Clinton and Col. John Swartwout meet at Flatbush Tavern to make arrangements for a duel between their principals—Drown. A Sketch of Francois Tavernier (1919), 19. The duel took place at Hoboken on July 31, and Swartwout was wounded.—Misc. Adv., Ag 2; N. Y. eve Post, Ag 7; N. Y. Gen. & Gen. Adv., Ag 2, 1802. At this time duels were frequent.—See De Voe's Newspaper Index, in N. Y. Hist. Soc. See, further, JI 4, 1804.

The cornerstone of mechanics' hall is laid, at the north-west corner of Broadway and Robinson St. (now Park Place), by the General Society of Mechanics and Tradesmen, which was organized in 1782 and incorporated in 1792.—N. Y. eve Post, Ag 7, 1802. Annals of the society (1882), 40-42. The ground had been purchased from Richard Varick.—N. Y. Gen. & Gen. Adv., My 20, 1802. See also a sketch of lots on Broadway, between Robinson and Murray Sts., showing the proposed location of "Mechanick Hall," dated 1798, in the Bancker coll. (folder "Broadway"), N. Y. P. L. The building is intended for a public hotel, in which the society will reserve the large room for their hall.—N. Y. Gen. & Gen. Adv., Ag 7, 1802. The building was so near completion as to enable the society to hold their annual dinner there on Jan. 4, 1803.—Ibid., Ja 5, 1803. It was opened "for the reception of the Tradesmen and Boarders" and against Michael Little, on May 13, 1803.—Ibid., My 13, 1803. The building was erected by membership loans.—Ibid., Ja 4, 1804. Extensive alterations were made in the hall in 1830. In 1870, the society leased the premises to the Security Insurance Co., and erected there a handsome new building.—Annals of the society (1882), 22, 40-46, 67-68, 716, 167-65. See also L. M. R. K., III: 925.

The committee, appointed to let the docks, slips, and wharves, reports that the docks and slips have been leased to Charles Smith for 2 years from May 1st last at $16,000 a year; the Powles Hook ferry to John Holdtron for 3 years at $2,125 a year; Hoboken ferry to Garret Corenhoven for $250 a year; Weehawk ferry to Charles and Philip Earl at $20 a year, and Horn's Hook ferry to Richard Smith C. (1784-1831), III: 100.

The common council passes an ordinance to prohibit the use of fire-arms "on the Island of New York" within four miles of the city hall, excepting by military companies and state prison guards.—M. C. (1784-1831), III: 101.

The common council orders that "an Ordinance pass for digging and filling in Broadway [cf. JI 22] to the level of the Line, marked A, in a map or profile made by Joseph Mangin and Charles Leon, City Surveyors." Assessors are appointed for the improvement.—M. C. (1784-1831), III: 103.

The mayor having issued a proclamation prohibiting intercourse with Philadelphia (see JI 22), the common council allows 12 shillings a day to the persons appointed to enforce it.—M. C. (1784-1831), III: 104.

The board allows $15 to four special officers "for their attendance at the late races at Harlem to prevent gambling."—M. C. (1784-1831), III: 104.

The corner-stone of the Greenwich Reformed Dutch Church is laid "in Greenwich Street near Poplarville," that is, at Greenwich midway between Amos and Charles Sts.—N. Y. eve Post, Ag 11, 1802; L. M. R. K., III: 935. It was a wooden building, and the first Dutch Church on Manhattan Island not connected with the Collegiate Church. It was enlarged in 1807.—Greenleaf, Hist. of the Churches, 29. In 1826 (p. v.), it was sold to the Reformed Presbyterians and removed entire to Waverly Place near Grove St.

The selection of Boston recently recommended to the public that hearse be used "as a mode of conveyance for the dead, peculiarly decent, and preferable to that by Porters."—Daily Adv., Ag 12, 1802.

The common council decides to take under its management...
The common council orders "That the Bowery road from Bullock [Broome] Street to the forks of the Kings bridge road and Bloomingdale road [3rd St] be turpiled to the breadth of forty feet... And also that side walks of the breadth of ten feet be paved or gravelled and sufficiently planted with a double row of Trees..."

The board also orders "That the Middle road, from the Arch bridge to its uniting with the Bowery be turpiled, and side walks made and planted with Trees in the same manner and under the same regulations." This "Middle road" was Broadway.—L. M. R. K., III: 994-95.

It orders "that the Canal be immediately opened from the North river to the Arch bridge," and appoints a committee "to report the plan of such Canal and to confer with the proprietors of the ground through which the same must pass."—M. C. C. (1784-1831), III: 106-7. See O 18.

The recorder reports to the common council the following resolution of the president and directors of the Manhattan Co.: "Resolved that the Superintendent under the direction and at the expense of the Corporation of this City take measures to furnish as much of the water of the Company during the present Season as may be required for the cleansing of the gutters, daily, in the several streets in this City." The board thereupon appropriates $500 "for the experiment," directing the street com't to act for the city in conjunction with the Manhattan Co.'s superintendent.—M. C. C. (1784-1831), III: 107. On Aug. 19, $750 was voted.—Ibid., III: 111. See, further, S 13.

The Kine-Pock Institution is erecting a building in the rear of the Brick Church.—Proc. of the Trustees, First Presbyterian Ch., Vol. II. The building was on Park Row, near Beekman St.—L. M. R. K., III: 954. See Ag 7.

On this date, the old Vauxhall at the foot of Warren near Greenwich St., so long a tavern, bowling green, garden, and place of public resort, had become the "Cupola Iron Furnace."—N. Y. Eve. Post, Aug 17, 1802. See also L. M. R. K., III: 981.

The common council permits James Scott to plant trees in Beaver Lane.—M. C. C. (1784-1831), III: 109.

The common council permits the "Kine-pock institution" (see JL 26) to occupy "the ground on which they have lately erected a building for the purpose of preserving their Vaccine matter for inoculation [see Ag 14]—for the space of one year from the date hereof."—M. C. C. (1784-1831), III: 110.

The common council appoints a committee "to report on the propriety of Erecting Cells for the Improvement of certain Convicts... to act for the city in cooperation with the Manhattan Co.'s Superintendent..."—M. C. C. (1784-1831), III: 110.

An ordinance is passed for the better regulation of the city watch. The mayor is authorised to appoint six captains or commanders, and the number of watchmen shall not exceed 120. The city is to be divided into three watch districts, and a new watch-house is to be erected.—M. C. C. (1784-1831), III: 111-12. On Aug. 23, a committee reported on the bounds of the three districts. The second district, for example, was to have one section of its boundary running "through William Street to the Broadway, thence down Broadway to the Arch bridge to the place of intended Canal, thence up the line of the Canal aforesaid to the head of the same..." The committee also reports that "the most proper place for the erection of a Watch house for the third District appears to be on a certain core of Ground owned by this board at the intersection of Hudson Bailey and Duane Streets."—Ibid., III: 114.

The common council grants permission to the "Market women" to have savings erected in the Fly, Oswego, and Hudson Markets.—M. C. C. (1784-1831), III: 115. See Jl 26.

The recorder and street com't report that a deed was received from Trinity Church on Aug. 23 "for Land intended to form Harrison, Provost [Franklin], Moore [later known as North Moore], Bache [Beach], Hubert, Laight, Vestry, Deshouses, Watts, and Brannon [Spring] Streets, or parts thereof." The board orders that it be preserved among the conveyances to the city.—M. C. C. (1784-1831), III: 115, 119. Regarding the incumbrances existing on these lands, see ibid., III: 140.

Deborah St. was laid out prior to 1797 (Pl. 64, Vol. I); see also description of Pl. 175, III: 244-45.

Further cessions were made by Trinity to the city on Jan. 11, 1808 (p.v.), and Aug. 2, 1813 (p.v.).

The common council adopts "Rules & Orders" to govern the board's proceedings.—M. C. C. (1784-1831), III: 119-22.

The common council adopts a committee report proposing the abolition of the "present establishment of Superintendents and Commissioners," and the appointment of a single commissioner at a salary of $1,500 a year. His duties are outlined.

The board also adopts the committee's proposal for the appointment of a "Superintendent of Sewers" at a salary of $750 a year.—M. C. C. (1784-1831), III: 121-24. See S 13.

The common council adopts an ordinance for the appointment of a comptroller. His duties shall be "to examine and to liquidate all claims, and to audit all accounts against this Corporation in all cases whatever, and to report the same to the board at each subsequent meeting for its order in the premises, and also to countersign all Warrants to be drawn on the Chamberlain or Treasurer of the City for the payment of all monies, directed by the board, etc., and several other details regarding his duties are specified. His salary is to be $1,500.—M. C. C. (1784-1831), III: 124-26.

The common council grants to Dr. Hosack, professor in Columbia College, in fee, lot No. 55, and leases to him lots Nos. 60 and 61 of the Common Lands (see the Goergian Map of 1796, A. Pl. 9-a, Vol. III) for 21 years, to be used as a "Public Botanic Garden."—M. C. C. (1784-1831), III: 139, N. Y. Herald, Jl 5, 1802. It is called Elgin Garden, and appears on the Commissioners' Map of 1811 as situated between Fifth and Sixth Avenues, 47th and 51st Streets, and consists of 14 acres. See also L. M. R. K., III: 946. In a Statement of Facts relative to the Estab. and Prog. of the Elgin Botanic Garden, etc., issued by Hosack in 1811, he gave the date of his purchase erroneously as 1801. The deed was executed on Aug 6, 1804 (p.v.).

The common council appoints a committee to treat with the proprietors of land "through which it is intended the Broadway shall pass in its continuation to the Bowery."—M. C. C. (1784-1831), III: 130.

The common council orders that the recorder issue a warrant on the treasurer to pay J. F. Mason, "in advance for his map of the City," $100; and to Dr. Joseph Browne (the new street commission-er), "towards supplying Manhattan Water for cleansing the Streets," $500 (see also Ag 12).—M. C. C. (1784-1831), III: 132.

"Mr. Robertson," the equestrian performer (see Jl 23), has erected a temporary circus at Delosrat's Vauxhall Garden, and announces his first exhibition in it on Sept. 21, his feats being "in the same style as at Ashley's in London."—N. Y. Daily Advertiser, Sept. 18, 1802; Com. Adv., S 29, 1802.

"The troop with which he had been connected was probably one of the first that traveled about the country, . . ."—Greenwood, The Circus (2d ed., 1809), 103. See, further, Ap 28, 1802.

Publication of a new daily paper called the Morning Chronicle is begun. It was printed by William A. Davis for the proprietor, Peter Irving.—Brigham, A. A. S. Proc. (1917), 461. Early Notices of Newspapers.—Appendix I: 422. Washington Irving made his first appearance as a writer in the columns of this paper, with the signature "Jonathan Oldstyle."—Annals of N. Am., 487.

Archibald Robertson (see My 4, 1795), of the "Columbian Academy of Painting, No. 79, Liberty-Street," advertises that he has "all kinds of painting on silk and ivory executed."

"Likenesses in Portrait and Miniature, painted as usual. Private tuition as before."—Morn. Chron., O 1, 1822.

On Oct. 4, the minutes show that "The board having proceeded to ballot for the plan of a Court house And that of Mr. Joseph F. Mason and John M'Comb. Jun. having a large majority of votes was accordingly ordered. Ordered that the Recorder be authorized to draw a Warrant on the Treasurer in favor of Mason and M'Comb. & Gen. M. C. C. (1784-1831), III: 133-34. For announcement of the award, see Morn. Chronicle, O 6; Com. Adv., O 6; N. Y. Eve. Post, O 6; Daily Adv., O 7; and Am. Citizen, O 8, 1802. Each of these publications states that the hall is "to be erected between the Bridewell and Jail, fronting the Park," that "a variety of plans were submitted for their [the corporation's] approbation," that..."
The expense of completing it is estimated at $160,000,000; and the elevation is elegant, and does no less credit to the taste and talents of the architects, than it reflects honor on the judgment of the Corporation.” The announcement in the Daily Adv. of Oct. 7 is supplemented by the following editorial:

“The removal of the Courts of Justice, and public offices from their present situation almost to the extremity of the 35th street, which, under all circumstances of a rapidly increasing population, will always continue nearly central, is certainly, taking into consideration public convenience only, a wise and laudable measure. A further benefit will result. Property in the heart of the city will acquire a relative value with that along the borders of the rivers. Gentlemen of the long robe, and those whose duties are connected with these offices, will naturally be resident in the vicinity of the New City Hall; the lower part of the city will be left for the mercantile part of the community: the advantages arising from the different orders of society will, thus, be more equally diffused. The site, facing the Park, is the most eligible our city affords. The design of the Architect can lose none of its effect, for want of an open area and a commanding point of view. The Park ought to be connected with the building, which should be advanced to the front of the public grounds, so as not to interfere with the Alms House in the rear. The present street can conveniently be closed, and a new and more commodious avenue be opened, connecting Beekman and Barclay streets. The Courts during their sittings will, then, be relieved from that intolerable noise of carts and carriages, with which at present they are so much annoyed. It will be an object worthy consideration, when the contemplated improvement is completed, whether the present building should be taken down, or be converted to the purposes of the Custom-house and Post-office, which would greatly accommodate our merchants, being in the neighborhood of the Coffee House, Banks, Insurance and other offices, appendant to Commerce. The present Custom-house, though otherwise airy and spacious, is certainly too remote from the centre of business for convenience.”

Besides Mangin and McComb, the names of only two other competitors for the reward have been found afters extensive research. One is Archibald Robertson, as we know from Dunlap and Bryan, who both say he was among those who presented designs for the city hall of New York.”—Dunlap, Hist. of Art of Design, II: 88; Bryan, Dict. of Painters and Engravers, IV: 254. The other is a “Dr. Smith,” as appears by the following “Communication” in the Daily Adv. of Oct. 18, 1802: “In the erection of a new City Hall, the three following objects ought to be sedulously attended to: 1st Utility, 2dly Elegance, 3dly Economy [sic], as far as they accord with the Corporation Funds, without burthening them. A considerable degree of taste and ingenuity, has been displayed on this occasion by the different architects. Out of twenty-six plans, delivered in, five or six are pre-eminently distinguished.—If originality of design has any merit, that delivered by Dr. Smith claims attention, and may be seen at the City Tavern, Lovet’s Hotel, and it is conceived, Elegance, Utility, and Economy [sic] have been consulted with a scrupulous attention. The author does not presume to claim the character of either an architect or draughtsman, this being his first attempt in one of the most useful of the fine arts; neither does he present it to public inspection, but as a sketch of what his mind had conceived, as most suitable to answer the objects in view, which might have appeared to more advantage had the drawing been executed, or more correctly finished and on a larger scale, whereby the minute of the different orders would be distinctly discerned and therefore more forcibly engage the attention of gentlemen, who have not made architecture the objects of their contemplation.”

The Mangin & McComb, and the McComb, original drawings of the city hall, or some of them (95 in number, to which others have been added from McComb’s MSS.), are preserved in the archives of the N. Y. Hist. Soc., having been purchased on March 1, 1898, from Mrs. Edward S. Wilde, the granddaughter of McComb. Fifteen of the more important of these drawings bear the signature of McComb alone; none of them that of Mangin or Mangin & McComb, although two of them (the front and rear elevations) show signs of erasure where Mangin’s name may originally have stood. Three of the drawings—the original front and rear elevations and the cross-section (two of which are reproduced on Plate 75, Vol. I)—are inscribed by Mr. Wilde “Original design prize.” The others are floor plans and sections, sketches for alterations, working drawings, and details of construction and ornament. Ten of the drawings were reproduced in The American Architect, F, 5, 1908, and five others in the same magazine, Ag 19, 1908. One of these is a plan of the Park, showing the proposed location of the city hall; others are drawings of the cupola, as first conceived and as afterwards corrected. The proposed foil (never executed) at the base of the cupola; three of the statue of Justice to surmount the cupola, etc. For fuller account of the drawings and their authorship, see PI 75, Vol. I.” See O. 17.

Robert Fulton and Chancellor Robert R. Livingston enter into an agreement to make steamboat experiments. A boat was built at their joint expense and tried out on the river Seine in 1803. —Dickinson, Robert Fulton Engineer and Artist (1871), 134-35, 149. Regarding Fulton’s early experiments on steamboats, submersible, and canal engineering, and his negotiations in France and England, see ibid., 24-126. See also catalogue of Fulton’s MSS. and documents sold at Anderson’s, April 26-27, 1921, by order of Mrs. A. T. Sutcliffe. A fire, which began in some stables in New St., causes damage amounting to $10,000. The long-room of Little’s Hotel, at 42 Broad St., (see My 25, 1797,) was destroyed. —N. Y. Eve. Post, Oct 18, 1802.

Robert Fulton and Chancellor Robert R. Livingston enter into an agreement to make steamboat experiments. A boat was built at their joint expense and tried out on the river Seine in 1803. —Dickinson, Robert Fulton Engineer and Artist (1871), 134-35, 149. Regarding Fulton’s early experiments on steamboats, submersible, and canal engineering, and his negotiations in France and England, see ibid., 24-126. See also catalogue of Fulton’s MSS. and documents sold at Anderson’s, April 26-27, 1921, by order of Mrs. A. T. Sutcliffe. A fire, which began in some stables in New St., causes damage amounting to $10,000. The long-room of Little’s Hotel, at 42 Broad St., (see My 25, 1797,) was destroyed. —N. Y. Eve. Post, Oct 18, 1802.

On Oct. 11, 1802, is ordered “that a new City hall be erected conformable to the plan of Messieurs Mangin and Macomb lately adopted by this board that the Recorder Alderman Lenox. Alderman Barker, Mr. Gilbert and Mr. Brasher be appointed a Committee to carry this resolution into effect and that the sum of $25,000 be appropriated towards erecting the same.” —M. C. G. (1784-1813), III: 174. On Oct. 25, the building plans were on exhibition at Lovet’s City Tavern (as shown in the “Communication” quoted above from the Daily Adv.). On Dec. 13, Mr. Crolius and Mr. LeRoy were made members of the building committee in place of Alderman Lenox and Mr. Gilbert, who were no longer members of the common council.—M. C. G. (1784-1813), III: 160. See D. 20.

A foundation-stone is laid of the second “Masonic Hall” erected in this city. For the first, see My 22, 1790. The building is in Frankfort St., near the Park. It is to be erected with funds obtained by a subscription opened and procured by Philip Becancor.—N. Y. Gaz. & Gen. Adv., O 15, 1802. It was consecrated on Je 8, 1803 (q. c.).

Joseph Browne, street commissioner, makes a long report to the common council on the subject of “the permanent regulation of Broadway and relative to the formation of a Canal.” In this he says: “it is impossible for a Street Commissioner to perform his duty to the Corporation or do Justice to himself, when called on to report the permanent Regulation of a Street unless he has an opportunity of examining and knowing the relative situation of the adjoining Streets, and particularly of the ultimate improvements intended to be adopted for their development [sic] to the River whether through Canals or otherwise, these canals are subjects of infinite importance, and will materially influence at a future day the health and comfort of the City—it cannot but be regretted that an idea has ever been entertained that such a medium is a proper receptacle and conveyance to the River of all the water and silt that must descend to it from so large a portion of the City; it is probably now too late to alter the principle but no time should be lost in determining and adopting that mode which may be least injurious; it is evident that all the streets leading to a canal must be more or less affected in their elevations in proportion as the level of the canal itself shall be regulated. . . . The principal canal is intended to extend from the east side of the Fresh Water pond on [to] the north River a distance of seven feet a branch also is intended to intersect it at about a ...
from the River and will be near 1,000 feet in length, that is from the angle of the vard and Chapelle Streets—the heads of those returners to be four feet only above high Water mark, houses have been built and Streets laid out and paved conformably to this project—from thence it appears that the descent from the bank at the head of the Canal to low water mark is only nine feet which is a descent of one inch to about 50 feet; the motion of Water over Ground so nearly approaching to the smoothness of a plane as to conversing about the ground and Mud carried from the adjacent Streets must necessarily be deposited in the Canal there to be acted on by the Summers Sun, which must generate disgust, disease and death—an erroneous opinion seems to have been entertained that by communicating the Canal with the north River the tide will enter it, and in its descent carry out all the Dirt, that might have been accumulated in the Canal, which is to say taking all of the days of the old Canal, to be convinced of the fallacy of such reasoning; it has also been supposed that one or more sluices, constructed in the Canal, and occasionally to be opened at low Water would remedy the evil—but where is the head of water to be procured for this purpose—a sluice can only operate on the Canal below the Gate—it may be said that the fresh Water Pond would furnish Water enough now and then to scour out the Ditch—and what is to scour out the pond, in a very little time it must itself be full of mud, it is at present more than 15 feet deep in it, there is no doubt the health of the City, in a few years will require it to be filled up with pure earth, it probably ought to be done immediately while there are high Ground enough to get it in its neighbourhood; The width of the Canal has been variously stated, from 7 to 10 feet for the accommodation of small vessels—it is not easy to conceive that it would be of much advantage for vessels of any sort or for any purpose to enter this Muddy ditch, as no part of the Canal will be made more than half a mile from the navigation of the East or North River, but it is obvious that a large ditch would have an infinite disadvantage over a small one; for in proportion to its size would be the destructive influence of the Sun on the putrefying mass contained in it—for this reason the smaller the ditch the better but a small Canal would not be adequate to the reception of the quantity of Water that occasionally would rush in torrents to this devoted spot about four hundred acres of the City are intended to be drained into the Canal, it is not unreasonable to suppose that during a very heavy rain one half of it would run off through the Streets to its natural outlet the River, we have frequently rains that in the Course of two hours amount to 1/18 inches of water over the surface of the ground—1/18 inches of water therefore over a surface of 400 Acres Amounts to 17,444,400 Gallons, the half of which or 8,712,000 Gallons must descend to the Canal—the two Canals taken together amount to 6,900 feet in length, supposing it to be made with a regular slope the medium depth it would be from four feet and a half to five feet wide only—it must contain more than 850,000 Gallons or about 1/10 of the Water that has to pass through it in 2 hours—if the Canal were empty at the commencement of the rain, and the egress of Water from it was not to be interrupted by the flood from the river then a Canal of this size might answer the purpose, but if this rain should happen at high water near it, is evident the Canal could not contain the water but it must of necessity overflow its banks and carry destruction to its neighbourhood. We may conceive what would be the loss of property from such a cause, but it is impossible to foresee what might be the influence of such an inundation on the health of the inhabitants.

The Street Commissioner has viewed this subject in a variety of shapes, having a resolution'd to acquire information attainable, from all which he is induced to represent to the board that there is but one measure left to be adopted with any probable hope of avoiding the impending evils, and that is by causing the principal Canal to extend from the north to the East River through Roosevelt Street—but that part of the Canal eastward of the fresh Water pond, should be a circular brick Tunnel of six feet diameter called nearly on an axis of low water and under the same diameter and laid on the same level to the North River—Owing to a difference of the time of high Water in those two rivers an alternate current would be almost constantly passing from one River to the other under a pressure of two feet head—by which means the mud carried into the Canal from the Streets would be immediately removed to the Rivers and as the bottom of the Canal would be always covered with water the Sun could not exert any pernicious influence on it as the bottom of the Canal on the principle would be lower than it could be constructed on any other plan the descent of the Streets leading to it would be increased thereby—by this mode also a double facility will be given to the discharge of rain Water—and the risk of overflowing almost to an certainty prevented.

A difference of expense of probably 50,000 Dollars would attend this project but had it not been brought into competition with the evils that must result upon any other plan is for the Corporation to determine.

"The Street Commissioner therefore begs leave to recommend that any further proceedings for the ultimate regulation of Broad Way be suspended until that of the Canal be determined—but that a temporary improvement in that Street should be immediately undertaken, about ten feet from the Hill near Mooney's and to fill up the hollow about 10 feet near the Starch Manufactury this will for the present answer every purpose for the accomodation of Travellers."

The board discharges the committee appointed on Aug. 12 ([q.v.]) from further consideration of the canal, and refers that part of Browne's report which relates to canals to another committee. A temporary regulation of upper Broadway is adopted.—M. C. G. (1784-1812) III: 156-159.

On Jan. 3, 1803, the street commissioner's report was referred to another committee.—Ibid., III: 172. See Mr 6, 1803.

The common council appoints a committee "to confer with the Committee of the Cincinnati Society relative to the erection of an Equestrian Statue in honor of the memory of General Wash-ington."—M. C. G. (1784-1812) III: 173. This was the first of many unsuccessful efforts to erect a public statue to Washington in New York.—See Vol. I, p. 196. See, further, D 15.

On the evening of this day a "smart gust of wind" blew down many trees in different parts of the city and did damage to several buildings. "The cupola of the City Hall was much shaken by it, and the windows blown to pieces, to the extreme discomfiture of the watchman, who was just in the act of crying "all's well."

Morn. Chron., O 29, 1802.

"A subscription was some months ago set on foot, for the purpose of procuring at Paris casts of all the finest antique statues [see J. 50]. This is designed as the foundation of a gallery and school of sculpture, which, being the first established in the United States, will, it is expected, be held honorable to our city. About 3000 dollars was soon raised, in shares of 50 each. We have the pleasure of announcing to the gentlemen who compose that association, that one of the most celebrated groups, the Laocoön, and two of the finest statues, the Apollo and the Dying Gladiator, are already cast, and their arrival may be looked for daily [see J. 7, 1803]."

"It would be unjust to omit mentioning, that the plan originated with Edward Livingston, esq. the mayor of the city."

"From the spirit and liberality lately evinced by our corporation, we presume that an apartment in the new city-hall will be appropriated to this purpose."

Morn. Chron., O 27, 1802. The association here referred to became the Academy of Arts (see D 3).

A fire breaks out in a stable in Bridge St., between Whittall and Broad Sts.; the flames make their way through Bridge St. into Stone St., and the whole square of about fifty buildings, mostly dwelling-houses, is destroyed, the buildings being either burned, pulled down, or gutted.—Ind. Chron. (Boston), N 8, 1802.

The common council adopts the following report of a committee "respecting the establishment of Signal Stuffs," and directs that an ordinance be prepared to conform to its report. The board returned a favorable answer to the application of this Board [see Ag 124] for the Public ground on Staten Island where the signal stuffs are erected," it is resolved "That the Comptroller of this Corporation take the Institution of the Flag or Signal stuffs under his management & direction; That this board will pay a Suitable person to have charge of the same and that he be paid 300 Dollars per annum as a stated reward. That the Superintendant select a proper person for this purpose and that he collect from every person who has a flag staff there the sum of 12 50/100 Dollars p annum to be paid in advance, and that where two persons hoist their signals on the same pole that they then pay 7 50/100 Dollars p annum and that where three [persons hoist their signals on the same pole] such sum in proportion as the Comptroller shall deem proper. That the salary & collection commence from the 1st day of November last. That in future no pole shall be erected by the per-
THE ICONOGRAPHY OF MANHATTAN ISLAND

3 Nov. The function of these "signal staffs" on Staten Island was to notify merchants and others in N. Y. of the arrival of ships, and, by hoisting coloured balls, to convey other intelligence of interest and value to the public. See also Goodrich's guide (1828).

6 The Society for the Relief of Distressed Prisoners announces "that the alterations they have lately adopted in providing for the prisoners . . . , and the establishment of a Soup, House, Hospital, etc., for the benefit of the Poor, promise to be extensively useful." Soup is supplied at four pence a quart, "each quart to contain a portion of beef not less than 4 ounces, and a due proportion of vegetables." Printed tickets are given to persons soliciting alms, each entitling the bearer to a quart of soup. John Rodgers is president—Com. Adv., N 6, 1802. See also the account of the Humane Society in N. Y. N. 2, 3, 1802.

8 The common council advances $85.05 for erecting "a new stone bridge near Potter's field."—M. C. C. (1784–1811), III: 144.

9 "The spirited exertions of the Mayor and Corporation to improve and embellish this city merit the highest applause: every hint tending to promote these views will doubtless, receive candid notice. Buckler-Hill, or more correctly Bayard's Mount, appears to have been destined by nature for a more valuable purpose, than merely to fill up the valley beneath. This commanding elevation is, nearly, in the centre of the ground-plot of the city, overlooking, in every direction, the whole extent from the Battery and Corlear's Hook to Inclenberg heights. It affords a noble site for an Observatory for Astronomical and Municipal purposes, from whence the whole expanse of the Heavens may be surveyed, and signals, in cases of alarm, hoisted. Seckel Van Rensselaer, a conspicuous body of buildings. Being in the centre of Grand-street, the great direct avenue between the Hudson and East Rivers, and nearly equidistant from each, much taste may be exhibited in laying out the intersecting streets, to form a spacious Promenade around this central point. The Mount by being judiciously disposed, would admit of elegant arcades rising in successive stories, that might be rented for the purposes of shops or places of residence. The terraced roofs of which would afford an enchanting view of the whole city, embosomed by its ample waters and the circumjacent country—a perspective, rich and diversified beyond description. Above the whole the proposed Edifice should pre-eminently tower—the turrets of which might contain the awful tower for alarms, and the merry peals for public rejoicings. Imagination can freely conceive the brilliant effect of an universal illumination of such an edifice, with transparent paintings and variegated lights, the refugium of which would be distinguished from every quarter. This part of the city, although traced out, lies still unimproved: it is not too late therefore, for the Corporation to avail themselves of its present state, to purchase such ground, as properly improved, would certainly assure the first cost of the Mount, and the rent received till fit time and opportunity would justify the erecting an Observatory."—Daily Adv., N 19, 1802. The hill was, however, levelled, and the earth was used to fill up the Collect Pond.—Man. Com. Coun. (1836), 471. See also Cozens, Geo. Hist. of Manhattan or N. Y. Island, 22–23; and L. M. R. K., III: 695.

22 The common council orders that the engine house at Haover Square be removed to the Old Slip.—M. C. C. (1784–1811), III: 150.

29 The Chronicle Express is established as a semi-weekly edition of the Morning Chronicle. The paper was printed by William A. Davis for the proprietor, Peter Irving. The last issue located is that of May 17, 1804.—Brigham, A. A. S. Proc. (1917), 386; Early Newspapers, III: 412.

29 The common council confirms an estimate and assessment "for digging and filling in the upper part of Broadway from the Arch bridge to Prince Street." The board orders "that the proposal of James McGowan for performing the work be accepted."—M. C. C. (1784–1813), III: 155. The original assessment roll for this work is preserved in the N. Y. H. S. among "N. Y. MSS., 1785–1850." The names of owners and tenants of property assessed, the Bayard's, Beekman's, Kips, Van Rensselaers, Van Cortlandts, etc. The whole assessment amounted to $692.

D 3 The comptroller of the city is authorized "to contract with the proprietor of the Elizabeth Town and Staten Island ferry boats for the rent or monies to be paid them for the use of public slips."—M. C. C. (1784–1813), III: 155.

21 The members of the "New York Academy of Fine Arts," organized to import from France casts of celebrated statues (see Je 30 and O 27), hold a meeting to elect officers, and Mayor Edward Livingston is chosen president. Resolutions are passed directing the president and the directors to "meet at an early day to digest and form the necessary bye laws for the Society," and to apply to the legislature for an act of incorporation for the society "under the denomination and title of "The New-York Academy of Fine Arts."—Barbour Chron., D 4, 1802. See also Howe, Hist. of N. Y. Mus. of Art, 7–75. An act of incorporation was applied for in 1801 (g.o, Mr. 2), but it was not granted until Feb. 12, 1809 (g.o.v.). By Nov. 19, 1804 (q.o.v.), the name of the society had been changed to the "American Academy of Arts."—Com. Adv., D 10, 1802. See D 17.

9 The Society of Tammany or Columbian Order, has ever been preeminently distinguished for their attachment to those principles, which tend to unite, in the bonds of Friendship, the great family of Man, and on which in a considerable degree rest our Liberty and Independence. To perpetuate those principles, is the primary object of the Institution, and nothing can be more conducive to that end than the establishment of the Society on a permanent basis. Having cautiously chosen the present and future welfare of the society will be considerably secured by the erection of a Wigwam, wherein the Sons of Tammany may, when assembled at the Council Fire, talk over the deeds of their ancestors . . . we learn, that at a meeting of the Society on Monday evening last [Dec. 6], . . . near one thousand dollars were subscribed for the erection of a Wigwam, and is confidently expected that a very liberal subscription will be made. . . ."—Daily Adv., D 9, 1802. Tammany Hall was not erected until 1811.—L. M. R. K., III: 939. The society was incorporated in 1805 (q.o.v., Ap 9).

A new ferry has lately been established by Mr. N. Budd between Bowles Hooks and New York. The landing on the Jersey shore is "somewhat to the northward of the old ferry kept by Major Hunt."

"Daily Adv., D 9, 1802.

The committee of leases and repairs is directed by the vestry of Trinity Church to "provide three large suitable Chandeliers for Trinity Church and a set of Chandeliers for St. George's and St. Paul's Church."—Trin. Min. (M.S.). It is also resolved "that the Committee . . . take measures to have recast the Bell of St. Paul's Hook on Bayard's Mount, that the present and future welfare of the society will be considerably secured by the erection of a Wigwam, wherein the Sons of Tammany may, when assembled at the Council Fire, talk over the deeds of their ancestors . . . we learn, that at a meeting of the Society on Monday evening last [Dec. 6], . . . near one thousand dollars were subscribed for the erection of a Wigwam, and is confidently expected that a very liberal subscription will be made. . . ."—Daily Adv., D 9, 1802. Tammany Hall was not erected until 1811.—L. M. R. K., III: 939. The society was incorporated in 1805 (q.o.v., Ap 9).

20 The New York State Society of the Cincinnati decides to erect a bronze equestrian statue to Washington in the Park, and opens a subscription book for the purpose.—See original subscription list in N. Y. P. L.; N. Y. Gaz. & Gen. Adv., D 17, 1802. On Dec. 20, the common council approved of the undertaking and resolved to furnish "a suitable place within the Park for the aforesaid purpose."—M. C. C. (1784–1813), III: 165. See J 9, 1803.

On Dec. 20, the common council rejects a proposal that a 20 committee be appointed to report on the "propriety of granting a Lottery towards the Expence of erecting a New City hall."—M. C. C. (1784–1813), III: 165. See, however, the later proposal of Feb. 20, 1809. See, further, D 27.

Col. David Humphreys writes to John Trumbull: "Efforts are being made in this city to patronize and encourage the Fine Arts [see D 3] . . . They propose erecting a Edifice in the Park where a magnificent State House is to be built. . . ."—From the original MS., sold at the Anderson Galleries, New York, My 6, 1920.

We are happy to learn that the necessity of an application to the legislature for a renewal of the city charter has been taken into consideration by the common council. The charter of this city has for a long time been a source of complaint to our fellow citizens, and occasionally attracted the attention of our state legislature. Many of the regulations and provisions it contains for the government of the city, have, by lapse of time, and a total change of circumstances, become useless; others improper, and some oppressive. It has been an opinion propagated with some
zeal, and more generally received than a just consideration of the subject will warrant; that legislative interference would be improper, unless formally solicited by members of the corporation. This is a position which, if admitted, is calculated to involve us in endless inconveniences, and tending in its consequences to perpetuate the miscarriages under which we labor. ... Hitherto the gentile corporations have succeeded in composed the common council, but appear not to have been impressed with the necessity of amendment, and have withheld their consent to an alteration of such parts of the charter as have been found oppressive by experience, because they contend that its most objectionable provisions have not been enforced for many years. ... The design that the charter should be revised, has not its origin in the wild specious innovation, but arises from evils, and inconvenience, which daily felt. From a conviction that, in its present form, it is incompetent to ensure to the inhabitants of this city a useful and efficient government. ... The legislature, it is to be hoped, will view the subject in a proper light, and we are inclined to believe that a respectful petition from our fellow citizens will meet with suitable attention, particularly if accompanied by the approbation of the present members of the Common Council. In viewing this subject, we are far from believing that the charter should be hastily prosecuted; but we do believe that it is susceptible of salutary amendments. It is not for us to dictate, but we would suggest the propriety of the early adoption of some measures by our citizens for the accomplishment of so desirable an object, either by a general meeting of the body, or by meeting in respective wards, and appoint a general committee to pursue such measures as may be thought advisable, and best calculated to produce the desired effect."—Morn. Chron., Dec. 27, 1802. See D 28.

City hall operations in 1802 closed with the following resolution of Dec. 27 which was laid before the board and held for future consideration: That the committee, appointed to superintend the building of the hall, having transmitted requisite plans and estimates of the materials to be used, and the time necessary to complete the building; the best manner of raising the money to cover the expense; and, in case the plan at present adopted should be deemed too extensive and expensive, to ascertain if the plan cannot be reduced in size and expense without materially injuring the appearance and utility of the building.—M. C. C. (1784-1854), III: 166. The resolution passed Feb. 24, 1803 (ibid., III: 224); although the complaint was made, in a letter to the board, Feb. 3, that the total estimate for the building ($150,000) was too great, and could not be raised without resorting to taxation. This writer states that "other objects of far greater importance demand the attention of the Corporation." "Our streets without exception," he explains, "require new paving—compared with those of Philadelphia, they are execrable—our city is badly lighted—the improvements projected on the East River are incomplete—we are very insecure against fire—arrangements are to be made for keeping our streets clean, and for removing every kind of filth that is injurious to the health of our citizens: These and various other objects of essential use and accommodation, call for immediate attention, and will absorb all the spare funds at the disposal of the corporation."—See also ibid., Feb. 17 and 19.

This year, Colman, the inhabitant of the Outward Parts of the City and those of "King and Queen Counties," the common council orders "that a ferry be established from the land of Mr. Stuyvesant in the Seventh Ward to the land of John A Mersereau at Bushwick in Kings County," and also "another Ferry from the land of Marinos Willett Esq' in the Seventh Ward to the land of Samuel Titus at Bushwick aforesaid, subject to such rates and regulations as shall from time to time be made by this Board." This is done with the condition "that suitable Lots on both sides of the River he granted to this Board for the purpose of erecting Ferry houses and other necessary buildings for the use of the said Ferry."—M. C. C. (1784-1853), III: 165.

"The People" addresses a communication to the press concerning "the propriety of adopting measures to obtain a revision and alteration of the charter of this city" (see Dec. 27).

He says: "Several applications have been made to the legislature for redress; but the difference of political sentiment which prevailed in the senate and house of assembly, has hitherto rendered abortive every effort to make the charter (which was obtained while America was under the dominion of the king of Great Britain) more congenial to the principles of republicanism, & consistent with the laws and constitution of our country." Three chief grievances are discussed. First: By a construction given to one clause of the charter, "aforesaid but freemen and freeholders have a right to interfere in the election of charter officers; and if one man owns a freehold of the value of fifty dollars in every ward, his right to vote is extended to all the wards. This is unequal and unjust. ...

Second: As far as it relates to freemen—"By the charter, the mayor and four or more of the aldermen, have the power of making free citizens, and the charter expressly interdicts all persons, excepting free citizens, from using any art, trade, mystery or occupation, within the city. Thus a power is vested in the mayor and the corporation (if capriciously disposed) to prevent all persons, let their character and standing in society be ever so exalted, from obtaining the freedom of the city.

Thirdly—By the charter, the city is divided into seven wards, and those so to remain.

"At the time it was granted, in the year 1790, as appears from the bounds of the respective wards, it is evident the probable increase of population, in what now forms the sixth and seventh wards, never was then estimated by the framers of the charter. Since that period ... the increase in population in those wards has nearly if not quite overbalanced that of all the other five wards. This population is daily increasing in the sixth and seventh wards in the same proportion, and although either of these wards contains more than double the number of inhabitants of the largest of the other wards, still they are by the charter entitled to no greater share in the councils of the city than the smallest ward in it. ..."—Morn. Chron., D 30, 1802. See Ja 3, 1803.

A number of citizens meet at Adams' Hotel in William St. "to take into consideration what measures should be adopted in order to obtain an extension of the rights of suffrage in the election of Charter Officers of this City." A committee of three is chosen to call a general meeting on the subject.—Morn. Chron., Ja 1, 1803. See Ja 7.

In this year, there were 1,930 deaths in the city.—M. C. C. (1784-1831), V: 502.

1803

In this year, the painter Vanderlyn was sent to France for the purpose of copying for the Am. Acad. of the Fine Arts (which was founded in 1801, q. v. Dec. 27, 1801, D 2) some of the finest pictures by the great masters, and to collect casts from antique statues. With the additions afterwards made, the Academy's collection of sculpture became the most valuable in the United States.—N. T. At It Is, In 1837, 65-66.

In this year, Petrus Stuyvesant conveyed to St. Mark's Church the cemetery lying between First and Second Aves., 11th and 12th Sts. A condition of the gift was that the slaves of Petrus and their descendants were to be buried there free of charge.—Mon. Com. (1862), 690.

A plan and three elevations of St. John's Chapel, drawn by John McComb, Jr., probably date from this year. They are reproduced and described in Vol. III, PI. 11-20.

This year, Colman, the inhabitant of the Outward Parts of the City and those of "King and Queen Counties," the common council orders "that a ferry be established from the land of Mr. Stuyvesant in the Seventh Ward to the land of John A Mersereau at Bushwick in Kings County," and also "another Ferry from the land of Marinos Willett Esq' in the Seventh Ward to the land of Samuel Titus at Bushwick aforesaid, subject to such rates and regulations as shall from time to time be made by this Board." This is done with the condition "that suitable Lots on both sides of the River he granted to this Board for the purpose of erecting Ferry houses and other necessary buildings for the use of the said Ferry."—M. C. C. (1784-1853), III: 165.

"The People" addresses a communication to the press concerning "the propriety of adopting measures to obtain a revision and alteration of the charter of this city" (see Dec. 27).
The common council orders "that the Comptroller be authorized to rent Bellvue to such persons, and upon such terms for the period of one year as he may deem most advantageous, provided always that the same be reserved to the board in case the premises should be wanted as a Public Hospital."—M. C. G. (1784-1831), III: 170.

The street commissioner reports to the common council information regarding the ownership of land through which an extension of Brannon (Spring) St. must run to Broadway. He says: "There is at present no Street or Highway communicating from Broadway to Greenwich Street between Catherine Street near the Hospital and the New Prison [Christopher St.] a distance so great as to render it extremely inconvenient to the inhabitants of those Streets." The board orders that the com't cause a survey to be made and other necessary steps taken to open Brannon St. to the width of 65 ft. as far as Broadway with all convenient speed.—M. C. G. (1784-1831), III: 171. On Jan. 17, however, this order was rescinded, and he was required to "continue his endeavours to procure a cession of the said Street to the Corporation of the City."—Ibid., III: 174.

The common council appoints a committee "to look into the situation of the records and Public Papers in the office of the Clerk of this City and take such steps for the preservation thereof as in their opinion shall be necessary."—M. C. G. (1784-1831), III: 173. On Jan. 10 the committee reported their opinion "that the Clerk with the Advice and Assistance of Mr Carmer," should procure to "a proper number of Books of suitable size and have them timed or otherwise secured in order to preserve the Records and papers."—Ibid., III: 174.

John M'Lean, commissary of military stores, makes a report in which he says in part: "Old Potter's field, which was ceded by the Corporation of the city of New-York, to the people of this State, for the use of a magazine, gun house and laboratory, some years ago, has also been lying dormant; but I have now taken possession of it on the part of the State, and have let it at the rate of thirty pounds a year. It will be requisite to have a small magazine erected immediately, in order to make a division between the public and private property.

"The 28 pieces of 32 and 24 pounders, mounted on north battery, No. 1 on a large platform by itself, and the 20 small cannon, carriage of which are destroyed by ill disposed persons—the reason is obvious; the corporation of the city, after the State going to the expense of $50 dollars, for caulkings and laying the tops of both parapets with Spanish brown, tar and sand, have erected pleasure seats and places of accommodation for company; although they serve as places of resort for evil disposed people to destroy the property of the State.—The heavy ordnance, from the redoubts at Rutgers' and Rhynelaer's wharf, which were subject to yard and dock hire, are all collected in the ordnance yard.

"Total at different places of 32 and 24 pounders, of iron, 81 pieces fit for service, and 44 carriages, belonging to the pieces in the ordnance yard, are now placed in the old gun-house in State-street.

"The one side of State-street from the Bowling-green round the corner of Pearl-street, belonging to the State, the timber has rotted away, and the walks broken up; it is therefore necessary they should be repaired."—Assemb. Jour., 26th sess., Appendix, iii-vii. See Ja 14, 1805.

"John Gardiner of this city, has obtained a patent for erecting Dry Docks (where there is little or no ebb and flow of tide) to repair ships in. On his construction a steam engine that costs $4000 dollars will dry eight docks in twenty four hours and may be applied to any number of docks.—The fuel consumed by the engine is 90 lbs weight of coal per hour whilst at work."—Chronicle Express, Ja 6, 1805.

A general meeting on the revision of the city charter (see D 30, 1802) is held at "Adams's assembly room," and the following resolutions are unanimously adopted:

"Resolved, As the sense of this meeting, that every citizen who is of lawful age, has a fixed residence in our city, and pays taxes, ought to be duly represented in the government of the same.

"Resolved, That it is the opinion of the citizens here assembled, that the charter of the said city ought to be altered so as to extend the right of suffrage for charter officers, to all citizens having a right to vote for the most numerous branch of the state legislature, that the said election for charter officers should be by ballot and held at the time and places, as the election for members of the legislature, and that no person be permitted to vote out of the ward in which he resides.

"Resolved, That a committee of five persons for the first six wards, and a committee of eight for the seventh ward, be appointed by full power from this meeting, to take every measure which they may deem expedient and proper to carry into execution resolutions into effect." The said committees are chosen.—Morn. Chron., Ja 11, 1803. See Ja 10 and 14.

"The subscriptions for the Equestrian Statue of Washington [see D 15, 1802] meet, we are informed, with the most flattering encouragement. . . ."—Daily Adv., Ja 8, 1803. See Mr 15.

"A Citizen" addresses the following communication to "the Citizens of New-York": . . . While patriotism and virtue lives, Washington's well earned fame can never die; it is engraved on this fair tablet too deep, to be effaced by time—it is immortal. If this be so, what do we want of inanimate monuments erected to his memory; . . . An attempt was made in Congress under the former administration to erect in the federal city, at a great expense, a Mausoleum to the founder of the Republic. If, for a monument of stone is to be erected, there is one already begun on the largest scale, that City bears his name. . . .

"What led to these remarks, is an attempt of the society of Cincinnati of this State to erect a monument in this city to the memory of our never to be forgotten Washington [see D 15, 1802]. But in this city in particular, before we as citizens, who profess to be republicans, or in the slightest sense have any attachment to this kind, let us first bury the relics of our brethren, who gloriously fell in arms in defence of their country, lying within our view above ground, a reproach to humanity, to say nothing of our patriotism. Go, fellow citizens, to the Wallabout, where perished by British cruelty, thousands of your countrymen, and view the remains of the patriot, the hero and friend, who nobly died to save his country, exposed to every indignity, for the want of a common grave. Gather his bones together and bury them, with that respect due to sacred worth; after which, if you must, and will have a monument, over their grave, I suggest the propriety of erecting this monument to the memory of their chief. . . . To erect a monument to their chief, before they have a common grave, you would deserve not only the reproach of humanity, but a just reproach of disinterestedness. I have except this respect is first paid to those relics of the soldier (being called upon) I beg leave to inform the society of Cincinnati, I deem it improper to subscribe to their proposals for erecting a monument in this city to the memory of their chief."—Am. Crit., Ja 8, 1803. The relics of the prison-ship martyrs were buried in 1808 (q.v., My 26). No public monument to Washington was erected in New York until 1876, although several futile attempts were made (see 1: 1966; Pl 100 and A. Pls. 26-b & c, Vol. III). An equestrian statue was exhibited by Joseph Delacroix on July 4, 1803 (q.v.), but thereafter the matter was dropped until 1806 (q.v., Ja 20).

"Cailus" writes to one of the newspapers: "I have lately seen a proposal to petition the Legislature of this state for a revision (as it is called) of the Charter of this city.

"It is much to be lamented, that those demagogues who at present possess the reins of Government, should be permitted thus gradually to subvert every remnant of liberty in this Country, and our citizens remain silent spectators of the truly alarming and affecting scene.—The proposition is another example of the destructive tendency of democratic principles, and is an adviser to the people of this city to take steps by which the victorious and unprincipled will resort to support their totering credit or sustain the falling ruins of lawless ambition.—We have beheld the overthrow of our Judiciary, and the subversion of our Constitution, and must yet witness the sacrifice of an additional victim.—Cleared, as usual, under the pleasing garb of patriotism and zeal for the country—a garb that inevitably draws forth the honest support of the virtuous; a combination has been formed to assimilate the
Charter of the City, for the purpose of promoting the cause of ruin, anarchy and confusion." He adds that "One of the People" (see D 28, 1802) might better be called "An enemy to the nation and a subverter of its liberties."—N. Y. Gaz. & Gen. Adv., Jan. 10, 1803.

The common council refers to a committee a petition from several inhabitants residing in the vicinity of "The State Prison," who desire that it may be extended to the university neighborhood.

—M. C. C. (1784-1831), III: 175. On Jan. 17, the committee, to whom this petition was referred, reported adversely. They explained that "the present line of demarcation from the North to the East River for laying the taxes . . . for the Support of Night watch, for the expense of Wells and pumps and . . . procuring (Lamps) does not extend to the North River side from the out let of the Meadow of Anthony Lins—Penard; whereas the desired extension is "wholly without the said Limits."—Ibid., III: 177.

The city still owns the lot on the corner of Pearl and State Sts.—the same place, apparently, where, in 1794 (q.v., S 29), Baker kept a "menage" of wild animals. Jos. Crore now seeks a lease of it, but without success.—M. C. G. (1784-1831), III: 174-75, 214. See also F 3, 1820.

The committees from the several wards, appointed agreeable to the citizens' resolution of Jan. 7 (q.v.), having met on Jan. 13 and named a sub-committee of one of their number from each ward, this sub-committee now adds a letter to the common council asking its cooperation in a petition to the legislature for the "purpose of procuring the extension of the right of suffrage, a measure which we have good reason to believe has long been the wish of many of our Fellow Citizens." A copy of the resolutions adopted on Jan. 7 is enclosed. In this letter the sub-committee requests the board to inform them "whether it will be agreeable to unite with your Fellow Citizens" in such application to the legislature at its next session, and, if so, "how far it will be agreeable to you, to have that right [of suffrage] extended." The letter was presented to the board on Jan. 17, but consideration was postponed.—M. C. G. (1784-1831), III: 177-78. See J 47.

"A correspondent expresses his hope that if the Legislature take up the charter of incorporation of this city, they will make a thorough reformation, by extending the elective franchise to every man, woman, and child. It is feared by some, that though the matter will be discussed, to please the sixth and seventh wards, yet that it will be so contrived as in the end to fail, and thus monarchy and slavery be entailed upon this great and populous city."—N. Y. Gaz. & Gen. Adv., Jan. 14, 1803.

During the progress of work on the new city hall (see Mr 24, 1800), rooms in the old hall were appropriated, by permission of the city president and the city councils, to several societies. For example, on Jan. 17, 1803, by the "N. Y. Union Law Society;" on March 19, by the managers of a lottery "for the promotion of Literature;" on Nov. 29, by a law society; on Dec. 16, 1803, by the managers of a lottery; and, on Jan. 6, 1806, by the city militia for military lectures.—See M. C. C. (1784-1831), III: 180, 476, 637; IV: 111, 122.

In a letter to De Witt Clinton, George Clinton says he has heard that "the Faction in New York will endeavour to acquire popularity by exclaiming against the defenceless situation of the Port of New York and the Conduct of the Administration as well of the General as State Governments in suspending Measures for fortifying it—This will be a popular Theme especially at a moment when the authority of France and Spain are at a discount, and a little interference with the Charter is unnecessary, and therefore hope that in the opinion of the Legislature it will be deemed altogether improper."—M. C. C. (1784-1831), III: 192-94. See J 47.

A map of the ground at Cocke's Hook between the estate of Henry Rutgers and the East River, made in order to lay out a street system, bears this date.—See the original (map No. 145), in bureau of topography, board president's office, Municipal Bldg.

The Tammany Society and other citizens draw up and sign the following petition to congress: "Your memorialists, citizens of the United States, and inhabitants of the city of New York, beg leave to recall to the memory of your honourable body an event which you cannot but have noticed; an event famous in history, melancholy in its circum stances; for which, while it was an object of regret and sympathy, and seems also, in the opinion of your Memorialists, to claim some attention from the political fathers of our country, the supreme legislature of the United States of America.

"The lapse of years is gradually drawing the veil of oblivion over the memories of those unfortunate men, our once esteemed fellow citizens, who, when our country struggled for its rights and liberties, gallantly faced the most powerful maritime nation of Europe on her own element, and were doomed, by the ill fortune of war, to languish out their lives in extreme misery and distress on board the Prison-ships of our enemies in the harbour of New York.

"The subject to the mooring-places of those floating prisons where our brave seamen yielded their lives to the merciless policy, or native barbarity of a foreign foe, is the scite of the present navy
Alderman Barker, one of the minority against the resolutions and the petition adopted on Jan. 27 (p. 49), moves that the memorial to the legislature be reconsidered. The motion is lost, and it is ordered that the petition "pass the Common seal," and that one copy be delivered to the president of the senate, another to the speaker of the assembly, and at least one to the city members of the assembly.—M. C. C. (1784-1811), III: 193. See F 14.

The governors of the New York Hospital, according to their annual report, "have long laments, that an Hospital otherwise so well adopted to the alleviation of human misery, should not furnish an asylum, convenient and inviting, for the reception of that class of our fellow-creatures who are deprived of the use of their reason . . . none are more entitled to pity and compassion, or have a more powerful claim on us as professors of Christianity. Under this impression of the subject, connected with the idea of the hospital, and a new room being at hand, they have concluded, either to erect a wing [see F 3, 1807] to the present building, or to raise another story in order to provide for the comfortable reception, of those poor, unhappy and deeply afflicted people."—Assemb. Jour. (1805), 120. Before the end of the year a third story was "added to the edifice;" the governors were thereby enabled "to provide more convenient accommodations for patients."—Account of the N. Y. Hosp. (1804), 33. descript. of Pl. 88, III: 571. See, also, Ja 1, 1805.

"The Public are respectfully informed, that after This Evening the Theatre must necessarily be closed for some weeks."—Am. Cit., F 5, 1805. It was reopened on Feb. 21 (see F 11). The temporary closing was due to the inadequacy of the receipts.—Dunlap, Hist. of the Theatre (1853), 238.

A correspondent has read with great pleasure the memorial from the Corporation of this city to the Legislature, against the necessity and propriety of altering the charter [see Ja 27]. It may have the intended effect; but if it should not, the corporation have done their duty, and they will be seconded by every reflecting man, in making a stand against those wretched democratic and disorganizing principles which have brought us into disgrace and confusion, and to the very brink of ruin.—N. Y. Gaz. & Gen. Adv., F 7, 1805.

"Resolved, That the square at the corner of Duane, Hudson and Jay Street be reserved for a Church. And that the Committee of Leases report ways and means for the purpose of building a Church in the said square."—Trin. Min. (MS.). See, however, F 21, 1805, and also Mr. 10.

The Public are respectfully informed, that on Monday, the 21st of February, 1805, the Theatre will be opened with a Drama, in three acts, (interspersed with Music) called, The Voice of Nature.

"During the cessation of Theatrical Exhibitions [see F 5], every exertion, which the time will admit of, is making to clean and repair the internal part of the house, in particular by covering the roof and new coloring the backs of the boxes.—Am. Cit., F 1805. The theatre was sold on Feb. 18, 1804 (q.v.)."

"John P. McCombs" (as he signs himself) petitions the common council "for the employment of keeping in repair the pavements of this City." He says he "has followed the Business of a Paver in this City for ten years." The petition is also signed by 19 citizens who recommend him. Among them are John McComb, Jr., Joseph Fr. Mangin, and Charles Loss.—On the original petition (MS.), in metal file No. 28, city clerk's record-room.

The common council authorizes the street commissioner "to treat with the proprietors of ground through which Broadway is intended to pass until it unite with the main road near the three mile stone."—M. C. C. (1784-1811), III: 199.

The board also orders "that the street commissioner direct that all the Streets on the ground commonly known by the name of Delaney's ground be opened as soon as possible."—Ibid., III: 199.

"Delaney's Square" appears on the Rutter Map, Pl. 42, Vol. I, which depicts New York in 1766-7. For De Lancey St., one of the streets laid out on this ground, see L. M. R. K., III: 997.

The common council refers to the mayor a petition of several citizens against "the pernicious tendency of blending Grocers and Tailors together in the same street;" and directs, "until further order, the police to take care the same shall not be acted upon by the board until Nov. 7 (q.v.)."

The common council appoints a committee to examine, in conjunction with the comptroller and street commissioner, "the new map of this City now nearly ready to be published and to take such measures as will be the most proper to indemnify this Board and the persons who have executed the same for the Expenditure that has been incurred."—M. C. C. (1784-1811), III: 200. This was the Goerck-Mangin Map.—See Pl. 70, Vol. I; and D 11, 1799. See, further, F 14, infra.

Alderman Barker lays before the common council "the reasons of the minority . . . for dissenting from the resolution and petition adopted in relation to altering the Charter of this City as it respects the qualifications of the electors of Charter Officers" [see Ja 27 and 31], but by a vote of 8 to 4 the board resolves that the reasons shall not be entered in the minutes.—M. C. C. (1784-1811), III: 202. A "Protest of the Minority in the Corporation," bearing this date, was printed in the Morn. Chron., F 19, 1805.

The neglect of the clerks of the markets to execute the law against "forestallers" has caused scarcity of provisions in the market place in consequence of which the liberty and profits of the city have been injured . . . as is also felt by the public, especially the poor. The common council orders that the clerks be more vigilant in the execution of their duty in this particular.—M. C. C. (1784-1811), III: 202.

In consequence of a memorial from Dr. Nicholas Romayne, on Jan. 10, requesting the common council "to take possession of the Ground near Corlaer Hook ceded by him for the purpose of Streets," the street commissioner reports that he has caused a survey of the streets from Montgomery St. to Corlaer Hook to be made. The ground in question was formerly part of the De Lancey estate and was sold by the commissioners of forfeitures conformably to a map made by Mr. Bancker. "The General Map of the City as lately made by Mens² Goerck and Mangin [see D 11, 1797, F 14, 1803, supra] does not correspond with that of Bancker and in consequence a question now arises which of the two ought to be adopted: The red lines in the Survey are the Streets as laid down in the General Map which make the Blocks and house Lots nearly square an arrangement certainly to be desired, but unfortunately it deviates so much from the Streets as laid down by Bancker that the adoption of it would create great difficulties from its total derangement of a great number of the Lots as sold by the Commissioners which are now owned by a variety of proprietors." Under these circumstances the street commissioner recommends, and the board adopts, alteration in the proposed directions of Cherry, Lombard, Bedlow, Harman, and Henry Sts. The board orders that the street commissioner "take measures to procure a cession of the Ground according to the plan thereof."—M. C. C. (1784-1813), III: 200. See also F 14, infra.

Under this date, the board made three payments for surveying, two to Mangin & Loss, and one to Charles Loss.—Ibid. (1784-
CHRONOLOGY : THE RECONSTRUCTION PERIOD : 1783-1812

1803 (1831), III: 207. The original vouchers, the bills of Mangini & Loss, are in Mangini's handwriting, and it is determined that of his payment of the 21st of March, 1803 (p. 22). The former (paid by warrant No. 38) is for examining "the ground of Dr. Romaine along the East river to Grand Street;" for "the Survey of the said ground;" for "protracting," and for "a figurative map," total $22.

The other (warrant No. 399), dated Sept. 1802, is for surveying and levelling Hudson St., between Barley and Moore Streets, paying the Surveyor therefor, and for regulating Barley St. between Duane and Chapel Sts., total $83.50.

Loss's individual bill (paid by warrant 389) is for the following services in Sept. and Oct., 1802: "to attend the Street Commissioner, and made a Survey & Level of Pine Street—Pearl Street—Water Front & South Street, to find out the best route of Regulating Streets properly;" and "make three different Maps or Profiles of those Streets with the regulations of Pine Street to the East river," at a total charge of $22.50. From the originals in record-room, dept. of finance, Hall of Records, in bundle labelled "Vouchers of Sundays Bills Paid, 1803."

A petition of Anthony Laspennard and other inhabitants of New York City "praying for certain alterations in the Charter of said city," and a remonstrance of the common council against any changes (see Ja 27), are read in the assembly, and consideration postponed. At the same meeting a bill is introduced by William Few for "the better regulation of the election of Charter officers in the city of New York, and designating the qualifications of Electors."—Assemb. Jour., 26th sess., 78. On Feb. 16, the bill was read a second time, and ordered to be referred to the committee of the remonstrance, and remonstrance were ordered to be taken up when the bill was considered.—Ibid., 26th sess., 83. The bill was passed under a different title by the assembly on March 16 (q.v.). See also F 17.

The establishment of a "Penny-post, on the footing of that in London as distinguished from the General-post," is advocated. A writer to the press, who makes this proposal, points out that: "Our improvements are now extending with such rapidity that it exceeds all calculation. Along the Greenwich road and the State Prison—and on the Bowery for above two miles, houses are erecting and lots improving. To walk from either of these places to the Coffee-House or City-Hall and back again is the journey of half a day. Yet to both of these places, to the auctions, the merchants' warehouses, along the East River, etc. multitudes often resort daily from the remotest parts of the city. But often, very often, they could transact their business by a note if there were any mode of prompt conveyance of a line which would produce an answer on the same day... there is no regular stage for the conveyance of persons to the heart of the city;—Under these circumstances the establishment of a Penny-post would be a material accommodation to the inhabitants of the city, and a great advantage for accommodating small expense by fixing certain stands at which letters could be left; and employing two or three active lads... An arrangement of this kind, by facilitating the intercourse between the different parts of the city, would afford a new inducement for persons of small incomes to settle at a short distance from the scene of business, and would thus enhance the value of the vacant lots between the Bowery and Greenwich-street." It is further stated that, while congress has power to establish post-offices and post-roads, this power is "not exclusive," and does not prevent the establishment of an "interior post" for the accommodation of a town or city.—Daily Ado., F 16, 1803.

17 A petition of John Broome and a number of other citizens of New York to the council, for the extension of the elective franchise in relation to the choice of charter officers in the said city" is read in the assembly and referred to the committee of the whole.—Assemb. Jour., 26th sess., 86. This was the memorial drawn up by the committee appointed at the general meeting on Jan. 7 (q.v.). It stated in part that "a great proportion of the citizens who are affected by the laws and ordinances of the... common council, and are thus subjected to the support of the said city have not any share in the representation in the councils of the same.

That inasmuch as on the one hand the freeholders of the said city by voting in every ward, if they have freeholds in the same, have electing rights far beyond what is consistent with the principles of a government founded upon the basis of equal liberty, so on the other the number of freemen is so very inconsiderable, that the great body of the people cannot under the charter be represented in the corporation of the same. It is too obvious to be denied, that the refusal of the freedom of the city to its regular inhabitants, is a source of great grievance, and invites the common council with full power, if so disposed, to convert the valuable objects of the charter into engines for promoting political views..."

Your petitioners beg leave further to state that... the elections for charter officers in this city have hitherto been conducted not by ballot, but by vote. The restraint which this mode of electing must produce upon the elector in exercising his privilege, is too obvious for us to use argument or shew the necessity of adopting the mode of election by ballot... Your petitioners do further respectfully represent... that although by the constitution and laws of this state and the United States, the qualifications of electors for members of the house of assembly of this state, and the house of representatives of the United States, is extended to every citizen who rents a tenement of the yearly value of five dollars, and who has contributed, by a regular assessment to the exigencies of the public—And although your memorialists have reason to believe that it is the wish of many of their fellow citizens that the elective franchise of the citizens of New York may be extended thus far, (still) your petitioners with confidence submit to the wisdom of the legislature for such an extension of the elective franchise as the local situation of this city may be found to require." The committee also asked that the words "be so equalized or increased in numbers, as that the inhabitants of each ward may be as nearly equal as the plan of the city will admit."—Morn. Chron., F 23, 1803. See Mr 16.

The board confers a plan of assessment for filling in "Cortland Slip."—M. C. C. (1784-1811), III: 207.

A committee, appointed on Feb. 14 "to enquire into the propriety of establishing a New Work house" in this city reports favourably, and the common council directs that it prepare a bill to be presented with a petition to the legislature.—M. C. C. (1784-1811), III: 206, 209.

The common council orders that "the Clerk prepare a conveyance from the heirs and Representatives of the late Alderman Bayard to this board of such parts of his Estate as are intended for Streets And that the Street Commissioner procure a proper map to be attached to such Deed."—M. C. C. (1784-1811), III: 209.

Feb. 21, the chairman of the building committee presents to the board an estimate of the prices of marble and stone of various qualities for the front of the city hall, but consideration of it is deferred.—M. C. C., III: 209, 211. See D 27, 1802. See, further, Mr 7.

The common council appoints a committee "for the purpose of making such reservations for public slips and Bascons as will be necessary for accommodating the river-boats."—M. C. C. (1784-1811), III: 213. See Ap 11.

The common council passes an ordinance "to prevent Dogs from running at large." It prescribes a fine of 25¢ to be paid by the owner of a dog found at large in any street, lane, road, or highway in the city.—M. C. C. (1784-1811), III: 214. It was repealed Dec. 1 (q.v.).

The comptroller lays before the common council a long report on the history of grants of water lots in both the East and North Rivers, showing the terms of lease, etc. The first grants on which rents were reserved were on the East River were made in 1734. It appears that there has been "inequality in the prices of the quit rent," which "gives dissatisfaction to the proprietors; and that "some uniform price should be fixed upon to be the guide on all future grants." In 1796, the board determined that in all future grants on the East River certain quit rents should be reserved; but this has never been acted upon, "as there has no new grants been made on the East River since 1792 and only 12 grants since 1775."

In consequence of "the great increase of the value of property on the East side of the town," it seems reasonable that the Corporation also should derive a share thereof. The value of the city's improvements along the East River in recent years is referred to, and certain amounts for quit-rents proposed. A similar review of the grants of water lots on the North River is presented in the report, with recommendations as to the amounts to be charged for quit-rents.

There is a great deficiency," the report states, "of public Slips and Bascons for the accommodation of market boats, and
The common council contemplates opening a street "from Cliff to Pearl-street, leading from Fair-street, so nearly to meet Beekman slip. The premises have already been surveyed by the street commissioners."—Chron. Express, Mr. 3, 1805. This is an extension of Fair (Fulton) St. from Cliff to Pearl St. The map of 1797 (see Pl. 64, Vol. I) shows Fair St. stopping at Cliff St. When it was cut through to Pearl St., it nearly met Beekman's Slip.

The committee of the assembly to which was referred the petition of Edward Livingston and others, who desired that an act be passed to incorporate "an academy instituted in the city of New York, for the promotion of the arts" (see D 3, 1802), reports "That it is the proposed intention of this association to procure from Europe approved specimens of sculpture, painting and architecture, with a view of opening a gallery for their exhibition, and of erecting a building for the improvement of the arts." The committee recommends that the petition be granted.—Assem. Jour. 26th sess., 150. The academy, however, was not incorporated until Feb. 12, 1808 (g. v.).

The committee to which was referred the report of the street commissioner "on the subject of the Canal" (see O 18, 1802) draws up the following report to the common council: "That having previously considered the same they are of opinion that under all the circumstances of the case the Canal or Tunnel as in the said report recommended is the only practicable method that can be adopted to produce the desired effect without injuring the health of the City; a Survey has been taken of the ground through which the Tunnel ought to be carried [see Mr 145] and is herewith transmitted by which it appears that the distance between the two rivers is 104 Chains 40 Links or 6830 feet, and the greatest elevation of the ground above low water is 12 feet 9 inches, that difference of the time of high water in the two rivers will give a head of water of about 16 inches every tide to carry off such filth as might have entered the Tunnel.

The Committee have not been able to procure a very accurate estimate of the expense of the Tunnel but it probably will not exceed Eight dollars per foot on an average or about $40,000 Dollars exclusive of the purchase of some Lots for the purpose of making the Tunnel as short and strait as possible and they recommend that the same extend on a level from the East to the North River one foot above low water mark and whose Internal Diameter shall be six feet in the clear. The Committee therefore beg leave to propose that the plan recommended in this Report be adopted but in order to make such progress as will best comport with a convenience to the expenditure necessary, they suggest to the Board, the propriety of making an open Canal from the Fresh water pond to the North River so constructed as at a future period when that part of the City becomes more settled it may be arched over and form a tunnel. The Committee are in some measure impressed with an idea that it will soon become necessary to fill up the fresh water pond with good wholesome Earth whatever may be the determination of the board on this head the Committee strongly recommend that all the Meadows and low marshy places or Edges of this pond be filled in, and that a bank or mound of Earth be erected around the main Body of this Pond in Order to take off the immense bodies of stagnant Water which at present surround it.

"The Committee further beg leave to state to the board that the grounds near to where the Canal must pass from the Fresh water pond to the North River are fast improving no time ought therefore to be lost in order to obtain a Session or to purchase the necessary soil for the Canal. The Committee entertain strong hopes that whatever steps may be partially undertaken in this business they will embrace and be directed to the full completion of the whole plan. No action was taken on March 7 when the report was presented to the common council.—M. C. (1784-1831), III: 218–20. See, however, Mr 21.

A petition of the proprietors of water lots between the Old Slip and Coffee House Slip, asking that the permanent line may be completed, is referred to the street com's.—M. C. (1784-1831), III: 212. To ascertain whether the Proprietors are willing to contribute towards the expense of extending a pier, or piers beyond that permanent line. . . .—Ibid, III: 241–42.

The common council passes a new ordinance for the better regulation of the city watch, and the division of the city into proper districts for that purpose. It provides for the appointment of six captains of the night watch, and not over 140 watchmen. The pay of a captain is fixed at $1200 and that of a watchman at 75 cents for every night's actual service. There are to be three districts, the bounds of which are defined, and to each of which are assigned two captains and a specified number of watchmen. Their duties are defined.—M. C. (1784-1831), III: 224–28. For the list of appointees, showing the companies and districts to which they are assigned, see Ibid, III: 236–64.

The resolution of American art. The city hall to continue thus: On March 7, the building com. reported "That they have procured different samples of Marble, that is—from Philadelphia—Stockbridge—Verplank's point—and from Morrisania, and that the highest possible cost is annexed to each to be delivered in this City. The Committee have further instructed Mr John McComb Jun' their particular agent in obtaining the samples aforesaid an Estimate on as general a principle as possible of the expenses in working the said marble fit for use, also, the highest probable cost of brownstone which said Estimates have been heretofore put in possession of the Board for their Instruction on the same, and it has appeared to the Committee that several members of the Board who having expressed their opinions to that effect, had a particular wish if possible that the plan of Messieurs Mangin and Macon herefore agreed on for the new City Hall might be in some degree Curtailed in its size and form. The Committee therefore in Order to satisfy themselves and the Board generally having consulted the Gentlemen who drew the said Plan, and the several artists whom the Committee have appointed to execute the same who give it as their unanimous opinion the original plan and design of the building carried into effect on the site as first given was at first contemplated, and that the projecting wings of the same may be curtailed near 20 feet and the order preserved. But the totally taking the said wings away would defeat the whole plan and would require almost an entire new one to be made and submitted for the adoption of the Common Council. The Committee are therefore unanimously of opinion that the said City Hall ought to proceed on the plan herefore approved by the Common Council, drawn and presented by Mess. Mangin & Macon—for which the said Common Council paid the premium agreed to for the advertisement of the Committee for that purpose—but so curtailed in its size in the projecting wings of the same as to bring the Court rooms to the front of the said wings and also to curtail the several rooms in size as much as the Committee after consulting the original drawings of the plan and the several artists who are to be particularly employed in erecting the same shall deem proper and the original design shall particularly require.

And the Committee are further unanimous of opinion that the front of the said Building ought to be built of the Stockbridge Marble and that the side or end view be built of Morrisania or Verplank's Marble at the discretion of the Both Mr Committee and the Back view or side be built of Brownstone and that the board ought to determine the exact scite where the same shall be erected without delay or give the Committee power to do the same." The report was rejected.—M. C. (1784-1831), III: 222–23. After the appointment of McComb as the committee's 'particular agent,' the name of Mangin does not again appear in any
transactions relating to the building. McComb, as supervising architect and builder, now begins a daily record of his transactions, which he keeps in a diary or "common-place book" (now in the New Y. H. S. archives), his first entry (p. 4) being under date of March 10, 1803, as follows: "I was directed to make out a Plan on a reduced scale by taking away two windows of the Projections in front & to shorten the length of the front by taking out two windows, also the depth of the building one window. On the inside of the front cover of the diary is pasted the printed offer of the "Premium of 300 Dollars," clipped from the Daily Adv. of Feb. 20, 1802. See, further, Mr 14.

The legislature passes an act increasing the number of wards in the City of New York from seven to nine, and describing their boundaries.—Laws of N. Y. (1803), chap. 29.

James Duport, (of New York, is appointed by Mr. Davre de Grace, A company of artillery on the Battery fire a national salute, which is answered by the fort on Governor's Island.—True American (Trenton), Mr 21, 1803.

The committee of Trinity vestry which was appointed to consider a situation for building another church (see Mr 8, 1802 and F 10, 1802) is directed "to consider of the Plan of a Church to be built in Hudson Street. . . ."—Trin. Min. (MS.). See Ap 7.

"Ordered that the Committee of Leases and repairs have the Governor's Pew in St. Pauls made into three and that Mr. Vandenheuvel, Judge Lewis and Mr. Priest occupy each of them one."—Ibid.

Comptroller Strong reports to the common council "that the survey of ground near the Collect which the Old Powder House stood; that belongs to the Corporation, there is no map of it, nor any description of its boundaries to be found, it lays now in common and adjoins to George Janeway's land which is also in common." There have been several applications for a lease of this ground for 21 years. It is supposed to be one lot, 25 by 100 ft, and can be let for 21 years at $50 a year. The comptroller recommends that, to bring out private claims of the members of the Board and ascertain its true boundary, it be enclosed by a fence at the expense of the city. It is so ordered.—M. C. C. (1784-1831), III: 234-35.

The city having formerly granted to the state "certain ground for the express purpose that a public Arsenal should be erected thereon," and the ground not having been "applied towards that purpose," the common council orders "that the Comptroller be authorized to transmit an application for the Reconveyance of the said ground."—M. C. C. (1784-1831), III: 235-36. See D 1.

The common council appoints a committee "for the purpose of taking such measures as may be necessary for the preservation of health in this City."—M. C. C. (1784-1831), III: 236.

A warrant is issued to pay an account of Charles Loss of $37 for "Surveying the Canal," extending for 10 chains (1784-1801), III: 236; descrip. of Pl 88-b, III: 651. The original is not on file; but is quoted and filed on this day, the following items: "Surveyed & levelled from the East River to the Collect—also from the North River to the Collect, to find out the proper distance and the exact levels."—From bill in bundle marked "Vouchers for Sundry Bills Paid," in record-room, dept of finance, Hall of Records.

The present city hall building committee is discharged by the common council, and a new one appointed, consisting of one member from each of the seven wards,—namely, Aldermen Van Zandt, Oothout, Brasher, Barker and Minthorne, and Messrs. LeRoy and Begardus.—M. C. C. (1784-1831), III: 234-35. On March 16, McComb entered in his diary his report to the committee on his estimated expense, thus: "If built on the reduced Plan, & of Bricks & Stone, it will be of the greatest utility, & probably cost $150,000. . . not exceeding 200,000 Dollars as I have made a large allowance" (in which estimate he acknowledges assistance from Mr. Geo. Knox, "who made a Calculation Stone Cutter work"); and, on March 18, he quoted from the minutes of the committee, "Re solved, that the reduced Plan for Building the New City Hall presented by Mr John McComb, Jun, be adopted & that the Front Row & all other parts be free from trees, etc. (the entry being placed out of chronological order, on the first page of the diary). The committee accordingly prepared their report to the common council; it was read on March 21, and contained the following recommendations: "that the reduced plan presented to the board by Mr. John McComb Jun" be adopted, that the vacant space of ground between the lot and bridgewell be determined on as a proper site for the same. That the wings in front range with Murray Street, on a parallel line with the fence in front of the Alms house & the Cupola range in a Line with the Cupola of the Alms house;

"That the Front, rear and sides be built with brown free stone, and the residue of the materials as shall be directed hereafter.

"The Committee feel impressed with the magnitude of this undertaking, and they assure the Board that in all their determinations, they have endeavored to combine durability, convenience, and elegance with as much economy as the importance of the object will possibly admit.

"Contemplating the materials as mentioned in that report the costs of the building as computed by Mr. John McComb will amount to $200,000, but when it is Considered that estimates for public buildings cannot be made perfectly correct the Committee think it will be correct to have every expense fully itemised and a report was adopted at that meeting; and all new questions were to be decided by the committee or referred by them to the board for their direction.—M. C. C. (1784-1831), III: 244-45. See, further, Mr 22.

A writer signing himself "Public" suggests that "the committee appointed to solicit subscriptions for, and to superintend the erecting of, a Monument to the memory of General Washington" (see D 15, 1802), might advisedly "commend the pedestal part immediately," for which "a plan, or design should be fixed upon directly, and a copy of it sent to some proper person in Europe—and perhaps our Ambassador in London—to engage an artist to make the Equestrian part."—Daily Adv. Mr 15, 1803.

The assembly passes "An Act to extend the qualifications of electors for Clark Officers in the city of New York, and for other purposes" (see F 15)—Assem. Jour., 26th sess., 197. This bill provided that all persons who possessed a freehold worth $50 or a seven-year lease worth $50 or paid a yearly rent of $5, and who had been resident in the city for one year and had paid taxes, might vote for civil officers, that all elections should be by ballot, and that no one might vote out of the ward in which he resided.—Morn. Chron., Mr 23, 1803. The bill was read in the senate twice, and, on March 17, referred to a committee of the whole. Thereafter, it was not acted upon.—Senate Jour., 26th sess., 87-88, 90. See also New York S. Collections (1835), 297-304. The subject was renewed the next year (see Ja 10, 1804).

Although Hugh Gaine has not paid the city the consideration of $400 on which a grant of water lots was made to him on Jan. 30, 1797, he has "wharfed out, and made considerable improvements and received the rents thereon and now wishes to complete his wharf to the permanent line." The board confirms the comptroller's recommendation that the extended grant be made "upon the condition of his paying the interest of the $400 from the time it was promised, and laying the amount of principal and interest as a quit rent on the premises, and also reserving the quit rent from low water mark to the permanent line and reserving the proper Streets."—M. C. C. (1784-1831), III: 239. For the plan of quit-tenement reservations, see F 28.

The common council confirms a report of the comptroller that the corporation is bound by agreements made in 1789 and 1792 to grant to Henry Rutgers "the soil between high and low water marks opposite his ground between Rutgers Slip and Washington Streets," and "from Washington Street to Warren Street," leaving Rutgers Slip 120 ft. wide, a slip at the foot of Montgomery St. 90 ft. wide, and a public slip at the foot of Warren (Clinton) St. 100 ft. wide; reserving also "the necessary public Streets, and the right of Wharfage in front and inside of the Slips."—M. C. C. (1784-1831), III: 239-40.

Comptroller Strong brings to the attention of the common council the fact that docks at the foot of George and Charlotte Sts. on the East River, and streets on each side of them (200 ft. into the river), have been contracted as required by an agreement with the late Hendrick Rutgers in 1772. There is now "great Want of Accommodations for Market boats and coasting vessels on that part of the Town," there being "no public Slips between Catharine & Rutgers Slips. the distance of near half a mile." The common council adopts the comptroller's recommendation that the present owners of the property be required to complete the wharves by Nov. 1, or that the grants be forfeited according to the original covenants.—M. C. C. (1784-1831), III: 240.
The place selected by the street com'v and accepted by the Mar. common council as "a proper place for depositing occasionally the Stone near the Battery on the North River in the rear of Mr Rhineanders House," this being "a large unoccupied space, contiguous to the River, and at considerable distance from any dwelling houses."—M. C. G. (1784-1831), III: 245. On April 11, several inhabitants petitioned "against depositing manure in the vicinity of Mr Rhineanders what."—Ibid., III: 261.

The common council orders that the superintendent of the almshouse be directed "to have two stables standing in the Alms House yard removed."—M. C. G. (1784-1831), III: 245, 258.

The common council appoints a committee "to inquire into the expediency of opening Chamber Street, to Chatham Street."—M. C. G. (1784-1831), III: 246. On June 27, the committee reported that it "would not at this time do proper to open the said Chamber Street as contemplated."—Ibid., III: 324. It was not extended to Chatham St. until 1811.—See L. M. R. K., III: 99-96.

The common council resolves "that an Ordinance pass for the formation of a Tunnel from the East to the North River agreeably to the report and profile presented by the Committee appointed to consider and report upon that subject [see Mr 6] And that the Street Comm'v endeavor to obtain cessions of such ground as is necessary for that purpose."—M. C. G. (1784-1831), III: 246. See My 21.

On March 22, McComb, quoting from the minutes of the committee, enters in his diary: "Rese that an Architect be appointed to superintend Building the New City Hall which shall have complete control over every department. Rese That Mr Jno M Combs Junt be appointed the Architect to agreeable to the foregoing and that he receive for his Services the Sum of Six dollars per day for each and every day he may be engaged at the New Hall." On March 29, quoting from the same minutes, he stated that the committee appointed Joseph Newton head carpenter at $4 a day; John E. West and Ezra Weeks master carpenters, and Anthony Stunback and Arthur Smith master masons.

During this month, also, McComb began to make a record of his examination of stone-quarries. On March 16, he recorded, "By orders I went to Newark to try to procure one of the Quarries;" March 22, "I rec'e an order from the Building Committee to purchase one or more of the Newark Quarries, on such terms as I might think most reasonable;" March 27, "I went up to look at a Blue Stone Quarry of Mr Underhill at New Rochell—good stone may be got there;" March 29, "Mr Knox & myself took another look at the Stone at Morrisina [sic]—we still thought good Stone might be got thin or there & best to open the Quarry."—McComb's Diary, at N. Y. H. S. See, further, Ap 2.

A meeting is called of a committee "for the New Exchange to be erected in the neighbourhood of Peck-alp."—N. Y. Exe. Post, Mar 14, 1803.

The "New York bread company" petitions the common council "to be relieved from the forfeitures incurred by neglecting to mark their bread." Rejected.—M. C. G. (1784-1831), III: 247-48, 251. On May 23, this company's store was destroyed by fire.—Ibid., III: 288.

The common council refers to the alderman and assistant of the Fifth Ward a petition from inhabitants living near "the new market" (Catherine Slip Market) "that a Market for Fish may be erected contiguous to the same."—M. C. G. (1784-1831), III: 247.

The common council appoints a committee "to confer with the Directors of the Manhattan Company or any Committee they may appoint to agree and fix on some general principle for defraying the expense of repairing or new paving the street or streets through which their Water has been led."—M. C. G. (1784-1831), III: 248. See My 16.

A committee of "the New York Society for improving the fine arts" petitions the common council "that a Lot of ground may be leased, or conferred to them for the use of the said Society." Refered to the comptroller and street com.'—M. C. G. (1784-1831), III: 248. Such a lease is not indexed in the register's office, nor is it found in the volume of City Grants.

The common council allows the city clerk $600 a year for his services and stationery. The incumbent is Tunis Wortman.—M. C. G. (1784-1831), III: 249.

A new ordinance is passed for the better regulation of public porters. Each is to be assigned a certain stand or station, where it shall be his duty to attend. They are required to supply themselves "with good and convenient wheelbarrows and one hand barrow for every two of the said Porters for the better carriage of goods and articles."

Each porter shall be known and distinguished by numbers from one progressively, and that each of them respectively shall wear a badge on which shall be engraved and specified in legible characters the name of such Porter and the number of his Licence." He shall cause his own name, the number of his Licence, and the name of the place where he is stationed to be painted in white letters and figures on his wheel and hand barrow on pain of forfeiting his Licence to the end that if any such Porter shall be guilty of embezzlement or other improper conduct he may be the more readily detected."

The charges for his work are prescribed. He shall forfeit his licence for over working his day, and shall not direct or permit another person to carry goods for him.—M. C. G. (1784-1831), III: 249-50.

The common council orders that the clerk prepare and publish an order "for removing the Horse market to the space in front of the New watch house at the corner of Division and Chatham Streets."—M. C. G. (1784-1831), III: 250. This ordinance is made "in pursuance of the 'Law to regulate the sale of horses, to prevent their running loose in the streets or highways in the city of New York.'" It directs "That no horse shall in future be shown or exposed for sale at or near the gate in front of the Alms House," but, instead, at the place designated.—Com. Adv., Mr 31, 1803.

The Bunch of Grapes tavern, No. 11 Nassau St., between Cedar and Pine Sts., is designated for the meeting-place of the "New York Cricket Club on March 31."—N. Y. Gen. & Gen. Adv., Mr 29. For other references to this tavern, see Jl 5, 1800; O 22, 1806.

The First Presbyterian Church purchases from Abraham K. Beckman 24 lots for a cemetery, situated "between the Dutch & Quaker Burial ground" in the Bowery, paying $100 for each lot. The First Baptist Church in Gold St. acquires title to 8 of these lots from the Presbyterians at the original cost.—Proc. of the Town (M.S.), Vol. II.

McComb records: "I reported That agreeable to their directions that I had purchased a lease of one of the Quarries, belonging to the Presbyterian Church of Newark" (that is, a quarry leased to John Hawthorn, from whom he leased it), for $500, paying $250 down and giving a note for the balance payable Jan. 1, 1804. He added: "I have engaged this Quarry in my own Name & would it could not be known otherwise abroad as I am certain I can work it much more economically." (The diary does not state here what kind of stone was taken from this quarry, but it was presumably brown-stone, as that was the kind used later in the foundation before it was decided to use marble for the superstructure, and this conclusion is confirmed by an entry a year later, March 28, Com'v, which follows: "As we cannot have Brown-stone this Season I think it best to give up working the quarry at N-ark.")

Another entry of April 2 (out of chronological order with other entries at the opening of his diary), is that, at a meeting of the building com', it was "Resolved, That a report be made to the Corporation informing them that it would be proper to retain the length in front of the N. C. Hall agreeable to the Plan originally made by Mr J. M. Combs, Say 215 feet" and in accordance therewith, on April 4, they made the following statement to the common council: "The Building Committee beg leave to state that on the 21st of March last they made a report to the Board on the subject of the new City Hall, in which report they recommended the adoption of Mr. John McComb's reduced plan; since which doubts have arisen in the minds of the Committee as to the propriety of diminishing the length and thereby to leave out two windows in Front. The Committee have seriously deliberated on this measure and after consultation with the Chief Architect and Chief Master Carpenter they are of opinion that the full length of the Building ought to be preserved agreeable to the original plan as being more conformable to the strict rules of Architecture, which in a building of such magnitude is of primary importance. (Signed) John Oothout, Chief Eng." This was considered by the common council.—M. C. G., III: 253-54. See, further, Ap 5.

The common council orders that the corporation council examine the city's title to "the Lands upon the margin and in the vicinity of the Collected claim by John R. Livingston, Edward Livingston, Dominic Lynch, and others."—M. C. G. (1784-1831), III: 253-55. Title Company records do not show just what
course the city took to establish its title. The map of the Sixth Ward, 1814, by Ludlam (filled in the topographical bureau) seems to be the map by which a compromise agreement was established. The lands of the corporation and also of Lynch and the other owners in the neighborhood of the Collect are shown on this plan. See, further, My 28, 1804.

A. A. Omans.—The two agreements, a resolution to a resolution of the Corporation respecting a piece of ground on the Broadway, that was purchased some years since for the erecting of works to supply the City with Water [see Ag 8, 1774] L. M. R. K., III: 976.—Reports—That, the piece of ground in Question contains about one acre and three quarters, is a high hill, and cannot be applied to any profitable use in its present State—the Corporation owns the Collect, and a quantity of low marsh adjoining to it to the amount of between 5 & 6 acres. It is a desirable thing that this low ground should be filled up both for the health of that part of the Town, and also that the ground be applied to some beneficial purpose. It is recommended that Contracts be made with Suitable persons for digging out this Hill and filling up the Meadows with the Earth to a suitable height; there is also a piece of ground adjoining the ground of the Corporation that belongs to Frederick and Augustus Van Cortlandt, the Earth on which was offered to the Corporation a few years since gratis, provided they would remove it—This ground being very handy to fill up the Collect It is Recommended that application be immediately made to Messrs Van Cortlandt and if it can be obtained that Contracts be made with proper persons for digging it into the Collect. Resolved, That the 14th Street be turned.

The common council confirms the report, and orders "That the Comptroller apply to Messieurs Van Cortlandt for permission to use the earth mentioned in the said report, and that the Street Commissioner issue the proposals to have the same carried into the Collect."—M. G. C. (1784-1811), III: 235. See, further, My 13.

With this order, the filling in of the Collect Pond may be said to have begun. It was completed about 1811.—See descrip. of Frontispiece II, Vol. III, p. 540. The boundaries of the Pond, as defined by the present street plan, are thus described: "The site of the Collect Pond is enclosed within an irregular line, beginning at the intersection of Lafayette, Center and Park Streets, and following approximately Park Street to Baxter Street, Baxter to White, White to Lafayette, and Lafayette to the point of beginning. The line in the lane of Baxter Street near Leonard Street, and in Mulberry and Mott Streets parallel with Baxter Street on the East is due to following the old Collect Pond shore line. Hence the origin of the name "Mulberry Bend." Just north of the present Pearl Street the pond was contracted by a tongue of land between Pearl and into two unequal sections. The line of Pearl Street was sometimes called the Little Collect Pond. The principal outlet of the pond began near the junction of Worth Street, Parc Street and Baxter Street, and flowed southeastwards approximately along the line of Baxter Street and Roosevelt Street to the East River. It was called Old Wreck Brook. Another outlet flowed northwestward from near White and Lafayette Streets to Canal Street and followed the line of Canal Street to the Hudson River. The pond and both outlets were bordered by marshes. Those to the westward of the pond and northern outlet were very extensive and were long known as the "Lispenard Meadows."—17th Ann. Rep., Am. Scenic & Hist. Pres. Soc. (1912), 119-20 (illustrated by drawing of street plan—plate 16).

The legislature enacted "That the rights, privileges and advantages of the street called Pearl Street, where by the act entitled 'An act repealing an act for granting and securing to John Fitch the sole right and advantage of making and employing the steamboat by him lately invented, and for other purposes,' passed the 27th day of March, 1798 [sic], be extended to Robert R. Livingston and Robert Fulton, for the term of twenty years from the passing of this act; and that the term for giving the necessary proof of the practicability of a boat of 20 tons capacity, being propelled by steam through the water, with and against the ordinary current of Hudson river, taken together, four miles an hour, be and the same is extended to two years from the passing of this act."—Laws of N. Y. (1805), chap. 94. On April 6, 1807, the act was revived and extended for another two years.—Ibid., 1809.

On April 5, McComb's city hall record reads: "I marked out the Ground for the Building and the Cartmen began to dig for the foundation. Previous to this [April 4] the Corporation Resolved to have the length [sic] of the building agreeable to the original design of 215—9 but insisted on the building being reduced in depth as they had directed in March. Reducing the projections in front I readily agree to, but cutting off the depth of the building I contended was a very bad Plan, as it spoils the proportion of the large rooms & will cramp the whole of work—but no arguments could prevail. Several wishes to cut off the projection of the front and two of the Committee insisted that the North Front had better be built of blue Stone.—The foundation is all on Maiden Ground except the N. W. corner which stands on one of the Bridewell sinks, which was well cleaned out, and filled in for about 4 feet with fresh earth well rammed & wet. There was another old sink about 50 feet from the front and one about the center of the East front both of which was filled up with good earth & well rammed—as was all the Principal trenches.—Mr. Stunback & myself found a decent from the Center of Building to Broadway to be 3'-6" distance 305'-0" to Chatham Street 4' 4" distance 308'-0".—McComb's Diary. See, further, Ap 11.

A. B. Hamilton draws up articles of agreement for the Merchants' Bank; these were later signed by 391 subscribers to the capital stock—Hubert, The Merchants' National Bank, 1803-1923, 1-8. The bank was chartered on Mr 26, 1805 (q.v.).

Trinity vestry resolves that they will "immediately commence the building of a Church [St. John's] on the ground selected for that purpose in Hudson Street [see F 10] agreeable to a plan to be decided on at the next vestry," and a building committee is appointed.—Trin. Min. (M.S.). See, further, My 12.

The vestry also orders "that the Committee of Leases sell at public auction thirteen Lots on Hudson Square reserving the Corner Lots on a Lease for 99 years, . . ."—Ibid. Hudson Square is shown on Pls. 64 and 70, Vol. I. Although this was its official designation, it was usually called St. John's Park.—L. M. R. K., III: 971. See also Ap 16, Vol. III. See Ap 27.

An invoice of two boxes containing weights and measures, shipped from Philip Sansom of London to Robert Bown, New York (intended probably to fix standards for the city), is audited by Selah Strong, comptroller.—It is filed in the record-room, dept. of finance, Hall of Records.

The common council again considers questions relating to the grant of water lots and the extension of wharves. It appears that the shore from Chambers Street to Besters Killitie from high to low water mark is principally occupied by persons that have built docks thereon or erected sawpits or make use of it to deposit Timber. These persons pay no Rent to the public who is the sole proprietor of the soil." Plans are adopted to correct this condition.—M. C. G. (1784-1811), III: 260-61.

On April 11, the common council orders "that the Building Committee be authorized to remove the ground which shall be taken out of the Cellar of the New City hall, under the direction of the Street Commissioner and at the expense of this Board."—M. C. G., III: 264. See, further, Ap 18.

The committee appointed on Feb. 28 (9 v.s.) "to make proper reservations for public slips and Bacons" reports that they have examined the North and East Rivers and agreed that there should be reserved for public slips a space of 260 feet at the foot of Reade and Jay Sts.; and 200 feet each at the foot of Moore, Laight, Watts, and Brannon Sts.; and that there should be reserved on the East River 100 ft. at the foot of Clinton St., 120 ft. at the foot of Seaman St., and 100 ft. at the foot of the street next to Corlears Hook.—Ibid. (1784-1811), III: 261-62.

The common council adopts a resolution for laying "the first stone of the city hall, and for having an inscription placed upon it, the text of which is entered in the minutes of this date (see May 26, 1805, regarding the ceremony and inscription); and it was resolved that this inscription 'be Engraved on Marble & that the Board attend the Mayor in laying it in the North-East corner,' and that the mayor 'draw on the City Treasurer for the Sum of Two Hundred Dollars and present it to John McComb when the Ceremony is performed, as a Compliment to the workmen.'"—M. G. C. (1784-1831), III: 268. The board made an additional donation of $50 to the workmen on May 30.—Ibid., III: 297.

At the bottom of page 682 of the minutes, immediately following the text of the inscription—"layed this stone—someone has added this significant comment: "Jos. E. Mangin drew the plan which done credit to this superstructure."
THE ICONOGRAPHY OF MANHATTAN ISLAND

It is only partly legible in the original volume, but in the volume used by the public, which is a copy made about 1885, it reads in full as stated. When and by whom it was written in the original is unknown. More direct intimations of this character appeared in the newspapers after the laying of the corner-stone. See summary under May 26, 1803, and descrip. of Pl. 75, Vol. I, where are recorded the sporadic activities of a group of French artisans and sympathizers with Liberty, due perhaps to the spirit of the times, eventually gave the situation the character of an international struggle for prestige, while it placed on record important facts relating to the history of the city hall. See, further, My 16.

The common council refers to the building committee a report from the court of "that Water from the Manhattan Company can be procured for the use of building the New City Hall at the rate of $100 per Annum."—M. C. C. (1784-1831), III: 271.

The common council orders "that the Academic Society be in future prohibited from holding their meetings at the City Hall on account of improper conduct."—M. C. C. (1784-1831), III: 273. On May 9, the society petitioned for a renewal of their permit, but this was not acted upon.—Ibid., III: 275.

The common council appoints a committee to report the draft of an ordinance "for regulating the sale of Sea coal in this City."—M. C. C. (1784-1831), III: 273. See My 25.

An application from Mr. Longworth, editor of the New York Directory, for permission "to use the New Map of the City to Correct his reduced one" is referred to "the Committee appointed to consider the new map."—M. C. C. (1784-1831), III: 273. Evenly, the Goerck-Maengin Plan is referred to.—See Pl. 70, Vol. I.

The board also directs the court com'r to take measures "for straightening and extending Fair Street to Pearl Street, and for opening Beeckman Street to Water Street."—M. C. C. (1784-1831), III: 273. See, for Beeckman St., Ag 16, 1750. See, further, My 12.

"The number of new buildings erecting and to be erected in the course of the present year exceed, according to the best observation, those of any former period. The improvements in Broadway, Greenwich and the intersecting streets, are unparalleled in the most flourishing period of our city—a certain evidence of the wealth and prosperity of its inhabitants. A number of Lots in Hudson square [sic] the most elegant building spot without exception in the whole city, are to be sold tomorrow. It was to be wished that some condition of sale could restrict purchasers from reducing the size of Lots in this part of the town. The Corporation of Trinity Church has manifested a laudable spirit, in laying out wide streets and generous dimensions throughout their property; but the original lots have been most shamefully subdivided and curtailed, by which time the new portion of this city will in process of time, experience all the inconveniences and evils arising from the cramped and circumscribed proportions of the most ancient part. . . . Every building lot ought to contain such dimensions as will secure a free circulation of air in rear as well as front."—Daily Adv., Ap 27, 1803. On May 12 (p.v.), restrictions were placed upon the erection of buildings around Hudson Square.

In opening his Vauxhall Garden for this season, Delacroix explains his reasons for making a charge for admission: "reter. [When free]... Many persons enter with the only intent of walking in the garden, without any benefit to the house. 2d. All persons genteelly dressed had free right to enter, many persons answering that description were not genteel in character, therefore not suited to the chief part of the company. . . . 3d. No public place of resort can be supported in a genteel and expensive style, when every person has an indistinct right of entrance. 4th. The receipts were not adequate to the expenses and support of the place. . . .—All persons entering the garden will take a ticket for two shillings, which entitles them to a glass of any refreshment . . . entrance on Sunday will remain as heretofore—Frec."—Daily Adv., Ap 25, 1805. See My 27.

The United States purchases Louisiana from France. The treaty was ratified by Napoleon in May, and by the United States in October.—Laws of U. S., 8th cong., 1st sess., 174-203; Winnor, VII: 165, 479, 543, 547, 576.

James Hardie advertises the removal of his "Literary Office" from No. 7 Church St. to 305 Greenwich St. He appears to have had the first in New York to advertise this profession, which was "to write petitions, memorials, letters, advertisements, etc., and to "revise and prepare for the press such articles of a literary nature as may for that purpose be submitted to his inspection."—N. Y. Eve. Post, My 7, 1807.

The common council receives a representation from Richard Varick and Nicholas Everson stating that they have been appointed "to treat in behalf of the Dutch Church in this City for the materials of the clock in the New Dutch Church Steepel and the use of the same to the Commissioners." The board appoints a committee to treat with them.—M. C. C. (1784-1831), III: 276. According to the committee's report, on May 30, the majority proposed to give the city the clock and the use of the steeple and bell provided the city would keep the clock "in repair and well regulated." The common council adopted the report and accepted the offer; and, dismissing Peter Field, the supt. of public clocks, announced his employment "as a suitable person to perform that office, his duties being to regulate not only this but also other church clocks, "Provided the Corporation of Trinity Church and of the Presbyterian Church will entrust the regulation of them to the direction of this Board."—Ibid., III: 295.

The common council pays Peter R. Maverick $480 as "balance of his Accr for engraving New Map of the City" (the Goerck-Maengin Plan see JI 15, 1799).—M. C. C. (1784-1831), III: 276. The Goerck-Maengin Plan, however, is signed "Peter Maverick."—See Pl. 70, Vol. I. See also D 5.

The common council orders "that a Lottery be directed for raising the sum of $15,000, for the benefit of the Widows Society in pursuance of the powers vested in this Board by the Act of the Legislature at the last session."—Ibid., III: 276. See My 23.

"Several Plans of Churches were laid before the Board [Trinity vestry] for their approbation, whereupon the one recommended by the committee drawn by John and Isaac M'Combs was approved of.

"The following resolutions restricting the buildings to be erected on Hudson square were agreed to—viz: . . . That the Lots shall be sold at appraisement for the term of 99 years, at the expiration of which the buildings to be taken at a fair valuation or the Leases renewed on equitable terms. . . . That every Lot shall have a brick dwelling house erected on it the width of the Lot in front on the square, to be covered with Tile and slate, not less than thirty feet high, and no wooden building shall be erected on any Part of the Lots. . . . That every House shall be uniform to the Water Table, which shall run on a straight line throughout, the height to the lower part of the Water Table shall be four feet from the ground. . . . That every corner house on the square shall be three stories high, and of an uniform appearance on the out side. . . . The two first [sic] stories to be twelve feet and the third story nine feet between the beams."—Trin. Min. (M.C.). See JI 9 and 20, and Vol. II, JI 14. A plan and agree description of St. John's Chapel, drawn by John M'Combs, are reproduced as A. Pl. 11-e, Vol. III.

In response to the order of April 4 (p.v.), the street commissioner reports that he has advertised for proposals for carrying into the adjacent lowlands the ground mentioned in the comptroller's report of that date, and has received estimates. From these it appears that the lowest bid is that of Philip Ruckel, who offers to do the work for $13,795. The common council accepts the offer.—M. C. C. (1784-1831), III: 278-79, 473.

The board also orders that whenever the street comm's shall have the offer of any dirt for filling in the Collect," and can obtain it "for a Sum not exceeding 5 Cents for a Cart Load," he authorised "to purchase the same and when received in the proper place to Certify the same to the Comptroller who is hereby authorized to pay the same on the part of this Board."—Ibid., III: 280. See infra, each year, while the work was in progress, a summary of payments made by the city in that year for filling in the Collect, and for dirt to be carted there. See JI 11.

The common council directs that lots on Pearl and Water Sts. be purchased with a view to extend Beekman St. to Water St.—M. C. C. (1784-1831), III: 278. A report was read on July 18.—Ibid., III: 350. On Aug. 1, the comptroller reported the lowest valuation of the property necessary to be taken to open and extend this street.—Ibid., III: 364.

The common council orders that an ordinance be prepared to prohibit ferries from New York to the opposite shores unless authorised by the board.—M. C. C. (1784-1831), III: 283-84.

See My 23 and JI 18.
On Thursday the 26th day, according to previous arrangement, the corner stone was laid under the discharge of seventeen cannon, from Fort Stevens, Regiment of artillery, who assisted at the ceremony.

The mayor on laying the stone gave the workmen one hundred dollars — in which we had a handsome collation provided, and plenty of drinks given them.

All the builders supped with a part of the corporation at the Sons House — had an excellent supper, plenty of good wine, — we stood till one o'clock A.M.
The proprietors of lots between the Coffee House Slip and the Old Slip agree to construct four piers between these slips in compliance with an act of the legislature, and in accordance with stated specifications.—M. C. C. (1874–1871), III: 284–85.

The next group of records concerning the new city hall is this: the common council pays Jos. F. Maugin $75.85 "for Surveying and laying out the Lots," — M. C. C. (1878–1881), 225. The Council, at its next meeting, audited this day by the comptroller, shows the following items: "for the Survey of the liberties of the prisoners;" "for protracting and calculations;" "for a figurative map;" "for an other Survey to fix the Liberties after an other direction;" "for a Second plan and Calculations;" "for a Second figurative map;" "for the fixations of the Liberties on the ground;" "for Surveys of the ground of Alms house the Goal & Bredwell for the fixation of the new court house [city hall] ground;" "for the Map." The bill is endorsed by Mayor Livingston on May 14 as follows: "The services stated in the within account were performed by order of the Court of Com plaint called the Mayor’s Court of the City of New York for the alteration of the limits rendered necessary by building the New City Hall." — From bill in bundle marked "Vouchers for Sunday Bills Paid," in record copy, dep’t of Finance, Hall of Records. See further, May 23.

The common council authorises the street com’r to employ an inspector to "report to him from time to time all infractions of the Laws and Ordinances of this board to prevent incumbrances in the several streets wharves and slips," at $3.50 for each day he is employed. — M. C. C. (1874–1871), III: 286. See JI 1.

War again breaks between England and France. This lasted until Napoleon’s banishment to St. Helena in 1815—Hazen, Modern European Hist., 199–200.

The common council receives, and orders to be filed, a bond from the managers of the lottery for the benefit of the Widows Society (see My 26) — M. C. C. (1874–1871), III: 287. The lottery was advertised on May 24.—Daily Adv, My 24, (305). See N 28.

A committee on regulating the Bowery Road reports that at certain seasons it is almost impossible owing to the sunken state of parts of it. Plans are adopted to regulate it, and make sidewalks, the latter at the expense of the proprietors exclusively.—M. C. C. (1874–1871), III: 287–88, 303.

The common council passes "A law for procuring regular bills of exchange of the City of New York, 1804;" "A law to regulate the sales at auction in the City of New York;" and "A law to regulate Ferries between the City of New York; and the opposite shores" (see My 16). The text of these laws is not entered in the minutes. The draft of a law to regulate the sale of coal (see Ap 25) is referred to a committee.—M. C. C. (1874–1871), III: 289. On June 14, the law to regulate sales at auction was amended, and its text recorded.—Ibid., III: 308.

The street com’r reports to the common council that "all the proprietors of the Land in the direction of the Tunnel [see Mr 21] from the North River to the Angle near M’Linches Rope Walks, have offered tocede a Street for this purpose to be 60 feet wide, and are desirous that the same should be carried into effect as soon as possible."

The proprietors of the Land between the Angle above named and Chatham Street are not at present disposed to cede the same without some compensation therefor.

"The Street commissioner begs leave to recommend that he be directed to procure forthwith deeds of Cession from the proprietors who are willing to grant the same for the purpose aforesaid and that the Tunnel be commenced at the North River as soon as a Contract can be made for the same." The report is confirmed, and the street commissioner is ordered to "pursue legal steps to obtain such ground as cannot be obtained by voluntary grant the whole extent to Chatham Street."—M. C. C. (1874–1871), III: 290. See Ag 8.

On May 23, the common council receives and files a contract with the City Engineer for the New City Hall. — M. C. C. (1874–1871), III: 276, 287.

On the same day, the board fixed May 26 for the ceremony of laying the corner-stone: the resolution being "that this Board, the Chief Architect & Master Workmen assemble on Thursday next at 3 o’clock to attend the Mayor in laying the Corner Stone of the New City hall and that the Ex-Members be invited to attend the ceremony and that the Superintendent be requested to provide a Collation for them accordingly." A committee was appointed to arrange the ceremonies.—Ibid., III: 291. The day before the ceremony, orders were issued, by Lieut. Col. M. M. Lowes, majors of the Regiments of the Sixth Regiment to assemble "on the regimental Parade" at 2 o’clock the following day, march thence to Broad St., and form in front of the city hall (on Wall St.) to assist in the proceedings.—N. Y. Eve. Post, My 25, 1803. For an account of the laying of the corner-stone, and the events which followed to the completion of the building, see the Commercial Advertiser of the 26th.

The corner-stone of the city hall is laid. The Commercial Advertiser of this morning, in announcing the event for the afternoon, adds: if justice be done to the original design of the Architect, this Edifice will vie, in taste and magnificence, with any public Structure in the United States." John McComb, Jr., who had been appointed by the building committee on March 22 the supervising architect and master builder (see extract from the committee’s minutes in McComb’s diary of that date), thus records the event: "On thursday [sic] the 26 May, agreeable to Previous arrangement the Corner Stone was laid.—under the discharge of seventeen Cannon—from Genl Stevens Regiment of artillery." He records in full the inscription on the stone, adding: "Cut on a White Marble Slab" also: "The Mayor on Laying the stone gave the workmen One Hundred Dollars—on which with a handsome [sic] Collation provided for the workmen, and plenty of drink given them. All the Builders suped [sic] with a part of the Corporation at the Alms House—had an excellent [sic] Supper plenty of good wine we staid till one Oclock A M."

For newspaper accounts of the ceremony, see Daily Adv, My 26, 27 and 28; Morn. Chron., My 27 and 28; Com’l Adv., and N. Y. Eve. Post, My 27; and Am. Cit., My 28, 1803. That in the Morn. Chron. is as follows (My 27):

"New City Hall.—Yesterday the Foundation stone of the New City Hall was laid by his honor, the Mayor, at the head of a procession, composed of the Common Council, Public Officers, Mechanical Society, &c. &c. Gen. Steven’s regiment of artillery, under Major Curtenius, and a detachment from Col. Morton’s infantry, under command of Maj Loomis, formed the escort. The procession commenced at the City Hall, and proceeded through Broadway, Beaver-st. and Broadway, to the Park, where the military formed and saluted the Mayor and Recorder, as they passed along the line. The stone being laid at the discharge of a signal gun, a national salute was fired from the field pieces, and a loco-de-joye of three rounds from the frigate. The military proceeded to the Park, where they formed a hollow square, were regaled with a supply of wine from the corporation, and dismissed." On May 28, the same paper continues: "We find that only the President and Vice President of the Mechanical Society walked in the Procession, and not the whole body." The "Order of Procession" follows, printed in a column, those marching being "The Military, Citizens, Master Builders, High Constable and Marshal, Door Keeper and Messenger, Deputy Sheriffs, President and Vice President of Mechanical Society, Chamberlain and Clerk, Comptroller and Superintendent of Alms-House, Street Commissioner and Surveyor of the Customs, Police Magistrate;" then, with "Constables" as escort on either side, there followed "Ex-Members of the Board," including the Mayor and Recorder; "the Members of Congress and Members of the Bar, Grand Master and Spanish Consul, Judges of the Supreme Court & Members of Congress, Mayor of Albany and Chancellor of State:" next, with a lateral escort of "Marshals," are "High Sheriff of City and County," and the "Alderman and Assistant" of each of the seven Wards; and, lastly, the "Mayor and Recorder." The account of the event in the Com’l Adv. gives the additional information that the stone was laid "precisely at 6 o’clock," by "his honour the Mayor, assisted by Mr. McComb, the architect, . . . at the southeast corner of the edifice also that The artillery fired a federal salute and the band of music performed a military air;" after which "the Mayor delivered a short appropriate address, which was received with the applause of a vast concourse of citizens." The Eve. Post account adds this: "The length of the New Hall will be 216 feet, and the average
May 26

1803 depth about 100; to be built of cut-stone, the basement rusticated; the first story to be of the Ionic order, with columns and pilasters; and the upper story of the Corinthian order. "The ends and rear to be ornamented in an elegant manner."

On June 27, the board paid John Bogert, chairman of the committee on the day's ceremonies, $150 for the expenses of laying the corner-stone.—Ibid., III: 335.

The inscription to be placed on the corner-stone, as prescribed by the common council on April 18 (M. G. C., 1784-1831, III: 265), was as follows:

"The Corner Stone of the Hall of the City of New York was laid by order of the Common Council
By
Edward Livingston, Esquire Mayor
John B. Prevost, Recorder

Wynant Van Zandt
Andrew Morris
John Oohtoth
Caleb S. Riggs
Philip Braisher
Ebenzer Stevens
John Bogart
Jacob Le Roy
John P. Ritter
Robert Bogardus
Joshua Barker
Clarkson Crodus
Mangle Minthorn
Henry Brevort

On the 26th day of May Anne Do 1803, and the 27th Year of the Independence of the United States
John Oohtoth, Esquire
Wynant Van Zandt, Jun'
Philip Braisher
Joshua Barker
Mangle Minthorn
Jacob Le Roy
Robert Bogardus
John McComb, Jun', Architect
Joseph Newton
Anthony Steinback
Arthur Smith
George Knox
Alexander Campble

The inscription was entered by McComb in his diary under date of May 26 (the day the corner-stone was laid). It was published in the "Evening Post" on May 27, and in the "New York Chronicle" on May 28. All of the inscription before the names of the building committee was on the "upper" side of the stone, the "Reverse" side, while the names of the committee, architect, etc., were on the "other" side. McComb referred to this latter part of the inscription as on "the reverse side." The names of the members of the building committee, as published in the "New York Chronicle," do not include Alderman Braisher and Minthorn. The "slab," thus cut on the "upper" and on the "reverse" sides, must have been entirely surrounded and covered by the foundation, as it does not now appear on the surface of the wall. See, further, My 27.

On May 27, 1803, he recorded: "This day the Masons began to work regularly." June 4, "Visited the Quarries at N-Srk & Second river, & gave the directions for stone." June 23, The "Foundation of all the walls was finished & began to raise on the first offset," July 5, "the work going on very steady, only trouble is to make the Masons move for a while.—Got one of the Stone holes that was for a Pillar," July 6, "I visited the N-Srk and Second River Quarries ... find it of advantage to Visit Hawthorn now and then;" Aug. 2, "Setting the Basement Sills;" Aug. 3, "Mr. Knox returned from the Country, was much pleased to See him in better health—an experienced Stone Cutter is of great advantage." Aug. 9, "Visited the Quarries at Newark & Second River. They were breaking out Columns, 2d River," and "The fever began to spread fast. Several of our workmen left us—& the citizens removing out of the City." For the records of work done by the carpenters during the progress of the construction of the city hall, see description of record-book under date of May 30, 1803. The last date of entry in this book is Nov. 11, 1803. See, further, My 25.

In announcing a "display of Grand Fire-Works" for May 31 at his Vauxhall Garden, Delacroix says that "A new road has been made to the Garden, from Broadway, commencing at the foot of the Hill now digging out." He adds: "The road will be lighted." Daily Ady, My 27, 1803. This was the opening of the season, this year, at Vauxhall. In a later ad, he describes the new road as "of easy ascent, beginning at the Furnace."—Ibid., My 31, 1803. See, further, My 27.

The first certain date of record, when Mangin's share in the authorship of the design of the city hall was called into question, was May 28, 1803 (but see Ap 18, 1803). On this day The Daily Ady, published the following: "A spectator of the Ceremonial of laying the foundation Stone of the New City Hall, expresses some surprise and mortification at the absence of Mr. Mangin, whose plan of the Edifice was adopted in preference to every other offered to the Corporation and asks, whether it was owing to an oversight in the arrangements of the day, or whether it is to be attributed to the Ancient Custom of the Mayor?"

On June 2, there appeared in the Evening Post the following editorial paragraph: "It would be much to be lamented that in the erection of this magnificent edifice, any difference among the members of the Corporation, or any private partialities or prejudices should be permitted to obtain, which should have an unfavorable effect on the building itself. We hope we shall not incur the imputation of impertinence to a very great degree, if we venture to say, that in an edifice of this magnitude and importance, it requires the constant superintendence of an architect of science from the laying of the corner stone to the turning of the Key." The full significance of this allusion is not appreciated until, farther on in the same column, one reads the continuation of the subject, as follows:

"It is with extreme regret that we have to record a transaction so illiberall as the one which forms the subject of the following communication. We should have given it place sooner, but we wished first to make the party, by whose name the calamity falls, known to the public. Mr. Mangin, we apprehend, and we should now have suppressed it, had we not satisfactory reasons to believe it is founded in too much truth.

FOR THE EVENING POST

Mr. Editor,

"As one of the spectators of the procession of last Thursday, I had observed that the French architect, Mr. Mangin, the real author of the plan of the New City Hall, did not appear, and that Mr. Macomb, alone, was carrying it in ceremony. The embarrassment in his countenance, which indeed was not unbecoming, reminded me of that charming line of Virgil . . . "Miratur . . . novas frondes et non sua poma.

"All this, however, I explained in my own way: The real author, said I, should be here; but he may be sick, or absent, and I thought no more of the matter. However, when afterwards on reading the inscription on the corner-stone I saw that the name of the architect was not to be found among the large list of persons concerned in the planning and erection of the edifice, who are thus to be handed down to posterity, I grew a little out of humor—Now said I to myself, it is strange that the name of him who invented the plan should be the only one missing: surely this must be a mistake; the stone is large enough, and such an injustice to a man of talents can never have been designed. The modesty of Mr. Macomb himself must, I think, be put to a severe test, thus to be held up as the only projector of the edifice. Thus reasoning, I walked along, reflecting how this omission could be repaired. The stone was laid down. There was no altering the inscription. I then
recollected the famous dittich of Virgil, on an occasion somewhat similar, when in Bathly: it was very indistinct, poet of that age,
and contrived the next day to have it laid in the foundation of the building,
not far from the cornerstone—

"VII. I. D. M. A. D. MDCCCLII.

John W. Nichols.

"Hanc Edem invenit Mangin, tulit alter honores.
"Sic vos non vobis nidificatis aper
"Sic vos non vobis mellificatis aper
"Sic vos non vobis vellera ficti oves
"Sic vos non vobis arsita atra bones.

And when a man of time, who have laid low the immense fabric, our descendants, in finding the stone, will also find the brass, and thus render to the artist who planned it, the justice he had a right to expect from his contemporaries. An old Italian proverb says, e meglio tardo che mai.

"Justice."

The letter was copied in the Am. Citizen of June 3, and in the Herald of June 4. McBom made no published answer; but in his diary, under date of June 2, he dismissed the subject, without comment, thus: "Another communication was published in the evening Post—about the Manner Mr. Mangin was treated in not having his name published as the Architect." The word "Another" does not refer to any former communication in the Post on this subject, but either to The Daily Adv.'s mention of it on May 27, or to something published on May 27 about the Post's mention of the laying of the cornerstone. See also descrip. of Pl. 75, Vol. 1; see, further, My 30 and Ag 11.

"The French Church Du Saint Esprit" having been repaired and altered, is consecrated as an Episcopal church by Bishop Moore. —N. Y. Herald, Je 1, 1803; Wittmayer, Hist. Sketch of the Episcopal Church, 1xviii.

The new Masonic Hall in Frankfort St. (see O 13, 1802) is consecrated and named St. John's Hall.—N. Y. Gaz. & Gen. Adv., Je 13, 1803. The building was four stories high. The ground floor contained a reading-room, saloon, and living apartments. The second and third floors were arranged and fitted for lodge purposes. The fourth floor contained the chapter and encampment rooms, these being highly ornate. Political meetings and festivals were held on the second floor.—Proc. of the Grand Lodge of N. Y. (1935), 74. The building was demolished in 1847—L. M. R. K., III: 986.

It being suggested to Trinity vestry that a part of the ground upon which it is intended to build the new Church [St. John's], may require the driving of Piles to render it sufficient, the corporation orders the building committee to "begin to dig for the foundation in such place as most probably may be of the description above mentioned, and if they find the above suggestion to be well founded, they desist from work until the sense of the Board shall be taken, but if otherwise then that they proceed to complete the foundation, as far as the silts of the windings. —Trin. Min. (MS). See May 13.

Nicholas De Fyster, signing his letter "1st Capt. Artillery," writes to Mayor Livingston that, as the officers of artillery have been informed that the common council "have it in contemplation to present the Regiment with a stand of Colours," he has been requested to furnish the board with the following information: "The Colours may be had at an expense of about £200 Dollars, and if ordered immediately will be finished by Mr. Savage
The common council orders that an application be made to Supreme Court Justice Kent "to appoint three persons to estimate the Damages sustained by this Board in consequence of the digging of trenches by the Manhattan Company in the Streets of this City. And that a copy of the said Application be served by the clerk on the Manhattan Company."—M. C. C. (1784–1831), III: 326. See JI 6 and 18.

The ordinance for Sunday observance is amended by repealing that part which permits "the sale of strong Spirituous Waters until nine o'clock in the Morning."—M. C. C. (1784–1831), III: 328.

The common council appoints a committee, including the street com'rs "to enquire and report to this Board on the expediency of extending Broadway across Bowery road and in what direction and to what extent" also "whether the owners of the ground through which the said Street is to run if extended or which of them are willing to cede to the Corporation the ground necessary to extend the said Street as far as they may think the same ought to be extended."—M. C. C. (1784–1831), III: 329. On July 11, the committee reported the names and properties of the owners of the land and the probable value of each parcel; and the board confirmed a resolution "that it is expedient and proper to extend Broadway across the Bowery road in a direct line to the land of the heirs of DeLanoy después and that the annuity through the lands in a direct line with the new or Middle road," provided the owners will make concessions necessary to make the road 80 ft. wide.—Ibid., III: 338–39. This "Middle road" became Fifth Ave.—L. M. R. K., III: 1005.

The "Corporation" gives an "elegant Dinner" in the city hall to the vice-president of the United States (Aaron Burr). It is attended by the "late Minister at the Court of St. James" (Mr. King), by the French, Spanish, and Swedish consuls, and by a number of notable private citizens.—Com. Adv., JI 6, 1805. The dinner cost $350.—M. C. C. (1784–1831), III: 359.

Among the elaborate celebrations planned for this day was the following, announced in a full column advertisement: "Joseph del Duex informs the public that the anniversary of this memorable epoch will be celebrated at Vanuxen Hall in a garden style in taste and magnificence to any thing hitherto exhibited in this city. . . . At six o'clock in the evening, a military company, attended by a numerous band of music, will enter the garden, and after marching through the principal avenues, will arrange themselves around the railings which inclose the statue, when artists, decorated with white and blue ribbands, provided with the necessary implements, will remove the scaffolding, and disclose the Equestrian statue of Gen. Washington, appropriately erected in a section of the garden called the Field of Mars, decorated with military trophies gilded, garlands of white roses, and sketches of the principal events of his military life. The company of volunteers will fire a salute of a hundred guns, and the event will be followed by a military dinner. . . . At sun-set, sixteen standards, emblematic of the United States, will be erected in the Field of Mars, the sumit of which will be illuminated by flambeaux, the band performing Yankey Doodle; when a general illumination of the garden will take place, and an elegant display of Fire-Works, far superior to any hitherto exhibited. . . . To describe each particular part of this extraordinary spectacle, would baffle the most able pen—and would in itself occupy a column. Suffice it to say, that the Coup de Feu will occupy a space of nearly 500 square—and that for Magnificence and Grandeur, 'twas never equalled in America, and (perhaps) not exceeded elsewhere; and may, without doubt, be brought forwards as the grandest Pyrotechnical Exhibition ever presented to an American Assembly. It will be composed of 16 Radials, each 40 feet in circumference, placed in a Semi-circular form, and in perspective view, each Radial bearing the name of a State—in its centre—In the back ground a Grand Radial of Double Glory, sixty feet in circumference, with the American Eagle in full splendour—the Radial supports the Tomb of Gen. Washington, which is itself 18 feet high, and adorned with a French and an American Banner. What of this prevented us from giving a more particular description of the 15 first Emblems—the 16th only, is alluded to in the above sketch.

"Description of the Equestrian Statue."

This Monument, made by an able artist, is 18 feet in height, by 14 feet in length, and 10 feet base. The figure of General Wash-

"The Colours at present attached to the Regiment are highly valued from the circumstance of having been unfurled at the Installation of our late beloved President General Washington, and . . . is contemplated by the Officers to place the colours under the protection of the corporation. . . ."—From the original letter in metal file No. 20, city clerk's record-room. The letter was read in common council on June 14, but the corporation then decided not to grant the new colours.—M. C. C. (1784–1831), III: 306. See, however, No. 20.

The common council amends the ordinance "for the appointment of a Street Commissioner and to regulate the paving and keeping in repair and to prevent obstructions in the Streets of the City of New York," by adding a provision prohibiting the building of a bow window more than a foot beyond the front of a house.—M. C. C. (1784–1831), III: 310. See My 14, 1804.

The city pays $96 for "24 Leather Hats" (doubtless firemen's hats).—M. C. C. (1784–1831), III: 313. The original bill, dated May 18, and audited by the comptroller, is filed in the record-room of the City Hall of Records. As early as 1762 (p. v, D 21), they were "leather caps."

Evert Bancier makes a "Return of Proprietors and Occupants names and measurement of the South Side of Pearl and north side of Water Street."—From original in Bancier Coll. (box R-W, folder V-W), N. Y. P. L.

The common council orders that an ordinance be drawn for digging out and regenerating Grand St.—M. C. C. (1784–1831), III: 310. See My 14, 1804.

The committee in charge of the new church reports to Trinity vestry "that it would be improper to erect a Church on the spot contemplated [see F 10 and Je 9] from the nature of the ground." The report is approved.—Trin. Min. (M.S.). See JI 14.

The common council orders that the street com'r "take the proper steps to affix the names to all the Streets that require it: And also the numbers to such of the houses as may be thought necessary." Mr. Carmean "has already procured a number of boards painted for this purpose."—M. C. C. (1784–1831), III: 318.

The common council orders that Ebenezer Stevens be authorized "to procure a stand of colours to be presented [on July 4], at the city hall to the New York Regiment of Artillery in Exchange for the colours used by them at the inauguration of the late General Washington as the first President of the United States" (see Je 17).—M. C. C. (1784–1831), III: 320. It became necessary, on May 20, 1805, for the board to again order that this resolution be carried into effect.—Ibid., IV: 2.

"E. Savage" advertises his "Phisognotrace," a "curious and useful machine" which "is now completed" and added to his "Museum, 80 Greenwhich-street." He explains that "by the Phisognotrace, profile likenesses are correctly taken in half a minute." He adds, however, that it is "essentially necessary, that this machine is decidedly superior to any thing of the kind in the United States.—Visitors to the Museum may have their profiles traced on paper for a single cent: they will be executed, for a short time, on glass, at 50 cents. The price will soon be raised. Portraits painted in oil from 40 to 500 dollars. Hours of attendance from 9 o'clock in the morning to 9 in the evening."—Daily Adv., Je 25, 1805.

In an address at Columbia College, Dr. Hosack mentions that he has "at a very considerable expense, purchased from the Corporation about twenty acres of ground for the purposes of a Botanic Garden [see S 13, 1802] . . . The Ground selected is . . . is situated on the Middle Road, within four short miles of the city."—N. Y. Ev. Post, Je 29, 1803. This "Middle Road" became Fifth Ave.—L. M. R. K.; III: 1005. For the Garden, see Ibid., III: 946. The common council orders that the market committee report whether it would not be proper to introduce the Manhattan water into the Fly Market.—M. C. C. (1784–1831), III: 322.

The common council refers to a committee a communication from the com'rs of the almshouse regarding the "propriety of building a school house for the children and separating them from the inmates." The com'rs added, such improvements, as justice and merit, are beyond the power of a Committee, and the committee reported favourably, and the board appointed a committee to report a proper site, with a plan of the building.—Ibid., III: 337–38. On Nov. 12, 1804, a report from the com'rs of the almshouse "relative to the establishment of a School for the poor children" was referred to a committee.—Ibid., III: 626.
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1803
July
4

The common council refers to the health committee a petition of James Quackenbush and others "that their works for the manufactory of Morrocco Leather may be permitted to stand."—M. C. C. (1784-1831), III: 333-34. See Jl 18.

The common council appoints a committee to attend 25 persons appointed by Justice Kent (see Jl 18) to estimate the damages caused by laying water pipes, and to provide suitable accommodations for them.—M. C. C. (1784-1831), III: 335-56. See N 24.

Thomas Barclay, British consul-general in New York, writes to Lord Howkesbury in London advising him of the movements of Napoleon, as on My 9 having again petitioned the common council on July 11 "that a new ferry may be established across the North River to New Jersey," the committee appointed to consider the subject reports that Budd already has secured a necessary legislative act enabling him to establish a ferry from his wharf between Powsle Hook and Hobuck on that shore, and that he has expended about $2,000 or $2,500 for wharf and boats, and contemplates other improvements; and that he is willing to run two sail boats to one run by Mr. Holdren, the lessee of the present ferry to Powsle Hook. Other details of the arrangement are suggested by the committee, and the common council adopts the entire proposal to establish the new ferry, the place of landing in New York being the Cortlandt St. slip.—M. C. C. (1784-1831), III: 374:49-535.

Jerome Bonaparte, youngest brother of Napoleon, arrives at Norfolk, Va., from Martinique.—Sergeant, Jerome Bonaparte. The Burlesque Napoleon, 55. See Jl 29.
Jerome Bonaparte (see Jl 20), who is endeavouring to evade the British naval ships and get home to France from the West Indies by way of the United States. As a guide to the officers of the British navy in apprehending him, Barclay gives the general description of Bonaparte, who appears to be from twenty to twenty-three years of age [he was really not quite nineteen years old], of a slender make and sallow complexion, about 5 feet 6 or 7 inches in height,—His hair is cropped, black and smooth, but at times he adds a queue, and powder." Two companions and a servant of Bonaparte are also described as to their personal appearances.—Riv. Selections From the Correspondence of Thomas Barclay (N. Y., 1894).

Thomas Barclay was a notable personage in New York in the Revolutionary and post-Revolutionary periods. He was the eldest child of the Rev. Henry Barclay, rector of Trinity Church and a graduate of King's (Columbia) College. In both the Revolution and the war of 1812, he took the British side. From 1799 to 1812 he was British consul general at Falmouth, and from 1823 until his death in 1830, he lived here as a private citizen.—Ib., 410.

Bonaparte came to New York on Nov. 19 (p. v.).

Aaron Burr, writing to his daughter Theodosia, says: "I am negotiating for the possession of Richmond Hill, by exchanging with Colonel F. for my house in town... In the sale of this estate I reserve the house and a due portion of the ground about it; you will not remit me to part with it."—Davis, Memoirs of Aaron Burr, II: 277.

The common council receives a committee report on a proposed regulation of Vesey St. slip, and orders that it be filled in, and that when this is done "the Corporation will take measures to have a handsome market house erected thereon in a Line with the other Market house between that and Greenwich Street."—M. C. C. (1784-1813). III: 369-70.

The board ordered that the street com'rs report upon the propriety of filling in Vesey Street Slip and also on the propriety of having a Market for Fish established at the end of the said street."—Ib., III: 468.

The street commissioner presents to the common council "a diagram of the ground necessary for a Street to be sixty feet wide from Chatham Street to the angle near the Fire Bridge, in which way the present projection of Tunnellal is intended to pass from the East to the North River" (see My 23). In his report on the subject, he says: "The proprietors of this ground are in general averse to fix a price for the same but it may probably be estimated at about 30,000 dollars. The proprietors of the ground between the angle above named and the North river do not appear to have any objection to cede to the Corporation a Street 60 feet wide for the purpose of being exonerated from any part of the expense attending the extension of the Street to Chatham Street. It would probably be most equitable and advisable not to accept of a gratuitous cession of land from any of the proprietors but to let the whole be taken and valued according to law, and the expense thereof made a joint charge on the proprietors of the immediate adjoining Lots from Chatham Street to the North River which is spreading fast in that quarter."—Ib., III: 373.

The whole city of New York is alarmed by the extent of the yellow fever. It is considered due to impure air. Nevertheless, little attention is paid "to the dead cats which lie in swarms in every part of the city." There is neglect in keeping the city clean, although the corporation has exerted itself to effect it.—Boston Gaz., Aug 12, 1803.

The common council offers extra compensation to watchmen of the districts where they are exposed to "extraordinary hazard" during the malignant fever.—M. C. C. (1784-1813). III: 374.

The meetings of the board are suspended on account of the fever.—Ib., III: 375. See, further, S 29.

Bellevue Hospital is opened for the reception of fever patients. —N. Y. Herald, Aug 17, 1803.

The New York Gazette temporarily discontinues publication on account of an attack of yellow fever among the employees and in the family of Mr. Lang.—Ext. Post, Aug 24, 1803.

The fever is "rapidly encreasing," and the inhabitants are "flying in every direction." One third of the city is evacuated, "and where, a few weeks since, the din of labour and commerce was loudest, is now as solitary as a desert."—Boston Gaz., Aug 25, 1803.

The Board of Health report shows that, on Aug. 22, there were 7 deaths and 21 new cases; Aug. 23, 6 deaths and 28 new cases; Aug. 24, 6 deaths and 12 new cases.—Ibid., Aug 29, 1803. See, further, S 11.
It is resolved to fence in the burial ground of St. Mark's Church with neat palings in front and boards in their original state on the sides and rear."—Memorial St. Mark's Church (1889), 124.

"The number of inhabitants who have removed from the city, since the fever broke out, is supposed to be about 40,000."—Boston Gaz., Aug 29, 1803.

D. Fleischman begins running a line of stages between New York City and "Hearlem," starting on four days of the week from Mechanic Hall, and stopping enroute at Smith's tavern, "The Sign of the Swan," six miles out, for the Hellgate passengers. On the same days, stages start from his stage-house at "Hearlem," next to Marriner's Tavern, and stop at Smith's on the way to town.—N. T. Herald, S 3, 1803.

The site of St. John's Church is laid, "on the east side of Hudson's Square," by Bishop Moore.—N. T. Herald, S 10, 1803. The site was on the east side of Varick St. between Beach and Light Sts.—L. M. R. K., III: 393. The church was completed in 1807 (q.v., My 4 and Je 7). See also F 9, 1804.

An official report shows that, on Sept. 8, there were 9 deaths from the fever and 20 new cases; on Sept. 9, 10 deaths and 26 new cases; Sept. 10, 5 deaths and 22 new cases; Sept. 11, 8 deaths and 31 new cases.—Boston Gaz., S 15, 1803.

"... the temporary buildings erected on the Commons, about three and a half miles from the city, for the accommodation of the poorer class of citizens who inhabit those parts of the town where the fever is most prevalent, are now ready for their reception, where they will be accommodated at the public expense."—Daily Advertiser, Sept. 16, 1803.

The custom-house is removed to Greenwich opposite the state prison.—Com. Ad., S 16, 1803.

A New York doctor writes: "Our city has received greater damage this year than in any former season of Yellow Fever; the wealthy early abandoned the city, and the poor are daily falling victims to its ravages. The corporation early opened Bellevue, erected commodious sheds four miles from the city, to accommodate the poor who were still free from the disease, and appointed four physicians to attend the sick poor of the city. Better than one half of the citizens... have removed to the country."—Aurora Gen. Ad., S 29, 1803.

On Sept. 29, McComb's statement "concerning the difference of expense between Stone and Philadelphia marble for the front and sides" of the city hall is received by the common council and referred to the building committee with directions to enquire "whether the marble can be procured and the probable expense."—M. C. C., 1784-1831, III: 376. On the following day McComb was directed to go at once to the quarry where "good White Marble" could "be had," and present his findings.—McComb's Diary. He visited the White Marble quarries at White Plains, about 13 miles from Philadelphia, and reported to the committee on Oct. 10. The next day he wrote to Johnson & Stevens, owners of the white marble quarry at West Stockbridge, asking the same terms as had been offered at Philadelphia ("$8.00 per foot in Blocks"). The building committee reported to the common council on Oct. 24 McComb's former findings, that the difference of expense between marble and brownstone would not exceed $65750, including contingent charges; they "rest satisfied the same is the result of the most scrupulous correctness," and add: "When it is considered that the City of New York from its inviting situation and increasing opulence stands unrivalled, when we reflect that as a commercial City we claim a superior standing, our imports and exports are greater than in any other City, the situation of that place in this pleasing state of things to possess at least one public edifice which shall vie with the many now erected in Philadelphia, and elsewhere. It should be remembered that this Building is intended to endure for ages, that it is to be narrowly inspected not only by the scrutinizing eyes of our own Citizens, but of every scientific stranger, and in an architectural point of view it in fact is to give the face, and worth of the City. The additional expense of marble will be fully counterbalanced when we recollect that from the Elegance and situation of this Building the public property on the Broadway and Collect will much increase in value, and that the same influence will be extended to property far beyond these limits and that in the course of a very few Years it is destined to be the center and wealth of City. A Building so constructed will do honour to its founders and be commensurate with our flourishing situation. Under these impressions the Building Committee strongly recommend that the front and two end views of the new hall be built with marble." (Signed) "Wynant Van Zandt, Jr." A resolution was passed, accordingly, that the committee take steps to construct the front and two ends with marble.—M. C. C. (1784-1831), III: 379-80. On Oct. 24, a warrant was issued by the mayor to the chairman of the building committee for $5,000.—Ibid., III: 383. For a summary of expense for erecting the building, see infra.

They decided on Oct. 27 (see McComb's Diary), that McComb should go to West Stockbridge and "try to procure the marble at the price of the Philadelphia." On Oct. 29, he recorded: "This day the Hon' Dewitt Clinton was sworn into the Mayor's Office— I went down to the City Hall to receive my instructions relative to the呕气 Journey & had the pleasure to take a Glass of Wine with the Members of the Corporation & the Town that walked up & down the Gentleman of the Building [Committee] & received directions from the B. Committee to have the walls covered for this season as soon as possible.—The New Mayor took no notice of any of us concerned about the Building. I gave directions to Mr. Newton Mr. Smith & Mr. Stunback to level up the walls, to lay on the board timber all round on the outside walls & then to begin on Monday morning to cover in as speedily as possible." McComb saw "Mr. Stevens of West Stockbridge" and reported that he had agreed with him for the quantity of marble required at $66 cents pr. foot delivered here, if the committee should like the sample he had brought down." To make their choice the committee met on Nov. 2 "at Mr. Knox's Shop to see worked Samples of Phil. of Newel Hooks white Marble & a Sample of Johnson & Stevens—the last they preferred." They agreed with Mr. Stevens for a quantity of the marble at $1.06 a cubic foot delivered, and directed McComb to go to Stockbridge to close the contract.

McComb then opened a record-book which he labelled Orders for marble, New City Hall (in the N. Y. H. S.). On the first page is his signature and the date "First November, 1803." It begins with "First Bill—Copy of a Bill [or order] for Marble for the New City Hall—sent to Messrs. Johnson & Stevens at West Stockbridge on 3d November, 1803." It gives the number and sizes of blocks of marble ordered, and "Remarks" indicating for what part of the building each block is intended. "Second Bill," "Third Bill," etc., follow to July 10, 1807. For further progress on the city hall, see N 14.

A large bell to supply the place of that which fell and broke in St. Paul's Chapel last winter [see D 5, 1803], has been received by the Jupiter, from London, and suspended in the steeple of that Church during the last week.—It is from the celebrated founder of Thomas Mears, (late Barker, Pack and Chapman) White Chapel, London, and weighs 3000 lbs. —N. T. Herald, O 19, 1803.

The Board of Health recommends—Mr. Zandt, (1784-1831), III: 378. On Oct. 24, the common council presented him an address of approbation for his conduct in that office. It appears that he contracted a "dangerous illness" in administering to the relief of the citizens, but recovered.—Ibid., III: 381-82. He replied on Oct. 29—Ibid., III: 383. For his successor, see O 19.

The governor, with the consent of the council of appointment, names De Witt Clinton mayor in place of Edward Livingston, resigned. He takes the oath of office; and his commission is proclaimed.—M. C. C. (1784-1831), III: 384. Clinton held the office until March 16, 1807 (q.v.).

There were 606 deaths from the malignant fever in this city from July 29 to Oct. 29.—Daily Advertiser, O 31, 1803. Cf. Nov. 1.

The board of health recommends that the citizens can safely return to their homes, but recommends that the houses be cleaned and aired before being recopied.—Columbian Centinel, N 2, 1803. The number of cases during the epidemic was 1,625, and of deaths, 596.—Ibid., N 5, 1803.

The publishers of the daily newspapers published in New York form a combination to raise the price of the papers. The papers are the Daily Advertiser, Merchants' Chronicle, the American Citizen, Commercial Advertiser, and Evening Post. It is unanimously agreed, at a meeting at Lovett's Hotel, that $8.00 per annum, now paid as the price of subscription for a daily paper, is inadequate to meet the expenses of paper, printing, and publication, and that it shall be increased to $10.00 after Jan. 1, 1804; and that the price of papers delivered twice a week for country circulation shall be $4.00 per annum on and after that date.—True American (Trenton), D 5, 1803.
The common council appoints a committee "to inquire and report to this Board what applications if any are necessary to be made to the Legislature for the enacting or amendment of Laws relative to the rights of the Mayor, Aldermen & Commonality of the City of New York and for enabling this board better to govern this City."—M. C. C. (1784–1811), III: 387. The committee made its report on Nov. 14 (text not entered in minutes), but consideration of it was postponed.—Ibid., III: 388.

On Nov. 21, when the report was read in full and acted upon, it appeared that two questions were considered. One was whether the city is propitious of so much of the Slip both on the East and North river as are formed by extending Piers and bridges into the Rivers beyond the permanent line, or Seventy feet street, and entitled to the slipage or wharfage arising from the sides of such piers as adjoin and form a continuation of the public slips." The report explains this difficulty in detail. The committee recommends that application be made to the legislature to explain and amend the "Act to regulate the streets buildings wharves and slips in the City of New York."

The other question related to the blending of tavern and grocers' licenses for the sale of liquors, which was complained of on Feb. 14 (g. v.). It appeared that the practice "of granting to the same person at the same time to be the excise or license to sell strong or spirituous liquors under five gallons to be drank out of the House of the vendor and a licence as a Tavern keeper or to retail Liquors to be drank in the house of the vendor is attended with evil consequences;" as "thereby the small grocers become drunk shops where servants and the lower orders of the community are supplied."

The practice is considered by the respectable grocers of this City who retail under five gallons to be drank out of their houses as improper and degrading to their characters. "... the committee recommends that application be made to the legislature for a law "to prevent any person at the same time from having a license to retail strong or spirituous liquors under five gallons to be drank out of the house of the vendor and to keep a tavern or retail strong or spirituous liquors to be drank in the house of the vendor." The board confirmed the entire report and directed Richard Harison, the board's counsel, to draft the necessary petition to the legislature.—M. C. C. (1784–1811), III: 397–99. On Jan. 30, 1804, petitions with drafts of the proposed acts were approved and ordered to be transmitted to the legislature.—Ibid., III: 455–54. On Feb. 6, however, the application to the legislature on these subjects was ordered expunged by the board.—Ibid., IV: 459.

A committee reports regarding "the situation of the lot on which the barracks are erected." On the committee's recommendation, the board orders "that the Superintendent of the Alms house make immediate measures for the removal and sale of the buildings lately erected on the said lot by the alms Committee to the extent of the commodities and to keep a tavern or retail strong or spirituous liquors to be drank in the house of the vendor."

Jos. F. Mariner having petitioned the common council on Oct. 24, the comptroller reports that there is due him a balance of $100 "for making the large map of the City." This is paid.—M. C. C. (1784–1811), III: 391. See also ibid., III: 4023, Journal B and Ledger B, 1784–1809, in record-room, finance dept., Hall of Records. For earlier payments, see S 26, 1802.

The common council orders payment of Geo. Hallock's bill of $285 for "building & painting a boat for floating Engines."—M. C. C. (1784–1811), III: 392. By Feb. 15, 1804 (g. v.), the floating engine was ready for use.

The common council accepts and confirms the contract with Johnson & Stevens for marble (see S 29), and requests the mayor to affix his seal.—M. C. C. (1784–1811), III: 388. McComb went to Stockbridge on Nov. 18, and found the quarry could be bought for $500. On his return he learned that the workmen on the building were all discharged, "and the Master Workmen a little out of temper," and he tried to have the stonecutters employed again, as they might be dispersed and unavailable when wanted. He reported Johnson & Stevens' desire for certain necessary advance payments, and explained also about the poor condition of the roads until the middle of April, the need of "33 [sic] four-horse teams," etc.—McComb's Diary.

On Dec. 5, the building committee reported to the common council the progress of the work: That every department was organized soon after their appointment; that at the present season of the year all the workmen that could be dispensed with had been paid off and discharged, only stone-cutters being retained through the winter; that the basement store was now built up eight feet above the level of the street and was ready to receive "the first floor of Timber," and "the walls are all covered to resist the weather;" and that the amount expended to date was $16,875;1224 (but that only $18,443.31 was being received).—M. C. C. (1784–1811), II: 4074; 409–11, 414. On Dec. 13, McComb advanced (to Johnson & Stevens) $500 of his own money.—McComb's Diary. See, further, D 19.

The ship "Confederacy," of between 400 and 500 tons burden, is ready to be launched "from the yard of Messrs. Adam and Noah Brown, Comlers-Hook."—Daily Advertiser, N. Y., 17, 1833.

Part of the Richmond Hill property is sold to John Jacob Astor.—Hills. of New York, App. II, p. 8–9. See also descrip. of Pl. 55-a, Is. 417.

Jerome Bonaparte (see II 20 and 29) arrives in New York from Baltimore.—Letter from Thos. Barclay to Vice-Admiral Sir Andrew Mitchell, in Rives's Selections from the Correspond. of Thos. Barclay (N. Y., 1894), 154. Bonaparte left on Nov. 30—Ibid., 154. See also A. N. 22, 1803, and A. B., 4, 1804.

The comptroller's report "for monies expended during the late Epidemic" shows $14,986.83 spent by him to meet that emergency, out of an allowance of $15,000.—M. C. C. (1784–1811), III: 393–94.

The account of the suit of the almshouse shows that he spent, in consequence of the epidemic, $16,325.47, of which the corporation advanced $11,000. Deducting his receipts from all sources, the board owes him a balance of $5,378.45. A warrant is issued to pay him.—Ibid., III: 396.

A number of inhabitants of East George St. having stated in a petition to the common council that they "are incommoded by a number of Houses of ill fame," the board directs the mayor "to take such order thereon as the Law directs."—M. C. C. (1784–1811), III: 393.

Aaron Burr writes from New York to Theodoria: "Roger Morris's place, the large handsome house on the height beyond Mrs. Watkins, is for sale. I can get it for Richmond Hill with four acres. Will I exchange? R. M. has one hundred and thirty acres. . . . "—Jerome Bonaparte [see N 19] is here, and he will keep me three days to dine him. We have exchanged visits, but have not yet met."—Davis, Memoirs of Aaron Burr, II: 246.

The damages done by the Manhattan Co. to the streets in laying "conduit pipes." The common council orders that the board's counsel present this report to the supreme court for confirmation; that the commissioners be allowed $100 each for services and expenses, and the masons who assisted them the same amount, and that the mayor issue his warrants for payment.—M. C. C. (1784–1811), III: 400.

The common council, on Nov. 14, appointed a committee for the celebration on this day of the anniversary of the evacuation of the city by the British forces.—M. C. C. (1784–1811), III: 390, 404, 414.

The committee to whom was referred certain reports of the street commissioner on the subject of a plan for the future streets in the vicinity of the city reports that the map of the city, lastly printed and ready for sale [the Goerke-Mangan map],—see Vol. II, contains many inaccuracies and designates streets which have not been agreed to by the Corporation and which it would be improper to adopt, and which might tend to lead the proprietors of land adjacent to such streets so laid down into error. It is resolved "that the Street Commissioner be authorized to return the money paid by each subscriber for the said map who shall
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1803
No. 28

apply for the same in conformity to the above report, and to repay to any person who may have drawn upon his said account the same
whether he recovered for the same or not his purchase money and
receive back the Map so purchased; and that the Street Commissioner
be requested to endeavour to recall as many of the said Maps as have been sold, and either return the person the purchase money and keep the map or return him two dollars thereof and deliver him back the map with such explanation upon it as is usual. Signed: "John H. Livius, Chairman.""

The board passes a resolution recommending the inhabitants to observe that day in the manner stated, and to abstain from all employments inconsistent therewith.—M. C. C. (1784-
1831), III: 415-16.

The freeholders of Harlem petition the common council "that the public roads may be properly laid out and opened through the Commons belonging to them." Referred to the street com'rs.

M. C. C. (1784-1831), III: 416. On Jan. 30, 1804, the street com'rs reported that the petition (made by Samuel Bradhurst in behalf of himself and others) said that they contemplated dividing the Commons into small allotments, and desired that the public highways "should be run in as straight lines as the ground will admit of." For the com'rs' report and the board's action thereon, see Ja 30, 1804.

In answer to her father's letter of Nov. 22 (p. 9) regarding the advisability of exchanging the Richmond Hill House for that of Roger Morris, Theodora Burr Alston writes: "Richmond Hill will, for a few years to come, be more valuable than Morris's, and to you, who are so fond of town, a place so far from it would be useless. So much for my reasoning on one side; now for the other. Richmond Hill has lost many of its beauties, and is daily losing more. If you mean it for a residence, what avails its intrinsic value? If you sell part, you deprive it of every beauty save the mere view. Morris's has the most commanding view on the island. It is reputed to be indescribably beautiful. The grounds, the house, have the most delightful water can be made on an hundred and thirty acres! How much of your taste displayed! In ten or twenty years hence, one hundred and thirty acres on New-York Island will be a practicality; and there is to me something stylish, elegant, respectable, and suitable to you in having a handsomely-engrossed seat. So that upon the whole, I vote for Mor-
ris's."—Davies, Memoirs of Aaron Burr, II: 152-53.

The common council appoints a committee of health to report plans and recommendations for preserving the health of the city.—M. C. C. (1784-1831), III: 418.

The comptroller presents to the common council "his account of receipts and expenditures for earth carted into the Collect." This is referred to a committee.—M. C. C. (1784-1831), III: 418. The figures of this report are not entered in the minutes for this first year's expenses in this important work; but we are able to make a summary of warrants issued in 1803 to pay for it, as follows: May 23, $22.14 (to various cartmen); May 30, $15.95 (to other cartmen); June 7, $250 (to Street Com't Jos Brown); and $300 (on Rucked contract); June 14, $500 (on Comptroller Strong); July 21, $500 (to Strong); Aug. 11, $520 (to Rucked); Sept. 27, $4,000 (to Strong); Oct. 24, $1,000 (to Strong); Nov. 14, $500 (to Rucked); Dec. 12, $1,675.35 (to Strong), and $700 (to Rucked); total, $5,665.44.—Ibid., III: 394, 395, 396, 397, 377, 378, 392, 419. See also My 12, 1803. For further advances and payments made by authorization of the common council, see D 31, 1804. For the next mention of the subject of filling the Collect, see Ap 3, 1804.

The common council refers to the street com'rs a petition of Rem Rapalte and others requesting the board "to accept of a grant of the road leading from the Abingdon road to the house of John L. Norton, and to widen the same."—M. C. C. (1784-1831), III: 423-24.

The common council extends the time for filling in "Republican Ave."—M. C. C. (1784-1831), III: 424.

The common council appoints a committee "to inquire and report to the Board the present state of the public grounds near the government house which were reserved by the Legislature for public purposes, particularly whether any, and if any what individuals have taken possession thereof or any part thereof, and by what authority, and to what use the same is now appropriated and what use any and what appropriation is necessary to the Legislature respecting the said ground."—M. C. C. (1784-1831), III: 425. See D 23. The committee made a report on Jan. 30, 1804, and was directed to draft a petition to the legislature asking for a lease in perpetuity of the whole property including the government house.—Ibid., III: 456. See F 6, 1804.

The year closes with the appointment, on Dec. 19, of a new building committee, on the retirement of Alderman Outhout (chair-

Dec.
1803 man and Barker, who was appointed on March 14 (p. v.), the
new members being Aldermen De La Montagne and Morton;
while Alderman Zant is made chairman.—M. G. C.
(1784-1831), III: 424. Payments for the use of the building com-
mittee were hereafter recorded as given to John Begert, who was
chairman of the standing committee of public repairs (ibid., III:
438). See, further, 1804.

21 The New York Academy of Arts is now open. . . . In the
return to the Pothecary [sic] Ag. 1792, the young student may pass
his hours in uninterrupted study; . . . In addition to the statues
and busts which at present adorn the Pantheon, will be shortly
added, correct copies of those works of art which formerly adorned
the Italian galleries.”—DAILY ADV., D 21, 1803. See N 19, 1804.

23 Clinton writes to Simeon De Witt, the surveyor-general:
By an Act passed 16th March 1790 [p. v]. It is declared That
Fort George and the Lands adjoining thereto shall never be sold or
appropriated for any private purpose whatever

“In violation of this Act a Pot ash store has been erected from
Street to Street in the rear of the Government House and as it
is alledged under color of an act passed last Session authorizing
the Surveyor General to Lease certain Lands of the State con-
tiguous to Arsenals and Military Stores,

“This erection has excited a considerable sensation in this City
and it would afford me great pleasure if you would put it in my
power to represent to the Corporation the proceedings (if any) in
relation thereto that have really taken place under your direction
as they talk of an application to the Legislature on the subject
” (see D 19).—De Witt Clinton Letter Books (M.S.), I: 238. See F 6, 1806.

26 The street com’r reports to the common council “a plan of
the Common Sewers of the City of London, communicated by
Rufus King Esquire our late Minister at the Court of Saint James.”
The board orders that it be referred to the com. of health, and that
the mayor be requested “to express the thanks of the board to
Mr. King for his communication.”—M. C. C. (1784-1831), III:
426.

“The lovers of Natural History will find a rich repast by
visiting Mr’ Savage’s Museum in Greenwich-street, where a large
collection of quadrupeds, birds . . . and the natural production
of Cayenne on the coast of Guiana, is just opened for exhibition.
” . . . —DAILY ADV., D 31, 1803. See My 26, 1810.

A report of the patients “admitted into and discharged from
the New-York Hospital” from Jan. 31, 1795, to date—nine years
lacking one month—shows a total of 4,760. The “Discharged” are
tabulated thus: “Cured . . . 3212, Relieved . . . 455, Sent
to Almshouse . . . 71, Disorderly . . . 123, Eloped . . . 275, Died . . . 608.” For the largest number (1,154) were affected
with syphilis, 616 with ulcers, 464 with fevers.—Account N. T.
Hosp. (1804), 62-64.

1804

— From this year until 1806, the Lewis and Clarke expedition
explored the United States from the Mississippi to the mouth of
the Columbia.—Winnor, VII: 556-58, and authorities there cited.

— In this year, John Trumbull returned to New York from a
trip abroad, and established himself in “a large house, corner of
Pine Street and Broadway.” At this time he stood at the head
of his profession in the United States. He painted many prominent
citizens of the period and most of the contemporary governors
and mayors of New York.—Dunlap, Hist. of Arts of Design (Gospeed
ed.), II: 50. In 1806 (p. v.), he left the city again for Europe.

— About this time, the first Congregational church in New York
was formed. The services were established by Rev. John Towsley
in an old frame building then standing on Warren street, just
out of Broadway.” About 1809, this congregation moved to a
building which they had erected on Elizabeth St. between Walker
and Hester Sts. Within four or five years, the church was sold to
the Asbury coloured Methodists, and the congregation disbanded.—
Greenleaf, Hist. of the Church, p. 26-27.

— About this time, Archbishop Gore erected his house at the
corner of Bridge and State Sts., on ground which in 1644 belonged
to TrynticJonas, the midwife.—Liber Deeds, CXX: 202; Liber
GG: 90 (Albany); L. M. R. K., III: 949. For history of this site see Key to Castello Plan, II: 269-70, and descrip.
of Pl. 56, I: 426-27.

— In this year, Rev. George Strebeek, minister of the English
Lutheran Church of Zion (see Je 25, 1797), applied for admission
into the Episcopal church, and, a year later, with some of the mem-
ers of his congregation, organized St. Stephen’s Episcopal Church.

—Krettzmann, The Oldest Lutheran Church in Am., 31. Its church
was built in 1805 at the cor. of Brome and Christie Sts.—DAILY
ADV., My 9, 1805; Greenleaf, 73.

The chronological record of progress in building the city hall,
for 1804 and for each year thereafter, is summarized at the begin-
ing of each year in succession.

The record for 1804 shows steady progress in construction. On
March 28, McComb reported that he thought it best to give up
the quarry at Newark, and on May 2 the committee gave him an
order to dispose of it, which he proceeded to execute. On May 14,
by direction of the committee, he went again to Steckbridge, to
look into the matter. He reported that there was no stone at the
quarry; that he was informed there were 25 miles of Hudson’s stone
at the Steckbridge quarry; that he made a trip to Lookout and
found there was a new quarry discovered on the Columbia
turnpike about 25 miles from HUDSON, a good, white, durable
stone, and they were now working a new State Quarry at Noble
Town 14 miles from HUDSON on the Columbia Turnpike.” There
was no effort to buy, however, his object in noting it being evi-
dently in view of possible future need. He found that Johnson &
Stevens had 3 teams of their own and had engaged 17 others to
cart the marble to the landing (evidently at HUDSON), and they
began with them the day after he arrived.

On June 9, the first consignment of marble for the city hall
reached New York, about 40 or 50 tons, and was delivered on the
11th at the city hall. On July 12, McComb wrote Johnson & Stev-
ens: “Several stone have come which does [sic] not suit us as to
color, being much to [and] dark for the sample.”

In September, he went to Steckbridge to oversee the work
there, and recorded in his diary, “The Bridges on the Road & turn-
pike are very bad, & the Directors of the Turnpike threaten
to prosecute them [Johnson & Stevens] if they damage their bridges—
to encourage them I gave Ten doll toward strengthening them.”
On his return he made note of a possible supply of marble “near
Alexandria Burying ground,” and at “Sheffield 26 miles from Hud-
son,” but, again, no plan developed to buy marble there.

On Sept. 24, the common council received and referred to
the building committee a communication from a Mr. La Carriere res-
pecting defects in the building of the new City Hall.”—M. C. C.
(1784-1831), III: 607. On Oct. 2, this appeared in the N. T.
Exe. Post. It was the second pointed criticism of McComb and his
methods, a communication a column long, addressed “To the Cit-
izens of New York,” and headed “Extract of sundry observations
respecting the building of the new City Hall, made by a French
architect, the 23d of September, 1804.” Signed “La Carriere, In-
gineer and Architect,” it was an essay on correct building meth-
ods, beginning: “In the execution of large Public Buildings, the
most important and most difficult task is their solid execution refer-
ing to the city hall. "That edifice is constructing contrary
to all the rules of architecture and masonry; and to whomsoever
the blame may be imputed, the fact is, that the building is entirely
deficient in the quality as well as in the choice and working of the
materials in their use and application.” This general criticism was
elaborated in detail: the composition of the mortar and the binding
together of the walls, he said would threaten disaster. “The veneer-
ing in front of these pieces of marble, may be considered as inalad
pieces of cabinet work, which one day or other must detach them-
seles from the incoherent pebbles and mortar behind,” etc. “The
back pieces of the walls are not better bound than those of marble
above mentioned, though upon their being a good deal cheaper it
was not to be expected that their dimensions would partake of the
same ill-judged parsimony. . . . It is highly absurd to use timber in
the ground floor of such a large edifice, instead of brick vaults, for
reasons too long to be here enumerated,” etc. And “It appears to
me upon the whole that the direction of the works does not exhibit
that competent knowledge of stereotomy, so indispensable to carry
on the constructing of such an edifice, but merely the common
rounds followed in erecting less important buildings, etc.;” the Corpora-
tion ought to have the works inspected by impartial and thoroughbred
artists, to stop the present evil, if the same be found to exist, and then
give proper directions for the future, and thereby save immense sums of money, as well as the
disgrace to the city, which cannot fail to attend a continuance of
so many defects.”—N. T. EXE. POST, O 2, 1804. There is a copy of these "observations" among the Van Zandt Papers in N. Y. P. L.
The building committee made the following reference to the communication in its report to the common council on Nov. 29 (M. C. C. 1841, III: 641-42), which was published in the Dec. 3, 1841, issue of the Herald of Dec. 3, and the Herald of Dec. 8): "Before closing this report, the committee beg leave to state, that they have perused a communication in relation to the new hall, made to the board by a Mr. Lt. Carriere and which has lately made its appearance in the public papers. The committee hope that this person has been actuated by upright motives and not been actuated by any personal or other consideration, but unfortunately for Mr. Lt. Carriere the committee have been able to obtain correct information on all the important objections he has thought proper to advance and they fully assure the board they are founded in error and are totally groundless." In the "defence against the report," published in the Am. Citizen of Dec. 14, Mr. "A. Lacarrere" addressed the objections of the committee, aiming to justify his motives. He asked, "How has it happened that you have not thought proper also to insinuate that Mr. Nicholas Chester was 'actuated by sinister views' when he appeared in the papers in a communication on the same subject and not only excluded all my objections, but added others of his own? Mr. Chester treated those concerned in superintending the building far more cavalierly than this has been permitted entirely to escape mention, while I am held up to the public as a man whose motives are suspicious... the defects I have pointed out have been found to exist by many impartial [sic] persons both previous and after my publication... my governing motives in making the communication I did, was my love for the arts and a reluctance to behold the injurious consequences of getting them to the hands of the unskillful," etc.

No further official notice was taken of these criticisms, the committee evidently resting satisfied with its report of Nov. 29 (already mentioned), which the common council had ordered to be published, and in which they had made the statement that "The persons acting under their appointment, have performed the various duties assigned them with full satisfaction to the committee and with fidelity to the public." This report, in the main, had reference to the condition of the work, including the financial status, throughout the season just closed. Heavy snowfalls and bad roads had prevented for a time the working of the quarry and the transportation of marble; there was difficulty in procuring a sufficient number of stone-cutters, and "in anticipation of the coming winter a large quantity of marble is on hand sufficient to employ 25 to 30 stone-cutters until Spring, which will enable the masons to carry up the building to the head of the first windows," etc.—M. C. C. (1841-1842), III: 614.

The masons had been discharged and the walls covered for the winter on Nov. 17—McComb's Diary.

On Nov. 19 (p. v.), the first appeal came to the common council from the outside body for use of a room in the new city hall on the completion of the building. This was made by the Am. Academy of Arts. The request was granted.

On Dec. 3, the board ordered that the city inspector he directed to procure "a Carpet and two large grates for the Court room in the City hall and also a Carpet for the Common Council chamber."—M. C. C. (1841-1842), III: 620.

During 1842, the common council ordered the following advances made to the building committee: Feb. 6, $2,000; Mar. 19, $1,000; Apr. 30, $2,000; May 28, $2,000; June 25, $2,000; July 10, $1,500; July 23, $2,500; Aug. 20, $1,000; Oct. 8, $2,500; Nov. 5, $2,500; Nov. 29, $685.95 and $4,000; total, $27,768.95.—Ibid., III: 460, 478, 507, 517, 534, 548, 574, 593, 616, 626, 615, 619.

By the end of 1842, the city hall was nearing completion and the city council was considering the future growth and extension. To the end that the Common Council may adopt the same for their future government and for the direction of individuals in laying out and disposing of the property.

Also, "that the Council of the Board be requested to give his advice and instructions to the Street Commissioner in relation to the foregoing matters, and how far Legislative aid, or interference may be necessary in the accomplishment thereof and in drafting the necessary petitions and acts to be presented to the Legislature relative thereto."

Additional resolutions require the street comm't to report what streets have been opened without consent and ought to be shut up, what buildings on such streets ought to be removed, and what streets may be improved by straightening, widening, or extending. These improvements may be made as provided by the first section of the act of the legislature for regulating the buildings, streets, wharves, and slips in the city of New York, passed April 3, 1841.—M. C. C. (1842-1843), III: 434-36. This resulted in the Commissioners' Plan of 1811 (p. v.), which marked the beginning of the modern city. See Mr 19. See also infra.

The common council directs the street comm't to apply to Jos. F. Mugn in for "the field book which by his contract he was to furnish to the Common Council with a map of the City made by him" (see N 13 and D 11, 1797) also that Mugn be required "to insert as far as is practicable on the large map made for and furnished to the Common Council the descriptions and specifications which he contracted to do by his agreement" of Dec. 11, 1797 (p. v.).—M. C. C. (1842-1843), III: 436.

The common council adopted a resolution "to determine upon the propriety of ordering a new map to be made of the ground bordering on the East & North rivers, of laying out Streets, and regulating the permanent line of the same."—M. C. C. (1842-1843), III: 437.

An anonymous writer, signing himself "Non quis sed quid," urges De Witt Clinton to promote the following improvements: "A Society, consisting of Shopkeepers, Mechanics, Tavern and Boarding house keepers, for the prevention—or rather the detection & prosecution of Swindlers and cheats..." "Stands of Hackney Coaches, numbered and regulated as they are in London, Dublin & the principal towns in Britain—Boston, greatly inferior in population and extent, to this City, has long proved their great convenience.

"Direction Boards at the Corner of every Street, of their names, for the assistance of Strangers &c.—Letters to De Witt Clinton (M., S.), II: 57, in Columbia Univ. Library.

In accordance with notice previously given, a general meeting of Republicans is held at the Union Hotel to "take into consideration measures to promote their political and social interests," and a pretty numerous collection of both Clintonians and Burritons is present. The Clintonians submit the following resolutions:

1st. That every person qualified to vote for the most popular branch of the legislature should be entitled to vote for charter officers.

2d. That the election should be by ballot.

3d. That the election for charter officers should be held at the same time and place with the election of members of the legislature.

4th. That no elector should vote out of the ward in which he resided.

5th. That there should be two inspectors of the election appointed, who should be sworn, whose return should be final and conclusive.

6th. That after receiving the return of the inspectors, the common council should not, under any pretext whatever, interfere to set aside the election." The first five resolutions were approved, but the last was "struck out." After this, the Burritons proposed that the three following resolutions he added:

1. That the office of mayor of the city of New York should be elective annually, in the same manner as that of alderman, and that he should have a fixed salary in lieu of all perquisites.
2. That the offices of clerk of the common council and clerk of the city and county of New York, should be separate and distinct offices, and that the common council should have the power of appointing their own clerk.
3. That the licensing of cunnah, grocers, &c, should be appointed by the common council, and not by the mayor alack."

In 1814, a powerful group of Jacksonian Democrats, known as the "Young Republic," under the leadership of Andrew Jackson, rose to prominence. They opposed the policies of President James Madison, who was a Federalist and a supporter of the patronage system. The Young Republic called for a more limited government and advocated for the rights of the common people. They also opposed the War of 1812, which they saw as a unnecessary conflict. The Young Republic played a significant role in shaping the political landscape of the United States in the early 19th century. However, their influence waned in the mid-1820s as the Whig Party emerged as a formidable political force.
THE ICONOGRAPHY OF MANHATTAN ISLAND

After an animated debate these were referred to a committee of 63.

Jan. 1804.

—N. Y. Econ. Post, Jan 11 and 12, 1804. See also Mun. Chron., Jan. 1804.

Ja 1804.

12.

With the issue of this date, the title of the Commercial Advertiser is changed to New York Commercial Advertiser.—Brigham, A. S. S. Proc. (1917), 392. See O 2, 1809.

The common council passes a resolution offering extended terms to purchasers of lots in the Common Lands. A committee report shows: "That in the year 1796 the Corporation ordered a sale of part of their Common Lands, the condition of sale was, that each purchaser should be entitled to the Lease of the adjoining Lot for 21 years at the price of $4 per annum on the post road. These Leases have none of them been executed, and many of the Lots remain unencumbered owing principally to the shortness of the unexpired term. As it is desirable that all remain under the care and protection of the City should be under improvement, and in a state of cultivation both for use, ornament, and health, and, for the encouragement of the purchasers to improve the leased Lots, your Committee are of opinion it would be proper to extend the Leases." In conformity to this opinion, they offered the resolution which the board passed.—M. C. C. (1784-1811), III: 447.

1803.

The common council directed the city chamberlain to keep city funds in the Bank of New York and no where. Now the proposal is made that, as the city owns one twentieth of the stock of the Manhattan Co., the transfer of the city's deposits to the Bank of the Manhattan Co. "will much enhance the dividends of the said Company, and consequently increase the revenues" of the City. A resolution to this effect was voted down.—M. C. C. (1784-1813), III: 447-48. See, however, D 2.

The common council authorizes the city chamberlain to receive "the dividends already declared and now payable" on the stock in that company owned by the city.—Ibid., III: 449.

A resolution was likewise voted down that a committee be appointed to enquire and report "on the expediency of selling the stock owned by the city in the Manhattan Co., and that such appointment "be kept secret."—Ibid., III: 449.

The trustees of the First Presbyterian Church resolve "That no grave in future be opened in the Cemetery [sic] of the Brick Church till the farther order of this Board."—Proc. of the Trustees (M.S.), Vol. II.

1803.

An act for regulating the upper part of Broadway is presented to the common council, and recommitted to the assessors for their review.—M. C. C. (1784-1813), III: 451.

The common council approves and orders transmitted to the legislature the draft of a petition (prepared in response to the order of Dec. 1, 1803, q.v.) "to reconvey to this board a piece of ground being part of the Commons and situate near the junction of the Post and Bloomfield roads which had been granted to the State for the purpose of erecting buildings thereon for the reception of arms and military stores and has never been applied to that use."—M. C. C. (1784-1831), III: 451.

The common council orders that the comptroller be directed to apply to the legislature "for the payment of the sum of $5000 expended by this board for the Marine Hospital."—M. C. C. (1784-1831), III: 451.

The recorder informs the common council that, at a meeting of the president and directors of the Manhattan Co., he moved a resolution that the president be directed to pay the $6,000 reported to be proper compensation for injuries done to the streets by laying conduit pipes, but that the resolution was rejected.—M. C. C. (1784-1831), III: 452.

The common council orders that the clerk make an affidavit "of the Service of Papers upon the Manhattan Company respecting the application to the Supreme Court to compensate the injury sustained by laying the conduit pipes of that Company through the public streets."—M. C. C. (1784-1831), III: 454.

The street corn't reports, in response to the order of Dec. 9, 1803 (q.v.), that the highways through the Harlem Commons "may be considerably shortened and improved," and he recommends the following regulation for that purpose, which is adopted by the common council: "Beginning on the road that leads to Hellgate Ferry at the distance of 7 chains and 25 links west from the East boundary line of Harlem Commons, at which point the present great post road to the City should be made to intersect; that from this point the post road should be extended northwardly parallel with the said bounds until it intersects the post road near the Seven mile stone.

"That the Bloomingdale road should begin at the place where the new road will intersect the old one, and from thence be extended westwardly until it intersects the present Bloomingdale road at a place about three chains east from the boundary line between the New York and Harlem Commons."

The further recommends that the post road should be of the width of 100 feet and that the Bloomingdale road should be of the width of 66 feet."—M. C. C. (1784-1831), III: 455.

The common council orders that the committee, appointed on Dec. 19, 1803, respecting the public property near the Battery, prepare and report the draft of a petition to the legislature "to lease the whole of the said property including the Government House in perpetuity."—M. C. C. (1784-1831), III: 455-56. On Feb. 6, the draft was approved and ordered to be transmitted, bearing the seal of the city, to the legislature.—Ibid., III: 459.

On Mar. 19, the board resolved that the mayor be requested "to write to the Members of the Legislature from this City respecting the memorial sent to the Legislature . . . urging them to have a Law passed to authorize the Corporation to grant to this board a Lease for the same in perpetuity."—Ibid., III: 478. See, further, D 17.

In spite of the "inaccuracies" found in the Goerck-Mangin map (see N 28, 1803), Mangin is retained in the city's employ. On this day he is paid $51.04 for surveying.—M. C. C. (1784-1813), III: 457. On June 25, 1804, $100.50.—Ibid., 534. On Oct. 25, $18.—Ibid., 697. See, further, N 24, 1803.

John Jacob Astor advertises: "To be let, For 1 or more years, that beautiful and highly improved piece of land, with the house and other improvements thereon, situated in the Bowery-lane, at present occupied by Mr. Jacob Sperry. The land contains about 3 acres, on which is a great variety of fruit of the best quality, a hot-house, etc. and is in every respect well calculated for a gardener, or a summer residence."—N. Y. Gaz. & Gen. Adv., Ja 50, 1804. This advertisement, which ran through the issue of March 15, shows that an error was made in L. M. R. K., III: 981, which states that Delacroix opened his third Vauhall in 1803. Cf. JI 4, 1803. According to Valentine, Astor acquired this property of Jacob Sperry in 1803 for $9,000 ($45,000).—Man. Com. Coun. (1856), 470; Ibid. (1886), 536. Sperry had owned the house as early as 1796 and conducted in it the business of the sale of "Garden-Seed, Flower-Seeds and garden peas, flower plants, green house plants, and bolbos roots . . ."—Royal Gaz., Mr 2, 1782, N. Y. Gaz. & Gen. Adv., Ja 20, 1800. For further information regarding Sperry, see the Manuals, above cited.

This garden was situated "near the 2-mile stony", or, in the modern map, south of Astor Place, between Fourth Ave. and Broadway. Astor gave his 2-year lease to Joseph Delacroix, and "Mr. Delacroix moved the green house broad side on the Bowery, and converted it into a saloon . . ."—Man. Com. Coun. (1856), 470. On the grounds, on Fe 25, 1805 (q.v.), he opened his third Vauhall. For many years thereafter, it was a famous summer garden. Lafayette Place, in 1825, was cut through it; and, on its site, in 1854, the Astor Library was erected. See L. M. R. K., III: 981, 996. See, further, Ap 26, 1805.

The Republicans hold another meeting (see Ja 10) to discuss the need of revising the city charter. The committee appointed on Jan. 10 (q.v.) reports that it has transmitted a petition to the legislature, omitting the suggested resolutions regarding the mayor. This causes considerable debate, in which "those who opposed these resolutions were heard by their adversaries with silence and attention; but when any person rose to advocate the principles contained in these resolutions, there was a constant noise and tumultuous opposition made by their opponents." Finally, a resolution that the office of mayor be elective was offered, but the Clintonians, by means of trickery it is said, declared it lost—Mun. Chron., Ja 31 and F 2, 1804. Another paper describes this
THE very conclusion, in behalf of the citizens of the city of New-York, praying for the extension of the elective franchise, in relation to the choice of charter officers, and for other improvements in the charter of the said city (see Feb. 10 and 31) is fully sustained and covered with the seal and the fury of a Parisian mob.—*N. Y. Com. Adv.,* F. 1, 1804.

Feb. 6

"The memorial of the general committee, in behalf of the citizens of the city of New-York, praying for the extension of the elective franchise, in relation to the choice of charter officers, and for other improvements in the charter of the said city" (see J a 10 and 31) is fully sustained and covered with the seal and the fury of a Parisian mob.—*N. Y. Com. Adv.,* F. 1, 1804.

Feb. 7

On Feb. 8, the committee reported that "the grievances therein complained of call for legislative redress," and a bill was introduced "relative to the election of charter officers in the city of New-York."—Ibid., 27th sess., 47. The common council presented a remonstrance against the proposed amendments on Feb. 23 (27th sess., 64), but in spite of this the bill was passed by the legislature (see Ap 5).

"By a vote of ten to seven, the common council resolves that the remonstrance against alterations in the city charter adopted on Jan. 27, 1803 (q. v.), be renewed and transmitted to the legislature.—*M. C. C. (1784-1813),* III: 459.

The common council adopts a petition to the legislature asking for a lease in perpetuity of the government house and the adjoining grounds (see D 19 and 23, 1803)—*M. C. C. (1784-1813),* III: 459. This petition reviews the history of the government house—the law authorizing its erection (see Mr 16, 1790), its use by state governors until the removal of the capital to Albany, and its later occupancy as a tavern (see My 5, 1798) and a custom-house (see My 1, 1799). The board also states "that certain individuals, disposition of whose property has caused a large building to be erected on the grounds adjoining which they now occupy, actually claim the same to their private use for a term of years under the authority of the commissary of military stores. . . . that your petitioners cannot conceive upon what principle the commissary of military stores has undertaken this agency, unless it be because he has chosen to appropriate the term arsenal or military store, to a small frame building, on the edge of the premises, in which a few pieces of ordnance are kept as convenient to the battery, the usual place of parade. . . . "That considering the latter disposition of the said grounds as a violation of the said first mentioned act, as injurious to the health of the city, by impeding a free current of air through a part of the town in which the streets are narrow and liable to an epidemic influence, and as interfering much with these improvements which the common council had adopted to ornament that part of the city which is appointed as a public walk for the recreation of its inhabitants—your petitioners pray the aid of your honorable body in the premises, and that the attorney general may be directed to take measures for the removal of the said incumbrances. . . . your petitioners hereby beg leave to present that the house, while occupied as a custom-house must rapidly go to ruin and waste and thus diminish the public revenue. And as your petitioners are solicitous that those grounds should be ornamented and opened, so as to form an additional public walk, and that the Mayor, as its first Magistrate, should have a public residence suited to the dignity of his office [ie,]—Your petitioners pray that the Comptroller or such officer as your honorable body may appoint for that purpose, be directed to lease the house and ground to your petitioners in perpetuity, subject to an annual rent equal in value to the sum now paid for the house and stable, and subject to such restrictions as are contained in the first above-mentioned act."—*Chronicle Express,* F 23, 1804 (in the archives of the Am. Institute of Archaeology).

Trinity vestry directs its committee of leases to dispose of "the Lots on Hudson square North and South of St Johns Church [see S 8, 1803] at public auction on Lease for 99 years on the same terms as the last lots were sold in the said square; also that they sell in fee simple four Lots in Beech [ie] and Hubert Street under restrictions that any building to be erected thereon must be of brick or stone, and not covered with tin or slate and cannot be made use of for carrying on the business of a Tallow Chandler, Starchmaker, or Blacksmith."—*Trin. Min. (MS.).* See Ag 27.

"Resolved that Mr Watts, Mr LeRoy and Mr Bayard be a Committee to purchase a proper situation for building a new Church."—Ibid. See, further, F 18. The church here projected became St John's.

The Park Theatre is sold at public auction, agreeably to an order of the Court of Chancery. "The original cost of this building was 150,000 dollars, and amounted with interest to the first of May 1803, to 173,792 dollars, 90 cts. When the plan of erecting the theatre was originated, a subscription was opened to carry it into effect, 100 shares of 375 dollars each, were accordingly subscribed, which were subsequently extended to 120 shares.—But in the progress of the building the whole amount was consumed, and further sums loaned to the committee of stock holders by gentlemen who were desirous to see it completed. . . . "The Theatre was purchased yesterday [Feb. 10] by a company of thirty one gentlemen, for 43,000 dollars. 

The amount of sale, we understand, goes in the first instance, to discharge a mortgage given for the ground on which it is erected, which with interest to the 1st of May 1803 amounted to 13,165 dollars. The surplus money, after satisfying the mortgage, is to be deposited in the Bank of the State of New-York, subject to the Chamber's decision. It is conjectured, that it will be appropriated to discharge the voluntary loans above mentioned—though many of the original stockholders questioned that priority of claim. The purchase will doubtless be a very advantageous speculation for the gentlemen concerned as the Theatre in its present unfinished state brings in an average rent of 3500 dollars. We trust that the comparatively trifling sum necessary to finish the building in a style of suitable elegance and accommodation will now be supplied and that the present manager [William Dunlap] who in defiance of many difficulties, has conducted the affairs of the theatre so respectably, will be placed in a situation that will enable him to meet the wishes of the public, and to derive from his efforts, satisfaction and emolument."—*Trin. Min.* Feb. 27.

Browne, the chief engineer, makes a report to the common council which shows, in part, that there are 1,767 public buckets deposited in the different cupboards and "that the Floating Engine [see N 14, 1803] is now ready for use," that it is "necessary for a Company to be appointed to take charge of her," and "a proper house Should be built to keep her in as she now lies exposed to all kinds of weather," the "most proper place" being "at the foot of Roosevelt Street, it being vacant property belonging to the Corporation."—*M. C. C. (1784-1813),* II: 466. On Feb. 20, the board directed that Mr. Carpenter "cause a suitable House to be erected on piles for the safe keeping of the floating Engine" at such place as the committee of repairs and the chief engineer shall deem most proper, and that the chief engineer report to the board such suitable men and the number necessary "to form a Company of Firemen to manage the said Engine."—Ibid., III: 467. See also Ibid., III: 549. 705, 795; and, regarding the utility of floating engines, see D 24.

The common council adopts an alteration in sec. 20 of the ordinance respecting nuisances, on the subject of burying the dead.—*M. C. C. (1784-1813),* III: 462-63.

The common council passes an ordinance to prevent goats "running at large."—*M. C. C. (1784-1813),* III: 464. Cf. 1635; Mr 10, 1845; N 5, 1853; and see Index under "Hogs and Goats."

The prohibition heretofore has been principally against hogs. The provision appropriate to two, and, regarding the utility of floating engines, see D 24.

The common council adopts an alteration in sec. 20 of the ordinance respecting nuisances, on the subject of burying the dead.—*M. C. C. (1784-1813),* III: 462-63.

The common council passes an ordinance to prevent goats "running at large."—*M. C. C. (1784-1813),* III: 464. Cf. 1635; Mr 10, 1845; N 5, 1853; and see Index under "Hogs and Goats."

The prohibition heretofore has been principally against hogs. The provision appropriate to two, and, regarding the utility of floating engines, see D 24.
The common council refers to the street com'ry a petition of Geo. Schmelzel and others "that the course of Bestavens Killie may be directed to run through Village Street."—M. C. C. (1784-1831), III: 472.

The Grove Theatre in Bedlow (Madison) St. is opened.—Daily Adv., Mr 9, 1804. Notices of other entertainments at this theatre, see ibid., Ap 4, 7, 12, My 17, 1804; Com. Adv., Ap 19, 1804. The theatre closed about July 1, 1805.—Brown, Hist. of N. Y. Stage, I: 70.

"A Clintonian" writes: "I am a great friend to the old Clinton Family, and I do now believe that you are all going wrong. If the Charter of the City and the Merchants Bank are destroyed I do believe the town will occasion me more elections; for the election of Gov't ought not to have declined. Little Aaron will undoubtedly get in without much good management, and the destruction of the Bank is a very impolitic measure."—Letters to De Witt Clinton (MS.), II: 64.

"Ordered that the Committee of Leases ascertain the probable expense of putting a brick wall round St Paul's Church yard and a brick wall on the south side of Trinity Church yard and of flagging [sic] the walk along the whole front of said Church yard."—Trin. Min. (MS.); descrip. of A. Pl. 12-3, III: 871-72. See My 10.

The common council refers to a committee a petition of Caleb Boyle (see Jl 11, 1803) "to be employed to paint a portrait of Gov'ner Jay."—M. C. C. (1784-1831), III: 476. On March 26, the board confirmed the committee's report that "it would be improper for the purpose of the printing of Mr Jay to be executed by Mr Boyle provided it shall prove a good likeness and the Common Council shall be satisfied with the painting."—Ibid., III: 480. (See also Jl 10.) On Nov. 19, however, the board decided "that the portrait of the late Governor Jay made by Mr Boyle is not such as meets the ideas of the Board, and therefore that they will not purchase it." The board ordered "that the Clerk furnish Mr Boyle with a copy of this resolution and present him the sum of $50 for his trouble."—Ibid., III: 632. In an undated letter addressed to the common council, Boyle said that he "as he presumes Complectly Succeeded in preserving the likeness and finishing the head equal to the Original by Stewart." The "background Scenery being altogether fanciful can readily be altered Should faults Susceptible of amendment be pointed out." He asks for "Moderate Compensation," and adds, "that the bad light in which the painting is at present placed, the want of a frame while Standing So nigh those very Elegantly framed Cause it to appear Comparatively to a very great disadvantage."—From the original letter in metal file No. 22, city clerk's record-room.

The common council refers to a committee a communication from the foremen respecting a Botanic Garden.—M. C. C. (1784-1831), III: 476. The committee reported on June 25 (q. v.).

The common council receives and refers to "the Aldermen of the several wards" a communication from the street commissioner together with a plan of the city.—M. C. C. (1784-1831), III: 477. This report was probably one of the steps which led finally to the laying out a street plan for the whole of Manhattan Island. See, further, Ja 14, 1809.

The common council requests Mayor Clinton "to write to the Members of the Legislature from this City respecting the memorial sent to the Legislature from this Board relative to the Government house and grounds therunto belonging [see F 6] urging them to have a Law passed to authorize the Comptroller to grant to this board a Lease for the same in perpetuity."—M. C. C. (1784-1831), III: 478. Clinton wrote on March 29, saying in part: "The advantages to the State which will result from the measure are obvious. The House will never be used in future for a Government House. It is now going so rapidly to decay and ruin that all the rent received for some years back will be insufficient to put it in a state of repair. A Custom House will probably be built in a few years by the United States when the present building unless repaired at an enormous expense will be totally unproductive. If it is let to the Corporation the State will receive a certain income the House will be kept in good repair the beauty and health of the City will increase by a proper improvement of the adjoining Grounds and our Citizens will generally feel gratified by a measure so conducive to the ornament and safety of the City."—De Witt Clinton Letter Books (MS.), I: 244-45. See Mr 31.

Stephen Gould & Co establish a semi-weekly called The Connector. This was edited by "Toby Tickler, Esq," was of quarto size, and was published primarily in the interest of the Burr faction. The last issue located is that of April 26, 1804.—Brigham, A. A. S. Proc. (1917), 395.

John Woodworth, attorney-general, makes a report to the assembly on the common council's petition in regard to the government house (see F 6). The report "advises that "some disposition different from the present is expedient," and suggests that the state may sell the premises to the city at a fair price or lease them, "not in perpetuity, but for a term of years at a reasonable rent," on condition that the city officials "make all necessary repairs at their own expense, during the continuance of the term." The report is referred to a committee.—Assemb. Jour., 27th sess., 269-71. For the letter see F 6.

At about this time, A. P. A. Maulourn established a tri-weekly entitled Moniteur Français. It was a general newspaper of quarto size printed entirely in French except for a few English advertisements. Only one issue, that of Nov. 29, 1804, has been located.—Brigham, A. A. S. Proc. (1917), 462.

A "Plan of the Corporation Grounds from the Park to Chamber Street," surveyed and signed by "Joseph P. Mangin," bears this date. It shows the ground plan and position of the buildings in the Park, and the surrounding streets. The plan is inscribed [Ac]c[ession] No. 111, in the files of the bureau of engineering, division of design (the former "Bureau of Design and Survey"), in Municipal Bldg.

The common council orders that the committee on repairs cause curb-stones to be substituted for "the timber which has been laid round the park for the purpose of supporting the side walk," which "has become rotten and unable to sustain the earth which in consequence thereof is becoming gullied."—M. C. C. (1784-1831), III: 486. On April 9, the board advanced $300 to this committee "for repairs at the Park."—Ibid., III: 494.

The common council appoints the street com'ry and comptroller a committee to "inquire and report to this board the most proper mode of filling in the Collect."—M. C. C. (1784-1831), III: 499. See Ap 4, My 12, Jl 11, D 12, 1805. See, further, D 31, 1804; Mr 25, 1805.

By act of the legislature, the right to vote in New York City is extended to male citizens of 21 "who shall have resided in the said city for the space of six months [it was formerly three months] preceding said election, and shall during that time have rented a tenement of the yearly value of twenty-five dollars [formerly $50], and have paid any taxes."

Also, more stringent regulations of elections are made. Election inspectors are required, under oath or affirmation, to act "honestly, faithfully and impartially." Before the opening of the polls the following proclamation has been made three times: "Hear ye! hear ye! the poll of this election is opened, and all manner of persons attending the same are strictly charged and commanded, by the authority and in the name of the people of this state, to keep the peace thereof during their attendance at this election, upon pain of imprisonment." Such imprisonment is in no case to continue beyond six hours after the canvass of such election shall be finished.

Polls are to be open "only between the rising and setting of the sun," and the opening hour must not be later than 10.

The ballot "shall be a paper ticket, containing the name of a person for alderman, and the name of a person for assistant" of the given ward; also "the name of such other officer or officers as shall be to be chosen in the ward . . . or such and so many of them respectively as he [the voter] shall think proper to vote for, severally written on the same paper ticket." The "said paper ticket shall be so folded or closed as to conceal the writing thereon," and the inspector receiving the same "shall cause the name of the elector to be entered in the poll list by the clerk and shall cause the ballot, without suffering the same to be inspected, to be put into a ballot box and be preserved for the purpose, with a sufficient lock thereof."

In case any one shall challenge a voter as "unqualified for the purpose," the latter may cast his vote only after notified by his qualifications under oath.

After "finally closing the poll" (the election may take place "for two days successively, including the first"), the inspectors first count the "ballots unopened," to make sure the number does not "exceed the number of electors contained in the poll list." In
A committee of the common council recommends that the project of a "Tunnel, through Lispenard's Meadow" be relinquished, and, instead, that "a Street at least One hundred feet wide be laid out through which a Canal of twenty five feet wide shall be immediately cut the sides of which to be built up with heavy timber." The report is confirmed.—M. C. C. (1784-1811), III: 496-97, 505, 509, 515, 512. See Je 4; D 31.

C. C. recommends the sale of the "street ferry," which the "privilege and monopoly" of the ferry company were accused of "giving them the right to charge exceedingly high tolls and to prevent goods being carried by the ferry", and that the "street ferry" be established as a "public ferry" at a "reasonable price."—M. C. (1784-1811), III: 393.

A committee of the common council recommends the project of a "Tunnel, through Lispenard's Meadow" be relinquished, and, instead, that "a Street at least One hundred feet wide be laid out through which a Canal of twenty five feet wide shall be immediately cut the sides of which to be built up with heavy timber." The report is confirmed.—M. C. C. (1784-1811), III: 496-97, 505, 509, 515, 512. See Je 4; D 31.

The common council directs the corporation to give his opinion on the question whether a fire engine in the city is lawful for a member of this council or of any of the Firemen for the purpose of suppressing or stopping the progress of a Fire to order any building to be pulled down. And how far in point of law such person would be justifiable in ordering the same.—M. C. C. (1784-1811), III: 499.

The common council of the corporation of the "street ferry" be directed to order one of the Fire Engines to be sent for the use of the Town of Harleman.—M. C. C. (1784-1811), III: 503, 622.

About this time, John Stevens constructed a steamboat which made several trips between Hoboken and New York, and had an ordinary speed of four miles an hour. —Hist. Mag., 1st ser., III: 51 Dunbar, Hist. of Travel in Am., 336. It was a small open boat propelled by a wheel at the stern.

"M. Jerome Bonaparte [see N 19, 1805] and his lady" arrive in New York "in their coach and six, followed by his surgeon and secretary in a currie and forty, attended by footmen, outriders, etc. in a very handsome style." Monsieur and Madame Bonaparte took up their residence in Greenwich St., with "M. Manuitlate, late Prefect of St. Domingo." Their suite engaged apartments at "Mrs. Kenzler." —N. Y. Gaz. & Gen. Adv., My 7, 1804, citing Morning Cenon. See Je 25.

Thomas Moore, the Irish poet, writes to his mother on this day, on his arrival at New York from Bermuda: "the novelty of this strange place keeps me in a bustle of spirits and curiosity. The oddest things I have seen yet, however, are young Buonaparte and his bride [see My 4] . . . I go to the theatre this evening, and to a concert to-morrow evening. Such a place such people! barren and secluded as poor Bermuda is, I think it a paradise to any spot in America that I have seen. If there is less barrenness of soil here, there is more than enough of barrenness in intellect, taste, and all in which heart is concerned."—Russell, Memoir, Journal & Correspondence of Thomas Moore, II: 158-59. See My 11.

The development of the shore front at Bloomingdale begins. —The common council refers to the comptroller a petition of Jacob Harsen for a water grant opposite his ground there.—M. C. C. (1784-1811), III: 507. On June 18, the board decided to make the grant, "for the purpose of erecting a Dock and making other improvements for a landing place," at the rate of six pence per foot for the first 50 years, and 25 cents per foot forever thereafter.—Ibid. III: 547; Mott, The C. T. of Manhattan, 1904. Harsen applied for additional grants on Aug. 20.—Ibid., III: 589.

The grant to Harsen was followed by similar grants at Bloomingdale to James Striker on July 2 (ibid., III: 538), and to Jacob Schleffen on Aug. 6 (ibid., III: 575, 585) on the same terms.

The committee representing the Manhattan Co. and the common council agree upon three unbiased persons to fix the damages done by the company to the streets.—M. C. C. (1784-1811), III: 597-8.

The common council receives an application from the Tammany Soc. asking the board's concurrence in taking measures to celebrate, on May 12 (a. s.), "the cession of the Province of Louisiana and its dependencies to the United States." The board appoints a committee to confer with society on the subject.—M. C. C. (1784-1811), III: 509, 516.

The street commissioner reports a suitable regulation to be made of Broadway "from the Stone Bridge to Prince Street, according to the profile thereof herewith submitted." (The profile is not now found with the report.) It is thus described: "beginning at the Stone Bridge at the elevation of ten feet above the level of low water, then ascending to Prince Street with an ascent of one inch and three fourths of an inch on ten feet." This regulation is predicated on a late resolution of the Common council adopting the report of a Committee of which Alderman Van Zandt was chairman, recommending a Canal of 25 feet in breadth to be extended from the North River to the Collet, the bottom of which it is presumed is intended to be on a level with low water, throughout its extent."—From the original report.
in metal file No. 23, city clerk's record-room. The report is adopted by the common council.—M. C. C. (1784-1813), III: 510, 571.

8. See also My 28. Two remonstrances, dated June 28, 1804, and July 16, 1804, respectively, against the proposed regulation of Broadway are preserved in metal file No. 23, city clerk's record-room. Another remonstrance, without date, is in file No. 25. It is signed by Alex. Ross, John Cassedy, and others. This one averts that the street will become impassible in rainy weather (by the proposed regulation) "from Mr. Livingston's to the northward, and from the Hospital to the southward."

9. The common council appoints a committee "to inquire into the rights of the Corporation to the soil as far as low-water mark on the Jersey Shore."—M. C. G. (1784-1831), III: 512. See My 21.

10. Early this morning the state prison was discovered to be on fire, and in the course of the active exertions of our citizens, the flames destroyed "the roof and the garret floor on the north wing, and the north part of the front, to within a few feet of the centre of the building." The damage is estimated at $15,000 or $20,000. The fire was caused by the prisoners.—N. T. Gaz. & Gen. Advo., My 9, 1804.

11. A citizen in a communication to one of the newspapers complains about the present situation of the lamp-posts. He says:

"From the manner in which the lamps are now suspended, the oil is continually dripping from them down on the posts, and these being situated on the edge of the side-walks, frequently obstruct the passengers and saline them with a dust composed of oil and dust, to the no small damage of costs and gowns. This inconvenient situation is easily avoided by fixing of the lamps—for instance, instead of the present one, a bar of iron might run from the top of the post horizontally, (either into the street or laterally with it) 10 or 12 inches long, at the end of which may be fixed the square to receive the lamp, this would effectually remedy the evil, and facilitate the lighting by placing the ladder on the bar. . . ."—N. T. Env. Post, My 10, 1804.

12. A resolution in the common council requires that "Mr. Dominic procure Materials this Season, for building the Wall round St. Paul's Church Yard."—Trin. Min. (M.S.), descrip. of A. Pl. 12-2, III: 87-72. See Jl 11, 1805.

13. It is also ordered "that the Committee of Leases have the Pond on the East Side of Mr. Haspen's Garden filled up."—Ibid.

14. And it is resolved in the common council that "the Committee for procuring a Lot for a Church, be authorized to treat with the Trustees of the Lutheran Congregation for their Lot in Broadway."—Ibid. See, further, Je 14.

15. Thomas Moore (see My 7) writes to his mother from "Ahoard the Boston, Sandy Hook," saying in part: "The environs of New York are pretty, from the number of little fanciful wooden houses scattered, to the distance of six or eight miles from the city, I see very little in the prospect; and, notwithstanding the rich fields, and the various blossoms in their orchards, I prefer the barren, breezy rock of Bermuda to whole countries of such dearly purchased fertility."—Russell, Memoirs, Journal & Correspondence of Thomas Moore, I: 159-60. Moore returned to New York in June (q.v., 26).

16. The acquisition of Louisiana is celebrated. There is a general suspension of business. At sunrise "a Grand National Salute" is fired from the cannon of the Battery and returned by the fort on Governor's Island. The American flag is hoisted at the Battery, City-Hall, Great Wigwam, Madison Hall, City Hotel, Union Hotel, Shipping in the Harbor and all public places." Bells are rung. A procession is formed in the Park,—consisting of horse, artillery, and infantry, with city officials headed by the mayor and sheriff, and accompanied by the marshals and constables with their staffs of office. Col. Van Zandt rides in the lead as a herald, mounted on a white horse richly caparisoned, bearing a sword in a silk scabbard, enriched with palm and orange blossoms, and on which is inscribed: "Extension of the Empire of Freedom in the Peaceable, Honorable, and Glorious Acquisition of the Immense and Terrible Region of Louisiana, December 20th, 1803, 38th Year of American Independence, and in the Presidency of Thomas Jefferson." A map, made of white cambric muslin, 15 feet in length by 9 in width, of the Mississippi, comprehending Louisiana and the Western states, is carried in the centre of the Tammany Society and by its members. The procession moved from the Park through Chatham, Pearl, Wall, Broad and Beaver Sts. to the Battery where a circle was formed; salutes were fired from the cannon in honour of the three nations, and returned by the fort; between the salutes the bands of music, united, played "Bonaparte's March," a Spanish piece, and "Hail Columbia;" and the uniform troops fired by pistol. Then and battering of the Battery, formed in a circle, a fan-de-loie was fired, and three cheers were given, accompanied by drums and fifes.—Aurora Gen. Advo., My 12, 1804.

The treaty, which was concluded April 30, 1803, transferring Louisiana to the United States for $15,000,000, was ratified by Napoleon in May, and by the United States in October, 1803.—Werner, VII: 165, 479, 540, 547, 556.

The congregation of the French Church of St. Esprit (see My 30, 1803), meets to form a corporation as a "Protestant Episcopal Church according to the rites and ceremonies of the protestant Episcopal Church in the United States."—Collections of the Huguenot Soc. of Am., I: 450-31.

The common council approves the street commissioner's plans for digging out and regulating Grand St.—M. C. C. (1784-1813), III: 514, 570. See Je 14, 1803.

The common council orders that billheads be built across Charlotte Slip and George's Slip, and that the ships be filled in with earth.—M. C. C. (1784-1813), III: 516, 519, 540.

The common council orders that Mangin, Loss, and Stillwel, city surveyors, "be directed to ascertain what is the precise difference of level of the streets of the North and East Rivers."—M. C. C. (1784-1813), III: 519.

The common council raises the salary of the town comm\- to $1,575 a year, it being necessary that he relinquish all other occupations which may interfere with this employment.—M. C. C. (1784-1813), III: 530.

The common council receives legal opinions, from Richard Harison and Robert Troup, dated May 17 and 19, respectively, regarding the jurisdictional rights, etc. of the city in the Jersey shore. These are presented in response to the following statement of facts submitted by the board for their consideration:

"The Proprietors of Powles Hook [the present Jersey City] having it in Contemplation as appears from their advertisement dated the 5th instant, to sell lots, and to build wharves, in order to promote the success of their establishment. It becomes interesting to the Corporation of the City of New York to ascertain how far their rights will be infringed by the sale of the land under the water, and by the erection of Wharves."

For this purpose, the board submitted to these lawyers four questions: (1) "Have the Corporation a right, or title to the land adjacent to the river, extending from the mouth of the river to the 60th parallel, and 6 miles from the line of drowned Powles Hook?" (2) Harison's answer to this is: No; it was not given to them by their charters or other means that he is acquainted with. Troup's answer, likewise, is No.

(3) "If the Corporation have not a right, or title to the land does the same belong to the State of New York?" To this both agreed in the affirmative. Troup's answer presents the following historical resume: "I observe that the grant of King Charles II to the Duke of York, bearing date the 12th March 1664 grants to the Duke, the whole of Hudson's river, and the subsequent release of the Duke to Lord Berkeley and Sir George Carteret bearing date the 24th June in the same year bounds the Colony of New Jersey. On the East partly by the Main Sea, and partly by colonies. The river called the Delaware or Fishkill to a rock on the Westside of Hudsons River marked by the Surveyors, in the latitude of forty one degrees. These different documents I have attentively considered, and I think a sound construction of them warrants an opinion that the right and title to the land under the water opposite to and adjoining Powles Hook are vested in the People of the State of New York."

"Have the Corporation a right of Jurisdiction over the land
Minutes
of the
New York Historical Society.

New York, Nov. 24, 1804.

The following persons were elected officers of the said Society.

President, Geo. Washington; Vice-President, Geo. W. Smith.

The Secretary, Richard Henry Lee; Treasurer, John H. Nason.

A committee of three was appointed to report a draft of a Constitution.

The meeting was resumed until Monday evening.

The 16th of December next.
covered with water opposite to and adjoining Powels Hook?"—Harrison and Troup agree that such jurisdiction is vested in the corporation, because, as Harrison says, "their charter extends the City to the west bounds of the Colony of New York." Harrison gives this added reason: "Because the County of New York according to the Act of the Legislature dividing the State into counties is bounded by the State of New Jersey to the westward or the west side of Hudson's River."

"(4). If the Corporation possess a right of Jurisdiction over the Land, can wharves be built unless by their permission, and under their directions?" Again they agree. Harrison answers thus: "I incline to the opinion that no Wharves can lawfully be built on the west side of Hudson's River opposite to Powels Hook unless by the permission, and under the directions of the Corporation, nor at any rate, without a grant from the State, for the land to be covered by them." Troup answers: "... by the express terms of the Charter the wharves of all wharves within the limits of the City is granted to the Corporation, and it appears to me a fair conclusion from the Charter that the Corporation is entitled to exercise its discretion as to the places where and the manner in which the wharves shall be built; I am consequently of opinion that every attempt to build a wharf beyond low water mark (and probably beyond high water mark) and covered with water, opposite to and adjoining Hudson's River unless by the permission and under the directions of the Corporation, will be an infringement of their Jurisdictional Rights."

"M. C. C. (1784-1831), III: 520-23. See, further, ibid., III: 533-54; but cf. 522. On Oct. 22, Troup was paid $40 for his opinion.—Ibid., III: 620. On Feb. 25, 1805 (q.v.), Troup's opinion was subjected to further inquiry.

Shakespeare's "Comedy of Errors" is performed for the first time in America, at the Park Theatre.—Ireland, Records of N. Y. Stage, I: 222.

The common council creates a road committee composed of the aldermen and assistants of the Seventh and Ninth Wards and the street com'r, whose duties shall be to have the management of the "working of the roads, and making new ones."—M. C. C. (1784-1831), III: 519-31.

The common council adopts plans to alter and open the lower end of Fair (Fulton) St. so as to carry it into Pearl St. opposite to the head of Beekman Slip.—M. C. C. (1784-1831), III: 531, 570.

It also opens negotiations to open Beekman St. and carry it through from Pearl St. to East River.—Ibid., III: 531. See, further, Je 25.

The common council appoints a committee to carry out an order "that the Broadway and Bowery roads be carried through agreeably to a map or plan thereof marked No. 2, and in the possession of the Street Commissioner."—M. C. C. (1784-1831), III: 531-32. See, further, Je 25 and Ag 6.

The common council requests the comptroller and street com'r "to enquire into the State of the public grounds near the arsenal."—M. C. C. (1784-1831), III: 532. On June 18, they reported regarding the occasion for erecting the arsenal at the city's expense in 1793, the legislature's repaying the city for this expense and appointing a state agent to take charge of the building, the erecting of an armory shop and a dwelling at the present time on the grounds, etc. The board decided that so much of the ground as was not necessary for an arsenal yard should be under the control of the city, and ordered the city attorney to begin ejectment suits against all persons who withheld it.—Ibid., III: 545-46. On June 25, the board ordered that the attorney, who in consequence had brought suit to eject John McLean, take the advice of the board's counsel.—Ibid., III: 550. The arsenal was the first state arsenal, at Park Row (on Tyron Row).—Ibid., III: 623. I. M. R. K., III: 923. It was transferred to the Free School Society in 1805.—Ibid., III: 940.

The common council orders that the street com'r & comptroller "be requested to procure a proper map or plan of the ground in the neighbourhood of the Collect belonging to this Board, And that the Comptroller be requested to consider and report with regard to the most advantageous Method of disposing thereof."—M. C. C. (1784-1831), III: 552. See also Ap 4, 1805.

Dupuis, the manager of the Park Theatre, undertakes to organize the stock company to purchase "Dido and the Proprietors, giving to the subscribers a mortgage on the theatre and its scenery, machinery, wardrobe, furniture, etc.—Republican Watch Tower, Je 2, 1804. This particular plan of relief appears not to have been successful. Regarding the ownership and management of the property, see Dunlap's Hist. of the Am. Theatre (1872), 332-33.

The French frigates "Didon" and "Cybèle" arrive at New York.—De Witt Clinton Letter Books (M.S.), I: 258 (in Columbia Univ. Library). See Je 11. The frigates came for the purpose of transporting Jerome Bonaparte (see My 4) back to France (see Je 25 and 26).

The common council refers to the road committee a petition "that the road Ast Street at the corner of Sandy Hill and the Broadway" be repaired.—M. C. C. (1784-1831), III: 513. On June 18, the committee reported a suitable regulation to drain the neighbourhood of this road into the East River, the road, which lies in a hollow, being sometimes impassable with water.—Ibid., III: 546. See Je 25 and Ag 6.

The common council resolves that a Bulk head be built across the Fly Market Slip in a line with the middle of South Street, that the interval be filled with bricks and wharf the earth, at the same time extending the sewer to the bulkhead.—M. C. C. (1784-1831), III: 516.

The common council orders that the road committee "take immediate measures to work the cross road [marginal note reads "Harsenville Road"] from Kings bridge road between Jones & Warner's the to the Bloomingdale road."—M. C. C. (1784-1831), III: 538. On July 10, the board accepted the lowest proposal offered for widening and improving the Road near Allderman Harsens in Bloomingdale to the middle road."—Ibid., III: 565.

The common council appoints a committee to "employ some suitable person to report on the plan of a Tunnel or canal most proper to drain the waters from the low lands, between the East and the North Rivers."—Ibid., III: 541.

Two British vessels of war, the "Leander" and the "Boston," come inside the Hook every evening and go out again every morning, presumably to watch for the "Cybèle" and "Didon" (see Je 4), the French frigates, which linger at the watering place (Staten Island), waiting, it is thought, an "opportunity to elude these vigilant eavesdroppers."—Bos. Gm., Je 14, 1804. See, also, Je 17.

The common council approves the drafting of an instrument of arbitration between this board and the Manhattan Company in pursuance of the resolution lately passed for that purpose.—M. C. C. (1784-1831), III: 541.

The common council orders that legal measures be taken to obtain the ground necessary to extend Beekman St. to the East River (see My 25)—M. C. C. (1784-1831), III: 514.

"The Committee for purchasing Ground for a new Church reported that they had conferred with the Trustees of the Lutheran Congregation who are disposed to sell the Reversion in Fee of their Lot in Broadway, the Vestry to be at the Expense of buying the Lease of the Hotel, seven Years of which are unexpired."—Fris. Min. (M.S.), See, further, Je 22.

As the French ships "Dido" and "Cybèle," which arrived here on June 4 (q.v.), intend to sail "with the first fair wind," Chilton requests the British consul general to detain the British ships now in the port for 24 hours after the departure of the French.—De Witt Clinton Letter Books (M.S.), I: 258.

B. Henry Lathrobe writes from Newcastle, Del., to a committee of the common council that his work for the Chesapeake & Delaware Canal Company will prevent his accepting their invitation to New York. He adds: "You will, I am sure, pardon a few suggestions which I will, on this occasion offer for your consideration. During my stay in New York on occasion of the proposed erection of your city Hall,—I had leisure generally to consider the natural advantages offered by the positions of high & low ground on both Your rivers. The Marsh, now the object of your deliberations struck me as giving to the city or to its proprietors an opportunity of establishing a system of dry & wet docks, which, with those natural advantages which New York possesses beyond any other city in the United States, would preclude all possible rivalry in commercial conveniences, by any other port.—I also observed that the space which might be occupied by docks was daily nar-
In a letter to Madison, Clinton says: "Our Port is still blockaded by the Cambrian and Boston Frigates which continue to lay here in such a manner that any water craft can come in... The sloop of War Driver is cruising just outside of the Bar and yesterday brought a vessel to [which was coming into Port]."—De Witt Clinton Letter Books (MS.), I: 272.

John Johnston, a New York merchant, whose sympathies were with the British, wrote some time in this month to a friend in Scotland: "two French Frigates, the Didon & Cybelle [see Je 4] came to this Port for the purpose of conveying home Mons. Jerome Bone [see My 4], the first Consul's Brother—He had just got on board with his Lady,—an American, whom he married since his arrival [Elizabeth Patterson of Baltimore], when to their consternation the British Frigate Cambrian & The Driver Sloop of War appeared in the mouth of the river. This so scared poor Bone, . . . that the same night he quietly disembarked his baggage, of which Mme. Jerome may be reckoned a part & slunk up to the City. . . . To make the matter still worse, the Driver being since gone, the Boston has succeeded her . . . so to all appearance the poor French are reduced to the dreadful alternative of either fighting or lying in the Harbor. It does my heart good to see the cowardly Poltroons lying close alongside the Battery whilst our brave countrymen, although inferior in force to the cruising off the Harbor and daring them to come out."—De Forest, John Johnston of New York, Merchant.

Bonnard and his wife finally sailed for France about Nov. 1.—N. Y. Gaz. & Gen. Ady., N, 8, 1804.

The common council refers to the street com'rt a petition "from Henry Schilling and others against running the Broadway through the Lands to Bowery road. (see My 28.)—M. C. C. (1784-1831), III: 540. See also, Dr., 6.

The common council passes an ordinance "for regulating Taverns, Victualling houses, and Boarding Houses in the City of New York."—M. C. C. (1784-1831), III: 550-52, 552.

The committee, reporting on Dr. Hosack's memorial of March 19 (q. c), expresses the opinion that "the establishment of a Botanic Garden will be attended with great Public Utility while at the same time the improvement which will be made upon those grounds will very greatly enhance the value of the adjacent grounds belonging to this Corporation." The committee therefore recommends "that a grant be made to Dr. Hosack of the leased Lots which he holds from the Corporation upon the same terms which he purchased the adjacent fee simple lots from this Board payable in 2, 5, & 14 years. With interest."—M. C. C. (1784-1831), III: 553. The report was confirmed at the next meeting, and the comptroller was authorised to make the grant. —Ibid, III: 556, 581, 582-83. For the garden's location, see F 9, 1805. See also Ag 6, 1804.

The common council accepts a proposal from Hulsart and Stagg "to dig and fill Arch [Art] Street from the Bowery road to the Bowery to carry off the Greater part of the Water in the Bowery and also to fill Broadway from Mc Neillons Corner 400 feet to carry off the water with an arch of 40 feet wide for the sum of $450."—M. C. C. (1784-1831), III: 554. Regarding conditions here, see Je 4. See, further, Ag 6.

Writing to his mother from "Passaic Falls," Thomas Moore says: "The Boston frigate in which I expect to return, is now waiting the French Frigates (off New York), which are come to steal away young Mister Bonaparte."—Russell, Memoirs, Journal & Correspondence of Thomas Moore, I: 164. See Ji 10.

"Mons. Jerome Bonaparte has, we understand, concluded not to leave the country till next autumn at least, and has taken that elegant place Belvidere-House, for his summer retreat, where he will reside with his lady."—N. Y. Ev. Post, Je 26, 1804; L. M. R. K., III: 976.

The common council orders "that the health Committee be enlarged so as to consist of the Mayor, Recorder, and all the Aldermen of the City."—M. C. C. (1784-1831), III: 555.

The common council orders that the sump, of the almshouse "be authorized to erect a clock and bridge opposite the house at Bellevue to facilitate the landing of such persons as may hereafter be removed to the Hospital."—M. C. C. (1784-1831), III: 557.

The common council orders that the street com'rt "be directed to cause a Bulkhead to be made across Vevey Slip from the lower end of [Samuel] Ellis's dock and that he contract with suitable persons to fill up the Slip with good and wholesome earth."—M. C. C. (1784-1831), III: 560-61, 567.
The Chronicle: The Reconstruction Period: 1783-1812

Frances Tavern, now kept by David Rose, is the meeting-place of the N. Y. State Soc. of the Cincinnati for their annual banquet.

July 4

Sketch of Frances Tavern (1919), 19. See, further N 25, 1813.

State aid for schools conducted by churches is now in active operation.—See M. C. C. (1784-1811), III: 564, 585-86, 637.

The common council grants a petition from Thos. Storm and others "for a new well opposite the North door of the government house" (1784-1811) III: 564. On Oct. 23, the board paid Com'r Carmer $90 to reimburse him for the cost of this well.—Ibid., III: 620.

The common council appoints a committee "to wait on John Jay Esquire late Governor of this State, and Colonel Trumbull, to obtain the consent of the former to have his portrait taken, and engaged the latter to execute it. Colonel Trumbull was likewise permitted to retouch the portraits of General Washington, and Governor Clinton in the City hall."—M. C. C. (1784-1811), III: 567. See also Jl 13, 1801. The Jay portrait was delivered by Trumbull in 1805. It now hangs in the governor's room in the city hall.

-Cat. of Works of Art Belonging to the City, 4.

Alexander Hamilton is shot and mortally wounded in a duel with Aaron Burr at Weehawken.—Eve. Post, Jl 12 and 16, 1804. See also M. C. C. (1784-1811), III: 583.

One of the Morries, writing to his uncle, John Rutherford, on July 12, thus commented on the tragedy: "Before this comes to hand you will have heard of the melancholy event which took place on the shore of your State yesterday morning and which will before you read this have terminated in the death of the best man which ever lived in this country. I for one am filled with the sorrow the event has occasioned. Information of this unhappy affair because in the general consternation which prevailed throughout the city it was impossible to ascertained the truth of the numberless reports. At every corner and in every place where groups of people had assembled a different relation of the affair was given and nothing appeared certain but the gloom which covered the brow of every one. Judge Pendleton and William P. Van Ness were the seconds. It appears that near a fortnight had been consumed in an attempt on the part of Hamilton to prevent the necessity of its coming to a fatal issue, and on the part of Burr to bring it to that close. Report has it that he has been practicing with his pistols at Richmond Hill for more than a week past and it is certain that immediately after Hamilton fell Burr and his Second left the ground without attempting to afford any assistance and that he returned to Richmond Hill, where he was yesterday practicing business with all the unconcern imaginable. Gen. Hamilton did not fire at Burr nor did he intend to do so his pistol went off when he fell through the agony of his wound. The bullet entered his right side and lodged near his spine. No attempts have been made nor will be made to extract it. I saw Dr. Post who had just come from Bayard’s where the General and Mr. Hamilton reside. He says that he can live out the day. Mrs. Hamilton was in a state of perfect distraction when she arrived at the house. Almost all the gentlemen of consequence in both parties went yesterday to see how he was and everyone laments the misfortune as if he were a near relative. Among the great number of reports in circulation, that of Burr having shot himself which was pretty generally believed last evening was not the least ridiculous and may serve as a specimen of the natural propensity of mankind to exaggeration on occasions like this. In proportion to the violence with which Burr is execrated by all persons of every party, except his very few intimates, will be the zeal with which they will unite to do the highest honors to his memory."—Rutherford, Family Records and Events, 211-33. For other accounts of the duel and the correspondence which led to it, see Coleman, A Collection of the Facts and Documents relative to the Death of Maj.-Gen. Alexander Hamilton, etc. (N. Y., 1804), 1-23. See also Man. Com. Cbn. (1843), 450, and descrip. of Pl. 155-c, III: 774. Hamilton died on July 12 (q. 9.).

Alexander Hamilton dies. The whole city is in gloom.—Eve. Post, Jl 12 and 13, 1804. Governor Morris, having learned of the death on New York on this day and as the cannon at the bedside of Hamilton in Greenwich St. In his diary he writes: "When I arrive he is speechless. The scene is too powerful for me, so that I am obliged to walk in the garden to take breath. After having composed myself, I return and sit by his side till he expires ... This evening I am asked to pronounce a funeral oration. I promise to do so if I can possibly command myself. I am wholly unmanned by this day's spectacle."—Diary and Letters of Governor Morris (N. Y., 1885), II: 459-59. De Voe's Chronological Index (MS.), to newspaper references, II: 65 (in N. Y. H. S.), contains this foot-note: "Gen. Hamilton died in the house of Wm. Bayard, now standing (1885) at No. 82 Jane Street, south side, between Greenwich and Washington Streets, in a double house. H. H. Wotherspoon's father lived in it from 1788 to 1847 (non-in-law.)"—See Jl 13 and 14; and M. C. C. (1784-1811), III: 595. See also D. D. (1784-1811), III: 768-69. The vestry of Trinity church to take measures "for granting to the Corporation of the City all the Right and Title of this Corporation [Trinity] to Murray, Warren, Chambers, Read, Church and Chappel Streets, as the same are now open, and in public Use."—Trin. Min. (MS.).

The common council passes the following resolutions: "Resolved unanimously that the Common Council of the City of New York entertain the most unsought sorrow and regret for the death of their fellow citizen Alexander Hamilton [see Jl 11 and 12], and with a view to pay all the respect due to his past life and future memory and to afford the most unequivocal testimony of the great loss which in the opinion of the Common Council not only this City, but the State of New York and the United States have sustained by the death of this man the Common Council do unanimously recommend that the usual business of the day, for tomorrow be dispensed with by all classes of inhabitants.

And, resolved unanimously that the Ordinance prohibiting the tolling of Bells, at funerals, be on this occasion suspended, and that it be recommended to those who have charge of the Bells in this City to have them rung for the hour, and toll the service at suitible intervals during the day of his interment.

And also resolved unanimously that the members of the Common Council will in a body attend and join in the funeral procession of the deceased at the time and place appointed." A committee is appointed "to make such arrangements on the behalf and at the expense of the Common Council, for performing the funeral obsequies of the deceased Alexander Hamilton as the said Committee shall judge necessary and expedient."—M. C. C. (1784-1811), III: 568-69. Resolutions of regret at Hamilton’s death were passed by many other public bodies.

An inquest is held upon the body of Alexander Hamilton. For the report in full, see Man. Com. Cbn. (1865), 711.

Col. Henry Rutgers presents his account to the trustees of the First Presbyterian Church for "the fence round the New Burial Ground, and a small House, amounting to $50."—Prec. of the Trustees (MS.), Vol. II.

The body of Alexander Hamilton is buried with impressive ceremony in Trinity churchyard. Governor Morris delivers the funeral oration.—Eve. Post, July 14 and 17, 1804; and Jl 19, 1804; and Letters of Governor Morris (N. Y., 1888), II: 455-56. See also Coleman, A Collection of the Facts and Documents relative to the Death of Major-General Alexander Hamilton (N. Y., 1804), 36-46.

Property in James St. has been injured "by the bursting and Overflowing of the Manhattan Pipes in the said Street." The common council orders that the street can’t take such measures as the council of the board may direct for the relief of the owners of this property.—M. C. C. (1784-1811), III: 572.

Robert Sutcliff, an English Quaker visiting America on business, gives this account of his arrival at New York:

"After a tedious time spent in the gulf stream, we at length arrived on the coast of North America; and on 1st day morning, the 29th of the 7th Month, we were favoured with the sight of Long Island. . . ."

The next morning, about four o’clock, 7th Month, 30th, I was waked by the report of a great gun, which was followed by considerable bustle upon deck. After getting up, I understood that a shot had been fired over us by an English frigate, called the Boston, which in company with the Leander and Cambrian men of war, and the sleep of war, was then cruising near us; and as the cannon at the battery that was fired over us, was an earnest of what we might expect if we did not stop to receive an officer from the frigate, the topsails were immediately backed, and we shortened sail that they might have an opportunity of coming to us. A Lieutenant and Midshipman were sent on board. After spending about half an hour in conversation with us, and exchanging intelligence and newspapers, they left the ship; and, at parting, observed that they
believed all our seamen were citizens of the United States, and therefore did not wish to examine them; but that they hoped we would hoist our sails until we had a signal from the frigate; which was complied with . . .

"The different ships of war, which I have just mentioned, made a very gay appearance; for the weather being fine and clear, and but little wind, they had most of their sails spread; and continued sailing to and fro before Sandyhook. . . . Their object was to watch two French frigates then lying in New-York, and, at the same time, to examine all American ships in order to discover if there were any of the subjects of Great Britain serving on board, with a view to impress them. . . ."

"In sailing up to New-York, we passed by the two French frigates, called the Didon and the Sybille. They appeared to be very full of men. Soon after 4 o'clock in the afternoon we arrived at the fort. In passing through the streets to our lodgings, I was struck with the great variety of fruit exposed for sale; such as pine-apples, melons of various kinds, peaches, &c. &c. Melons and pine-apples I bought for $d. or 4d. each, and other fruit in proportion.

"7th Month 31st, 1804. This morning I was conducted by my companions to one of the Public Baths kept in the city of New York. These Baths are upon a plan I had not seen before. On each side of a long and spacious passage is a range of small rooms, in each of which is a Bath sufficient to accommodate one person; with suitable conveniences for dressing and undressing. On the side of each Bath are two brass cocks, the one furnishing warm and the other cold water; so that the bather may have the water at any point in his pleasure. There is also a valve, by means of which, if there is more water than is pleasant, he may let part of it out. Some of these Baths are made of white marble; and are so constructed that a person may lie down or sit in them. . . . There are also Baths in a different part of the house set apart for females."  30

Sutcliff left for Philadelphia on August 3—Sutcliff, Travels in some parts of North America in the Years 1804, 1805, 1806 (Philadelphia, 1813), 1: 285.

"Probably as a result of a communication from Dr. Miller and Dr. Jones, presented to the common council on July 23 and referred to the health committee, "suggesting an improvement in the method of obtaining a weekly report of the deaths in this City," an ordinance is passed "for procuring regular Bills of Mortality in the City of New York" (see My 23, 1803).

Its preamble states that "accurate registers of deaths and diseases are necessary to ascertain the causes which are fatal to human existence, furnish means for various important calculations, and form authentic records to enable posterity to prove the disease of their ancestors, relatives and Connections;" and that "the Bills of Mortality heretofore published in this City have been attended with beneficial consequences towards allaying false apprehensions of pestilential sickness.

The principal feature of this ordinance is the death certificate required of the attending physician. Every sexton or other person in charge of a cemetery shall make no burial without receiving a note in writing signed by the physician or a member of the family giving name and apparent age of the deceased, cause of death, etc. Each sexton shall keep a weekly register of the persons buried; and shall make out a weekly return to an inspector in a certain form, a draught of which is contained in the ordinance; and the inspector shall cause these returns to be published in the newspapers. Heavy penalties are prescribed for failure to perform the requirements of the ordinance.—M. C. C. (1784-1813), 575, 576-78.

"The board also orders that "the Inspector" shall devise such plan as he may judge most expedient for obtaining accurate lists of births and marriages within this City and county and report an ordinance in conformity thereto." The stated reason for ordering this is that "a Register of Births and Marriages within this City is essentially necessary towards ascertaining the augmentation of Population, the State of Society and other important purposes."—M. C. C. (1784-1813), III: 576. Such ordinance was reported and passed on Aug. 6 (q.e.).

The city executed a deed to Dr. Housack for the land of his "Botanic Garden" (see Je 13, 1802).—M. C. C. (1784-1813) III: 583. For this land Housack paid $4,807.56 in money and an annual quit rent of 16 bushels of wheat.—Brown, The Elgin Botanic Garden, etc., 6, citing record in comptroller's office. See F 9, 1805.

Upon the recommendation of the health committee, the common council resolves "that in every street where there are public wells the employes of the street's workers shall be directed under the direction of the Street Commissioner and Inspector who shall visit the streets three days in every week, as long as it shall be judged expedient, pump a sufficient quantity of water in order to cleanse the kinsels, and where it may be necessary to conduct the water across the Streets, canvas hose, or wooden leaders shall be provided for the purpose. Such inhabitants, as are provided with pumps in the yards of their buildings are employed in each ward and paid the time when the public pumps are employed as aforesaid and to cause the kinsels before their respective houses to be scourcd during Such operation. And all families are moreover directed to cause the foot walks before their several houses to be swept and watered every morning and evening during the remainder of the summer season." The board also appoints a committee "to devise an effectual plan for furnishing this City with a more abundant supply of water for public exigencies."—M. C. C. (1784-1813), III: 585-86, 594-95. See, further, S 10 and 17, O 22 and 29.

The common council resolves "that meteorological observations of the State of the Atmosphere be made at the Alms house every day at three different times and be published weekly with the bills of mortality and the weather tables which are kept by the Physician of the alm house who shall receive a yearly compensation of 52 dollars for his trouble and that he be authorized to purchase suitable instruments for that purpose at the expense of this board."

It is also ordered "that the salary of the Physician of the Alms house be increased to $500 per annum from the first day of March."—M. C. C. (1784-1813), III: 586.

Street Com's Jos. Browne reports to the common council that part of the contract has been executed for filling in and regulating Art St. at the intersection of Broadway (see Je 4 and 23), that there is a lack of earth in the vicinity to complete it, and that it cannot be finished until the purpose is executed first "to extend Broadway to Bowery road near the Elm Tree" (see My 28). He recommends, and the board decides, "that he be authorized, with the consent of the owners of the ground for the Street so intended to be run from such of the proprietors as are willing to cede the same, and that the Attorney of the Board may be directed to pursue the legal measures for obtaining the ground for this Street from such of the proprietors as are not willing to accede to this measure."

(See the protest of Splinger and others of June 25.)—M. C. C. (1784-1813), III: 584-85. See also a petition, of Aug. 27, of Alexander Ross and others against "the regulations lately made in the upper part of Broadway" (ibid, III: 594); their heavy expenses to conform to the regulation were, however, met by payments from the city by order of Oct. 22 (ibid, III: 619, 620). See, further, F 18, 1805.

On Aug. 20, a payment of $300 was made to Hulbert & Stagg (see Je 21) toward "filling in the intersection of Broadway & Art Street."—Ibid, III: 593.

The common council passes an ordinance "for providing a Register of Births and Marriages in the City of New York" (see Ji 30). Physicians and midwives are required to report their names and residences at the city inspector's office. Each is to keep a record of births that occur under his or her care, and to furnish it to the inspector. The Inspector is to keep the register, and this shall be open during office hours for the inspection of the public. He shall also keep the register of marriages, in the manner specified in the ordinance, for which purpose he shall apply to the clergy, who are enjoined to keep accurate records of them. In January, annually, the inspector shall exhibit to the common council a return of the whole number of births and marriages that have
occurred in the city during the preceding year.—**M. C. G.** (1784-
1813), III: 586-87.

The common council orders that the city inspector report the condition of the Oswego and Exchange Markets with his opinion whether they should be wholly or partly taken down.—**M. C. G.** (1784-1813), III: 579, 597, 606. On Aug. 20, the board ordered that the Oswego Market be demolished.—*Ibid.*: 592, 595, 606; **De Voe**, *Market Book*, 345. See *S 17.*

Trinity parish from the Expense of erecting a Stage in front of Trinity Church, and Mr Collister’s Account for tolling the Bells for the Funeral of the late Gen’l Hamilton . . . be paid . . .—*Trin. Min.* (MS).

It also appoints a committee to “have a Tomb Stone erected over the Grave of the late Gen’l Hamilton, with a suitable Inscription.”—*Ibid.* See *O 16, 1806.*

“BM Bayard from the Expense of erecting a Stage in front of Trinity Church, and Mr Collister’s Account for tolling the Bells for the Funeral of the late Gen’l Hamilton . . . be paid . . .”—*Trin. Min.* (MS).

The common council appoints a committee to “prepare a report for the Osage Indians now in this City” to be given on Aug. 11.—**M. C. G.** (1784-1813), III: 591. One “collation to the Osage Ind.” cost $1,675.53 (*Ibid.*: III, 602); another, $323-43 (*Ibid.*: III, 603).

James C. Lawrence, who “drew the plan of St. Paul’s Church Steeple in this city [see *O 3, 1795*], and superintended the building,” dies at Brooklyn.—**N. T. Ev. Post**, Ag 10, 1804.

The common council authorizes the contractor to receive from the Manhattan Co. the piers of the bridge at the corner of which are now a foot above the level of the street, “in consideration of the money due to the public streets by laying the conduit pipes of the said Company.”—**M. C. G.** (1784-1813), III: 591.

“Green vegetation” now “mantes the surface of the Collect.”—*Com. Adv., Ag 24, 1805.*

On this day and Sept. 17, the mayor issued warrants totalling $185,640 to John Pittard for the “expense of exploring the source of the River Bronx.”—**M. C. G.** (1784-1813), III: 597, 606. See also *O 29.*

The common council orders that the Bowery Lane be continued of the breadth of One hundred feet from the corner of Lovells house to the middle road agreeably to the map presented by the Street Commissioners . . .—**M. C. G.** (1784-1813), III: 597, 619.

A piece of ground at the intersection of Duane and Hudson Sts. having been ceded to the city by Trinity corporation (see *Je 20, 1797*), for the purpose of having it fenced, sodded, and ornamented with trees “as promotive of health and recreation,” the common council grants a petition that it be so treated, and adopts a recommendation that “the old fence which lies in the yard and which has lately been removed from the place where the City Hall is building,” be appropriated to fence the place “provided the Inhabitants in the vicinity if it, will raise a sufficient fund to complete the inclosure and the Ornaments intended.”—**M. C. G.** (1784-1813), III: 596. On Dec. 24, the fence having been previously “inadvertently sold,” the board orders that, instead, $100 be presented to G. V. Ladd to be used toward ornamenting the lots.—*Ibid.*: III, 655. This became the present Duane St. Park (L. M. R. K., III: 969), not St. John’s Park, as indicated in *ibid.*, III: 97.

The common council orders “that the Committee appointed to explore the source of the Bronx and other rivers in Westchester County [see *Ag 27*] be authorized to employ a Surveyor to assist them.”—**M. C. G.** (1784-1813), III: 602.

The common council orders that the Exchange Market, as well as the Oswego Market be taken down.—**M. C. G.** (1784-1813), III, 594, 606. The Oswego Market was not demolished until 1811 (q. e., *My* 6 and 20).—*L. M. R. K.*, III: 959. Regarding, the Exchange Market, see *O* 8.

At this time, referred to the flagstaff there: “The standard of the city, which, like a common candle, is reserved during the days of gala, hung motionless on the flag staff, which forms the handle to a gigantic chime.”—*The Knickerbocker Hist.* (1809), I: 159-61.

The common council orders “that the resolution for taking down the Exchange market [see *S 17*] be rescinded and that the said market be removed as nearly as possible to the Slip opposite to Trinity Church, and at a very easy rate by gradually widening and straightening it when the present buildings shall be removed.” He recommends, and the board decides, that “when any of the buildings in this Street shall be taken down those thereafter erected shall be built front on the dotted line as designated in the diagram,” and “that the ground so to be taken to widen the said Street shall be appraised and paid for according to the Act of the Legislature on such case made and provided.”—**M. C. G.** (1784-1813), III: 614.

The common council resolves “that the Council of this Board be requested to make a case between this Corporation and the Manhattan Company relative to the damages done to the Streets by the lateral pipes for conducting water to the houses in this City and the claim of the Corporation to be maintained by the Supreme Court to Conformity to the agreement of submission.”—**M. C. G.** (1784-1813), III: 619.

The American Hotel, corner of Cortlandt and Greenwich Sts., is opened.—*Cor. Adv., O 22, 1804.*

The Philharmonic Society meets in the City Hotel on Broadway.—**Daily Adv., O 27, 1804.* The first monthly concert of the season was advertised in November.—*Ibid.*, N 8, 1804.

The street com’r refers to the common council “a Map of the north side of the City from the Battery to the State Prison, conformably to a resolution of the Common Council on which the blocks between Washington and West Streets from Murray Street to the State Prisons are made of uniform depth of One hundred and ninety feet.”—**M. C. G.** (1784-1813), III: 611. The original MS. report of the street commissioner is preserved in metal file No. 25, city clerk’s record-room. The map, dated Oct. 23, is filed in the topographical bureau, borough president’s office, as Map No. 117.

Upon the recommendation of the inspector, the common council agrees that its members will “view the situation of the River Bronx and Rye Pond in Westchester County to enable them the better to decide upon the practicability of conveying the water to this city by public uses.”—*Ibid.* (1784-1813), III: 619. The payment of $84 was made to John Pittard for “expenses of visiting the Bronx.”—*Ibid.*, III: 626. See also *Ag 27, N 10.*

**Aaron Burr** now in Washington, writes to his son-in-law, Joseph Alston: “My house [Richmond Hill] and furniture have been sold for about twenty-five thousand dollars. Seven or eight thousand dollars of debts remain unpaid. My agents have not collected any of my debts, nor sold any of the detached lots. The library and the wine remain. They will, I think, become your property.”—*Davis, Memoirs of Aaron Burr*, II: 349.

The common council refers to the chief engineer a communication from Mr. Banch “respecting a proper method of ringing the Bells so as to distinguish from their sound the place in which a fire happens.”—**M. C. G.** (1784-1813), III: 623. See also *Ag 14, 1804.*

Thomas Jefferson and George Clinton, Democratic Republicans, are elected president and vice-president over the Federalist candidates, Chas. C. Pinckney and Rufus King.—*McKeen, National Conventions and Plaforms*, 10-12.

The city’s meteorological observatory (see *Ag 6*) was situated at this period in the garden of the almshouse, where the wind, temperature, and rainfall were noted and reported to the press.—*N. Y. Herald*, N 7, 1804.

Joseph Browne writes to Wyant Van Zandt, chairman of the committee for supplying the city with water, his observations regarding the Bronx River as a source of supply, and the proposed mode of conducting the water to the city, and the probable cost. The geography of the region, and measurements of the ponds which supply the river; the engineering works (dams, gates, aqueducts,
1804. iron pipes, reservoirs, etc.) all are explained, with estimates of the expense of each of these, totalling $269,820. —From the original letter in the New-York Post, No. 22, city clerk's record-office.

14. "The act for incorporating the district of land hitherto known as Powells Hook, and erecting the same into a city, by the name and distinction of the City of Jersey, has passed both houses of the legislature of that state." —Com. Adv., N 14, 1804. On Dec. 10, trustees of "the Associates of the Jersey Company" were elected.

16. Jonathan Mason of Massachusetts, member of congress and United States senator, on a trip from Boston to Savannah, stops in New York, and writes in his journal his impressions of the city and an account of the social attentions accorded him. He is much impressed by the growing improvement of the city, stating: "The progress of this city is, as usual, beyond all calculation—seven hundred buildings erected the last twelve months; and Broadway, beyond all dispute, is the best street for length, width, position and buildings in America. . . . The people are rich, lively, and fashionable, by no means handsome, mostly of Dutch extraction. Their mode of business and their talents by comparison with other cities, in my opinion, suffer. They have not so much information so generally diffused as the New England States have and their present paucity of characters to fill their offices shows it."

18. Rufus King, in behalf of the directors of the "American Academy of Arts," presents a petition to the common council, asking for quarters in the upper part of the city hall.—Wyant Van Zandt Papers (MS.) is in N. Y. Hist. Soc. M. C. G. (1784-1811), III: 629. On Nov. 29, the common council resolved that "the wigwam or the Hall shall be completed a part of the upper floor ought to be assigned to the use of the Academy of Arts."—Ibid., III: 633.

The collections of this "Academy" were kept on the second floor of the old custom-house until 1816, when they were removed to the Eastern End of the "N. Y. Institution," back of the city hall.—Blunt's guide (1817), 97-98. It is interesting to note, however, that, since 1819, the present art commission has occupied the entire upper floor of the city hall.

20. The New York Historical Society is organized by eleven men, who meet in the "Picture Room of the City Hall" in Wall St. and resolve to form themselves into a society, "the principal design of which should be to collect and preserve whatever may relate to the natural, civil or ecclesiastical History of the United States in general and of this State in particular." The plan of the organization originated with John Pintard. The other founders included Egbert Benson, De Witt Clinton, Dr. David Hosack, and Peter G. Stuyvesant.—Kelby, The N. Y. Hist. Soc., 1804-1804, 1-2.

On Dec. 10, the constitution and the present name of the institution were agreed upon. Officers were elected on Jan. 14, 1805.—Ibid., 2-3. The society was incorporated on Jan. 10, 1809 (p. 1). At the beginning of its library, see Ap 13, 1807. Regarding the foundation of the society, see also John Pintard, founder of the N. Y. H. S., an address by Gen. Jas. Grant Wilson, Dec. 3, 1901 (printed for the soc. 1902), 25.

At the annual city election on this and the following day, the Republicans for the first time get control of the common council. N. Y. Ev. Post, Dec. 22 and Dec. 29, 1804. The editor of the Post offers the following comment: "Such is the first chapter of Democracy in the history of our charter, the Common Council having been always Federal till this election. And no person will deny that it would probably always have remained so, had those who now feel power seen fit to make repeated inroads upon the charter for the express purpose of producing the present result. As the business of the common council is principally conversant with the property, and not the persons of the citizens, the charter had, with perfect propriety, vested the right of electing that body in the freeholders only; but though this might be good sense and justice, it was not pure democracy. The claims of liberty and equality are not to be satisfied short of universal empire. Therefore the police of our city is henceforth to be managed by such good patriots as shall be elected by all such "unfit" fugitives from distress arriving in this land as by any means can rent a tenant of the yearly value of $25;" by such of our 'Indian neighbours' as may chance to come to reside among us; and lastly their elections will in no small degree depend on that class of people "who secure less by the kindness and more by the glands of the skin, which gives them a strong and disagreeable colour" . . . The truth is, Democracy and Jeffersonianism reign triumphant through the land, and men of character, of sense, and of property, have nothing left but to sit down quietly and let the torrent rage. Perhaps the time is not far distant when a sense of common danger shall come suddenly upon those who have resigned themselves to a stupid indifference, & shall stimulate them to rise in their might, as one man; till then it seems useless for a few individuals, more patriotic than the rest, to be making constant and fruitless efforts at mock elections, to stem the tide.

And now, since the party opposed to us have got all power and influence into their hands and have nothing to do but to make a fair division of the leaves and fishes among themselves, may we not at least indulge the hope that 'Revenge and malice will at length grow weary.' —Ibid., N 22, 1804. For the division of "the leaves and fishes," see D 24.

"I see not many handsome ladies in this city, most of them comely; but the inhabitants generally cannot be said to be handsome. They live well and are hospitable. They are wealthy; they feel conscious of all their advantages, and they rate them full high. There are a great many young men in the city, but not disposed to matrimony."—"Diary of the Hon. Jonathan Mason," in Mass. Hist. Soc. Proc., 2d ser., II: 10.

The common council appoints a committee "to wait on Colonel Trumbull and employ him in behalf of this Board and at their expense to paint a full length likeness of the late General Hamilton and a half length of the Chief Magistrates of this City since the Revolution."—Wyant Van Zandt Papers (MS.) is M. C. G. (1784-1811), III: 676. On Jan. 28, 1805, $500 was paid to Trumbull on account.—Ibid., III: 680. On April 22, 1805, $700 was paid him as "balance of his account for paintings."—Ibid., III: 736. The Trumbull portrait of Hamilton, now in the city hall, was delivered in 1805—Cat. of Works of Art Belonging to the City of N. Y.

The common council authorizes the mayor to vote on behalf of the board at the next election for twelve directors of the Manhattan Co., thus representing the stock in the company owned by the city.—M. C. G. (1784-1811), III: 645.

The common council orders that the city chamberlain be directed to keep an account of the debts of the Manhattan Co.—M. C. G. (1784-1811), III: 646. Cf. Ja 16.

The common council resolves that the Morning Chronicle be discontinued as one of the advertising mediums of the board, and that the American Citizen be substituted in its place.—M. C. G. (1784-1811), III: 648.

The common council appoints a committee "to report a plan and to determine the most eligible spot for building a Vault and erecting a monumental stone over the remains of the unfortunate men who perished on board the Jersey and other prison ships in the Harbour of New York during our Revolutionary War."—M. C. G. (1784-1811), III: 649-50. There appears to be no report of this committee. The subject was revived by the Tammany Society in 1808 (p. 8, F 1).

The mayor issues his warrant to pay $25 to Fenwick Lyle, "for a Coffin for the late General Hamilton."—M. C. G. (1784-1811), III: 650. The original voucher for this is filed in the record-room of the comptroller's office, Hall of Records. See also Ag 20.

Lipseur's brewery in Greenwich St. is destroyed by fire.—N. Y. Herald, D 12, 1804.

The common council appoints a committee to report "a suitable petition to the Legislature praying for a lease in perpetuity of the Government House and Ground in the rear thereunto appertaining" (see F 6).—M. C. G. (1784-1811), III: 652. On Jan. 14, 1805, the board authorised this committee "to have a survey thereof made at the expense of the Board."—Ibid., III: 660. On Feb. 4, the petition was ready to receive the city seal and be
transmitted to the legislature.—Ibid., III: 681. See, further, F, 7, 13 and 25, 1805.

The common council orders that a stove be provided for the common council chamber; also that the city inspector "procure proper Curtains to preserve the paintings of General Washington and Governor Clinton from Injury."—M. C. C. (1784-1831), III: 663.

18

A fire, starting at No. 104 Front St., consumes 17 buildings in Front St., 11 in Wall St., 4 on Jones Wharf, and 8 three-story brick buildings in Water St. The "Old Coffee House" (the Merchants), at the south-east corner of Wall and Water Sts., owned by the widow of Gen. Douglass, and occupied by Edward Borden, is destroyed.—See N. T. Herald, D 19, which gives a list of the owners of the buildings. The territory covered by the fire was from the first side of Coffee House Slip, on Water St., to Governor's Lane, down East River, and, crossing Wall St., including the houses on the east side of the slip. The loss was $2,000,000. Most of the buildings were of wood. In their places, "fire-proof" brick buildings were afterwards erected.—Aurora (Philad.), D 20, 1804; Man. Com. Coun. (1853), 467; Costello, Our Firemen (1879), 64, 207.

The floating engine, introduced by Mr. Howell, was operated successfully in extinguishing this fire. On account of the low tide, a scanty supply of water was obtained from the pumps and cisterns in the neighborhood; and the Manhattan plugs were covered with ice and snow, and "could not be found." The Howell machine was brought to the end of the adjacent wharf, and "afforded a copious, unintermittent and instantaneous stream of water within four hundred yards." The newspaper report of the event gives an account of Mr. Howell's trip to Europe to obtain the engines, on a pledge from "the late Mr. Governor" to start a subscription to compensate him; but on Howell's return Mr. Governor "was no more," and, after repeated trials, the three engines were bought by the city at cost. The engines were then laid aside as useless, "till one of them was "brought up to the State-Prison fire," which it "extinguished as by a miracle." . . .—N. T. Herald, D 19, 1804; and see ibid., D 22 and 26, 1804. See also 1797. For city expenses connected with the fire, and proposed improvements in the fire department, see M. C. C. (1784-1813), III: 665, 576, 576.

This day is set apart as one of thanksgiving for the preservation of the city "from the ravages of Pestilence," and for other blessings.—M. C. C. (1784-1831), III: 645, 651.

24

The Republican majority in the common council (see N 20) begins to displace its political foes with political friends. The officers of superintendent of scavengers, superintendent of repairs, overeer of roads, attorney of the corporation, and captains of the night watch are declared "rendered useless by the incumbrances and debts of the city."—Griffen, of Line, of Coal, of Chimneys, and Boards, Weighmasters, Gaugers, and Inspectors of Wood are ordered "to return their respective Commissions . . . on or before the first Monday of January next."—M. C. C. (1784-1813), III: 675-58. Valentine says this meeting was preceded by the first Republican caucus ever held in this city, at which Mayor Clinton presided, and he gives the minutes as they were recorded by J. Wartman, secretary. With unanimity they agreed upon the removal of all office holders except the keepers of the city hall, the city prison, and the almshouse. A committee was named "to prepare a list of offices and officers under the Corporation, with the salary," also a committee "to receive and report applications for offices."—Man Com. Coun. (1853), 451-52. See Ja 14. Later (see D 14, 1807), a "Committee on Applications for Offices" became a regular "Standing Committee" of the common council.

On report of the chief engineer, the common council orders that the engine-houses be furnished with stoves.—M. C. C. (1784-1831), III: 653.

The common council authorizes the mayor to issue a proclamation "proposing a reward of $500 "for the discovery of any Conspiracy to set fire to the City," and a like reward "for the discovery of any persons who may have wilfully perpetrated the fire on the 18 instant," and also a like reward "for the discovery of any person who may have set fire to buildings since that period," to be paid on the conviction of the offenders.

The increase in the city watch, directed by the mayor, is ordered to be continued. Captains of the watch in the first district are ordered to be "particularly attentive to the neighbourhood of Bur- ing Slip."—M. C. C. (1784-1813), III: 673-74. See also Ja 15, 1805.

The president and directors of the Manhattan Company appoint a committee to confer with a committee of the common council "on the subject of transferring the Water Works of the Company to the said Corporation."—Wyant Van Zandt Papers (MS). Nothing, however, came of this. The project was revived in 1806, (p. 29, D 25). See also O 15, 1806.

In this year there were 2,125 deaths in the city.—M. C. C. (1784-1813), V: 600-2.

Warrants on the city treasury during 1804 show the following payments for dirt carted into the Collect: Jan. 30, $1,000; Feb. 18, $1,000; Feb. 25, $1,000; Mar. 1, $500; Apr. 19, $1,000; Ap. 25, $1,000; May 21, $500; May 28, $1,000; June 11, $1,000 and $674 (bal. on Ruckel contract); July 2, $1,000; July 30, $1,000; Aug. 20, $1,000; Oct. 3, $1,000; Oct. 14, $750; Dec. 13, $754. M. C. C. (1784-1813), III: 457, 466, 472, 471, 478, 486, 501, 524, 525, 542 (518), 563, 581, 593, 616.

1805

Jones's New York Mercantile and General Directory, for the 39th Year of American Independence, and of our Lord, 1805-6, made its first and only appearance this year. The author was John F. Jones. It contained also an almanac for 1805 by Abraham Shoemaker, with a separate title.

Longworth's Am. Almanach, N. T. Register, and City Directory (1805), 73-78, contains a lengthy description of the city in this year.

At about this time, a traveller, writing home, describes his visit to New York, in part as follows: "... We find the inhabitants polite, gay, and hospitable, but not so dissipated as those at Charleston. Entertainments are frequent among them; and, as strangers, we were always invited. The furniture and apartments of the genteel houses, as well as the style of the table, are in the English fashion. . . . There are no grand public buildings, . . . There are three market places; but, except a more plentiful supply of fish, they are inferior, in every respect, to those of Philadelphia.

The inhabitants are very h convivial, as appears from the number of well-regulated charitable establishments; particularly the hospital and dispensary. The prison is a modern building, adapted to the security and health of its unfortunate inmates.

"The slaves are treated with great mildness; but still they are slaves, and their masters have not sufficient generosity to give them their liberty. . . ."—Wakefield, Excursions in N. Am. Described in Letters from a Gentleman and his young Companion to their Friends in Eng. (London, 1806), 170-71.

In this year, Col. Jonathan Williams surveyed New York Harbor under the direction of the secretary of war.—Picture of N. T. (1807), 5. See also D, 1807.

About this time, Wm. Satchwell Leney, an English engraver, settled in New York, and soon flourished as an engraver of portraits. About 1812 he was associated with Wm. Rollinson in engraving bank-notes.—Stauder, Am. Engravers on Copper & Steel, I: 61-62. See also Dunlap, Hist. of the Arts of Design, II: 382-83. Leney was the engraver of Pl. 88, Vol. III.

In this year, interments ceased in the Jewish (Shearith Israel) burial-ground at New Bowery near Oliver St. See 1784.

In this year, a Jewish cemetery, 50 x 100 ft., was consecrated on Milligan St., Greenwich Village. In 1829, this street became 11th St.—Pub. of the Am. Jewish Hist. Soc., No. 6, 172.

The third site of this cemetery, in 1830, was in 31st St., where, west of Sixth Ave., a portion of it can still be seen.—L. M. R. K., III: 927. See also Petersen, Landmarks of N. T. (1923), 66.

In this year, Broadway was permanently regulated between Canal and Prince Sts., and in the following year between Prince and Great Jones St. In the course of 1807, the regulation extended to Astor Place.—For an account of these and other improvements along Broadway, see Man. Com. Coun. (1865), 612 passim.

The original reports of the health committee for 1805 are preserved in metal file No. 29, city clerk's record-room.

In this year, John Contoit opened the "New York Garden," on Broadway near Park Place, having previously been proprietor of Montagüe's Garden (see 1802).—Man. Com. Coun. (1865), 548. See also 1806.

Affairs of the city hall in 1805, began with an order,
on Jan. 7, that the building committee for the hall be authorized —
for the reception of a larger number of patients, and also for
the better accommodation of maniacs." —*Assemb. Jour. (1804-5),
100.

Several extensive flour mills" at Red Hook are mentioned
in a description of New York harbour. On the east end of
Staten Island, near the Narrows, are "Signal Poles, erected upon
the seite of an ancient fort," at the expense of the city of New
York, "to give information of vessels arriving from sea, ships of
war, (distinguishing friends from foes) and vessels eastward." Around
these are "a great number of private poles, erected by merchants
at their individual expense [see My 21, 1802], to convey intelli-

The common council grants a petition of John Lemaire "to
be employed in making and Gilding Frames to the paintings
by Colonel Trumbull," and orders that it be done under
Trumbull's direction. —*M. C. G. (1784-831), III: 66s.
On April 15, he was paid $297 "for Picture frames." —*Ibld.,
IIII: 732. Regarding these Trumbull paintings, see JI 10, and N 29,
1804.

The committee of the common council reports recommenda-
tions to improve the fire department service and equipment. These:
1. That one more floating engine be procured of the same
power as that now in use, and that "two other engines of like power,
to go on wheels, be constructed," because "at some seasons the
Ice or other causes may wholly prevent the floating Engines from
moving." 2. That certain engines be sold at auction and replaced
by new ones, "of equal power with the largest now in use, except
that there are no others that are sufficient to do the work going
powerful in the service." 3. That there be but two sizes of
leaders (to connect the engine with the water supply), and that
the size of connecting screws be standardized. 4. Immediate repairs
when needed. 5. "That the Committee of Repairs procure for
each member of this Board [the common council], a Staff, at least
seven feet long, with a large golden handle at the top, and also
for each member a convenient Speaking trumpet, which shall be
the badge of Office to be borne at fires, that the same shall remain
the property of the Board, and when any change in office takes
place, the badges used by any member shall be handed to his immediate
successor in Office . . ." The recommendations are adopted. —*M. C. G.
(1784-831), III: 60s-64. An ordinance to that end was passed on Jan. 17. —*Ibld., III: 672.

For more than a month following this date the city advanced
large sums at frequent intervals for the relief of the poor. —*M. C. G.
(1784-831), III: 66s, 672, 676, 68s, 68s, 688, 698, 701.
In a report to the legislature, John M. Leean, commissary of
14 military stores, says: "Great inconvenience is experienced for
want of a small magazine in the vicinity of New York. The
one that belongs of the City, at the Island of Liberty, is the common
repository of the powder of private merchants and the United
States, with which that of the state often gets intermixed. A con-
venient lot for this purpose was granted by the corporation near
Old Potter's field, which will revert unless one is erected on it." —

The common council resolves that "a Bell of 60 or 60 lb.
weight, and about the tone of C in the scale of vocal music, be
erected and hung on the top of the North-western extremity of the
Hudson market; and another of the like weight and tone on the
eastern end of the market in Brannon [Spring] Street [see JI 22
and O 27, 1800]; and that the said Bells be protected from the violence of the Weather and other casualties, by small
and neat but temporary Cupulae." —*M. C. G. (1784-831), III:
652, 667.

The common council resolves that "the Street Commissioner
be instructed to report an estimate of the expense of making a
map of the Island of New York, exhibiting a distinct view of the
real property therein belonging to this Corporation, and of the
roads thereof." —*M. C. G. (1784-831), III: 66s. Cf. JI 3
and M 18, 1801; **F 13, 1805; Ja 20 and F 2, 1806.

The common council orders that the street commissioner
"be instructed to cause maps of this City to be struck from the
plate belonging to the Board on good paper, and to deliver one
such map to each member of the Board." —*M. C. G. (1784-831),
III: 668.

The common council orders "that the sale of all Lands the
property of the Corporation, and all Leases of the same be by
THE K., The iron 51st report line and ferry the, *'The law. 303. 307. The (1784-1831), III: 668. On March 25, Mangin was paid $73 for surveying—ibid., III: 711. See also Ja 39, 1804.

The Republican majority in the common council continues (see D 24, 1804) to divide political spoils among its friends; among the officers displaced are the comptroller and the street commissioner.—M. C. C. (1784-1831), III: 699-700.

The common council grants an application of J. B. Delacoste for permission to use the library room in the city hall for "the exhibition of his Cabinet of Natural History." The com'ry of public repairs is authorized "to dispose of such Old Furniture and Lumber in the Library room as is useless."—M. C. C. (1784-1831), III: 681. See F 16.

The common council orders that the city clerk and the city attorney draft a petition and a bill, to be presented to the legislature, "authorizing persons who shall hereafter erect three story Brick Dwelling houses and stores in the City of New York to place one half of the foundations thereof on the adjacent Lots, and directing that the owners of such adjacent Lots, shall pay one half of the value thereof whenever they shall propose to use the same."—M. C. C. (1784-1831), III: 682. On Feb. 13, the board postponed consideration of a report on the subject.—Ibid., III: 686. No law relating to this subject was passed by the legislature in 1805 or 1806.

A broadside, "Printed by G. & R. Waite, No. 64, & No. 38, Maiden-Lane," entitled "Prices Of Work agreed upon by the Society of Master Blacksmiths of the City and County of New-York," shows their charges for making various kinds of iron fixtures for houses and mills. It is on file with "Sundry Papers" in the City Clerk's office, called "Building Accounts to 1806," in the record-room, dept of finance, Hall of Records. A committee of the assembly suggests that, in order to raise a permanent fund for the support of professors at Union College, "the government house, and the house lately occupied by the secretary of state, situated in the city of New-York, belonging to the people of this state, be sold by the Commissioners of the land-office, subject to the payment of the act passed on the 16th of March, 1790 [q.v.], at the best price that can be obtained for the same, and upon such terms as they shall judge best. 8 "Your committee have been induced to report in favor of disposing of the buildings in New-York, in consequence of information, that the houses are rapidly decaying, and much out of repair; and learning that the corporation of the city of New-York were inclined to purchase the government-house, they suppose it may be sold for a fair price."—Assemb. Jour., 28th sess., 32-34.

However, the law relative to Union College, passed on March 39, provided that the money should be raised by lotteries.—Laws of N. Y. (1805).

Dr. Hosack has a valuable Botanic establishment in the vicinity of the city [see Je 23, 1804] which honors to us and will be of real utility to the Country. It is the only institution of the kind in the United States."—De Witt Clinton Letter-Books (MS.), I: 312. Hosack's botanic garden extended along the present 5th Ave. from 47th to 51st St. L. M. R. K., III: 946.

"A petition from the mayor, aldermen and commonalty of the city of New-York, praying for a lease in perpetuity of the building and ground thereunto appertaining, commonly called the government-house, situate in the said city," is read in assembly and referred to a committee.—Assemb. Jour., 28th sess., 95. On Feb. 21, the assembly resolved to refer the petition to a joint committee of both houses—ibid., 28th sess., 139. The senate concurred in this resolution on Feb. 22.—Senate Jour., 28th sess., 64. Thereafter during the session there is no mention of the subject. See Mr 17, 1806.

The common council appoints a committee to report what improvements and alterations "are proper to be made on the Battery, and also their ideas relative to extending, docking, out, and filling in on the ground under water adjoining to the same, so as to render the whole a commodious military passed from a public walk, and that the said Committee be authorized to employ a surveyor."—M. C. C. (1784-1831), III: 684. See F 28.

The street commissioner and one or more of the city surveyors are directed "to ascertain, from time to time, by actual survey or otherwise, the true Angles and corners of the several Streets of this City, and their relative positions to adjacent buildings known to be correctly situated, and report to this Board, with a Map, Plan, Diagram, or description of the same; which being agreed to by this Board, shall be entered as matter of record, for the general government of the surveyors, and Inhabitants of this City."—M. C. C. (1784-1831), III: 686-87. No such map has been found. It is possible that the Commissioners of Map of 1811 eventually mapped this proposed survey.—See Ja 30, P 3, Je 2 and 30, O 20, 1806; Ja 26, F 16, Mr 4 and Ap 5, 1807.

The common council adopts a recommendation of the street com'y that a committee of city surveyors be appointed "to ascertain the best method of fixing a standard to correct the measure of the Chains, Rods, and Cords, used in surveying, as well as the best method of fixing up or determining upon certain Objects by a true North and South Line."—Ibid., III: 681.

Trinity vestry directs the trustees (see Ja 23) to present plans and estimates for a church to be built "on the Ground lately purchased for that Purpose in the Broadway."—Trin. Min. (M.S.). Trinity bought land from the Lutheran congregation for
1803—16,000—Jour. of the Lutheran Church (1796-1821), 113. The Second Lutheran Church had formerly stood there; Grace Church was erected on this site.—L. M. K. III: 929. See Ap 11 and Fe 1.

Because the purchasers of lots on Hudson Square will want the streets regulated, the vestry also decides to cede to the city part of Hudson, Beach, and Varick Sts.—Trin. Min. (M3); descrip. of Pl. 106-4, III: 608.

The Provident Society, Mutual Benefit Society, Benevolent Society, and Albion Benevolent Society, are incorporated by the same act of the legislature.—Laws of N. Y. (1805), chap. 91. Picture of N. Y. (1807), 104.

Delacoste, the proprietor of the "Cabinet of Natural History" (see F 4), announces that his collection will soon be transferred to the old library room in the city hall, as he has conveyed it to the mayor and to Dr. David Hosack, as trustees for the subscribers to a loan to be raised to extend the collection.—Am. Cit. F 16, 1805. A catalogue of this collection, issued by Delacoste in 1805, is in N. Y. P. L.

The city clerk and city attorney report to the common council the draft of an act "for the better government of this City." The text of it is not entered in the minutes. A motion is lost "to appoint a part of the front section thereof as direct that Commission, Stock exchange, and Insurance Brokers, shall hereafter be appointed and licensed by the Common Council." The board orders "that the said Bill, together with the memorial, praying, that the same may be passed, be properly authenticated, and transmitted to the Legislature."—M. G. C. (1784-1831), III: 689-90. On Feb. 25, a motion of the common council to amend the fourth section of the bill "by striking out the words Commission, Stock, Exchange and Insurance Brokers," and again it was lost.—Ibid., III: 696.

The common council resolves "that in future it shall not be lawful for the Keeper of the City Prison to demand or receive fees from persons confined in his Custody." He shall hereafter receive an annual salary of $750, in lieu of all fees.

The board makes it unlawful for the "keeper to receive any slave or keep such slave in Custody upon the application of the Master or Mistress, without the order of a Magistrate or competent tribunal given in due course of Law." The committee to revise the laws is instructed to embody these amendments.—M. G. C. (1784-1831), III: 691.

The common council orders that the city clerk be instructed "to cause 300 copies of the Charter of this City to be printed, and also to collect such acts, and sections of acts, of the Legislature, as have either altered the said charter, or vested additional powers in the Common Council, to be printed with the same or as an appendix thereto."—M. G. C. (1784-1831), III: 691.

The street com'r reports upon the propriety of procuring to repairs of the upper part of the Broadway (see J 2 and Ag 6, 1804). The common council orders "that he be authorized to receive the necessary Cessions for that purpose, And to take measures to have the Street opened."—M. G. C. (1784-1831), III: 691. See, further, Ap 22, 1805.

The common council resolves "that the Street Commissioner be directed to report to this Board at the next meeting thereof a list of the owners of the land in the direction of the Canal or Tunnel intended by the survey of Charles Loss in February 1803; together with the quantity of Land they are willing to cede to the Corporation, in order to carry the design of effectually drawing that part of the City, into effect."—M. G. C. (1784-1831), III: 691-92. On Feb. 25, he reported on the subject, but consideration thereof was postponed.—Ibid., III: 697; descrip. of Pl. 84-b, III: 561. See Mr 18.

Recent acts of the legislature for the encouragement of schools having been in 1795 and 1801, "The Society for establishing a Free School in the City of New York, for the education of such poor children as do not belong to or are not provided for by any religious society," is organized at the house of John Murray. De Witt Clinton is elected president. The society was incorporated April 9, 1805 (q. v.). From this time until 1853, the public schools of New York were under its care. The society's corporate name was changed in 1808 (q. v., Ap 1) to "The Free School Society of New York," and in 1846 to "The Public School Society."—Our Common Schools: Their Rise and Progress (1886).

The Park Theatre closes temporarily, and William Dunlap retires as manager. The performers, under the direction of Messrs. Johnson and Tylers, reopen on March 4 (q. v.).

Dunlap, Hist. of the Am. Theatre (1832), 326.

Nearly 200 of the inhabitants and freeholders of the 25 Ward petition the common council for a market at the foot of Duane St. Their memorial states "That the Corporation of Trinity Church, having some years [ago] ceded to your Honorable Board certain lots of ground, with a view that a public market shall be erected at the lower end of Duane Street, that when it should cease to be used for that purpose, it should revert to the donors. The petitioners have for some time past been in the expectation of seeing some measures adopted towards the accomplishment of that object, but have been disappointed. That the population of this part of the city having of late years greatly increased and still continuing to increase with great rapidity, your Honorable Board do not doubt the necessity of procuring to the inhabitants of this district an equal facility of procuring the necessaries of life as their fellow-citizens enjoy in the other wards. They beg leave to state that this vacant space remains entirely unoccupied, and they can conceivably apply it to no purpose to which it can be applied with equal propriety as to that of a public market." The petition is referred to a committee.—De Voe, Market Book, 390; M. G. C. (1784-1831), III: 693. For the committee's report, see My 13.

Judge Robt. Troup gives further opinion "respecting the Jurisdictional rights of the Corporation on the Jersey shore." His opinion of May 19 (see May 21), 1804, stated that the city had a right of jurisdiction, at least as far as low-water mark, over the land appertaining to the city, and that it had been made in the name of the corporation by the old owners of the ground. The question which he now answers is: "Are charters have been erected within those limits, without the permission of the Corporation, and as their Jurisdictional rights are in other respects called in question," what is "the most eligible mode of asserting and vindicating those rights," and, for that purpose, will it be indispensable to obtain a grant of the soil?" He states the legal remedies, and explains to them in a judicial opinion, which is entered in full in the minutes.—M. G. C. (1784-1831), III: 695-99, 712-13, 714-15, 716.

The common council orders that the mayor be requested to go to Albany and endeavour to secure the passage of bills agreed to by this board.

He is also empowered "to purchase or lease the Government house and ground adjoining thereto for the use of this City."—M. G. C. (1784-1831), III: 696. See F 13, 1805, and Mr 17, 1806.

The common council orders "that the grass grounds appertaining to the Parks and Battery, be manured . . . ."—M. G. C. (1784-1831), III: 696. This is an early, if not the first, order for the care of the Battery grounds.

An editorial on the Battery states: "It is contemplated to enlarge this handsome spot very considerably, and to render it more suitable for a parade-ground and promenade, as well as to do away [with] the danger to vessels arising from the rocks which lie in every direction in front of it. Boats were yesterday employed in taking soundings to the distance of at least 150 feet from the edge, and probably the work of enlarging will soon commence."—Daily Adv., F 28, 1805. See Mr 25.

There are to be sold at auction, at the Tontine Coffee House, six lots belonging to Trinity corporation, lying on the west side of Hudson Sq. between Hubert and Laight Sts. They are each 29 feet front by 175 feet in depth. The lease is to run for 99 years, at a rental of $15 per annum.—Daily Adv., F 27, 1805.

On or about this date, John Lemaire made the following undated application for the position of sculptor of stone and wood carvings for the new city hall:

To the Honorable the building committee of the Corporation of the City of New York. The Petition of John Lemaire Respectfully Sheweth

That your petitioner is informed that considerable carving in wood and Marble, will be wanted for the City Hall, that is now erecting. As he has from his infancy, been brought up to that business, & has worked in several of the principal cities of Europe, viz in Paris, Bordeaux, Nantz, & severall[?l] years in London, and has been eleven years in this City, where much of his work is to be seen; he therefore considers himself every way qualified to undertake the conducting & execution of the carving which may be
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1805 Mar.

wanted & upon as reasonable terms as can be afforded. Should you honor your honorable Body think proper to appoint him the Master of the said building it will be a favor for which your petitioner will be ever grateful.

"We the Subscribers being well acquainted with Mr John Lemaire and knowing him to be an honest, sober & industrious Citizen and a perfect Master of the Carving business we recommend him & beg your houseable body to grant the petition

The legislature passes an act "to continue the Provision for the Public Hospital in the City of New York." By this, the appropriation made in the act of March 20, 1801 (ch. v.) is continued for the next five years—Laws of N. Y. (1803), chap. 21.

The common council ordered, on Feb. 18, that, on March 4, the day for re-inaugurating President Jefferson, "it be recommended to the Owners and masters of Vessels in this Harbour to display their colours during the day, that a national salute be fired at the Battery at noon, that the Bells of the respective Churches in this City be rung for one hour, commencing at noon, and that the Common Council will make provision for payment of the expenses, attending the same."—M. G. C. (1784-1813), III: 699; McMaster, III: 198.

The attention of the Patrons of the Drama, is respectfully solicited to the present state of the New-York Theatre.

The Performers, having suffered inconvenience from the interruption of the business of the Theatre [see F 22], destroying not only the reasonable expectations from their respective contracts, but also the customary remuneration from the public at the close of the Season, will open the Theatre under the management of Messrs. Johnson and Tyler. A programme is announced for this evening.—N. Y. Ev. Post, Mr 4, 1805. See Ap 22.

A petition of Dr. David Hosack of New York City praying for a loan of a sum of money, to enable him to maintain a botanical garden near the said city, is read in the state senate and referred to a committee.—Senate Jour., 28th sess., 83. On March 15, the committee reported favourably and a bill was introduced "for the support of a botanical garden within the city and county of New York." The senate adjourned, however, before the bill was passed, 26th sess., 95, 97, 102, March 25, 1806.

The common council directs the ferry committee to memorialize a memorial of Abraham Cannon "for leave to establish a ferry from Grand Street, to Morrell's point."—M. G. C. (1784-1813), III: 700.

See, further, Mr 25.

The common council refers to a committee a petition of Henry Rutgers and others "that measures may be adopted to prevent the evils arising from the too great number of Taverns in the City."—M. G. C. (1784-1813), III: 701.

The common council orders "that the Inspector be directed to have maps of the City put on rollers, for the use of the members,..."—M. G. C. (1784-1813), III: 703.

The common council directs the street commissioner and city inspector "to survey Water Street and Front Street, between the old Slip and the Coffee-house Slip, where buildings were destroyed by the late fire, with a view to ascertain whether any improvements can be made in the Streets."—M. G. C. (1784-1813), III: 703-4.

The street commissioner reports an ordinance "for making the side walks in the Bowery, between Bullock and Art Streets."—M. G. C. (1784-1813), III: 704.

The common council adopts new regulations for leasing the ferries.—M. G. C. (1784-1813), III: 704-5.

The common council grants an application, made by Rufus King in behalf of the Academy of Arts, "for liberty to deposit Statues belonging to the Society, in a vacant place in the City Hall."—M. G. C. (1784-1813), III: 707.

The minute upon the subject of the Tunnel presents a report in favour of an open canal, to pass through a street of 100 ft. in breadth, and the council resolves "that a Street of 100 feet in Breadth be accordingly laid out; that the Street Commissioner be authorized to receive Cessions for that purpose, from the proprietors who are willing to cede, and that legal measures be taken to procure any deficiency of Ground which may be necessary for that purpose; and that a Canal of [blank] feet in breadth, [and blank] feet in depth be constructed of Brick or stone, under the direction of the Street Commissioner."—M. G. C. (1784-1813), III: 708; Reference to Canal for Ap 15.

The common council orders that the street con't be requested, "at the expense of the applicants for a new ferry, from Grand Street to Bushwick, to direct a survey to be made for the purpose of ascertaining the distances across the river, the course of the tides, and eddies, and the situation of points and reefs, in order to enable the Board to determine with accuracy, which is the most proper place for a Ferry, across the East river, from Collaers hout."—M. G. C. (1784-1813), III: 713. See My 27.

The city ordinance regulating sales at auction is amended.

The sheriff and other officers are permitted "to sell goods taken on Execution, at the Horse market, near the new Watch house, at the Exchange market, at the house of — Burgois, in Greenwich Street, near Vesey Street, at the corner of the Park, near Saint Pauls church, and at no other place, Excepting, nevertheless, that they be respectively permitted to sell Lumber, which may be taken in Execution, at, or near the place, where the same shall be seized..."—M. G. C. (1784-1813), III: 714.

The common council resolves "that the exterior walk round the Battery, be raised, at least, Six inches above the present height, and the whole covered with gravel; and that the remainder of the Timber, and materials of which the batteries were constructed, be removed—and that the Superintendent of repairs carry the same into effect."—M. G. C. (1784-1813), III: 714. See Je 17.

The common council appoints a committee "to examine the situation of the Collective Fund, for the purpose of removing nuisances occasioned thereby."—M. G. C. (1784-1813), III: 714. For the committee's report, see Ap 1.

The Merchants' Bank (see Ap 7, 1803) is incorporated by act of the legislature.—Laws of N. Y. (1805), chap. 43. For a discussion of the struggle of the bank to secure this charter, see Hubert, The Merchants' National Bank, 1803-1893, 52-74.

The following orders signed by Solomon Van Rensselaer, adjutant-general, are issued from headquarters at Albany: "The commander in chief conceiving an organization of the Artillery, Tending to introduce an uniformity of discipline, and to excite emulation, by affording the same means of promotion to the officers attached to that service that exists in the infantry to be an essential ingredient in the military establishment, orders and directs, that the various artillery corps throughout the state may be consolidated into one division, to be commanded by Major-General Ebenezer Stevens—That said division be divided into the brigades, to be denominated the first, second and third brigades of artillery. That the first brigade be commanded by Brigadier General Jacob Morton, and consists of the first and second regiments of artillery in the city of New York, and the battalion to be commanded by Major John Ten Eyck; that the regiment of artillery commanded by Lieutenant-Colonel Peter Curtenius, in the city of New York, be denominated the first regiment of artillery, and consists of two battalions, the first to be commanded by Major John C. Ludlow, as first major of said regiment, and the second by Major James Manning, as second major of said regiment." Much detailed information follows regarding various state military bodies.—Com. Adv., Ap 16, 1805.

The duties paid at the port of New York during four years commencing April 1, 1801, and ending March 31, 1805, amounted to $12,682,010.14. Philadelphia in the same period produced $77,779,914. Boston, $40,608,400.25; Baltimore, $3,601,961.03; and Charleston, $2,601,961.54. This shows the comparative trade of the five largest commercial towns in America.—Jasen, C. W., The Stranger in Am. (1807), 92.

I was informed, that a piece of ground in the park, which, seven years ago, was not worth fifty dollars, had been recently disposed of, for the purpose of building upon, for five hundred pounds, currency of the state, which is eight shillings to the dollar.—Ibid, 93.

The petition of Abraham Shoemaker "for liberty to conduct the Ap
1805 Water of the late Tea Water Pump into Orange Street "is referred Apr. to a committee.—M. C. C. (1784-1813), III: 715. On May 6, the petition "during the pleasure of the Common Council" provided Shoemaker "construct his works under the direction of the Street Commissioner."—Ibid., III: 746.

The street commissioner having recently received an offer of several thousand loads of dirt if taken away immediately, the common council revives a resolution of May 12, 1803 (q. v.), authorising him to buy dirt for filling in the Collet at five cents a cubic yard.—M. C. C. (1784-1813), III: 718.

"The Committee to whom it was referred to examine into the state of the collect" reports that it is "filled with the bodies of dead animals, and dangerous to the health of the Citizens in its vicinity." The board orders that the superintendents of scavengers "cause the carcasses of dead animals and other substances liable to putrefaction to be removed and buried," and that the street commissioner "cause the sewer or sewers to be made and pass through the dam to carry off the water; and that he cause the head of the collect to be filled in with good and wholesome Earth."—Ibid., III: 719, 727; Com. Adv., Ap 6, 1805; Man. Com. Coun. (1860), 295. See also the board's contract with a Mr. Crumb, who undertakes to remove dirt into the collect.—Ibid., p. 31.

2 The legislature passes "An Act to raise a Fund for the Encouragement of Common Schools." This provides that the net proceeds from the sale of the next 500,000 acres of vacant state land shall be appropriated as a permanent fund for this purpose. The comptroller is authorised to lend this money at six per cent. until the annual interest arising from the fund amounts to $50,000, after which time the interest "shall be distributed and applied for the support of common schools in such manner as the legislature shall direct."—Laws of N. Y. (1805), chap. 66.

A petition is being circulated for signatures, asking the common council "to cut a road from the corner of old Potter's-field across the swamp near the Powder-house, and to extend to the new Harlem road on the hill." This objection is made to it by a citizen because of no benefit, an expense which the city cannot afford, and unjust to the private owners of the property.—Daily Adv., Ap 2, 1805.

The "Swift-Sure Stage, A New Line, Running between New-York and Philadelphia" (c.f. 5, 29, 1804), is inaugurated. "Fare ... through 5 Dollars—Way passengers, 6 cents per mile—150 wt. of baggage the same as a passenger, with the usual allowance of 14 lb. gratis. All goods and baggage, at the risk of the owners, unless insured and receipted for by the clerk of said stage. Baggage insured in this Stage for one cent. . . . S. Pierson, Woolley & Co."—N. Y. Gen. & Mag. Adv., Ap 51 and Com. Adv., Ap 30, 1805. See also 1805. Accompanying the ads. of this stage-line, is a small wood-cut view of a stage-coach, differing in design from the "Mail Pilot," first noticed in this part of the paper. —Ibid., Feb. 19, 1804 (q. v.). Edward Bardin, now at 44 Pine St., became one of the New York ticket-agents.—See a second ad. of this stage-line in ibid., Aug 8, 1805.

9 The legislature directs the secretary of state "to cause such of the records in his office which are written in the Dutch language, and which shall be designated by the person administering the government of this state, to be translated into English, and to be transcribed in proper books to be provided for that purpose, which translations when so transcribed, shall be deposited in the office of the secretary of this state as part of the records thereof."—Laws of N. Y. (1805), chap. 96. James Van Ingen of Albany was appointed to make the translations.—N. Y. Ev. Pvt, Ap 24, 1805. In April and November of this year, Van Ingen gave receipts for certain of the Dutch records, but though these remained in his hands for a number of years, no translations were made.—Van Leer, The Translation and Publication of the M.S. Dutch Rec. of N. Neth. with an Account of previous Attemps at Translation (1910), 10. The matter was taken up again in 1813 (q. v., Ap. 6).

10 The legislature incorporates "The Society for establishing a free school in the city of New-York, for the education of such poor children as do not belong to or are not provided for by any religious society."—Laws of N. Y. (1805), chap. 108. The society was organized on Feb. 19 (q. v.).

"The Society of Tontine or Columbian order, in the city of New-York" is incorporated.—Laws of N. Y. (1805), chap. 110; Stone, Hist. of N. Y. City, appendix 12. See 11 Jl. 15.

11 Trinity vestry appoints a committee "to obtain proper Estimates of the Expenditure that will attend the building a Church upon the Plan furnished by Mr. West."—Trin. Min. (M.S.). The cornerstone of the church (Grace) was laid at Broadway and Rector St. on March 18, 1806 (q. v.), and the building consecrated on Dec. 21, 1808 (q. v.).

The street commissioner is ordered to "cause the line of Canal Street to be run," and to "give notice to the proprietors, not to build in such a manner as to interfere with the regulation of that Street."—M. C. C. (1784-1813), III: 730. For the commissioner's notice, see My 4.

The ferries are leased to the highest bidders as follows: Fly Market ferry, to Josiah Bowrere, $3,050; Catharine Slip ferry, to Dick Amerman, $4,475; Old Whawk ferry, to Garret Neede, $50; Bulls ferry, to Garret Neede, $50; Houghen ferry, to Peter Voors, $50; New Whawk ferry, to Charles Early, $50.—M. C. C. (1784-1813), III: 731. For the last-named ferry, see L. M. R. X, III: 942-43.

The common council orders that the street com'yr examine and report the best places "for laying out three roads between the two and seven mile stones, running from the East to Hudson River, and for laying out a road as nearly as possible at right Angles."—M. C. C. (1784-1813), III: 731. See Ap 29.

The corner-stone of a new coffee-house is laid by Edw. Bardin on the site of the Merchant's Coffee House, which was destroyed by fire on Dec. 4 last (q. v.). Bardin names it "the Phoenix Coffee-house," because it rose from the flames and ashes of the old house.—N. Y. Gen. & Mag. Adv., Ap 20, 1805; L. M. R. X, III: 982. See further, D 20.

Delaclorah publishes a notice that "the Garden, lately known by the name of Vauhall" (on the old Bayard place), "is at present open, and will continue to be so for the whole of this season."

"The New Vauhall [see Ja 30, 1804], facing the Bowery and Broadway, will be ready for the reception of company in the course of the next month, and will be opened by a grand gala, in the style of London Vauhall."—N. Y. Gen. & Mag. Adv., Ap 20, 1805. See further, Je 5.

The street commissioner's reports to the common council that "he has obtained the consent of all the proprietors of ground thereon, which it is expected will be effectual," is first noticed in this part of the paper. —Ibid., Feb. 19, 1804 (q. v.), the Tulip tree to cede to the Corporation their proportion of the ground for said street, except David Dunham & Thomas & Samuel Burling & those occupying as tenants under them. M. Springle however will not cede (see also Je 24 and Ag 6, 1804) unless he is exonerated from all further costs, as Broadway will run lengthways through his ground & leave him a gare on the Bowery road."

The street commissioner believes it will be necessary for the sheriff's jury to determine the compensation to be granted for the desired land. The board orders that measures be taken accordingly.—M. C. C. (1784-1813), III: 734.

On receiving a report of the road committee, the common council orders, among other things, that the Abingdon Road "be continued through by Bishop Moore to the North river," that "Main Cross Roads, at Lincolnburgh, from River to river to be made," and the name "at Harsons."—M. C. C. (1784-1813), III: 736-37.

Henry A. Coster purchases the property at the north-west corner of 30th St. and First Ave., originally part of the Kip's Bay Farm. Shortly after this, he erected the well-known Coster mansion there.—Libr. Deeds, LXXII: 141; L. M. R. X, III: 949. The house is shown on Pl. 124-c, Vol. III. In 1855 (q. v.), it was sold to Anson G. Phelps, in whose possession the property extended from Third Ave. to the East River, and from 29th to half way between 33rd and 34th Sts. First Ave. and the side streets were not opened in this neighbourhood until about 1852.—Stokes Records, I: 13, et seq.

In this month, the stockholders of the Tontine Coffee House My—
 appointed a committee to inspect its accounts. The committee's report (MS), reviewing the financial affairs of the establishment from 1805, is now preserved in a volume lettered "New York Tonnic

A menage of living Animals and Birds is forming in this city, for public exhibition. . . . They are to be seen at the upper end of Broadway road, near the Fire Engine, and a little beyond Dr. Livingstone's home."—N. Y. Com. Ad., My 17, 1805.

John S. Hunn, street commissioner, issues the following notice:

"The Corporation of the City of New-York having declared Canal Street to be one hundred feet wide [see Mr. 18] from Hudson's River to Rynder-street, near the Collect Pond, and the same being now staked out and prepared for building on or improving any part of the said street, on pain of having their buildings removed without compensation, and incurring the fines for infringing on the laws which will in all cases be rigorously enforced."—Am. Cit., My 9, 1805. See D 30.

The New England Society is organized and holds its first public meeting at the City Hotel. Subsequent meetings, for some years, were held at Ross's Hotel (Broad St.), the Tontine Coffee House (Wall St.), Gardin's Long Room (Broad St.), and Benjamin Butler's (Wall St.). In 1812, the Society settled at Niblo's Bank Coffee House.—Mag. Am. Hist. (1854), XI: 33-37. See D 21.

The common council grants a petition of Abraham Shoemaker "to erect his Waterworks in such manner as to convey the water into the earth. . . . He formerly "took the water from Slip Street."—M. C. C. (1794-1811), III: 746.

The committee to which was referred the petition for a market at the foot of Duane St. (see F 25) reports favorably, saying that "Trinity Church having declared and reserved this place for a market, the present proprietors of the property around it purchased at an advanced price in consequence, and the improvements in the neighborhood will warrant a market to be erected." The report, however, is recommitted and the committee ordered to inform the board regarding "the expense of the said market, and of extending the wharf."—De Voe, Market Book, 399-411; M. C. C. (1784-1811), III: 749. The market was not built until 1807 (p. v., Apr 27).

The Corporation of the Presbyterian Church having requested that the engine house standing on their ground in Nassau Street may be removed," the common council orders "that the engine house in the City Hall yard [on Wall St.] be extended, so as to admit the deposit [there] of the engine [which is now] on the said ground belonging to the Presbyterian Church."—M. C. C. (1784-1831), III: 749.

The common council orders that "the assessors in the respective wards of this City when making their assessments be requested to add a separate column to their Books, and to insert therein a list of the houses which have been built during the preceding year, and are now building, in order to discover and ascertain the progress of improvement in this City."—M. C. C. (1784-1831), III: 751.

The common council reports concerning a petition of Jemmasiah Ackerly and others for a new fish market at Catharine Slip that "the request of the petitioners ought to be granted, and that by driving about half a dozen piles in the Slip on the Easterly side thereof and by raising the Market about 18 inches from the present plates on the Slip and to 30 feet on Water Street and 18 feet on the Slip, and would be no inconvenience to the Ferry, and by Strode Charles Slip from the Water Market Boats could sail lay under the market and by having a stairs under one end of the market would be a great convenience to the Fishermen and Market Boats, and we are of opinion that the expense would not exceed $500 Dollars." The report is confirmed.—M. C. C. (1784-1831), III: 759; IV: 3. A fish market at Catharine Slip had been suggested as early as 1803.—Ibid., III: 247.

Charles Willson sets out for the best direction for a new road along the North or Hudson River. This shows the shore as far east as the Bloomingdale Road, including the original buildings and farms, several of which are in perspective, notably the little church at Harsen's Island. See original in the old office of engineer of street openings (now bureau of topography, borough president's office).

The board of health passes the following resolution: "That all vessels which may have arrived at this port, from any port or place in the West-Indies, in the 18th of May before, be ordered forthwith to leave the harbors, and haul out into the stream, to the distance of at least three hundred yards from that part of the island, which lies southward of a line drawn from the house owned and occupied by William Bayard, on the north river, and Stuyvesant's dock upon the east river, and that the same regulation shall be observed, with respect to all vessels which may hereafter arrive from the West Indies, under the penalty of being prosecuted according to law."—Hardie, Account of the Malignant Fever which prevailed in the City of N. Y. during the Autumn of 1805, 22-23. See J 11.

The street commissioner reports on a survey which he directed to be made "across the East River at Corleara hook with the intention of ascertaining the distance, situation, course of the tides and eddies and other circumstances in order to determine the place most proper for a permanent ferry" (see Mr. 25). Loss and Stillwell have made the survey, the map or plan of which the commissioner submits, with Mr. Loss's report, which states that "The distance from the foot of Grand Street to Morrells Island is 3000 feet, while the distance from Bullock Street to Woodbills is 3500 feet." The tides, eddies, reefs, etc. are also described. From all of which the commissioner believes that "the foot of Grand Street would be the most convenient and eligible place for a public ferry. It is not only the widest street in that part of the City but it also receives the greatest number of intersecting Streets and affords the readiest communication with other parts of the town. A public basin is reserved at the foot of Grand Street in the East River, and in all probability whenever a Market is erected, it will be built at that place," and it appears probable to the commissioner "from the reservation of a basin that it must have been the original intention of the Corporation to establish the ferry there." The board appointed a committee to pass upon several applications for ferry rights, in view of this report.—M. C. C. (1784-1831), IV: 8-9. The committee's long report, on July 4, sustained the findings of the commissioner, with full recommendations respecting the adjustment of grants to ferry lessees.—Ibid., IV: 26-36. See J 29.

The common council orders that Spring St., from Brannon St. to Broadway, be increased in width from 50 to 61 feet.—M. C. C. (1784-1831), IV: 9. On July 23, Charles Loss and others petitioned that Brannon Street may be continued of the breadth of sixty-five feet according to the Cession thereof.—Ibid., IV: 47. Brannon St. was the same as Spring St.—See L. M. R. K., III: 994.

The common council orders that the committee of repairs be directed "to build a machine for the purpose of driving Piles."—M. C. C. (1784-1831), IV: 10.

On July 11, the City Vestry passes a resolution that "the Lease of the Lot of Ground, in the Rear of the Land lately belonging to the Lutherans [see F 14], be bought . . . and conveyed in Fee to the Trustees to whom the said adjoining Land has been conveyed."—Trin. Min. (M.S.). This was the site of Grace Church.—L. M. R. K., III: 933. Also see Fl. 81-b, Vol. III.

"A private letter from Paris, states that his majesty the Emperor Napoleon has presented to Mr. Livingston, late minister from the United States to the French Court, on behalf of the Academy of Arts [see Je 7, 1803], established in this city, and of which his majesty is an honorary member, a very valuable Collection, estimated at fifty thousand livres, 10,000 dollars."—N. T. Com. Adv. Je 5, 1805; N. Y. H. S. Quarterly Bull., July, 1921.

The common council resolves that the street comm. 's "lay before the board a plan for opening Beekman Street in continuation to Water Street."—M. C. C. (1784-1831), IV: 15.

The common council resolves that "all future meetings of this Board be held with open doors."—M. C. C. (1784-1831), IV: 16. A motion was lost, however, "that the future meetings of this Board be held in some large and convenient room sufficient to accommodate such Citizens as may choose to attend to hear the proceedings."—Ibid. On Jan. 12, 1807, the board decided to meet in "the front Court room in the City Hall."—Ibid., 337. Before Dec. 17, 1799 (p. v.), the custom was to close doors.
The temporary committee to erect a temporary shed around the flag staff on the Battery and an awning above the Stone work Surrounding the same to be continued during the pleasure of the Common Council.

—M. C. C. (1784-1831), IV: 16-17. See also ibid., IV: 116, 156, 345. This is the earliest record of the presumable use of the flag staff as a refreshment stand.—Description of Pl. 59, In 455i L. M. R. K. P. 926.

On appointing a committee of arrangements for the celebration of the Fourth of July, the common council directs it “to report a permanent system for the celebration of that day.”

The common council pays David Longworth $188.68 “for City Maps.”—M. C. C. (1784-1831), IV: 18.

It pays James Hardie $50 “for no making indexes.”—Ibid.

The common council orders that Broadway along the Park be paved.—M. C. C. (1784-1831), IV: 20.

The common council resolves “that in all cases when assessments are made for the repairing any pavement or the repairing of any street the pavement of which has been injured by the Manhattan Water Works that a proportion of the money received by this board from the said Company on account of damages to the pavements be allowed to the persons on whom the assessment shall be laid.”—M. C. C. (1784-1831), IV: 20.

A committee report states that “there is no dock near the village of Harlem.” The common council adopts a recommendation that Beijl Vredenburgh be permitted to erect one according to his specifications, and that it be laid at $75 per annum until a permanent regulation be made respecting docks and slips at Harlem.—M. C. C. (1784-1831), IV: 22.

“Opening of the New Vaux hall, on Tuesday, the 25th inst. J. Delacroix informs his Friends and the Public that his new Garden in the Bowery will be opened on the above Evening: The labor and expense of this establishment has exceeded that of any similar endeavor in the United States, and this arrangements it is hoped cannot but prove satisfactory; he has at a very considerable risk and expense, procured from Europe a choice selection of Statues and Busts, mostly from the first models of Antiquity, and worthy the attention of Amateurs. The walls are ornamented with Pillars, Arches, Pedestals, Figures, &c. the whole of which when illuminated, cannot fail to create pleasure. A large and elevated Orchestra is erected for the Concerts, which will be in the best style, and composed of the best performers the City can produce. Nothing has been spared which could contribute to render it a genteel and entertaining place of resort, and the proprietor hopes, that the encouragement he has every reason to expect, will be exemplified on the evening of its consecration to the pleasure of the citizens.”

“The Busts and Statues are dispersed throughout the Garden, each having its name in gilt letters fixed upon the Pedestals, viz.

Geo. Washington,
Gen. Hamilton,
Addison
Cicero
Demosithenes,
Antinous
Apollo, E.
Cleopatra
Plenty,
Heracles,
Norse
time, Pumpey
Ceres,
Hebe,
Pope
Venus,
Hebe,
Anapo de Medecos.—Thalia, Comus, Hero, Statues, 5 feet high each. The evening’s Amusements to be divided into three Parts, and commence with Act 1st of a Grand Concert, under the direction of Mr. Hewitt . . . . Here he gives the list of musical numbers to be sung or played, and the names of the musicians; followed by the subjects of a large variety of fireworks, and the second part of the "Grand Concert." “The Garden will be illuminated with 2000 Lamps and the audience 40—Doors open at 6 o’clock.”—Daily Advert. Jue 25, 1805. See further, Jue 4.

Jacob Harsen having erected a small wooden building for a house of worship on his land about five miles from the city hall, near the North River, it is consecrated on this day.—Greenleaf, Hist. of the Churches, 33. The church stood on the west side of the Bloomingdale Road, between the present 69th and 70th Sts., now (1908) the site of the Nevada apartment-house. It was a small frame building painted white, and had a cupola shaped like an umbrella.—New York in 1906, p. 169.

The church organization was formed on Sept. 9 of the same year, taking the name of “The Harsenville Church.” This later became known as the Bloomingdale Dutch Church. The house of worship was conveyed to this organization by Mr. Harsen. The first pastor, Rev. Alex. Guna, was called on May 21, 1808. A new church was erected in 1814-16, at Broadway and 68th St. The old church was consumed by fire in 1817, Greenleaf, Mott, and Liber Deeds, LXXIV: 178. See also Pl. 157-3, Vol. III, and its description, I11: 777.

The market committee makes the following report to the common council: “I that the ground on which Hudson market now stands is too valuable to be appropriated for a market, and is situated in a Street too close.”

“II That the said Market is in a state of Decay will be useless in two or three Years. It being built upon a construction that is inconvenient to the public out productive of such a revenue as a new one upon an approved plan will undoubtedly be

“III That the Corporation Ship is at present a Nuisance, it being so Shallow, that a considerable part of the bottom lays bare at Low Water which renders it dangerous to the health of the Citizens in that part of the City, that the dock around it is rotten and has part of it already given way. The Committee therefore, are of opinion it will be for the public advantage to run a New bulkhead across the Slip in the manner laid down in a map now presented drawn by Mr. Mangin, and proceed to fill up the same, and to Erect a substantial and commodious market, on the ground that be spilled up. C. G. Brick, Engineer.”

—M. C. C. (1784-1831), IV: 24-25, 40. The report was not carried out at this time, however, “in consequence of leases of several of the lots, which they proposed to use or sell, not having expired.”

—De Voe, Market Books, 324, 326. See also Jue 1, 1812.

A committee report recommends, and the common council passes, the following supplement to the ordinance to regulate the sale of alcohol: “It shall be unlawful for the auctioneers to sell House hold furniture and articles of Lamar of the place assigned as a Horse market, near the New Watch house—and that it shall be lawful for the Sheriff and his Deputies, Constables, Marshalls or other officers, to sell Goods &c in Execution at or in front of the house of Joseph Burgois in Vesey Street and at the Corner of East George and Lombard Streets in addition to the places now assigned by Law.”—M. C. C. (1784-1831), IV: 37-38.

The common council holds a "superb Dinner" in the old city hall. The room is "beautifully ornamented with upwards of fifty orange and lemon trees, from the Flower garden of Mr. Grant Thorburn."—Com. Adv., Jue 1, 1805. At the Columbia Garden, near North End, the new form of entertainment with spectacular "wheels," operated by hydraulic machinery. He described these at length in his announcement in ibid., Jue 2, 1805. His rival, Delacroix, likewise, presents an elaborate "fete" at his New Vauxhall (see Jue 25), described in a column-long ad. in ibid., Jue 4, 1805.

—Early Newspapers, II: 427.

The common council orders that the superintendent of repairs place benches on the Battery.—M. C. C. (1784-1831), IV: 41.

The board of health issues an address to the citizens of New York calling attention to “the measures, which are now in operation for the purpose of providing against malignant and pestilential diseases.” The regulations include the examination of incoming vessels at the quarantine ground, a prohibition against ships from the West Indies or South America coming up to the city between June 1 and Oct. 1 (see My 23), the removal of sick persons, regular cleansing of streets, ban on burial south of Pump and Nicholas Sts. of people who die of the fever, etc. Between June 1 and Nov. 1, all hides, foreign cotton, and damaged coffee are sealed. All goods from the city, and no pickled or salted beef may be deposited to the southward of Ligendard’s Meadow and Grand St; between June 1 and Sept. 10, no oysters are allowed in the city.—Hardie, Account of the Malignant Fever which prevailed in the City of N. Y. during the Autumn of 1805, 28-34.

In behalf of the common council, Mayor Clinton acknowledges the receipt, from the "Directors of the Phoenix Fire Office" of London, of "a fire engine constructed to serve upon Water St."
The common council adopts a committee report relative to "the New road intended to be cut through to Harlem Common from improvements made by Mr. Smith at Kissing Bridge."—*M. C. C.* (1784–1831), IV: 56–67. For this bridge, see L. R. K., III: 926.

The common council orders that the collector, under the mayor's direction, negotiate a loan of $50,000 from the Manhattan Co.—*M. C. C.* (1784–1831), IV: 56.

Delacroix presents another programme (cf. J. 4) of fireworks, etc., of surpassing merit. This is "the first attempt in this city of adding Theatrical Scenery to an Exhibition of Fire Works."—"The subject of this display is "the Naval Exploits of the American Squadron in the Mediterranean."—*N. T. Com. Advo.*, Ag 8, 1805. See, further, My 2, 1806.

The common council orders that the road committee "cause a profile of the middle road to be made with a view to regulate the same in a permanent manner."—*M. C. C.* (1784–1831), IV: 59–63.

The common council refers to the street com'r a petition of Trinity Church "for a foot of ground along the fence of the yard of St. Paul's Church."—*M. C. C.* (1784–1831), IV: 60: A lease for 63 yrs. is granted.—*Ibid.*, IV: 67.

At the same meeting, the street com'r reported that Mr. Barrow, representing Trinity, had applied to him "for permission to set their intended Brick Wall on the North side of St. Paul's Church one foot further in Vesey Street, to preserve a row of valuable trees unfortunately placed too near the present fence.

"Vesey Street is about 64 feet wide, These trees are large and beautiful; and it would be a pity to cut them down. No inconvenience would result from granting the request, as the walks on that side of the Street will be unincumbered with stoops or cellar doors."

"... they will leave out an equal number of Square feet in Church Street, if this application is granted." The board votes to grant it.—*M. C. C.* (1784–1831), IV: 62–63.

The comptroller and street com'r have conferred with owners of the land along Leonard St. between Broadway and Elm St., desired by the city to widen Leonard St. The lowest price they will take is that paid to Mr. Quackenbos (which was at the rate of $4,300 for about 160 ft.). This would exceed $5,000, and as this is deemed too high, the board adopts the recommendation that the 10 ft. strip "be taken by the usual mode."—*M. C. C.* (1784–1831), IV: 63.

The board of health informs the public that "Ten cases of Malignant Fever have occurred since Monday last; five cases of a doubtful nature, some of which have been removed into the country or Marine Hospital, and four deaths." The board adds: "The part of the city which, at present, appears to be the principal seat of the disease, is Water and Freet-streets, between the Fly-Market and Old-slip."—*Hardie, Account of the Malignant Fever which prevailed in the City of New York during the month of Aug., 1805*.

The city inspector's office is removed from Federal Hall to the office of the board of health at the corner of Broadway and Chambers St., because of the disease in the city. "About this time also, the Banks, the Custom House, the Post-Office, and the printers of the Daily News-papers, in general, moved their respective offices to the village of Greenwich, to which place also, a number of our most respectable merchants and others resorted."—*Hardie, op. cit.,* 91–92.

Bellevue Hospital is opened for the reception of poor people who are suffering from yellow fever. It was closed on Oct. 28.—*Hardie, op. cit.,* 112–13. See O 25, N 12 and 13.

Theodorus Bailey, the postmaster (see J. 2 1804), publishes a notice that: "The Post Office is removed to Greenwich nearly opposite to the State Prison." A single letter-box "for the reception of letters to be forwarded by the mail," was left at the City Hotel in Broadway. Collections were made at this letter-box twice daily, when the letters deposited there were taken "to the Post Office."—*Com. Advo.*, S 10, 1805. This temporary removal was due to the epidemic.

The following notice is issued: "The Board of Health have made a considerable augmentation of the watch in the exposed parts of the city, and will not fail to make further arrangements from time to time as the public exigencies may require."

"They have also given special directions for the preservation of the city against fire. They, therefore, trust, that their fellow-citizens will feel perfectly satisfied, that every possible precaution
has been adopted for the public security. The great amount of
property, at present in the village of Greenwich stored in wooden
huts, has been deemed so considerable as to call for some
incidental protection against fire.

"The fire wardens of the eighth ward are especially enjoined
to use every precautionary measure, with the utmost promptitude
and vigilance and report to the board."—Hardie, op. cit., 94.

The number of cases of the malignant fever is very much in-
creased. The disease is very fatal. About 30,000 persons, all that
could afford to leave the city, have left it. From the principal part
of those who remain are "Poor Mechanics, Small Grocers, Draymen
and Blacks." Tents have been erected from Greenwich across
to Broadway, "forming a street for the reception of persons and
goods." These tents are nearly all occupied, by about 10,000
people. Sixty wagons and most of the drays from the city are
employed in moving goods, and the roads are crowded with men,
women and children, mostly on foot. From the city, some
cases of the fever followed the fugitives to Greenwich. The "rich
and middling people conducted towards the poor with a liberality
and benevolence honorable to humanity." The situation, however,
was "distressing beyond description."—New England Palladium
(Boston), S 17, 1805.

The demand for houses at Greenwich "is scarcely greater than
the publicity with which they are raised." On a spot "where every-
day you saw nothing but a green turf, to-morrow you behold a
store. . . By night as well as by day, the saw is heard and the
hammer resounds, and the consequence is that the village begins
to assume the appearance of a town."—Repertory (Boston), S 20,
1805.

The board of health announces that it has formed a "decided
opinion" that the principal seat of the prevailing disease is between
Burling Slip and Old Slip as far west as Pearl St. "It is matter
of extreme regret, that the repeated admonitions of the board,
to remove from this quarter have been disregarded by a number of
individuals. . . To obviate every plea of necessity, and to
discharge the duties they owe to humanity, the board have erected
buildings for the reception and accommodation of the indigent,
at Bellevue place, where they will be supplied with provisions by
the Commissioners of the Alms-House. Such as are able to
remove without assistance, are enjoined to go into the country, and
not into the healthy parts of the city. . . All persons who do not
comply forthwith, with this advice of the board, to remove from
the above described part of the city, which is deemed the principal
seat of the disease, and which does not contain more than 35 acres,
will be considered guilty of a wanton exposure of their lives, and
will justify the board in resorting to compulsory measures."—
Hardie, Account of the Malignant Fever which prevailed in the City
of N. Y. during the Autumn of 1805, 95-96. About 150 men, women,
and children were taken care of in the buildings at Bellevue gate.

"Ibid., 96.

The death of John Hyde, proprietor of the Tontine Coffee
House, following that of his wife, closes this hotel.—N. Y. Com.
Adv., S 7, 9, 14, 1805. See, further, N 12.

During the sickly season, Jacob Lorillard advertises that he
sells hides and leather at his tan-yard, corner of Magazine and

Oct. 18.

Petrus Stuyvesant dies at his home in the Bowery.—Com. Adv,
O 7, 1805.

John S. Hunn, the street commissioner, receives $767.31 from
the treasurer of the board of health in payment of an account
"for Disbursements and Accounts assumed for erecting Buildings
for the Accommodation of the Poor, at Bellevue Gate."—From
the original receipted bill, in metal file No. 26, city clerk's record-room.

Jacob De la Montagne, treasurer of the board of health, pays
another bill of $1,674.99, on Acct. of the Asylum at Bellevue gate.—"Ibid. Other hills for the same object are preserved in
the same file.

John Jay writes to John Murray, Jr. about the "African free
school" in New York City. He says: "It is in my opinion a char-a-
table and useful institution, and well entitled to encouragement
and support from your account of its present embarrassments.
I am induced to think that, in order to its being and remaining
on a respectable and permanent footing, some vigorous and well
devised measures should be taken to obtain adequate and durable
funds. The uncertain donations occasionally solicited and ex-
pected from charitable but scattered and unconnected individuals
will probably be always incompetent, and must obviously be too
precious to afford ground for reasonably calculating the prudence
and extent of expenditure."—From the existing bills, it would
doubtless be paid; indeed, they cannot be paid too soon, and it is desirable that new ones be not
contracted . . .

"Be pleased to inform me whether any particular attention is
paid by the superintendents to the children after they have left it,
and whether it is part of the plan to endeavour to have them
bound out into trades or to service in decent families. To me it
appears important that they be not left entirely either to their
parents or to themselves, it being difficult to give them good
moral, manners, or habits in any other way than by placing them
under the care and direction of persons better qualified for those
purposes than their parents generally are."—Corres. and Pub.
Papers of John Jay, IV, 302-4.

Robert Sutcliff (see JI 25, 1804) returns to New York. He
writes: "As the yellow fever had for some time prevailed at
New York, I was desirous of being put on shore at Brooklyn, on Long
Island; but, the night being dark with wind and rain, I could not
sit upon the Captain of the ship. But I was not able to obtain a boat of any kind to take me over. I was therefore under
the necessity of going to New York, where all was silent and
solitary, and what used to be the busiest parts, were now without
an inhabitant to be seen.

"Having landed at Quince's wharf, I went along Water-street
to the Fly-market Wharf, and then down to meet with the people;
but here likewise all was silence and solitude. I then went through
the whole length of Fly-market, which had the appearance of
having been untenured for weeks past; the light of some lamps
shewing the boarded floor to be as clean as that of a parlour.
From the Fly-market, I crossed Pearl-street, into Maiden-lane,
and went on to Broad-way, to the City Hotel, a large spacious
inn; where I was the only guest. When I was here last, the house
was crowded with company; so much had this awful visitation
varied the scene in every part of this busy city. Some of its in-
habitants, with whom I had been well acquainted, had been sud-
denly taken away by the ravages of that dreadful disease.
I passed through Greenwich, a village to which the business of
New York, together with the banks and public offices, were
removed on account of the yellow fever. The bustling and confu-
sion occasioned thereby is not easily conceived. For the accommoda-
tion of the merchants, many temporary wooden buildings were
erected."—Sutcliff, Travels in some parts of N. Am. in the years
1804, 1805, & 1806 (Phila., 1812), 113-15.

In one of a series of letters to the press concerning the general
health of New York City, "A Householder" discusses on this date
the "natural situation, &c. of New York, which seems to make the alternations made in it by art." He says in part: "In the south western part of the island a hill or ridge of ground began where the new City Hall is now building, and extended to the place where fort George formerly stood, and which now is occupied by the govern-
ment house. From this ridge the descent was generally rather steep
and rugged on the right towards the North river, the former shore
of which was then beneath a high bank, and is now for a consider-
able distance occupied by Greenwich-street. Towards the south
and south-east the descent was somewhat more gradual, and the
distance longer to the East river. Several small streams took
their origin in the south eastern side of the ridge, and ran to the
East river, shaping the ground in their course into little valleys,
and leaving corresponding heights and ridges of ground between
them. Broad-street, Maiden-lane, Ferry-street, and Roosevelt-
street, are formed by the buildings which would be naturally
placed along the opposite sides of such creeks. Wall, Pine, John,
Beekman and the upper part of Pearl-streets, show the direction
of the high grounds between Pearl-street, which is less winding
than the natural shore of the East river, was a part of its distance
first formed by buildings on the upper side only facing the water,
and leaving a road between them and the shore. This road was
first directed as the convenience of travelling required, sometimes
passing over a point of land, as at Hanover square and Beekman-
street, and at others meeting from the shore to avoid a marsh as at
the site where Fly-market now stands, and which was a marsh or
salt meadow made by the mouth of the small creek coming
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1805
Oct. 22

The tide must have flowed up this creek to the foot of Liberty-street. Eastward of the upper part of Pearl-street, the ground suddenly sunk into a spacious level, a part of which was a swamp within the memory of living persons.

"On the north side of the hill first mentioned, the ground descends to the Collect which was a pond of many acres about equally distant from the two rivers. Its outlet, which is to the west, is in a low and extensive low grounds in the neighborhood of Mr. Linnard's. The head of this pond and of the creek that ran through Roosevelt-street, are separated only by a low barrier of earth which might easily be cut through, and thus unite the two rivers. The ground west of the Bowery, as far north as Bunker's Hill, descend[s] towards the Collect, which thus receives the surplus water of several hundred acres of land.

"This Collect is now filling up with earth and is to be sold and built upon.

"A part of the low end of Pearl-street and of some streets crossing it, all of Water, Front, and South-streets, are built where the water once flowed, on ground made by constructing wharves which have always been composed of logs, loose stones, and earth. The tract of land thus made, reckoning only from the Battery to the beginning of Cherry-street, may contain about ninety acres. Those docks next the shore were built first, and built without any expectation that others were to be extended beyond them. They were at first raised no higher than was then deemed necessary to defend them from being overflowed.

"The bulk of buildings, the operation of water which is known to penetrate thorough the decay of these docks and aid of time, that moulders all perishable substances, do, as I believe, gradually sink and press down all the ground thus made. The oldest sink first and most. Thus there is a perpetual tendency in all these grounds to assume a form descending inwards, that is, from the river and towards Pearl-street. The lower part of Pine-street afforded till lately an example to prove the justice of this remark.

"A Householder," continuing his discussion of the general health of the city, now takes up "the means in our power to remedy the bad qualities of the city air, and first of Canals." He says:

"The first measure I propose is that canals be opened in the following directions, viz:—One through the Fly-market, Maiden Lane, and Courtland-street, connecting two rivers: one thro' the Collect, and its outlet, and through Roosevelt-street, connecting the two rivers also; and one through Water-street to Peck-slip, or even to Corlear's Hook if necessary.

"From the present appearance we may conclude, that the vile formerly began near the foot of Liberty-street, and extended in oblique direction to the intervening squares, and would, if present, have extended to the hill of John-street; on the other hand it extended but little further west than Maiden-lane now runs; I have never been informed how far it reached in front to the water—the difference between a marsh and a wharf is not worth noticing.

"Thus the whole of Maiden-lane, from Liberty-street downwards and all Pearl street, from the Fly-market to Burling-slip (except a few houses on the upper side) are built upon a swamp.

"Maiden-lane is now itself a common sewer, or a receptacle of filth for a very extensive and crowded part of the city, reaching with few exceptions from John to Pine street, and from Broadway to the East river. It may be questioned whether this district is not more thickly inhabited than any other in the city of equal extent. Its neighbourhood has often been a place of which would that would make a sewer, and the system always will be unhealthy. I repeat, that the waters of the marsh are not drained, the filth on the surface of it is not washed away. It stagnates, ferments, putrids, and is finally decomposed upon the spot. If there is no poison in the exhalations which arise from this and from the marsh below, our ideas are all wrong, but when all the animals, the inhabitants, work, eat, sleep, and move in the midst of it.

"The canal I propose through Maiden-lane is obviously a remedy for all these evils. It will immediately receive the water and all substances it bears along, as it comes rapidly down the descending streets and sewers. It will afford an opportunity to drain every neighbouring cell and sinken place to a point as low as the tide-water will permit; and the drain will not be circuitous, but direct; there will be another place for the filth to be deposited as soon as it is filled."

"The Board of Health have the satisfaction to announce to their fellow-citizens, that, in their opinion, every reasonable cause of danger from malignant fever has ceased, and that they may return to their respective homes with every probability of perfect safety. The Board recommend, however, that precautionary measures be taken to ventilate their dwellings."—Harde, op. cit., 99.

"The common council orders "that the Society of Arts be permitted to deposit Pictures, Statues, and other Articles belonging to said society, in the Room lately occupied by Mr. Dela Coste, as (see F 16).—M. C. C. (1784-1831), IV: 87.

"A householder" would be writing to his friends and city public about the cleaning of the city. "The general idea of estimating beforehand the real expense of a great public work being undertaken by a public body. Some have imagined that after the most liberal estimate made by the architects it would approach probably to triple of fourfold the amount of their computation. Thus if the expense was estimated at 160,000 dollars (as I think I have heard that of the new City hall was) such persons have imagined that 450,000 or 640,000 might be assumed as giving some idea of the true amount. Such methods and all others that I have ever heard of are fallacious. Be the building a Palace, Cathedral, or a Capitol, it usually exhausts after some years the patience and finances of the King, Church or Republic that undertakes it. The obvious reason is that there is no limit to the fancy of architects or the claims of contractors, and that public bodies can exercise little control over the expenditure. Hence such buildings are either never finished, or are only resumed at long intervals when new men rise up, who have not before exhausted their strength against mountains of marble. The temples of Egypt that outdate all history were left unfinished. The greatest palaces of Europe are unfinished. There are Cathedrals that have been 600 years in building. The Capitol at Washington, and I believe that at Richmond, also are unfinished. Our City hall will long remain in the same situation. Like the buildings usually undertaken by public men or bodies it is an object far beyond our resources. If the State of Virginia has already employed twenty years upon her Capitol, and the power and resources of the United States have been able in twelve years to raise but one wing of theirs, when does the single City of New York expect to finish a work so much more disproportionate to its means than those buildings were to the resources of the nation and state that undertook them? Public buildings are the bottomless pit of finance."

"In still another letter to the press, "A Householder" states: I have left to describe in different words the leading feature (not the only one) in which the canals I propose differ in their effect from all others. It is this—a canal from the land to the river must in its whole course be higher than the tide water in order to give a sufficient descent. It must be for the most part of its length, much higher, unless it is intended to be always choked with filth. It can therefore drain no grounds so low as the river-march. A canal on the contrary from river to river is level; the floor is always below the ebb tide and therefore it may drain the grounds and cellars through its whole extent with the greatest possible descent to a point as low, as the rivers themselves; and may receive the wash of the adjoining streets with the same advantage. The application of this to the canal through the Collect is very remarkable. Of all the level and low grounds throughout, I believe there are none towards the east or north rivers which can be drained without it, or which cannot be perfectly drained with it. Let it be added that these grounds, if not made uninhabitable, will one day compose a very populous part of the city.

"There is no much to add on the...importance of the canal through Water-street. It is the exception of the fate of the whole city. On the made ground in front of Pearl-street there are usually contained perhaps 20,000 people, including those whose daily occupations bring them there from other parts of the town. If fever is epidemic, on that ground only, the evil is enough to break up the city—If contagious, its ravages will be the more extensive. If the canal through Water-street was open, the streets and drains of this vast mass of inhabitants might be regulated with an ample descent every way to the water. The
place would not be a deposit for filth of the rest of the town, and the inhabitants might with absolute certainty keep their streets clean, their drains and sewers pure and their grounds dry down to the level of tide water. This can be done in no other way. . .

"It has been shown from premises which cannot be greatly erroneous that the expense of such a canal as I propose through Maiden Lane & Courtland-street would be not more than $5,000 dollars for about half a mile. . ."—Repub. Watch Tower, N 6, 1805.

13 John Quincy, travelling from Massachusetts to Washington, D. C., stops in New York and records in his diary under this date: "Went with Dr. Hinsack to view his botanic garden and greenhouse. It is only the second year since its commencement, consequently the institution is but in an infant state. The greenhouse is twenty feet high and broad, sixty-three feet long. The whole number of acres destined for the establishment, twenty acres. His collection of shrubbery is magnificent; the time, numerous and various in species."—Life of Josiah Quincy, by his son, S. J.

Josiah Quincy, continuing his diary, writes: "Dined with Mr. Gracie, at his country-seat, about eight miles from New York. Gracie is a merchant of eminence. . . His seat is upon the East River, opposite the famous pass called Hell Gate. The scene is beautiful beyond description. A deep, broad, rapid stream glances with every arrow's reach by the shore, hurrying along every species of vessel which the extensive commerce of the country aflords. The water, broken by the rocks which lie in the midst of the current, presents a continual scene of turbulent waves, dashing, foaming, and spending their force upon the rocks. The various courses every vessel has to shape, in order to escape from the dangers of the pass, present a constant range of a novel and enchanting scene. The shores of Long Island, full of cultivated prospects, and interspersed with elegant country-seats, bound the distant view. The mansion-house is elegant, in the modern style, and the grounds laid out with taste in gardens."—Life of Josiah Quincy, by his son, S. J., 1825.

14 The common council refers to a committee a petition from the inhabitants of Detroit "respecting Donations to relieve the sufferers of their Town, which was consumed by fire."—M. C. G. (1784-1831), IV: 91.

Clifford after John Hyde's death on Sept. 14 (9 v.), the Ton- tine Coffee House was to be reopened on this day by Thos. Vaughan. His notice adds: "The ordinary table d'hôte as usual, at half past 2 o'clock."—N. Y. Gen. & Gen. Adv., N 5, 1805. See, further, My 1, 1805.

15 John Pintard, city inspector, in a report to the board of health concerning the cases treated at Bellevue during the fever epidemic, says: "The Buildings called Hospitals erected at Bellevue appear to have been set upon the spur of the occasion, and on the presumption that the fever would never recur again. Fatal experience has proved otherwise, and points to the conclusion that we may expect arrivals were evidently depressed by the surrounding scenes of malady, and the groans and shrieks of unnerved and dying subjects. The senses were evidently offended, and the atmosphere rendered impure in consequence of the wards being so overcrowded. More extensive accommodation is absolutely necessary against another season. . ."

16 To render this establishment . . . extensively useful, and to relieve such persons as may be in circumstances to pay for comfortable accommodation, a Pay Hospital with suitable distinct apartments might be advantageously erected. . .

"Perhaps in regarding the proposed improvements at Bellevue Hospital, it might be of moment to consider whether a change of the establishment to some other ground, appertaining to the Corporation, would not be eligible. The site at Bellevue might in all probability, be sold for a sum adequate to very extensive improvements."—Hardie, op. cit., 112-17. See N 13.

17 The board of health issues an address to the public reviewing its activities during the late epidemic. The announcement states that 600 cases of fever were reported to the board, and 262 deaths oc- curred. Of the 64 patients sent to the Marine Hospital, 28 died; and of the 149 taken care of at Bellevue, 52 died.—Hardie, op. cit., 100.

18 Napoleon defeated the combined armies of Russia and Austria at Austerlitz.—Sloane, Life of Napoleon Bonaparte, II: 385 et seq.

The common council passes an ordinance for the appointment of a board of health. The mayor, recorder, commissioners of the health office, city inspector, and five aldermen are appointed to constitute such board.—M. C. G. (1784-1831), IV: 107.

The treasurer lays before the trustees a schedule of the real and personal property of Columbia College. The real property consists of the grant made by Trinity Church on May 13, 1755 (g. v.), and the water lots granted by the city on Aug. 16, 1770 (g. v.). The personal property is in bonds.—Hist. of Columbia Univ. (1754- 1804), 84-85.

The common council approves a petition to congress asking that the port and harbour of New York be placed "in a State of proper and sufficient defence," and orders that it be transmitted.—M. C. G. (1784-1831), IV: 108, 112. Though the memorial is not printed in the minutes, it is probably the one which is among the De Witt Clinton papers in Columbia Univ. Library. This is dated merely 1805, and read on Oct. 26. "It is well known that we can be approached by hostile vessels in two ways—that frigates of force can proceed thro' the sound totally uninterrupted by any fortifications—that ships of the line can, by the way of Sandy Hook, and with a favorable wind, arrive here in a few hours from the ocean—and that there is nothing to oppose their progress but a few works on Governor's and Ellis Island which are too insignificant to serve for the defense of this entrance. The means to prevent the advances of any enemy . . .

"It is equally well known that this City in relation to the internal and external commerce & the revenues of the Country is very important to the Union—and that it is in a Situation the most defensible of any must be universally acknowledged. . ."

At the beginning of the revolutionary war this place was among the first attacked by the enemy and it is highly probable that on the commencement of hostilities with a maritime power, the first blow will be aimed at it. Invited by its proximity to the ocean—by its unprotected Situation—by its extensive commerce & great wealth—and by the distressing consequences which would result to the revenue & general prosperity of the Country, an enemy would have every inducement to make it the earliest and principal object of attack."—De Witt Clinton Letter-Books (MS.), II: 225-26.

The petition was read in congress on Dec. 29 and referred.—Annals of Cong., 9th cong., 1st sess., 302. See also Mr 15, 1806.

The common council lays out streets in the section near the two-mile stone, encompassed by Broadway, Art St., The Bowery, and Bleecker St., according to a plan proposed by David Jones. Jones St. and Bond St. are the new streets introduced here into the city plan. An, that part of the Common land by the street called Mulberry (or Catherine Street) is continued "to Art Street and parallel to Broadway." The direction of Bleecker St. is altered to "run from the Bowery more northerly until it comes out in Broadway at a point opposite to the Mouth of David Street," whereby "there will be an almost a straight communication from the East River to the State Prison." Another street 50 or 60 ft. wide, is to be opened from Broadway to the Bowery between Bleecker and Prince Sts. (This later became Houston St.)—M. C. G. (1784- 1831), IV: 113-14. For the opening of Houston St., see L. M. R. K., III: 1006, under "North St."

This day is set aside by the clergy and common council of the city as a day of thanksgiving for "the late dispensation of Divine Providence towards this City."—M. C. G. (1784-1831), IV: 109. See Dec. 25.

The Phoenix Coffee House, on the south-east corner of Wall and Water Sts. (see Ap 18), is nearly completed, and will soon be opened. "We believe no pains or expense has been spared in raising this magnificent five story building, and rendering it replete with every ornament and convenience. From Mr. Bardin's long established reputation as a landlord, we have every reason to believe the Phoenix Coffee House will become the resort of men of pleasure, of the Merchants and strangers of distinction."—N. Y. Gen. & Gen. Adv., D 20, 1805. See 1821.

The members of the New England Society (see My 6) residing in New York celebrate the 18th anniversary of the landing of their forefathers at Plymouth, Mass.—Daily Adv., D 24, 1805.
The common council consisted of the mayor, recorder, and aldermen. The mayor appointed the city marshals, and granted licenses to cartmen, porters, pawnbrokers, and liquor-sellers. He was presiding officer of the court of sessions.

The common council consisted of the mayor, recorder, and aldermen. The mayor appointed the city marshals, and granted licenses to cartmen, porters, pawnbrokers, and liquor-sellers. He was presiding officer of the court of sessions.

On July 28, Le Maire was authorized to employ "an additional Apprentice."—Ibid., IV: 254.

On Aug. 7, McComb noted that Mayor Clinton, asked to see the plans; "it was the first time I ever heard that he expressed a wish to know what was going on, or what kind of a building it was to be."—McComb's Diary. On Nov. 28, Jas. Fairlie, chairman of the building committee (appointed Dec. 5, 1805), reported to the committee the formal statement of the condition of the city hall contract in its then state of progress.—M. C. C. (1784-1831), IV: 197-4. On Dec. 15, McComb stated that a new building committee was appointed, consisting of Van Zandt (chairman), Selah Strong, Miller, Toribert, LeRoy, Mott, and Morris.—Ibid.

During 1806, the board issued warrants in favour of the building committees, as follows: Ja 20, $5,000; F 20, $5,000; Mr 17, $1,500; Ja 16, $5,000; Fe 17, $5,000; O 10, $1,000; O 27, $1,000; D 8, $1,000; D 15, $5,000; total, $28,400.—M. C. C. (1784-1831), IV: 128, 143, 164, 184, 232, 243, 253, 264, 279, 284, 286, 314, 320.

In this year, Thomas Sully, of Richmond, came to New York to continue his career as a painter. For an account of his later work, see Dunlap (Goodspeed ed.), II: 234-5.

John Trumbull informs Alderman Van Zandt that he "has finished portraits of Mr. Duane, & Mr. E. Livingston which compleats the Commission with which he was charged on the part of the Corporation." He requests "an Order on the City Treasurer for the Amount, say Two Hundred Dollars."—W. Y. Van Zandt Papers (M.S.). Trumbull was paid $200 on Jan. 6.—M. C. C. (1784-1831), IV: 123.

About 1,300 Catholics of New York City address a petition to the legislature stating that "the form of oath prescribed to be taken previously on entering on any office, civil or military, in this State, by subjecting them to a religious test, to which their consciences are opposed, operates on them as an absolute disqualification." They ask that "the omission of the law" be repealed.—Farley, Hist. of St. Patrick's Cathedral, 37-39. The petition was granted by the passage, on Feb. 6, of "An Act to amend the Act entitled 'An Act concerning oaths.'"—Laws of N. T. (1806), chap. 3.

The common council orders "that the Lamp Committee be directed to try the Experiment of reflecting Lamps suspended in the middle of Streets, and also to examine the practicality of lighting the City by Furnaces."—M. C. C. (1784-1831), IV: 122. See Ap 21.

The common council orders "that the Mayor be authorized to cloathe and pay the expenses of certain Southern Indians now in this City and to defray the expense of their passage home."—M. C. C. (1805), IV: 124. On Jan. 27, the board voted a gift of $30 for them.—Ibid., IV: 131.

The common council appoints a committee "to draft and report a petition to the Legislature to raise the sum of $500,000 by a lottery or lotteries to defray the extraordinary expenses of this City."—M. C. C. (1784-1831), IV: 125. Their draft of such petition was adopted on Jan. 20, and the board ordered that it be transmitted under seal.—Ibid., IV: 126. On Feb. 17, the legislature passed an act enabling New York City "to raise monies by tax."—Laws of N. T. (1806), chap. 15.

The committee of the board of health, recommends:

1. That the introduction of a copious supply of pure and wholesome water as well for domestic use, as for the purpose of sprinkling the streets and cleansing the kennels, during the summer season, is essentially necessary. . . . The experience of all old and large cities proves, that water procured from any source within their limits, or in their neighbourhood, is impure and unwholesome . . . All schemes therefore, for procuring potable and culinary water from any source within the city, or in the neighborhood, ought to be rejected, and some arrangement devised as soon as possible, for whatever expense, to bring it in sufficient quantity, and of the greatest purity, from some river or stream, that arises at a distance . . .

2. That common sewers ought to be constructed in such streets of this city as are of sufficient descent to the river, in order to drain cellars and low grounds, and to discharge kitchen and backwater under ground as much as possible . . .

3. That the line of wharves along our shores ought to be faced with solid stone masonry, constructed in such manner as to be impervious to water . . .

4. That the interment of dead bodies within the city ought to be prohibited . . .

5. That the planting of trees and other healthy vegetables ought to be encouraged . . .

6. That a scientific and skilful engineer should be employed to assist in precipitation and executing the several objects embraced in this report . . .

7. That all cellars subject to the influence of tides or backwater, should be filled up level with the streets, and that all lots should be regulated in such manner as to discharge the water freely into the streets . . .

8. And whereas various houses, in different parts of the city, have on the roof the remains of every malignant fever, proved to be the principal seats of disease, and the graves of their tenants, the committee suggest the propriety of prohibiting the same to be let or occupied as dwelling houses, that they be converted into warehouses, and that any injury sustained by the proprietors be defrayed by the public . . .

9. That no further encroachment be made into Hudson river . . .

10. That more extensive accommodations ought to be provided at Bellevue Hospital for the reception of sick patients; and that a pay hospital be erected for the accommodation of such persons whose circumstances do not afford the expense . . .

The committee also recommends more stringent quarantine measures.—Miller, Report on The Malignant Disease which prevailed in the City of N.Y. in the Autumn of 1805, 89-96.

The Committee appointed by the Society of Cincinnati, for erecting a Statue of the late General Washington, in this city [see D 15, 1802], have received proposals from a celebrated artist in Europe, for executing the work, in such a manner, which they believe will be acceptable to the subscribers. But they have postponed a definite arrangement, until they have collected sufficient funds to justify their entering into a positive contract for the purpose. They, therefore, earnestly request that the money already subscribed [see D 15, 1802] and unpaid may be immediately paid to the Branch Bank; and further subscriptions are solicited to enable them to meet the necessary expenses.

The proposed Statue will not only be a monument of veneration for that great and good man, but will also be highly ornamental to this opulent city.—N. T. Com. Adv., Ja 20, 1806; N. Y. H. S. Quarterly Bull., July, 1821. See Ja 27.

The common council resolves "that it is highly important that a correct Survey and map be made of the Island of New York, including all the streets and avenues, and all the buildings, both those called the Corporation property, and also the heighta, valleys, roads, and wharves." The resolution is referred to a committee.—M. C. C. (1784-1831), IV: 128. See F 3, Je 2 and 30, O 20, 1806; Ja 26, F 16, Mr 4 and Ap 3, 1807.

We are happy to learn that arrangements are making, for erecting in the city of New York, a statue of Washington [see 110]. This most laudable undertaking, has suffered a temporary suspension, but is now revived . . . The corporation of the city have assigned a conspicuous place in the Park . . . One of the most eminent artists of the age has been consulted, and nothing is now wanting to the completion of the enterprise, but an adequate subscription . . ."—N. T. Eve. Post, Ja 27, 1806. This attempt, like the first (see D 15, 1802), failed. The matter was suggested again in 1811 (p. 69, D 7).

The committee of the U. S. senate to which was referred the memorial of the New York merchants (see D 26, 1802) makes a report on that part of the memorial which refers to the "defenceless situation of the port of New York." The report states in part: "Early in the history of North America, the harbor of New York was discovered by the Dutch to be a convenient place of resort for ships. Subsequent experience has proved the judgment of the Hollanders to have been good. The place where the North river forms a junction with Long Island Sound, is as well, if not better, adapted to navigation and trade, than any which the Atlantic coast affords.

The city, at the head of the harbor, is about twenty seven miles from the ocean. The ebb and flow of the tide is about six
1806 foot. The saltness of the water is not much inferior to that of the neighboring sea.

. . . Governor's Island has been already much improved by military works, and is the spot on which Fort Jay, and the principal other fortifications, have been erected. Bedlow Island, though very small has also been considered proper for defensive operations, and in some degree prepared to annoy an enemy. On Monday, May 16, where the city of New York stands, there was once a fort and battery. These have been demolished of late years, under a conviction of their unfitness, as have likewise some more recent breast-works and parapets, which though constructed but eight or nine years ago, were, within a twelvemonth, destroyed by the people who made them.

To the saltness, depth, and swiftness of the current, is to be ascribed the appearance of the harbor of New York during the winter. In 1780, its surface was covered by a thick, strong, covering of ice. The like has never happened since . . . and it is remarkable, that, while the Delaware, Patapsco, and Potomac, are frozen, and Philadelphia, Baltimore, and Alexandria, are secured, thereby from the fleets of the invader, the bay of New York, though situated further to the northward, possesses, commonly, no such protection, but is accessible from the ocean with but trifling impediment. . . . The committee further proves the insecurity of New York by reviewing the ease with which it was captured by the Dutch in 1673 and by the British in 1776. In consideration of all these facts it commends a moderate appropriation for "further military improvements on the sites already purchased, and the State purchased and surrendered; in full confidence at the same time, that a due proportion of the heavy artillery, armed ships, and gun-boats of the nation, will be stationed at the harbor of New York." The report is ordered "to lie for consideration."—Annals of Cong., 9th cong., 1st sess., 76–78. See also N. Y. Com. Adu. F, 1, 1806. For the action of congress, see Ap 21.

On June 3rd, the committee to the legislature at the opening of the session, says: "Application was made to the legislature at their last session, by a gentleman of the city of New-York, for aid in the support of a Botanic Garden [see Mr 6, 1805] which he had recently established. At the request of some of the members, I, in the course of last summer, paid it two visits, and am satisfied with the plan and arrangement, that I cannot but believe, if not permitted to languish, it will be productive of great general utility. The objects of the proprietor are, a collection of the indigenous, and the introduction of exotic plants, shrubs, &c. and by an intercourse with similar establishments, which are arising in the eastern and southern states, to insure the useful and ornamental products of southern to, and of northern to, this country; which article of science requires a collection of one hundred and fifty different kinds. A portion of the ground is allotted to agricultural experiments, which cannot but be beneficial to an agricultural people. . . . a country young as ours, the experimental sciences cannot be expected to arrive at any degree of excellence without the patronage and bounty of government; for individual fortune is not adequate to the task."—Senate Jour., 29th sess., 8. A bill was passed in the senate for giving Dr. Hosack an annual allowance to help him defray the expenses of the garden, but it was killed in the assembly.—Ibid., 29th sess., 11, 21, 35, 40, 41; Assemb. Jour., 29th sess., 102, 104 et seq.

Dyde's London Hotel. Facing the Park, near the Theatre is advertised and healthful situation on Feb. 1. It "will be conducted in the true Old English Style, the principles of which are clarity, cleanliness, comfort and good cheer. . . . A Public Dinner will be set on Table every day precisely a quarter before 5 o'clock—A Supper at half past 9. . . . This house has an elegant hall room, that will accommodate about one hundred and twenty persons. . . . It stands unequally by any other in the city, for its pleasant situation and the efficacy of the large windows. . . . On April 10, Dyde published a priced menu. The hotel "stands on high ground, is itself a lofty building, and from facing the Park, enjoys every advantage of ventilation, coolness and pure air." This notice gives the address as "Park Street" (the later Park Row).—N. Y. Ev. Post, Ap 10, 1806. See, further, My 10.

Feb. 1

The bridge over the Delaware at Trenton is formally opened, and passage between Philadelphia and New York can now be made by stage all the way, instead of by stage and boat.—Scharf & Westcott, Hist. of Phila., I: 524.

The "Miranda Expedition" puts to sea on the armed trader "Leander," which, after being laden at New York with war materials, and by deception passing the customs official; and after dropping down to Staten Island, where she received Gen. Francisco de Miranda and troops on board, proceeded towards South America. The object of the expedition was to free Caracas from Spanish oppression. In due time the vessel arrived at Jacmel, and was joined by two others. These two were attacked and captured by the Spanish, but the "Leander" escaped with Miranda. Some of the men of this expedition were recruited at New York "for service in the United States," to form a cavalry company by the name of "President's Guards," whose duty was to guard the president while traveling, and to guard New Orleans. Sixty prisoners, captured by the Spanish were tried for piracy, and their officers executed. Efforts were made by those imprisoned to secure the interposition of the government of the United States for their parole.—De Voe, Market Book, 215–16. Other particulars of this abortive enterprise were disclosed in the trials of Col. Wm. Smith and Samuel G. Ogden, of New York.—Am. Citizen, Jl 24, 25, 26, 29, 30, 31, and Ag 1, 1806. Some of the earlier history of Miranda was related by Thomas Paine.—Ibid., Mr 29, 1806. The names of those deluded by Miranda were published in the N. Y. Ev. Post, F 20, 1808. See also Trials of Wm. S. Smith & Samuel G. Ogden, for misdemeanors had in the Circuit Court of the U. S. for the N.Y. District in July, 1806 (N. Y., 1809), by B. and M. Sherman, A General Account of Miranda's Expedition (N. Y., 1808).

The committee on the proposed survey and map of Manhattan Island (see Ja 20) reports the draught of an act for the appointment of commissioners "to regulate and lay out Streets in this City beyond certain limits." The bill was referred to a new committee.—M. G. C. (1784–1813), IV: 133–34. See, further, Ja 2.

The legislature passes an act to incorporate "the Trustees of the Marine Hospital, called the Sailor's Snug Harbor, in the City of New-York" (see Je 1, 1807).—Laws of N. Y. (1806), chap. 4.

The common council pays Thomas Burling $2,575, "for ground taken to continue Broadway."—M. G. C. (1784–1813), IV: 139.

The common council appoints a committee to examine and report on the present state of the Collect.—M. G. C. (1784–1813), IV: 138.

Joseph Tyler (see D 22, 1801) advertises for sale the 8-years' unexpired lease of the place he occupies, now called "Washington Gardens," containing nearly two acres of ground, with stables, green houses, etc., which, he says, is a "well known and profitable stand for business."—Am. Cit., F 11, 1806. Soon after, he resigned the place to the Ev. Post, My 12.

The comptroller, Benj. Romaine, presents to the common council the following facts and observations on the subject of water-rights: "By the charter, the corporation hold the land in fee, from high to low water mark around the whole island, and from high to low water mark on Nassau Island from the East side of the Wallabout, to the West side of Red Hook;—They also hold by the same charter the fee right of 400 feet into the water, beyond low water mark, from a certain point beginning at Bestaver's Killitee (or creek) on the North river, from thence around the point of the Battery up the East river to a point considerably above Willet's dock. It has been the general custom of the Board to grant their soil under the water to individuals who held the marginal uplands. Previous to this, all the water rights were thought of little, and in many situations of no value, in consequence of the cheapness of the land already formed by nature, compared with the expense of docking into the river. . . . It is however daily increasing in value. . . . A recent sale of lands at public auction by the corporation of Trinity Church near the State Prison, proves the correctness of the former observation. Eighty acres of land on the river (some a very short distance from Greenwich-street to high water mark) were sold for $7,500 each on an average $2,211 each.—And I am informed that the purchaser was induced to give this price, because, by getting the water grant from the corporation of New York, he could make 88 lots—at, by no means an adequate price, paid for the upland. . . . The first grant was given in the year 1716, reserving a quit rent of 15, 6d per foot in front, on the river. Other grants have been given on the
North river, from the Battery to Chamber street from high to Feb. low water mark, and from thence 200 feet into the river; the rents reserved on these grants are from three-pence to one shilling per foot. These grants were all made previous to the year 1765, excepting one, which was made to the Episcopal Church in 1773. . . . The Corporation of the Trinity Church have obtained a promise of a grant, for all the soil under the water, lying between Church street and Wall-street, on the North river. The late Frederick Rhinelander procured the promise from the Corporation of Trinity Church of this water, and also a promise from the Corporation of New-York of the same, for 42 years without any quit rent at all: after this time to pay a quit of one shilling per foot forever after; only for obligating himself to keep Greenwich-street or road, passable for carriages of pleasure and burthens to a certain distance.

The common council pays Jos. F. Mangin $24 "for a Suit of colours."—M. G. C. (1784-1831), IV: 143.

The common council appoints assessors to assess the expense of opening Broadway in continuation above Art Street."—M. C. (1784-1831), IV: 144.

It refers to the alderman and assistant of the Eighth Ward, a report of the street commissioner "relative to the laying out Streets in the upper part of Broadway."—Ibid., IV: 145.

The common council orders the purchase of "the improvements of Mr. Smith at Horns hooks ferry . . ., the buildings and improvements at $750 and the Scows and boats at $250."—M. C. (1784-1831), IV: 145.

The common council orders that Mr. Varick St. be opened from Brannon (Spring) to Rudy Van Dam St.—M. C. (1784-1831), IV: 145.

The common council passes a resolution to instruct the superintendent of repairs, under the direction of the alderman and assistant of the First Ward, to "cause the Battery to be manured and to provide Lombardy Poplars to replace such trees as may be deficient, and to cause the trees now on the same to be trimmed in such a manner as may benefit them."—M. C. (1784-1831), IV: 148.

The common council orders that the lamp committee "cause an experiment to be made by putting reflectors in such number of small Lamps as they may think proper."—M. C. (1784-1831), IV: 148.

The common council having appointed a committee "to aid the Street Commissioner in projecting two streets on the west side of Broadway between Art and Bleeker Street," makes the recommendation which the board confirms "that a street be run from Broadway to Bastaven Killitie . . . opposite the South lines of Jones Street, to be called Amity Street, in lieu of Amity Street which lay diagonal to the South of it and which they recommend to be shut up."—M. C. (1784-1831), IV: 149, 162.

The common council resolves that Whitman, Walker, and Sugar Leaf (Franklin) Sts. "be run straight from Church Street to Elm Street and be respectively fifty feet in breadth and that Elm Street be continued straight from Leonard Street to Pitt Street and be of the breadth of Sixty feet."—M. C. (1784-1831), IV: 149.

The common council refutes to compensate Peter Schermher- horn for damages which he alleges he sustained by the filling in of the Collect.—M. C. (1784-1831), IV: 150-51.

The board also passes ordinances "to compel Mr Lynch, Mar. the representatives of Edward Livingston and others to fill in their ground adjoining the Collect."—Ibid., VI: 151.

On report of the street commissioner, the common council orders that "precepts issue" for opening Orchard, North, Arundel, and Stanton Sts.—M. C. (1784-1831), IV: 151.

The comptroller reports to the common council that "the house at the Corner of Wall & Broad Streets" was "sold" at auction on March 1,—that is, was leased for five years, at $250 a year, the lessee to keep the property in repair and pay all taxes and assessments.—From the original report (MS.) in metal file No. 27, city clerk's record-room. This was the old watch-house, at the south-east corner.—L. M. R. K., III: 975.

On report of the common council, "to regulate the measure of Coals," by making the city's standard the same as that used by the U. S. government at the custom-house.—M. C. (1784-1831), IV: 153.

The common council appropriates $20,000 "towards the expenses of building the New City Hall, for a year" beginning on this day, and resolves that this shall include "all debts and contracts incurred by reason of the said building."—M. C. (1784-1831), IV: 153. This appropriation appears to have been increased, on March 17, to $22,250. For other facts relating to the construction of the city hall, see items under several dates in 1800 to 1803 inclusive, and at the beginning of each year thereafter.

The common council appoints a committee to entertain the Orage Indians.—M. C. (1784-1831), IV: 154.

The common council passes an ordinance "to confer with a Committee of the Merchants relative to petitioning for fortifying the port and Harbour of this City." The board also agrees to the draft of a memorial to congress and to the legislature to fortify the harbour.—M. C. (1784-1831), IV: 157. See also D 16, 1805.

The common council determines that the city's lots at "Enkle- bord and on the Bloomingdale Road shall be sold "in perpetuity subject to an annual rent of twenty bushels of good Merchandable Winter Wheat on each Lot."—M. C. (1784-1831), IV: 159-60.

The legislature passes an act for the "better and more permanent Support of the Hospital in the City of New-York," which provides: First—that the treasurer pay to the society of the hospital an annual sum of $12,500 until the year 1857; 2nd—that the act passed on March 2, 1805 (p. 6), be repealed; 3rd—that the governors of the hospital make an annual report of the state of that institution to the legislature.—Laws of N. Y. (1805), chap. 54.

The Pennsylvania Academy of the Fine Arts is incorporated. 1779—Scharf & Westcott, Hist. of Phila., I: 521.

The common council orders that "the Building in the Alma house yard for which was another contract for encryptors engaged at the New City Hall, may be used by the Military Companies for a Drill room."—M. C. (1784-1831), IV: 162.

The common council resolves that "the Bloomingdale Road from its junction with the Albany Post road to Stefluben Street be of the Width of 80 feet and that the same be made as straight as the circumstances will admit by taking in and leaving out parts of the present Road . . ."—M. C. (1784-1831), IV: 164.

The common council refers to the committee of finance a report from the attorney regarding the opening of Canal St.—M. C. (1784-1831), IV: 165.

The common council authorizes the mayor "to purchase the Government house and grounds thereunto appertaining in fee simple absolute provided that the same can be procured without any condition in relation to its tenure."—M. C. (1784-1831), IV: 165. See J S 16, 1807.

The foundation-stone of Grace Church, on Broadway, at the south-west corner of Rector St., is laid.—From inscription on the original stone, preserved in the present Grace Church; N. Y. Gen. & Gen. Adv., Mr 19, 1806. The church was consecrated on Dec. 21, 1808 (p. 2). See also descript. of Pl. 102, III: 598. Not all the citizens resolved that Whitman, Walker, and Sugar Leaf (Franklin) Sts. were "run straight from Church Street to Elm Street and be respectively fifty feet in breadth and that Elm Street be continued straight from Leonard Street to Pitt Street and be of the breadth of Sixty feet."—M. C. (1784-1831), IV: 149.

The common council refutes to compensate Peter Schermher- horn for damages which he alleges he sustained by the filling in of the Collect.—M. C. (1784-1831), IV: 150-51.
The common council resolves "that it be particularly recommended to the inhabitants of the Bowery Line, and all others residing in Streets not less than 40 feet in Width to plant trees in front of their respective houses and lots, not more than twelve feet apart . . ."—M. C. C. (1784–1831), IV: 175; Am. Cit., Ap 9, 1806.

The common council orders that a new fire-engine house be erected on the ground of the Old Dutch Church in Liberty Street,—M. C. C. (1784–1831), IV: 176.

"The death of Maj.-Gen. Horatio Gates occurs. His funeral is to be held on April 11 from No. 59 Broadway.—N. Y. Econ. Post, Ap 10, 1806. He was 78 years of age. For sketch of his life, see Merit, Adv., Ap 11 and 17, 1806.

The common council appropriates $600 for the erection of a cup-house.—M. C. C. (1784–1831), IV: 178. See also Ibid., IV: 211, 240.

The common council appoints a committee to direct the work of running out and marking "the line of partition as settled by the Commissioners of 1774 between New York and Harlem.—M. C. C. (1784–1831), IV: 178. In its report, on April 21, the committee described landmarks encountered in making a survey, following the course marked by the commissioners, and recommended "that at least four square stones be set in this line and noted as the division line by writing the words New York on one side & the word Harlem on the other." Confirmed.—M. C. C. (1784–1831), IV: 187–88.

Congress appropriates $15,000 for fortifying the harbours of the United States and $150,000 for building gun-boats.—Laws of U. S., 9th cong., ch. 47; Man. Com. Coun. (1868), 876.

The common council refers to a committee an application of John Hills, which states "he is in possession of a military plan to prevent this City from attack."—M. C. C. (1784–1831), IV: 181. This may have been the same John Hills who drew a map in 1785 from surveys made in 1782, which plan is now deposited in the N. Y. Hist. Soc. "It was reproduced in the Man. Com. Coun. for 1848 and 1857.

The common council changes the name of Bullock St., in the Seventh Ward, to Broome St. after the Lieutenant-governor.—M. C. C. (1784–1831), IV: 183–84.

The common council orders that an account of the Manhattan Co. for water furnished to the city "be referred to arbitration;" that John Macom (McComb) be appointed arbitrator on behalf of the board, and "that the arbitrators be authorized to appoint an umpire."—M. C. C. (1784–1831), IV: 181. The comptroller reports that there is enough money in the treasury to "discharge 60,000 of the debt due the Manhattan Company," with interest, and the board orders payment.—Ibid., IV: 182.

The common council refers to a committee an account presented by the comptroller for filling in the Collect.—M. C. C. (1784–1831), IV: 183.

"The Theatre in this city has been purchased by Messrs. John K. Beckman and John Jacob Astor, for the sum of 50,000 dollars. These gentlemen intend to enlarge the audience-part of the house and finish the building in a handsome manner. Mr. [Thomas] Cooper is engaged as manager."—N. Y. Gaz. & Gen. Adv., Ap 23, 1806. See Ap 28, 1807.

The British ship "Leander" (of 60 guns) fires upon the American sloop "Richard" a quarter of a mile off Sandy Hook, killing "Capt. Pearce," the brother of the master of the sloop.—Adv., Ap 26 and 28, 1806; N. Y. Spectator, My 3, 1806. With the "Leander" were the "Cumbrian" (38 guns) and "Driver," "bringing to and overhauling every vessel which passed."—Boston Gaz., My 1, 1806.

"As soon as the death of Mr. Peirce [sic] was known, volunteers chartered and went on board a pilot boat, and brought back the vessel that was on her way with the provisions for the ships of war, and sent the provisions to the Poor-house amidst the buzzas of all classes. Other gentlemen armed themselves in the afternoon and sailed in the Patriot Pilot Boat, in pursuit of the vessels that have been captured, and ordered for Halifax. The fullest meeting ever known in this city, at the Tontine Coffee-House, have expressed their opinion on this occasion in the most spirited manner."

"The Resolutions, voted at this meeting, are the following—Resolved, That the citizens of the United States are of right,
and according to the constitution and laws of the land entitled to the enjoyment of life, liberty, and property; that it is the primary and most important duty of government to defend, preserve, and protect the same.

Resolved, That it is upon the strength and resources of the United States, that we can alone, under Providence, rely for national safety and the maintenance of national rights.

Resolved, That the repeated attacks and insults committed by foreign ships of war at the mouths of our harbors, merit the resentment and indignation of every friend to his country.

Resolved, That an administration which consents to pay money to avoid foreign insolence, or to prevent the violation of national rights, while it sells and disarms its naval force, instead of encouraging and preserving it for the defence of our ports and common property, endangers the national honor, endangers the public safety, and invites both injustice and insult.

Resolved, That the suffering of foreign armed ships to station themselves off our harbor, and there to stop, search, and capture our vessels, to impress, wound, and murder our citizens, is a gross and criminal neglect of the highest duties of government, and that an Administration which patiently permits the same, is not entitled to the confidence of a brave and free people.

Resolved, That the body of Merchants who foresee the impending danger, and petitioned Congress and the State Legislature to afford protection to this city and its lawful commerce, have merited the approbation of their fellow citizens.

Resolved, That the Memorials of the Merchants and Citizens to Congress, have been neglected, and that we perceived on the part of this house of the Senators from New York, where such exertions and zeal as were expected of them to engage the interest and influence of the State Legislature with Congress for the protection of our defenseless city.

Resolved, That so long as the British ships of war which have assumed a station at the entrance of this port are suffered to remain there, it is earnestly recommended that no supplies, provisions, or succours of any kind, should be afforded them from our markets, nor any intercourse held with them in any shape whatever, and that our pilot-boats should abstain from visiting them.

Resolved, That the murder of John Pearce, one of our fellow-citizens by a shot from a British ship of war, at the entrance of our harbour, and within half a mile of the shore, while he was engaged in peaceably navigating a coasting vessel laden with provisions for our market, was an act that excites our detestation and abhorrence, and calls upon our government for the adoption of prompt and vigorous measures to prevent a repetition of such wanton and inhuman conduct, and so flagrant a violation of our national sovereignty.

Resolved, That we will attend the funeral of the deceased, and extend our condolences to the ship in the harbour to display the customary signs of mourning.

Resolved, That this meeting approve the conduct of those persons who intercepted the supplies which were sent from this city to those vessels who now blockade our harbour, and who have murdered our fellow-citizen, John Pearce.—From N. Y. news in ibid., My 1, 1806. See also memoranda from the diary of John Piatt, regarding the Pearce (or Pierce) case, in Man. Com. Coun. (1860), 620-24. See, further, Ap 26.

The mayor lays before the common council affidavits “respecting the atrocious conduct of the British, in murdering John Pierce [see Ap 24] one of our fellow Citizens, while on board the Sloop Richard one of our Coasting Vessels, near Sandy Hook, and also in violating the jurisdictional Rights of the United States.” The board resolves that Pierce “be interred with the assent of his relations at the public expense on Monday next at 12 O’Clock;” also that it “will attend the funeral in a body;” “that all the Captains of American Vessels in the harbor be requested to hoist their colors half mast on that day;” and “that our fellow Citizens generally be invited to unite with us in this melancholy occasion.”

The board resolves that the mayor “be directed” to “obtain such further information as may be practicable respecting illegal Captures, impressments and detentions off our port by the said Ship and to transmit the same to the national executive in full confidence that proper measures will be adopted for the vindication of our national honour and interest.”—M. C. C. (1784-1831), IV: 185. See Ap 28. The funeral expenses, paid on May 12, were $41,83—1 Ibid., IV: 105.

The common council agrees to the draft of a memorial to be sent to the president, “praying that a naval force to consist of three or more frigates may be immediately sent to the protection of our port and harbour.”—M. C. C. (1784-1831), IV: 186.

J. & J. C. Delacroix announce that “Vauxhall Garden, in the Borough” (see Ja 59, 1804; Ap 20, Je 5 and 25, JH 4, and Ap 8, 1805) is now open for the season; admits two shillings, to each, entitles the purchaser to its value in any refreshments.” “A Summer Theatre is erecting here which will be opened in July.—N. T. Ev. Post, My 2, 1806; L. M. K. K., III: 981; Brown, Hist. of the N. T. Stage, I: 171; M. C. C. (1784-1831), IV: 184.

The common council resolves “that an entire new road to be called Hudson Avenue be laid out and Opened from Bank Street at Greenwich, 80 ft. wide, along a route defined in the resolution, and extending northward until it intersects the Cross Road commonly called Harrisen Road and that it be continued . . . until it comes into the old Bloomingdale road;” also “that the cross Road Aforesaid be opened to the North River.”—M. C. C. (1784-1831), IV: 197. This “entire new road” never was made. Evidently “Hudson Avenue” was the same as Hudson Street, which is an 80 foot street. For history of this street see L. M. K. K., III: 1002-3. When the Commissioner’s Plan went into effect, and after Hudson St. was extended as far as Ninth Ave., that avenue became its logical continuation. Apropos of Hudson St., the opening and benefit and damage maps of that important thoroughfare are not now to be found; on that account, the survey department of the city has been often at a loss for needed data in preparing titles on Hudson St.

Harsen’s Road never was extended to the North River. It reached the Bloomingdale Road between 71st and 72d Sts. The cutting through of the numbered streets as proposed by the Commissioners’ Plan superseded all such earlier plans.

Two dromedaries from Arabia, “the first of the species ever imported into this country,” are exhibited in Chatham St. near the arsenal.—N. T. Ev. Post, My 8, 1806.

Ja Mayor De Witt Clinton has occupied “the Public Pew” in the Wall St. (Presbyterian) Church; since May, 1806, without charge for rent; a yearly rental of $40 now is determined upon.—Proc. of the Trustees (M.S.), Vol. II.

Mount Pitt, which is about “a mile and a half from the Park, and stands at the east end of Grand-street, which leads from the Bowery, overlooking the Belvidere House, commanding a fine view of the Narrows, Hellgate Sound, and Wharfs of New York; is opened in a new style, for the reception of company.”—Com. Adv., My 10; N. T. Gaz. & Gen. Adv., My 12; Spectator, My 14, 1806.

The advertisements of “Mount Pitt” (also called “Ranelagh Gardens”) show that this resort and Dyde’s Hotel are in some way associated. Whetford (or Wheatcroft) says that his boarders will have “the advantage of dining at Dyde’s Hotel, in the Park [see Ja 26] if they wish,” while the ad. of Dyde’s Hotel, which began to appear in the issue of June 23, states that its dining-room had “a full view of the Park,” and that a balloon will ascend “from Ranelagh Gardens, late Mount Pitt, on Saturday next, the 28th inst. at 6 o’clock in the afternoon. . . .”—N. T. Ev. Post, Je 23, 1806. For Mount Pitt, see also My 2, 1807.

The Trustees of the Society for establishing a Free School in the city of New-York, for the education of such poor children as do not belong to, or are not provided for by any religious Society, having engaged a Teacher, and procured a School House for the accommodation of a School, have now the pleasure of announcing that it is proposed to receive scholars of the description alluded to without delay.—N. T. Com. Adv., My 14, 1806. See My 19.

The British Parliament for establishing a Free School in the 16th coast of Europe from the Elbe to Brest, thus excluding American commerce, although the ports are not invested by British fleets.—Anderson, Const. & Dut., 1384.

The common council orders that “the Street lately opened from Bowery Road to the Broad Way by Samuel Jones” be called “Great Jones Street;” also that “the Street opened by Doctor [Gardner] Jones at Greenwich” be called “agreeably to its original
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

The common council orders that the street commissioner take immediate measures for: 1. Finishing "the regulation of the Middle Road, from the South side of the Bridge near the powder house to John Murray's gate, agreeably to the profile," following directions recorded in the minutes. (This Middle Road was the present Fifth Ave.)

2. Erecting a substantial Stone Bridge across the road above mentioned in place of the present Bridge with Walls on each side about ten feet high in the Centre, and one hundred and fifty feet long; besides a parapet wall three feet high and two feet thick above the surface of the Road. The arch must be seven feet high, five feet wide, and fifty feet long, and be laid with good Masons Work. The side Walls are to be put up dry, faced on each side, battered, and sufficiently thick to resist the pressure of the earth which will be filled in between them.

3. Erecting "a substantial arched Bridge of Stone on the Middle Road, over the stream South of Mr. Post's in lieu of the present Bridge. The arch is to be eight feet high, five feet broad, and sixty feet in length across the road, and laid in lime and sand. The side Walls are to be put up dry, battered as aforesaid, and to be about twelve feet high, besides three feet parapet, two feet thick, and two hundred feet in length, on each side..."

4. Regulating Hudson St., from Brannon St. to Hetty St. (see also Je 2).—M. C. G. (1784-1831), IV: 209-10. On Nov. 17, payment of $500 was made to Wm. Matthews "on contract for bridge in Middle road," and $500 to Abraham Bouker "on contract for bridge of Manhattan avenue."—Ibid., IV: 295.

The street commissioner delivers to the common council a map of the ground between Greenwich Lane and the Bowery Road, which he has prepared. The board adopts it, and directs him to cause the streets, portrayed thereon, "to be surveyed & staked out at the several Corners, to enable the proprietors to ascertain with precision the quantity of Ground that will be taken from them for that purpose."

The board also directs that "the Street leading from the intersection of Hammond Street & Greenwich Lane to the mouth of the lane between Samuel Burling & Thomas Burlinga land on the Bowery be opened of the breadth of sixty feet."—M. C. G. (1784-1831), IV: 209-10, 216.

The common council grants permission to Abraham Cannon and others "at their own expense to erect a Market by the name of Grand Street Market, at the foot of Grand Street under the direction of the Alderman and assistant of the Ward and at such place as they may appoint upon condition that the same shall be the property of this Board and in all respects subject to its control."—M. C. G. (1784-1831), IV: 207. This Market was commonly called the "Dyers Hook Market."—De Voc. Market Book, 87-88. See also L. M. R. K., III: 959. The market was demolished in 1819 (q. v. Aug 23 and S. 6).

In an ad. for the sale of ice at his Columbia Garden (see Ap 1), Joseph Corre says that "of latter years the water in the Collect has been in a putrid state, to make the Ice unfit to be made use of in liquors," and that he "has, at a very great expense, procured Ice from a fresh spring above three miles from the city." He offers this ice at Columbia Garden by subscription, at $1.50, "each subscriber to be allowed eight pounds of Ice per day, to be delivered from seven o'clock in the morning until four in the afternoon; to be continued until the 20th day of September next. Ice at that rate will cost no more than a penny and a half per pound."—Am. Cit., My 19, 1811. This is the earliest mention found of a business of this kind in New York.

The common council directs the street commissioner to open "the outlet of Bestaver's Killiathe Village Street to the Hudson River," for which purpose the owners and occupants of the lots benefitted are to be assessed.—M. C. G. (1784-1831), IV: 208.

For Bestaver's Killiath, see Mr 23, 1790.

The common council refers to the superintendent of scavengers a proposal of Enos Tompkins "to furnish dirt Carts" (bell carts).—M. C. G. (1784-1831), IV: 209. On June 16, July 7, 14, and 21, the board made payments, from $22 to $56, to him "for bell carts."—Ibid., IV: 232, 243, 245, 251. Thereafter, each week, payment was made to him, usually $56, "for work with bell carts."—Ibid., IV: 255, 257, 259, 265, 264, 260, 271, 274, 276, etc. (Probably bells were used on the carts or by the drivers.)

The common council appoints William Bridges a city surveyor. May 9

A school of 42 children is opened in a small room on Bancker (now Madison) St., near Pearl St., under the auspices of "The Society for establishing a Free School." (See F 19, 1805.) This was the beginning of the common school system of New York City. — Bourne, Hist. of the Pub. School Society (1870), 9-12; The N. Y. Pub. School, by A. Emerson Palmar, 44.

The common council orders "that the Committee on that subject [see F 3] be authorized to write to Mr Hasler and defray his expenses to this City and back again to Philadelphia in order that he may be able to treat with board relative to making a proper survey of this Island."—M. C. G. (1784-1831), IV: 220, 233.

See Je 10.

The common council refers to the committee on wharves, slips and piers a resolution "that a pier and L. be constructed to the South side of the one constructed last year, so as to complete the intended basin at the North River between the lower end of Partion Street and Vezey Street."—M. C. G. (1784-1831), IV: 220. See Je 9.

The common council adopts an ordinance "to make Washington Street from Marketfield Street to Beaver lane." It confirms assessments reported by the street commissioner for Ehn, Leonard, Hudson, Hetty, Orange, Mott and Spring Sts., and appoints collectors.—M. C. G. (1784-1831), IV: 219.

The common council orders that the superintendent of repairs be directed "to construct two additional gates to Communicate between Marketfield Street and the Battery."—M. C. G. (1784-1831), IV: 218.

The common council refuses to permit auctioneers to have "Cryers or Bellmen" at their public sales.—M. C. G. (1784-1831), IV: 217-18.

The common council resolves "that all the records minutes and public papers and documents of this Board be kept in the Office designated for that purpose at City Hall," and that they be "kept open by the Clerk or his deputy on all usual days and hours of business."—M. C. G. (1784-1831), IV: 224.

The common council orders "that immediate measures be taken for Completing the Corporation basin at the North River by erecting a pier and L. at the South side thereof" (cf. Je 2).—M. C. G. (1784-1831), IV: 224-25.

Trinity corporation cedes to the city such part of its land as is necessary for streets at Hudson Square, and the square itself is given over to the owners of residences about it. On Jan. 12, 1809, the corporation resolved to pay its proportion of the expense of fencing the square.—Trin. Min. (MS); descrip. of Pl. 106-3, III: 608.

The total eclipse of the sun is observed at Albany by De Witt and at Kinderhook by a Spanish astronomer, Don Joaquin de Ferrer.—Todd, Total Eclipses of the Sun, 115-16.

The common council refers to the street commissioner an offer from the daughters of the late Peter Stuyvesant "to cede certain Streets to the public, provided the Board will defray the expenses of opening and regulating the same."—M. C. G. (1784-1831), IV: 226.

The common council orders that "the Cross Street running from Magazine to Anthony Street" be made a specified width.—M. C. G. (1784-1831), IV: 226. "The Cross Street" was the present Park St. As it appears with the name Cross St. on Pl. 64, Vol. I, it must have been laid out prior to 1797. Magazine St. was the name of the present Pearl St., and Anthony that of Worth St. —L. M. R. K., III: 992 (Anthony), 997 (Cross), 1025 (Magazine), 1028 (Worth).

The common council adopts a programme of events for celebrating the thirtieth anniversary of the independence of the United States. One feature is "That the Brass Ordinance taken from the enemy during the revolutionary war, be removed from the Arsenal to the Battery on the afternoon of the 4th of July and be returned to the Arsenal on the afternoon of the 5th."—M. C. G. (1784-1831), IV: 234. This ordinance was afterwards kept in the new arsenal on Fifth Ave., opposite 64th St.—See N 15, 1848; Je 9, 1857.

William Walton died. His funeral took place on the following day "from his house, No. 326 Pearl-street."—N. Y. Etc. Post, Je 28, 1806.

The committee on the proposed survey of "the Island of 30
THE ICONOGRAPHY OF MANHATTAN ISLAND

July 21, 1806.

New York—(see Je 2) reports "that the obtaining a correct Map of this Island is a matter of very great importance to the public, and that the person associated with興 the answering of this request be- 4 mended as possessing the Talents requisite for making such survey and Map. The Committee therefore recommend that they be employed for three months beginning at such time in the ensuing month as may be agreeable to them and in such place or places and in such manner as may be directed by the Committee who will examine their Work and furnish them from time to time with such advice & directions as will render the same on the Score of accuracy & dispatch most to the advantage of the Corporation." The report also contains an estimate of expense beyond which it cannot go,—namely, $5 a day for Mr. Hassler's services, and $4 a day for his associate's, t hey to find their own instruments, and be allowed $1 a day for their subsistence. Allowance is also to be made for the employment of four chain-bearers and flagmen.—M. C. C. (1784-1815), IV: 238-39. A warrant for the payment of $80 to the chairman of the committee, James Fairlie, reimbursed him for advances made to Hassler & Co. for their visit to New York.—Ibid, IV: 239, 240. See Ja 14 and F 13, 1805; Ja 20, F 3, Je 2 and O 20, 1806; Ja 26, F 16, Mr 4 and Ap 3, 1807, et seq.

The common council orders "that the present occupants surrender the buildings taken to improve Canal Street by the 26th August next, and that the said buildings be sold at Auction and delivered to the purchasers on the 1 September and be removed from the premises on the 1 May."—M. C. C. (1784-1815), IV: 239. See Ag 25.

"Deklyne's Tavern," on Hammond St., Greenwich, is mention- 3 ed in an advertisement for the sale of adjoining lots.—Spec- ictor, Jul 2, 1806. In 1806, Deklyn had established a ferry from his wharf at Hammond St. (W. 11th St.) to New Jersey, known as "Greenwich Ferry."—L. M. R. K., III: 942.

3 The synagogue lot, after the last purchase was made, July 3, 1806, was an irregular oblong, 84.6 feet front on the present South William street line, and running through to a narrower front on the present Beaver street line. The second synagogue was built on the site of the 'first,' at the south-western corner of the plot, near the Mill street front and the Alexander line. It was in the form of an oblong like the original synagogue, but running east and west, while the synagogue of 1795 ran north and south, with an entrance on its western side. Entrance to the new building was at the western end, the door being close to the line of the lot. East of the synagogue on the Mill street front, at the present No. 18 South William street, was the parsonage. North of the synagogue was the woman's building, with a space between the two where the ceremonies of the Feast of Tabernacles were held. Bridging this space was a closed passageway affording access to the synagogue galleries from the second story of the woman's building. The woman's building and the parsonage, was the house occupied by the sexton. Back of this, at No. 42 Beaver street, at the point where the old line of Princess street took a deep jog to the south, was the home of Moses Seixas. The rest of the synagogue plot was an open court or yard through which the people passed and repassed to and from the synagogue. The Mill street front was closed by a high fence which extended beyond the synagogue to the parsonage yard and the public entrance to the lot was through Beaver street, then much narrower than at present. The present site of the entrance could be found by measuring out into Beaver street, opposite the line between numbers 38 and 40, a distance of fifteen feet. If the exact spot is sought where the synagogue of 1795 stood, it can be found by measuring westly along the north line of South William street from the southwest corner of the Peter Godet building, a distance of fifty feet. The old line of Mill street ran out into South William street here three or four feet, so that a stake driven at this point close to the line of the buildings at Nos. 22-24 South William street would stand within the quadrangle formed by the foundations of the synagogue and near its southeast corner.—Pubs., Am. Jewish Hist. Soc., III: 53-54.

4 In an advertisement, a "splendid fête," to be held at Vauxhall Garden, in the Bowery, is described. There is to be shown "an accurate representation of the Grand Procession Which was given by the Citizens of New-York in honor of the adoption of the Constitution; the whole executed in Paintings, the figures, horses, &c. &c. as large as life, and will move before the spectators by machinery, in the same order as in the original procession; the description and order taken from a gazette of the year 1788."—New York Press, Je 30, 1806. Reference is made in this announcement to "an account of the procession published by Messrs. Waite." This was a 6-cent pamphlet, first advertised on June 23 by G. & R. Waite, who kept a book-store and lottery office at No. 38 Maiden Lane.—Ibid, Je 23, 1806. It is unknown to Evans. See, further, Ag 6, 1806; Je 6, 1807.

The common council directs the comptroller to negotiate a loan from the Manhattan Co. for $10,000.00. M. C. C. (1784-1815), IV: 242. On Aug. 18, another of $10,000 was ordered.—Ibid, IV: 261. Again, on Sept. 1, a further loan of $15,000 was sought.—Ibid, IV: 265.

Manhattanville is "now forming in the Ninth Ward of this city, on the Bloomingdale road, in front of Haselen Cove on the North river." The Corporation of New York has "opened a road, or avenue, thro' the same from the North to the East river." The proprietors of the soil are now laying out the streets, which are to be wide and open, to the Hudson-river, where vessels of 200 tons may lie in safety. A handsome Academy has just been built on the main street."—Speculator, Mr 5, 1806; description of Fl. 172, III: 616. See also L. M. R. K., III: 987, and Commissioners' Map, Fl 79, Vol. I. Three maps, on file in the Bureau of topogra- phy, dept of public works, without date, but evidently of this period, show this locality. Map No. 171 shows "Manhattanville as surveyed and laid out by Adolphus Loss, and divided among the proprietors, sold and leased." Map No. 172 shows the new streets there; and Map No. 175 shows the streets and dimensions. Advertisements for the sale of property there were published in Feb. 4 and June 22, 1806. The legislature passed an act to settle the plan of Manhattanville.

Trinity vestry grants the petition of William Juaccey and others for "Aid towards building a Church at Bloomingdale." This aid is to be given "When the Church is completed."—Trin. Min. (MS). Reference is made here, doubtless, to St. Michael's P. E. Church, the corner-stone of which was laid on a lot of land, 150 feet front by 200 feet, just north of the spot, and east, in the rear of the Bloomingdale Road. The church was completed the following year, and consecrated on July 27, 1807—Annals of St. Michael's, § 1, 91 Greenwich, Hist. of the Churches, 74.

Napoleon establishes the Confederation of the Rhine.—Andor- 12 son, Constitutions and Documents, France, 1789-1807, 397-99. See Ag 6.

Watchmen, at this time, wore "caps" that were "painted and numbered."—M. C. C. (1784-1815), IV: 246.

By a vote of 11 to 4, the common council directs the market committee to assign free of charge to 14 Republican butchers, stalls in that part of the Fly Market called the Fish Market—M. C. C. (1784-1815), IV: 253. This favouritism caused much comment.—Des. Critic, Mr 12, 1806.

The market committee reports to the common council regarding 28 the order for butchers' stands in the Fish Market (see Je 21), "That they have deliberately Considered the nature of the duty enjoined on them (and with all due deference to the Judgment of this Board) do give it as their opinion that it would be improper and unjust to give away these stalls to any Individual whatsoever in any such an offer has been made for one of those middle Stalls at the rate of $120 Dollars per Annum and numbers of Butchers stand ready to give the same amount Yearly for the remainder of them (and more money if required) they are clearly of an opinion that a considerable revenue may be derived to the Corporation funds by Leasing the said Stalls for 1, 3, 5 or 7 Years to give away these Stalls in the manner Contemplated by the Resolution of last monday [Ja 21] will Certainly cause a very great Clamor and discontent by the Citizens (with an exception only of those who are immediately Interested therein) Besides they are further of an Opinion that there is no immediate necessity of such a measure going into Effect at this time for until the Slip is filled up settled and completed there will be evidently a want of Room for the Country People bringing into Market their Supplies of every kind, and a deficiency for the use of the Fishermen's Stalls &c." The board, thereupon, by a vote of ten to seven, resolves that execution of the order of July 21 be postponed until "proper accommodations are made for the Fish market." A motion to rescind the order is lost. The market committee is directed to present "at the next meeting a plan for a Fish Market to be erected at the East end of
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783–1812 1449

1806 Aug. 11.28

the present Fish market.”—M. G. C. (1784–1814), IV, 252-54.

See D. [The description of New York City is written by “a resident of Philadelphia”: it is, in part, as follows: “After tea, I walked through a part of the City, and fairly lost myself. It has, at least some parts of it, a very brilliant appearance in the evening, particularly Broadway. The shops are mostly open and very handsomely lighted, which gives them [sic] an air of great splendour. They appear to be in many instances walks here, at least they appear so at night. Opposite to my lodgings stand two houses which were built towards the conclusion of the Seventeenth Century, as I am informed by the iron dates annexed to the wall. They are certainly uncouth enough, and are built with the gable ends fronting the street; from that part of it where the roof commences, a man might descend through the wall to the several parts of the house, the reason having kindly built it so as to form steps of about ten inches in height. They were probably once thought handsome, but tastes are strangely altered, and the taste in which they were built was probably the taste of a Dutchman. [For types of Dutch houses in New York, see Man. Com. Conn. (1847), 346, 371; (1848), 284; (1852), 422, 443; (1853), 22, 378; (1858), 526; (1862), 541; (1866), 553.]

[The writer here describes the kilns and factories of stone-ware pottery on the East River.]

"I am still perplexed to find my way through the crooked streets of this city, nor do I think I could obtain a tolerable knowledge of them in a month. The houses appear to me to be huddled together without regularity, like trees in a forest; and when I think of I am traversing, I road I wish to frequently find myself in one which runs in a contrary direction.

.. [He describes an evening visit, by hackney-coach, to Vauxhall gardens; but refers to them again, infra.]

... I have not seen a waggon, car, or dray, since my arrival! Those things which I have seen most resembling carts, are built, lightly, like those of Philadelphia, without front, side, or tail boards. They have posts at the corners with two other pieces annexed to the front ones, running longitudinally, to support the load. I have seen something like a dray, except that it is shorter, lighter, and [the] tail of it is about one and a half, or two feet from the ground; these have likewise supporters at the corners, where they carry any thing that requires packing, as bottles, &c. It is done by placing a bed on the car. I have seen no teams of horses, nor covered waggons, like those frequently seen at Phila-delphia; and all the carmen wear long coarse linen frocks.

"... he that visits New York, during the summer season, will probably see many sweating beneath a wooden yoke of labour. These are the venders of milk: instead of awkwardly travelling along, with a heavy bucket of milk in each hand, and with pails which, I call a yoke, about two feet long, is made to fit around the back of the neck, and rest upon the shoulders. To each end is affixed a chain, with a hook at the end. This chain is of such length as to enable them, the carriers, by stooping a little, to hook the handles of two large milk vessels, made of tin, resembling a grocer's tea-canister; containing three or four gallons of milk. One of these is thus carried on each side, to the houses of their customers...

"There are no whares here where fire-wood is regularly landed for sale; nor is it lawful to land it. It must be carried from the vessel to the car, and from thence to the house of the purchaser. It is said to be very dear. Pumps, of a large size, with long, clumsy, wooden handles, are found in the middle of many of the streets. Their resistance to gradually taking place, and it is expected they will soon be succeeded by some less clumsy and unsightly; they do not, however, furnish the inhabitants with all the water they use, the greater part being let through the streets and into the houses from the water-works of the Manhattan Company.

"There are few or no gentel Taverns in this city; or, if there are, I have seen none. There are, indeed, many of a superior kind, such as the Phoenix and Tontine Coffee-houses, hotels, &c, and a great number of what Philadelphians would call 'Sailor's lodging-houses.' Some of the Coffee-houses are very large, and have a fine appearance; here, public sales of various articles of merchandise are frequently held.

"The yards of the houses of this city are not so large and commodious generally, as those of Philadelphia. ..

"Many of the whares are large and convenient, and have extensive ranges of excellent brick stores erected on them; many are very narrow, and inconvenient in the extremities, and make a poor appearance.

"I have visited New Federal Hall [the present city hall], or rather that part of it which is erected. When completed, it will be the largest and most elegant building I have seen. The lower story, or perhaps, more correctly speaking, the foundation, is built of a fine brown stone, which is brought from some part of New Jersey; what is called the back front of the edifice is of the same material...

"Old Federal Hall is not a building to my taste; it has an old, but, to me, not a venerable appearance. ..

Trinity Church, in Broadway, is a dark colored stone building, ornamented with a steeply pointed gable, and many arches and it; are of the Gothic kind, having pointed arches, and apparently leaden sashes, and small glasses, such as were sometime since to be found in old buildings in Philadelphia. [This was the second Trinity Church, preceding the present edifice.—See Pis. 54-5, 64-5, Vol. I.]

The Park is a handsome walk, but cannot be compared without disadvantage to the Centre Square at Philadelphia. It is, nevertheless, a very agreeable place, in which one may be sheltered from the noontide heats, and enjoy the cool breeze of evening. As it is situated at or near the intersection of several fine streets, and commands a view of several public buildings, these circumstances may make it, in the opinion of some, superior to the one above mentioned, yet, as a walk, or as a garden, it must certainly yield to it; it has also the additional misfortune of being unfaithful in the performances of its duties.

"Many of the houses of this City are large and elegant, particularly those in part of Greenwich-street, Broadway, and a few others. They are generally covered with slate, or tile of various colours; they mostly have the projecting eave and richly decorated mouldings, cornices, &c., which do contribute to give a building a grand and imposing appearance; like the houses of Philadelphia, they are built of various materials; the principal part are of bricks, few or none of marble; some white marble fascia and window heads in the Pennsylvania taste; these are few in number, and very many have no fascia at all, having the front wall plain, from the ground to the roof, which gives them a naked appearance; to me amusing, perhaps because I am unaccustomed to see them so.

"This morning I accompanied 'mine host' to the Fly-market, which is the principal one in this City... It consists of three separate ranges, in one continued line, commencing at Pearl-street and ending near East-river, the whole forming a line perhaps as long as one and the ranges so of the Philadelphia Hall and.. It generally resembles them also of wood; differing in particulars. The floors are of wood, which in wet weather makes them slippery and inconvenient. I do not find here that great plenty and variety of provisions in general, as at Philadelphia, nor are they quite so cheap. Fish, however, form an exception to this rule; they may be had in greater plenty, variety, and freshness...

"I expected to be enabled to give you a more correct account of Vauxhall-gardens [on the Astor property—see Jl 4], and, therefore, visited them in the day-time; but when I arrived, found the gate shut; nor could all the noise I was able to make, by beating against it, induce those on the inside to admit me. The players were rehearsing... [He describes the resort, nevertheless. The enclosed space is said to be "three acres." Admission to the "Summer Theatre," which stands "at the front of the grotto [whether on the Broadway or Bowery side is not stated], is 50 cents for Box, Pit, or Gallery "—those being "one and the same thing, for the spectators sit in the open air." See, further, Jl 6, 1807.]

"During my stay at New York, I visited the Shakespeare Gallery, opposite the Park, which contains a large number of principal scenes in Shakespeare... There are likewise some good paintings; a full length picture of the venerable Washington, a bust portrait of Mr. Jay, one of David Garrick, to be seen, and several others...—Man. Com. Conn. (1868), 838-40.

John Meish, a Scotchman who has traveled extensively, arrives at New York; the following are some of his remarks about the city: "I heard but little politics among those with whom I associated, but I observed a good deal in the newspapers, and two of
them were very coarse and scurrilous. They were on different sides of the political question, of course, and substituted abusive language and invective for information.

"Party politics is here, as well as in Britain, a noisy subject; and the question between the parties not being well defined it is difficult to understand it. From the best account of it which I could procure, the schism seems to have taken place about the time of the adoption of the federal constitution, which gave rise to very animated discussions in both parties; and those in favour of it were styled federalists and those opposed to it antifederalists. It now receives the approbation of the whole community, but the distinction of parties continues, under the names of federalists and democrats. They equally lay claim to the title of republicans, and are often styled federal republicans and democratic republicans. It was in vain that I looked for a satisfactory account of the matter in the New York papers which I had an opportunity of seeing; but I observed, in one of them, that the federalists were styled the disciples of Washington, and the democrats the supporters of Jefferson. I thought I would discover the difference in the declared opinions of these two eminent characters. I accordingly turned to general Washington's Farewell Address, and Mr. Jefferson's Inaugural Speech, but the sentiments inculcated in these two papers appeared to me to be precisely the same. The one recognizes popular government, and recommends union, obedience to the laws, religion and morality, and to keep party spirit within bounds. The other declares, that the will of the majority, legally expressed, is the law of the land; and recommends harmony and affection, with the free exercise of reason, of religion, and of the press. Preferring to act under these sentiments, it is somewhat singular to find those who should be a difference at all but, to use the words of one of the characters above alluded to, "every difference of opinion is not a difference of principle, and the political question may be considered as essentially different from what it is in Britain. In Britain, the question between whig and tory is, whether the controul power shall be vested in the people or in the crown. In America, it is whether it shall be vested in this or that set of men."

"On the 20th of August, I was introduced to that celebrated character, Thomas Paine. He was confined in New York by a?.. Unted States of America, in the years 1806 & 1807, and 1809, 1810, 1811; including an account of passages between America and Britain, and Travels through various parts of Great Britain, Ireland and Upper Canada, by John Melish. (Phila., 1812); I: 55-68. Melish returned to New York in 1810 (p. v., Je 30).

Francis II, by abdication as emperor, terminates the Holy Roman Empire because of the formation of the Confederation of the Rhine (see Jl 12).—Anderson, Constitutions and Documents, France, 1799-1807, 405-416.

The common council refers to the committee on wharves, slips, and piers a copy of a presentment of the grand jury "against the Fly Market Slip as a public nuisance."—M. C. (1784-1811), IV: 258. See Jl 27, 1807.

A survey of the harbour, bay, and Narrows of New York has been made, pursuant to an order of Gen. Dearborn, secretary of war, by Col. Jonathan Williams, of the corps of engineers, and a chart of the survey has been drawn by Capt. Alexander Macomb. It appears that the distance from the ferry at "Powle's" Hook to Governor's Island is 3,720 yds. The passage between Governor's Island and Long Island, sometimes called Buttermilk Channel, and within memory both narrow and shallow, is now 8 fathoms deep. The distance from Whitehall Slip to the wharf on Governor's Island is 390 yds.—Report, Ag 22, 1806, Citing Nat. Intel. 25

An assessment is levied for laying out and regulating Canal St.—M. C. (1784-1811), IV: 256, 426. This was rescinded May 18, 1807 (p. v.).

The Eve Post having made charges of favouritism, injustice, and fraud by reason of the grant of a water lot to comptroller Benj. Romaine, and partisans of the Federal party having made an attempt to create prejudice against the committee, the Am. Citizen publishes in full the comptroller's long report on the subject of the city's water rights, dated Feb. 17 (p. v.).—Am. Cit., Ag 26, 1806. It is the subject of extended editorial comment.—Ibid., Ag 27, 28, 1806. See D 15.

Probably on this day, John Swaine began to publish weekly the Brooklyn Republican. No issue of this paper has been located.—Brigham, A. A. S. Proc. (1917), 355-356. The Daily Advertiser was discontinued with the issue of this date. It was succeeded by The People's Friend (see S 1).—Brigham, A. A. S. Proc. (1917), 287. Cf. Early Newspapers, II: 417. See Ag 4, 1807.

The city makes five payments for ground in Canal St., aggregating 52,000$—M. C. (1784-1811), IV: 266.

The People's Friend & Daily Advertiser is established as a successor to The Daily Advertiser (see Ag 30).—Brigham, A. A. S. Proc. (1917), 479.

M. Delile, a noted savant who is visiting America, writes from New York to a correspondent in Paris: "I have the honour to send you a catalogue of the Botanic Garden at Elgin, one league distant from the city of New-York."—Hosack begins his establishment in 1807; he will soon have it in his power to transmit to you the fruits of it in return for the numerous contributions he has received from M. M. Fleuriot and Decfontaines, from the Botanic Garden of Paris.

"Independent of exotic plants, M. Hosack has collected in his garden, the greater part of the useful plants and trees which grow in the United States."—Columbia, N. 3, 1810.

The city's accounts, which until this time have been kept in pounds, shillings, and pence, are closed; and hereafter they are kept in dollars and cents.—Journals of the City Chamberlain, B: 342.

The common council orders that "the public lamps intended as beacons on the batteries, and at or near the ferries, and on the New and east rivers, be lighted every night."—M. C. (1784-1811), IV: 276.

The common council confirms an assessment for regulating Broadway from Prince to Great Jones Street, reported by the street com'r, and appoints a collector.—M. C. (1784-1811), IV: 265, 278.

The common council grants a request of the Humane Society that "their soup house may be supplied with Indian meal and potatoes at the expense of said Society by the Commissioners of the Alms house," and orders that these commissioners open an account with the society and supply it at the same rate they purchase for the almshouse.—M. C. (1784-1811), IV: 251. This society had its meeting-place in the old city hall.—Ibid., 261.

Napoleon defeats the Prussians and Saxons at Jena.—Sloane, Life of Napoleon Bonaparte, II: 429-34.

From the "Water Office 15 Upper Chamber-street," John Fellows, superintendent of the "Manhattan Water Works" issues this notice: "Every part of the city where the aqueduct extends, has an ample supply of water; if there is a deficiency in a single house, it is the fault of the lateral pipe, which it is the duty of the proprietor or occupant to repair, or give notice thereof to the Water Office. Both the steam engines have lately undergone a thorough repair, and a constant and full supply in future may be confidently depended on. The aqueducts in various parts of the city have been opened and the sediment collected, discharged. The water is now clear and good."—To prevent misunderstanding in future, "the regulations respecting the distribution of the water" are republished. These are practically the same as those printed on Nov. 17, 1799 (p. v.).—Am. Cit., O 15, 1806. See also ibid., Jl 11, 1807. See D 28, 1807.

The Corporation of Trinity Church has erected over the grave of Hamilton, in Trinity Church yard, a beautiful Monument of White Marble, composed of a Pyramid resting on an elevated base of pedestal, surrounded with four elegant urns, and rising to the height of about twelve feet. The following is the inscription: To the memory of Alexander Hamilton, The Corporation of Trinity Church has erected this Monument in testimony of their respect, for the patriot of incorruptible integrity, The Soldier of approved valor, The Statesman of consummate wisdom; whose virtues and talents will be admired By Grateful Posteriority Long after this marble shall have mouldered into dust. He died July 11, 1791. Gen. & Gen. Adm., O 16, 1806.

A project, devised by Archibald Robertson, for fortifying The Narrows, between Long Island and Staten Island, has been forwarded to Gen. Dearborn, the secretary of war. "The mode proposed is by a chain and boom, anchored at a salient angle between Signal Hill and the Shoal opposite Denise's: the chain to be defended by batteries and gun-boats."—Am. Citizen, O 18, 1806
1806. This plan, having received the favourable notice of Col. (Jonathan) Williams, was later submitted by Mayor De Witt Clinton, stating that sickness had prevented him from making a survey of this island pursuant to his engagement." The board orders that the city inspector inform him "that it is too late in the season to commence it at present."—M. C. C. (1784–1831), IV: 283; See J 2 and 30. See further, Ja 26, 1807.

2 The common council receives a communication from Mr. Hasbrouck, stating that sickness had prevented him from making a survey of this island pursuant to his engagement." The board orders that the city inspector inform him "that it is too late in the season to commence it at present."—M. C. C. (1784–1831), IV: 283; See J 2 and 30. See further, Ja 26, 1807.

21 N. Y. Exc. Post, N 20, 21, 1806. Valentine, writing in 1814, A.D., states, 'the establishment of a branch of the New York Coffee-House, has been favorably received by the public. It is a place of refreshment, where one may have a good cup of coffee, and a decent plate of victuals, at a reasonable price.'—N. Y. Exc. Post, N 20, 21, 1806. Valentine, writing in 1814, A.D., states, 'the establishment of a branch of the New York Coffee-House, has been favorably received by the public. It is a place of refreshment, where one may have a good cup of coffee, and a decent plate of victuals, at a reasonable price.'—N. Y. Exc. Post, N 20, 21, 1806.

22 The common council receives a communication from Mr. Hasbrouck, stating that sickness had prevented him from making a survey of this island pursuant to his engagement." The board orders that the city inspector inform him "that it is too late in the season to commence it at present."—M. C. C. (1784–1831), IV: 283; See J 2 and 30. See further, Ja 26, 1807.

23 The common council receives a communication from Mr. Hasbrouck, stating that sickness had prevented him from making a survey of this island pursuant to his engagement." The board orders that the city inspector inform him "that it is too late in the season to commence it at present."—M. C. C. (1784–1831), IV: 283; See J 2 and 30. See further, Ja 26, 1807.

24 The common council receives a communication from Mr. Hasbrouck, stating that sickness had prevented him from making a survey of this island pursuant to his engagement." The board orders that the city inspector inform him "that it is too late in the season to commence it at present."—M. C. C. (1784–1831), IV: 283; See J 2 and 30. See further, Ja 26, 1807.

25 The common council receives a communication from Mr. Hasbrouck, stating that sickness had prevented him from making a survey of this island pursuant to his engagement." The board orders that the city inspector inform him "that it is too late in the season to commence it at present."—M. C. C. (1784–1831), IV: 283; See J 2 and 30. See further, Ja 26, 1807.
1806

Dec.

the melancholy pleasure arising from an attempt to give permanent expression to their feelings. . . .

"The Monument is in the form of an obelisk, on a pedestal 4 feet square, and nearly 3 feet above the base. The obelisk itself is composed of four pieces of white marble, 8 feet in length and is surmounted by a flaming urn; the elevation of the whole structure fourteen, enclosed with a neat iron railing, the ground having been generously ceded to the St. Andrew's Society by Captain James Deas, one of its members [at Weehawken, on an eminence overlooking the river]. [See, however, Je 3, 1851]."

The site of the Monument commands a view of the city of New-York, and of the west side of the Island, and an extensive water prospect reaching from a point several miles above it in the North River, across the Bay, through the Narrows, to a point several miles below them. So that every inhabitant of the city, and every stranger who approaches our port, may see, at once, the Monument, and nearly forty feet above the city, and see the rest of the American country. What America has sustained in the death of her most distinguished citizen. The front of the Pedestal bears the following inscription: 'On this spot Fell, July 11, 1804, Major-General Alexander Hamilton. As an expression of their affectionate regard to his Memory, and of their deep regret for his loss, The St. Andrew's Society of the state of New-York, have erected This Monument.' On the Reverse: "Incurnpta Eides, undaque veritas, Quando ullem inverrentiorem? Multis ille quidem felibris occidit. Hor."

—N. Y. Gaz. & Gen. Ady., D 2, 1806. See also A. Pl. 20-3, Vol. III.

The common council resolves "that a large treble lamp be erected on the end of the Corporation pier lately built at the South end of the bar, and that the same lamp on the battery are."—M. C. C. (1784-1831), IV: 304.

The common council proposes to the churches that Dec. 25 be made a day of special thanksgiving and prayer, by reason of the city's "usual exemption," during the past season, "from the Epidemic disease, which has proved so distressing in former years, An exemption which has extended, in a remarkable degree, to the other cities and towns of the United States."—M. C. C. (1784-1831), IV: 308.

Jacob McKee reports to the common council "that his contract for the road [Horn's Hook ferry road] near Helligate is completed," and that $600 is due him thereon; referred to the road committee.—M. C. C. (1784-1831), IV: 310.

The common council orders "that Pitt Street upon the ground of the late Alderman Bayard be hereafter called and known by the name of Elm Street, so that Elm Street he continued and known by that name from Reed to Spring Streets." The board adopts an ordinance for regulating Elm St., and appoints assessors.—M. C. C. (1784-1831), IV: 311.

Elm St. (see L. M. R. E., III: 998-99) is now Lafayette St. [ibid., III: 1004].

The council recovers from the common council of Philadelphia a set of the laws of Pennsylvania, and authorises the city inspector "to purchase a complete edition of the laws of this State and transmit the same to the common council of Philadelphia."—M. C. C. (1784-1831), IV: 312.

The common council passes a resolution, the preamble of which avers: "Whereas the weak and defenceless Condition of the City and Port of New York and the Danger to which they must necessarily be exposed in case of an attack by an Enemy have Justly excited the most serious apprehension in the minds of the Citizens; and whereas it is the duty of the Common Council to cooperate with them in their Earnest Endeavours to obtain an adequate defence for this City and Port . . . on which most important national interests must depend; . . . Congress being by the Constitution vested with the power are charged with the duty of providing for the Common defence, . . ." The board therefore appoints a committee to prepare a memorial to congress "Soliciting that Effectual means may be provided without delay to afford them that Security and protection their peculiar Situation and their Importance to the Union Eminently require."—M. C. C. (1784-1831), IV: 317-18.

On March 29, the board adopted the petition, and ordered that it be transmitted to congress.—Ibid., IV: 326.

Benj. Romaine, the comptroller, is removed from office.—M. C. C. (1784-1831), IV: 319.

The board appoints a committee to enquire and report "by what means Richard Varick, Benjamin Romaine and Joshua Dec. Barker obtained Water Grants while trustees of the Corporate property of this City," and refers the report to the committee.—M. C. C. (1784-1831), IV: 320.

The common council requires that, hereafter, certain city officials shall give the following security before entering upon their duties: the comptroller, the sum of $10,000; the street com'rs, $4,000; supt. of the almshouse, $10,000; supt. of public repairs, $2,000.—M. C. C. (1784-1831), IV: 318.

The common council refers to the canal committee a petition of John Jay and others "relative to raising the grounds near the Collect."—M. C. C. (1784-1831), IV: 315.

The common council amends the law for the regulation of the city prison and bridewell by a new provision which requires that "there shall be two Turnkeys or Deputy Keepers," for their "better and safe keeping."—M. C. C. (1784-1831), III: 316.

John Pintard, the city inspector, reports his opinion to the common council that "it would essentially conduce to the dispatch of Business and Especially to the Correctness of the work if the Job printing of the Public Offices under the Corporation were Executed by Book Printers, whose materials are generally more Suitable and whose time and attention are less Subject to interruption and delay than can possibly be the case with the Printers of daily News papers." The board of Aldermen, orders that it lie on the table.—M. C. C. (1784-1831), IV: 317.

The common council rescinds its resolution of July 21 (p.c.) granting stands in the Fish Market to 14 butchers, and resolves that "a number of Butchers be removed from the upper to the lower [Fly] market and that in future all Poultry, Small meats etc. be sold in the upper market near Pearl Street. That all stands erected in the lower market and other good situations pay a yearly rent and that a Sufficient Fish Market be built close by the water."—M. C. C. (1784-1831), IV: 313, 318-19.

From the committee's report of this date, on Miss Vaillant's petition for "further compensation for embroidering the two stands of colours presented by the Corporation to the Brigade of Artillery" (see N 245), it appears that $400 has already been paid to Mr. M. for work done, and also for "drafting the designs or patterns," also that Geo. Morton advanced $18 "towards the purchasing silk for the Standards" (which remains unpaid). The committee recommends, and the board approves, that $50 be allowed to Gen. Morton, with request that he pay the surplus of $21 to Miss Vaillant in full satisfaction of her claim.—From original report (MS.), in metal file No. 27, city clerk's record-room.

A riot occurs on this Christmas night in Augustus St. Two 25 watchmen are killed, and two companies are ordered out to restore order.—Conn. Courant (Hartford), D 31, 1806.

The common council appoints a committee "to report upon the propriety of appropriating public Ground for the purpose of Erecting a building to Cover a Park of Heavy Artillery to be placed hereabout and also to receive from the common council of Philadelphia a set of the laws of Pennsylvania, and authorises the city inspector "to purchase a complete edition of the laws of this State and transmit the same to the Common Council of Philadelphia."—M. C. C. (1784-1831), IV: 312.

The common council passes a resolution, the preamble of which avers: "Whereas the weak and defenceless Condition of the City and Port of New York and the Danger to which they must necessarily be exposed in case of an attack by an Enemy have Justly excited the most serious apprehension in the minds of the Citizens; and whereas it is the duty of the Common Council to cooperate with them in their Earnest Endeavours to obtain an adequate defence for this City and Port . . . on which most important national interests must depend, . . . Congress being by the Constitution vested with the power are charged with the duty of providing for the Common defence, . . ." The board therefore appoints a committee to prepare a memorial to congress "Soliciting that Effectual means may be provided without delay to afford them that Security and protection their peculiar Situation and their Importance to the Union Eminently require."—M. C. C. (1784-1831), IV: 317-18.

On March 29, the board adopted the petition, and ordered that it be transmitted to congress.—Ibid., IV: 326.

Benj. Romaine, the comptroller, is removed from office.—M. C. C. (1784-1831), IV: 319.

The board appoints a committee to enquire and report "by
large proportions. Lottery offices might aptly be compared to the stock brokerage houses of the present day. Managers had adopted the method of appointing agents in bulk to the lottery offices."—Ross, "The History of Lotteries in New York," in Mag. of Hist., 19, 220.

In this year, John Griscom, LL.D., opened a private school for boys and girls at 172 Pearl St., next to the Friends meeting-house, and received a salary of $2,250 for the first year, from five friends whose children he undertook to educate under his care. The following year he leased a lot on Little Green St.—a portion of the graveyard attached to the Friends meeting-house in Liberty St.; and, after the bodies were removed, he erected a substantial brick building, 30 by 40 feet, two stories high, with an arched ceiling and a small observatory on top. This served for both school and lecture-hall.—Memorials of John Griscom, by John H. Griscom (1859). The house of refuge, the Bank for Savings, etc., were due largely to John Griscom.

The Reformed Protestant Dutch Church in Garden St. (on the site of No. 41-51 Exchange Pl.), called since 1731 the South Church, is taken down (not burned, as stated in Corwin's Manual, 1903, p. 996).—De Witt's Discourse, 44. It was at once rebuilt. The new church was a stone building, 66 & 50 ft. —Greenleaf, Hist. of Churches of N. Y., 23; Hist. Sketch of the South Church (1789), was formed.—Chas. S. Clark, in Daily Post, F, 26, 1816.

Assessment was made for regulating Spring St.—Index to Assessment Roll, Vol. I (in comptroller's office).

By this year, the books of the Society Library, largely acquired by purchase since 1784, numbered 10,000 volumes.—Picture of N. T. (1807), 147-44.

A summary of city hall records for 1807 is as follows: On Jan. 5, 1807, in response to a communication from McClumb, the common council ordered that an account of $2,000 be made to Johnson & Stevens on their contract for marble, on their giving security.—M. C. C. (1784-1831), IV: 328.

On March 9, the common council "Resolved that the building Committee progress with building the New City Hall," and that the sum of $50,000 be appropriated for that purpose—ibid., IV: 375. Appointments from these annual appropriations, at the beginning of each year, that warrants were subsequently issued during the year in favour of the building committee.

McClumb's record-book, entitled Orders for Marble (now in N. Y. Hist. Soc.), closes with an entry of July 10, 1807, showing a total, in orders for marble since Nov. 3, 1803, of 32,039¹⁰, and in deliveries, 33,274¹⁰. His financial account with Johnson & Stevens shows payments for the marble delivered, at $1.66 per foot, amounting to $15,275.31.

By Nov. 25, 1807, the walls were up to the sills of the second storey windows.—McClumb's Diary. On Dec. 1, the building committee (appointed Dec. 8, 1806) reported that the hall had been under way for about four years and a half and had cost $207,000, the annual expense being about $37,500 for the last two years.—M. C. C. (1784-1831), IV: 647-48.

The warrants issued by the common council during 1807 in favour of the building committee were: Ja 5, $1,000; Ja 19, $500; F 9, $1,000; F 18, $1,000; Mr 9, $1,000; Ap 6, $1,000 (on marble contract); Ap 6, $1,000; My 11, $5,000; My 18, $5,000; Je 25, $5,000; Ji 20, $5,000; Aug 17, $5,000; S 24, $1,000; O 5, $1,000; O 12, $1,700; N 9, $5,000; N 16, $5,000; D 1, $7,842.99; D 14, $1,000; total, $37,042.99.—Ibid., IV: 334, 341, 351, 376, 382, 394, 414, 432, 486, 502, 539, 552, 560, 561, 576, 586, 594, 617, 616, 653, 672.

The committee appointed on Dec. 29 (p. 7) reports to the common council "respecting the Cession of ground to the General Government for a Building to Cover a Park of Heavy Artillery," the substance of which is as follows: A communication from the secretary of war to the mayor had been referred to this committee expressing the desire of the War Department to erect a suitable and convenient building thereon, and the cost to be $45,000. The committee referred to the War Department the proposition of permitting a suitable site for a building to cover a Heavy Park of Artillery mounted on travelling Carriages; also certain parts of the intended projection of the Battery for the purpose of Constructing Batteries thereon for the protection of the City, and also a suitable site on each side of the northern part of the City for Erecting large wharves on which Batteries can be built for annoyance of any Vessels of War that may pass the other Batteries & attempt to cannonade the City." The committee recommends the adoption of the following resolution:

"Resolved that this Board will cheerfully appropriate and make over to the United States so much ground in a Central part of the City formerly the Collect [now filled in] and now marked A for Erecting sloops; but there may be necessary for buildings to Cover a Heavy Park of Artillery together with all the Carriages and apparatus suitable for the same, or if the Secretary of War shall prefer a place more distant from the populous part of the City for that purpose that he may be at liberty to Select a sufficient quantity of ground at the Old Potters Field [see L. M. R. K., III: 924] about three miles from the City and also so much of the intended projection of the Battery being ground at present under Water & marked B as shall in the judgment of an Engineer to be appointed on the part of the United States be proper for works of defence to the whole extent of the Corporation right viz about four hundred feet into the water;"—Also a suitable Site for Erecting a Battery & wharf on the North River near Rhindalver & marked C including as much Land & ground under water as shall be necessary for those objects,—all this being "on condition that the necessary measures be forthwith taken & continued on the part of the United States for carrying the contemplated Objects of fortifications & defence into complete Effect." Finally, "Resolved that the Mayor be requested to transmit without delay a Copy of the preceding report & resolutions to the Secretary of War." The report is signed by Nicholas Fish, chairman; W. Van Zandt, Jr., and J. D. Miller. It is confirmed by the common council.—M. C. C. (1784-1831), IV: 331-32. See Ji 13.

The common council directs the street commissioner and comptroller "to report the most Economical way of filling in the Collect."—M. C. C. (1784-1831), IV: 332.

Jacob Frank & Co, establish a daily paper called The Public Advertiser. Some time during the month they started a tri-weekly edition called the New York Aurora. In 1809 (p. 7, Je 10), the Aurora was succeeded by The New York Journal.—Brigham, A. A. S. Proc. (1917), 539-83, 483; Early Newspapers, II: 427.

Great Britain issues orders in council declaring all neutral ships entering at French ports to be treated as British & their owners & heirs, or firmware are excluded from participation in the prize courts.—Anderson, Const. & Civi., 387-89; Annals of N. Am., 500. The orders were issued because of Napoleon's Berlin decree (see N 21, 1806).
belonging thereto in the possession and under the direction of the Jan.
Corporation of this City," they "learnt with great pleasure the en-
26 deavours which were made by your Honorable body at the last
session of the Legislature to procure those grounds from the state
—Your Memorialists beg leave respectfully to call your attention
at this time to the subject and confiding in your zeal for the public
good they trust you will at the ensuing session of the Legislature
again use your exertions to accomplish an object in which the
Health, comfort, and convenience of your citizens and this place
so uninterestedly concerned, and your Memorialists would farther sug-
gest the propriety of your having a survey taken of the said prop-
erty to accompany your application to the Legislature for the infor-
mation of the country members." The petition bears 84 signatures
among which are those of Archibald Gracie, Robert Morris, Jr.,
Peter R. Livingston, and other prominent New Yorkers.
The memorial is referred to a committee—Hon. Van Dorn adopts a petition and the draft of a bill,
to be presented to the legislature, permitting the city to pay an
annual salary of not less than $5,000 the mayor instead of fees,
etc. as formerly (see F. 9); and that all the "Wages Rewards fees
perquisites and Profits" now "claimed required demanded Accepted
taken held and enjoyed" by the mayor may be collected by him
and paid into the city treasury.—M. C. C. (1784-
1831), IV: 335-34.

Aaron Burr is arrested on a charge of treason, having arranged
with Blennerhasset and others for an invasion of Mexico, the
detachment of the western and southern states from the union, and
the formation of an independent western empire. Burr was tried
during the summer and autumn, but was acquitted.—McMaster,
Hist. of People of U. S., II: 118-38.

Phillip Milledoler and Bartholomew Ward are authorized by
the legislature to build a free bridge from the land of the former
in Harlem, across the Harlem River, to Great Barn Island (Wards
Island), lying in the river and belonging to Ward.—Laws of N. Y.,
(1807), chap. 14. Such bridge was erected.—See advertisement,
for sale of land on this island, in the Pub. Advs., 2, 1808.

The sale of 24 Trinity Church lots is announced to take place
at auction, at the Tontine Coffee House, on March 3. They are
"on the west side of Greenwich St., beginning at the south corner
of Gen. Jacob Morton's board fences, and adjoining the lots lately
sold to John J. Astor, Esq., North of the same and through Mr.
Morton's ground to high-water mark." The announcement states
that "The city corporation having altered the present range of
Greenwich-street, by giving it a more easterly direction, beginning
at the last brick house on the east side of Greenwich-street, through
Williamson's Nursery, in a direct line, passing the East front of
Mr. Bayard's house, near three miles in length, and 66 feet wide,
makes the situation of these lots particularly interesting."—N. Y.

Samuel Latham Mitchell presents to the senate a petition of
the inhabitants of New York City "stating the exposed and
defenceless situation of their city, and praying that their harbor
may be placed in a state of permanent and adequate defence.
This is referred to a committee.—Annals of Cong., 9th cong.
and sess., 89.

The state gives $4,000 to the Free School Society (see F. 29
1807) for building a school-house, and $1,000 annually to promote
its purposes.—Laws of N. Y. (1807), chap. 20. See Mr 4 and Ap
12.

John Stevens presents a petition to the state senate "stating
that he has invented a plan of floating bridges over waters which
do not admit of structures upon foundations resting upon the earth,
which bridges could not be influenced by the agitation of waters,
and praying that the legislature may grant him such encourage-
ment and assistance as he may appear to deserve." This is referred
to a committee.—Senate Jour., 30th sess., 62, 75. For the com-
mittee's report, see Mr 6.

Congress prohibits the slave-trade after Jan. 1, 1808.—Laws of Mar.
U. S., 9th cong. chap. 67. See also Winsor, VII: 292, 325. See 2
D. P. A. 1

John M. Lean, commissioner of military stores, writes to Andrew
Mc Cord, speaker of the assembly: "I understand there is a peti-
tion to your honorable body by the corporation of New-York,
relative to the purchasing from the state the government house and
ordnance yard, contiguous thereto [see F 13]. I deem it my duty
to inform your honorable body, of the situation of that part of the

and in particular to promote the health of the City." Any regula-
tion which the mayor, aldermen, and commonalty might adopt,
it is begged, might "be disregarded or annulled by their suc-
cessors." It is explained that "The diversity of sentiments and
opinions which has heretofore existed and probably will always
exist among the members of the Common Council, the incessant
remonstrances of proprietors against plans however well devised
or beneficial, wherein their individual interests do not concur,
and the possibility of completing those plans but by a tedious and
expensive course or law, are obstacles of a serious and perplexing
nature. . . . As these evils are continually accumulating by
means of our increasing population, and the rise of frequent sub-
divisions of property, your Memorialists find it necessary to appeal
to the wisdom of the Legislature, for relief."—M. C. C. (1784-
1831), IV: 335-34.
said property lying between the government house and ordinance yard, which was, in 1806, appraised to law, for the term of seven years, the duration of said term are yet unexpired from the first day of May next; this property was leased to James W. Lent and Burton Rayon. On the said premises are three public stores, in which are deposited carriages for garrisons and field, and implements, cannon, &c. there is also in the ordinance yard all the heavy artillery, which was removed from the different garrisons, besides a large quantity of shot and shell, supposed to be, in the lowest estimate, about nine hundred tons.—The removal of these would be attended with a great expense, besides the expense of procuring another deposit for them. If, however, the petition extends to the purchasing the government house and land only, as far as the line to James W. Lent's building, there will be no inconvenience arise to the public property. I would further inform your honorable body, that there is a great deal of necessary and of public utility in the vicinity of the magazine, and others about the suburbs of the city, requesting the removal of the said magazine from the present place, as that part of the city on which it now stands, is encroaching and thereby becoming dangerous, by having so much powder deposited therein."—*Assemb. Jour.*, 30th sess., 282. See Mr 13.

Congress makes a further appropriation of $150,000 (see Ap 21, 1826) for fortifying the harbours of the United States.—*Laws of U. S., 9th cong., chap. 82.*

The common council directs the recorder to "instruct" the corporation counsel, now in Albany, to recommend the following persons to the council of appointment: Simeon De Witt, Gouverneur Morris, and John Rutherford, "as fit and proper persons to be appointed from the Board of Streets of the City of New York," should the bill "Relative to improvements touching the laying out Streets and Roads in the City of New York," as petitioned for by this board (see F 16) become a law.—M. C. C. (1784-1811), IV: 368. See Ap 3.

The common council adopts the draft of a petition to the legislature which recites that the board has received various representations regarding the exposed and dangerous Situation of the Powder Magazine belonging to the City near the fresh Water Pond in the Ninth Ward," where "the Powder belonging to the State is kept." The members, having "assented to the keeping of the public Stores therein," do not think themselves "authorized to remove the same without the Concurrence of the Legislature."

The situation of this "magnificent" was not improper, . . . when it was first established [see 1728], yet at present it is surrounded on all sides by Inhabitants at short distances. In "Seasons of general Sickness great numbers of the Poor are quartered near it by the City Corporation." When improvements are being made in that part of the city, necessitating "the blowing of Rocks," the magazine is endangered. "Causes of Alarm will probably increase with the improvements" made against the public Stores. The common council therefore asks "that the Legislature will be pleased to cause a Building to be provided for the keeping of the Powder belonging to the State in the Vicinity of Spuyten Duyvel or in some other place less dangerous to the public and more secure for the Military Stores . . . .", and "that the said Powder may be removed to such other place."—M. C. C. (1784-1811), IV: 364. See also L. M. R. K. (5): 943. See, further, Ap 3.

The common council approves the draft of a petition to be sent to the legislature for the suppression of offices "for the Insurance of Lottery Tickets." It recites the following facts: "Many persons are thereby induced to venture small Sums in consideration of the large Amount to be returned in proportion without considering that the chances allowing for the disparity of nearly twenty five per Cent in favor of the Insurer. Success or ill fortune lead to the same consequences, the former increases the desire of gain, and lessens the appreciation of loss, the former [latter] incites to a continuation of the adventure, by the Anxiety to retrieve what has been lost a spirit of gambling is thus introduced in the Community and operates most on that part of it who have the least chance to lose."

"The pernicious influence of these offices is extended even to Children, whose morals are thereby corrupted in the very bud, as well by the example of those more advanced in years, as by the facility with which they find the means of participating in the practice."

"At these Offices are to be found not only labouring poor, but even Mendicants, children and Servants who do not scruple to make a Crime the Instrument to enable them to become Adventurers."

"Whatever Motives of policy may justify the resort to Lotteries for supplies Your Memorialists believe that in their most unexceptionable form they produce Evils and your Honorable body will see how far those Evils must be increased by the means of the insurance System."

The petition further recites the fact that these conditions were regulated by the "Grand Improviser" at the "Court of 35 Grand and Terminus;" and asks that the legislature will correct the evil. A copy of the grand jury presentment is added to the petition.—M. C. C. (1784-1811), IV: 368-70. The law was passed by the legislature on April 7.—*Ibid.*, IV: 64.

The committee on "Grant of Lands," appointed February 16 reports as follows: "That . . . it appears that by a Law of the State certain Officers of the Government are the "Court of 35 Grand and Terminers of the Land Office to make Grants of the Land under the Waters of navigable Rivers. It is also stated that the Legislature have since that Law was pass'd, by Grant authorized the Corporation to extend Wharves into the East River beyond the Line of the old Water Grant. Whether a gratuitous Grant is expected now or a Grant upon Valuable Consideration or what will be expected by the Legislature or the Commissioners of the Land Office in case of an Application to either or both is a matter upon which your Committee have not had the Opinion of any gentleman and consider the whole Subject as a matter of great importance to the City. . . ." The common council refers the report to the same committee to draft and report a memorial to the legislature.—M. C. (6): 137-8. See Mr 9.

The common council votes to the trustees of the free school (see F 19, 1805, and 1806), the sum of $500 and the use of the workshop on Broadway. The trustees prefer this arrangement to the gift of the piece of ground between the health-office and workshop, which was offered on Feb. 2.—M. C. C. (1784-1811), IV: 357-58, 563, 570; see also IV: 394-99. The petition of the trustees for an Exercise Lotteries report (ML) in N. Y. P. L. The school opened on May 1 (p. v.)

The committee on the petition of John Stevens (see F 28) reports as follows: "That they have conversed with the petitioner, who has shewn them the model of his proposed bridges, explaining the principles by which they are supported, which in the opinion of the committee, may be applied to purposes highly beneficial to the public; that the petitioner is desirous of an act of incorporation to enable him and his associates to erect a floating bridge across the Hudson River from New-York to the opposite shore, and also one from the said city across the East River or Sound to Long Island, with drawbridges for vessels to pass; but as this project involves considerations of the highest importance, and as objections have been made against the propriety of the same, the committee are of opinion, that the further consideration of the said petition be postponed; but that if the said petitioner shall deem it expedient to prefer a petition to the legislature at their next session, for an incorporation for the purpose of erecting the said bridges, it will be proper for him to publish in three of the newspapers printed in the city of New York . . . . and two of the newspapers printed in the city of Albany . . . . a copy of such petition and this report, for two months next preceding the second Tuesday of the next meeting of the legislature." The report is approved.—*Senate Jour.*, 30th sess., 75. See D 5.

The committee of March 4 (p. v.) on a desired grant of land to the holders of the lottery reports, and the common council approves the draft of a petition to the legislature, which recites the following facts: "That for the purpose of enabling the Corporation of the City of New York from time to time to improve the Docks, Wharves, Keys and Slips, to be erected, or made, in & upon or contiguous to the Margin of the said City, or Manhattans Island, and to render said Improvements more uniform and convenient, and the Use of them more equal and beneficial to the Citizens and to the Public in general, and for the better accommodation of Trade & Commerce . . . . Your Petitioners pray that a Grant may be made to the Mayor, Aldermen and Commonalty of the City of New York, of the Lands covered with Water, of the perpendicular breadth & to comprehend four hundred Feet, along the Easterly Shore of the North or Hudson River, contiguous to and adjoining the Lands of the said Mayor Aldermen and Commonalty at and from Low
1807 Water Mark into the said River, from Bestavlers Killette, or rivulet, to Spyt den Duyvel Creek—And the Lands covered with Water and a perpendicular breadth and to comprehend four hundred feet along the Westerly Shore of the East River or Sound contiguous to and adjoining the Lands of the said Mayor Aldermen and Commonalty, at and from Low Water Mark, into the said River or Sound, from the North Side of Corlies Hook, at the Northerly boundary of the Lands covered with Water, Whereof the said Mayor Aldermen & Commonalty are now seized, and warrant, den Duyvel Creek aforesaid, and one fourth part in breadth of the Land covered with Water by said Creek, adjoining the Lands of the said Mayor Aldermen and Commonalty, the whole length of the same Creek, from the East River or Sound aforesaid, to the North or Hudsons River aforesaid. . . .—**M. C. G.** (1784-1831), IV: 379-81. A law authorising the grant was passed by the legislature on April 3, —Gerard, *City Water Rights, Streets, and Real Estate*, 77.**

The street commissioner reports an ordinance for filling Beek- man Slip; confirmed.—**M. C. G.** (1784-1831), IV: 374. In 1817, a pier was built at Beekman's Slip.—**Ibid.,** VI: 593. On modern maps, the old Beekman's Slip is entirely covered by Fulton St., from Pearl St. to the East River. Beekman Slip still exists. See Jl 16, 1793, Jl 7, 1772; L. M. R. K., III: 988, Pl. 174.

The common council orders that Wm. Bridges be paid his bill for $100 "on acct of the Survey of Canal Street."—**M. C. G.** (1784-1831), IV: 376.

An advertisement, addressed "To Gentlemen Sportsmen of New York," announces a fox-hunt which will occur at Bloomingdale on March 17, in which it is expected, "eighteen couple" of hounds will be engaged. John S. Taylor of that place has a "large full grown Wild Fox for the chase."—**Merc. Adv., Mr 12, 1807.**

An assembly committee on the government house (see Ja 26) reports to the assembly that it would be for the public interest "to dispose of the land prayed for and the government house thereon to the corporation of the city of New York for a sum not less than sixty thousand dollars, restricting in the sale thereof the said corporation to the application of said premises to public purposes only, and that the money arising from the sale of the same ought to be applied towards establishing a manufactory of small arms in this state for the use of the militia." In accordance with this report a bill "for granting and conveying certain public lands in the city of New-York to the mayor, aldermen and commonalty of the said city" is introduced, read twice, and referred to a committee of the whole house.—**Assem. Jour., 30th sess.,** 78, 93, 120. On March 26, the bill was ordered to be engrossed, but on the 27th it was recommitted. On March 27, also, the assembly received John M'Lean's letter of March 2 (p. 9) on the subject, and referred it to the committee of the whole. Thereafter, during the session, there is no reference to the bill.—**Ibid.,** 30th sess., 280, 281, 282. See Mr 14, 1808.

Marquis Willett takes the oaths as mayor of New York, succeeding De Witt Clinton (see O 29, 1807).—**M. C. G.** (1784-1831), IV: 376-77. Willett held the office for only one year (see F 22, 1808).

The common council appoints a committee to report "their Opinions with regard to the Propriety of disposing of the Dove Lotts & of a Plan therefore."—**M. C. G.** (1784-1831), IV: 381. See Mr 30.

The common council passes a resolution "that while this Board is transacting business no smoking be permitted." The vote stood eight to six.—**M. C. G.** (1784-1831), IV: 381.

An argument in favour of gun-boats, for the defence of New York, is published, in reply to the representatives debating the subject in congress.—**N. Y. *Ext. Post*, Mr 19, 1807. The proposal was made as early as July 24, 1798 (p. 8).**

By an act of the legislature, the governor, the lieutenant-governor, the chancellor, the chief-justice of the supreme court, and the mayor of New York City, are appointed commissioners with power to vest in the U. S. for fortifications such land on Staten and Long Islands as they shall judge the safety and defence of the city and port of New York to require."—**Laws of N. Y.** (1807), Mar chap. 51.

Mr. Fulton, writing from Philadelphia to Secretary of War Dearborn, says: "I have now Ship Builders, Blacksmiths and Carpenters occupied at New York in building and executing the machinery of my Steam Boat, And I must return to that City in ten days to direct the work till finished, which probably will require 4 months. . . . Like every enthusiast I have no doubt of success. I therefore work with ardor, and when adjusting the parts of the machine, I cannot leave the men for a day. I am also preparing the engines for the experiment of blowing up a Vessel in the harbour of New York this Spring. The machines for this purpose are in great forwardness and I hope to convince the rational part of the inhabitants of our cities, that vessels of War shall never enter our harbours or approach our Coast but by our consent. . . ."—Sutcliffe, Robert Fulton and the "Glenarm," 228-9. The original letter was sold with other Fulton MSS. and document at Anderson's, April 26-27, 1921, by order of Mrs. Sutcliffe. The torpedo experiments took place on July 20 (p. v.); the steamboat was tried out on Aug. 9 (p. v.).

The following abstract of the *Laws & Ordinances* relating to signs and incumbrances is published by the street com'r; probably as a result of the common council's decreeing on March 9 (M. C. G., 1784-1831, IV: 370) that it would be "rigorously enforced";

"No cellar light is to extend more than one fifteenth part of the width of the street."

"No canopy, awning, shed, porch, portico, cellar door, platform, stoop or step is to extend more than one tenth part of the width of the street."

"No shop or platform is to be placed or suffered to remain in the street, except for the mere purpose of a passage into the house; and those are to have open backs or railings.

"No post is to be erected in any street.

"No cart or wheel-barrow is to be driven or wheeled along the walls.

"No wood is to be sawed, nor any coal or other thing piled on the walk.

"No goods, wares or merchandise are to be hung or placed a greater distance in the street than sixteen inches.

"No window or sign is to project more than one foot into the street.

"No carriages, timber, boards, casks, goods, wares, merchandise, or other thing, are to encumber the street or walk for more than one hour.

"No building is to be erected fronting a street, unless the lot is first surveyed.

"The inattention heretofore paid to the laws and ordinances of the Corporation, respecting incumbrances and encroachments on the streets, renders it necessary to inform the public that, after the fifteenth day of this month, penalties for the non-observance of them will be rigorously inflicted, without respect of persons."—**N. Y. Gen. & Gen. Adv.,** Mr 20, 1807.

It is expected that the number of new buildings erected this year will exceed those erected annually during the last few years.

Considerable preparations are making, especially in the suburbs, for private buildings. Three new churches will likewise be commenced, a Dutch church on the site of the Old Dutch church in Garden-street [see 1807]; a Presbyterian church in Cedar-street; and a Roman Catholic church on a site reserved for the purpose in their burial ground at the corner of Prince and Mulberry streets, on Bayard's ground. The New City Hall will also be elevated to the base of the second story windows. All these buildings, public and private, together with various other improvements, such as constructing wharves, paving and repairing streets, &c., &c. will not only afford ample employment to mechanics of every class, and to industrious labourers in this city, but create an extensive demand for building materials, and circulate large sums of money throughout the community."—*People's Friend*, Mr 21, 1807.

A new assessment for the opening of Broadway from Art St. to the Bowery (above the 14th St.), is presented to the common council by the street com'. The board orders that it be published in the newspapers and by handbills put up in the neighbourhood.—**M. C. G.** (1784-1831), IV: 384; **N. Y. Ext. Post**, Mr 28, 1807.

The ship "Galloway," of about 350 tons burden, and considered "by scientific men" to be "the handsomest modelled ship ever built in this country," is launched from the yard of Christian
The committee are further of Opinion that the Lots thus laid out should be sold at Public Auction . . . in see Simple . . . the Sale to take place on the Eighth day of April next . . . at the Tontine Coffee house, and subject to certain conditions as to the erection of buildings on the lots, etc. The common council confirms the report and orders that a reservation of 15 feet square shall remain for the use of lots of City Church and Academy, and 15 feet for a carway, back of lot No. 15, leading from the street to lot No. 17. —M. C. C. (1784–1831), IV: 388–89.

The description in the sales advertisement in The People's Friend, Apr 3, 1807. See also Je 29.

The common council asks the corporation council to deliver an opinion as to "whether . . . the Ground called Stuyvesant Street is or is not a public Street." —M. C. C. (1784–1831), IV: 391. See Ap 15.

The city inspector reports that it is unnecessary to employ any one "to take care of the Park," and the common council agrees. —M. C. C. (1784–1831), IV: 391. See, however, Je 8.

Commissioners are appointed by the legislature to lay out streets and avenues throughout the upper part of the island. —Laws of N. Y. (1807), chap. 95. Previous legislation leading to the drafting of the plan on which the modern city of New York has been built (pl. 79, Vol. 1) began with the following acts of the legislature: Laws of N. Y. (1787), chaps. 61 and 88; ibid. (1795), chap. 42; ibid. (1795), chap. 89; ibid. (1801), chap. 129. These gave full powers to lay out and regulate the buildings, streets, wharves, and slips of the city. On Jan. 14, 1805 (q.v.), the corporation made an estimate of the expense of making a map of the Island of New York, exhibiting a distinct view of the real property belonging to the Corporation, and of its roads; and on Feb. 13, 1805 (q.v.), this commissioner, with one or more of the city surveyors, was directed "to ascertain from time to time, by actual survey or otherwise, the true angles and corners of the several streets of this City, and their relative positions to adjacent buildings known to be correctly situated, and to report to the Board, with a map, plan, diagram or description of the same, which, being agreed to by this Board, shall be entered as matter of record for the general government of the surveyors and inhabitants of the City." In conformity with this need, the board resolved, on June 30, 1806 (q.v.), to employ Mr. Hasler to make a survey and "Map of this island." Although Mr. Hasler undertook the employment, he was prevented by sickness from carrying it out (see O 20, 1806).

The difficulties which the city and private owners still found in conveying their land in conformity with any definite regulation of streets were expressed in a memorial to the legislature, recorded in the minutes of Feb. 16, 1807 (q.v.).

The plan was obtained with the passage of the act of April 3, 1807, "relative to Improvements, touching the laying out of Streets and Roads in the City of New York, and for other purposes." —Laws of N. Y. (1807), chap. 95. See also Bridges' book accompanying his map (1811). This act appoints three commissioners, Governor Morris, Simon De Witt (the surveyor-general), and John Rutherford, whose duty and powers should be, in the course of four years, to lay out "the leading streets and great avenues, of a width not less than 60 feet, and in general to lay out said streets, roads and public squares of such ample width as they may deem sufficient to secure a free and abundant circulation of air among said streets and public squares when the same shall be built upon." These streets, avenues, and squares were to be laid out within the part of the city "North of a line commencing at George Clinton's wharf on the Hudson River, thence through the Fishway road, Greenwich and, Art Street; thence through North street in its then direction to the East River." (The wharf referred to was on North river at the foot of the present Gansevoort St. —Gerard, Treatise on the Title of the Corporation to the Streets, etc., 97.) The act requires that the commissioners "cause three similar maps of such streets and roads so to be laid out by them, and of the shores bounding the lands by them surveyed, to be made and published in an extensive scale, accompanied with such explanatory remarks as the nature of the subject may require; which maps, accompanied by such field-notes and remarks shall be attested to by the said Commissioners, or any two of them, before any person authorized to take acknowledgments of deeds and conveyances and be filed,—one in the office of the Secretary of State, to remain of record, one other to be filed in the office of the Clerk of the City and County of New York, to remain of record, and the other of said maps to belong to the Mayor, Aldermen and Commonalty of the City of New York; and that the said Commissioners shall erect suitable and durable monuments at the most conspicuous angles, or those which shall be the most eligible for that purpose, and upon the shores of the North and East Rivers, to be noted in the said Commissioners' plats. . . . This may be the elevations of the several intersections or squares above high-water mark within boundaries aforesaid, or so many of them as they may think sufficient, and shall delineate them, together with all such hills, valleys, inlets, and streams as may be necessary on the said maps, so to render the same explicit and intelligible." The commissioners' plans and surveys were to be "final and conclusive."

The commissioner was to receive not more than four dollars (besides all reasonable expenses for maps, field-notes, monuments, chain-bearers, and assistants) for each day employed, such expenses to be met by the mayor, aldermen and commonly from well-defined assessments. —Ibid. On June 27, 1807, the commissioners qualified before the mayor. —N. Y. Exec. Proc. Je 27, 1807.

The map was finished and filed on April 1, 1811 (q.v.). The powers of the commissioners under the act of 1807 being limited to that part of the city north of the line of Gansevoort St., Green-wich Ave., Houston St., and Astor Pl., the power to lay out streets, etc., below that region still remained in the mayor, aldermen, etc. The powers of the latter have been modified or diverted, however, to other bodies by later laws.—Gerard's Treatise, 104. See also Hist. N. Y. and Je 29.

New York State appoints five commissioners to meet the five representatives of New Jersey (see N 2, 1866) and settle the boundaries between the two states. —Laws of N. Y. (1807), chap. 113. See O 12.

As the common council of New York City has represented "that the powder magazine belonging to the said city, near the fresh water-pond, in the ninth ward, has, from the increased settlement in that neighbourhood, become dangerous to the inhabitants thereof" (see Mr 4), the state legislature appropriates $5,000 for the erection of a new magazine in another part of the city. —Laws of N. Y. (1807), chap. 118. See Ja 26 and Mr 11, 1858.

The common council permits Geo. Waite and Rob. N. Waite "to dig sw part of a Hill near to the powder House and to remove the Earth from the same to their own Grounds." —M. C. C. (1784–1831), IV: 391.

The corporation of Trinity Church grants $500 towards finishing and covering the tower of St. Mark's Church. —Trin. Min. (MS.).

By resolution of the board of trustees of the "Society for establishing a free school in the city of New York, for the education of such poor children as do not belong to, or are not provided for by, any religious society," acknowledgment is made of "the receipt from Col. Harry Rutgers, of a deed of a valuable lot of ground, situated in Henry-street, and which has been generally bestowed as a site [sic] for a School-house." —N. Y. Gaz. & Gen. Advs. Ap 13, 1807. The corner-stone of the school was laid on Oct. 22, 1810 (p. 5).

John Putard, the recording secretary, informs the New York
Historical Soc. (see N 20, 1804) that he has in his possession a consider-able number of books relating to the history of America, 13 which he is willing to dispose of at the original cost. The following resolution is thereupon adopted: "Resolved, That the standing committee be authorized to purchase said books for the use of the Society."—Kelby, The N. Y. Hist. Soc., 1804-1904, 17. The collection thus purchased formed the nucleus of the society's library. The liberal donations subsequently made, together with other purchases, soon formed a creditable library in the department of American history.—"Ibid. See S 9, 1809; and D 13, 1813.

The corporation counsel (see Mr 36) delivers an opinion against Stuyvesant Street being a public street. After reviewing city ordinances, acts of the legislature, maps, etc. which have a bearing on the question, he says that "the Corporation may if they deem it proper, petition the Street to be shut up, provided that act was passed at the last Session of the Legislature which may deprive them of that Right."—M. C. C. (1784-1831), IV: 397-401.

An advertisement of a "New Mode of Painting" appears in one of the newspapers. It reads: "Mr. Savage, No. 160 Greenwich-street, has prevailed on Miss Sally Rogers to remain until the first of May at his house, for the purpose of gratifying visitors, by her singular mode of using a pair of scissors in cutting paper, cloth, &c. &c. by her manner of writing, and above all, from her very extraordinary form of Painting. The circumstance of her effecting all this with her Mouth Alone, being deprived of the use of both hands, is pretty generally known, and needs but this remark, that Mr. Savage pledges his reputation as an artist, he has seen her dress, and press of design, taste, and execution, which astonished him, and will bear minute criticism. "She is here, as in Boston and other places, visited by people of rank and information, who have found her person and features interesting and agreeable.

"Those Ladies and Gentlemen who wish to see her works, may be gratified every day, from 9 in the morning till 11 at night.—April 25."—Savage, 1809, 4.

"N. B. A specimen of her work may be seen at David Longworth's, Shakespeare Gallery."—N. T. Com. Adv., Apr 15, 1807.

The comptroller reports to the corporation counsel the sale of Dove Lots Nos. 1 to 28. The prices secured range from $25 to $1,650 per lot, and total $20,935. The buyers' names are recorded. The record also shows "Lessor" of five parcels of "Corporation Lots for 42 Years sold 15. April 1807." These are 4, 5, and 6 acres each, except one of a half-acre. The annual rental of these parcels is from $20 to $68.—M. C. C. (1784-1831), IV: 406.

Hugh Gaine dies at the age of 81. His funeral occurred on the 27th "from No. 2 in the College."—Am. Cit., Apr 23, 1807.

The Duane St. Market is about to be erected on the west side of Washington St., between Duane and Reade Sts.—M. C. C. (1784-1831), IV: 410. Regarding this market, see also ibid., IV: 474; 478, 576; 586, 615. See, further, O 12.

Wm. Bridges is paid $128, and Adolphus Loss $195, for surveying Canal St.—M. C. C. (1784-1831), IV: 410.

May

The corner-stone of a New Presbyterian church is laid on the north side of Cedar St. between William and Nassau Sts.—Miller, Memoir of Rev. John Rodgers, 171. It was opened on Nov. 6, 1808 (p. v.). See My 4; L. M. R. K., III: 930.

A school of the Free School Society opens in the workshop adjoining the almshouse, the society having agreed to receive and educate 50 children from that institution.—N. T. Com. Adv., D 16, 1809. See My 4.

The Picture of New-York; or, The Traveller's Guide through the Commercial Empties of the United States. By a Gentleman Residing in this City (Dr. Samuel L. Mitchell) is published by L. Riley & Co., and is for sale by Brihan and Brannon, City Hotel, Broadway.—Spectator, My 2, 1807. The following are some of the more important facts relating to New York, contained in this first of the city's guide-books: Boatmen apply the whimsical names of the Pot, the Frying-Pan, and the Grid-Iron to sunken rocks at Hell-Gate; the other

reeds there are Hog's Back, Hallet's Point Reef, Mill-Rock, Middle-Reef, and South-Reef.—"Ibid., 19.

Mechanic Hall, at the (north-west) corner of Broadway and Robison St, is "one of the most genteel Hotels in the city."—"Ibid., 109.

The trustees of the dispensary have the management of the "Kine Pock Institution," which is situated "adjoining the Presbyterian Church Yard, near the Park."—"Ibid., 109, 121; and on the left the stable, wood-house, and other offices." A separate building for the reception of lunatics is "now erecting."

The almshouse, on the north side of the Park "immediately behind the new city-hall," is "surrounded by open courts and gardens."—"Ibid., 121.

The Humane Society has been given a lot of ground by the common council "adjoining the almshouse, and in the rear of the dector's goal."—Ibid., 124.

There are 12 or more Masonic lodges and chapters in the city, many of which hold their meetings in St. John's Hall in Frankfort St.—Ibid., 124.

The city is amply supplied with newspapers. There are 8 daily, 5 semi-weeklies, and 6 weeklies.—Ibid., 138-39.

The arts of printing, book-binding, and paper-making have been encouraged by the literary fairs held alternately at New York and Philadelphia for several years.—Ibid., 140.

The exterior of the theatre (the Park Theatre on the "south-east side of the park") is "rather in an unfinished condition; but the interior is "well finished and decorated." It accommodates 1,400 spectators. The boxes are excellently well adapted to the display of beauty and fashion" (see Pi. 91, Vol. III). It is "the most complete" theatre in the United States.—"Ibid., 151-52.

The Park, in front of the new city hall, is planted "with elms, planes, willows, and catalpas, and the surrounding footwalk is encompassed with rows of poplars." It is "a beautiful grove," although the trees are "but young, and of few years growth."—"Ibid., 155.

The "house and garden" named Rensselaer, "situated about the junction of Grand-street with Divisiouo-street, near Colesr's hook," has generally been known by the name of "Mount Pitt" (see My 10, 1806). From the front of this "hotel" there is a view of the city and the East River. "At a short distance in front, are the ancient ruins of the Castle of Bayard, erected about the year 1687. After the castle was razed to the ground, it stood on the hill behind Belvidere." Behind Rensselaer, "are considerable remains of that entrenchment made by the enemy in 1781, across the island from Colesr's hook by Bayard's Hill to Lippensard's Brewery, to defend the city and Garrison against the American army." The treaty of peace was concluded before the entrenchments were completed, and they remained in an unfinished condition.—"Ibid., 155-56.

Vauxhall is a "fashionable place of resort,"—a garden, two miles from the city hall, on the Bowery Road. At the centre is a large equestrian statue of Washington; and trees, shrubs, gravel walks, and statuary are features of the place. There is an "orchestra built among the trees." The "large apparatus for fire-works, the artificial mound of earth to view them from, the numerous booths and boxes for the accommodation of company, refreshments of every kind, and above all, the buildings and scenery for public entertainment during the suspension of dramatic exercises in the great theatre at the park"—are provided by Delacroix, the proprietor.—"Ibid., 156. The Vauxhall of Delacroix here described is the one on the Astor property (see Jan. 30, 1804; Ap 20, Je 5 and 25, 1805, etc.); although the Washington statue was first erected at his Vauxhall on the Bowery property (see Ap 8, 1805). See further, Je 6.

On a tour to Kingsbridge, starting up the Bowery Road, one sees, beyond the Sailor's Snug Harbour, "the new building of the Manhattan company" on the right (see under "Banks" in L. M. R. K., Vol. III). "This is intended to accommodate all those who do business with the bank, in case sickness should cause the inhabitants to quit the lower wards of the city."—"Ibid., 153-54. The rest of the tour to Kingsbridge is thus described:
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783–1812

1807
May 2

"... A small distance beyond, on the main post road, on the left is a powder house, and on the right, appears Roselle, the residence of the late General Gates; at the northern approach of which are some wooden buildings erected by the common council for the temporary accommodation of the poor inhabitants during the endemic distemper of 1804 and 1805. By pursuing the road to the right, about a quarter of a mile, you reach Belleruce, a beautiful spot, which has been purchased for the reception of such sick inhabitants as are removed from their dwellings, in seasons of a prevailing endemic fever in the lower and more compact parts of the town. On the right, and by the water side a little to the northward, is a small cove called Kip's bay, around which are some handsome buildings. Returning to the main road and proceeding onward, you rise a moderate ascent called Iceberg-berg, on the summit of which are several beautiful villas. The road for more than a league is not above one quarter of a mile from the margin of the east river, and the space between them is improved in an exquisite style, by the more wealthy inhabitants. The entrances to their country seats, frequently attract the attention of the passenger.

A little beyond Smith’s tavern there is a road to the ferry at Hellgate. — From the landing on this side, you may pass to Hallett’s cove, within the limits of Newtown on Long-island. In crossing, you leave the narrow and rocky spit of land, called Blackwell’s island, a very short distance to the southward; and Hellegate, with its rocks, whirlpools, and currents, appears close to the northward and eastward. An excellent view of this picturesque and romantic spot may be obtained from the adjoining grounds of Mr. Archibald Gracie. His superb house and gardens, stand upon the very spot called the hill upon which a fort was erected by the Americans in 1776, stood till about the year 1794; when the present proprietor caused the remains of the military works to be leveled at great expense, and erected on their rocky base, his present elegant mansion and appurtenances. ... It is by no means uncommon to see ships and even sloops laying bldg on the reefs, notwithstanding all the care and skill of the navigators. It is computed that during the mild season of the year, between five and six hundred sail of vessels go through this passage weekly. And they are not merely coasting craft, but brigs and ships of large size. A British frigate of 50 guns, coming from the eastward, was carried safe through Hellegate in 1776, to the city. ... Porpoises are often seen sporting among the foam and eddies. And formerly, lobsters were taken in considerable numbers, in hoop-nets.

"Leaving this place, where you are surrounded with elegant villas, you return to the main road and pursue your ride to Har-lem village. Here you see the river of the same name, which separates the counties of New-York and Westchester. At this place the two counties are connected by a noble toll-bridge, erected, by legislative permission, by John B. Cole, esq. In this neighborhood is the head of the great river, called the Harlem, one of the most advanced reaches of the Hudson. In the year 1783, Mr. Henry Gracie erected a handsome residence near the bridge; and Mr. Jacob Astor, from his extensive commerce, has builded a large house, which is one of the most elegant mansions in the city. A little to the left of this road, where the city labourers under local and endemic fevers. By a removal or two, or three miles, they find themselves safe from harm. This place the bank of New-York, and the Branch bank have buildings ready to receive their officers and ministers in cases of alarm and distress. And many of the citizens have houses and places of business, to serve turn, while the sickness lasts. And as this is the main road of the city, on which the public retrench of the inhabitants, when the city labourers under local and endemic fevers.

"You return from the survey of Fort Washington and King’s bridge to the place where the Bloomingdale road appears. You then take that course to town, and pass by the numerous villas with which Bloomingdale is adorned. This brings you back to the main road near Roselle. Thence you take the right hand opening called Abingdon road, and pursue your ride to Greenwich. This village is near the Hudson on the west side of the island. It is the principal retreat of the inhabitants, when the city labourers under local and endemic fevers.

May 3

"Having surveyed this thriving settlement, you may return to town by the Greenwich road, which will conduct you straight forward by Richmond hill, St. John’s Church, the old Air Furiance, the Bare market, and the Albany bason, to the Battery; or you may proceed by the route of the public cemetery, or Peter’s field, to the upper end of Broadway, where you will pass John’s Church, the new Sugar-house, the New-York Hospital, the College, &c. on the right; and Bayard’s hill, the Collect, the Manhattan waterworks, the County Prison for criminals, the new City-hall, the Park, Theatre, &c. on the left." — Ibd., 183–90.

This guide-book prompted Washington Irving to write his Knickerbocker History of New York (1809).

The common council, on receiving a certified copy of the act of the legislature "restraining the Clerk of the City and County of New York from acting as Clerk of the Common Council and enabling them to appoint their own Clerk" (see Mr 27), now appoints John Fintard to the office. He took the oath of office at the next meeting (May 11). — M. C. C. (1784–1831), IV: 413–14, 415, Man. Com. Coun. (1860), see J. 1, p. 4, 1809.

In an annual report of the concerns of the institution, the trustees of the "Society for establishing a free school" etc., state that they have received contributions of "money, cloth, stockings, shoes and hats," as well as a deed from Col. Rutgers of a lot in Henry St. (see Ap 12). They mention the appropriation of the legislature (see P 27) and add: "The seminary is established on a plan which will educate five hundred children, with the facility that one tenth of that number are taught in the ordinary way: And it is confidently believed, not only from our experiment, but from that of a very celebrated institution, consisting of one thousand scholars, established by Joseph Lancaster, on a similar plan in London; that no mode hitherto adopted, so decidedly combines the two advantages of economy in expense, and rapidity in improvement.

"The number of children owing to a want of a larger room, has not exceeded sixty-seven: the house furnished by the corporation, and now occupied by the school (see My 1) will accommodate two hundred, and this number, including the fifty from the almshouse, is expected, will be very soon obtained."— Am. Cit., May 6, 1807.

The common council directs the commissioner of repairs to remove the two Pumps in Broadway, to the side of the Street in the usual mode, one between Courtland & Liberty Street the other opposite Cedar Street." — M. G. C. (1784–1831), IV: 413. Cf. Vol. I, p. 472.

The common council refers to the comptroller a letter from John Jacob Astor requesting that a grant may be made him of the land under water fronting his property on Hudson Street, between Bastavser Kieltje and Hetty Street." — M. C. C. (1784–1831), IV: 415. His property in this locality extended along the Hudson from a point fifty two feet south of King Street to Leroy street, being three entire blocks of two hundred feet each, with the commission of fifty feet owning by Mr Bruce." He had recently purchased the property on the west side of Greenwich street, between Brannon St. and the state prison. The water lots were granted to him on Nov. 2 from high-water mark to West St., with certain reservations for public basins.— Ibid., IV: 612–13, 629.

The common council passes a resolution "that his Honour the Mayor be desired to request the favour of His Excellency Governor Lewis to permit Col. Trumbull to take his portrait for the use of the Corporation of this City." — M. G. C. (1784–1831), IV: 417.

John H. Raub announces "that he has opened his house at the sign of the square and compass, between Maccener’s and Harlem-bridge." He calls it the "Harlem Coffee-House." His stables have accommodations for more than 30 horses.— N. Y. Eve. Post, My 11, 1807.

Horse-racing is the sport of the period at Harlem (People’s Friend, My 12, S, 29, 1807); in the Bowery from the two-mile stone down to the watch-house (Com. Adv., Je 8, 9, 1807); and at the “New Market” course on Long Island (Columbian Genius, O 17, 1807).

A committee report to the vestry of Trinity Church recommend that St. John’s Church (see S, 8, 1807) "be opened for public Worship with as little Delay as may be."— Trin. Min. (MS.).

The church was opened on June 7 (q.v.).

While the work of the commissioners of 1807 was under way, 18 perplexing problems arose regarding the surveys and maps of the city whenever grants of land were to be made or buildings erected. On May 15, 1807, the common council resolved to make no further grants of land under water (water lots), "North of the South Bac
THE ICONOGRAPHY OF MANHATTAN ISLAND

May 18

or bounds of that part of the city to be laid out by the Commissioners latey appointed by law, until after the survey of the said Corporation to "effect the permanent surveys, and to do justice to interested proprietors," and recommended that the board's attorney draft a bill for this purpose, introducing in it a clause directing the justices of the supreme court to appoint three persons, one of whom ought to be a surveyor, "to adjudge and finally determine upon the lines and monuments of any block or square laid out by direction of the Common Council, by virtue of the said Bill, in case a majority of the proprietors of the said property should object to the mensuration."

The communication further stated that "Similar authority has been given by the Legislature to 'the Justices to nominate disinterested persons' in the Law latey appointing 'Commissioners of Streets and Roads.'" This communication was referred to a committee of seven members (ibid.; V: 56).

While their report was pending, the comptroller, on May 20, addressed the following recommendation to the board and the board confirmed it: "That the Street Commissioner and the Comptroller be authorized to procure suitable registers or Field books wherein to insert Maps and descriptions of all lands, plots of ground, Wharves, Docks and Slipps and Ferries belonging to the Corporation, whether under lease or otherwise, designating the boundaries and such other circumstances attending them, as may give a full view of all the Corporate estate."—Ibid., V: 149-50.

On Feb. 13, 1809, the street commissioner again communicated with the council, making reference to his communication of Mar. 14, 1808, and stating that the committee then appointed had been prevented from acting before the adjournment of the last legislature. He explained that the proposed survey "would only be made, as they now are, at the request of persons about to build, and that the charges would be borne by the persons requiring it."

The bill which the committee proposed to send to the legislature, he said, had been re-drafted with alterations.—Ibid., V: 432-33.

The act of March 24, 1809, followed immediately, amending the acts of 1801 and 1807.—Laws of N.Y. 7 (1809), chap. 1075; see also Bridges' report, 1811. It provided remedies for complaints about cutting trees by surveyors, taking land for streets, and making assessments. See, further, Jc 29.

The street commissioner presents to the common council "a plan of Streets through the property of the Corporation of Trinity Church, between Brannon [Spring] and Christopher Streets, which the board is desire of to extend into the direction of the last legislature."

He explained that the proposed survey would "only be made, as they now are, at the request of persons about to build, and that the charges would be borne by the persons requiring it."

CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1807

June 4

by the cultivation of those plants useful in diseases, by the introduction of foreign grasses, and by the cultivation of the best vegetables for the table; our citizens are now informed that they may be supplied with medicinal Herbs and Plants, and a large assortment of green and Hot House Plants etc. — N. Y. Com. Adv., Je 4, 1807.

An editorial says of Vauhall Garden (which was opened for the season on May 9 — N. Y. Ev. Post, My 9): "This elegant place of public amusement . . . may be justly said to rival in point of elegance and beauty any place of the same kind in the European world. . . . In the United States it is without a parallel, and in this City there is no place of public resort that offers so great an attraction to the gay, the fashionable, and the pleasure-taking world. . . ." — People's Friend, Je 6, 1807. Cf. My 5; and see, further, JI.

The first services in St. John's Chapel were to be held on this day. — N. Y. Ev. Post, Je 4, 1807. According to a report made on Jan. 12, 1809, it cost $172,853.64 to build the church. — Trin. Min. (M.S.). See D 1, 1809. It is shown on Pl. 106-a, Vol. III, and is described in Onderdonk's Hist. of the Prot. Epic. Churches in the City of N. Y., Part IV: 61-64; and in the N. Y. Mirror, Ap 11, 1829.

The street commissioner presents to the common council "a map of a number of Streets through grounds belonging to Anthony L. Bleeker which he proposes to cede to the Corporation as public streets, under the same principles Mr. Jay has consented to cede Canal Street. . . . The consideration that their grants . . . now be accepted for opening Streets through the surrounding premises. . . . This principle, he reported, might operate to the disadvantage of the Board who a very small donation of this kind was prof ered. But it is very different where a large grant of streets are made, the proper widths and in the direction desired by the Corporation. On the commissioner's recommendation, the board accepts the proposed terms. — M. C. C. (1784-1831), IV: 455.

Manhattanville (see F 4) is further described as follows: "This flourishing little town, pleasantly situated near the banks of the Hudson, about eight miles from the City-Hall, to the eyes of the . . . tourist, appears well worthy of observation. It was first projected and laid out into streets, about twelve months ago, by Mr. Schieffelin and others, since which, an Academy has been erected. . . . A very excellent public house has been built and opened, together with many private houses, and a ferry established to the opposite shore of the North River, there communicating with a road leading to the English Neighbourhood Hackinson, etc., and a market is contemplated to be finished in the course of the present summer. . . . indeed such is the pleasantness of the town plot, situated in the beautiful valley called Bloomingdale . . . It has been made a subject of general consequence. . . . The Lots . . . have very considerably advanced in price, but at this time are offered on such terms, as cannot fail being advantageous to the purchaser. A Stage is to run daily between the city and town, the rates of which are to be very low, and boats will ply constantly between the two places. There can be no doubt of a rise in the value of these lots, even should the city remain free from the epidemic, but in case it should again be visited by that dreadful scourge, a great advance in the value of these situations is certain and from the circumstances of its being in a degree under the patronage of the Corporation of the City of New York, facilitates its improvement, and is another inducement to the settler. . . ." — Pub. Adv., Je 5, 1807. See also L M. R. K., III: 497.

The common council refers to a committee a communication "from a Committee of the Highland Turnpike Company on the propriety of building a new bridge across Harlem river near Spuyten-dvil, to correspond with the projected Turnpike road, commencing at Mr Alexander Macomb's in Westchester County." — M. C. C. (1784-1811), IV: 448, 470.

Mr. Francis Cobbs petitions the common council to be appointed "keeper of the Park." The petition is referred to the supt. of the almshouse with directions "to employ some suitable person, at the expense of this Board, to take charge of the Park." — M. C. C. (1784-1831), IV: 449. Cf. Mr 30.

The common council refers to the committee of repairs a memorial from the Hudson Horse, requesting that some accommodation may be provided to separate male and female debtors confined in the goal of this city and county." — M. C. C. (1784-1831), IV: 449-50.

In straightening the line of the south side of Cortlandt St. between Greenwich and Washington Sta., city land is added to the lots adjacent. The minutes of the common council record the amounts which the several owners are to pay for these additions to their land; also a map of the ground. — M. C. C. (1784-1831), IV: 450-52. On June 29, a revision of the award, and a new map, were recorded. — Ibid., IV: 460-82, 487.

The common council provides for four additional watchmen in Greenwich Village. — M. C. C. (1784-1831), IV: 452.

It is ordered by Trinity vestry "that the present fence [in front of] Trinity churchyard] be repaired, and a similar one made along Rector Street." — Trin. Min. (M.S.)

The common council resolves "that the Governor be requested to cause the public grounds of the house known as the Marble Stone, Manhattan Avenue, to be removed," and that the mayor confer with him "respecting a proper place or places to which the same may be removed." — M. C. C. (1784-1831), IV: 457. See Je 29, and N 16, 1807.

Lazarus Beach discontinues the Morning Chronicle with the issue of this date. — Brigham, A. A. S. Proc. (1917), 463; Early Newspapers, III: 422.

Street Commissioner John S. Hunn advertises for proposals for regulating Elm St. from Catharine St. to Mr. Jay's ground, near Canal St., "Broadway from Great Jones to Art St., Mulberry St. from Grand to Broome St., Orange St. from Hester to Grand St., and Sugar Loaf (Franklin) St. from Broadway to Chapel St.; for rebuilding Oak St. from Roosevelt to James St.; for paving Water St. from Mrs. McCrea's to Corlear Hook, and bricking the walks on the North side only" paving Rivington St. from the Bowery to Norfolk St., and repaving Pine St. from Broadway to William St. The gutters of the last named street "are to be formed with hard blue stone, not less than 3 feet long, 4 inches thick and 8 inches deep, instead of common brick." — From original broadside in N. Y. H. S.

The British warship "Leopard" attacks the American frigate "Chesapeake" off Hampton Roads, disables her, and carries off four sailors claimed as deserters. Three Americans are killed and eighteen wounded during the engagement. — McMaster, Hist. of People of C, S., III: 255-64. For the diplomatic correspondence between Great Britain and the United States over the "Chesapeake affair," see State Papers, 1806-8 (Boston, 1815), 289-378.

The common council plans for a "Pier to be run out forming an L so as to complete the Corporation Basin at the foot of Partition Street on the North river and also one Pier with an L so as to complete the Basin already begun near Diane Street. . . ." — M. C. C. (1784-1831), IV: 471.

The board also provides for piers at Burling Slip, Beekman Slip, and Flymarket Slip. — Ibid., IV: 471-72.

The common council grants a petition of Thomas Dunning, butcher, to build a market at Harlem. — M. C. C. (1784-1831), IV: 496, 477.

The following facetious account of "A Tour in Broadway," 27 is issued by Washington Irving, William Irving, and James K. Paulding: "Battery—flag-Staff kept by Louis Keaffee—Keaffee maintains two spy-glasses by subscriptions—merchants pay two shillings a year to look through them at the signal poles on Staten Island, . . . Young seniors go down to the flag-Staff to buy peanuts, and beer after the fatigue of their morning studies, and some to play at ball, or some other innocent amusement—battery a very pleasant place to walk on a Sunday evening—not quite genteel though—every body walks there, and a pleasure, however genuine, is spoiled by general participation—the fashionable ladies of New York, turn up their noses if you ask them to walk on the battery on Sunday. . . .

Greenhouse—origin of dinners; merchandise this place much frequented by merchants. . . . Custom house partly used as a lodging house for the pictures belonging to the academy of arts — couldn't afford the statues house room, most of them in the cellor of the City hall. . . .

Bowling green—fine place for pasturing cows—a perquisite of the late corporation—formerly ornamented with a statue of the god—people pulled the gin in the war to make bullets—the city, as it might have been given to the academy—it would have been a cellor as well as any other. — The pedestal still
remains, because, there was no use in pulling that down, as it would not cost the corporation money, and not sell for anything—if the pedestal must remain, I would recommend that a statute of somebody, or something be placed on it, for, truly it looks quite melancholy and forlorn. . . . Broadway—great difference in the gentility of streets—a man who resides in Pearl street, or Chatham-row, derives no kind of dignity from his domicile, but place him in a certain street in any way—anywhere between the battery and Wall-street, and he straightway becomes entitled to figure in the bemonde, and strut as a person of predigous consequence!—New York brick church.—what a pity it is the corporation of Trinity church are so poor—if they could not afford to build a better place of worship, why did they not go about with a subscription!—even I would have given them a few shillings rather than our city should have been despised in the eyes of the public; a pitiful spectacle—Wall-street.—City-hall, famous place for catch-poles, deputy sheriffs, and young lawyers, which last attend the courts, not because they have business there, but because they have no business anywhere else. . . . Oswego-Market—looks very much like a triumphal arch.—Hogg's porter house . . . Hogg's a capital place for hearing the stories, the same jokes and the same songs every night in the year . . . some of the longest and thickest heads in the city come there to settle the nation. —Salmagundi or the Whim-Whams and Opinions of Launcelot Langstaff, Exq. and others (1807), II: 239–48.

29 On being applied to by the commissioners for laying out streets and roads on this island (see Ap 3), the common council orders that such maps as are in the several city departments, relating to the duties of the commissioners, may be placed at their disposal, and that such copies as are required may be furnished. A warrant for $500 is issued in favour of the commissioners, their expenditures to be reported to the comptroller.—M. C. C. (1784–1815), IV: 480. See 59.

"By order of the common council, the conditions of sale of the "Dove lots" (see Mr 30) are entered in full in the minutes.—M. C. C. (1784–1815), IV: 483–84.

29 The common council authorizes the comptroller to employ four watchmen for the protection of the magazine (powder-house), near the three-mile stone, and to cause the lightning-rods there to be repaired.—M. C. C. (1784–1815), IV: 479.

The city pays $25 yearly subscription to the N. Y. dispensary.—M. C. C. (1784–1815), IV: 478.

July

A general meeting is held in the Park at which De Witt Clinton is chosen chairman and Gen. Jacob Morton secretary, and the following resolutions are adopted:

"Having received with the most lively indignation, authentic information, that on the 22d ultimo an attack, unwarranted by the known usages of nations, and in violation of our national rights, was made by the armed forces of the United States against the American States of Virginia, North Carolina, and South Carolina, of the United States, the inhabitants of the said States, assembled in general meeting, deem it to be their duty to express their opinions on this fresh outrage offered to our national sovereignty by the Navy of Great Britain—Therefore, "Resolved, That it is and has been the policy of our government and the wish, because it is the interest of our citizens, to be at peace with all the world. "Resolved, That although we cherish peace with the greatest sincerity, yet that we hold ourselves ready, at the call of our government, to resist all infringements on our national rights, and violations of our national honor. "Resolved, That we consider the dastardly and unpardonable attack made on the U. States armed ship the Chesapeake, by his Britannic Majesty's ship Leopard, by his Britannic Majesty's ship Leopard, to be a violation of our national rights as atrocious as it is unprecedented. "Resolved, That we are determined to maintain the rights and dignity of our country with our lives and fortunes, and that we will support our government in whatever measures it may deem necessary to avert the present crisis of affairs. "Resolved, That whatever differences of opinion may exist among us on our merely local concerns, yet that we love our country and will cordially unite in resisting the attempts of any nation to invade our rights or tarnish our national honour. "Resolved, That the offending ships at Hampton Roads have wantonly violated the laws of and forfeited their title to national hospitality. 

"Resolved, That we highly approve of the spirited and patriotic conduct of our fellow-citizens at Norfolk, Portsmouth and Hampton. "Resolved, That we deeply lament the death of those of our fellow-citizens who fell, and sincerely sympathize with those who were wound on board the Chesapeake."—Am. Cit., Jul 2, 1807.

Because of the "Chesapeake Affair" (see Je 22) President Jefferson issued a proclamation calling all American ships to leave American waters and forbidding all intercourse with them.—State Papers, 1806–8 (Boston, 1815), 249–52. See 1.

Robt. Doby changes the name of his "London Hotel" (see Ja 29, 1806) to "Washington Hotel." It is situated next to the theatre on "Park Street" (Park-Row).—Am. Cit., Jul 3, 1807. The Philharmonic Society made this their meeting-place in December of this year. A part of the money was raised to meet there for the trial of Brig.-Gen. Morton (N. T. Com. Adv., F 26, 1808), and in the same month a public ball was given there. See further, Ap 11, 1808. In 1809, it was called the Mercantile Coffee House, and also the Commercial Coffee House, but those names did not cling to it long.—Bayses, Old Taverns of N. Y. 397.

The expenses paid by the city in celebrating the day indicate its character: $8.79 for "Banned for Cartridges," $38.67 for "Transporting Brass Ordinance to & from Arsenal;" $97 for "attending d on battery;" $24 for "ringing bells;" and $727.44 for a "public entertainment."—M. C. C. (1784–1811), IV: 499.

The Society of Cincinnati holds its annual dinner at the house of Joseph Baker, No. 4 Wall-street, comer of New St.—Bayses, Old Taverns of N. Y. 367. This is the first of several St.'s Tables, and also one of the "Ugly Club," a group of talented young men of the city, including Fitz-Greene Halleck. —Ibid. It was called "Baker's Porter House" in 1815, when the Federal Republican electors of the First Ward met there.—Com. Adv., My 11, 1815.

Another "splendid and allegorical fete" (cf. Jr 4, 1806) is held at Vauhall Garden, consisting of fireworks, illuminations, music, and painting, on a stage of 60 ft., representing a view of New York and the bay during the British evacuation of the city on Nov. 25, 1783.—N. Y. Ev. Post, Jl 2, 1807. See, further, Jl 15. Columbia Garden is "handsomely illuminated, and decorated with a variety of Transparent Paintings, representing Washington, Jefferson, Adams, Green, Montgomery, Warren and Putnam, with the admired Hydraulic Works, with improvements, to be accompanied with illuminations of Fire Works."—Ibid., Jl 1, 1807. See also An Essay on Transparent Prints and on Transparencies in General, by Edw. Orme (London, 1807), in N. Y. Pub. Library.

The common council refers to a committee a communication of the comptroller regarding "objections raised by some of the purchasers of Inchlend lots against paying for the same until certain streets were opened."—M. C. C. (1784–1811), IV: 490. To it is appended a letter from Dan'l D. Tompkins to permit Col. Trumbull "to take his portrait for the use of this Corporation."—M. C. C. (1784–1813), IV: 490. The governor consented.—Ibid., IV: 491–92.

The common council orders that the Comptroller and Clerk provide a copy of a Chart of the Port and Harbour of New York, made by Captain Isaac Chauncey and Charles Loss in the year 1761.—M. C. C. (1784–1811), IV: 490.

The common council orders that the assessment for opening Broadway in the Bowery be confirmed.—M. C. C. (1784–1811), IV: 490.

The Peace of Tilsit is signed by France and Russia. Prussia agreed to it on July 9. France thus broke up the fourth coalition, leaving herself at peace save with England. —Anderson, Constitutions and Documents, France, 1789–1807, 404–16.

The corner-stone of an orphan asylum is laid in Bank St., between the United States and Merchants' Banks.—N. T. Spectator, Jl 11, 1807. The Orphan Asylum Society had been incorporated on April 7 of this year.—Laws of N. T. (1807), chapt. 179. In the announcement of the opening of St. John's Church (June 7), it was stated that the collection made for the benefit of this asylum.—N. Y. Ev. Post, Je 4, 1807. In 1836 (q. v., Je 9), the asylum began to build at Bloomingdale.

"In consequence of the recent unpardonable conduct of the British, in attempting to tarnish our national character" (see Je 22), a meeting of the Tammany Society is held, and a committee is appointed "to report a plan to organize the society into a war band." The plan suggested was that the main body should consist
of 314 warriors and hunters, exclusive of officers, there being 156 warriors and 76 hunters. When this body was divided into 13 war parties, General Tompkins would have 12 warriors and 6 hunters in each party. —Am. Cit., Jl 22; *People's Friend*, Jl 25, 1807. See 9 18.

Gov. Tompkins calls on the common council and communicates the wishes of Gen. Dearborn, secretary of war, now in New York, respecting “a cession of ground at the Battery and Duane Street Basin for the purpose of erecting fortifications for the defence of the town and harbour.” The board passes the following resolution: “Resolved that this Board will cheerfully Board the United States such parts of the public grounds at the Battery and at the Basin at Duane Street, or elsewhere, within their jurisdiction, with their right of soil under water, or elsewhere within their jurisdiction, as the Secretary at War may deem necessary for erecting fortifications for the defence of this city.” A committee is appointed to carry the resolution into effect. —M. C. C. (1784-1813), IV: 497. See Ag 30; and, for change of basis, see O 26.

A volunteer company of young men, called “The Sons of Seventy-six,” is formed at the Union Hotel. They were required to meet on July 17 at the New York Hotel, 42 Broad St., equipped for exercise. —N. T. Evoc. Post, Jl 16, 1807.

The city pays Hugh Brice & Co. $1864.54 “for carting earth to fill Collect,” and $51.75 to Thomas A. Jones, for “removing pinnace and leveling ground.” The common council orders that the city inspector be authorised to contract for the delivery of 3,000 more loads of earth at 5 cents a load. —M. C. C. (1784-1813), IV: 494.

For the annual expense of filling the Collect, see Chronology near the end of each year, beginning 1803. The “tickets” referred to were those given to cartmen. Packages of these are preserved with the city’s “cartman’s office.” —Ibid., Jl 22, 1807.

The common council agrees to make an advance to the contractor “for digging out Broadway from Great Jones Street 350 feet towards Art Street.” —M. C. C. (1784-1813), IV: 494.

The city inspector represents to the common council “that the Watch boxes in the Streets were obnoxious, during the Summer season, to the inhabitants of their vicinity.” The board orders that the Watch box, from which the houses were removed to the Bridewell yard. —M. C. C. (1784-1813), IV: 494.

Col. W. S. Smith, aide-de-camp to the commander-in-chief, criticises the proposals of the common council for the city’s defence by batteries on the wharves and islands of the harbour. He argues in favour of preventing the enemy’s entering the harbour. —People’s Friend, Jl 20, 1807. Col. Smith wrote a second letter on the subject, on July 23, from which it appears that his opinion met with “no respect from the Secretary of War;” but an editorial view was that “it is high time the people of New York were roused to a sense of their situation.” —N. T. Evoc. Post, Jl 25, 1807.

Robert Fulton writes to Maturin Livingston that he has arranged with the secretary of war to commence experiments with his submarine Torpedoes, on July 18th. He will then exhibit his “invention of Torpedoes,” and the various vessels in which vessels may be assailed and destroyed while at anchor or under sail. A 200-ton brig, anchored between Governor’s and Ellis Islands, will be attacked and blown up on July 20th, to show how an enemy’s vessel may be annihilated on entering port. Fulton extends an invitation, through Livingston, to the governor, mayor, members of corporation, and such other persons as he may think proper, to meet at Governor’s Island at 10 a. m., that he may “exhibit to them the machinery before the engines are put on the water.” —N. T. Com. Adv., Jl 16, 1807. The exhibition took place, as planned, on July 15. —Am. Cit., Jl 20, 1807. See, however, Jl 20.

The summer theatre at Vauxhall, “fitted up as originally intended, with Elevated Seats, etc.,” is opened for the season with a comedy and a musical play. —People’s Friend, Jl 13, 1807. See Ag 17.

20 July

Am. Cit. makes two unsuccessful attempts to sink the 200-ton brig (see Jl 15) with his torpedoes; but he succeeds on the third attempt, when, however, not 500 persons, out of the 15,000 or 20,000 persons who had first assembled, remain to see the explosion. As to the utility of the invention, it is stated editorially that “No machinery like this which requires the manager to proceed in full view, within 30 or 50 yards of the vessel to be destroyed, can ever in any degree succeed. A thousand of them, with the managers and their boats, could be blown from the surface of the water, before they could approach so near as to do the least injury (see a hostile fleet).” —Am. Cit.; Jl 22; and, People’s Friend, Jl 22, 1807. His engines were described in ibid., Jl 25, 1807.

Morgan Lewis, writing from Staatsburg, coincides in the opinion of Col. Smith (see Jl 14) “that an attempt to protect the city by Batteries on the wharves will be an useless expenditure of public money.” He explains this view at length and in detail. He prefers “moveable Batteries of cannon to form embankments” near such timber as our country affords. The way in which he would use the cotton is “to have it well pressed into cases of raw-rice of the size of an ordinary gabion, well painted or tarred, and to send the contents against fire.” With these, he explains, and with heavy artillery on field-carriages, “a Battery might always be opposed to a ship in the course of a few minutes after she should be moored.” In the efficacy of “Booms and submarine explosions” as a principal means of defence, he has no confidence, because of the “feeblessness of" the former and the “difficulty of applying” the latter; but as auxiliaries he has no objection to them. —N. T. Evoc. Post, Ag 1, 1807.

The editor of another paper calls Lewis’s theories “fruity,” saying that “The Drum is all important in the day of battle.” —Am. Cit., Ag 5, 1807.

Another writer commenting on Lewis’s letter states that “The Cheveux de frize which he proposes are the least expensive & most efficient obstructions, that booms are of little utility and that his observations on the necessity of a long line of fire ... are just to the utmost extent.” The writer declares, however, “that the opinion of this contributor’s officemates are not in agreement with Lewis’s recommendation of “Stone Parapets and embrasures in preference to those of earth and en barbette.” —N. Y. Evoc. Post, Ag 15, 1807.

Albert Gallatin, secretary of the United States treasury, submits to Pres. Jefferson a general view of measures for defence and attack that he thinks should be considered at this time with a war with Great Britain impending. He gives a list of the reports that in his opinion should be specially fortified. Concerning New York he writes: “The plan of defending the approaches of New York by narrowing the channel at the most convenient place may require the immediate attention and countenance of the Executive, as under their auspices, it might be at once commenced by the city. I think it the only plan which will give real security. Its practicability and expense must be examined.” —Adams, Writings of Albert Gallatin (1875), Jl 343. See Ag 26. In the same letter he also outlines in detail plans for offensive operations to be directed against Canada and other British provinces to the north and the islands of Bermuda and New Providence to the south.—Ibid., I: 343-53.

27 July

Lord Holland sails in the House of Lords whether it is “the intention of his majesty’s ministers to make any communication to parliament on a circumstance which was at present the subject of much conversation, he meant the report of hostilities having actually commenced between this country and the United States of America.’ He would rejoice to hear that the report was untrue; but if so great a calamity had really taken place, he trusted that his majesty’s ministers would lose no time in laying before parliament the grounds of the dispute between the two countries.” Lord Hawkebury answered that he had no authority to make any communication on the subject at present, but he assured the lords that “every thing had been done on the part of his majesty’s ministers to avoid so unfortunate a result as hostilities between this country and the United States of America.” —Parl. Debates, IX: 926-27.

The common council resolves that Col. Jonathan Williamson is requested “to furnish with all possible despatch, a plan for fortifying the Narrows, with an estimate of the probable expense.” —M. C. C. (1784-1813), IV: 504. Col. Williams complied on July 29 (9:1).

A visitor to the city thus describes and comments upon a bull-baiting he attended on this day, possibly at the Corlear’s Hook circus (see Jl 4, 1808): “As soon as the entrance was thrown open a female who received our money and dealt out admissions, within the constant and disorderly howlings, which issued from every side, by Dogs, chained and impatient for action, recalled to the imagination the fabled regions of Pluto. "In the inner inclosure stood the harmless animal. . . . two
or three Bull dogs were brought in, impatient from the restraint of July chains, and their vengeance directed by their mercenary masters 27 to be sport upon the Bull.

"The poor animal defended himself to the utmost, and made great exertions of those noble faculties of courage and power with which he is so eminently endowed;—after beating one set of dogs, others more furious were let loose upon him in succession, until he appeared almost exhausted by heat, fatigue & pain; at this time a fresh set of dogs were about to be let loose, when it appeared to me the feelings of humanity were no longer to be disregarded, and I presumed to observe to the keeper that the bull was sufficiently beaten, and the spectators I believed satisfied. In this however I was deceived, for as the wounded beast was driven to his stall some old sportman cried out that he had not been pinned. The Bear and Wolf next fought with the dogs in succession, but as these combats were not so destructive to the animals on either side, they appeared not to excite so much interest with the spectators, and in a little time I was astonished to see the poor bull again introduced.—The wretched brute with his head lacerated & bloody, and a horn broken off exposing the delicate and susceptible inferior to the air, and external objects, was doomed to have another engagement with a new set of dogs.—A severe conflict again ensued, until the powerful animal was so worn down by fatigue and torture that he seemed no longer capable of defence, but patiently to submit to his torture.

"After considering life no longer worth defending he was taken away with his head covered in blood—his ears torn—and his tongue bitten in pieces—probably to be preserved & recruited for torture amusement.

"Some of the most valable dogs whose courage and constancy excited admiration, and whose fidelity should have enhanced them to their masters, were tossed in the air and bruised by falling; or, their bones broken by being trodden under foot.

"In conclusion Sir, that an amusement so absurd, and tending to such debasement of taste and manners should prevail or be tolerated among a civilised people and particularly in a respectable City. . . .

"It is singular too that this institution is permitted to remain in the vicinity of a very respectable House of public worship, and as one might suppose from its situation on the very grounds of the Church.

"The common council directs the watch committee "to station a Watchman at the door of His Excellency Governor Tompkins, during his stay in this city."—M. C. C. (1784-1813), IV: 503.

"The common council orders the completion of carting fresh earth "to cover Flymarket Slip lately filled in."—M. C. C. (1784-1813), IV: 503. See Aug 11, 1806.

"In compliance with the request of the common council of July 27 (p. v.), Col. Jonathan Williams sends the corporation, through Selah Strong, chairman of the committee of defence, a plan "for fortifying the Narrows between Long Island and Staten Island." The following extracts give its principal features, and are quoted thus at length because of their topographical character on the important subject of New York City's coast defences:

"The propriety of a defence at the Narrows in conjunction with an interior force, is in a striking manner indicated, by the introductory words of my orders. 'It being the intention of the general government so to fortify the harbour of New York, as will, with the aid of gunboats, afford a reasonable defence to the citizens and their property against Ships of War, unaccompanied with any formidable armament, such as can only be opposed by a superior army; the following system has been deemed most expedient: at present, with such additions hereafter, as may be thought advisable, farther to advance.'

"The Narrows offer a passage of more than twelve hundred yards in width for any ship that could come over the bar at Sandy Hook; now, every Sailor knows that a dozen ships of the line could, upon an emergency, sail abreast through that passage. . . .

"In looking around, it was perceived that the prominent rocks on Governor's island, the point of the Bastion of the old City Battery, and Ellis's island, forming nearly an equilateral triangle; and that the centre of this, offering an intersecting point, which, at the greatest distance from each, would only be about one thousand yards, while it would be difficult to go into either the North or East river, without passing within point blank shot, or between four or five hundred yards, of some one of them. It was also seen that former administrations before, and since the revolution, so highly valued these points, that fortifications have been erected upon or near every one, although time, . . . has obliterated some of them. It was further considered that the modern improvements of marine batteries, which give double the number of guns on the same horizontal base, and by multiplying the tiers may give six times the number of the heaviest metal with a bomb-proof security above, rendered the question of combat, a question of floating wooden walls, against impregnable stone walls on shore, with equal power as to celerity of action, number of guns within the same space, and weight of metal.

"It is not a very bold assertion to say that no ship that sails on the Ocean would engage on such terms.

". . . Fifty gun boats scattered along the flats on each side of the channel, would all of them attack an advancing ship forward the fore chains, . . . [Details of the method of attack are given.] But the certainty of passage is the great objection, for it seems to be in the opinion of the world almost a settled axiom, that ships will pass batteries in spite of all their force. Why would they pass them? There must surely be a strong motive to encounter such danger? Doubtless to attack more vulnerable points. And this is precisely the reason they would pass the Narrows to attack the defenseless city of New York; as Admiral Duckworth passed the Dardanelles to attack Constantinople, and certainly if there had been no interior defence, the capital of the Sublime Port would have been reduced.

"But merely passing the city cannot be an important object, for to put it under contribution, ships must lie there, . . . now that, when the proposed batteries shall be completed, cannot be done, and we do not find that it is generally thought advantageous to run the gauntlet for the purpose of running it back again."

"Excuse me Sir, that an amusement so absurd, and tending to such debasement of taste and manners should prevail or be tolerated among a civilised people and particularly in a respectable City. . . .

"The best plan for permanent obstructions, in my estimation, is that which in the course of a conversation at the Mayor's was intimated by yourself, and . . . I may be allowed to state it in detail.

"Suppose numerous blocks were to be sunk in the Narrows at certain distances from each other, which though sufficient for a ship to pass between them, yet should she go but a little on either side of the middle, would insure her destruction; as the depth of water varies in the space before mentioned from ten to sixteen fathoms. . . . If these blocks were placed at sixty feet distance from each other, and were armed with chevaux de frise, as they might be, so as to reduce the spaces to the width of a ship, it is self evident that no ship could pass, for if she were but one foot on either side of the middle, one of the projecting points would check her progress, when she would immediately round to, and lay her broadside against all the others. . . ."

"This calculation goes to filling up of the whole space, but it is evident that a channel should be left for our own vessels, this at the worst would oblige an enemy to advance singly, and every block under the guns of the batteries to be erected on either side, while every block so sunk would completely cover a gun boat that might be anchored upon, or behind it, without danger, owing to their small draft of water. Besides these considerations, it is evident that the blocks must aid every other mode of obstruction, and, after the experiment we have witnessed, there can be no doubt, but the work could be applied to let our Torpedoes could be advantageously used."

"The most essential as well as the most costly battery should be erected at the edge of Hendrick's reef. Until I can have time to cause the plan and elevation of such a battery to be made, I sub-
mit to your consideration the plan and elevation of one designed for a point, not dissimilar as to position in the harbour of Charleston, which I have often heard it said that, could the defence at the Narrows, like the one described be procured, the inhabitants of New York would not think a million of dollars too great an expense. . . .”—M. C. G. (1784–1831), IV: 511–18 (where the date is given erroneously as July 20); Am. Cit. Ag 4, 1847. Col. Williams’s original report (MS), bearing date of July 29, is preserved in metal file No. 34, city clerk’s record-room. It was printed on July 31 in pamphlet form. One of these printed copies is in the N. Y. Hist. Soc., with various papers and plans relating to the defence of the city, presented by Dr. Saml. Mitchell (U. S. senator) to the society in 1810. The report came before the common council on Aug. 4 (p. 7).

The Kip’s Bay Farm, or “Quarry Lot,” is to be sold on this day at public vendue, at the Tontine Coffee House. “A road by the name of Susan street, 60 feet in width, leading along the southerly side of the lot from the highway to the river, forms one of the several avenues from the premises to the public road.”—Am. Cit., Je 29, 1807. See also descrip. of Pl. 107, III: 610.

Col. Williams’s plan for the defence of the Narrows (see Jl 29) is read in common council and the committee is directed “to request his plan of batteries, forts, &c., and to request you to return.”

The committee appointed to call on the governor “for information respecting the State of the Ordinance and Military Stores in this City and to offer him the aid of the Corporation in putting such incompact repair,” reports to the common council. The report is entered in full in the minutes.—M. C. G. (1784–1831), IV: 510–11.

“A Petition of Abraham Childs and others, praying that certain monies paid by them on account of the Assessment for opening Canal Street which has been set aside [see My 18], may be refunded,” is referred to the street commissioner.—M. C. G. (1784–1831), IV: 506. On Aug. 17, the report of the street commissioner on this petition, recommending the Collector for Canal Street to render an Account of the monies collected by him, in order to enable the Board to refund the same to the petitioners,” was confirmed.—Ibid., IV: 527. On Dec. 14, it was ordered “that a warrant be issued in favour of the Street Commissioner for $586.50 to refund the monies collected on said assessment to the several persons who have paid the same.”—Ibid., IV: 669.

The common council provides for the accommodation of the revenue barges of the custom-house on the east side, at the head of the southerly pier at the Battery.—M. C. G. (1784–1831), IV: 480, 507.

Payment of $250 is made to Stagg & Anson “on account of their engagement to dig out 330 feet of Broadway above Jones Street.”—M. C. G. (1784–1831), IV: 509, 519. See, further, Ag 17.

Payment of $50 is made to Henry White for “making Index to Com. Coun. minutes.”—M. C. G. (1784–1831), IV: 505. See N. 2.

James A. and Samuel Bayard establish The Daily Advertiser as a successor to The People’s Friend & Daily Advertiser (see 8, 1806). The semi-weekly edition of the paper retains the title of The People’s Friend.—Brigham, A. A. S. Proc. (1917), 402, 479. A bonspiel is held on Dec. 21.

The editor of the American Citizen criticizes Col. Williams’s plan for the defence of the Narrows (see Jl 29) on the grounds that it would be very expensive, that it would take too long to complete, and “that there is no safety in the defence proposed.” He suggests that the water between Robin’s Reef and Mud Flats be shallowed to 20 feet “by throwing in loose stone, or by sinking them in the way of docking.” This would not cost more than $75,000, might be completed in a few weeks, and would thus save the small ships carrying more than 30 guns. The smaller ships that could pass could be taken care of by the batteries and gunboats in the inner harbour. A diagram of the harbour “from the chart of Capt. Chauncy and Mr. Loss, City Surveyor, drawn from actual survey and soundings,” is included to illustrate the plan.

Commenting on the plan of defence published in the Am. Citizen of Aug. 5 (p. v.), “A.B.” says that it differs in nothing from a part of Mr. Lewis’s [see Jl 22], except as to the extent of the obstruction, and its position—. The editor ought to have given his reasons for removing the obstruction from the place Mr. Lewis had assigned it to Robin’s Reef. I can see but one, and that is that Robin’s Reef is beyond Bomb range from the City. This certainly is an object of magnitude, and could the same protection be given to the obstruction there, as at the Reef, I should prefer it. But this cannot be done. Gun-boats cannot give an equal protection with Batteries, nor are they alone a sufficient protection. All the gun-boats in our service would not prevent the removal of the obstruction under the cover of two line of battleships.

“The objection to its being within Bomb-range of the city, through a strong one, will be more than counterbalanced by the superior protection it will receive. Nor will this objection be found on due consideration to be as formidable as would at first sight appear. Hostile ships would be obliged to take positions where they would be annoyed by our batteries, and those batteries would be honored with their first attentions—not until these were silenced, would they think of paying their respect to the city. Another advantage would be, the ability of our batteries to afford assistance to your flotilla, in case of disaster, when in the neighborhood of the city—with respect to width of passage, and depth of water, there is no essential difference between the two places.

“Understanding the government intends a strong bomb battery on Ellis’s Island, I should prefer removing the obstruction to a position still nearer that Island. If a total obstruction of the harbour should at any time be deemed necessary, it certainly may be effected by frizzes in the Butter-Milk Channel, with much more facility than at Robin’s reef.

“The plan which I understand to be adopted by the government of fortifying strongly, Ellis’s Island, the south-west point of the battery, extended into the north river, and the rocks on the west end of Governor’s Island, will certainly go far towards a defence, but will not be sufficient alone. . . . An obstruction, therefore, in aid of these batteries becomes necessary, and may be effected, of sixteen feet base, ten capital and forty perpendicular for $109,000—a work I hope the corporation will undertake.”—N. T. Ext. Pet. Ag 6, 1807.

“The American Citizen of the day before yesterday [see Ag 5] suggested a plan for securing the city and harbour of New-York by obstruction, and gave it as an original idea. The plan which is republished this evening, appeared in the Evening Post more than a year ago, and was handed me by an eminent merchant; an examination of it will shew at once to whom credit is due.” The reprinted plan is the one which appeared on April 1, 1806 (p. iv.).

A scheme for the defence of the city, proposed by John Stevens, of “Hobuck,” is published. The editor comments upon it as “delusive,” believing it would “lead to the destruction of this city.”—Am. Cit., Ag 8, 1807. Stevens modified his plan by partially embracing the plan to place obstructions at the Narrows, as proposed by this editor on Aug. 5—Ibid., Ag 15, 1807. Explaining his plan on Aug. 20, Mr. Stevens said it was “simply to moor a compact line of floating batteries across the channel, from Staten Island to Hendrick’s Reef;” that this line “be formed of fourteen distinct batteries, of about 100 yds. long and 60 or 70 feet wide, moored in such a manner, with anchors and cables, as that by means of capstans, they may be placed at any angle.” The plan for interior and exterior defence is to be exhibited on the 22d at the Tontine Coffee House.—Ibid., Ag 21, 1807. See Aug 15.

The preliminary trial of Robert Fulton’s steamboat takes place. Fulton thus describes the occasion in a letter written to Chancellor Livingston on Aug. 10:

“Yesterday about 12 o’clock I put the steamboat in motion first with a paddle 8 inches broad 3 feet long, with which I ran about one mile up the East River against a tide of about one mile an hour, it...
being nearly high water. I then anchored and put on another paddle 8 inches wide 3 feet long, started again and then, according to my best observations, I went 3 miles an hour, that is two against a tide of one: another board of 8 inches was wanting, which had not been prepared, I therefore turned the boat and ran down with the tide—and turned her around neatly into the berth from which I parted. She answers the helm equal to any thing that ever was built, and I turned her twice in three times her own length. Much has been proved by this experiment. First that she will, when in complete order, run up to my full calculations. Second, that my axles, I believe, will be sufficiently strong to run the engine to her full power. Third, that she steers well, and can be turned with ease, . . . . I beat all the slopes that were endeavoring to stem tide, and in a breeze which they had; had I hoisted my sails I consequently should have had all their means added to my own. Whatever may be the fate of steamboats for the Hudson, everything is completely proved for the Mississippi, and the object is immense . . . .—Sutcliffe, Robert Fulton and the 'Clermont,' 199-201.

Rembrandt Peale, writing on Jan. 13, 1848, to a member of the Penn. Hist. Soc., said that in 1807 he visited Fulton in New York and found him much disturbed because many people "almost made him crazy" in their efforts to persuade him to abandon his projects of steam navigation. Fulton invited Peale to "to a ship-yard on the East River to witness the first experimental demonstration in America" (probably this preliminary trial on Aug. 9), and Peale then adds his experience: "When we entered the yard, to which only his intimate friends were invited, I perceived, some distance up the river, a common flat-bottomed scow, with a number of persons on board, in the act of being turned round to return. When it began to move, and advanced on the calm water, against the tide, at the rate of four miles an hour, it seemed like a huge tortoise paddling onwards with its four feet, and produced in me the most lively sensations. As the scow touched the wharf, I jumped on a broad plank which crossed it midway, where Fulton stood alone, and, seizing his hand, congratulated him on his success. The letter goes on to state that Fulton, glancing across the small, half-submerged wheels of his boat, suddenly exclaimed: "Yes, now I have it! They [meaning the wheels] must be of large diameter and but little sunk in the water." Mr. Peale quotes this as showing that, while small water-wheels, instead of paddles, had been considered by Fulton, Fitch, and other experimenters, "this was the moment when the conviction flashed on his mind that all that was necessary for the application of steam power to navigation, was to employ wheels of large diameter and but little submerged."—Penn. Hist. Soc. Collections, 1: 35.

The boat was built at the ship-yards of Charles Browne at Corlear's Hook.—Hist. Mag., 1st ser., III: 21; Dickinson, Robert Fulton, Engineer and Artist, 215-16. Dickinson says that she was not christened when launched, but was known merely as the "Steam Boat." When she was registered in 1808 after being greatly altered, she went under the name of the "North River Steamboat of Clermont" and was called the "North River" for short. It was not until 1810 that she was designated as the "Clermont."—Ibid., 216, 282-30.

The boat was thus described by Fulton: "My first steamboat on the Hudson's River was 150 feet long 15 feet wide, drawing 2½ feet, of water, bow and stern 60 degrees: she displaced 36.40 cubic feet, equal 100 tons of water; her bow presented 26 ft. to the water, plus and minus the resistance of 1 ft. running 4 miles an hour."—Sutcliffe, Robert Fulton, Engineer and Artist, 215. Another authority adds: "The bottom-planks of the boat was formed of yellow pine planks 1½ in. thick, tongued and grooved, and set together with white lead. This bottom or platform was laid in a transverse platform and molded out with batten and nails. The shape of the bottom being thus formed, the floors of oak and spruce were placed across the bottom; the sprung floors being 4×8 inches and a foot apart. The oak floors were reserved for the ends, and were both sided and molded 8 inches. Her top timbers (which were of spruce and extended from a log that formed the bridge to the deck) were sided 6 inches and 4 inches at the head. She had no guards when first built and was steered by a tiller. Her draft of water was 2½ inches."—Ibid., 191-93 (footnote), citing Nautical Gazette. See also W. 17 and S. 2.

The boat was virtually rebuilt in the winter of 1807-8 (see N. 20, 1807, and Aug. 25, 1808) and was under the Hudson for several years. Her final whereabouts remains a mystery. Mrs. Sutcliffe says: "It has been asserted that she was finally transported as The Henrietta to the Cape Fear River, North Carolina, where Fulton himself as early as 1813 had suggested the formation of a steam-navigation company. Another authority, Mr. J. Seymour Bullock, states that the boat was broken up, when further important improvements rendered her antiquated shape and construction unequal to the increased it, 1826-28. The boat is shown on Fl. 78, Vol. I. Her first public trial took place on Aug. 17 (q.v.)."

A map representing the shore along the Hudson River from the State Prison to the north boundary of the property of Devie Bethune (Bethune St.) bears this date.—See the original (map No. 127), in bureau of topography, borough president's office.

The common council receives a report of James Hardie to the city inspector on the offensive condition of the buried vault of the African Zion Methodist Episcopal Church. "This Society has no burying ground, but inter all their dead in a vault under the church." In the last five years, 750 bodies have been interred there. The board passes an ordinance to stop the practice.—M. C. C. (1874-75), IV: 522. On Aug. 17, the society asked the common council to grant them a piece of ground for a cemetery, and the board ordered "the supt. of the almhouse... set apart a portion of Potters field, about Fifty feet square, for the use of said society."—Ibid., IV: 525.

On the night of Aug. 11 or early morning of the 12th, the first attempted bank burglary in the city's annals occurred. On Aug. 17, the cashier of the U. S. Branch Bank, Mr. Burlar, informed the common council by letter "that an attempt had been made to break into said Bank on the night of the 11th and 12th inst., and charging the Watchman on duty with neglect." The board referred the communication to Aldermen Leroy and Strong, and Mr. Bogardus "to examine into the facts relating to said attempt and to enquire into the conduct of the Watchman on duty."—M. C. C. (1874-75), IV: 535.

The objection is made to "obstructing the Narrows by sinking immense masses of stone," because it would make "a permanent bar of rocks."—N. T. Eve. Post, Aug. 15, 1807.

"Union Garden" is the name now given to Delacroix's former "Vauxhall," at 122 Broadway (see Jl 24, 1805), which has been re-opened by a "Madame Mill." Her ad. states there is an "avenue" to the garden "at No. 27 Cedar-street."—N. T. Eve. Post, Aug. 19, 1807.

In accordance with the common council's request of Aug. 4 (q.v.), Col. Jonathan Williams writes from Fort Columbus (see 1806) to Selah Strong, chairman of the fortifications committee, his opinion whether the Narrows, under all circumstances, be the most eligible place for the obstruction and erection of batteries, in addition to those determined on by the United States, for the protection of the city and harbour of New York. Because of its topo-graphical information, and its value as a public document on the subject of New York's early coast defence, Col. Williams's report is here given practically in full:

"There are people now living who remember when the channel between Governor's island and Long island was fordable, and I have the best authority for saying that about fifty years ago, the water was fordable. The bottom was sand. The bottom was without a paddle, by merely a push with his foot at setting out. By an English chart published in 1776, it appeared that the shallowest water in this passage was at that time three fathoms; by a Chart made by Captain Chauncey and M. Foss, the depth in the same place was in 1795, increased to five fathoms, and there are now seven fathoms of water at low tide. The cause of this is universally, and I believe truly, ascribed to the cast given to the East river ebb tide, by the docking out on that side of the city."

"If this be the effect of a partial obstruction occasioned by the new docks, it may be asked what would be the effect of our general obstruction across the channel between flats of deep and soft mud?"—it is not unreasonable to suppose that a new channel would in such a case, be soon opened on either side. Mr. H. [He describes soundings near Red Hook and Yellow Hook at the Narrows.]
1807

"Buttermilk Channel may doubtless be rendered impassable by chains well protected from the shores of Red Hook and Governor's Island; and the South side of the latter would be a very commanding point for a battery, which would rake the channel just described, to the whole length of cannon shot. The southern point of Gowan's Cove, called Yellow Hook, lies about due east from Robins reef, and nearly at right angles with the channel. After this representation, the Corporation will not think it necessary for me to give any opinion as to the practicability, expediency, cost or effect of obstructions in this place: their own judgments will decide these questions. It must be remembered, however, that in obstructing the channel in this place, there is nothing to prevent the enemy from possessing the Kill's channel, and totally blockading Newark Bay and the sound, thus cutting off all communication with Jersey below Paulus Hook, while the whole anchorage at the quarantine ground is left open, where a fleet of any number or size may ride unmolested and obtain coercively every supply it might want. It will also be matter worthy of consideration, how far this fine harbour may or may not be injured by obstructing the present and opening other channels.

"While upon this business, I thought best to suggest the advisability of extending the reef of the Narrows with more accuracy than could be done by trigonometrical observations, owing to the unstable position of the buoy or boat, which I was obliged to make the apex of the triangle; . . . . [He gives measurements and soundings.]

He discusses the strength of the current, and concludes "that if blocks were to be sunk in the Narrows two sides might be vertical, and if the ends were to be made like the sterlings of a bridge, with a batter or talus of three inches in one foot, their strength would resist the currents and every sort of agitation of the sea from any ordinary cause whatever." Discussing the size and construction of the blocks, he says that the cubical contents of each block would be $134,000$ ft., and by extending the chevaux de frise fifteen feet each way, obstructions of one hundred and ten feet wide might be made to extend from side to side at such distances as to leave ample passage for the water between them.

"Twenty eight of these obstructions, with intervals of eighty feet, would, at the ends of the chevaux de frise, leave intervals of but fifty feet, and form a line quite across the channel . . . . allto' each line of blocks might be half the width of the Narrows, the exact distance being determined by the line of the current, this would be always a safe uninterrupted passage for our shipping, when not closed by a chain, and when closed would float along the current at both flood and ebb, and thereby meet with no resistance laterally, and as the floats would ride each in the rear of the other, the longitudinal resistance would be small. An enemy might attempt to force the chain, would be obliged to clear his way, and consequently his propelling force, by turning at right angles with the wind and tide, and should the tide resist one effect, he would be immediately thrown, by both wind and tide, with its broad side to the line of blocks, and remain at the mercy of the batteries. Now the whole of this defence, even at five cents the cubic foot, would be but three hundred and twenty thousand six hundred dollars, and the chain of batteries would answer for this purpose, is now lying in good order, at West Point. The channel near Robins' reef has on each side an immense expanse of water, and below it a body of soft mud. The channel in the Narrows, has on each side, hard rocks and high grounds, with a bottom that is worn down to its utmost depth, and there is probably nothing but rock remaining. [He develops further the plan, measurements, etc.]

"I do not mean in this new statement, to abandon the position I took in my former communication, relative to Mr. Fulton's torpedoes [see J1 29]. This gentleman, in the several communications I have had with him, appears to be fully possessed of the subject of his invention, upon principles which are all of them reducible to mathematical and experimental demonstration; and seeing, as I have seen, the effect of his Torpedoes, I cannot hesitate to recommending these engines as a very powerful auxiliary. A question of humanity has been raised relative to the use of these machines, which in its effect has rather an inhuman tendency. Let us, if we can, blow up a few marauding invaders, and the immorality and inhumanity of attacking defenceless towns, for the sake of plunder, would be checked, while human miseries would be lessened by rendering such attacks less frequent. Wars have in effect been less sanguinary since the invention of gunpowder; yet when it was first use[d] it must have had a tremendous effect.

He explains the meaning of his first communication (see J1 4 and Aug. 4) in which he said that ships would always pass batteries, adding: "If we were to have batteries without gunboats and obstructions an enemy might pass. If we were to have obstructions without force to protect them, the enemy would leisurely remove the dangerous parts and go between the others. . . . although a reliance upon any one mode might be illusory, the whole combined would certainly protect the Narrows, and insure security and tranquillity to this opulent city."

". . . there must be a sufficiency of time, money, with a very good stock of patience, or their works will never do any good to the public, nor credit to themselves. If this harbour and bay were in possession of any of the belligerent powers of Europe, their Engineers would pronounce it to be perfectly defensible, but they would require a good fund of the three requisites before mentioned, money, time, and patience.

"What then are we to do in case of a sudden unexpected attack? I answer that we must make use of the means we can, on short notice. Extend in front with guns the line of the Narrows; I would征集 of torpedoes to be placed in proper positions, put a gun or two on board each of the North river Sloops, and go down upon the enemy like a swarm of bees. I would recommend however that these auxiliary slopes should keep so far in the rear of the advanced guard, as not to impede their operations. Desperate cases must have desperate remedies; and this bold advance, with our whatsover lined with cannon, might save the city. But this kind of defence should never be relied on, as a sure protection. By frequent repetition, it would be in effect more expensive than permanent batteries; and at every requisition the money so suddenly expended would be all lost; to say nothing of the less occasioned by diverting our citizens from the daily pursuit of their business, and employment of their vessels. The enemy too, might perilously harass us by false alarms till tired of preparations, without using them, we should be caught, when we thought ourselves the most secure."

"As the Corporation have not directed my attention to any particular point, I was desirous of extending my examination down to Sandy Hook, but a violent storm drove me back, under the shelter of Coney island. I had here an opportunity of observing a fine land locked bay, called Gravesend bay, where the water was smooth, and where the largest ship ever crossed the ocean could ride with perfect safety in four or five fathoms of water, only a superior naval force could annoy it.

"Between the Narrows and the Hook there does not appear one single point above water except Coney island, from which a ship could be touched, and this is so much exposed to be attacked with success, or to be startled out that it cannot be thought a proper place for a garrison. It is merely a sand bank without vegetation and without fresh water, and even if it were formible, ships could keep at too great a distance to suffer from its shot, whatever might be their number or power. Although I could not visit Sandy Hook, I have a tolerable knowledge of that point, having passed it, and examined very accurate charts. From my experience in the rivers, inlets, etc., on the coast of North and South Carolina, I am confident that no obstructions could be permanently placed on these moving sandbars at the margin of the ocean. Such ideas should in my opinion be abandoned as soon as conceived, and although I have seen a very elegant plan for fortifying this Hook at the expense of four millions of dollars, and a perpetual garrison of eight thousand men, I cannot hesitate to say, that if the plan were executed it would not in my opinion prevent an enemy's fleet from passing by, and occupying Gravesend Bay with very little injury."

The common council, to whom the letter is presented on this day, orders "that the Report of Col. Williams be printed for the use of the Board."—M. C. G. (1784-1812), IV. 531-36.

The original (MS.) report is preserved in metal file No. 74, city clerk's record-room. See Aug. 18.
The first public trial of Robert Fulton's steamboat is made; it sails from New York to Albany with about forty guests. Only one newspaper gives notice of this important happening. It says: "Mr. Fulton's ingenious Steam Boat, invented with a view to the navigation of the Mississippi from New Orleans upwards, sails to-day from the North River, near the State Prison to Albany. The velocity of the Steam Boat is calculated at four miles an hour; it is expected that it will make a progress of two against the current of the Mississippi; and if so it will certainly be a very valuable acquisition to the commerce of the Western States."—Am. Cit., Aug 17, 1807.

Fulton thus described his departure in a letter to an unidentified friend: "The moment arrived in which the word was to be given for the boat to move. My friends were in groups on the deck. There was a hush of excitement with fear among them. They were silent, sad and weary. I read in their looks nothing but disaster, and almost repented of my efforts. The signal was given and the boat moved on a short distance and then stopped and became immovable. To the silence of the preceding moment, now succeeded murmurs of discontent, and agitation, and whispers and shrugs. I could hear distinctly repeated—"I told you it was so; it is a foolish scheme; I wish we were well out of it."

"I elevated myself upon a platform and addressed the assembly. I stated that I knew not what was the matter, but if they would be quiet and indulge me for half an hour, I would either go on or abandon the voyage for that time. This short respite was conceded without objection. I went below and examined the machinery. I discovered that the cause was a slight maladjustment of some of the work. In a short time it was obviated. The boat was again put in motion. She continued to move on. All were still incredulous. None seemed willing to trust the evidences of their own senses. We left the fair city of New York; we passed through the romantic and ever-varying scenery of the Highlands; we descried the clustering houses of Albany; we reached its shores—and then, every time, when all seemed achieved, I was the victim of disappointment."

"Imagination superseded the influence of fact. It was then doubted if it could be done again, or if done, it was doubted if it could be made of any great value."—Sutcliffe, Robert Fulton and the 'Clermont,' 202-4. Fulton gave additional information in his letter to Joel Barlow on Aug. 22 (p. 127).

H. Freeland, who viewed the boat from the shore, wrote in 1876: "It was in the early autumn of the year 1807, that a knot of villagers was gathered on a high bluff just opposite Poughkeepsie, on the west bank of the Hudson, attracted by the appearance of a strange dark-looking craft, which was slowly making its way up the river...."

"The strange-looking craft was the 'Clermont' on her trial trip to Albany. I well remember the scene, so well fitted to impress a lasting picture upon the mind of a child accustomed to watch the vessels that passed up and down the river."

"On her return trip, the curiosity she excited was scarcely less intense—the whole country talked of nothing but the sea-monster, belching forth fire and smoke. The fishermen became terrified, and rowed homewards, and they saw nothing but destruction devastating their fishing-groves; whilst the wreaths of black vapour, and rushing noise of paddle-wheels, foaming with the stirred-up waters, produced great excitement amongst the boaters."

"—Reigart, Life of Robert Fulton, 175-77.

M. Michaux, a distinguished French botanist who accompanied Livingston and Fulton on the return trip from Albany, wrote of it: "We had been three days at Albany when the arrival from New York of a vessel propelled by steam was announced. This boat, which was decked, was about 25 metres (82 feet) [evidently an error; the length was 150 feet] long and was commanded by the inventor, Mr. Robert Fulton. Many of the inhabitants of the city and strangers who were there at the time went to visit it. Every one made his remarks upon the advantages consequent upon the arts of navigation, but also upon the serious accidents which might result from the explosion of the boiler. The vessel was lying alongside the wharf; a placard announced its return to New York for the next day but one, the 20th of August, and that it would take passengers at the same price as the sailing vessels—three dollars."

"So great was the fear of the explosion of the boiler that no one, except my companion and myself, dared to take passage in it for New York. We quitted Albany on the 20th of August in the presence of a great number of spectators. Chancellor Livingston, whom we supposed to be one of the promoters of this way of navigating rivers, was the only stranger with us; he quitted the boat in the afternoon to go to his country residence which was upon the left bank of the river. From every point on the river whence the boat announced by the smoke of its chimney, could be seen, we saw the inhabitants collect; they waved their handkerchiefs and hurried for Fulton, whose passage they had probably noticed as he ascended the river."

"We arrived the next day between one and two o'clock at New York. We separated from Mr. Fulton after paying him the price of our passage. The day after our departure from Albany, and a few minutes after Chancellor Livingston had quitted us, Mr. Fulton exhibited that notwithstanding the number of persons who were going to New York, only two Frenchmen had the courage to embark with him."

"—Sutcliffe, op. cit., 228-29.

Fulton sent the "log" of his trip to the one paper which had announced his departure, and the editor, after printing it, remarked: "We congratulate Mr. Fulton and the country on his success in the Steam Boat, which cannot fail of being of very advantageous. We understand that not the smallest inconvenience is felt in the boat either from heat or smoke."—Am. Cit., Aug 22, 1807. The boat had to be repaired and refitted before it was started as a packet (see Aug 29 and S. 2).

Broadway, "the principal avenue of our City," is complained of being "an object of regret and ruin" that no one can "drive through it after dark, but at the hazard of limbs and life," and "after a heavy rain the water is up to the horse's girth which renders it impossible to see where to guide," etc.—N. Y. Ecc. Post, Aug 17, 1807.

Stagg & Anson having completed their contract for regulating part of Broadway above Jones Street, the common council ordered payment of the balance due them, $250.—M. G. C. (1784-1811), IV: 528, 539. See also Aug 4.

On this evening will be presented at the Vauxhall Theatre "a new grand allegorical pantomimic spectacle, interspersed with song, recitative and dancing, called Cinderella; Or, The Little Glass Slipper. Invented by Mr. Byrne, and performed at the Theatre Royal, Drury Lane, upwards of one hundred nights the last season, to overflowing houses, and at the Theatres of Philadelphia and Charleston, with unbounded applause...."—Daily Advr. Aug 17, 1807. See further, Jl 11, 1808.

"A Friend of Commerce" writes a letter of protest against Col. Williams' plan of obstructing the Narrows. He fears the proposed permanent obstructions will increase the bar already existing between the point of Sandy Hook and Long Island. The projected works will ruin the harbour of New York. Williams would destroy the blockus and Chevaux de frize in a few years, the stoves would remain an everlasting monument of the folly of the projector.—N. T. Ecc. Post, Aug 19, 1807. See also Aug 24.

Col. Jonathan Williams writes to Selah Strong an account of soundings he has made of the Channel from the southern point of Red Hook west and south.—From the original letter filed with the papers and plans presented by Dr. Mitchell in 1810 to the N. Y. H. S. The letter is printed in M. G. C. (1784-1811), IV: 544-45. In republishing an essay from Salmagundi entitled "Plans for Defending our Harbour, By William Wizard, Esq.," the editor of the Evening Post says: "The following hits off admirably some of the late philosophical, economical plans which our philosophical and economical administration seem to be so intent on adopting for the defence of our harbour," and adds that the author is "one who is a legitimate descendant from Rabelais, and a true member of the Butler, Swift, and Stereae family.

"William Wizard" begins: "Surely never was a town more subject to mid-summer fancies and dog-day whim-whams than this most excellent of cities.... This summer every body has had full employment in planning fortifications for their harbour. Not a cobbler or tailor in the city but has left his awl and his thimble, become an engineer outright, and aspir'd most magnanimously to the building of forts and destruction of navies!" He gives a humorous description of the torpedo experiments (see Jl 20), re-marking that all that is needed for their success is that the ships must come to anchor in a convenient place—watch must be asleep, or so complacent as not to disturb any boats paddling about them.
—fair wind and tide—no moon-light—machines well-directed," and suggesting that the same would be more certain if the projector be so effectual in the project "so that if the machine did not come to the ship, the ship would go to the machine." After detailing a discussion on this subject at Hogg's Tavern, he adds: "By this time all the quid nones of the room had gathered around us, each pregnant with some mighty scheme for the salvation of his country. One pathetically lamented that we had no such men among us as the famous Tom Thumb or Conor Begley, when the celebrated Captain Tranchemont made war against the city of Kalacabalaba, utterly discomfited the great Bigstaff, and blew up his whole army by sneezing. Another imparted a sage idea which seems to have occupied more heads than one—that, that the best way of fortifying the harbour was to ruin it at once; choke the channel with rocks and blocks; strew it with chains, defiles and unfortified forts, the whole raised on half the mountain, full of men-traps and spring-guns. No vessel would then have the temerity to enter our harbour—we should not even dare to navigate it ourselves. Or if no cheaper way could be devised, Governor's Island might be raised by levers and pulleys—floated with empty casks, &c. towed down to the Narrows, and dropped plump in the very mouth of the harbour!"

"A shrewd old gentleman who stood listening by with a mischievously equivocal look observed that the most effectual mode of repulsing a fleet from our ports would be to administer them a proclamation from time to time, till it operated."

"Unwilling to leave the company without demonstrating my patriotism and ingenuity I communicated a plan of defence, which I have since suggested long since by that illustrious Mustapha. ... He thought the most effectual mode would be to assemble all the slang-whangers, great and small, from all parts of the state, and march them at the battery, where they should be exposed, point blank, to the enemy, and form a tremendous body of sacking infantry. ... They should be exhorted to fire away without pity or remorse, in sheets, half-sheets, columns, handbills or squibs—great cannon, little cannon, picas, german text, stereo-type—and to run their enemies through and through with sharp pointed italics. ... If, continued Mustapha, you wish men to fight well and valiantly, they must be allowed those weapons that they have been used to handle. Your countrymen are notoriously adroit in the management of the tongue and pen, and conduct their battles by speeches or newspapers.

"The sly old gentleman, I have before mentioned, was highly delighted with this plan, and proposed, as an improvement, that mortars should be placed on the battery, which instead of throwing shells and such trifles, might be charged with newspapers, Tammany addresses, &c. by way of red-hot shot, which would undoubtedly be very potent in blowing up any powder magazine thereby coming in contact with them."

"These are but two or three specimens of the naivety and efficacy of the innumerable plans with which this city abounds. Every body seems charged to the muzzle with gun-power; every eye flashes fire-works and torpedoes, and every corner is occupied by knots of inflammatory projectors, not one of whom but has some preposterous mode of destruction which he has proposed to be inoffensive by a previous experiment in a tube of water. ..."

Robert Fulton writes from New York to Joel Barlow of Philadelphia: "My Steam Boat voyage to Albany and back has turned out as well as I expected. I have calculated. The distance from New-York to Albany is 150 miles. I ran it up in 24 hours and down in 16 hours. The latter is just five miles an hour. I had a light breeze against me the whole way going and coming, so that no use was made of my sails; and the voyage has been performed wholly by the power of the steam engine. ... The power of propelling boats by steam is now fully proved. The morning I left New-York I lie under anchor at the pier where the theatre is situated, and believed that the boat would ever move one mile an hour or be of the least utility. And while we were putting off from the wharf, which was crowded with spectators, I heard a number of sarcastic remarks: "Having employed much time and money and zeal in accomplishing this work, it goes me, as it will you, great pleasure to see it so fully answer my expectations. ... And although the prospect of personal emolument has been some inducement to me, yet I feel infinitely more pleasure in reflecting with you on the immense advantage that my country will derive from the invention. However, I still not admit that it will not do for the system of defence and attack; for out of this will grow the liberty of the seas. ... But thousands of witnesses have now seen the steam boat in rapid movement, and they believe—but they have not seen a ship of war destroyed by a torpedo, and they do not believe— ... But in case we have war, and the enemy's ships come into our waters, if the government will give me reasonable means of action, I will soon convince the world that we have faster and cheaper modes of defence than they are aware of."—Republican Watch Tower, S 4, 1807.

The Weekly Inspeotor (see Ag 30, 1806) is discontinued with the issue of this date. —Brigham, A. A. S. Proc. (1917), 504.

The common council hears the following report of the committee on the subject of fortifying the harbour of New York:... orders that it be printed for the use of the board: "The Committee that was appointed to carry into effect the resolutions of the Corporation dated the 13th of July last, offering to cede to the United States such part of the public ground as the Secretary at War may require for the purpose of erecting fortifications for the defense of this city—and also the resolution, dated the 4th of August, offering the aid of this Board to the Executive of this Body, to enable him more effectually to put in proper condition, for immediate service, the arms and ordnance belonging to the State, and to procure such military stores as the present exigencies may require—also to devise such other means of defence as may be in the power of this Board to execute: Report: \"The Secretary at War, with the other Commissioners of the United States, have determined, not only to enlarge and make durable, the works on Governor's island but are now about erecting a very strong and powerful marine battery, on the North-west point of that island, to extend on the reef, beyond low water mark, into the river. The works on Ellis island are to be extended, and the number of guns and weight of metal greatly increased. It is also determined by the general government to erect a strong fort, with two or three tiers of guns, to extend beyond the present battery, in front of the flag staff; also to build a block in the North river, at the foot of Duane Street, of 100 feet square, and to erect a battery thereon. When these works are completed, it is understood they will be able to bring 120 guns to bear upon any point in the bay, between Bedloe's island and the city. The Commissioners have also fixed upon the old Potter's field, as a proper place to erect laboratories and arsenals for depositing and repairing arms and military stores. \""

The details of the system of blocks and chevaux de frise, as proposed by Col. Williams (see JI 29 and Ag 17), are given and explained. The use of a chain or boom as part of this system of obstructions is one of its primary features. The objections to this plan of defending New York by submarine obstructions (see e. g. Ag 18 and 24) are severally answered.

A calculation of the expense of making the obstructions and near-by forts is given, and suggestions are offered for raising the funds.

The closing paragraph of the report is significant of existing conditions of unpreparedness: "This is a work of great magnitude, and will take more than one year to complete it. The materials are not to be had in sufficient quantities at present, but we ought to make a beginning this year with what materials can be procured, and the works may probably be finished in the course of the next summer. If we should unfortunately be involved in a war, in consequence of the present dispute with England, it will most probably take place before any effectual system of defence can be completed, and we must submit to our unhappy situation. But if the storm should blow over, we ought not to desist from our determinations, to put the city in a state of defence; we cannot always promise ourselves an exemption from the calamities of war: on the 30th of June last, the country felt as secure and as confident of the continuance of peace, as on the 3rd of May, the first day of the events that have recently taken place, it is seen upon what an uncertain tenure the peace of nations depends. The advice of our immortal Washington ought therefore to be inforced: 'that to preserve peace we ought always to be prepared for war.'" (Signed) "Selah Strong Jacob Mott John D. Miller."—M. C. C. (1784-1831), IV: 545-51. On Aug. 27, the report was again read, debated and adopted.—Ibid., IV: 552. The original report (MS.)
Thomas Paine is another objector to Col. Williams’s plan of obstructing the Narrows (see Ag 17 and 18). He says in a published letter: “...The plan of obstruction now proposed for New-York is by blocks, that is, solid bodies of stone or earth in the manner of wharves. This was first suggested by Selah Strong, chairman of the committee of the corporation, and is a plan published by Mr. Stevens of Hobuck, which contains many just observations on ships and batteries, he adopts the same unfortunate idea of obstructing by blocks. ... And the editor of the New-York American Citizen, in introducing Mr. Smith’s piece in his paper of Saturday last, says, why not to make assurance doubly sure, to give us in fact protection, carry the obstruction of blocks or otherwise enough of a distance, up to the Reefs of Blackwell Island. This, most certainly, would prevent hostile ships coming to the city, and it is equally as certain it would prevent the tide coming up and lay the wharves at New York dry, and be the ruin of all the towns of the North River that depend for commerce on tide water. ... If Selah Strong’s project is adopted, New York is ruined, for the obstruction by blocks cannot afterwards he removed. ... In projecting obstructions two things are absolutely necessary to be taken into view.—The one is, the least possible obstruction to the water up or down; the other is, that the obstruction be such as can be moved afterwards. Neither of these entered the mind of the projector of blocks. ... If the channel between Robin’s Reef and Mud Flat is not more than about 36 feet, it can be obstructed as the Delaware, and the obstructions can be defended by gun-boats and batteries, and the militia can defend the shore at the back of the people of Norfolk have done; but for men to be always employing themselves on imaginary fortifications or sculling behind, or within obstructions like a turtle within his shell, lest the crowds should pick him, has a very cowardly appearance. It is not the spirit of the times that tried men’s souls.”—N. Y. Econ. Post, Ag 24, 1807, citing the Public Ad.

A report of the committee of repairs “on the dilapidated state of Oswego Market, ... recommending that the eastern end of said Market be taken down,” is read in common council and approved.—M. C. (1784-1831), IV: 541.

The subject of further fortifying the harbour of New York is still under consideration, and Albert Gallatin, secretary of the treasury, who is in the city, writes under this date to Pres. Jefferson: “There is such variety of opinions here on the subject of fortifications and those so much influenced by Federalism and local politics that it is difficult to unite even our friends in favor of one rational plan. I think, however, that I have succeeded in defeating the extravagant and inefficient plan of defending the Narrows which the corporation (this year Federal) intended to promote, either at the bottom or partially. But as the enemy may come against government. Colonel Williams was unfortunately drawn in to favor the plan for which engineers, fond of displaying their talents have some predilections.”—Adams, Writings of Albert Gallatin, I: 354. See Ji 25. (Marion Willett was mayor at this time.)

The interior of the Park Theatre having been completely taken to pieces except the walls and the stage, and rebuilt under the direction of the architect, John Joseph Holland, the building is now called the “New Theatre.” One newspaper thus described it: “New-York may now boast of a Theatre which unites more of taste, grandeur, room, convenience and elegance than any one in the United States; several foreigners who have examined it have pronounced it superior to any one in Europe. We speak of the interior only, for its outside remains just as it was, a standing libel on the taste of the town.—The whole audience part of the house from the pit to the dome, has been pulled down; a new pit has been erected both wide & deep, and so well constructed, as to afford every person an uninterrupted view of the whole stage. The avenues to it are commodious, and it has a bar room and supper room annexed. The new tiers of boxes take the place of the former for the upper tiers. The seats are covered with crimson, and between each box is to hang a festoon drapery of the same colour. Each of the dress boxes near the stage is to have a large oval mirror, disposed in such a manner as to reflect a view of the audience. There are four private boxes next the stage communicating with small private rooms, handsomely furnished. The boxes are supposed to contain 252 seats; the lower tier 392, the second and third 180 and 186. The pit is supposed to contain about 500 and the gallery 600; total 2572. The massy columns which stood, on each side, between the audience and the stage have been removed and their place is now occupied by two fluted pilasters of complete Corinthian order with an inscription of Gaolith Seaton on the architrave. The architecture it is said, has been modelled after the celebrated front of the temple of Jupiter at Athens. The entrances to the Scala, and the Stairs to the Music Hall, are entirely new, and the whole is well lighted at the back of which, and in the front of the house, are two large, finished rooms, one over the other; the lower of which is to be handsomely furnished and is intended as a tea, coffee, confectionary and fruit room for ladies and the upper as a sort of bar room for gentlemen. ... It is a structure that cannot fail to reflect immense credit on its architect, the celebrated Mr. Holland, from London.”—N. Y. Econ. Post, Ag 23, 1807.

Dunlap says: “As the Park theatre was originally constructed, and as it remained until the proscenium was remodelled by Mr. Holland, there were no pillars as props to the upper boxes: they were supported by timbers projecting from the walls, and appeared, with their tendons, self-balanced. Of course, there were no obstructions in front of the boxes as is now the common practice; each box, or box, and each obstrummental pillar is placed to be, that they impede the view of the spectator, and prevent his seeing more or less of the stage, is undeniable.

“Another peculiarity belonged to the boxes of this theatre, as first erected. There was a large box occupying the front of the second tier, and directly placed in front of the stage, capable of containing between two and three hundred persons, which was called ‘The Shakespeare,’ and was the resort of the critics, as the pit of the English theatres has been in former times.

“The remodelled building had none of the above peculiarities. It was a more splendid and more commodious theatre than that which it superseded.”—Dunlap, Hist. of the Am. Theatre (1852), 345-44. The alterations were completed “in the short space of three months.”—Ibid., 342. See also N. Y. Com. Adv., S. 1, 1807. See S 9.

Robert Fulton writes to Chancellor Livingston: “On Saturday 29 I wrote you that I arrived here on Friday at four o’clock, which made my voyage from Albany exactly thirty hours. We had a little wind on Friday morning, but no waves which produced any effect. I have been making every exertion to get off on Monday morning, but much to our disgust, in order to raise the wind on the sides, decking over the boiler and works, finishing each cabin with twelve berths to make them comfortable, and strengthening many parts of the iron work. So much to do, and the rain, which delays the caulkers will, I fear, not let me off till Wednesday morning. Then, however, the boat will be as complete as she can be made—all strong and in good order and the men well organized, and I hope, nothing to do but to run her for six weeks or two months. The first week, that is if she starts on Wednesday, she will make one trip to Albany and back. Every succeeding week she will run three trips—that is, to two Albany and one to New York, or two to New York and one to Albany, always having Sunday and four nights rest to the crew. By carrying for the usual price there can be no doubt but the steamboat will have a much greater share of the certainty and agreeable movements. I have seen the captain of the fine sloop from Hudson. He says the average of his passages have been forty-eight hours. For the steamboat it would have been thirty certain. The persons who came down with me were so much pleased that they said they were established to run periodically they would never go in any thing else. I will have her register when it starts at the preference because it looks well and I have no doubt will be very productive.”—Sutcliffe, Robert Fulton and the ‘Clermont,’ 256-58. See S 2.

On or about this day in August, Col. Williams wrote from Fort Columbus to Selah Strong, chairman of the committee on fortifying New York, saying that “the difficulty of fixing determinate lines on a watery surface” had delayed his application to Alderman Strong “for certain cessions of submarine and other territory to
Respectfully inform their friends and the public, that they have furnished themselves with a good substantial Stage, excellent horses, and a very careful driver, and intend to run a Stage on this route every day in the week, (Sundays excepted). The Stage will start from Marrener's Inn, at Harlem, every morning at 8 o'clock, for New-York; and from Baker's Porter-House, Wall-street, New-York, for Harlem, at 3 o'clock in the afternoon. This Stage will take the Harlem road one day and Bloomingdale the next.

The Fare for each Passenger to or from Harlem FIFTY CENTS.

SEATS in this Stage may be taken at the Bar of either of the above Houses.

NEW-YORK, APRIL 5.
the United States in conformity to the resolution of the Corporation of the 17th of July" (5, 2). He added his proposals by measurement of water lots desired at the Battery, "with a right of ingress and regress to and across the Battery to the main street." He also defined the grant desired near Rhinelander's wharf (on the North River). Here, "The Corporation may further restrict, if they please, that the Bridge to be made to connect the Fort with the shore shall have a draw in it sufficient for vessels to pass and return built should not be exposed to any buildings near them on either side on account of the danger of Fire. I should therefore think it proper for the line to extend to the road on each side and so wide as to admit a large yard to be inclosed which may also serve for a deposit for various purposes. The metes and bounds of this may be ascertained by the City surveyor and I will attend him."

The extracts from the letter from Gov. Tompkins, referred to, which is dated "New York. 25th July, 1807," are (1) "The land around the Bastion of the old Battery belongs to the Corporation of New York, together with the land on the Battery which will be necessary to answer the purposes of fortification."

(2) "The land at Potterfield originally belonged to the Corporation, as a piece of land to the west of an Arsenal, but as it has not been applied to that use by the State, and as by an act of the Legislature a lease which the Surveyor General had given of it was directed to be assigned to the Corporation and the rent which had been received in the mean time was ordered to be refunded to them, it is presumed the right of the State was relinquished and that the property revested in the Corporation. At any rate I think their title will be deemed adequate, and that you will have nothing to apprehend from any interference with you by the Agents of the State."

(3) "The resolution of the Corporation of the 15th inst. [g.v.] embraces the whole property belonging to them. It will therefore be necessary for you only to furnish them with the precise limits and boundaries of the land required to answer your objects and a conveyance will be forthwith executed therefor."—M. C. C. (1784-1812), IV: 569-68. See further, S 14.

Roger Strong, alderman of the Fifth Ward, produces a commission, approved by the governor, as deputy-mayor, and takes the oath of office.—M. C. C. (1784-1812), IV: 553.

The common council passes the following resolutions: "Received the report of the commissioners in the matter of the Oyster reef without delay. The First pier to be sunk Six hundred feet from said Reef and the other piers alternately three hundred feet distant from each other. That immediate notice be given in the public papers, that contracts will be received at the Comptroller's office until the 3d of September, the contracts to specify the number of Piers each contractor will engage to sink and the price per cubic foot."

The resolution also provides for the city's borrowing $200,000 of the "Banks," but only $250,000 at one time; that it be deposited in the city treasury, and the treasurer be directed "to open an account under the head of Fortifications, and that the money so loaned be used solely for the purpose of fortifying this city."—M. C. C. (1784-1812), IV: 557-58. See, however, S 7 and 28. In its issue of Sept. 1, the editor of the Ev. Post commented unfavourably on the resolution.

The common council resolves "that the Freedom of this City and the thanks of this Board be presented to Colonel Jonathan Williams for his prompt and judicious services rendered on the subject of protecting and fortifying the Port and Harbour of New York." The clerk of the board is directed to furnish him with a copy of the said resolution. M. C. C. (1784-1812), IV: 557, 559.

The common council refers to the committee on fortifications a letter from John Stevens of Hoboken, "respecting the protection of the Harbour of New York by means of Chevaux de frise."—M. C. C. (1784-1812), IV: 554.

About this time, there was made a pen-and-ink drawing of a "Plan and Sections of a Chevaux de Frise for protecting a navigable channel against the entrance of ships of war." It is in three parts: "Transverse section," "Plan," and "Section in the direction of the current." It is preserved with "Filed Papers, 1804-1808," in city clerk's record-room.

The common council receives, and orders to be filed, a letter, dated Aug. 8, from Edward Telfair, chairman of the citizens of Savannah, Ga., to Mayor Willett, enclosing a copy of their resolutions and proceedings "relative to the late insult and daring outrage on the United States Frigate the Chesapeake by a British Ship of war in sight of our coast."—M. C. C. (1784-1813), IV: 554. The original letter with its enclosure (a printed broadside) is preserved in metal file No. 34, city clerk's record-room.

The common council receives a letter from the supt. of the almshouse to the mayor, "stating the services and merits of Thomas Piers, contractor of the public works, who has formally received a compensation for his services." The board orders "that he be allowed at the rate of Fifty Dollars a year, commencing from the 1st of January last."—M. C. C. (1784-1813), IV: 554.

The common council suspends the operation of the section of the public health law which prohibits the introduction of oysters into the city from June 1 to Sept. 30.—M. C. C. (1784-1813), IV: 557.

The British frigate "Jason," having anchored inside Sandy Hook, sends a boat ashore there to ask for a pilot to take the frigate to New York. The published details of what followed show that all pilots avoided the frigate. One pilot-boat, the "Thorn," was followed by the frigate's small-boat. The lieutenant in charge of the latter on coming up to the former demanded an explanation, and said the captain had dispatches to deliver. The pilot replied that the dispatches might be taken by the Steamboat, or an officer might be sent down from New York to get them. The lieutenant then ordered his men to take possession of the "Thorn," and "one of his men actually took hold of the helm, but Mr. Mitchell [the pilot] knocked the man away from the helm, and declared his determination to oppose what force he had to any outrageous attempt to take possession of his vessel." After some abusive language from the British officer, he left the "Thorn" and proceeded to another pilot-boat, the "Ranger," at anchor near the frigate.—Am. Cit., S 25; Aurora, S 8, citing N. Y. Pub. Adv., S 5, 1807.

Some correspondence having taken place between the commander of the frigate and the surveyor of the port, the frigate dropped down to Sandy Hook from the quarantine ground on Sept. 2, with a pilot on board.—Am. Cit., S 41; Aurora, S 9, 1807. This was after the collector had published at the custom-house the following notice, dated Sept. 5:

"The President's Proclamation [of July 2, p. 1] having intercepted all communication and intercourse between the citizens of the United States and the ships of war of his Britannic majesty, all persons are hereby notified that the penalties incurred by a breach of said proclamation will be rigidly enforced. David Gelston, Collector."—Aurora, S 9, 1807.

The first advertisement of Fulton's steamboat as a packet appears. It reads: "The North River Steam Boat Will leave Pauler's Hook Ferry on Friday the 4th of September, at 6 in the morning, and arrive at Albany, on Saturday, at 6 in the afternoon.

Provisions, good berths and accommodations are provided.

The charge to each passenger is as follows:"

| To Newburgh | $3     |
| To Poughkeepsie | 4      |
| To Esopus | 4 1/2  |
| To Hudson | 5      |
| To Albany | 6      |

For places, apply to Wm. Vandervoort, No. 48 Courtland-street on the corner of Greenwich-street ...

"—N. Y. Ev. Post, S 2, 1807.

Judge John Q. Wilson, one of the passengers on the first packet trip, wrote the following account in 1856: "The writer of this article resided in New York, and was often in the shipyard when Mr. Fulton was building his first boat. She was a queer looking craft and like every thing new, excited much attention, and not a little ridicule. When she was launched, and the steam engine placed in her that also was looked upon as a piece with the boat to float it. In those days the operations of the steam engine were but little known. A few had seen the one for raising the Manhattan water, but to the people at large the thing was a hidden mystery. Curiosity was now greatly excited. When it was announced in New York that the boat would start from the foot of Courtlandt street at 63

Aug. 31

Sept. 1

Sept. 30
1807 Sept. 2

o'clock on Friday morning, the 4th of September, and take passengers to Albany, there was a broad smile on every face as the inquiry they right there. A friend of the writer of this article, hearing he intended to venture, accosted him in the street: "John, will you risk thy life in such a concern? I tell thee she is the most fearful wild fowl living, and thy father ought to restrain thee."

"When Friday morning came the wharves, piers, housestops, and every spot from which a sight of the vessel could be obtained, were filled with spectators. There were twenty berths, and every one was taken. The fare was $7. All the machinery of the boat was fully exposed to view; the water and balance wheels were entirely uncovered. The peripheries were of cast-iron, some four inches or more square, and ran just clear of the water. The weight of both the water and balance-wheels was sustained by the shafts, which projected on the sides of the vessel. There were no outside guards. The forward part of the boat was covered by a deck, which afforded shelter for the men employed in navigating the boat. The after part was fitted up in a rough manner for passengers; the entrance into the cabin was from the stern, in front of the steerer, who worked a tiller, the same as in an ordinary sloop. Thick, black smoke issued from the chimney—steam hissed from every ill-fat ed valve and crevice of the engine, but Fulton himself was there in his remarkably clear and sharp voice was heard above the hum of the multitude and noise of the engine. All his actions were confident and decided, unheed- ing the fearfulness of some and the doubts and sarcasms of others.

The time for the departure of the boat arrived; some of the machinery still required to be adjusted; there was a delay. Some of the passengers said, in Fulton's hearing, they feared the voyage would prove disastrous. He replied:

"Gentlemen, you need not be uneasy; you shall be in Albany before twelve o'clock to-morrow."

"When everything was ready, the engine was started, and the boat moved steadily but slowly from the wharf. As she turned up the river and was fairly underway there arose such a huzza as ten thousand throats never gave in her before. The passengers returned the cheer, but Fulton stood erect upon the deck, his eye flashing with an unearthly brilliancy as he surveyed the crowd. It was agreed that a kind of log-book should be kept. Gerrit H. Van Wagenen was designated to give the time, and the writer of this article to set it down. As we passed West Point the whole garrison was out and cheered us. At Newburgh it seemed as if all Orange County had collected theretoe the whole side-hill city seemed animated with life. Every sail-boat and water craft was out; the ferry-boat from Fishkill was filled with ladies. Fulton was engaged in seeing a passenger landed, and did not observe the boat until she bore up alongside. The clipping of the sail arrested his attention, and as he turned, the waving of so many handkerchiefs and the smiles of bright and happy faces, struck him with surprise. He returned, and exclaimed, "That's my man! That's my man! Union yet."—Sutcliffe, Robert Fulton and the 'Clermont,' 246-52. The "log-book," signed by the passengers, was printed in the Am. Cits., S 11, 1807. See S 3.

"Mercator" contributes to one of the newspapers a plan for the defence of New York harbour. This is accompanied by diagrams and includes suggestions for blocks, batteries, chevaux-de-frises, etc. The expenses were estimated at $1,000—S 7, 1807. "Mercator" was G. W. Chapman, as appears from a copy of the paper sent with letters to Dr. Mitchell by Chapman, and presented by Dr. Mitchell in 1810 to the N. Y. H. S.

One of our gunboats, coming into port, is fired upon within Sandy Hook by the British armed brig "Columbine," now within our waters in violation of the president's proclamation of July 2 (p. 9.).—Am. Cits., S 7, 1807.

The custom-house barge and a pilot-boat in the service of the custom-house go down to Sandy Hook "to watch the motions of the interdicted ships" (see S 1).—Am. Cits., S 5, 1807.

A boat with a lieutenant and six men is sent from the British brig "Jason," with dispatches for Col. Barclay, the British Consul at New York. "As soon as the boat had reached the shore to the six armed men and were pursued by the Lieutenant, who took out his pistols and threatened to fire on them if they did not stop and return to their duty. A mob immediately assembled, protected the men, abused the Lieutenant, and handled him very roughly; and something serious would have happened, if Captain Chauncey, of the U. S. Navy, had not been present, who by very great exertions protected him from their fury. The Lieutenant made a formal demand of the men. Whether they were given in or not does not appear.—Columbia Centinel, S 13, 1807.

The common council discharges the committee, appointed on July 13 (p. 5.), "on the subject of protecting and fortifying the harbour of New York," and appoints Aldermen Mott, Ritter, and Miller, and Messrs. Bogardus and Depeyster a committee to devise ways and means, by way of a loan from individuals or the Banks for the purpose of working into effect the Resolution of this Board adopted the 23d Ult* [see Ag 24] to protect and fortify the harbour of New York, and to report thereon."—M. C. C. (1784-1831), IV: 560. See, however, S 28.

The common council authorizes the street commissioner to accept proposals to deliver earth to the Collect Pond at $5 cents per load.—M. C. C. (1784-1831), IV: 560.

The 7th of August 1807 will be opened this Evening for the first time, with a prelude written for the occasion, in which an appropriate address will be delivered by Mr. Cooper; the pleasing comedy of the Country Girl, with the popular and splendid after-piece of Paul and Virginia. The new house is commodious beyond the wish of accommodation, and is reconstructed and fitted up within, in a style . . . .honourable to the intelligence of medical managers, the arrangements of Mr. Hoard, the architect, and the task of Mr. Cygier, the upholsterer. . . .—Republican Watch Tower, S 11, 1807.

The common council hears a reading communication from John S. Hunn, the street com'rs, who reports that "he has this morning attended with Colonel Williams at Duane Street Basin to ascertain the party and position of the steamboat, and wishes the Corpora- tion to convey to the United States for fortifications at that place." He presents to the board Col. Williams's letter of "August" (see Ag 30), defining the grant desired. He continues:

"In order to preserve the wharves and basin as much as prac- ticable the subscriber has pointed out the grounds to be occupied by the United States as portrayed on the sketch herewith pre- sented [reproduced in the minutes with the report]. To this area Colonel Williams has given his consent giving him free egress and regress over the pier to a draw bridge leading to the works." He then describes the grounds with reference to the sketch or map, and asks whether he shall "direct the survey and maps for the cession to the United States to be made in conformity therewith." The board orders "that the Comptroller prepare a deed in con- formity, on condition that the premises be applied by the United States for the sole purpose of erecting a Fortification for the defence of this city to be commenced forthwith."

The board also resolves "that the Street Commissioner cause the survey of the shores of this city, lately ordered to be made, to be completed and a plan thereof presented to this Board at its next meeting."—M. C. C. (1784-1831), IV: 564-568. The original report (MS.) is contained in the last night file of 24th, 1807. See N 23. On Oct. 26 (p. 2.), the proposed site at Duane St. was changed to the foot of Hubert St.

Joan Humbert issues the following notice: "The Volunteers of the Tammany War Band [see I 13] No. I, who are already enrolled, and all others (members of Tammany Society) who intend and have not yet signed the roll, are requested to attend at Head Quarters, Market St. This Meeting at 7 o'clock, on business relative to the band.—Am. Cits., S 18, 1807."

In a communication to the common council, John S. Hunn, the street com're, says "that he has been at the Old Potter's field with Colonel Williams to point out, more particularly, the ground intended to be ceded to the United States, and mentioned to him that a Street lying at right angles from Bloomingsdale road to Albany Avenue cutting off an angle from the rear of the public buildings, was long since intended to be opened by conversations with General Bailey upon that subject, who owns the grounds adjoining thereto. Colonel Williams approved of the arrangement as the public ground would then be surrounded by spacious streets and the property in the vicinity be more protected from the ex- plosion of a magazine in case such an accident should happen. And he requested the Street Commissioner to obtain from General Bailey his determination, and if possible to settle the streets previous to the cession."

He says further that Gen. Bailey is willing to make a fair exchange of ground which will be cut by the aforesaid street," the choice of ground and valuation to be determined by referees. The
21 position of the proposed street is shown on a map or sketch which is reproduced in the minutes. This later became the site of Madison Square.

“The Street Commissioner also submits to the Board whether it would not be better to straighten, or make straighter, the north side of the old post road along the public grounds by bringing out the line as marked on said map. — M. C. C. (1784-1831), IV: 1517-1518.

18 Isaac Riley publishes “a correct and elegantly engraved plan of the City of New York, with the recent and intended improvements—Drawn from official survey, by William Bridges, City Surveyor.” It is for sale by Braban & Brannon, “in sheets, mounted on rollers, or in cases for the pocket.” — N. Y. Ev. Post, Sep 22, 1806. This plan is the basis of the well-known Bridges Map of 1811. See description of Pl. 50-C, III: 543.

23 The common council resolves the resolution of Aug. 31, “providing for the sinking of eight piers in the channel opposite Oyster reef,” and that of Sept. 7, “appointing a Committee of Ways and means for protecting and fortifying the harbour of New York.” — M. C. C. (1784-1831), IV: 577.

The city pays John Spence, to defray expenses attending surveying the harbour. $2,546.7. — M. C. C. (1784-1831), IV: 578.

Oct. 14

26 M. Fultons new invented Steam Boat which is fitted up in a neat steil for passengers, and is intended to run from New-York to Albany as a Packet [see S 2 and 21], left here this morning with nineteen passengers, against a strong head wind. Notwithstanding which it was judged she moved through the water at the rate of six miles an hour. Yesterday she came in with Albany in 28 hours and 60 passengers. Queere would it not be well if she could contract with the Post-Master General to carry the mail from this city to Albany? — N. Y. Ev. Post, O 2, 1807. See also ibid., O 10 and N 19, 1807.

The common council adopts a plan and ordinance for regulating Art. St., and appoints assessors. — M. C. C. (1784-1831), IV: 582, 583.

A so-called “Fireproof Warehouse” is the subject of an application of Robert Kinder & Co. to the common council, seeking permission to deposit hemp there. — M. C. C. (1784-1831), IV: 579.

16 The committee appoints M. C. C. (1784-1831), IV: 593-181.

The street committee report to the common council that William Ray, the contractor, has completed the road at Manhattan Ville, from Bloomingdale to Hudson river. — M. C. C. (1784-1831), IV: 597. The board pays $150 balance due on this contract (see Ag. 4).

The committee of defence also reports: “That the Committee have procured a Copy of the Map or Chart of the Harbour of New York made by Capt Chauncey and M’C. Loss and have caused to be delineated thereon the system of defence contemplated in the Report of the Committee of this Board of the 24th of August last (¢ 17-18), and have also drafted a memorial to Congress, and a letter to the Secretary at War to accompany said Map or Chart, in pursuance of the Resolution of the 15th instant.” The original minutes (MS.) of the committee of defence, in the archives of the N. Y. H. S. cover these transactions under date of Oct. 22. The original (MS) report of Oct. 26 is preserved in metal file No. 34, city clerk’s record-room.

The draft of the memorial to congress is entered in full in the minutes.
1807 minutes. It asks that "ample appropriations" may be made, and such "efficacious measures" taken for the protection and defence of the city and harbour.

The draft of a letter to Henry Dearborn, secretary of war, to be sent by the mayor, is also entered in full. It is to be accompanied by certain maps, reports, and other papers of the common council on the subject of fortifications and defence (see Jl 29, Ag 17 and 24), including "An Estimate of the expenses necessary to complete the system of Defence contemplated in said Report" (of Aug. 24, p. v.); and "A Map or Chart of the harbour of New York together with a profile or section of said plan." The secretary of war is requested in the letter to present the documents to the president, "to be disposed of by him as he may judge proper.

The board orders that the memorial be engrossed and the city seal affixed to it, and that the mayor be directed to forward it to congress. The draft of the letter to the secretary of war is confirmed, after a "division."—M. C. C. (1784-1831), IV: 606–615. The petition was read in the house of representatives on Nov. 9 (p. v.), and referred. —Annals of Cong., 10th cong., 1st sess., 817.

For Dearborn's reply to the common council, see N 16.

"The common council passes a resolution that the street commissioner ascertain and report "the expediency of continuing the square called 'Hamiton Square' to the middle road, to be laid out when the lease of the ground expires."—M. C. C. (1784-1831), IV: 608. For later references to the subject, see ibid., IV: 621, 647, 658; V: 45, 110, which show that the plan was approved on certain conditions of exchange of property held by private owners. See also L. M. R. K., III: 970; and Mr 29, 1867.

6 Another article appears on "Defence by Obstruction," closing with the statement that "It should not at this moment be forgotten that England has a large naval force on our coast."—Ed. Crit., Oct. 8, 1807.

Nov. The street commissioner informs the board "that during last summer be attended several surveys with Mr Bridges and Mr A. Loss to ascertain the line of Broadway from the North of Leonard Street to the houses built by Mr Hattrick and Mr Thompson and after having consulted Mr Stillwell & Mr Charles Loss on the subject, it was agreed that the line on the West side of Broadway should be straight from the two points above mentioned and an accurate survey, under his inspection, was made accordingly, particularly designated [sic] the position of Buildings on that side of the Street." The regulation is ordered accordingly. It fixes "the true corner of Spring street."—M. C. C. (1784-1831), IV: 610–11.

Fire hydrants are successfully tried. "The Committee of the Fire apparatus called on whose application Mr Zandt, treasurer of the Free School Society, the common council pays him $4,000, "the amount of the Excise money appropriated by the Legislature for the benefit of that Corporation."—M. C. C. (1784-1831), IV: 603.

beams and deck, new windows and cabins altered, that she perhaps must be sheathed, her boiler taken out and a new one put in, her axel forged and iron work strengthened with all this work the saving of the present hull is little consequence particularly as many of her Knees Bolts timbers and planks could enter into the construction of a new boat, my present opinion therefore is that we should build a new hull her knees and floor timbers to be of oak her bottom planks of 2 inch oak her side planks two inch oak for 3 feet high She to be 16 feet wide 150 feet long this will make her near twice as stiff as at present and enable us to carry a much greater quantity of sail. . . .

—Sutcliffe, Robert Fulton and the 'Clermont,' 259-64, citing original letter in N. Y. H. S. It was finally determined to lengthen and alter the original hull, and the work was completed by April 25, 1808 (p. 24).

The Hon. John Lambert, an English visitor, arrives in New York. He gives the following interesting description of the city: "About ten o'clock at night we arrived at New York; it was very dark, and as we sailed by the town, lighted lamps and windows sparkled everywhere, amidst the houses, in the streets, and along the water-side. The wharfs were crowded with shipping, whose tall masts mingled with the buildings, and together with the spires and cupolas of the churches, gave the city an appearance of magnificence, which the gloomy obscurity of the night served to increase. . . ."

The next morning we left the slop, and took up our abode with a Quaker lady in Maiden-lane, to whom we were introduced by Mr. Lyman. Her boarders consisted mostly of young merchants of her own family, which was very respectable, and nearly related to some of the principal people in New York. The weather, being frosty, in the beginning of November, was the anniversary of the evacuation of New York by the British troops at the peace of 1815. The militia, or rather the volunteer corps, assembled from different parts of the city on the grand battery by the water-side, so called from a fort having been formerly built on the spot, though at present it is nothing more than a lawn for the recreation of the inhabitants, and for the purpose of military parade. The troops did not amount to 600, and were mostly dressed in a variety of uniforms, every ward in the city having a different one some of them with helmets appeared better suited to the theatre than the field. The general of the militia and his staff were dressed in the national uniform of blue, with buff facings. They also wore large gold epaulets and feathers, which altogether had a very showy appearance. Some gunboats were stationed off the battery, and fired several salutes in honour of the day, and the troops paraded through the streets leading to the water-side; but the crowd being very great, I did not think the ceremony worth the trouble of following them, and therefore returned home. I was afterwards told that they went through the forms practiced on taking possession of the city, manouvuring and firing feu de joie, &c. as the British troops did on the evacuation of New York: One of the corps consisted wholly of Irishmen, dressed in light green jackets, white pantaloons, and helmets.

"New York is the first city of the United States for wealth, commerce, and population; as it is also the finest and most agreeable for its situation and buildings. It has neither the narrow and confined irregularity of Boston, nor the monotonous regularity of Philadelphia, but a happy medium between both. When the intended improvements are completed, it will be a very elegant and commodious town, and worthy of becoming the capital of the United States, for it seems that Washington is by no means calculated for a metropolitan city. New York has rapidly improved within the last twenty years; and land which then sold in that city for ten shillings an acre is now sold for ten pounds. . . ."

"The Broadway and Bowery Road are the two finest avenues in the city, and nearly of the same width as Oxford street in London. . . . It [Broadway] is upwards of two miles in length, though the pavement does not extend above a mile and a quarter; the remainder of the road consists of straggling houses, which are the commencement of new streets already planned out. The Bowery Road commences dull from Chatham-street, which branches off from the Broadway to the right, by the side of the Park. After proceeding about a mile and a half it joins the Broadway, and terminates the plan which is intended to be carried into effect for the enlargement of the city. Much of the intermediate spaces between these large streets, and from thence to the Hudson and East rivers, is yet unbuilt upon, or consists only of unfinished streets and detached buildings. [See Ap 3, 1807; 1808; Ap 1, 1811.]

"The houses in the Broadway are lofty and well built. They are constructed in the English style, and differ little from those of London at the west end of the town; except that they are generally built of red brick. In the vicinity of the Battery, and for some distance up the Broadway, they are nearly all private houses, and occupied by the principal merchants and gentry of New York; after which the Broadway is lined with large commodious shops of every description, well stocked with European and India goods, and exhibiting as splendid and varied a show in their windows as can be met with in London. There are several extensive book stores, print-shops, music shops, jewellers, and silversmiths; hatters, linen-drapers, milliners, pastry-cooks, coach-makers, hotels, and coffee-houses. The street is well paved, and the foot-paths are chiefly brickied. In Robinson-street the pavement before one of the houses, and the steps of the door, are composed entirely of marble."

"The City Hotel is the most extensive building of that description in New York; and nearly resembles, in size and style of architecture, the London Tavern, Bishopsgate-street. The ground-floor of the hotel at New York is, however, converted into shops, which have a very handsome appearance in the Broadway. Mechanic Hall is another large hotel at the corner of Robinson-street, in the Broadway. It was erected by the society of mechanics and tradesmen, who associated themselves for charitable purposes, under an act of the legislature in 1792. There are three churches in the Broadway; one of them called Grace Church, is a plain brick building, recently erected; the other two are St. Paul's and Trinity; both handsome structures, built with an intermixtire of white and red stone. The adjoining church-yards, which occupy some space of ground, railed in from the street, and crowded with tombstones, are far from being agreeable scenes in such a populous city. At the commencement of the Broadway, near the battery, stands the old Government-house, now converted into offices for the customs. Before it is a small lawn railed in, and in the centre is a stone pedestal, upon which formerly stood a leader statue of George the Third. In the revolutionary war it was pulled down by the populace, and made into bullets."

"The City Hall, where the courts of justice are held, is situated in Wall-street, leading from the coffee-house slip by the water side into the Broadway. It is an old heavy building, and very inadequate to the present population and wealth of New York. A Court-house on a larger scale, and more worthy of the improved state of the city, is now building at the end of the Park, between the Broadway and Chatham-street, in a style of magnificence unequaled in many of the larger cities of Europe. The exterior consists wholly of fine marble, ornamented in a very neat and elegant style of architecture; and the whole is to be surmounted by a beautiful dome, which, when finished, will form a noble ornament to that part of the town, to which the courts are also situated in the Broadway. Mechanic Theatre, Mechanic Hall, and the best private houses in New York. The Park, though not remarkable for its size, is, however, of service, by displaying the surrounding buildings to greater advantage; and is also a relief to the confined appearance of the streets in general. It consists of about four acres planted with elms, planes, willows, and catalpas; and the surrounding foot-walk is encompassed by rows of poplars: the whole is inclosed by a wooden paling. Neither the Park nor the Battery is very much resorted to by the fashionable citizens of New York, as they have become too common. The genteel lounge is in the Broadway, from eleven to three o'clock, during which time it is as much crowded as the Bond-street of London: and the carriages, though not so numerous, are driven to and fro with as much regularity and style, as in any of the best private houses in London. The foot paths are planted with perennials, and afford an agreeable shade from the sun in summer."

"The Theatre is on the south-east side of the Park, and is a large commodious building. The outside is in an unfinished state; but the interior is handsomely decorated, and fitted up in a most elegant manner as the London theatres, upon a scale suitable to the population of the city. It contains a large coffee-room, and good sized bobbies, and is reckoned to hold about 1,200 persons. The scenes are well painted and numerous; and the machinery, dresses, and decorations, are elegant, and appropriate to the performances, which consist of all the new pieces that come out on the London boards, and several of Shakespeare's best plays. The only fault is, that they are too much curtailed, by which they often lose their effect; and the performances are sometimes over by half past ten, though they do not begin at an earlier hour than in London. . . . The
1807 Nov.

Theatre has been built about ten years, and of course embraces every modern improvement.

"New York has its Vauxhall and Ranelagh; but they are poor imitations of those near London. They are, however, pleasant places of recreation for the inhabitants. The Vauxhall garden is situated in the Bowery Road about two miles from the City Hall. It is a vast plantation, with gravel walks adorned with shrubs, trees, busts, and statues. In the center is a large equestrian statue of General Washington. Light musical pieces, interludes, &c. are performed in a small theatre situated in one corner of the gardens; the audience sit in what are called the pit and boxes, in the open air. The orchestra is built among the trees, and a large apparatus is constructed for the display of fireworks. The theatrical corps of New York is chiefly engaged at Vauxhall during summer. The Ranelagh is a large hotel and garden, generally known by the name of Mount Pitt, situated by the water side, and commanding some extensive and beautiful views of the city and its environs."

"A great portion of the city, between the Broadway and the East river is very irregularly built; being the oldest part of the town, and of course less capable of those improvements which distinguish the more recent buildings. Nevertheless, it is the chief seat of business, and contains several spacious streets crowded with shops, stores, and warehouses of every description. The water side is lined with shipping; it is along the wharfs or in the small docks called slips, of which there are upwards of twelve towards the East river, besides numerous piers. The wharfs are large and commodious, and the warehouses, which are nearly all new buildings, are lofty and substantial. The merchants, ship-brokers, &c. have their offices in front on the ground floor of these warehouses. These ranges of buildings extend from the Battery, on the west side of the town, up the Hudson and East rivers, and encompass the houses with shipping, whose forest of masts gives a stranger a lively idea of the immense trade which this city carries on with every part of the globe. New York appears to him the Tyre of the New World."

"When I arrived at New York in November, the port was filled with shipping and the wharfs were crowded with commodities of every description. Bales of cotton, wool, and merchandise; barrows of pot-ash, rice, flour, and salt provisions; hogheads of sugar, chests of tea, puncheons of rum, and pipes of wine; boxes, cases, packs and packages of all sizes and denominations, were strewed upon the wharfs and landing-places, or upon the decks of the shipping. All was noise and bustle. The carriages were driving in every direction; and the sailors and labourers upon the wharfs, and on board the vessels, were moving their ponderous burthens from place to place. The merchants and their clerks were busily engaged in their counting-houses, or upon the piers. The Teutonic coffee-house was filled with underwriters, brokers, merchants, traders, and politicians; selling, purchasing, trafficking, or insuring some reading, others eagerly inquiring the news. The steps and balcony of the Exchange were crowded with the several auctioneers, who had elevated themselves upon a hog's head of sugar, a puncheon of rum, or a bale of cotton. The coffee-house slip, and the corners of Wall and Pearl-streets, were jammed up with carts, drays, and wheel-barrowes; horses and men were huddled promiscuously together, leaving little or no room for passengers to pass. Such was the appearance of this part of the town when I arrived. Everything was in motion; all was life, bustle and activity. The people were scampering in all directions to trade with each other, and to ship off their purchases for the European, Indian, African, and West Indian markets. Every thought, word, look, and action of the multitude seemed to be absorbed by commerce; the wellin' ran with its busy hum, and all were eager in the pursuit of its riches."

"But on my return to New York the following April [1808], what a contrast was presented to my view! and how shall I describe the melancholy dejection that was painted upon the countenances of the people, who seemed to have taken leave of all their former gaiety and cheerfulness? The coffee-house slip, the wharfs and quays along South-street, presented no longer the bustle and activity which prevailed there five months before. The port, indeed, was full of shipping; but they were dismantled and laid up. Their decks were cleared, their hatchets fastened down, and scarcely a sailor was to be found on board. Not a box, bale, cask, barrel, or package, was to be seen upon the wharfs. Many of the counting houses were shut up, or advertised to be let; and the few solitary merchants, clerks, porters, and labourers, that were to be seen, were walking about with their hands in their pockets. Instead of sixty or a hundred carts that used to stand in the street for hire, scarcely a dozen appeared, and they were unemployed; a few coming sloops, and schooners, which were clearing out for some of the ports in the United States, were all that remained of that immense business which was carried on a few months before. The coffee-house was almost empty... In fact, every thing presented a melancholy appearance. The streets near the water-side were almost deserted, the grass had begun to grow upon the wharfs, and the minds of the people were tortured by the vague and idle rumors that were set afloat upon the arrival of every letter from England or from the seat of government..."
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1807
Unites Fratrum, First Protestant Episcopal Charity School, St. George's Society, St. Patrick's Society, St. Andrew's Society, the New England Society, the Cincinnati. Most of these institutions are mere benefit societies, resembling those which are so numerous in England.

There are upwards of twenty newspapers published in New York, nearly half of which are daily papers; besides several weekly and monthly magazines or essays. The booksellers and printers of New York are numerous, and in general men of property. Some of them have published very splendid editions of the Bible; and it was not a little gratifying to the American patriot to be told, that the paper, printing, engraving, and binding, were all of American manufacture. For several years past a literary fair has been held alternately at New York and Philadelphia. This annual meeting of booksellers has tended greatly to facilitate intercourse with each other, to circulate books throughout the United States, and to encourage and support the arts of printing and paper-making.

"A public library is established at New York, which consists of about ten thousand volumes, many of them rare and valuable books. The building which contains them is situated in Nassau-street, and the trustees are incorporated by an act of the legislature. There are also three or four public reading-rooms, and circulating libraries, which are supported by some of the principal booksellers, from the free subscriptions of the inhabitants. There is a number of natural curiosities in New York, but it contains nothing worthy of particular notice.

"It does not appear that the malignant or yellow fever made very great ravages among the inhabitants in 1804, the last time of its appearance in New York; for the deaths very little exceeded the preceding and subsequent years.

"1804 the deaths were 2,064
1805 2,352
1806 2,325

"Of the above number fifty-one were suicides; and according to the statement of Dr. Mitchell upwards of one-third of the deaths are occasioned by consumption and debility."

The malignant or yellow fever generally commences in the confined parts of the town, near the water-side, in the month of August or September. As soon as this dreadful scourge makes its appearance in New York, the inhabitants shut up their shops, and fly from their houses into the country. Those who cannot go far, on account of business, remove to Greenwich, a small village situation on the border of the Hudson river, about two or three miles from town. Here the merchants and others have their offices open in company with the danger from the fever, which does not seem to be contagious beyond a certain distance. The banks and other public offices also remove their business to this place, and markets are regularly established for the supply of the inhabitants. Very few are left in the confined parts of the town except the poorer classes, and the negroes. The latter not being allowed to carry on the large service at the Council House.

Upwards of 26,000 people removed from the interior parts of the city, and from the streets near the water side, in 1805.

"...it appears that the population of New York has, in a period of twenty years from 1786 to 1805, more than tripled itself.

At this day it is equal to the whole number of inhabitants in the State of New York fifty years ago.

"If an estimate can be formed of the salubrity of the climate, and the healthiness of the inhabitants of a town, by the number of deaths, London must be reckoned to have the advantage of New York in these respects. The amount of deaths in the former city is about a fiftieth part of its population, while in New York it is at least one thirtieth; the number of deaths ranging between 2,500 and 3,000 per annum. I am, however, more inclined to attribute this great mortality to improper diet and mode of living than the insalubrity of the climate. The church-yards and vaults are also situates in the heart of the town, and crowded with the dead. If they are not prejudicial to the health of the people, they are at least very unsightly exhibitions. One would think there was a scarcity of land in America, by seeing such large pieces of ground in one of the finest streets of New York occupied by the dead. But even if no noxious effluvia were to arise...still the continual view of such a crowd of white and brown tomb-stones and monuments which is exhibited in the Broadway, must at the sickly season of the year tend very much to depress the spirits, when they should rather be cheered and enlivened. There is a large burying-ground a short distance out of town; but the cemeteries in the city are still used at certain periods of the year.

"They bury their dead within twenty-four hours; a custom probably induced by the heat of the climate during the summer months.

"Funerals at New York...are attended by a numerous assemblage of the friends and acquaintances of the deceased, who are invited by advertisements in the newspapers to attend their departed friend to the grave. On such occasions I have seen upwards of five hundred people, and the larger the number the more pleased is supposed to be respected and valued. The people attend for the most part to their ordinary dress, the clergyman, physician, and chief mourners, wear white scarfs, which it is also the custom to wear on the following Sunday.

"The Society of New York consists of three distinct classes. The first is composed of the constituted authorities and government officers, divines, lawyers, and physicians; the principal merchants and people of independent property. The second comprises the small merchants, retail dealers, clerks, subordinate officers of the government, and members of the three professions. The third consists of the inferior orders of the people. The first of these associate together in a style of elegance and splendid little inferior to Europeans. Their houses are furnished with everything that is useful, comfortable, or ornamental; and many of the rooms are fitted up in the tasteful magnificence of modern style. The dress of the gentlemen is plain, elegant, and fashionable, and corresponds in every respect with the English costume. The ladies in general seem more partial to the light, various, and dashing drapery of the Parian belles, than to the elegant and becoming attire of our London beauties, who improve upon the French fashions.

"The young ladies of New York are in general handsome, and almost universally fine fitted figures. Fair complexions, regular features, and fine forms, seem to be the prevailing characteristics of the American fair sex.

"Much has...been said of the deficiency of the polite and liberal accomplishments among both sexes in the United States. Whatever truth there may have formerly been in this statement, I do not think there is any foundation for it at present, at least in New York, where there appears to be a great thirst after knowledge. The riches that have flowed into that city, for the last twenty years, have brought with them a taste for the refinements of polished society, and though the inhabitants cannot yet boast of having reached the standard of European perfection, yet, they are not wanting in that solid and rational parts of education; nor many of those accomplishments which ornament and embellish private life. It has become the fashion in New York to attend lectures on moral philosophy, chemistry, mineralogy, botany, mechanics, &c; and the ladies in particular have made considerable progress in those departments of late years. The majority of the merchants, however, still continue more partial to the rule of three, than a dissertation upon oxygen or metaphysics. A grammar-school has recently been instituted at New York, for the instruction of youth, upon a similar plan to the great public schools in England.

"Many of the young men...whose minds have not been wholly absorbed by pounds, shillings, and pence, have shown that they possess literary qualifications and talents, that would, if their time and fortune permitted, rank them among some of the distinguished authors of Europe. The most prominent of their late productions is the Salmoniad, published in monthly essays at New York. This little work has been deservedly a great favourite with the public, and bids fair to be handed down with honour to posterity.

"Dancing is an amusement that the New York Ladies are passionately fond of, and they are said to excel those of every other city in the Union. I visited the City Assembly, which is held at the City Hotel in the Broadway, and considered as the best in New York. It was the first night of the season, and there were not more than one hundred and fifty persons present. The subscription is two dollars and a half for each night, and includes tea, coffee, and a cold collation. None but the first class of society can become subscribers to this assembly. Another has, however, been recently established, in which the gentler part of the second class are admitted, who were shot out from the City Assembly.
"The style of living in New York is fashionable and splendid; many of the principal merchants and people of property have elegant equipages, and those who have none of their own may be accommodated with handsome carriages and horses at the livery stables; for there are no coach stands. The winter is passed in a round of entertainments and amusements; at the theatre, public assemblies, philosophical and experimental lectures, concerts, balls, tea-parties, carrie excursions out of town, &c. Parties to dinner and dances are frequently made in the winter season when the snow is on the ground. They proceed in carriages a few miles out of town to some hotel or tavern, where the entertainment is kept up to a late hour, and the parties return home by torch-light. Marriages are conducted in the most splendid style, and form an important part of the winter's entertainments.

"The inhabitants of New York are not remarkable for early rising, and little business seems to be done before nine or ten o'clock. Most of the merchants and people in business dine about two o'clock; others who are less engaged, about three: but four o'clock is usually the fashionable hour for dining. The gentlemen are partial to the bottle, but not to excess. The servants are mostly negroes or mulattos, some free, and others slaves: but there are many white servants of both sexes; and they who expect to see a pure republican equality existing in America will find themselves greatly deceived.

"The embargo had a considerable effect upon the amusements of the people, and rendered the town gloomy and melancholy. The parades with religious processions and various denominations; but the episcopalians and presbyterians seem to be the most numerous, at least they have more places of worship than any of the others. The quakers form but a small community in this city, and even that is decreasing; for the young people do not appear much inclined to follow up the strict ceremonial of their parents in point of dress and manners. . . .

"There are several rich and respectable families of Jews in New York; and as they have equal rights with every other citizen in the United States, they suffer under no invidious distinctions. . . .

"There are about 4,000 negroes and people of colour in New York, 1,700 of whom are slaves. These people are mostly of the Methodist persuasion, and have a chapel or two of their own with preachers of their colour. . . .

"Christmas-day and other festivals are observed much in the same manner as in England; but in consequence of there being no established form of worship, as with us, the religious observance of those days is only recommended to the people, by a number of the clergy of different denominations, who assemble together and communicate their wishes to the common council, who make them known to the public.

"New Year's Day is the most important of the whole year. . . . Many of the shops are shut up; and the presbyterians, and a few other religious dissenters, attend public worship. The mayor of the city, and others of the constituted authorities, advertize, two or three days before, that they will reciprocate the compliments of the season with the inhabitants at their house on New Year's Day. In consequence of this invitation, I accompanied a gentleman to the mayor's house in Water-street. . . . The room was crowded, and the gentlemen were coming in, going out, and taking refreshments at a large table spread out with cakes, wine, and punch. Having paid our respects to his worship, wished him the compliments of the season, a happy new year, and drank a glass of excellent punch, we took our leave. Like the other large cities of the union, it is a prey to the violent spirit of the two parties, who are known under the titles of federalists and democrats. . . . It was the violent spirit of party that occasioned the duel between General Hamilton and Colonel Burr. Hamilton fell regretted by all parties, and was particularly deplored by the citizens of New York, among whom he resided. Burr escapes only to become odious in the sight of the whole nation.

-Colonel Williams writes from Fort Columbus to Gov. Tompkins: "Sir, Previously to my quitting the works at this post for the Winter season, I conceived it to be my duty to lay before Your Excellency the necessary information relative to my operations in this harbour generally, in order that the requested legislative cessions may be fully commensurate with the objects proposed.

"By the enclosed copy of my instructions, No. 1, you will perceive that my duties have been directed to the following points: 1st. Governor's Island, and Bedloe's Island, 3rd. Ellis's Island, 4th. A place of deposit for military stores, near the battery of N. York, 5th. Positions on the north river at the battery, & near Rhine-landers, 6th A Magazine, laboratory, &c. at Potter's field. The jurisdiction of the three first named points have been already ceded to the United States by the State of New York, under an act of the legislature passed 15th Feb. 1800 [g.v.]. . . . It is not necessary therefore to trouble you with any observations relative to them as far as relates to jurisdiction.

"Ellis's island is private property, in part possessed by the United States, and in part by the heirs of the late Mr. Ellis; but even the site of the old battery has not been regularly ceded by the proprietor, although fully agreed to by him: the deed was prepared by consent of parties, but Mr. Ellis died before it was executed; the possession therefore is not legally confirmed. It seems that Mr. Ellis's property in this island did not extend below high water mark, since I find by the minutes of the corporation that the land between low and high water mark has been ceded by that body to the state.

"The island above high water mark is doubtless the private property of the heirs of Mr. Ellis's estate; and I should, according to my instructions, have purchased it at any reasonable rate, if it had been properly secured to obtain a legal title.

"I have purchased of Mr. James W. Lent, (the lessee of the lot in the rear of the mansion, now used as a Custom House) the buildings which have been erected by him, and a transfer of his lease has been made with your approbation. . . .

"It being the intention of the government to build a case-mated tower battery, with several tiers of heavy metal at the point of the old battery, beyond the present flag staff, and the construction of this battery leaving only space for the military stores in actual service, it became necessary to have a deposit as near to it as possible, for this reason the purchase of Mr. Lent's building was made. . . .

"The positions on the North river near the battery and near Laight Street (the latter being taken in lieu of the one proposed at Rhinelander's [which is granted by the corporation to the extent of their rights [see N 17]: . . .

"The grant of Potter's-field has also been made by the corporation, and nothing remains for the State to do, except the cession of jurisdiction, which will doubtless be so formed as to place all the points in question, in one and the same predicament with these already ceded to the United States.

"Hitherto I have confined myself to the plan of interior defence; but as my orders imply an intention to make additions 'farther in advance,' I have thought it might be agreeable to you, to have copies of my original report to the Secretary at War, when I surveyed part of this harbor in 1805. . . .

"I hope it will not be thought improper in me, to remark, that, as a defence, farther in advance, is evidently contemplated, it might much accelerate such objects, if the commissioners, to be appointed, were empowered to make other cessions on Staten and Long Island, and in the bed of the harbour between them, as the nature of the case may require."—Hasting, Pubs. Papers of Daniel D. Tompkins, II: 23-50; N. Y. Com. Adv., F 13, 1808.

John Pintard, city inspector, reports, in a tabulated statement, a census of the electors of the city and county of New York, and of the total number of inhabitants, which is 83,550, both free and slave, male and female. The Seventh Ward has the largest population, 19,487. The report includes the following table of population at different periods:

<table>

The following comments are added: 'By which it appears,
1807

Dec. 1

that our population has more than tripled from 1786 to 1805, a period of twenty years.

"Should the progress of increase continue at the rate of five per cent. per annum, the population of this city in 1835 will amount to 759,650, a rate exceeding the doubling of our number every twenty years, during the period of a century."—M. C. G. (1784-1813), IV: 663.

It is in accordance with the Senate resolution of March 6 (q.v.), John Stevens begins to publish in the newspapers a copy of the Senate proceedings and the petition he intends to present to the next legislature (see F 2, 1808). The petition declares that Stevens "hath for some years past bestowed much attention on the subject of constructing bridges across the North and East rivers, that the parties constructing private bridges had laid it on the Senate during the last sitting of the legislature, was predicated upon a presumption that permanent bridges across these rivers would require an expenditure of money far beyond any prospect of gain, at least for some years to come. . . . That your petitioner is now well satisfied that permanent bridges across said rivers may be so constructed as to admit of free passage for vessels of any burthen under the arches of the same. And that the capital necessary for erecting them will be so moderate as that the tolls to be collected thereon will probably net to the stockholders seven or eight per cent. per annum at this present time. Your petitioner therefore respectfully prays that the legislature of this state will be pleased to grant him leave to present a bill for incorporating a company for carrying on the same, and laying down the subject above stated."—Am. Cit., D 5, 1807; Pub. Adv., D 7, 1807. Stevens's project met with much adverse criticism (see Ja. 16, 27, 28, and F 6).

Marble has been discovered at Sing Sing.—N. Y. Gaz. & Gen. Adv., D 5, 1807. Stone from Sing Sing, cut by the convicts, was afterwards used in building construction in New York.

The common council of the Senate has a new committee of defence for the ensuing year, with Alderman Nicholas Fish, chairman.—M. C. G. (1784-1813), IV: 662.

The mayor presents to the common council a letter of Dec. 7 received from U.S. Senator Samuel L. Mitchell, enclosing "a further Report [dated D 3, and printed] of the Committee of the Senate relating to the Defence of the Sea ports and harbours of the United States." It is referred to committee of defence, and the report directed to be published.—M. C. G. (1784-1813), IV: 666. The original letter and printed report are in memorial file No. 34, city clerk's record-room.

There is referred to the same committee a letter, addressed to the mayor, "dated Philad. the 7th inst. signed a Pilgrim, and inclosed a pamphlet under the same signature on "an immoral mode of Defence against the Buccaneers of the Ocean.""—Ibid., IV: 666.

The common council resolves "that the Road Committee be instructed to wait on the Commissioners appointed to lay out the city (see Ap 3), and represent the great necessity of opening a Street on the East river leading to Bellevue."—M. C. G. (1784-1813), IV: 671. Governor Morris, one of the commissioners, informed the committee on Dec. 28 that, when the surveys were completed, by May or June next, one of the first objects of the commissioners would be "to open a more direct communication from the East part of the town to Bellevue."—Ibid., IV: 683. See S 19, 1808.

A petition to the common council, Peter Williams, chairman of a committee of arrangements, "in behalf of the Africans and descendants of Africans," says: "With pleasure we learn, that by an act of the congress of the United States [see Mr 2], on the first day of January Next, the Importation of slaves, within the jurisdiction of the same, will be Totally suspended. It has been the impetuous and insensate monster, By the gratification of whose insatiable appetite incalculable numbers Of our fellow men have been the unhappy victims. We therefore, The people of colour, conceive it an indispensable duty, compatible too With the distaste of humiliation and gratitude to return to the Almighty Dispenser of all things, & to our worthy benefactors our sincere acknowledgement, and consider it the most expressive method of commemorating the Day with general thanksgiving. Purposing to preserve in all our conduct the starting decorum and veneration for the laws of the land, we Humbly solicit your protection from the probable annoyances of a tumultuous multitude, by granting us the privilege of employing a sufficient Number of officers for the preservation of peace."—From the original petition (MS.), in metal file No. 34, city clerk's record-room. Granted.—M. C. G. (1784-1813), IV: 663. See D 23.

The common council refers to a committee a memorial of Stephen Stillwell, "respecting the discovery of a Coal mine, a System of which was exhibited on the Fire in the Common Council Chamber, on his land situated on the south side of the river, on the Hydrogen of Ulster in this State, requesting the patronage of the Corporation to enable him to explore the same."—M. C. G. (1784-1813), IV: 663-64. The committee report, on Dec. 21, contemplated the practicality of the city's taking shares in the enterprise of developing the mine. The report closes thus: It is certainly an object of the highest consequence and a duty imposed on this Board to encourage every plausible plan that may tend to produce a supply of an Article so essentially necessary for the comfort and existence of the citizens of this rapidly increasing metropolis, as mineral Coal; especially when the resource can be found within the bosom of our own State, whereby our citizens will be relieved from the uncertain dependence on foreign supplies.

"The Augmentation of our population exceeds, annually, the growth of Forests for Fuel, and unless additional resources be explored, this essential article of existence must bear extremely oppressive, as indeed it does at present, on the poorer classes of Society. The Board ordered that the report lie over for future consideration.—M. C. G. (1784-1813), IV: 675-76.

Assessors for regulating Art St. report, among other things, that they are informed that "Bleecker Street was dug out at the expense of the public for the same purpose as Art Street to give vent to the water from Broadway." In the matter of cession of land for streets, and assessment for opening, the two streets differ. This the street commissioner explains.—M. C. G. (1784-1813), IV: 666-68. Regarding assessments for digging out Art St., see, further, ibid., IV: 684, 707-8.

A memorial of the Tammany Society "proposing to lease in perpetuity or on such other terms as may appear suitable, the ground of adjoining the Arsenal, and lying between Chatham Street and the Street proposed to be laid out thro' the ground as a continuation of Cross street" is referred to a committee.—M. C. G. (1784-1813), IV: 664.

The common council receives and refers to the "Committee on Applications for Offices" numerous applications and petitions for offices in the city government.—M. C. G. (1784-1813), IV: 665-66, 675. For the creation of this standing committee, see ibid., IV: 665 cf. D 24, 1804.

The following British orders of Nov. 11 (q.v.), Napoleon issues his Milan decree declaring British dominions blockaded in all parts of the world.—Anderson, Const. & Doct., 392-94.

Gurdon S. Mumford wrote from the house of representatives to Alderman Van Zandt on Dec. 23, that, on "Monday night [Dec. 21] about half past 11 o'clock After we had the most animated Debate I ever experienced, the Question for a general Embargo was taken 81 for, 44 against it, in my opinion we had no other alternative left, the Hostility of the Land & Sea Leviathan are much alike, let us see what effect this measure will have upon them, if they are determined we shall not remain in Peace, the American People will see we have done every thing in our power with honor to preserve it, and being thus convinced, they no doubt will display their wonted Patriotism in Defence of their Country's vital rights in case it should become necessary."—Quoted Van Zandt Papers (MS). The Embargo Act was passed on Dec. 23 (q.v.).

The common council resolves "that the Street now called Brannon Street, beginning at Thompson Street be known and be hereafter called Spring Street, and the Market now standing in said Street be known and be hereafter called Spring Street Market."

—M. C. G. (1784-1813), IV: 672.

Congress passes the "Emargo Act" forbidding clearances to foreign ports and limiting the coasting-trade in the United States. —Laws of U. S., 10th cong., chap. 5. This was supplemented by other acts on Jan. 8 and March 12, 1808—Ibid., 10th cong., chap. 8 and 33. See also Winsor, VII: 340.

One of the newspapers publishes a plan for the defence of New York City, which was drawn up by the late Baron Steuben. In this, Steuben states that any attempt to defend the city by batteries on Governor's Island, Powles Hook, and Manhattan Island, is fruit
less, and only serves to expose the city, in case of attack to inevitable ruin. Fortifications should be erected so as to prevent an enemy from entering and getting possession of the harbour. To this end he suggests that the bay from Sandy Hook to the Narrows be defended by floating batteries, frigates, and gun-boats, and that batteries and redoubts be concentrated on both sides of the Narrows, garnished with 1000 men and supported by a camp on each side of 3000 militia. Also, a cone surmounted by a battery and connected to the other fortifications by chains might be sunk in the middle of the channel for additional safety.—N. Y. Ev. Post, D 22, 1807.

The common council unites with the clergy of the city in setting apart this day as one for "public and special thanksgiving and prayer to Almighty God for his merciful dispensations of mercy to this city."—M. C. G. (1784-1814), IV: 673-74.

The common council refers to the committee of finance a communication from Maj.-Gen. Stevens "on the subject of the Artillery and Military Stores in this city, together with an Estimate by Brigadier General Morton of the expense of Camp equipment for the equipment of 1000 Men."—M. C. G. (1784-1814), IV: 681. The original letter (MS) is preserved in metal file No. 34, city clerk’s record-room.

The common council receives a communication from a committee "appointed by the Africans and descendants of Africans in this city, ‘to make arrangements for celebrating the period which puts a stop to the commerce of the Human Species,’ retaining their actual property to the Corporation for the grant of Officers to preserve good order on the occasion [whom they asked for on Dec. 14, q.v.], and Soliciting the members to accept tickets of admission to the Oration which is to be delivered by an African descendant at the African Church in Church Street, corner of Leonard Street on Friday the 1st day of Jan. next at 10 o’clock. A. M."—M. C. G. (1784-1814), IV: 682.

After Curtis, the mayor’s first marshal, having informed the common council that the 60 constables and marshals of the city are "unfurnished with Staves of Office," the board orders that the superintendent of repairs "provide Staves to be painted and numbered; and to be delivered to the several Constables and Marshals correspondent with their respective numbers, who shall be responsible for the same and be individually subject to a penalty of One Dollar, if they appear with or use any other Staff than such as corresponds with their number."—M. C. G. (1784-1814), IV: 682.

The street commissioner presents to the common council a profile of Broadway from Art Street to the Bowery road for their inspection and consideration; also the draft of an ordinance "to regulate the Street in a temporary manner." These are referred to the road committee.—M. C. G. (1784-1815), IV: 682-85. On Jan. 4, the Board decided to begin at once on opening this part of Broadway, in accordance with the profile, in order to give employment to workmen at this “inclement season” and “to alleviate the evils which must result from a suspension of the ordinary avocations of the laborious part of the Community.”—ibid., IV: 695-96.

In a memorial to the common council, De Witt Clinton, president of the board of trustees of the N. Y. Public Free School, says that "they have in contemplation the erection of a building which may be adequate to the accommodation of 300 Scholars.” They ask the board’s co-operation to enable them to provide for the children of the almshouse. The board appoints a committee to confer with a committee of the trustees on the subject.—M. C. G. (1784-1815), IV: 692-91. See Jan 18, 1808.

The common council appoints a committee "to confer with a Committee of the Manhattan Company respecting the expediency of an arrangement for the disposal of the waterworks to this Corporation."—M. C. G. (1784-1813), IV: 686. See Ja 18, 1808.

The Daily Advertiser (see Ag 4) is discontinued with the issue of this date, having been published by John J. Negein who established L’Oréole and Daily Advertiser in its stead. The People’s Friend, the semi-weekly edition of The Daily Advertiser is also discontinued.—Brigham, A. A. S. Proc. (1917), 402, 473.

Deaths numbering 2,312 occurred in the city in this year.—M. C. G. (1784-1813), V: 498-502.

In this year, diplomatic relations between Spain and the U. S. were suspended because of internal troubles in Spain and disputes over the crown. They were resumed in 1815 (q.v.).—McMaster, 1888 Hist. of People of U. S., IV: 373.

John Randel, Jr., author of the well-known Randel Survey (PL 79, Vol. 1,) in 1864 wrote the following description of Manhattan Island, north of Canal St., as he remembered it during the period from 1808 to 1821:

"In the years 1808, 1809, and 1810, whilst acting as Secretary and Surveyor to the ‘Commissioners of Streets and Roads in the City of New York,’ and also as their Chief Engineer, superintending and aiding in the surveys and maps of the assistants employed by them, I went almost daily from the city to our office, then in the country, at the northeast corner of Christopher and Herring streets, previous to performing field work with them in the suburbs of the city, and on distant parts of the island; at what times, and subsequently, I obtained the following information.

"In going from the city to our office in 1808 and 1809, I generally crossed a ditch cut through Lispenard’s salt meadow (now a culvert under Canal street) on a plank laid across it for a crossing-place, about midway between a stone bridge on Broadway, with a narrow embankment at each end, connecting it with the upland, and an excavation then being made at, and said to be for, the foundation of the present St. John’s Church, on Varick Street.

"From this crossing-place I followed a well-beaten path, leading from the city to the then village of Greenwich, passing over open and partly fenced lots and fields, not at that time under culti-
'On Broadway, north of Lispensard's salt meadow (now Canal street) to 'Sailors' Snug Harbor,' a handsome brick building, called by that name, erected in 1805, and thence thence to the present 10th street, and formerly the residence of Captain Randall, who bequeathed it to the Trustees of 'Sailors' Snug Harbor' together with his adjoining grounds, opposite to and south of Grace Church to Art street and Greenwich lane; and from the Bowery road, westward, to Manetta water, there were only a few scattered buildings, except country residences which were built back from Broadway, with court yards and lawns of trees and shrubs in front of them. [The location of the Randell residence is shown on the Poppleton map of 1817, reproduced as a folded map in Howell's Reminiscences.]

Between Sailors' Snug Harbor (now 10th street) and Love lane (now 21st street) was a narrow causeway and perhaps from 6 to 8 frame dwellings down this part of the present Broadway was at that time the 'Bloomingleague Road.' . . .

'The Bowery was at that time (1809) the principal road leading out of the city to Harlem and Manhattanville, and thence to Boston and Albany, and was settled, in part, to near North (now Houston) street. At this street the Commissioners' Plan for the streets and avenues commenced; north of it we encountered in our surveys extensive ancient and neglected hawthorn hedges, then grown into saplings, extending along the east side of the Bowery, in front of the Stuyvesant estate, that were impassable without the aid of an axe; a short distance beyond which the Bowery road and the (then) Bloomingleague road formed a junction at the Commissioners' 16th street (now a point in Union Square, about 110 yards southwest of The Everett House), and formed an acute angle at that place, which, as it was intersected by the streets crossing it, left so small an amount of ground for building purposes, that the Commissioners instructed me to lay out the ground, at the union of those streets and roads, for a public square, which, from that circumstance, they named Union Place.

'From this angle at 16th street, the Bloomingleague road (more recently called Bowdruart) continued northwest, through Greenwood, to the near the gate of the country residence of Dr. Samuel Bradhurst (now near 147th street at 9th avenue), where it formed a junction with the Kingsbridge road, passing in its route from 16th street along the westerly side of the United States Magazine, opposite 25th street and 6th avenue, across 'The Parade' which the Commissioners set apart for military exercise, and also to assemble, in case of need, the force destined to defend the city.

'This road thence crossed 57th street, 120 yards east of Bloomingleague Square, which extended from 53d to 57th street, and from 8th to 9th avenue . . . it thence passed through Harrison, from 68th to 72nd street, at 10th avenue, and crossed 79th street 167 yards west of 40th avenue, and 500 yards west of Manhattan Square, which extended from 77th to 81st street, and from 8th to 9th avenue. The gratifications on Bensoni's road, were 60th street, and east of Striker's Bay, on Hudson River; thence crossed 117th street, 111 yards west of 11th avenue, and 200 yards west of the New York Hospital and Bloomingleague Asylum for the Insane, and thence passed through the Barrier Gate, built across this road at the Manhattanville Pass during the war of 1812, at 123d street, 33 yards west of 11th avenue; the road then passed through Manhat- tanville, at 146th street, 11th avenue to 137th street, 120 yards east of 11th avenue . . . thence passed 100 yards north of the country residence of Col. Alexander Hamilton, at 143d street, 80 yards east of 10th avenue; and thence to the junction of this road with the Kingsbridge road, 10 yards east of 9th avenue, between 146th and 147th streets.

'The Eastern Post Road' diverged northeast from the Bloomingleague Road, at 23d street and 6th avenue, and run by a circuitous route through the village of Harlem, from 118th to 121st street, west of 3d avenue to 'the Harlem Bridge' built over Harlem River, near 130th street and 3d avenue.

'This road, in its route from the Bloomingleague road at 23d street and 5th avenue, passed south of the Metropolitan Museum of Art (25th street and 'The Old Potter's Field') at 26th street, which crossed 4th avenue at the Middle road, near 29th street, and passed through the village of Kip's Bay, from 32d to 38th street, west of 3d avenue; it thence passed the 'Cross Road' to 'Burn's Corner' (on the Middle road, opposite the present Croton Reservoir), at 41st street, and the road to Turtle Bay on the East River, between 47th and 48th streets; thence crossed the 2d avenue at 52d street, and recrossing it it reached 62d and 63d streets, and thence thence here upon the present 3d avenue, passing Har- sen's Cross-road at 71st street, and east of Smith's Tavern, opposite 'Kissing Bridge' at 77th street, where the Commissioners held their office in 1809 and 1810. It crossed the division line between New York and Harlem Common between 23rd and 3d streets, and continued along 3d avenue near 83d street. At this place several branch roads diverged from it eastwardly to the following places on the East River near Hell Gate, to wit: Commodore Chauncey's, on the south side of 8th street; Hell Gate Ferry, at the foot of 36th street, opposite the north end of Blackwell's island; John Jacob Astor's, on the south side of 83d street; Oliver Gracie's, on the north side of 83d street;—Prim, on the north side of 8th street, and William Rhinelander, on the north side of 91st street. The three last named country seats were nearly opposite the following rocks at the entrance of Hell Gate, to wit: Hancock's Rock, 3 Gridiron Rocks, 4 Middle Reef Rocks, 2 Flood Rocks, and Mill Rock. The Pot Rock, in the middle of Hell Gate, was about 700 yards east of Mill Rock, and was 80 yards south of the Mill Rock, and north of it was The Frying Pan, and Holmes' Rocks, and 3 Hogback Rocks. During the war of 1812, a block house was built on Mill Rock, and opposite to it, at Hallett's Point, on Long Island shore, Fort Stevens was built; and on the high ground southeast of it a tower was erected, called Castle Bogardus. These fortifications were built to command Hell Gate Pass.

'The 3d avenue, near 83d street, this Eastern Post road diverged westerly, and crossed and recrossed the division line between New York and Harlem commons, and crossed 4th avenue near 85th street; thence passed over the southwestern corner of Observatory Place, and intersected the Middle Road at 90th street. This Observatory Place, or square for Reservoir, was laid out . . . from 90th to 94th street, and from 6th to 8th avenue. From 90th street, this Eastern Post road continued along the Middle road to 92d street, and there diverged westerly, and passed between 5th and 6th avenues (where it was also called the 'Kingsbridge road'), through the Barrier gate, built across it during the war of 1812, at McGowan's Pass, at 107th street, about 116 yards east of 6th avenue; thence crossing a small bridge over the head of Benson's tide mill pond, near 109th street and 5th avenue, passed through the village of Harlem, at 116th to 125th street, near west and Third avenue, to Harlem Bridge.

'During the war of 1812, the Barrier gate at McGowan's pass was connected with the Barrier gate at Manhattanville pass by the following military defences, which were extended across the Island, from Harlem River to Hudson River, to wit: No. 1, 3d avenue and 106th street; Fort Clinton, between 106th and 107th streets, and about 170 yards east of 6th avenue; Fort Fish, between 106th and 107th streets, and about 10 yards east of 6th avenue; a stone tower, between 14 yards south of 109th street and 7 yards west of 7th avenue; a stone tower, between 118th and 114th streets, and between 5th and 10th avenues; a stone tower, on the south side of 121st street, and about 110 yards east of 10th avenue; a stone tower, on the south side of 123d street, and about 54 yards east of 10th avenue; Fort Haight, at Manhattanville pass, about 10 yards north of 124th street, and 120 yards east of 11th avenue.

'The Middle Road' diverged northward from 'the Eastern Post Road,' near 39th street and 4th avenue, and then intersected 'Ildingburgh Hill' (now Murray's Hill), and connected with Manhat- tan (now 5th avenue), at the present Croton Reservoir on 42d street, and continued along that avenue to its intersection with 'the Eastern Post Road' at 90th street; and thence continued on a straight line, along a (then) new road, called the 'The Middle' or 'Harlem Bridge Road,' to Harlem Bridge, at 130th street and 3d avenue.

'This road passed in its route from the Croton Reservoir at 42d street the following places, viz: along the east side of Dr. Hosack's 'Elgin (Botanic) Garden,' from 47th to 51st street; about 210 yards east of the Powder House, between 64th and 65th streets; along the west end of Hamilton Square, from 5th to 3d avenue and from 66th to 68th street; crossed 'the Harlem Cross Road' at 71st street; crossed the division line between New York and Harlem.
common at 87th street; reached the southwest corner of Observatory place at 89th street, and crossed that square to 94th street; thence "Harlem Marsh" square, which was laid out from 106th to 109th street, and from 5th avenue eastward to Harlem at "Benson's Point"; and thence passed through Harlem village from 116th to 125th street.

"The Kingsbridge Road" commenced at the crossing of the Middle road by the Eastern Post road, at 90th to 92d street; and continued along the Eastern Post road through the Barrier gate, at McCowan's pass, to "Harlem lane," near 108th street, where it diverged eastward to Harlem; it thence continued along that lane over Harlem flat to Myer's corner, about 67 yards west of 8th avenue at 131st street—passing in its route along "Harlem lane," the residence of Valentine Nutter, in 6th avenue, between 109th and 110th streets; and thence passed 73 yards west of the southwest corner of "Harlem square," which was laid out from 117th to 121st street, and from 6th to 7th avenue . . . ; crossed the road leading from Manhattanville to Harlem at 125th street, between 8th and 9th avenues, and east of the Manhattanville Academy at 126th street and 10th avenue. From Myer's corner the Kingsbridge road continued northward, between 8th and 9th avenues, to its intersection with the Bloomingdale road at 9th avenue between 146th and 147th streets; passing in its route from Myer's corner west of the country residence of Cadwallader D. Colden—who was Mayor of the city in the years 1818, 1819, and 1820—standing in 7th avenue, between 139th and 140th streets; passing Bussing's Point road 133 yards west of 8th avenue, between 132d and 144th streets; thence ascended Bradhurst hill west of a Revolutionary redoubt at 145th street, and connected with the Bloomingdale road by 100 yards east of 9th and 14th streets; this Kingsbridge road thence passed the 10-mile stone . . . ; thence passed 120 yards west of the residence of Madame Jumel, the widow of Stephen Jumel, and afterwards the widow of Col. Aaron Burr, standing 150 yards east of 10th avenue, between 160th and 161st streets. At 161st street the road passed east of and opposite to Mount Washington spring, at 11th avenue, and redoubt of 1808, from 109th to 111th street; the road to the south of this street passed 67 yards east of 12th avenue, and 900 yards east of a fort and redoubts on a point of rocks on Hudson's River, about 30 yards south of 176th street, and 200 yards west of 14th avenue . . .

At 189th street the road was 43 yards east of 12th avenue, and 343 yards east of Fort Washington, on 13th avenue. At 192d street the road was 135 yards west of Fort George. At 196th street the road was 132 yards east of 12th avenue, and 233 yards east of Fort Tryon. At 206th street the road crossed the west side of 12th avenue, and was 730 yards east of Tuffy Hook Point, on Hudson's River . . .

Between 205th and 209th streets this road was opposite the residence of Jacobus Dyckman, and 150 yards west of 11th avenue. From 211th street to the 216th street, the road passed along the route of the eastern slope of marble quarries. At 216th street the road was 33 yards west of 10th avenue, and 1,070 yards east of Cock Hill Fort, on high ground, between Spuyten Duyvel (Spitting Devil) creek and Hudson's River. At 222d street the road crossed the Canal cut across New York Island from Harlem River to Spuyten Duyvel creek. At 226th street the road was 150 yards east of Fort Prince Charles, on 106th avenue, near the southeastern side of that street. At 228th street and 106th avenue, where the most northerly monument on New York Island was placed by me, Kingsbridge road was about 34 yards east of that avenue; and McCorn's mill, built over Harlem River, along the west side of Kingsbridge, was about 17 yards north of that most northerly monument.

"The Harlem Road" passed from the village of Harlem over the Harlem Plats, north of "Snake Hill," on 7th avenue, from 121st to 123d street (now Mount Morris Square), and formed a junction with the Kingsbridge road at Myer's corner.

"The Bussing's Point road diverged eastwardly from the Kingsbridge road, between 143d and 144th streets, and intersected the 8th avenue at 145th street, and continued along it to near 149th street, and thence diverged northeastward, on a straight line, to McCowan's Pass and Dan across Harlem River, at 155th street, 20 yards west of 7th avenue. . . .

All the redoubts and forts from Bussing's Point road to Kingsbridge were built during the Revolutionary War, and consisted of embankments of earth, some of which remained standing, from 6 to 8 feet in height, and the outlines of the ruins of others remained pretty well defined upon the ground, when I surveyed them in the years 1818—1820. I obtained the names of those fortifications from Jacobus Dyckman, on the Kingsbridge road, and other old gentlemen in that neighborhood—some of whom informed me that they lived there when those fortifications were being built, during the Revolutionary War.

The streets and avenues herein mentioned, although reported on the Plan filed by the Commissioners in 1811, for streets as far north as 157th street, and for 10th avenue thence to Harlem River near Kingsbridge, and all the streets and avenues north of 155th street were extended across the Island, and northward to Harlem River, on maps subsequently made by me and filed in the Street Commissioner's office. Yet many of the streets and avenues on New York Island were not defined upon the ground by monumental stones and iron bolts till as late as about the year 1816, and none of them were placed by me north of 155th street, except on 10th avenue to 228th street, near Kingsbridge; and the distances herein stated in yards were obtained from measurements made on those maps.—Man. Com. Coun. (1863), 847-56. See also Hist. Mag., and ser., II: 27.

In this year, William Cullen Bryant, when only 13 years of age, published at Boston his first book entitled The Evergreen, or Sketches of the Times; A Satire, one of the first books by an American writer to achieve more than local fame.

In this year, John Trumbull (see 1804) left New York for Europe, but returned in 1816 (p. 94).

In about this year, Father Anthony Kohlmann, S. J., organized a Catholic college in a rented house in Mulberry St., opposite the Parochial School of St. Patrick's Cathedral. The school was known as "The New York Literary Institution."—U. S. Cath. Hist. Soc., Hist. Records and Studies, II: 432-33; The College of St. Francis Xavier, 3. The college later moved to Broadway, and finally was established opposite the Elgin Botanical Garden on Fifth Ave. (see Mr. 1816). On part of this property the present St. Patrick's Cathedral was built—see Ag 15, 1858.

Some time betw. 1816-1817, William Bridges made a survey of the Somerindgyck farm. The original survey is preserved in tube No. 166 in the real estate bureau of the comptroller's office, Municipal Bldg.

For view of the Baptist Church on Oliver (formerly Fayette) St., showing the buildings extending to Chatham St., 1808, see Man. Com. Coun. (1863), 275.

Continuing the record of official transactions and building operations in connection with the construction of the new city hall, the following events transpired in 1808; they have been summarized and, for convenient reference, placed in the Chronology at the beginning of the year, as was done under 1804 et seq.

On April 11, 1808, McCombs wrote to Alderman Mott, chairman of the Common Council, that the building, at the expense of a reduced scale, $25,300, which would enable them to raise the walls above the heads of the second storey windows, so that the building might be roofed the following season.—M. C. C. (1784-1831), V 8. On April 11, also, the build. comm. was directed by the common council to confer with the "Masters and Mechanics" regard to reducing wages for the ensuing season.—Ibid., V 94. On May 23, the stone-cutters asked an increase, and were allowed $1.25 a day.—Ibid., V 116. Johnson & Stevens having informed the common council on May 16 that they were bankrupt, the build. comm. reported on June 27 that they found these contractors had had "no previous experience in estimating the expense of the work," and they recommended further purchases of marble at $1 per cubic foot to enable them to continue, with an advance payment of $1,000 on such security as was satisfactory to McCombs—Ibid., V 121, 128. On Dec. 5, the building committee reported that the hall had cost to date $247,161.38. "About two thirds of the walls have been carried up to the underside of the entablature, or within 3 feet 6 inches of the height to receive the roof on the wings."—Ibid., V 358-60.

As in previous years (see supra), a list of warrants can be made showing the several advances made by the common council for the use of the building committee. Valentine has made a summary of the building costs in Man. Com. Coun. (1852), 470.
Under the act of congress of March 2, 1807 (p. 57.), the slave trade was to cease after this date. See D 14 and 25, 1807.

Congress makes a further appropriation of $1,000,000 for building and repairing harbor fortifications.—Laws of U. S., 10th cong., chap. 6. For description of the fortifications, later in the year, see Man. Com. Coun. (1808), 879.

A special meeting of the common council is called by Mayor Willett, to inform the members that he has done so "in consequence of a Notice published in the Daily Advertiser of this morning, inviting the Seamen in the vicinity of this city to assemble in the Park tomorrow at 11 o'clock, for the purpose of enquiring of him what they are to do for their subsistence during the Winter." He desires to consult with the board "on the measures that might be provided to prevent any unpleasant consequences." The board thereupon requests the mayor "to publish the following Notice in all the Daily papers and to circulate the same in Hand Bills."

"The Mayor decidedly disapproves the mode of application recommended in a Morning paper, to be pursued by the Sailors of this port for subsistence during the winter."

He informs the public that the Corporation will, on the present emergency, as they have done on former occasions, provide for the wants of every person, without distinction, who may be considered proper objects of relief.

"The Mayor cannot conclude this Notice, without exhorting all classes of Citizens to refrain from assembling in the mode as prescribed, and hastily dispersing themselves in the Park."—M. C. C. (1784-1831), IV: 699-700. The meeting was held, nevertheless. For the resolutions drawn up, see Ja 9, and for the board's further action, see Ja 11.

The following memorial is presented to Mayor Willett by seamen who assembled in the Park on this Saturday morning:

"Our situation is not only distressing, but truly alarming. The Embargo lately levied upon our shipping [see D 22, 1807] has not only destroyed all employment by Sea, but rendered it impossible to gain a subsistence by our labor on shore. Our humble petition, to you Sir, is to know how we are to act in this case, and to beg of you to provide some means for our subsistence during the winter, should not the embargo be immediately taken off. What has America to boast of but her Agriculture and Commerce? The destruction of one, will be the ruin of the other.

"The greatest part of the wages due us from our last voyages is already expended, and more, we are already indebted for our boarding. By what means shall we discharge these debts? Should we plunder, thief or rob, the State prison will be our certain doom.

"In a hillside, this morning, You tried to dissuade us from our purpose, mentioning that provision was made for objects of pity. We are not objects of pity yet, but shall soon be, if there is not some method taken for our support. We are the most part hale, robust, hearty men, and would choose some kind of employment rather than the poor house for a livelihood. We humbly beg therefore, you will provide some means for our subsistence, or the consequences may not only prove fatal to ourselves, but ruinous to the flourishing Commerce of America, as we shall be necessitated to go on board foreign vessels.

"Saturday Jan' 10th 1808.

The sailors "quietly dispersed on being assured by his Honour that the Corporation would take their case into consideration." On Jan. 11, the mayor presented the memorial, as a report of his proceeding, to the common council.—M. C. C. (1784-1831), IV: 700-1.

Alderman John Bingham, chairman of the ways and means committee, reports to the common council: "That in order to provide for the Subsistence of the Seamen of this port, thrown out of employment in consequence of the existing embargo [see Ja 9], they have conferred with Capt. Chauncey of the U. S. Navy who has consented to receive the Sailors in the Navy Yard, on condition of signing the Articles of the U. S. States Navy, to continue in service, during their own pleasure, and perform duty according to their orders, the Corporation agreeing to pay the amount of their maintenance, at the rate of twenty cents per ration for twenty four hours, which includes victuals, drink, fuel, candles and accommodation for washing, to be at an additional charge.

"The Committee recommend this arrangement to the Common Council, as thereby every Sailor in distress will be comfortably sup-

ported, and being removed from town, and subject to the orders and discipline of the Navy, no ill consequences can result to the peace of the city, from their tumultuous associations. This meritorious class of citizens, it is confidently presumed, will be perfectly satisfied with this plan for their immediate support. Whenever they can do better they will be at perfect liberty to leave the navy yard and seek for themselves.

"Should the Common Council approve the measure, the Committee will arrange the details with Capt. Chauncey for the admission of the Seamen and charge of the rations.

"To provide for this class of citizens, who are capable of labouring and who are destitute of occupation, the Committee have directed the Street Commissioner to examine how many Carmen and hands to load carts can be honestly employed to fill the collect, and the means of providing earth for the purpose; and to report Ordinances to compel proprietors of low grounds in the vicinity to co-operate with the Corporation.

"The Committee likewise contemplate the expediency of reducing Inclenberg hill on the Boston road, provided the frost shall not oppose insuperable obstacles.

"They will likewise direct the Street Commissioner to examine the situation of Streets and lots that may require to be regulated and raised in the vicinity of Corlaers Hook, and, if practicable and not too oppressive to the proprietors, to report ordinances for regulating and filling the same.

"These various objects may employ a considerable number of industrious persons at moderate wages, which may enable them to support their families without becoming a public burden.

"For the maintenance of that class of citizens for whom labour cannot be provided and who are incapable of labouring, the Committee propose to issue rations of Soup and meat, four times a week, in proportion to the number of their respective families, agreeably to the accompanying plan.

"To conduct this measure, with the greatest possible economy, the Committee are providing a Soup House in the Alms House, which will be completed by Thursday next; in the mean time partial supplies are provided, adequate, it is presumed, to the present demand."

On the committee's recommendation, the board passes a resolution empowering the committee of ways and means "to adopt such measures for the support of the Seamen and labouring class of the community, thrown out of employment in consequence of the existing embargo, and of the indigent poor, by furnishing labour or means of subsistence, as in their judgment may appear most expedient; And that the said Committee keep a regular account of all expenses incurred by them in fulfilling their engagements, and report, weekly, progress of their proceedings to this Board."—M. C. C. (1784-1831), IV: 702-4, 713-15, 728, 737, 751.

The common council refers to the committee of defence "A Letter from General Stevens to the Mayor, inclosing a plan of a Radeau or Floating battery, calculated for the defence of this harbour."—M. C. C. (1784-1831), IV: 702. The original letter is preserved in metal file No. 36, city clerk's record-room. The original drawing, in ink, dated Jan. 1, 1808, and endorsed "Plan of a Radeau by General Stevens, Refd to Comm. of Defence," is preserved in metal file lettered "Filed Papers, 1804-1808," city clerk's record-room. Without credit to Gen. Stevens, this drawing is reproduced in Men. Com. Coun. (1860), 590, appended to an account of Monsieur Du Buc's plan of defence (see Ap 25, My 16, 1808).

The street commissioner presents to the common council a deed from the Corporation of Trinity Church to this Corporation for sundry Streets through their grounds between North Moore and Christopher Streets, comprising

"1st Washington Street from Christopher Street southerly to Hudson river.

"2d Greenwich Street, from Brannon Street northerly to the extremity of their lands.

"3d Hudson Street, from North Moore Street to the northerly side of Vestry Street 87, feet 6 inches in width.

"4th Hudson Street, from the North side of Vestry Street, on both sides of Lispenards lands, as far as their land extends 65 feet in width.

"5th Varick Street from North Moore Street to Vestry Street, 62 4 feet in width.

"6th Varick Street from Vestry Street on both sides of Lispenards
grounds, as far as their land extends, 65 feet wide, reserving as much as shall be covered by the steps of the Portico in front of St. John's Church.

11th Street, from Hudson Street to the eastern boundary of their land.

10th Street, from Greenwich Street to the eastern boundary of their land.

6th Street, from Greenwich Street to the eastern boundary of their land.

25th Street, from Hudson Street to the eastern boundary of their land.

The proposal the (1784-1831), grounds, receive I confirmed as 1 postponed the 1 unfortunately reduction and 'selves, between 10^ several leases now in existence, the rents therefrom and the premises so leased and warrant only against themselves and such persons as may derive title under them, subsequent to the date of their said deed."

The street commissioner recommends that this deed ofcession "be referred to the Committee appointed for the revision of Laws for their opinion of its legal construction. The board refers it to the "the Attorney of the Board."—M. C. C. (1784-1818), IV: 709-10, 531-34.

"The common council orders that Mr. Lemaire prepare frames for the portraits of Governors Lewis and Tompkins and of the present Mayor."—M. C. C. (1784-1818), IV: 111. On June 6, 1808, Lemaire was paid $225 "for frames for public pictures."—Ibid., V: 165.

"Morgan's Patent Ways are in full operation, at Mr. John Stevens's wharf, Hobuck, and ready to receive vessels under one hundred and fifty tons."—Am. Cit., Ja 13, 1808. See F 6.

"Citizen" writes to one of the newspapers: "Among the number of plans proposed to obstruct the navigation, and ruin the harbour of New York, I have seen none that appears to me likely to be more ruinous in its consequences to this city than that of erecting bridges across the North and East rivers [see D 5, 1807]. This has been the topic for some time past, and many exertions have been made to gain it popularity. I hope, however, that a plan of such moment to the public, will be studiously considered by the citizens at large, before they tender their support to a proposal which threaten so serious damage to this city."—N. Y. Gaz. & Gen. Adv., Ja 16, 1808. See F 2.

18. The building committee (see My 26, 1807) makes the following report to the common council: "That they have reduced the daily pay of the Journeymen Stone cutters at work at the New City Hall, from 125 cents to One Dollar, and have now Twenty-five Journeymen employed in that business for the same sum, that they before paid Twenty.

During the present exigency [see Ja 9 and 11], the Committee are of opinion, that the interests of the City would be promoted by employing an additional number of Journeymen Stone cutters at this reduced price. The workshops where they are employed can conveniently accommodate a larger number, and are made very comfortable by the means of stoves, and the Superintendants of the Building assure us, that they can do as great a days work as in the summer season. Should the Board sanction this measure, the Committee will only employ such additional Journeymen who have families, and from the present scarcity of employment, would become pensioners on the bounty of the Corporation. Thus a two-fold good would result, the employment of our citizens who are in distress, and their labour obtained at a reduction of 20 per cent from the usual rate of wages." The report is confirmed by the board.—M. C. C. (1784-1818), IV: 719.

The committee, appointed to confer with a committee of the Free School (see D 28, 1807), reports "That the present buildings occupied by the State as an Arsenal is ill adapted for that purpose, not being sufficiently extensive to accommodate the Artillery and military implements belonging to the State.

"That it is therefore expedient to assign to the State other lands for that purpose either in or as the State shall elect: and that in such case the present building shall revert to the Corporation.

"That if the state shall assent to this arrangement, it will be expedient to grant the new building and suitable adjacent ground to the Trustees of the Free School, to be occupied as long as they use the same for the purposes of their Institution; and on the express condition that the said Trustees shall educate the children of the Alms House gratuitously.

"The Committee can confidently recommend this plan. It will accommodate the State in a more public and spacious Arsenal. It will recompense the Corporation in the education of their poor children. It will accommodate the Trustees of the Free School with a convenient place for education; and it will redound to the honour of the Corporation and the general good of the Community, in the means it will afford for the diffusion of the blessings of knowledge among the necessitous: an object of the first importance, and which has hitherto been neglected in this city, particularly as it respects the poor children under the care of the Corporation." The board confirms the report, and orders that the same committee "report a proper site for an Arsenal, together with a map of the premises."—M. C. C. (1784-1818), IV: 717. See F 8.

The committee on the subject of purchasing the Manhattan water works (see D 25, 1807) makes a report to the common council in the they state "that they have conferred with a Committee of the Company, and found a proper disposition on their part to promote the views of the Corporation, but that no alienation of the said water works can take place without the sanction of the Legislature.

"It has been generally understood and believed, that the right of supplying this city with pure and wholesome water, ought to be vested in the Corporation, as the proprietors of the property. Previous to the institution of the Manhattan Company, this measure was recommended to the Corporation by a respectable and enlightened Committee, and although it unfortunately failed, yet it has commanded the attention of subsequent Boards, and there has been no diversity of opinion on the general expediency of being invested with the exclusive power; altho' there may have been at different periods variances in sentiment with regard to the mode and extent of executing it, and altho' obstacles from various sources have hitherto interfered to prevent the accomplishment of this desirable object, when your Committee consider the importance of this power, in supplying the citizens with good water for domestic purposes, in guarding against the ravages of fire and disease, in purifying the Streets, and in accommodating their public buildings, they can not but earnestly recommend to the Corporation, the most prompt and efficient measures for obtaining it.

"In 1804 [p. 7, No. 6, 25, and 0 29], the year after the prevalence of Yellow fever, the attention of the Corporation was pointedly drawn to this subject, with a view of preserving the public health, and it was at that period generally conceded that the Island of New York did not yield a supply sufficiently commensurate with the public exigencies, but that recourse must be had to the river Bronx or the Sawmill river in the county of Westchester, and that the water works of the Manhattan Company, and their right of supplying the city with water, ought to be procured in order to aid and promote this great object. The best mode of proceeding at present in the opinion of your Committee is, by an application to the Legislature for permission to purchase all the rights of the Manhattan Company in this respect and for power to pass all necessary Ordinances to protect and guard the rights vested in the Corporation in consequence of such purpose.

"The question, as to a suitable compensation to the Company will be open for future treaty and adjustment, and if they are unreasonably in their demands, the Corporation will not be bound to accede to them." Consideration of this report is postponed until the next meeting (see Ja 25), and it is resolved that the committee "examine and report to this Board at their next meeting, whether the said water works produce any and what annual revenue or any and what annual loss."—M. C. C. (1784-1818), IV: 715-16. For report on the Company's revenues, see Ja 25.
The common council resolves "that John Pantang, now City Inspector and Clerk to the Common Council, be dismissed from his situation, held by him, and he is hereby dismissed;" also "that Jacob Morton, now Comptroller," and "Richard Furman, now Superintendent of the Arms House," be dismissed from their respective offices, and that they are "herby dismissed."

The resolution is to lie over for consideration at the next meeting.—M. C. C. (1784-1831), IV: 725. On Feb. 15, the board voted to dismiss Morton and Furman.—Ibid., VI: 10, 11. On Feb. 22, the board voted to dismiss Pintard.—Ibid., V: 10, 21. Garrit N. Bleeker and William Mooney were chosen in the places of Morton and Furman, and Pintard was requested to retain his position until his successor was appointed.—Ibid., VI: 10-11, 22, 24. The dismissals were the result of the Republicans gaining a majority in the common council (see N 17, 1807).

In conclusion, it must be said that it shall not be lawful for any person to plant any tree in any Street of this City, which is less than forty feet wide, to the southward and westward of Catherine Street and Fresh Water Pond...—"Laws of City of N. Y. (1808), 27.

By order of the common council, a warrant for $600 is issued in favor of Col. John Trumbull, on account, "for the portraits exercising by him, for the Corporation."—M. C. C. (1784-1831), IV: 712. Trumbull's original petition (MS.), for an advance of $500 or $600, is preserved in metal file No. 33, city clerk's record-room. The portraits were delivered on or about April 25 (q. v.).

Secretary of War Dearborn sends to Vice-Adm. Clinton "a sketch of part of the harbor, and of the blocks, chains and chevaux-de-frise, proposed as an additional defence against the approach of hostile ships to the city of New York." He adds: "By this mode of defence the objection to the contemplated line of blocks is obviated, viz.—such an obstruction to the course of the tide as might effect the navigation of the river. This system will not occupy more than from one fifth to one fourth of the bed of the harbour between Bedloe's Island and Long Island, and consequently cannot have any sensible effect on the course of the tide." Measurements and locations of the blocks and a description of the chevaux de frise are included. On Jan. 21, Clinton sent the sketch and description to Gov. Tompkins, saying: "There is nothing new in the project of chains. They have been long in use, and have been considered one of the best obstructions against the passage of ships, where protected by efficient batteries. The proposed chevaux-de-frise, is, as far as I know, on a new construction..."—Hastings, Pub. Papers of Daniel D. Tompkins, II: 28-29.

The committee appointed to investigate the revenue from the Manhattan water works (see Ja 18) reports to the common council that "the Capital Stock expended, including real estate, (first Cost of $3,000,000) is $4,324,278; and the net revenue from May 1, 1807 to May 1, 1808 will be $10,961, equal to $42 per annum." A motion, therefore, to apply to the legislature for permission to purchase the water works is negatived by the casting vote of Mayor Willett.—M. C. C. (1784-1831), IV: 712-33. See, however, F 22. Commenting on this action, one of the newspapers says: "This proceeding has been represented in the Evening Post as originating from the Manhattan Company, for the advancement of the stock. This is not the case; and to the detriment of honesty, it is to free the Bank as well as the Common Council from motives and conduct so unworthy, that this paper is written. Two years ago, the Common Council, unsolicited and of its own sheer motion, appointed a committee to apply to the Manhattan Company, to ascertain whether they would dispose of the water works, and if so upon what terms. The Bank appointed a committee to confer with that of the Manhattan Company, on two occasions, without coming to any decision. Since that time till recently the business has slept. The committee of the Corporation, again unsolicited by and unknown to the Bank, as I am well informed and believe was lately renewed—applied to the Bank, for a statement of the income of the water works, with which they were furnished; and upon this statement the motion was made in the Common Council on Monday last. There has been no solicitude on the part of the Bank to transfer their right. The Manhattan Company has discovered nothing like avarice in their dealings with the Corporation. At all times, the city has had the benefit of the corporation out making the least compensation. The Bank has permitted the Corporation to erect three hydrants gratis. Instead of demanding of the Common Council $5000 dollars per ann. for the use of the water, which a respectable member of a late board declared they deserved, the Bank has neither claimed nor been paid a cent. And it has been denied to the Corporation one hundred thousand dollars at six per cent. while it has been paying to the board a dividend of nine upon that amount of stock. So that the Bank in fact gratuitously bestows on the board an annuity of $5000, besides extending to the city all the advantages of their expensive water works. Surely for so many benefits the Manhattan Company deserves something better than misrepresentations of their motives and conduct..."—Am. Civic., 4, 1808.

In an address to the legislature Gov. Tompkins says in part...—"the late unprovoked and unprecedented attack upon the frigate Chesapeake by a British vessel [see Je 22, 1807], the unwarrantable pretensions of Great Britain to arrest and bear away seamen from our ships upon the ocean, to intercept and destroy our lawful commerce with nations with whom she is at war, and the glaring infringements of the established principles of the law of nations, avowed and practised both by France and Great Britain, have seriously impaired the rights, wounded the honour and assailed the independence of our country. The events have diminished the hope of maintaining peace... and have produced the necessity of resorting to energetic measures..."—Being thus circumstanced, it becomes our duty to be assiduous in providing for the welfare and security of the persons and property of the Citizens of this state. The appeal to the general government for an efficient and permanent fortification of the city of New York, has not failed to excite their serious attention to that subject. The plan which has been undertaken, the degree to which it has progressed, the operations contemplated to be pursued, and the measures to which your sanction is desired, will be communicated to you without delay.

Although our anxiety is alive to the protection and safety of the city of N. York, and although our exertions to obtain complete security for that important capital should continue ardent and unceasing, we ought not, at the same time, to be unmindful of the exposed situation of our brethren upon the northern and western frontiers of our state... The sum of three thousand dollars, granted for the purpose of erecting a powder magazine near the city of New-York [see Ap 3, 1807], has not been expended. The act contemplated a different site from that on which the old magazine is situated, and the sum appropriated proved inadequate to the purchase of another eligible tract and the erection of a building..."—Assem. Jour., 31st sess., 6-9.

The legislature authorizes the common council of New York City "to reserve all that part of the water adjacent to the wharves of said city, from the east side of Counties' slip to the west side of Whitehall slip, for the sole accommodation of sloops and other marines, near vessels using the trade of the said city from the 20th of March until the 20th of December in each and every year; and that during the time aforesaid, no register or sea vessel shall be suffered to use the slips or wharves within the above described limits, without special permission."—Laws of N. Y. (1808) chap. 1.

"A Merchant" enters the controversy over the advantages and practicability of building bridges over the North River. He says: "The scheme of building on the North River I conceive to be entirely chimerical, and, if attempted, it would be proper that the constituted authorities should enquire whether it is not a plan of foreign projection, to aid in injuring the welfare of the city, by obstructing the navigation at a certain period. But the East River project being more practicable, and as the passage of vessels of importance will be bridged over the North, there is little to investigate. The advantages will be small in comparison with the various disasters which will consequently happen. Two thirds of the provisions, &c. which New York is supplied, is brought from the Hudson and through the Sound. The supply from Long Island is generally conveyed in boats from the various inlets, and the small proportion which is brought through the Narrows, is easily transported by means of the Ferries. When then the necessity of

Chronology: The Reconstruction Period: 1783-1812

1807

Jan. 18

1929
A petition of John Stevens (see D 5, 1807) "praying for leave to present a bill for incorporating a company, for the purpose of erecting bridges across the North and East rivers, opposite the city of New York," is read in the state senate and referred to a committee.

"Senate Jour., 31st sess., 26. The report being approved, a bill was introduced "to incorporate the New-York bridge company."—Ibid., 31st sess., 33-34. On Feb. 12, the committee of the whole, to whom the bill had been referred, "reported progress, and asked and obtained leave to sit again."—Ibid., 31st sess., 49. Thereafter, there is apparently no report on the bill. For further criticism of the plan, see F 6.

Another citizen writes to the press in opposition to John Stevens's plan for building bridges at New York (see D 5, 1807 and F 2, 1808). He says: "The erection of Bridges across the North and East Rivers having excited considerable interest among almost all classes of citizens, both in town and country, and as the hitherto unrivalled and prominent means of communication to the unobstructed situation of the harbor a great portion of deep reflection and deliberate enquiry should be exercised prior to commencing an undertaking, which would, in any way, injure the navigation, unless resorted to for the purpose of preventing the approach of an hostile force... The navy-yard is established at the Wallabout. Our navy will be soon increased, both in size and number. Large vessels cannot, without danger, come through the Sound, and the main channel is through the Narrows. According to the intended plan, the bridge over the East river will be built on or near the spot where the last tacksings are generally made to gain the navy-yard... In fine, in a political, commercial, and general consideration, the consequences will be serious. Passed fellow-citizens, and reflect before it is too late..."—Pab. Adm., F 6, 1808.

"Morgan's Patent Ways" (see J 13), a device for "heaving up and repairing vessels of any size under 150 tons," now stationed at Hoboken "opposite the State Prison," are advertised with an engraving of the invention.—Am. Cit., F 6, 1808.

The common council approves a memorial to the legislature stating that the arsenal in the city (see J 15) is "far from being suitable for the purpose, as it is not sufficiently extensive to contain the military stores and implements which belong to them," and asking permission to grant the building to the "Trustees of the Free School" on condition that they educate the children in the almshouse. The board offers the state a corporation lot 210 ft. square, bounded by White, Elm, Sugar Loaf, and Collect Sts.,
Washington, March 20th, 1847

Sirs:

I am now enclosing you my letter of the 12th inst. after all expedients and delays we have been constrained to pursue, in the expected application and at the people we are not able to bring, but continue to you in all arguments, and cases, unless in numbers. I think on the whole that one whole should be comprised within from 5000 to 6000 dollars in a year perhaps more and that another boat perhaps just one mile will cost 1000 dollars and also produce as much in 10 or 20 dollars a year. Then we are entirely on the new method which I have been gaining 500 to 600 per cent. on, and now by my present determination not to depend on any property for support on the Ninth, but I will sell as much of my lands as will pay my part of rendering this boat complete and for establishing another which we will expect from Albany and one from New Jersey every three days to carry all the passengers. It is now money to consider how to put our first boat in a complete state for 5 or 10 years, and when I find that the present one is so much that it must have an ironed keel and timbers, new side timbers, and heads and decks, new cowboys and iron, and that the people must be the best that can be had, then I am in my present state of greater powers and strength with all this work, the work of the present, half in of other consequence, particularly as many of the new boats coming to be sold into
for the erection of a new arsenal, or the choice of two other lots between Elm and Collect Sts. The memorial is accompanied by a map of the three lots, with an estimate of about $15,000, which shows the three lots——M. C. (1784-1811), IV: 725-754. *Assembly, July, 31st sess., 23rd-14. See Mr 19 and My 7.

The common council refers to the committee of defence "A Plan for fortifying the Narrows," by William Bridges, city surveyor, which has been laid before the board.—M. C. (1784-1811), IV: 746. 11.

In accordance with its report of Feb. 1 (q.v.), the Wallabout committee of the Tammany Society issues a circular relative to the projected interment of the remains of the Jersey Prison Ship victims. It says in part: "Various attempts have been made to accomplish this important and interesting object [see, e.g., Ja 31, 1803, and D 10, 1804]. But individual exertions have hitherto proved inconsiderate; and the public sensibility, too much occupied by other considerations, has not as yet been sufficiently excited by the appeals that have been made to it..."

"The Society by which this Committee is appointed are encouraged to think... that their exertions to rescue from oblivion, and place on an imperishable basis, the memory of a large portion [Footnote: The number of American Prisoners who perished on the Jersey Prison Ship is supposed to be about 11,400, of those who perished in the revolutionary contest will meet with suitable countenance and support.]

They have accordingly appointed this Committee, and invested them with powers to form a plan for the interment of that portion of the Remains of our Countrymen now lying on the shore. The committee consists of William Jackson, Esq., on whose farm they were deposited, and where they now lie, a Deed of a piece of ground, conspicuously and advantageously situated, being near the head of the Navy Yard, which will not be affected by any regulations that may hereafter take place. He has already planted some trees of an appropriate description on the spot selected, and has given to the Society permission to inter the bodies in such manner, and with such solemnities as they may think proper..."

"... the relatives and friends of those unfortunate persons, and also our fellow-citizens at large, are requested to forward immediately, either to Benjamin Romain, Esq. Grand Sachem of Tammany Society, John Jackson, Esq. or the Chairman of the Committee [Jacob Van Devoort], by mail, or other safe conveyance, such information as may be in their possession or knowledge of the Names, Places of Birth, Age, Rank and Families of those persons; together with such circumstances respecting each as may be interesting, and particularly such as relate to their situation and suffering on board the said ship."

A procession will take place composed of different Societies, Publick Bodies, and the Citizens at large, and Military Honors will be paid to the remains of those who are to be interred. The interment may be performed by the interment by the Society or by the assemblage by a suitable character, due notice of which will be given to the public." As it is desirable that the monument contemplated to be erected, should exhibit a finished specimen of American taste and patriotism, and will consequently be expensive in its materials and workmanship, contributions are solicited to defray the cost, which is estimated at about $20,000. From original (which was inserted in a letter to Pres. Jefferson) in Bixby Jefferson Collection. A printed copy of the letter was sent to the recorder on Feb. 24, and is now preserved in metal file No. 33, city clerk's record-room. It came before the common council on March 7 (q.v.). The "American Academy of the Arts" is incorporated by act of the legislature.— Laws of N. Y. T. (1808), chap. 6. The society had been organized in 1802 (g. v, Je 30, O 27, and D 3) at the N. Y. Academy of Fine Arts.

A report is submitted by the street commissioner concerning the "Proprietors of ground required for Canal Street" (see F 1). John Jay, Peter Jay Munro, and Dominick Lynch, who own all the ground "through which Canal Street will run on the East side of Broadway," offer to cede as much of their property as is needed for a roadway, as well as for Etno and Crosby Sts., on condition that they are released from all charge for opening Canal St. west of Broadway.

John Cameron owns a "two Story frame house and one lot of ground in Broadway at the corner of and upon the grounds required for Canal Street," the lot being 25 ft. on Broadway and 100 ft. along Canal St. For these premises he asks $8,500.

Thomas Duggan, for his plot bounded upon Broadway and running 100 ft. west, containing about 5,000 sq. ft., asks $2,500, and for the plots west, containing about 7,500 sq. ft., he asks $2,250 additional. Other owners of property west of Broadway were Walter Bowne, Trinity Church, heirs of Anthony Lepsiard, etc. The report is ordered to lie for consideration.—M. C. G. (1784-1811), V: 5-8. See also descript. of Pl 83-b, III: 561. See, further, Mr 7.

The common council is informed that the "Laborers employed in taking Mud out of the Collect have, in the course of the last week, been totally discharged." The expenses for three weeks' work amounted to $767.55 besides the daily rations issued at the almshouse. On the same day, John Meghan is paid $54.24 for "carrying mud to Collect St;" and John Bingham is given $500 to pay Carmen employed at the Collect.—M. C. G. (1784-1811), V: 11. See also Ibid, V: 407.

The First Troop of Flying Artillery, will meet To-morrow Evening, the 20th inst. at the Riding House in Magazine-street, at half past 3 o'clock P. M., mounted in Undress Uniform, with Caps and Sabres. Members, whose horses are not in Town, and cannot procure such, will attend on Foot. —N. T. Com. Adv., F 19, 1808.

De Witt Clinton is sworn in as mayor. He replaces Marinos Willett (see Mr 16, 1807).—M. C. G. (1784-1811), V: 12. Clinton had been mayor from 1805 to 1807 (see O 29, 1805). He was succeeded by Jacob Radcliff in 1810 (g. v, Mr 5).

The common council approves a report of Street Commissioner Hunn which recommends that, before the grounds north of Canal and north of Varick St. be reserved for public purposes, the boundaries of such Park be regulated, profiles be made of the streets lately ceded by Trinity Church corporation north of Spring St. "otherwise errors may occur in fixing the lines for the course of the water, which it may be difficult afterwards to correct." Hunn adds that the "great extent of the low grounds, north-west of the dwelling house of Col. Burr [Richmond Hill], which is intersected by Varick St., will be necessary to very particular with respect to the surveys in that vicinity, especially as it will be impracticable to convey the water the whole distance from the Bridge in Art Street, without the aid of a Subterraneous passage, or Canal," and advises that stones be placed, "designating the present as well as the intended heights." He also recommends that Clarkson St. be opened, as it will facilitate the communication to the south side of Greenwich.—M. C. G. (1784-1811), V: 18-20.

By a vote of 11 to 5, the common council adopts a petition of the legislature stating that "various plans have been suggested at different times to furnish the said City with an abundant supply of water for the preservation of the public health and the prevention of fires. That in the adoption of proper measures to obtain this important object, it may be advisable to obtain a transfer of the right of way for the Aqueduct from that portion of Spring St. to Canal," and advises that stones be placed, "designating the present as well as the intended heights." He also recommends that Clarkson St. be opened, as it will facilitate the communication to the south side of Greenwich.—M. C. G. (1784-1811), V: 22-24.

The law was passed on March 25 (g. v).

There is laid before the common council a report of "the implements, Small arms and Ammunition for the defence of the State of New York." This includes warlike stores in hand and those required. It is referred to the committee of defence.—From the original list (M.S.) in metal file No. 34, city clerk's record-room. See also M. C. G. (1784-1811), V: 45.

The common council resolves "that this Board, confiding in the solicitude of the Honourable the Legislature of this State to obtain sufficient protection for the port and city of New York, submit their wishes and discretion the propriety of making such concessions to the United States both of Soil and Jurisdiction as may be necessary to carry into effect this important object."—M. C. G. (1784-1811), V: 45.

The road committee is authorised to cause as much earth to be removed from Art St. "between Broadway and the Bridge" (the bridge in Art St. see F 22) as may be necessary to open the road to a width sufficient to allow two carriages to pass in safety.—M. C. G. (1784-1813), V: 35.

The street commissioner reports to the common council that "
of part of the publicground attached to the government House for the purpose of extending Bridge Street from Whitehall Street to the Battery” is referred to a committee.—M. C. C. (1784-1831), V: 50. See Mr. 21.

By act of the legislature, the Seventh Ward is divided into two parts, one of the parts to be hereafter designated as the Tenth Ward. The preamble states that the voting population of the Seventh Ward “greatly exceeds the number of electors of any of the other wards;” and it has been “found impracticable to count the votes . . . for representatives in the legislature of this state, or for members of the common council . . . within the periods for such purposes allowed by the law.” The act further provides that in future elections the polls shall remain open “for the period of three days.”—Laws of N. Y. (1808), chap. 49. See also M. C. C. (1784-1831), V: 33: 35: 76.

The other state having already been authorised by the legislature to deed to the United States certain parcels of land on Staten Island and Long Island for fortifications (Laws of N. Y. 1807, chap. 51), the act is now extended to the lands covered by water, between Long and Staten Islands and below the south bounds of the city and county of New York; also to certain lands in the city and county of New York, and to lands covered by water therein; and the law authorises that Ellis or Oyster Island may be purchased or taken by law.—Ibid. (1808), chap. 51.

On April 27, the sheriff of New York County published a notice that he was commanded by the court of chancery to inquire what loss would be sustained by the owners and tenants of Ellis or Oyster Island by taking this island for fortifications, and that he would execute the warrant on May 14 next by taking possession.—Public Advs., Ap 28, 1808. See also Gerard, City Water Rights, Streets, and Real Estate, 45. See My 16 and N 4.

The legislature passes an act empowering the governor to choose one of the three lots offered by the city for a new arsenal (see F 8), and appropriating $13,000 for the erection and equipment of the building.—Laws of N. Y. (1808), chap. 61. See also M. C. C. (1784-1831), V: 76: 160: 161: 193.

The common council adopts a memorial to the legislature asking that “no bill may be passed by which the insurance of Lottery Tickets shall receive the sanction of law.”—M. C. C. (1784-1831), V: 64. See also Mr. 4, 1807.

The road committee gives orders for finishing the ends of the bridges on Manhattan Ave., near the powder house, and for reducing Lincoln Hill on Boston Road.—M. C. C. (1784-1831), V: 61. See also ibid., V: 96.

The committee on the petition for the extension of Bridge St. (see Mr. 14) reports to the common council that “this arrangement will considerably improve the southern district of the city by adding to its beauty, convenience and health, and that as the Legislature are now about making a donation to the United States of the land through which this street must pass, a proper season presents to make the application.” The committee urges, however, “that no considerations ought to interfere with the views or plans of the United States, and that the application for a reservation sufficient for this object should be made on condition only that a Sufficiently of ground will still remain for the United States, and that it will not interfere with the design or plan of the Chief Engineer.” The report is referred to the counsel and attorney of the board with directions to prepare a draft of a memorial to the legislature.—M.C.C. (1784-1831), V: 60: 61. See Mr. 28.

The legislature authorises the president and directors of the Manhattan Co. to lease or sell their water-works to the city, and to retain their other rights and privileges for 50 years.—Laws of N. Y. (1808), chap. 88. See also Gen. Advs., Mr. 32, 1808, and L'Oréal, Mr. 30, 1808. The water-works, however, were not purchased by the city.—See Mr. 28.

As Henry Remsen, Samuel M. Thomson, and others have represented that they and their associates “have become proprietors of the bridge built across Harlem river from Harlem to Morrisania, and of the lot of ground and dwelling house adjoining thereto,” the legislature incorporates them in the “Harlem Bridge Company.”—Laws of N. Y. (1808), chap. 71. The bridge referred to was the Coles Bridge erected in 1796 (see Mr. 24 and N 24, 1795). It was the first bridge built across the Harlem River at Third Ave.

The senate and assembly pass the following joint resolutions:

“That the senators and representatives of this state, in the co-
Chapter

**CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812**

1808 Mar. 26

gress of the United States, be requested to represent in the most earnest manner to the national government, the exposed situation of the port of New-York, and the urgent necessity, in the present menacing state of our exterior relations, of making and applying such appropriations of money as may be fully adequate to the protection of that important part of the state; and that they be further requested to represent the destitute condition of our seamen, the danger of their migratory foreign countries for employment, and the imminent considerations of justice, humanity and policy which combine in favor of ameliorating the situation of that meritorious description of citizens, and of securing their services in defence of their country."—*Senate Jour.,* 31st sess., 207; *Assemb. Jour.,* 31st sess., 331.

28 The committee to which was referred the communication regarding the state of the relics of the Jersey Prison ship martyrs (see Mr. 7) reports to the common council "that they have taken the subject of that communication into consideration and while it brings to their recollection an event which must awaken the sensibility of every American citizen, still it seems to have been reserved for the Tammany Society alone to have rescued from oblivion and place on an imperishable basis the memory of a large portion of our unfortunate but much lamented fellow citizens who perished defending the precious rights of our liberty and independence.

"Your Committee are therefore of an opinion that the interment of the bones of our unfortunate countrymen in the manner as proposed will be the means of transmitting to posterity an event which will be deeply engraved on the hearts of every American citizen."

"This view of the importance of this measure is the more important as the communication [we] do highly approve of the laudable and patriotic measures adopted by Tammany Society, and do recommend that we give to an undertaking of this nature every encouragement that may be consistent with the duties of the Common Council." The board thereupon resolves that it does "highly approve of the patriotic measures taken by the Tammany Society or Columbian Order for interring the remains of the American Seamen, soldiers and Citizens who perished on board the Jersey Prison Ship during the revolutionary war with Great Britain, and that we will cheerfully cooperate with the said Society by all proper means in carrying the same into effect." A committee is appointed "for the purpose of conferring with the Tammany Society and forming general arrangements."—*M. C. C. (1784-1811),* V: 70-71. See My 16.

"In accordance with the report of March 21 (p. 71), the common council adopts a petition to the legislature asking for a grant of land to enable it to continue Bridge St. "through the ground adjacent to the . . . Government House to the Battery." A draft of a bill for this purpose is also approved.—*M. C. C. (1784-1811),* V: 71-72. The desired law was passed on April 8 (q. v.).

32 De Witt Clinton writes to Henry Remsen, president of the Manhattan Co.: "I trust you will think it would be prudent to purchase real property in New York at present. I am inclined to believe that our foreign relations will render all property in that place insecure."—From original in N. Y. P. L.

"The street commissioner reports to the common council "that the walks in every part of the city have become so much broken, and in many places so dangerous to passengers, that very repeated applications are made to him to cause them to be repaired; he is unable to do, but in a very limited manner, as he has no person under him at present to perform that duty." Two men are transferred from the city inspector's to the street commissioner's department to perform the duties mentioned.—*M. C. C. (1784-1811),* V: 73-74.

33 For an account of conditions in New York at this time, due to the embargo, see Lamberti's description under Nov. 24, 1807.

34 An act is passed by the legislature changing the name of "The Society for establishing a Free School in the City of New York" (see F 19, 1805) to the "Free School Society of New York."—*Laws of N. Y. (1808),* chap. 99.

35 Street Commissioner Humm reports to the common council "that a very large walk has lately been discovered in Barley Street near Broadway in a dangerous situation which has been covered up some time in consequence of its being on the line of the Street and that an old building covers the north side of the Wall of the Well, to which it answers as part of the foundation.

"That there are no Wells within a reasonable distance of this place, and it would be much to the convenience of the neighbourhood if it was made useful: in order to do which it would be only necessary for the Superintendent of repairs to lead it to the Corb in the usual way." The board thereupon directs the Superintendant to "open said Well and fix a Pump."—*M. C. C. (1784-1811),* V: 85-84.

Dr. Hosack presents a memorial to the legislature asking it to purchase his botanic garden and to give him in payment some of the public lands. This is referred to a committee.—*Assemb. Jour.,* 31st sess., 393. On April 7, the committee reported that it was too late in the session to give the matter "that deliberate attention which its importance justly merits," and recommended that Dr. Hosack resubmit his petition next session.—*Ibid.,* 31st sess., 414. See Mr. 1, 1809.

The state appropriates $100,000 "to aid and expedite the defence of the city and port of New-York."—*Laws of N. Y. (1808),* chap. 171.

36 The cornerstone of the vault which is to contain the relics of the American prisoners who perished on board the Jersey prison-ship (see F 11) is laid on this day. A procession, consisting of U. S. marines, private citizens, committees of different societies, the Tammany Grand Sachem, "the Father of the Council," the orator of the day, the Wallabout committee, and a detachment of artillery, march from the old ferry at Brooklyn to the ground chosen. The stone bears the following inscription: "In the name of the spirits of the departed free—Sacred to the memory of that portion of American Seamen, Soldiers, and Citizens who perished on board the Prison Ships of the British at the Wallabout during the revolution.

"This is the corner stone of the vault erected by the Tammany Society or Columbian Order, which is to contain their remains. The ground for which was bestowed by John Jackson—Nassau Island, Seasho of blossoms. Year of the discovery the 316th of the institution the 19th, and of American Independence the 72d." An etching is delivered by Joseph D. Fay.—*Am. Chs.,* Ap 5 and 12, 1808. See also Account of the Internment of 11,500 American Seamen, Soldiers, and Citizens, who fell victim of the cruelties of the British, on board their Prison Ships at the Wallabout during the Am. Rev., etc. (1808), 49-60, where the date is erroneously given as April 13.

Pope Pius VII creates a suffragan See at New York. This new diocese comprised the state of New York and the eastern part of New Jersey.—*Farey, Hist. of St. Patrick's Cathedral,* 49. See also *Catholic Encyc.,* XII: 21 et seq.

The legislature grants to the common council "so much of the public ground adjacent to the government house in the city of New-York, as shall be necessary to open and extend Bridge-street in continuation from its present limits to the battery," provided the extension of the street does not interfere with the plans of the federal government for defensive preparations.—*Laws of N. Y. (1808),* chap. 168. See Mr. 14, 23, and 28, and My 2.

"This afternoon at 4 o'clock will be launched from the Ship Yards at Hoboken, a beautiful Steam Boat, built by Mr. John Floyd for Col. John Stevens. . . . Boats will be in readiness to convey passengers across from the Hoboken Ferry-House, No. 76 Vesey street. . . ."—*Am. Chs.,* Ap 9, 1808.

The legislature passes "an Act for the further encouragement of Steam-Boats, on the Waters of this State," which extends the Fulton & Livingston monopoly of steam navigation on the Hudson five years for every additional boat they shall establish, provided the whole term of their privileges shall not exceed 30 years.—*Laws of N. Y. (1808),* chap. 225.

The legislature authorizes the comptroller to reserve the upper rooms of the government house for the use of the American Academy of Arts (see F 12).—*Laws of N. Y. (1808),* chap. 240 (§ 44).

The apartments of the Academy in the government house were opened to visitors on Jan. 10, 1809 (q. v.)

The legislature authorizes the surveyor-general to sell 1,000 acres of state lands two years after the passage of this act, and to appropriate the money "for the increase of the interest at the Wallabout.

"Laws of N. Y. (1808)," chap. 225.

The common council orders a public stocks put up in the brickyard.—*M. C. C. (1784-1811),* V: 94.

A petition of Lois Keeler, "present keeper of the Flagstaff at . . ."
the Battery," is presented to the common council, asking that
she be "continued in her station, and offering, if required, an
annual rent of $200 for the privilege." The petition is referred to
the finance committee.—M. C. C. (1784-1831), V: 87. See
also ibid., IV: 675; V: 77. On May 16, the common council
granted the request, on condition that she pay $255 per annum,
quarterly, for one year from May 1.—Ibid., V: 127. See Ag 8.

Under the heading "Removal,"—Mr. Dyde announces
that he will in a short time open for Public entertainment,
under the name of "Mount Vernon Hotel," the "eatable, spacious
elegant and healthy situation House on the Banks of the
Hudson, near the 5 mile stone, on the Harlem Road, built by Col.
Smith, and now the residence of Mr. Robertson."—Am. Hist.,
Ap 11, 1808.

On June 27, Dyde advertised that the house was opened
for guests. He made a feature of dinner parties. "Not exceeding
three hundred, can be accommodated." "Gentlemen who wish to
Board out of the city during the summer will find this a most
delightful situation; there is fine fishing, shooting, salt water
bathing, excellent stabling, and grass for their horses.

"The distance by water is not more than four miles. The docks
are opposite the centre of Blackwell's island; boats can be easily
procured at Fly-market, or New Ferry stairs. . . . . Mr. Dyde
is determined . . . to make use of no extortion, he earnestly
entreats the public to give him encouragement . . . ."

A quantity of fine Green Turtle of all sizes constantly on
hand, fatting in a Craw made for that purpose in the East River . . .
Turtle Soup, every day during the season.

"Gentlemen arriving at this port for the benefit of their health
are invited to a view of this beautiful situation."—Pub.

Trially vestry orders that a proper Deed be executed, ceding
to the Portion of the Canal Street" belonging to the city, on
condition that the church will not be assessed for any further
ground needed for the street, or for the removal of any buildings
or obstructions therein.—Trin. Min. (MS).

The Northwest Reformed Dutch Church on Sugar Loaf (Franklin)
St. near West Broadway is dedicated.—N. Y. Gaz. & Gen.
Adv., Ap 13, 1808. It remained there until 1814, when the
congregation removed to 351 St. between 6th and 7th Aves.—Cor-
win's Manual, 1804. On May 23, 1870, the corner-stone of a new
church was laid at the north-east corner of Madison Ave. and
57th St. This church was dedicated on Oc 22, 1871.—Exercises
at Laying of Corner-Stone, 1870; Program of Dedication, 1871.
See also L. M. R. K., III: 916.

The common council orders a schoolmaster appointed for the
almshouse.—M. C. C. (1784-1831), V: 99. No record of such
appointment has been found, and no payments to an almshouse
schoolmaster appear in the minutes. The arrangements made
by the city with the Free School Society (see Ja 18, F 8, Ag 8, 1808,
and D 11, 1809) probably obviated the necessity of the appoint-
ment. Interest in the spiritual needs of the inmates of the alms-
house is manifest at this same time. Rev. John Stanford, a clergy-
man of the Baptist persuasion who never presided over a parish in
the city, preaches for the first time at the almshouse by invita-
tion.—Somers, Memoir of John Stanford (1835), 111. In June,
1813 (q. v.), he became chaplain of the city's humane and charitable
institutions, and for nearly two decades thereafter served those
institutions most advantageously.

The common council orders the comptroller to "prepare a
grant to the State of New York of the soil under water in front
of the ground belonging to the State Prison."—M. C. C. (1784-
1831), V: 99.

"Mr. [Edward] Savage, proprietor of the Museum, we under-
stand, is setting up at a considerable expense the large building
at the corner of Warren-street and Broadway, originally built
for the Military Academy; where he intends to exhibit Philosophical,
Astronomical, and Optical Experiments. It is probable he will
remove the Museum to the same building. . . ."—Merc. Adv.,
Ap 20, 1808. The building was named the "Lyceum."—Ibid.,
My 14 and 19, 1808. See also My 26.

Fulton's steamboat (see N 20, 1807) leaves New York for
Albany. "Since the last season, this boat has been lengthened
20 feet, her machinery renewed, and strengthened and her accom-
mmodations made not only elegant, but extremely comfortable.
. . . this boat as she now stands, has cost the proprietors $8,000
Richard Varick De Witt, in 1825, thus described the altered vessel:
"The old North River, as it was familiarly called, was an en-
largement and reconstruction of the Clermont, the experimental
vessel first built by Mr. Fulton.

"The hull of the new vessel was 265 feet long and 32 wide
about 150 feet long and 18 wide and about 8 feet deep from the bow for 116 feet. Thence for 24
feet the stern was elevated above the main deck about three feet forming a quarter deck which covered the Ladies Cabin and the
lobby between that cabin and the main or dining cabin. The
decent into this lobby was by 3 or 4 steps in the centre of the vessel. The starboard corner of the lobby formed the captain’s
office, the larboard corner the passage into the dining cabin. In
front of the Engine Room which occupied the waist of the Vessel,
was a small front cabin, and between that and the bow a fore-
castle for the crew. The engine occupied the centre of the room
leaving space on one side for a kitchen and on the other for a
pantry and bar.

"The boat was rigged with a small mast passing up through
the quarter deck carrying a boom and gaff main sail and a larger
mast and top mast forward of the engine, carrying a fore-guage
and square sail, over which was set a flying top sail. On a fire
stay extending to a short bow-sprit, was a jib, and studding sails
were at times carried from the yard, having booms projecting
from the gunwale of the boat. The forecastle was separated
between square topsail and sail on a fore topsail which rose from the keel to 6 feet above the
deck, and the mast was pivoted between them so as to be lowered
down upon the boswipet during head winds.

"A pair of yaws, for the landing of passengers were hung on
iron cranes on each side of the main deck aft, and the space
where the wheel guards finish ast to the hull were shaped into
steps, to facilitate the passage into and from the boats when in the water.

"The boiler was between the engine and main cabin, its top
being covered with a slightly elevated deck. [Machinery described.]

"The steering was done by a wheel placed between the gallows
frame and the smoke pipe . . . ."

"In the Clermont the fly wheels were hung outside of the hull
and just in front of the water wheels . . . ."—Sutcliffe’s, Robert
Fulton and the Clermont, 34-45, citing original in N. Y. H. S.
See also N. Y. Eve. Post, J1, 3, 1808.

The mayor lays before the common council a communication
from a M. Du Buc de Marentille "on the subject of protecting
this harbour on principles entirely new, and which are applicable
to the defence of any other port or harbour, for the disclosure
of which he demands a compensation of $50,000 in case his plan
should be adopted, otherwise he will not publish it." This is
the referred to the committee of defence.—M. C. C. (1874-1831),
V: 102. See also Man. Com. Coun. (1860), 94. For the
committee’s report, see My 16.

A committee of the common council reports that, from Jan. 15
to April 16, the sum of $5,701 has been expended for improve-
ments at the Collect.—M. C. C. (1784-1831), V: 94. 103. See
Je 6.

Because of the "want of a sufficient Basin at the Corporation

pier be sunk from Richard Varick’s wharf opposite Partition St,
326 feet into the river, which, with an L running northerly, as
portrayed on the Map herewith presented, will make a spacious
and desirable accommodation for Vessels using the trade of the

John Trumbull writes to Mayor Clinton that he "has finished
and placed in the room formerly the Library in the old City hall,
the pictures which He was directed to paint, of Governor Lewis,
& Governor Tomkins [i.e., (whole lengths at $500 each), & Govt.
Stuyvesant and the late Mayor, (heads at $300 each) amounting
to $2,800. He rec’d on account in January last [see Ja 18] $600." He asks that the balance of $600 "be paid to
him at this time."—From the original letter in metal file No. 33,
city clerk’s record-room. A warrant for $600 is accordingly issued.

M. C. C. (1784-1831), V: 102. The portraits are now in the
present city hall.—Cat. of Works of Art Belonging to the City, 6-8.

The city establishes a public pound adjoining the corner of
the Bowery and Gerard St., near the two-mile stone, which is
enclosed by a fence.—M. C. C. (1784-1831), V: 102-3.
In a petition to the common council, several inhabitants of Harlem state that the board "agreed and laid out a Road in the years 1807 and 1808 from the Hudson City to the hamlet of Manhattanville to the Boston Post Road through Harlem," and that, "in consequence of the New Bridge now building from Harlem to Millers or Great Barn Island in the East river," the petitioners cannot be supplied with fuel, etc., without great expense. As "the Proprietors of the ground through which this road is to run are willing to have it opened and ceded to the ground to the Corporation," they ask that the road be opened "from Kingsbridge road to Harlem" and be made "passable."—From original petition (MS.) in metal file No. 33, city clerk's record-room. It is referred to the road committee.—M. C. C. (1784-1831), V: 116.

On May 16, the petitioners were given leave to withdraw the petition, because the common council cannot interfere with arrangements now under the authority of the commissioners for laying out roads beyond North St. (see Ap 3, 1807.)—Ibid., V: 127.

Gov. Tompkins, in a letter to Secretary of War Dearborn, says: "The fund appropriated for aiding in defence of the City and port of New York [see Ap 6] will be cheerfully expended in measures supplementary to those already commenced by the United States.

"Supposing that the next position to which General Government will proceed after the works already commenced are completed, will be the narrows at and between Signal Hill and Hendrick's reef, I have addressed to Colonel Williams a letter on that subject which he will probably communicate to you. Should the commencement of any particular plan of operations at that place be completed by the General Government, or should a plan now be proposed which it would be acceptable to them to carry on after the State appropriation is exhausted thereon, I feel confident that in addition to the One hundred Thousand Dollars the citizens in the vicinity will render voluntary services of considerable value."—Hastings, Pub. Papers of Daniel D. Tompkins, II: 163.

"The fortifications at Governor's Island progress very rapidly. Between 4 and 500 men are kept constantly employed on the works. The genius of Col. Williams, united with the superior mechanical abilities of Mr. Hillard and Snyder, has rendered this fortification, in point of strength and elegance, equal to any in the world. They are at present employed in the erection of a circular tower, which, from its situation, will be of great advantage, in case of attack, being placed on a point of the island, from whence it can command the Narrows, and in fact, the whole of the Channel. It will be completed in about three months. At Bedlow's Island, also, they have commenced the erection of a Star, which will be of great service, and the chains are forging, which is to be applied to the blocks to be sunk in the Channel. While the works are all completed, the general idea of our harbour is defenceless, will, we hope, cease, as whatever nature and art can furnish will be applied; it will be placed in a posture of defence superior to any in the United States."—Columbian Centinel, My 18, 1808.

Gov. Tompkins informs Secretary of War Dearborn that a sheriff and jury have fixed the value of Ellis Island (see Mr 18) at $10,000.—Hastings, Pub. Papers of Daniel D. Tompkins, II: 85-86.

The committee on the communication of M. Du Buc de Marenville (see Ap 25) makes the following report: "That they have had an interview with Mons' Du Buc, and from a long conference with him are of opinion, that he is a man of education, talents and military experience: That he possesses to have had several objects of defence which are not in use, and are at present unknown to any person but himself and one confidential friend, to whom he has imparted his discovery, and which, if adopted, would render this harbour completely secure against naval attack. That in addition to the advantage of affording complete security to the city, which his plan possesses over all other plans of defence which have been proposed, there would be an immense saving of time and money; insomuch that the defence and security of the city may be rendered complete and effectual by the 1st day of November next: and the expense attending the same would not amount to one fourth part of the sum which would be required to complete either of the systems contemplated by the Corporation.

"He further proposes to make a full disclosure of his plan and means of defence to the Corporation allowing them fourteen days
THE ICONOGRAPHY OF MANHATTAN ISLAND

1808
May
16
for considering and examining the same, and then to decide,
whether they approve of any of the said means and determine
in what form or modification the same shall be received, to
make use of, or them, in any form or manner that the Board
shall, in the opinion of the Board, be pleased to direct,
and in addition to the sum of Sixty Thousand Dollars.

"Although the Committee are unable to form any precise
opinion on the merits of a plan, the particulars of which have
not been made known to them, yet they are impressed with a
belief that the disclosure of the means contemplated by Mr. Du Buc
for the defence of this and other harbours of the United States,
might be a public benefit, and perhaps of essential importance
to the defence and security of this City, in case of War with any
maritime nation. They do not however feel themselves authorized
to advise the assumption by this Board, of so high responsibility
as the payment of the sum in question, without indemnification
from the Government of the United States, to whom it of right
belong, to direct and manage all measures relative to the public
defence."
The committee recommends and the common council adopts
a resolution requesting Mayor Clinton to inform the
federal government of the proposals and to express the city's
willingness to enter into arrangements with Du Buc providing
the United States will defray any expenses which may occur.—

The committee appointed on March 28 (q. s.) reports "That
Wednesday the 23th inst. [q.s.] have been selected for the purpose
of depositing the remains of our unfortunate Countrymen,
who perished on board the Jersey prison ship during the revolutionary
war with Great Britain, in the Vault lately built for that purpose
near the Wallabout, by that Society [Tammany]." Upon
the recommendation of the committee it is resolved that "the Bells in
the City shall be tolled on Wednesday the 25th inst. from sunrise
o'clock P. M.," and that "the Comptroller furnish as much powder
as will be necessary for the military on that day."

An ordinance passes to pave Robinson St. between Church St.
and the college yard, which has never been paved or properly
dug out, and which has been built upon throughout, fenced in,
and occupied as a cow yard and stabling sty. On June 27, John
Delamater and others remonstrated against the improvement,
stating that the piece of ground situate in Chapel St. between
Barclay and Murray Sts. was not a part of Robinson St., but was
the property of the corporation of Columbia College.—M. C. C.
(1784-1831), V: 131, 150.

The committee of ways and means reports that it expended
$41,282.82 in relieving the wants of indigent and necessitous
citizens in the course of the last winter.—M.C.C. (1784-1831),
V: 123, 124.

One "Mrs. Carney" opens a "Punch & Tea House," having
the sign of the "Free Mason's Arms." It is "adjoining the premises

In a petition to the building committee for the spread of
Cherry Stages, the petitioners state that "their wages have been formerly 10s.
per day during the winter, and 12s. per day during the summer; but during the last winter,
their wages were reduced to 8s. per day. Owing to "the pressure and difficulty of the times," they "cheerfully submitted to this reduc-
tion of their wages; but as they do not apprehend that the same cause
now exists, they are of opinion that they ought to be raised
to their former standard." They now receive 9s. per day, "though the price of provisions is now fully as high as they were,
about this time, last year." They plead the insufficiency of this sum
to support their families. Masons employed by the committee
"have now 10s. per day," although "the wages of Stone Cutters
were formerly higher than the wages of the Masons." The "wages
allowed the different cutters in the different shops in this city are
now 12s. per day." From the original petition (MS.), in metal file
No. 27, city clerk's record-room.

Secretary of War Dearborn writes to De Witt Clinton: "Mr. Du
Buc [see Ap 25 and My 16] has made communication to the Presi-
dent of the United States and to this department relative to a
system of defence: &c. The conditions on which Mr. Du Buc
proposed his secret system of defense which he is to be permitted
as well as I am able to recollect that he was to receive $50,000 with
such additional sum as Congress might afterwards be pleased to
grant; being of so unusual and extraordinary a nature, as to bar
any further correspondence with him on the subject.

If Mr. Du Buc will state explicitly what his system of defence
is, it can then be judged of, and if not approved, or if not con-
sidered of so much importance as to entitle him to such a sum as a
rewards or modification demanded, I will agree on the part of the
government of the United States, that no use shall be made of his
proposed system or any communication relative thereto made
public without his consent. The president of the United States
could not consider himself authorized to enter into any agreement
that would or might involve a payment of fifty or sixty thousand
dollars, without being specially authorized by Congress." When
this was read in common council on May 23, it was referred to the
committee of defence.—M. C. C. (1784-1831), V: 133-34.

Upon the recommendation of the committee appointed to
confer with the Tammany Society (see Mr 28 and My 16), the
common council passes the following resolutions: "Resolved
that this Board do recommend that the citizens do observe the
same day [May 25, q. s.] in as remembrances a manner as may
be consistent with their avocations, and that as far as may be con-
venient, they do unite in setting the same apart, to the com-
memoration of our brave but unfortunate countrymen, who
perished on board of the British prison ships during the revolu-
tionary war, and the interment of their remains."

Resolved that it be recommended that the different Church
bells and the bells on board the Ships in the harbour, be tolled
seventeen minutes to commence at Sunrise on said day and also
during the procession.

Resolved that it be recommended that the colors of the
different vessels in the port be hoisted, halfmasted, during the said
day.

Resolved that this Board will attend the procession which is
to take place on the said day.

Resolved that the lessee of the public wharves and Slips and the
Ferry Masters be and are hereby requested to cause all boats
and vessels of every description, except ferry boats, to be removed
from the Slips at the end of the Flymarket and Catherine Market.

The committee is directed to "provide suitable accommodations
for the passage of the Members of this Board to Brooklyn, on
the day of the procession." —M. C. C. (1784-1831), V: 137.

Eight revolutionary soldiers arrive in New York from Con-
necticut "for the purpose of attending the interment of the
remains of the martyrs at the Wallabout. They had themselves
suffered the loathsome imprisonment and are among the suffering
who escaped the horrors of the British buks." —Pub. Ad!, My
24, 1808. See My 24.

David Jolin, "acting as Marshal for the preservation of the
public peace on the Battery," addresses a memorial to the common
council, "setting forth that many persons were in the practice
of turning Cows upon the Battery, and dusting Carpets and drying
clothes thereon, to the great annoyance of the public convenience;
whereupon it is resolved that "the persons entrusted with the care
of the Battery", and the Board of Police, and the Police, do by
proper measures to prevent Cows and other Animals from being in the same:
and also that they prevent the spreading of clothes and dusting of
Carpets therein, and that they immediately remove from those
grounds any persons or Animals, intruding contrary thereto;
and generally that they immediately remove any objects or persons
which injure said grounds or are offensive to public order and
memorial is in metal file No. 17, city clerk's record-room.

The common council directs the street commissioner to open
"a Street Sixty feet in width parallel to and one hundred
and seventy feet south of Spring Street, from Varick Street to Sullivan
Street, through the grounds belonging to the Corporation of
Trinity Church, and the grounds belonging to Anthony Bowrown-

The common council allows John J. Schuyler "to establish a
Butchers stand at Greenwich in the vicinity of the State Prison."

Arrangements for the "Grand and Solemn Funeral Procession,
which is to take place on Wednesday the 25th instant, at the
interruption of the remaining Elephants and Five Hundred
American Seamen, Soldiers and Citizens, who suffered martyrdom
on board the Jersey and other British Prison-Ships, in the harbour
of New-York, during the American Revolution," are published.
The programme includes the following:

"1st. At break of day, a morning gun to be fired from the
Battery—The Park—Fort Columbus—the Battery, and at the
Wallabout. The Revelle will be beat at all the military posts, and every preparation necessary to carry the grand design into complete effect, will commence, under the direction and superintendence of proper officers previously appointed.

"At sunrise, the flags of all nations to be hoisted half mast, (except the British) on all public places, all military posts, all ships and other vessels, public and private, and wherever they can be seen to advantage, to be fired from the top of the posts, &c. &c. during which time all the bells in the city and on board the ships, will join in solemn toll for seventeen minutes.

"At eight o'clock, the citizens, the military and public bodies of all descriptions and orders, will assemble in the Park and view the process in order, (the whole being under the direction of Gen. Morton and Steddford) the citizens and societies, under the control and direction of Garret Sickles, the Grand Marshal of the day, and 12 sub. do. all distinguished by blue sashes and feathers, except the Grand Marshal, whose sash will be blue relieved with crimson and black.'"

In the procession are to march a trumpeter, heralds, cavalry, artillery, bands of music, Cincinnati, clergy, Wallabout committee, Tammany Society with 13 coffins containing the bones, sailors, civil officers of Brooklyn, Kings County, and New York City, the governor, lieutenant-governor, members of Congress and of the state legislature, diplomatic representatives, the Mechanic Society, "Ship-writers," the Hibernian Provident Society, cooperers, masters, tailors, hatters, Surgeons, members of the Freemasons, the Grand Lodge and sections of the state. These are to be accompanied by banners and floats. The line of march, it is said, will be "from the Park down Broadway to Beaver-street—down Beaver-street to Broad-street—up Broad-street to Wall-street—down Wall-street to Pearl-street—and up Pearl-street to the place of embarkation."—Am. Cit., My 24, 1808. See My 25.

"Because of unfavourable weather the burial of the prison ship martyrs is postponed until May 26 (q.e.v.)—Pub. Adv., My 25, 1808; L'Orac., My 26, 1808.

The remains of the prison ship martyrs are interred at the Wallabout "with a grandeur superior to any thing witnessed in this city since the national rejoicings on the adoption of the federal constitution." One of the newspapers says: "The day was one of devotion. Business was suspended."—The Procession, formed at the Park, agreeably to arrangements previously published [see My 24], moved through the streets to the places of embarkation. The concourse of spectators in the streets, the houses and upon the house tops, was immense. It seemed as if every man, woman and child in the city, was anxious to view this scene of national piety. The wharves and places of embarkation were so thronged as seemingly to menace personal safety, and yet in the passage to and from Brooklyn of many thousand persons, no accident happened—so admirably were the arrangements made and executed. At Brooklyn, twenty Ladies dressed in white with black crapes vails joined the procession and added interest to the scene. Arrived at the tomb, the Rev. Mr. Williston delivered an appropriate Prayer in a strain of unusual eloquence. He was followed by Dr. De Witt, the Orator of the day, in an address finely composed and delivered amid an enthusiastic and fervent round of spectators. When the sepulchral rites were performed, the procession returned to the Park in this city, where it was dismissed."—Am. Cit., My 25, 1808. See also Pub. Adv., My 27 and 28, 1808; An Account of the Interment of the Remains of 11,500 American Seamen, Soldiers and Citizens, who fell victims to the cruelties of the British on board their prison ships at the Wallabout, during the war. Thirteen minutes guns will be fired from each of these vessels in the vault. See Ja 9, 1823.

A "curious exhibition of natural and pleasing Philosophy, Deference and Morality" is to be held this evening at the "Lyceum, Corner of Broadway and Warren-street" (see Ap 20). The performance will conclude with "the celebrated Spectrology," and the "mysterious" models of boxes which British evacuation of New York will be shown.—Am. Cit., My 26, 1808.

The building on Broadway and Warren St. was at this period also called the "Warren street Theatre" and the "Lyceum Theatre."—N. Y. Com. Adv., Jl 19, 1808; L'Orac., Jl 26, 1808. See also Ja 16, 1809.

As the "dispersed situation of the property belonging to the Corporation, and the very imperfect information... of the sites and boundaries thereof, have caused frequent incoherences," the common council authorises the street commissioner "to procure a Map and description of all the property bounded by water within the Line of this Board, South of the line of the Commissioners designating such parts as are now occupied by docks or wharves, and for which no grant has been obtained."—M. C. C. (1784-1831), V: 149-50.

A committee of the common council sells to the governor lots 102 and 103, of the Common Lands, bounded on Manhattan Ave., to be used by the state for a powder-magazine.—M. C. C. (1784-1831), V: 144; see also Goerck's Map of the Common Lands, 1796, in real estate bureau of the comptroller's office, and another in the bureau of topography, borough president's office. See Je 15.

An application of Joseph Maginn, late City Surveyor, to be appointed to the Surveyors for the island, is referred to the committee on applications for office.—M. C. C. (1784-1831), V: 143. There is no report by this committee recorded. Maginn's name does not appear in the City Directory as a city surveyor from 1805 to 1809, inclusive, but from 1810 to 1815 it again appears so designated.

The street commissioner is directed to open Hudson St. from Charleston (formerly Hetty) St. to Christopher St.—M. C. C. (1784-1831), V: 147, 213.

Pepin & Breschard open a circus, for the display of horsemanship and other performances, at the corner of Broadway and Magazine (now Pearl) St.—L'Orac., My 28, 29, 31, and Je 2, 1808. For full account of the performers and their enterprise, see Greenwood, The Circus (1909), 105-6.

The location was immediately changed to the corner of Broadway and Anthony (now Worth) St., one block above, where the first performance was advertised to take place on June 2.—Com. Adv., Je 1, 1808. These first performances were held in the open air, but, on July 1, the proprietors advertised that they had "erected a covering for the Circus, and that the performances will in future take place in the evenings by illumination."—L'Orac., Jl 1, 1808.

Greenwood describes this circus as "a new wooden octagonal building," occupying five lots, "on the northerly side of Catharine, or Anthony, street, just west of Broadway."—The Circus (1909), 105. It was previously on the east side of Broadway.—Ibid. See also L'Orac., Jl 4; Daily Adv., O 11, 1808; and see, further, Ag 11, 1809.

The committee on the filling of the Collect is directed "to discontinue, until the further direction of this Board, the filling of the same from and after the 11th instant."—M. C. C. (1784-1831), V: 162. See also ibid., V: 179. See, further, Je 27.

Robert Fulton writes to Charles Wilson Peale: "My steam boat is now in complete operation [see Ap 25], and works much to my satisfaction, making the voyages from or to New York or Albany, 180 miles, on an average in 35 hours. She has three excellent Cabins, or rather rooms, containing 54 births, with kitchen, larder, pantry, Bar, and steward's room. Passengers have been encouraging..."—Sutcliffe, Robert Fulton and the 'Clermont', 686-89. See also N. T. Evr. Post, Je 2, 1808.

A model of Wadsworth's steamboat, a new invention, is on exhibition at the Phoenix Coffee House. The engine is 4-horse power, weighs 3 tons, and costs $2,500. The boat will go six miles an hour against the wind and the ordinary current of the North River. It is stated that Fulton's boat, with a 21-horse-power engine, of 15 to 20 tons, and costing $4,500, will only go two miles an hour.—N. T. Gen. & Gen. Adv., Je 11, 1808.

The common council passes a resolution directing the street commissioner to cause a "life-preserver" to be fitted on the pier to the part of Marketfield Street which leads from the intersection of Broadway to the Gate of the Battery."—M. C. C. (1784-1831), V: 172.
The cornerstone of the state arsenal (see My. 7) is laid.—

An organ of "domestic manufacture," made by John Geib & Son, organ-builders, of New York, and costing $5,000, is in St. George's Chapel. It has three "acts of Keys." A writer explains the superiority of this firm's products over organs from London.—Repertory, July 17, 1808.

Upon a report of the committee of defence, the common council requests Mayor Clinton to inform the secretary of war that the board, "anxious to obtain security and protection for the City against the hostile attacks of any maritime power, are disposed to assist your council in such discoveries of improvement that art or science of fortifications as may tend to ensure that object.

The corporation also resolves to guarantee to M. Du Bu de Marenville "the sum demanded by him, viz., $60,000, on condition that he make known to them or such agent or Committee as shall be appointed for that purpose, the particulars of his proposed plan of defence for the harbour of New York, consisting of means of defence not in use, with liberty to publish the same; and on condition that the same be adopted and put in force by the Government of the United States for this city and harbour, with the consent of the Common Council, within the term of Five Years."—M. C. G. (1784-1831), Vol. 167-69, 174. Secretary Dearborn answered the mayor's letter on June 29.—Ibid., July 19-34. Regarding De Marenville's plan, see further N. 7.

Abraham Alstyn informs the common council "that the soil taken out of the Collect is a species of Turf or peat and capable of being converted into fuel."—M. C. G. (1784-1831), Vol. 180. On July 18, the board ordered its committee to prepare the soil for use, Vol. 211. See also N. 3.

"A Memorial of Garrick H. Van Wagenen and others setting forth that the proprietors of the Lutheran burial ground were about enclosing the same whereby the communication from Carmine Street, through Clarkson Street to Greenwich Street would be interrupted" is referred by the common council to a committee.—M. C. G. (1784-1831), Vol. 181.

"The Royal Tiger Nero," at the Corlear's Hook Circus, is to be let loose "to a large Wild Bull, and immediately after a large Wild Bear."—Am. Crisis, July 11, 1808. See also L'OraZo, July 2, 1808.

The scarcity of water in the Manhattan Company's pipes is the subject of a complaint in one of the newspapers.—Com. Adv., July 5, 1808. See also Adv., July 25, 1808; and My. 9, 1809.

The summer theatre, at Vaushall is advertised to open on this day with a comedy and a farce. "The Boxes being now under tight covering, and the Pit partly enclosed with canvass, the performances will not be put off on any account whatever."—N. Y. Com. Adv., July 11, 1808; and see the Pub. Adv., July 17, 1808. See, further, My. 30.

Street Commissioner Huong brings to the attention of the common council "several growing evils now in full practice in the city, in opposition to the direct orders of the Corporation." These include the obstruction of the streets by the erection of posts for awnings, the uneven raising of gutters and the consequent interruption to the flow of water, and the extension of steps farther into the streets than the law allows.—M. C. G. (1784-1831), Vol. 208-10.

The Corporation are respectfully informed that the persons employed in digging the foundation of the Magazine in the Old Potter's Field, daily dig up coffins and dead bodies which are disposed of in the most indecent and disrespectful manner. Those who have friends interred there sensibly feel the indignity and request that they may be buried in a more suitable way.—L'OraZo, July 25, 1808.

The common council makes arrangements with the N. Y. Hospital for the reception into that institution of the maniacs and lunatics now in the almshouse.—M. C. G. (1784-1831), Vol. 211, 216.

The trustees of the First Presbyterian Church appoint a committee to prepare and present to the common council a memorial stating that the church possesses "Deeds which convey to them a lot of ground bounded in Wall Street & running from King's Hotel to the Federal Hall," 24 ft. and 2 in., front and rear, and 100 ft. deep.—Proceedings of the Trustees (M.S.), Vol. II. The memorial was presented to the common council on Aug. 8. See N. 14.

J. C. Tompkins makes a report to Secretary of War Dearborn concerning soundings that have been taken in upper New York Bay.—Hastings, Pub. Papers of Daniel D. Tompkins, II: 102-4.

The arsenal at the corner of Chatham St. and Tryon Row, erected in 1798, is conveyed by the city to the Free School Society.—M. C. G. (1784-1831), Vol. 106, 111, 200-2, 227-28; City Grants, Lib. E: 498. The arsenal was demolished, and the first school building erected by the Free School Society was built on its foundation (see Aug 28 and D 11, 1809). The Man. Com. Coun. (1866), 604, is in error in referring to this as Free School No. 2.

The common council receives a petition from Lois Keefe (see Ap. 11), "lessee of the Flagstaff at the Battery, setting forth her distressed situation and praying an abatement or modification of the terms." The petition is referred to the finance committee with the report that it has been referred to the Flagstaff to Ms. Keefe for $255, they had done so because she was a widow, although they had received offers of $250 a year and upwards; that, as they were informed at the time that with attention $800 or $1,000 yearly could be made, they therefore recommended that her petition be refused.—M. C. G. (1784-1831), Vol. 225, 226. See also description of Pl. 59, p. 425.

There are 238 wells and pumps in the city exclusive of the cistern pumps in the almshouse, jail, and city hall.—M. C. G. (1784-1831), Vol. 232-33. On Feb. 15, 1809, the number of pumps had increased to 249.—Ibid., Feb. 433.

A "most superb Poll, ornamented with a very elegant cap, dedicated to American Liberty," is to be erected by the Republicans on this day "near the upper end of Crosby street, in the Eighth Ward of this city."—Pub. Adv., Aug 20, 1808.

The soap and candle factory and the dwelling of Edward Watkeys in Nassau St. are destroyed by fire, his wife, daughter, and three black children being burned to death. The fire also consumes "Thorburn's Seed and Plant House; Mr. Brook's large Paint Shop, the second floor occupied as a School Room by the Rev. Mr. Barry; the Brick School House, belonging to the Presbyterian Church; a School House lately occupied by G. Baron, and several other buildings. The roof of the City [Society] Library was several times on fire."—N. Y. Gaz. & Gen. Adv., Aug 26, 1808; Am. Citizen, Aug 26, 1808; Proc. of Trustees of First Presby. Ch. (M.S.), Vol. II. Another paper commenting on the fire said: "Every exertion was used by the firemen and citizens to check the fury of the flames, but their efforts were for a considerable time of no avail, owing to the scarcity of water. In fact, until a supply was procured from the floating engine at the Fly Market slip, there could not be said to be any thing done. The pitiful nature of the Manhattan [Company]'s regulations has been lately glaringly displayed. It is a public abuse which calls loudly for redress, and we hope, the late alarming circumstances and the injustice sustained by our fellow citizens on such occasions will induce the Corporation of the City to adopt measures to remedy the evil."—L'OraZo, Aug 26, 1808. Donations were later solicited throughout the wards of the city, and more than $4,500 was raised for Edward Watkeys and the other sufferers by the fire.—Ibid., Aug 27, 29, 29, S. 3, 17, and O 15, 1808.

Fire destroys the distillery and other buildings at Delacroix's Wharf. The Board of Police in the Box, Aug 11, 1808; Pub. Adv., Aug 1, 1808. A notice was published on Sept. 3 that this fire, having deprived the Merch Delacroix "of almost every article necessary to a continuance of his business," the garden would "be reopened one night only for the benefit of the proprietors," on Sept. 5.—Pub. Adv., Sept 3 and 5, 1808. Delacroix's spectacular exhibitions were revived here on July 4, 1809 (Am. Crit., July 3, 1809),
CHRONOLOGY: THE RECONSTRUCTION PERIOD: 1783-1812

1808 and again 1 year later. A more extensive fire destroyed the entire prison on Dec. 27, 1813 (p. n.).

The "Republican Greens" are to parade at Bunker Hill (the Bayard place).—Pub. Adv., Aug. 31, 1808.

The common council directs the superintendents of repairs to "cause the high ground in Pottersfield to be drawn into the valley and levelled in such manner as to render the same more suitable for the purposes of a Cemetery."—V. 255. Oct. 3, 1814. The common council agrees that a ferry be established between Manhattanville and New Jersey, and that it be leased to Thomas Magrath for 10 years, the rent to be $20 per annum for the first half of the term and $20 per annum for the residue.—M. C. C. (1784-1814), V. 134, 151.

"The Street Commissioners deem it expedient to inform the public that there are now on the streets the only regular sewers of this city, and that no other proprietors or persons are authorized to give the lines of streets for the purposes of building; or to take any other surveys whatever. Samuel Stillwell, Bowery, near the Bull's Head, Charles Loss, Hudson street, near the corner of Charlton street, Amos Farning, Greenwich street, near Hubert street. Benjamin Taylor, New Bath, near Battery. Evert Bancher, Hudson street, facing Duane street park. The street commissioner ex-officio, at his office City Hall. The public are further informed that no building can be erected, fronting on any street of this city, unless the lot shall have been first surveyed, by one of the persons above mentioned under the penalty of fifty dollars for each offence.—That no lot will be considered as surveyed agreeably to the law, until a certificate thereof, from one of the said surveyors, is presented in this office, as evidence of such survey."—Pub. Adv., S 8, 1808.

"The Managers anxious to merit a continuance of the extraordinary patronage with which the Theatre was honored during the last season, have spared no pains and expense to re-establish the internal part of the Theatre. . . . The whole has been repainted. . . . The custom of standing on the seats in the Pit is highly deprecable, and the managers earnestly request that it may not be renewed. . . ."—N. Y. Com. Adv., S 10, 1808. This was the Park Theatre. The "Audience part of the Theatre" was also "entirely newly painted and decorated" in 1809.—Ibld., Aug. 15, 1809.

"The Street Commissioner being directed by the Board to enquire of the proprietors of ground required for opening Canal Street, whether they would wait five years for such sum as might be awarded to them by a jury to be impaneled for that purpose," reports what various owners reply. John Jay, Peter Jay Munro, Dominick Lynch, and Trinity Church have already consented to cede the street on condition that they will not be taxed for opening any part of it, and the board has agreed to this. "Walter Bowne, Thomas F. MacCormack, and James Warner's Heirs of Anthony Lysenard are the only persons having claims against said Street which remain to be adjusted; the former awards taking in all the other proprietors." The commissioner reports the reply of each of these.—M. C. C. (1784-1813), V. 212, 261, 273. See D 12.

"Under the heading "Mount Vernon Races," Robt. Dyde, proprietor of the Mount Vernon Hotel (see Ap 11), says, in a published announcement, that "having made round his Hotel a race course of an exact mile, which is allowed by judges to be excellent, respectfully acquaints his friends and the public that the races will commence on Wednesday the 21st of the present month, and the two following days—the winning horse on each day to be entitled to a handsome purse." A list of the races and rules follows.—Pub. Adv., S 13, 1808. Races were again held in October.—Am. Cit., O 17, 21, 1808.

Dyde also announces "that Major Warner's squadron of Cavalry, attended by the Flying Artillery, will be reviewed in his specious meadow, in front of the Hotel, on Monday next, 19th instant, when refreshments of every kind can be furnished, and prizes awarded to according with dinners, &c. —Pub. Adv., S 13, 1808. Some time prior to Nov. 29, a review was held there by Gen. Morton. On this occasion, Dyde was subject to severe criticism for serving poor food.—Am. Cit., D 1 and 2, 1808; Boston Gaz., D 10, 1808.

De Voe's newspaper index (at N. Y. H. S.) makes no reference to Dyde or the hotel in 1809 or 1810. In 1811, a notice of a box hunt refers to (what is probably the same place) "Bellevue, late Dyde's Hotel."—Columb. F. 5, 1811. Cf. Jl 18, 1811. For a much later reference, see Mr., 1821.

The Republicans of New York City hold a meeting at Martling's tavern and adopt the following resolutions:

"Resolved, That this meeting continues to reprove full confidence in the patriotism and wisdom of the President and of the Republican Majority in both houses of the Congress of the United States."—M. C. C. (1784-1814), V. 151, 1813.

"Resolved, That in our opinion the Embargo is a prudent, just, and politic measure . . . that a repeal of the same, under existing circumstances, would probably involve us in the calamities of War; and, that it is therefore the duty of every faithful citizen to afford the Administration his firm and decided support.

"Resolved, That the present opposition to the Measures of the Administration, merits the severest reproach of every true friend to the National Independence and Commercial Rights of the United States; particularly as such opposition may encourage foreigners to persist in withholding from us our just rights, and stimulate them to acts of future hostility and aggression.

"Resolved, That a committee be appointed to prepare and report a respectful Address to our Republican fellow-citizens of the United States.

"Resolved, That this meeting do approve of the Nomination made by a majority of our Republican Representatives in Congress, of James Madison as a candidate for the office of President, and Geo. Clinton for the office of Vice President of the United States."

"Resolved, That a general meeting of our republican fellow citizens, be convened at this place on Tuesday evening next, the 20th inst. [g. 2]—Address of the Republicans of N. Y. to their Republican Fellow-citizens of the U. S. (N. Y., 1808), 3-4.

The common council passes the following resolutions:

"Resolved that whenever the Commissioners for laying out Streets &c. [see Ap 3, 1807] find that in making any survey they shall be obliged to cut trees or to do any other damage more than which is the mere necessary consequence of entering and surveying on the lands, they be requested to confer with the owners of such lands and to have the lines run by amicable arrangements in the presence of such owner or of some persons appointed to assess the damage if any, or otherwise to have such damages amicably assessed the said Commissioners, in their discretion, first reporting the case to the Board; which shall apprize the damages will be considered, and in all cases reporting the assessments of damages as soon as made.

"Resolved that in all such cases of damages amicably assessed this Board will provide for the payment thereof till further order he taken thereon.

"Resolved that in all cases where the owners shall refuse at all to suffer the necessary obstructions to be cleared away the Commissioners be requested to report the nature and circumstances of the case with the probable amount of the damage to this Board."

"M. C. C. (1784-1814), V. 270. See O 10.

"The common council authorises the payment of $80 to James Harlde "for his services in transcribing the Manuscript laws of the Corporation, reading the twenty eight volumes of short and making an Index to the last edition of the laws."—M. C. C. (1784-1813), V. 270.

In accordance with the resolution of Sept. 15 (q. v.), a meeting of Republicans is held at Martling's and an address to the Republicans of the United States is adopted. This reviews the history of the war in Europe, the various decrees interfering with American commerce, and the attacks upon American ships, including the "Hornoke Affair." It urges support of the administration, stating that "upon the preservation of the general republican party, under Providence, the liberties and happiness of these United States depend."—Address of Republicans of N. Y. to their Republican Fellow-citizens of the U. S. (N. Y., 1805).

"John Marras, Painter of Portraits in Miniature . . . has the honour of inviting the Lovers of the Fine Arts to come and see his collection of Paintings in Miniature, copied by himself from
THE ICONOGRAPHY OF MANHATTAN ISLAND

1808

the most famous paintings in Italy. The advertiser lives in Broad-
way No. 159."—Weekly Museum, O 1, 1808.

26

Turtle soup was one of the famous viands of the time in New
York. It was advertised on this day by Edw. Bardin, for example,
to "be cooked to-morrow at the Phoenix Coffee House."—Pub.
Adv., S 26, 1808.

Various published notices of meetings, business transactions,
etc., which occurred at this tavern, and at the Merchants' Coffee
House which preceded it on the same site, were copied from con-
temporary newspapers by John Austin Stevens in two octavo handbooks (MS.), now preserved in the N. Y. H. S.

U. S. Senator Sam'l L. Mitchell writes to Judge Ambrose Spence
cer a description of the fortifications undertaken by the war
department for the defence of New York. "In the beginning of
April last a sentiment was expressed in an answer to the con-
current resolutions of our state legislature, by myself and my
colleague, Gen. Smith, that out of the money appropriated by
congress for the general defence, New York should largely par-
"t. Gen. Dearborn has directed a great deal of work to be
done. A foundation is laid for much more. . . . The chief
engineer, who planned these fortifications, and who actually
superintends their construction, is Col. [Jonathan] Williams, . . .
director of the military academy at West Point, and president of
Army Military Philosophical Society. His talents "in projecting the works, have been very ably seconded by capt.
Wheily in carrying them into operation. . . ." John McComb
was said to be one of the architects of Castle Garden.—See My
25, 1853. The plan of this battery has also been attributed to
Lieut. Jos. G. Totten.—Guerracy, N. Y. City & Vicinity during
the War of 1812-15, I: 68-69. Dr. Mitchell continues: "I shall
describe . . . as they appeared on my last visit to them a few days . . .

I. Governor's Island.

"1. Fort Washington is now finished excepting one barrack
just ready to be covered, and the opening in the covert way opposite
the gate, purposely left for the conveyance of materials. It con-
sists of four tiers of three curvatures and an attached casemate
ravelin, with two retired flanks, the whole capable of mounting
97 guns, and might without inconvenience bring half its force
at one instant against any passing ship, while it completely com-
mands the East river . . .

"2. At a point of the island extending westward to the very
ear edge of the channel a permanent foundation of solid masonry
has been placed on a bed of rocks, which till now much endangered
the navigation at the entrance of the East river as this point
was totally submerged except at very low water; on this founda-
tion is erecting a castle, being 3-6 of a circle of 400 feet in diameter,
which is designed to be casemated with bomb proof arches, and
to cover two tier of heavy metal . . ." This account of "the
Castle" closes with the statement that "within its walls is an
intersection of three casemates, with which all the shipping
of New York might be watered with ease."

II. Bedloe's Island.

"The front wall of the mortar battery which commands all
the channel and anchoring ground to the full distance that a shell
may be sent, is nearly up to the intended height; the form given
to this front is irregular, on account of the position of the island,
and the irregular shape of its bank. . . . This battery will be on
the level of the ditch of a star front in its rear, which not only
will command it, but will command and protect Ellis's island. The
excavations for this work are made, and the mason work
will be carried on at the opening of the spring, in the mean time
the work will go on until the severity of the winter puts a stop to it.

III. Ellis's or Oyster Island.

"The old wooden parapet is taken down at Ellis's island, and
the platform for a gun battery is completed, there only remains
to wall up the parapet, when it will be ready to receive its cannon.

IV. City of New York.

"1. A foundation is preparing by encompassing with a polygon
of blocks a space of two hundred feet diameter in a S. W. direction
of the flag staff of the old battery, the blocks will form seven sides
of an octagon, the two sides on the town side being made into one, the
blocks are nearly all sunk, and they will be worked up above high
water mark before winter, so as to be perfectly safe from the
ice; within the space that will be enclosed, a foundation will be
laid, and castle erected similar to that of Governor's island already

The common council resolves that a committee be appointed
"to confer with the Commissioners for laying out Streets &c [see
Ap 3, 1807] on laying out the bounds of the lots on the Middle

The common council orders that a block 50 feet square with
an L 90 feet long and 15 feet broad at the top "he sunk forty five
feet from the north end of the Pier at the lower end of Van
Street, and that a Bridge he built Forty five feet long and Thirty
feet wide to connect with said Pier and Block and be built solid
in the centre down to what is generally computed below the lowest
tide of low water mark, M. C. 1496, V: 286, 278-79. On Oct. 13,
the street commissioner advertised for proposals for doing the work.—Pub.
Adv., O 14, 1808. The proposal of Halsey and Westervelt was accepted by
the common council on Oct. 17.—M. C. (1784-1811), V: 290. See N 14,
Assessments for paving at the Fly Market, South St. from Wall St. to Burying Slip, Catherine St. from Bedlow to Cherry,
and Rynder St. in the intersection of Hester are confirmed by the
common council and commissioners appointed.—M. C. (1784-
1811), V: 281.

The common council passes an ordinance for laying the curb
and paving the carriage-way of Jay St. from Greenwich to Wash-
ington.—M. C. (1784-1811), V: 283. The assessment was approved
on May 5, 1809.—Ibid., V: 538. See also ibid., V: 572-71, 607, 645, 657.

John Pintard is directed "to provide Indexes for such of the
Minutes of the Common Council as have not heretofore been

As the names of the members of the several fire engine com-
panies are by law to be reported to the common council in Novem-
ber, the City Inspector Pintard was requested to produce the
Imblancs and furnished to the companies so that the returns may be
uniform. He has made a "rough Register of the whole Fire depart-
ment," and proposes "that a Book be provided to record the same,
whereby ready access can at all times be had as well to ascertain
the members of the respective Companies, as to furnish certificates
in evidence that such persons are exempted, agreeably to Law
from serving in the Militia or on Juries." The report is confirmed.

John Murray, at the age of 70, dies "at his seat, at Murray
Hill."—Daily Adv., O 12, 1808.

New York is "gain disgraced by the public whipping of five

culprits. The disgusting scene was attended by a large number of
both sexes . . ."—Daily Adv., O 15, 1808.

The trustees of Columbia College direct their clerk "to insert
in one or more of the daily Papers printed in this City the following
Advertisement: The Board of Trustees of Columbia College
finding it to be commonly reported and believed that Students
may be admitted into the College with less qualifications than are
prescribed by the Statutes; and wishing to arrest the progress of
an opinion injurious to the Reputation of the Seminary, and of
which, the effects may be fatal to the solid education of many
Youths; do hereby inform the Public that no part of the said
Qualifications can be dispensed with, and that no Student will
hereafter be admitted who shall not be well prepared in all the
parts thereto."—Hist. of Columbia Univ., 1754-1904, 57.
By a vote of 8 to 7, the common council resolves that a committee be appointed with power to settle ... by compromise or reference all demands made in consequence of damage, not wantonly or unnecessarily committed by the Surveyors or others employed under the Commissioners now surveying this island; and that the same Committee be instructed to report amendments to be proposed to the Honorable Legislature of this State to the Law under which the said Commissioners act. — M. C. C. (1784-1813), V: 290. See O 24.

27. The common council receives an invitation from Capt. John McLean, commissary of military stores, "to attend the ceremonial of depositing the State Artillery and Military Stores in the New Arsenal tomorrow at 11 o'clock A.M." — M. C. C. (1784-1813), V: 288. See O 37.

28. John Stevens issues proposals for commencing a line of steamboats from New York to New Brunswick, and from Trenton to Philadelphia. He says: "The application of steam to propelling vessels has been the favourite object of the subscriber for upwards of twenty years past. ... That the public may feel proper confidence in the competency of the subscriber to carry into effect the objects embraced in these proposals, he begs leave to state the performance of a Steam Boat he has built with a view to the navigation of the North River, in a voyage he made to Perth Amboy. ... Were his individual funds adequate to the completion of the object of the proposals, it would ... be his interest to retain the whole in his hands. But he is induced by another consideration to make the following proposals. He wishes to engage as many of his fellow citizens as possible in the undertaking; in order that they may feel a warm interest in the promotion of an object of so great public utility." Stevens engages to build, before May 1, 1809, "a vessel of 100 feet keel, and 15 feet beam, of the best materials, which shall possess every convenience and accommodation requisite for a passage boat between New York and New Brunswick, on board of which he will place a steam engine, which shall give her a velocity of at least five miles an hour, but probably much more." There are to be 1,000 shares in the enterprise at $75 each and Stevens "will warrant the payment of $8 per cent per annum in half yearly payments to any and every subscriber who will release to him one half of the nett revenue on each share exceeding $8 per cent per annum." — N. Y. Eve. Post, O 20, 1808. See O 27.

30. Simeon De Witt reports to the common council that the commissioners for laying out streets, etc. (see Ap 3, 1807) have finished their work for this season, and requests a warrant for $191.27 to discharge the accounts of persons employed by them and for incidental expenses. The warrant is immediately issued. — M. C. C. (1784-1813), V: 292. See O 19, 1809.

31. The common council asents to Gov. Tompkins' petition for selling a gore of land at the Battery, bounded by Pearl, Bridge, and State Sts. and by Mr. Gracie's land on the south; and of another gore of land fronting on Whitehall St. and running to a point on the south side of Bridge St. By the cession of ground near the Battery to the United States for an arsenal, and to the city for the extension of Bridge St., these gores had been isolated from the rest of the public land. The proceeds from the sale are to help pay for the arsenal. — M. C. C. (1784-1813), V: 292-93.

32. The street commissioner presents to the common council a deed of cession from Anthony L. Bleecker and Mary, his wife, for the land running through their property on the west side of Broadway, namely, Bleecker, Houston, Mercer, Wooster, Green, Lawrence, Thompson, and Sullivan Sts. The only condition of the grant is the regulating of part of Bleecker St., which is already accomplished and paid for by the city. The deed is referred to the council for his approval. — M. C. C. (1784-1813), V: 298. It was accepted by Oct. 31, and ordered to be filed in the comptroller's office. — Ibid., V: 292.

33. Assessments for filling Varick St. from Provost to North Moore St. and for paving Provost St. from Hudson to Chapel are confirmed by the common council and a collector appointed. — M. C. C. (1784-1813), V: 298.

34. "We understand that the Subscription for one hundred shares in Mr. Stevens' New York and New Brunswick Steam Boat," [see O 19] was opened in New Brunswick on Tuesday last [Oct. 27], and that upwards of fifty shares were subscribed for during the course of the day. The remaining shares, it is expected, have, before this time, been subscribed for. The subscription for one hundred and fifty shares will, apparently to proposals, open at 12 o'clock tomorrow, at the Tontine Coffee House. ... — N. Y. Eve. Post, O 27, 1808. See N 1.

35. "A Friend to useful Institutions and Justice" addresses to John Stevens through the press a series of questions regarding his proposal to establish steamboats to New Brunswick and Philadelphia (see O 19). These include queries regarding his patents, the probable conflict with the privileges granted to Livingston and Fulton, the possibility of navigation by night, etc. — Am. Cit., O 27, 1808. Stevens answered on Oct. 28, that he had obtained a patent for the boiler he intended to use, that his boat "will in no wise interfere with Mr. Fulton's or Livingston's inventions," that "Gentlemen of the highest respectability at New Brunswick will give it as their opinion, that the boat may be run at any time backward and forward that necessity may require," etc. — Ibid., O 28, 1808. See N 1.

An assessment for filling sunken lots in Broadway between Broome and Spring Sts. is approved by the common council and a collector appointed. — M. C. C. (1784-1813), V: 394.

36. "Mr. Fulton has commenced a second Boat for passengers to and from New York and Albany; she is on a larger scale than the one in operation, and is to start in May next, so that one will leave New-York and one Albany every third day. Under Mr. Fulton's patent Mr. John R. Livingston is building a Steam Boat to run between New-York and New-Brunswick, to start in April. Two are in contemplation under Mr. Fulton's patent, to act as ferries between N. Y. and Paulus Hook. They are to be constructed so that carriages, horses, etc. etc. can drive in at one end and out at the other with the facility they enter on a bridge. ... By Mr. Stevens' proposals [see O 19] he has in contemplation a line of Steam Boats from New-York to New-Brunswick, and from Trenton to Philadelphia, in which he calculates profit of 33 1/2 per cent, and offers in warrant 8 per cent—but how can he do this with Mr. John R. Livingston's boat for a rival, which will carry at least half the passengers? There is also a rumor about that Mr. Stevens' boat is only near an imitation of Mr. Fulton's leading principles as to encroach materially on his patent; and he will contest Mr. Fulton's right to use such principles. Indeed it is somewhat curious that Mr. Stevens should give his attention to Steam-Boats for 20 years and never produce anything which could give a clear view of success, until near two years after Mr. Fulton's boat had been running as a public packet, and her mechanism had been exposed to every artist who chose to examine it. We sincerely wish an honest success to every useful enterprise; but there is no property more sacred than that produced by the minds and none of which our laws should guard with greater care." — Am. Cit., N 1, 1809. See D 2.

In a message to the senate Gov. Tompkins says: "The title of Elliss's or Oyster Island, in the Bay of New-York, has been obtained by a course of proceedings in the Court of Chancery [see Mr 18 and My 16] ... and a conveyance of the tide of the people of this State to the United States, was thereupon executed. ... The accounts of disbursements under the act for the defence of the Northern and Western frontiers, and also under the act for erecting a State Arsenal in the city of New York [see Mr 19], are also hereto annexed. Two of the blocks or lots of ground offered by the Corporation in exchange for the old Arsenal [see F 5] have been obtained; the building erected is calculated to accommodate all the ordnance arms and Military stores in the city of New York ... to erect the workshops and gun houses, &c., I beg leave to recommend the sale of two small gardens of land belonging to the state, in the vicinity of the government house, in the city of New York. In consequence of a cessation ... of a part of the public ground within the city of New York, and of another part to the Corporation of New-York, for the extension of Bridge Street [see Ap 8], those two gardens have been separated from the land of the State, connected with the government house, and are almost useless for public purposes.

"The quantity of ground to be procured for a powder magazine, was limited to an half acre [see Mr 19]. Upon enquiry, and after earnest endeavors to ascertain the requisite quantity, it was ascertained that individuals to whom the purpose to which
1808 the ground was intended to be applied, was disclosed, would not
4 dispose of that quantity without an extravagant consideration.

An application was therefore made to the Corporation of New York, who were so liberal as to enable me to purchase the leasehold estate, and their reversionary interest in a lot of land, con- 
taining, by estimation, ten acres, inclusive of streets, for two thousand five hundred dollars. The lot is nearly square, and is bounded on the sides by streets opened, and to be opened.—

Senate Jour., 32nd sess., 14.
